CU Well Special Physicals

Save more than $80 on a comprehensive physical exam at the Sullivan Center! Usually more than $130, this summer we are offering special physicals for clients for only $50! These special physicals are done by Registered Nurses completing the Advanced Physical Assessment course at Clemson University and include the following:

Health History: including past and current conditions, vaccines, previous screenings and test results. This is an excellent opportunity to bring up any and all health questions or issues you may have. They will also ask you about your lifestyle including exercise habits, general diet, smoking habits, sleeping habits, stress level and family and work life. This discussion will also likely include a discussion of activities that may put you at risk and/or personal safety measures that can protect you from accidents or serious harm.	**Physical Examination:** including your height, weight, body mass calculation (BMI), blood pressure, vision and hearing testing, and a comprehensive physical assessment of all major systems (for example: ears, throat, thyroid, heart, lungs, abdomen, reflexes, and skin), as well as others that are not part of a routine physical examination (like nervous system, reflexes, and pulses). Men will receive a prostate exam and women will receive a pelvic exam (pap smear available for an additional cost). Laboratory testing will also be done for urinalysis and hemoglobin

Call the Sullivan Center to schedule your special physical for this special pricing. Special physicals will be available at the end of June and throughout July. There are only 50 slots available, so call today!
