MOTOR POOL DIESEL TANKS/PUMPS

Beginning August 3, 2020, there will be no access to the Diesel tanks for any vehicles/equipment at the Motor Pool.

There has been a contractor hired to come in and uncover the top of the 2 Diesel tanks. These interruptions are caused due to the overflowed pipes which are having to be replaced per DHEC standards. This will take place from August 3rd thru August 7th. From August 10th – August 13th the components will be installed on the tanks and the concrete will be poured and given time to dry. The tanks will be empty prior to any work being performed.

The chain between the Motor Pool lot and the Facility lot will be placed up to ensure that no vehicles can interfere with the work being done.

Unleaded pumps will continue to be open and able to use for authorized personnel.

The pumps/tanks will reopen on August 14th 2020.

If there are any questions concerning this process, please feel free to contact Shelly Hackett by email shall@clemson.edu or phone 864-656-0642.

Thank You,

Shelly
