Class Meeting Time: 9:30 – 10:45 TTh, Brackett 214
Instructor: Scott Brame
brames@clemson.edu
340B Brackett 656-7167

Office Hours: Thursday 1-5 and by appt.

Textbooks: Oberdan, Science, Technology and the texture of our lives, 3rd edition. Other readings from eReserve/online.

Course Overview: Science and technology are social institutions, with their own hierarchical social structures, interacting with each other as well as society at large. It is the purpose of this course to examine the myriad relationships which have arisen between society and the institutions of science and technology. Topics include multitasking, Facebook, online dating, Google, science and tradition, technology and the rewiring of your brain, and our notion of progress.

Critical Thinking (CT²) Integration: This course is a CT² seminar that purposely integrates critical thinking approaches and activities into the course experience. The emphasis of a CT² class is not to memorize facts and regurgitate them on an hour test. The CT² experience is designed to improve your critical thinking skills through an exploration of STS concepts, analysis, synthesis, and the articulation of these ideas at higher levels of abstraction.

Student Outcomes Students will be able to:

- provide details of the inception, development, and reception of scientific ideas and technological innovations by answering factual questions about these matters,
- analyze and critique arguments concerning the function and significance of scientific ideas and technological developments in social contexts, as well as present their analysis and critique in the form of written essays,
- be able to present balanced arguments that offer insights into the underlying assumptions and implications of those assumptions held by differing groups

General Ed requirement: This course meets the Science and Technology in Society (STS) general education requirement.

Grading:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>

Grading scale:

- A: 90-100
- B: 80-89.9
- C: 70-79.9
- D: 60-69.9
- F: below 60

Attendance policy: Attendance is expected. Any material covered in class and announcements made (including changes in assignments and policy) in class are your responsibility. **If you miss class, you are expected to know what happened.** The Dean of Student’s office will be notified about students with excessive absences or who miss the first exam/assignment without notifying the instructor.
Waiting Policy: If the instructor fails to show within 10 minutes of the starting time of the class you are allowed to leave.

Cell Phone Policy: It is not acceptable to have your cell phone ring or to be text messaging during class. Doing so is disruptive to other students and a show of disrespect to the instructor.

Class Disruption: You will be asked to leave the class if you prevent others from learning and dropped from the course if such behavior continues. Ringing cell phones can qualify for being ejected from a specific class.

Readings: As with any class, reading the assigned sections before class will enhance your ability to understand the material being presented.

Online Quizzes: Taken through BB, they assess your completion of assigned reading and your grasp of basic concepts. Due before class on date in syllabus. No quiz redos after due date without doctor’s excuse.

In-class Activities: You are required to complete the in-class activity by the end of the class in which they are presented. There is no schedule for these activities, they will come up randomly. You will need a laptop or smartphone to complete these.

Films/videos on schedule: These are to be watched BEFORE class, unless specified in the syllabus. Come prepared to discuss the film and to identify key concepts.

Essays: Being able to effectively articulate the topics being covered in your own words is a valuable word related skill. Essays will be graded on your ability to justify your beliefs referencing applicable ideas from the readings/films and by attributing the correct concepts to the essay question.

Class Participation: Part of your grade depends upon participating in class discussions.

Technology in the classroom: Laptops are permitted if their use is related to the class. Checking email, facebook, playing video games, surfing, etc. are detrimental to the learning process.

Instructor Evaluations: All students are strongly urged to submit an evaluation.

Academic Integrity: All infractions of the University policy on Academic Integrity will be reported to the Dean of Curriculum, in accordance with University regulations. No exceptions. For details, see pp. 28-9 of the Undergraduate Announcements.

It is expected that the readings are completed before the class for which they are assigned.
