Brand Font Installation Guide

Windows 7

Before starting – make sure that you have placed the brand fonts in a folder on your desktop.

1) Click “Start”, then “Control Panel”

2) Click “Appearance and Personalization”, then “Fonts”

3) Drag the font files from their folders on your desktop, into this folder. Windows will then install the font.

4) Restart your computer – when the computer restarts, the fonts will be available to the operating system and programs.
