Intermediate/Senior Healthcare Architect

11/17/2015  Intermediate/Senior Healthcare Architect, Stantec, Saskatoon or Regina office, SK, Canada

“While the advert below describes an Intermediate/Senior Healthcare architect we would also be interested in hearing from any graduates with some healthcare design experience who could grow into a role as described here.”

Overview:
We could design buildings just because we can, but we’d rather create places that inspire. Through our Architecture and Interior Design work, we challenge design ideas of the past to create spaces that foster a culture of collaboration—spaces that are designed for community. We believe good design extends beyond the physical elements of a space—good design shapes our lives, influences our behaviors and interactions, and has purpose. We strive to design spaces that are meaningful and memorable for our communities. Join our team of creative professionals and work with us to create inspiring spaces for all.

Responsibilities:
We are currently looking for an Intermediate/Senior Healthcare Architect for our Saskatoon or Regina office. In this role, your main responsibilities will include:
- Participate in Stantec’s Global Health Studio
- Provide expertise in the area of Healthcare Architecture, with a focus on Medical Planning for Acute Care, Ambulatory Care, and Long Term Care.
- Create and maintain relationships with local Health Authorities, healthcare institutions and construction industry
- Lead the preparation of Client and Consultant agreements, scope of services, work plans and fee estimates
- Understand and provide guidance on related technical and design issues
- Advocate for our current best practices and introduce new technologies; our practice uses innovative software, planning methods, and works at a fast pace
- Lead business development initiatives for the healthcare sector and project opportunities in the province of Saskatchewan and the Prairie Region on an occasional basis

Qualifications:
The successful candidate will possess the following:
- 7-12 years of related experience as Project Architect and business developer for healthcare projects
- Strong knowledge of the design process, healthcare design and technical requirements
- Registration as an Architect preferred
- Excellent analytical and problem-solving skills
- AutoCAD and Revit and presentation software skills are highly valued
- Project Management credentials are highly valued

We offer all candidates the opportunity to challenge their abilities in a dynamic work environment and your efforts will be recognized through a competitive compensation program. Interested candidates should visit www.stantec.com/careers to apply with a resume and cover letter.

Committed to the principles of Employment Equity, we thank all candidates; however, only those selected for an interview will be contacted.
