**Title:** Coastal Furbearer Technician

**Location:** Cape Romain NWR, SC  
Murrells Inlet, SC

**Job Description:** A summer technician is needed to work on a coastal mink restoration and monitoring project in coastal South Carolina. The study will be conducted in the Cape Romain National Wildlife Refuge near McClellanville, South Carolina as well as the coastal marshes of Murrells Inlet, South Carolina. The technician will assist with spotlight surveys and some scent/track board surveys throughout the summer. Hours will vary weekly, as the survey schedule is dependent on the tide.

**Qualification:** Applicants must be motivated, hardworking, dependable, and willing to work late nights, some weekends, and holidays. This position requires experience operating watercraft, high tolerance to swarms of biting insects, ability to effectively identify mink and record survey data, and experience with tides and coastal marsh systems preferred.

Interested applicants must submit a resume and contact information for references to:
