### Tuberculosis Risk Assessment

A tuberculin test is a screening used to identify tuberculosis (TB) exposure. It is not an immunization. It does not protect you from getting TB infection. A T-SPOT or QuantiFERON GOLD test is required for any student who has resided or traveled outside of the U.S. for more than two weeks within the last five years or has other TB risk factors. Students will be REQUIRED to be screened upon arrival to Clemson, or provide proof of screening performed in the U.S. within the past 12 months. TB screenings performed outside of the U.S. and PPDs will not be accepted.
