

# CELEBRATE SAFELY

## HELP STUDENTS STAY SAFE THIS FALL

The first few weeks of college life are exciting times. It is also a time when students may find themselves or others in a high-risk situation. There is evidence indicating an increased risk for alcohol poisoning, sexual assault and hazing around certain times of the academic year, including the first six weeks of school. Fall 2019 presents a unique situation in which Clemson Football will play Georgia Tech in the evening on Thursday, August 29.

You play a critical role because of your frequent interaction with students. We encourage you to have intentional conversations with your students about potentially high-risk situations.

### Here are some talking points to help guide your conversations:

- Remember, not everyone drinks. 46% of Clemson first-year students reported not consuming alcohol any in the past month (National College Health Assessment, 2018).
  - Encourage students with this fact. There are many ways to have fun and meet people without alcohol.
- Many first-year students don't have strong social connections when they arrive on campus, which is one reason the first six weeks of school are concerning. Because many students haven't developed those close relationships yet, they don't always feel like they have someone to count on if they get in trouble or need assistance.
  - Encourage every student to look out for others and step up as an active bystander.
- Encourage students to celebrate safely if they choose to go out:

<i>Before you go out</i>	<i>While you're out</i>	<i>At the end of the day</i>
