CBE Outreach Team Volunteers at First Lego League Competition

In January, the CBE Outreach Team volunteered at the First Lego League (FFL) regional competition at Tri-County Technical College. The graduate students served in a number of roles including score runners and session judges for the event. The FLL chooses a theme and a world problem for the competition, and teams of up to 10 kids, ages 9 to 14 years old, take 8 weeks to design and build a robot made of Legos to solve the problem set by the FLL.
