

COMPUTER SCIENCE

MINOR

Computers and computational thinking play important roles in countless fields. A Computer Science Minor from the School of Computing can enhance the value of many majors on campus by providing a solid foundation in programming and algorithms, along with depth of several topics at the upper-level. The Computer Science Minor requires taking CPSC 2120 and 12 additional credits in computer science of which at least nine credits must be at the 3000-level or higher. Students should allow for at least 4 semesters to complete the minor process.

Prerequisite Chain for Selected CPSC-Prefixed Courses
