

NRT RIES SPEAKER SERIES

Dr. Susan Cutter

Carolina Distinguished Professor at the University of South Carolina
Director at the Hazards and Vulnerability Research Institute

“Equitable Risk Reduction and Disaster Inequality”

The presentation examines the evidentiary basis for equitable risk reduction in an era of increasing risk inequality. Changes in the nature of hazards and their management have created a new normal of extreme events, increasingly complex and cascading hazards and fostered persistent disaster inequalities. Recognizing such inequalities is not the same as showing proof of them and integrating the empirically based evidence into practice and policy. Examples using South Carolina’s 2015-2017 disasters experience provides an illustration.
