ABOUT ME:

I am a doctoral student in the Engineering and Science Education department at Clemson University. I received my B.S. degree in Industrial Design from the Middle East Technical University in 2009, M.S. degree in Industrial Design from Istanbul Technical University in 2012 and M.S. degree in Industrial Engineering & Engineering Management from South Dakota School of Mines & Technology (SDSMT) in 2017. I have experience in instructing undergraduate labs in Industrial Engineering and Information Systems Management in the US and Canada. My primary research focuses on understanding the perfectionism in engineering students and its impacts on their decision-making process. My advisor is **Dr. Marisa K. Orr**.

I'M INTERESTED IN THESE RESEARCH QUESTIONS:

- What are the factors that influence perfectionism in engineering students?
- What tools can be designed to help engineering students to overcome perfectionism?

INTERESTED IN COLLABORATING?

I HAVE TO OFFER:

- Experience in conducting and analyzing quantitative and mixed-methods user studies
- Experience in application of IDEO Design Thinking process

I AM SEEKING:

- Opportunities to learn about current educational research in perfectionism
- Opportunities to collaborate on research related to engineering students and decision-making process
