

**Tenure Track Faculty
Clemson University
Department of Physics and Astronomy**

The Department of Physics and Astronomy at Clemson University seeks candidates to fill one or more faculty positions at the tenure-track Assistant Professor or higher level to begin August 16, 2013. Our department currently has strong research efforts in the areas of astrophysics, atmospheric and space physics, biophysics, condensed matter theory and experiment, materials physics, and theoretical quantum physics. We are considering applications from all of these areas and are particularly interested in experimental biophysics and ion beam physics; the latter may utilize an NSF-funded EBIT device that is being installed in the department.

Required qualifications include a PhD in Physics or closely related field, a record of substantive research, and good teaching skills at both the undergraduate and graduate levels. The successful candidates will be expected to establish vigorous externally funded research programs.

Applications should be sent as a single PDF document to cuphysicsjob@clemson.edu and include a curriculum vitae, publication list, statements of research interests and accomplishments, a research plan, a statement of teaching philosophy, and the names (and contact details) of at least three referees.

Applications received by January 3, 2013 will receive guaranteed consideration; however, applications will be accepted until the positions are filled. Information about our research and educational programs can be found at <http://physics.clemson.edu>.

Clemson University is an Affirmative Action/Equal Opportunity employer and does not discriminate against any individual or group of individuals on the basis of age, color, disability, gender, national origin, race, religion, sexual orientation, veteran status or genetic information.

Clemson University is building a culturally diverse faculty committed to working in a multicultural environment and encourages applications from minorities and women.

Clemson University is interested in candidates who can contribute to the cultural diversity and excellence of the academic community through their research, teaching, and/or service.
