

Jane Welch
B.S. Genetics, May 2011

My name is Jane Welch, and I'm a junior majoring in genetics. My involvement with the Honors College began before I even started my first semester here at Clemson; I participated in the EUREKA! program in the summer of 2007 and returned as a counselor for the program in 2008. Thanks to the opportunities given to me by the Honors College, I have discovered that I have a passion for research and have worked in Dr. Kerry Smith's microbial genetics lab since I was a 2007 EUREKA! participant. The Honors College has been very helpful with providing additional funding for the research that I do in the Smith lab. In addition to being an ambassador for the Honors College, I am also a mentor for the Honors Peer Mentoring Program and a committee member of Insider's View to CU, a new program designed to provide prospective honors students with a unique visitation opportunity at Clemson. Outside of the Honors College, I am currently an officer of Clemson's Biochemistry and Genetics Club, and I have been a member of a social sorority here at Clemson since the beginning of my freshman year.
