

Ashley J. Lawhon

B.S. Genetics, May 2011

Hi! My name is Ashley Lawhon and I am a junior Genetics major here at Clemson University. Within the Honors College, I am coordinator of the Honors Mentoring Program, an Honors Ambassador, and worked last summer at the Honors Office planning the Honors Freshman Day along with other various opportunities within the Calhoun Honors College. I also serve on the Advisory Board for the Honors College to help develop the program into something even greater. Being a 2007 Eureka! Alum and 2008 Eureka Head Counselor, I have also been very involved within research here at Clemson in Dr. Kerry Smith's laboratory. Through his lab, I will have two publications along with years of research experience. Thanks to the Honors College I have been able to help with some funding for the research I have been doing through the Honors Research Grants. Outside of the realm of academia, I am involved in greek life with my sorority Kappa Delta, and serve as Continuing Education Chair on the Executive Council of Tour Guides. During the year, I work as a desk worker up at the Visitor's Center so please look for me if you have any questions! During my time here at Clemson I have also been a 2009 Orientation Ambassador, member of Alpha Lambda Delta, Sigma Alpha Lambda, and the National Society of Collegiate Scholars Honors Societies. I was also selected as the 2009 Rising Star at Clemson and am featured in the 2008 Viewbook for prospective students.
