1. Problem
- Too much waste at school
- Need quality soils for our gardens

2. Develop Solutions
- Grade level compost stations
  - Collect scraps (fruits and vegetables) from the lunch room
  - Customized compost bins for each grade level
- School-wide recycling efforts
  - Recycle bins in every room (paper)
  - Collection teams (4th and 5th graders)

3. Big Idea
- McKissick Elementary is going GREEN!!

4. Goals and Objectives
- Reduce the amount of waste at school
- Timeline: September - May

5. Assessments
- Measure the amount of useable compost collected from bins
- Count the number of containers of recycled paper material
