Farm Enterprise Productivity Analysis (FEPA) – Learn how to create and analyze your own farm enterprise, and to perform production and financial feasibility analysis with the help of Clemson University Extension software. Bring your farm production records and your financial statements to test the financial feasibility of your current and/or new enterprise (crops, livestock, vegetables, fruits, etc).

(9 am to 4pm) with on-site lunch

Laptops will be available to all participants. But, participants are encouraged to bring their own. Microsoft Excel experience is not required, but advanced Excel spreadsheet features will be emphasized for the decision making. Fill out the form and bring it to the training session you selected from this website, or register Online.
