The institution has developed an acceptable Quality Enhancement Plan (QEP) that includes an institutional process for identifying key issues emerging from institutional assessment and focuses on learning outcomes and/or the environment supporting student learning and accomplishing the mission of the institution.

The QEP demonstrates institutional capability for the initiation, implementation, and completion of the QEP; includes broad-based involvement of institutional constituencies in the development and proposed implementation of the QEP; and identifies goals and a plan to assess their achievement.

The QEP is a demonstration of the commitment of the institution to increase overall quality and to promote student learning.

The QEP is a vehicle by which institutions can increase their overall quality and effectiveness by focusing on one specific aspect of the student learning environment/experience.

The QEP is a transformative, creative campus process that brings together diverse constituencies and ideas in the pursuit of the goal of improving student learning.

The QEP should be rooted in the results of institutional assessment, current research, best practices, and the institution's mission.

The development of a QEP is not an isolated process. The QEP should be derived from and integrated with the institution's strategic planning.

The QEP should be an ongoing project that profoundly affects student learning outcomes and is a catalyst for further improvements.

Planning for the QEP must begin with the belief that the student learning experience can be improved.

The QEP should be tightly focused on improving a specific area of the learning experience. Too big or too diffuse a topic is a recipe for failure.

The QEP can help identify other areas that need improvement.

The QEP process can improve faculty and staff morale and bring excitement to a campus.

You cannot solve all of the institution's problems with a QEP.
The Steps in the Development of the QEP

- Step One: Selecting the Topic
- Step Two: Defining the Student Learning Outcomes
- Step Three: Researching the Topic
- Step Four: Identifying the Actions to be Implemented
- Step Five: Establishing the Timeline for Implementation
- Step Six: Organizing for Success
- Step Seven: Identifying Necessary Resources
- Step Eight: Assessing the Success of the QEP
- Step Nine: Preparing the QEP for Submission

QEP Development Phases

- Pre-planning
  - Who should be involved?
- Topic identification
  - Topic identification—ensure broad input into identification and selection of topic
- Plan development
  - Conduct research, identify activities, and write the plan
  - Engage experts and develop a “champion”
- QEP Implementation
  - Pre-implementation—baseline data and initial structures
  - Implementation—manage the project and allocate resources

QEP Pre-Planning

- Understand requirements
  - Review SACS-COC materials
  - Attend SACS-COC conferences and institutes
- Identify who should be involved
- Identify key decision makers
- Identify key decision points
- Review other universities’ QEP processes
- Obtain resource support commitments

QEP Planning Timeline

Allow at least one semester to identify the topic. Faculty involvement is essential.

- Ambitious (18 months prior to visit)
- Comfortable (27 months prior to visit)
- Need 10-12 months to develop the plan

*NOTE: Timeline(s) will be revised regularly. For updates, visit http://www.clemson.edu/assessment/accreditation/index.html.

QEP Topic Identification Phase

- Use a process that obtains institutional input into the identification, selection, and acceptance of the QEP topic
- Process should have breadth of coverage
  - Involve all constituencies
  - Emerge from institutional assessment
  - Include expertise in student learning
- Topic should have some relationship to strategic plan

Generating QEP Topics

- Topic Identification Phase tasks
  - Look at strategic plan
  - Look at institutional survey results
  - Look at program review results
  - Look at what other universities are doing
- Team members are the primary contact with the faculty
- Open topic solicitation—online suggestion box
- Proactive engagement with ongoing committees/meetings
- Synthesize topics into master list of evolving themes and get feedback
- Seek more developed ideas—substantive proposals from faculty, staff, and students

Select Broad Topic

- Topic must be important to institution
  - Faculty involvement
- Allow specifics to surface in development phase
- Must be viable
  - Potential for adequate resources
  - Focus on student learning
  - Assessable
- Commitment by administration

Topic Selection Tips

- Do not pick topic too quickly—encourage alternatives
- Ensure broad faculty input
- Do not lose sight of a good topic
  - Assign justification responsibility if no one comes forward
- Beware of excessive breadth
- Advertise and Promote the project
- Don't lose sight of learning outcomes requirement, even if you are focusing on the learning environment
- Don't end up with a "solution looking for a problem"

What do Peer Reviewers Look For?

- Broad Based Involvement in Topic Selection
- Focus
- Assessment
- Institutional Capacity
- Broad Based Involvement in Implementation
QEP Review Process

- On-site review team is the first outside entity to see the QEP
- Institution may nominate QEP “Lead Evaluator”
  - Should be familiar with topic area
- Expect revisions following the site visit
- The Committee Chair and the SACS/COC VP will continue to review revisions

The QEP Document

- Limit of 75 pages plus 25 page appendix
- Include concise summary of QEP that can be used by the On-site Review Team in its report
- The document has to “make the case” by providing evidence
- Include summary statements of evidence supporting each of the five evaluation criteria
- Format:
  - Structural
  - Evaluation criteria
  - Creative

Some Recent QEPs

- Anderson University—Global Engagement: Anderson University Abroad
- College of Charleston—Going Further Faster: The College of Charleston First Year Experience
- Furman University—First Year Writing Seminars
- Lander University—The Lander EYE (Experience Your Education)
- University of Georgia—First Year Odyssey
- University of Texas at Austin—Signature Courses
- University of Virginia—Enhancing Student-Faculty Engagement
- Vanderbilt University—Building a Bridge to the Commons: Vanderbilt Visions and Student Learning at a Research University
