Work Opportunities in:

RESEARCH - developing new products, processes or materials.

TIRE TECHNOLOGY - product design, development and evaluation

GLOBAL ENGINEERING & MANUFACTURING TECHNOLOGY - supporting  
and developing manufacturing equipment and processes

MANUFACTURING - fast paced manufacturing environment

The intern programs at The Goodyear Tire & Rubber Company provide students with practical work experience in their chosen field prior to graduation. These programs can help students determine the type of work that best suits them, as well as help to focus their coursework in their chosen field. Ultimately, the program helps students in making their career decisions upon graduation. Ideally, many Goodyear co-ops and interns will become Goodyear associates after they graduate.

TO APPLY:

- 1) Request an on-campus interview with Goodyear through Michelin Career Center
- 2) Access the following website: [www.goodyear.com/jobs](http://www.goodyear.com/jobs)
- 3) Interns: Submit Job ID 13406 and create your candidate profile.
- 4) Also, submit resumes to Dr. D. Lickfield for preview by Cheryl Abbott, Goodyear
