

Stormwater Education

Because We All Live Downstream...

Lexington MS4's Carolina Clear Working Group

July 12, 2007

**Fire Services Training Facility
Lexington, SC**

Minutes

Attendance:

Rosemarie Nuzzo, Ken Knudsen, Steve Martin, Bob Brown, Larry Jackson, Ben Baxley, Roger Simpson, Sid Varn, Sheri Armstrong, Cal Swayer & Bill Blackston

The meeting was called to order at 1:00pm.

Bill Blackston, welcomed everyone and thanked them for there attendance and future participation. Everyone introduced themselves and told their job responsibilities and the MS4 that they represented.

Cal Sawyer of Clemson University did a power point presentation on what Carolina Clear is and is not and utilized the Coastal Waccamaw Stormwater Education Consortium (CWSEC) as a model program.

There was some discussion about regionalization and whether or not it was a good idea to be inclusive or exclusive. It was brought up that things could be accomplished in a bigger way in the mass media world when you look at the "economy of scale". Throughout the program items that were covered included Tracking and Documentation, Plan Development, coordination of a timeline, a county wide resolution and media exposure.

We finished up with a discussion about the county permit and the requirements within. Some speculation was made about what DHEC would be asking for in the upcoming meeting and how we would meet those requirements.

There being no further business the meeting was adjourned.
