Mission Statement:
The purpose of the Morgan Poultry Center is to support research, teaching, and Extension activities in an efficient and timely manner, while following the Agricultural Guidelines for humane treatment of poultry.

About:
The poultry farm maintains several breeds of poultry, either hatched at the farm or purchased from commercial vendors. The birds housed at the farm are used for research, teaching and extension projects. The farm is also used as an area for the public to view various breeds of poultry. Public, private and home school groups frequently tour the facility.

Teaching:
Students tour the farm as part of the basic Animal Science Techniques Labs to become familiar with the facility and to get an introduction to handling poultry. Both undergraduate and graduate students can get on-the-job training by volunteering or becoming a student employee at the farm. The teaching activities at the farm include poultry husbandry, nutrition, physiology, genetics and poultry judging.

Research:
The farm provides poultry of various breeds for support of research conducted by faculty and graduate students. Multiple departments have ongoing projects that extend from human nutrition research to animal genetics and embryology. Other studies include animal nutrition, range management, and egg shell quality. The Morgan Poultry Center also maintains flocks for other universities to produce eggs used in their embryonic research. Research has been conducted in a wide range of subjects. These studies range from nutrition and egg quality, all the way to physiology, anatomy, and genetics. Graduate students also have opportunities to conduct research at the farm year-round.
Solar Brooder House
The incubation/hatching facility is located in the Solar Brooder House. The farm maintains an antique incubator that is used to replenish the farm with young stock.

Research Outreach
The Morgan Poultry Center provides eggs to several departments on campus for embryonic research and laboratory activities. The farm also produces fertilized eggs that go for research at other universities and research facilities such as Furman University, University of South Carolina, Harvard University, University of California, Cincinnati Children’s Hospital and Greenwood Genetics.

Tours
Tours are by appointment only. Tours are of interest to many groups. The Moran Poultry Center’s tour has been enjoyed by many schools, church groups, day care centers, scout troops, and senior groups. Please call or email to set up an Appointment for your favorite groups.

Location
The Morgan Poultry Center is located approximately 1.5 miles from campus.

From Campus
From the intersection of Perimeter Road and Cherry Road, take Cherry Road away from campus. In approximately 1 mile there will be a 3-way stop. Turn right at the stop sign and the farm will be about 1/2 mile on the right.

From Off Campus
Take I-85 south to exit #19B (Hwy. 76/28 west). Exit toward Clemson University (tiger paws mark the way). Follow Hwy. 76/28 west for approximately 12 miles. At the traffic light past Tri-County Tech, turn left on Old Stone Church Road. Go 1/2 mile and at the 3-way stop turn left and the farm will be about 1/2 mile on the right.

Items for Sale

Fresh Eggs
(Call for Availability)
Chickens and Chicks by appointment only
Poultry fertilizer by appointment only
Fertile eggs are available for school projects. Sorry, NO fertile eggs sold to the general public.
