Learning Objectives: Upon successful completion of this course, the student should be able to:

1. Physically assess patients for cardiovascular disease, including palpating pulses, obtaining manual blood pressures, and patient history.
2. Set up for all diagnostic testing procedures including carotid duplex, extremity duplex and physiological testing, transthoracic, and transesophageal echocardiograms.
3. Acquire standard views in all of the above-mentioned diagnostic tests.
4. Successfully challenge Clinical Competencies for ABI, LE Arterial Duplex, LE Venous Duplex, Carotid Duplex, and 2D Echo

Topical Outline: Weeks 1-16:

Assignments for clinical rotations posted in BlackBoard. Rotations generally last for two weeks (unless a short week is encountered adding a few days to that particular rotation). For specific assignments, refer to posted schedule. This semester, you will have rotations in the cath lab, EP lab, OR and possibly with CT or MRI at GMH. Those assignments are still being processed so I will update you once we have some dates and locations selected.

Journal Club: This semester, each student is to select an article of their choosing from one of the professional journals (JDMS, JVU, JASE, etc.) and create a 45-minute presentation for clinical staff. The meeting must include a review of the article, a PowerPoint presentation outlining the article, a discussion of the article's findings and post-meeting quiz to assess the attendees' understanding of the material. Evaluations will be based on quality of the article chosen, thoroughness of the PowerPoint presentation, value of the post-meeting quiz, and the compiled results of the participants' feedback via meeting evaluations. You must set this meeting up in either October or November and coordinate your meeting with the lab manager of your choosing. Pam, Denise and Marilyn are aware and expecting you to approach them about this meeting.

*need to ok
create
this
6(0,18)*

000058

BlackBoard Exams: In addition to today's pop quiz, there will be online quizzes available via BlackBoard. These exams are similar to those presented in the CVT4240 course meaning they are multiple attempt, timed, and set-up similar to the ARDMS registry. All exams are due by midnight on 12/6/13.

Check-offs: The last two weeks of this semester are reserved for clinical check-offs. Each check off will have two observers assessing your skill using a standardized form. The evaluations are timed (30 minutes for ABI, 45 minutes for 2D echo, 60 minutes for carotid, LE venous, and LE arterial). If you are not assigned for a check-off, you will be assigned a clinical location outside of Patewood. The schedule will be released in the next few days on BlackBoard. The 2D echo check-off will be administered by you scanning one of the junior students with two observers checking you off.

To: Rhonda Todd; Deborah Falta
Subject: CVT 4250 and 4260

Rhonda and Deborah,

The change to make CVT 4250 and 4260 graded rather than Pass/No Pass were approved at last Friday's UCC meeting. I failed to ask about the credit information that was scribbled on these forms. It appears to indicate that the contact hours for these two courses were to be changed from the original 30 lab contact hours to 18 lab contact hours. This change is not stated in the Brief Statement of Change, but it is noted.

Deborah , was it your intent to change the lab contact hours? Rhonda, did the committee realize this at the meeting? Did Jan realize it? I just can't recall there being discussion about it, but as I am making changes in the system, I saw the note and just wasn't quite sure what was intended and what was approved! That is a significant change to go from 30 hours a week to 18, but that is the "usual" ratio. I just didn't want to make any assumptions.

Any insight/info would be appreciated. If it was intended and approved, Deborah will still need to update the form with this change.

Thanks to you both!

Shannon

Rhonda Todd

From: Deborah Falta
Sent: Tuesday, October 08, 2013 11:08 AM
To: Shannon Clark
Cc: Rhonda Todd
Subject: RE: CVT 4240

Hi Shannon

I am impressed that you noted that other 424 CVT course. Unfortunately, issues with that course are not as simple as the lab contact hours. We have made other changes to that course which have been approved at the department level. These changes now have to work their way up through the curriculum chain of command. One of the issues relates to lowering the number of academic credits associated with this first field/clinical experience from 6 to 3. When I prepare the course curriculum form, does that mean I should indicate only 9 lab contact hours, to be consistent with the formula?

I really appreciate your help & astuteness!
Debbie

To: Deborah Falta
Cc: Rhonda Todd
Subject: CVT 4240

Hey Deborah -

I notice there is one other course that has the 30 contact hours that was not included in last Friday's packet. I'm sure it wasn't included because the graded v pass/no pass wasn't an issue. Nonetheless, could you please submit a course change form changing the contact hours from 30 to 18. I will go ahead and change it in the system now.

I promise I am not trying to pile on paperwork, but if I make changes that we don't have documented, in several years someone will ask me or Rhonda why something changed and we won't remember.

The course is CVT 4240. Making this final change will get us to the point where CVT 4240, 4250 and 4260 are all 6(18) for hours and all three graded courses. Once you've changed CVT 4240, send a PDF to Rhonda and she'll get it in next month's UCC packet.

Please let me know if you have any questions.
