

Installing and Using the PawPrints Printer

There is a PawPrints student printer located in room 612 at Greenville ONE. Graduate students have a print allotment of 660 black-and-white pages, or 330 color pages, per academic semester. For more information, please visit [CCIT Printing and Plotting](#).

1. Navigate to <http://download.clemson.edu>. Log in.
2. Click **Printer and Plotter Drivers - campus printers and plotter**
3. Click **Student Printers and Plotters** for your respective operating system.
4. The download should begin. Once complete, run the installer.
5. Accept any prompts by clicking continue. Enter any passwords required.
6. Once the install is complete, you will be able to print to CCIT Lab printers from your computer.
7. When you click print, choose CCIT Lab Printers for your print job.

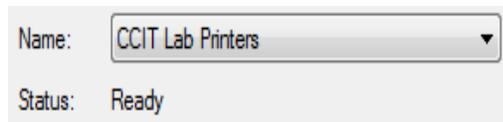

Mac

Printer:

Presets:

Windows

Name:

Status: Ready

8. After clicking print, you will be prompted to select a job name (optional) and enter your Clemson user ID. Select and enter your Clemson password. Your print job will then be queued for printing.
9. To retrieve your queued print job(s), simply swipe your Tiger 1 card at the printer, or login with your Clemson creds, in whichever lab you choose.

If you have any issues with the setup process, please email ITHELP@clemson.edu and copy Austin Sanderson (JSANDE3@clemson.edu).
