You have been hired to do a small planting plan for a residence in Clemson, SC. Utilizing the plants we learned during Plant Walk 2 (natives). Select trees, shrubs, and perennials for the planting plan below. Download the drawing and label each plant symbol (or grouping of plants) according to the plant's botanical name. Pay attention to not only the intent of the design, but also the plant characteristics and cultural needs.

(<https://clemson.instructure.com/courses/200396/files/17427698/download>)

In addition, create a plant list, where you list the botanical names, common names, and notes regarding the why specific plants were selected for your design (characteristics and cultural needs). This can be created in Microsoft excel. Save your labeled drawing and plant list as a single pdf and submit via Canvas.

Botanical Name	Common Name	Notes
<i>Fagus grandifolia</i>	American Beech	Large shade tree, does well in shade

Activity 2: Plant Selection		
Criteria	Ratings	Pts
Content Design is thorough and complete. Plants on drawing are clearly labeled. Table is created according to guidelines. Plant identification terminology follows industry standards (e.g. italicizing botanical name).		10 pts
Plant Selection Plants are appropriately selected based on their functional characteristics and cultural needs. Design intent is met with selections.		10 pts
Total Points: 20
