M.S./Ph.D. GRA/Postdoc Position – Plant and Environmental Sciences

Department of Agricultural & Environmental Sciences, Clemson University, Blackville, SC 29817

Description: A position is open starting Spring 2021 for a motivated and hardworking individual interested in improving agricultural peanut production in South Carolina and beyond. Selected research projects fit within the realm of plant pathology, agronomy and epidemiology and include modeling spatiotemporal data to examine and quantify crop response relationships for improved management efficacy and biological understanding, among others. The position will be located within the Department of Plant and Environmental Sciences at the Edisto Research and Education Center in Blackville, SC, though applicable coursework may be completed at Clemson’s main campus. Opportunities to work with growers and gain experience with Extension communications are available. The position will be open until a suitable candidate is identified and is being offered at the M.S., Ph.D., or Postdoctoral level depending on applicant fit.

Qualifications: Candidates should work effectively both independently and in a team, have the ability to work outside for several hours, lift 50 lbs., and possess excellent communication skills in English. Experience with field work is desirable. Familiarity with data analysis is helpful.

Application Materials: Personal Statement/Cover Letter describing relevant background, experience, research interests, and career goals, a resume/CV, as well as the contact information for three professional references should be emailed directly to Dr. Anco (letters need not be requested at this time). Qualified candidates will be encouraged to formally apply.

Contact: Dr. Dan Anco, danco@clemson.edu
