Group work & Critical thinking

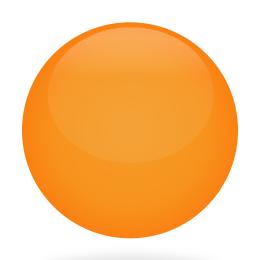

Group Work Problem	Solution
Students claim others don't contribute.	Conduct group work (not assignments) in class.
Some students feel they need to do all the work to ensure they will attain a high grade.	Offer professional communication strategies for them to try out in small groups in class.
Critical Thinking Problem	Solution
Definitions unclear	Provide multiple definitions: historic and contemporary; introduce real people; embrace messiness.
Promote relevancy	Use subject specific problems and outcomes; relate to vocation problem solving.

CRITICAL THINKING IS AN ANCIENT RICH CONCEPT

The practice and concepts are 2500 years old.

Socrates

- Socrates 469–399 B.C.E., lived in Athens, Greece
- He never wrote anything. But Plato did.
- He was ugly, really ugly.
- He liked to talk and ask questions.
- He acknowledged women as teachers.
- Young people started to ask questions too.
- He was sentenced to death for irreverence to the gods and killed by drinking hemlock (Conium maculatum).

Socratic method

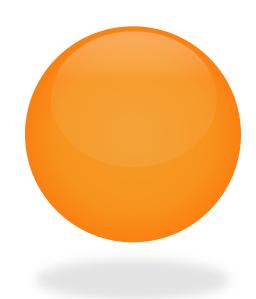

- Father of philosophy.
- Questions were asked to determine logic, ethics, fairness, and constancy.
- Inspired the scientific method (develop a hypothesis and then investigate validity.)

CRITICAL THINKING IS AN INTELLECTUALLY DISCIPLINED PROCESS

http://criticalthinking.org/pages/defining-criticalthinking/766

Critical thinking

- Critical thinking happens when we think about how we think... we track our own thoughts and decision making processes (Vincent, 2013).
- Critical thinking...the
 awakening of the intellect to
 the study of itself (Scriven & Paul,
 1987 from the Foundation for Critical Thinking
 Defining Critical Thinking at

DEFINING INTERDISCIPLINARY

Definitions

The terms multidisciplinary, interdisciplinary and transdisciplinary are increasingly used in the literature, but are ambiguously defined and interchangeably used.

Dictionary definitions

Multidisciplinary: Combining or involving several academic disciplines or professional specializations in an approach to a topic or problem.

Interdisciplinary: Relating to more than one branch of knowledge.

Transdisciplinary: Relating to more than one branch of knowledge; interdisciplinary.

Research definitions

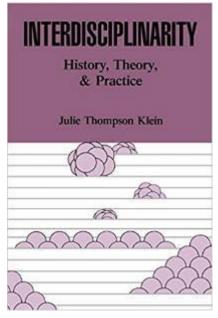

- Multidisciplinarity draws on knowledge from different disciplines but stays within their boundaries.
- Interdisciplinarity analyzes, synthesizes and harmonizes links between disciplines into a coordinated and coherent whole.
- Transdisciplinarity adds knowledge and production from outside the academy to the multiple disciplines within the academy.

Multidisciplinarity, interdisciplinarity and transdisciplinarity in health research, services, education and policy: 1. Definitions, objectives, and evidence of effectiveness. Choi CK, Pak, AW, 2006. https://www.ncbi.nlm.nih.gov/pubmed/17330451

nttps://sustainabledevelopment.un.org/cont/ent/documents/612558-Inter-%20and%20Trans

Academic definition

- Interdisciplinarity "is a means of solving problems and answering questions that cannot be satisfactorily addressed using single methods or approaches." (p. 196)
- Useful for "both short range instrumentality or long range reconceptualization of epistemology as it represents an important attempt to define and establish common ground." (p. 196)

Academic/field applied definitions

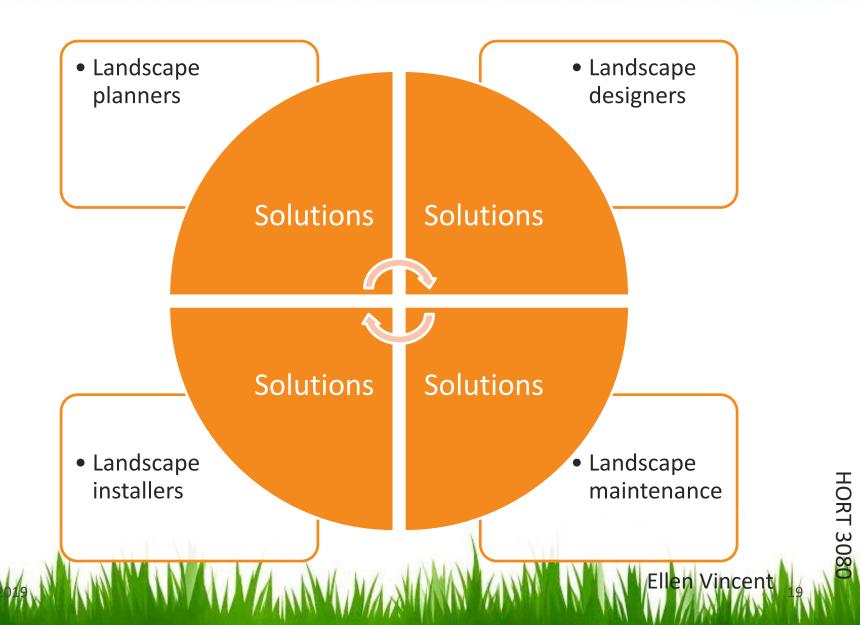

- Multi-disciplinary teams involve people from different disciplines.
- They agree to work as a team to create solutions for a specific issue/problem.
- Each discipline develops one or more solutions for consideration and presents these to the leader or the group for consideration.

Multidisciplinary teams

Academic/field/applied definitions

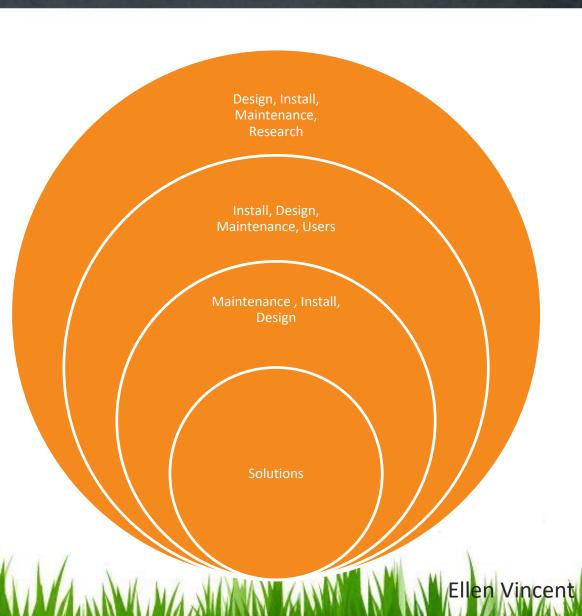

- Interdisciplinary teams involve people from different and varied disciplines.
- They agree to work as a team to create solutions for a specific issue/problem.
- They are willing to learn from the other team members and change their mind about how to solve the issue/problem.

From personal conversations between Dr. Vincent and Dr. Frank Fear https://www.laprogressive.com/spartan-silence/

Academic/field/applied definitions

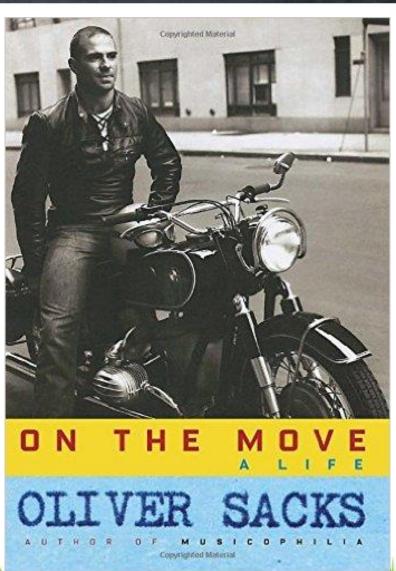

Multidisciplinary	Interdisciplinary
Relevant disciplines involved	Varied yet relevant disciplines involved
Meets at least once then continues work within one's own discipline	During group meetings seeks to learn about the problem from other people's perspectives
Submits work to leader or group for consideration	Continues to meet with larger diverse group (or relevant portions of) while developing solutions
Makes changes based on feedback	Team members have capacity to listen deeply
	Team members are willing to change their mind based on new information

State a claim (clear and obvious) made by authors (like a hypothesis) about engagement and/or dialogue:

In order for a group to be successful every member must be included and energetically engaged, through maintenence and facilitation

Validity checks (search for truth) using three methods/sources:

1-Experiential (personal or others)

Multi- or interdisciplinary work with conflicting or multiple opinions. (e.g. lab work, architecture projects)

and the second of the second s

2-Authoritative (professors, .gov; .edu; non-profit organizations)

A contractor who has to deal with and help converge ideas from a number of different professions on a daily basis.

3-Disciplined (peer reviewed lit, published surveys and experiments)

Published peer reviewed article on the subject of communication and engagement.

Alternate views/perspectives

Identify people or organizations who may disagree with the claim. State the source of the view.

- · A CEO who wants to have the final say on decisions, despite other opinions
- · Control Priented people in positions of power
- · A tenured professor who doesn't have Intellectual humility

- Engagement: is a stance which is expressed in answers to core questions: Why do you engage? With whom do you engage?
 Towards what tend do you engage? How do you engage? (p. xiii)
- Communities of practice are grounded in a theory of engaged learning: learning is social: members learn with others; from others, and through others...Engagement involves trust and shared leadership (Introduction, p.xvi)

ORT 3080

- …"Grounded in an ethos of mutuality, respectfulness, and stewardship, proceeding through dialogue, and fostering inclusive well being."
- Engagement is a way of being- both on campus and offenergized by the norms of engagement.
- Framed this way, engagement becomes a leadership and management practice.--Dr. Frank Fear

Dialogue

- (1) Equality: All participants are treated as equals.
 No arm-twisting, no pulling of rank, no overt or indirect attempt to influence.
- (2) Listening with empathy: Try to grasp each others viewpoint, even when they differ.

Dialogue

 (3) Bring assumptions into the open: Examine one's own and other participants assumptions. Once exposed (in the open) treat them with respect.

Dialogue vs debate

Dialogue	Debate
Assuming many people have pieces of the answer and that together they can craft a solution.	Assuming that there is one right answer and you have it.
Is collaborative: participants work together toward common understanding.	Is combative: participants attempt to prove the other side wrong.
About exploring common ground.	About winning.
Listening to understand, find meaning and agreement	Listening to find flaws and make counter-arguments.

Yankelovich, D. (1999). The Magic of Dialogue, pp. 39-40.

New York: Schuster

Dialogue vs debate

Dialogue	Debate
Revealing assumptions for reevaluation.	Defending assumptions as truth.
Reexamining all positions.	Critiquing the other side's position.
Admitting that others' thinking can improve on one's own.	Defending one's own views against those of others.

Yankelovich, D. (1999). The Magic of Dialogue, pp. 39-40.

New York: Schuster

Dialogue vs debate

Dialogue	Debate
Searching for strengths and values in others' positions.	Searching for flaws and weaknesses in other positions.
Discovering new options, not seeking closure.	Seeking a conclusion or vote that ratifies your position.
