

HEALTH SCIENCES | Bachelor of Science

FIRST YEAR

MIDDLE YEARS

LAST YEAR

Cultivate

Make the most of your time on campus.

- Review general education requirements
- Review program requirements with your academic advisor
- Attend long-term planning meeting with advisor

- Meet with Health Professions Advising (HPA) office
- If desired, start taking prerequisites for graduate school
- Consider a minor or certificate
- Develop relationships with faculty

- Work with an advisor to ensure course requirement completion
- Complete an internship
- Apply to graduate school

What are popular minors?

- Athletic leadership
- Biological sciences
- Business administration
- Chemistry
- Cluster life sciences
- Health services administration
- Nonprofit leadership
- Nutrition
- Psychology
- Sociology
- Spanish studies
- Youth development studies

Engage

with the world and community around you.

- Attend Tiger Prowl
- Attend the Study Abroad Fair
- Discover extracurricular activities

- Explore Creative Inquiry (CI) classes for research experience
- Study Abroad
- Attend HPA events and career fair
- Participate in career-oriented clubs

- Attend Tigers on Call
- Take advantage of the Career Center
- Attend an alumni networking event

Example employers:

- Health systems
- Governmental health departments
- Nonprofit organizations
- Corporate wellness
- Therapy centers
- Medical sales
- Health care consulting firms
- Advocacy coalitions
- Academic Institutions

Prepare

to use the skills you have learned after you leave Clemson.

- Shadow people in your field of interest or consider professional certifications
- Think about required clinical hours
- Meet with career services about on campus or summer opportunities
- Make a LinkedIn profile and begin connecting with faculty and alumni

- Continue patient care and shadowing hours and consider professional certifications
- Take on a leadership role
- Create resume and follow up with job leads
- Grow LinkedIn connections

- Assess skills and experience gaps
- Do mock interviews, edit resume and connect with PHS on LinkedIn
- Apply for jobs or graduate school
- Prepare culminating projects, portfolios or presentations

What skills do employers want?

- Ability to communicate clearly and effectively
- Ability to problem-solve and make decisions
- Ability to adapt
- Ability to think critically
- Proficiency in technology
- Ability to lead
- Ability to work in a team
- Knowledge of ethical behavior

What skills does this major teach?

- How to understand the complex intersection of environmental, social and individual factors influencing health
- How to research and synthesize large amounts of material
- How to identify public health needs
- How to advocate for health
- How to prioritize tasks, meet deadlines and manage time
- How to communicate with all people
