Clinical & Translational Research
Graduate Certificate Program

Testimonials

“I’m excited to gain the skills and foundation I will need to affect meaningful change for patients and care providers.”

“It was inter-professional, interactive and provided a contemporary perspective to increasing knowledge and skills for conducting clinical & translational research.”

“I love the applied skills I’ve learned throughout the curriculum and the ability to immediately put them into practice. I also love the eagerness of the faculty to work with and support graduate students. Lastly, I love the diversity of backgrounds and research interests within my cohort.”

We invite you to learn more about this graduate certificate program.

Application deadline: mid-summer

The goal of this program is to enhance clinical and translational research capabilities of clinicians, research support staff, and other health professionals.

Clemson University’s Departments of Public Health Sciences and Mathematical Sciences is now offering a graduate-level certificate in Clinical and Translational Research. To earn this graduate certificate, student must complete 8 required credit hours and an additional 4 hours of graduate-level elective courses.

**Required courses:**
- HLTH 8120 Clinical & Translational Science (2)
- HLTH 8210 Health Research I: Design & Measurement (3)
- HLTH 8090 Epidemiological Research (3)

**Elective courses:**
- HLTH 8140 Health System Quality Improvement (2)
- *MTHSC 8050 Data Analysis (3)
- *MTHSC 8070 Applied Multivariate Analysis (3)

*Note. MTHSC courses are offered on Clemson’s main campus.*
