Distinguished Lecture: Dr. Don Webster
Karen and John Huff School Chair
School of Civil and Environmental Engineering
Georgia Institute of Technology

Structure and Mixing of a Turbulent Meandering Chemical Plume

Dr. Don Webster earned his Ph.D. in mechanical engineering from the University of California at Berkeley. His primary research interests lie in environmental fluid mechanics, with an emphasis on the influence of fluid motion and turbulence on biological systems. His work has been featured in the New York Times and dozens of other news outlets. He is a fellow of the Association for the Sciences of Limnology and Oceanography and has served on the editorial board of the journal Experiments in Fluids for more than a decade.

Dr. Webster has won a number of awards, including the Class of 1934 Outstanding Innovative Use of Education Technology Award, the Eichholz Faculty Teaching Award, and the British Petroleum Junior Faculty Teaching Excellence Award. He has been a member of Georgia Tech’s Commission on Creating the Next in Education, including chairing a discovery group and co-chairing an ideation group.

2:30 PM on Friday, September 2, 2022
Watt Family Innovation Center – Auditorium
Reception will follow in the Watt Center Atrium
