Introduction

Welcome to the Bachelor of Science (BS) degree program in environmental engineering at Clemson University. Becoming an environmental engineer is a great way to use your engineering talents for the betterment of your community and the world around you. As an environmental engineer, you can help solve many of the environmental problems faced by society using principles of biology, chemistry, mathematics, and earth sciences. We need a highly trained workforce ready to tackle our increasingly complex environmental problems and design a healthier and more sustainable society. An undergraduate degree in environmental engineering opens the door to a variety of rewarding career options.

This handbook is a guide to the curriculum and graduation requirements in the degree program. It also gives helpful information on our program, its faculty, and its staff. It will help you select courses to meet the degree requirements and introduce you to our profession. You can find additional information about the program and its people at our website: www.clemson.edu/eees.

We are interested in your thoughts on our curriculum and the degree program. If you see the need for changes or additional information, please feel free to speak to anyone on our faculty or staff. By speaking up, you can help our degree program improve and grow.

Program Administration

The Department of Environmental Engineering & Earth Sciences (formerly the Department of Environmental Systems Engineering, and subsequently the Department of Environmental Engineering and Science) is an engineering department that has been an important part of Clemson University for over fifty years. It grew out of an environmental program in Civil Engineering in the 1960s and it has become a top twenty graduate program in environmental engineering. In 2022 the Department was placed in the School of Civil and Environmental Engineering and Earth Sciences jointly with the Glenn Department of Civil Engineering. The program began with an emphasis on water and wastewater treatment. It has expanded to include the entire environmental engineering discipline, with faculty conducting research and teaching courses in topics such as air pollution, hazardous and municipal solid wastes, environmental chemistry, nuclear environmental engineering, risk assessment, environmental sustainability, remediation of polluted sites, groundwater modeling, and more.

The EEES department has three undergraduate degrees: BS in Environmental Engineering, BS in Biosystems Engineering, and BS in Geology. The department has six graduate degrees: MS and PhD in Environmental Engineering & Science (including an MS with an emphasis area of Health Physics), MS and PhD in Biosystems Engineering, and MS in Hydrogeology. Departmental faculty teach in one or more degree programs. The courses taught in these other programs often complement the coursework in environmental engineering. Students may find relevant coursework in environmental ecology, renewable fuels, geology, hydrogeology, and geographic information systems (GIS) that can be interesting and useful elective courses.

Dr. Debora Rodrigues, Chair of Environmental Engineering & Earth Sciences administers the BS degree program. The Student Services Coordinator for the Environmental Engineering undergraduate degree is Jennifer Elliott. Her office is in 445 Brackett Hall. Dr. David Ladner is the Undergraduate Program Coordinator for the BS degree program.

Advising

You are assigned an academic advisor in environmental engineering when you complete the general engineering program and transition to our department. Students are required to see their advisor and obtain his or her approval for change of major or minor, course selection, advance approval for transfer coursework (summer or study abroad) and when course substitutions are needed, along with other issues that arise. This includes a meeting every semester for registration advising. Students who do not meet with their advisor will not be cleared for registration in the upcoming term.

The undergraduate coordinator for the Environmental Degree oversees the advising process as well as acting as a secondary adviser to the undergraduate students.

Curriculum

The curriculum for the BS degree in environmental engineering consists of 127 to 131 credit hours depending on the curriculum year. At Clemson, engineering students declare as general engineering (GE) majors for the first year. Upon completion of the GE curriculum, students transfer to their chosen engineering major and follow the required curriculum for the major. The environmental engineering undergraduate curriculum includes a wide range of topics associated with environmental engineering, including water and wastewater treatment, solid and hazardous waste management, air pollution control, pollution prevention, and risk assessment (see next page). All students will also participate in a professional seminar courses and a capstone design project. As a student, you will abide by the curriculum for the year that you matriculated at Clemson University. For most students this will be the year you declared as a general engineering major. For transfer students, it will be the year you transferred to Clemson. It is possible to switch your curriculum year to a later one; this should be discussed with your advisor to ensure it benefits you. All curricula currently in use by our students are listed below.

CHANGE OF MAJOR REQUIREMENTS: C grade or higher in each class and a 2.0 Clemson cumulative GPA						
CH 1010	ENGL 1030	ENGR 1020	ENGR 1410	MATH 1060	PHYS 1220	

Notes:

Students should always refer to the Academic Catalog for course descriptions and for course pre-requisites, corequisites, and concurrent enrollment requirements. Academic Catalog can be found here: <https://catalog.clemson.edu>. Advisors will assist students in scheduling courses to fulfill the requirements of the degree program; nevertheless, it is the responsibility of the student to fulfill the relevant requirements of the degree.

Footnotes

- ¹ The combination of **ENGR 1050** and **ENGR 1060** or the combination of **ENGR 1510** and **ENGR 1520** may be substituted for **ENGR 1020**.
- ² Depending on a student's Clemson Mathematics Placement Test score, **MATH 1040** and **MATH 1070** may be substituted for **MATH 1060**; or the student may be required to take **MATH 1050** before enrolling in **MATH 1060**.
- ³ See **General Education Requirements**. Three General Education credits must also satisfy the South Carolina REACH Act Requirement. See the South Carolina REACH Act Requirement in the **Academic Regulations** section.
- ⁴ **ENGR 1640** or the combination of **ENGR 1070**, **ENGR 1080** and **ENGR 1090** may be substituted for **ENGR 1410**.
- ⁵ **BIOL 1100** may be substituted for **BIOL 1030** and **BIOL 1050**.
- ⁶ **CH 2230** may be substituted.
- ⁷ **ENGR 2080** may be substituted.
- ⁸ **PES 2020** may be substituted for **GEOL 1010** and **GEOL 1030**.
- ⁹ Select **CE 3520** or **IE 3840**.
- ¹⁰ Select from **BCHM 3050**, **BE 3220**, **BE 4150**, **BE 4220**, **BE 4240**, **BE 4400**, **BE 4640**, **BIOL 4100**, **BIOL 4430**, **BIOL 4440**, **CE 2060**, **CE 2550**, **CE 3210**, **CE 3310**, **CE 3420**, **CE 4430**, **CE 4470**, **CE 4820**, **CH 3300**, **CH 3310**, **CH 4130**, **ECE 2070**, **ECE 2080**, **EES 3000**, **EES 3010**, **EES 4000**, **EES 4100**, **EES 4120**, **EES 4140**, **EES 4270**, **EES 4370**, **EES 4910**, **EES 4950**, **ENR 4340**, **ENSP 4000**, **FOR 4340**, **GEOL 2700**, **GEOL 3000**, **GEOL 3180**, **GEOL 4210**, **GEOL 4820**, **MATH 3110**, **MATH 3650**, **MATH 4340**, **ME 4260**, **MICR 4000**, **MICR 4100**, **MSE 2100**, **MSE 4150**, **MSE 4160**, **MSE 4170**, **MSE 4280**, **MSE 4340**, **MSE 4530**, **MSE 4580**, **MSE 4610**, **PES 4850**, **PHYS 2400**, **PHYS 2450**, **PHYS 4200**.
- ¹¹ Select **COMM 1500**, **COMM 2500**, or **HON 2230**.

NOTES:

1. If a student has completed all of the courses listed in the General Engineering core, in order to register for a complete schedule, they may need to consider registering for courses required in the engineering degree program they intend to pursue. Students should see the list of possible courses in the Major Specific Coursework section of the **General Engineering Program** entry. Major specific coursework is coursework outside the General Engineering core that will count towards an engineering major once a student has officially changed their major. *Note that not all courses will count towards every engineering major. The courses listed in the Major Specific Coursework should not be considered alternatives or substitutes for the courses listed in the General Engineering core. If a student takes one of these other courses in place of the courses specifically listed in the General Engineering core, they could delay their eligibility to transfer from General Engineering into one of the degree-granting programs in engineering.*
2. The following courses must be completed with a grade of C or better: **CE 2010**, **CE 2080**, **CE 3410**, **CH 1010**, **ENGL 1030**, **ENGR 1020** (or **ENGR 1050** and **ENGR 1060** or **ENGR 1510** and **ENGR 1520** if substituted for **ENGR 1020**), **MATH 1060**, **MATH 1080**, **MATH 2060**, **MATH 2080**, **PHYS 1220**, and **PHYS 2210**.
3. Depending on a student's math placement, they may be invited to take part in the General Engineering Learning Community where they complete the following courses: **ENGR 1000**, **ENGR 1010**, **ENGR 1100**, **ENGR 1110**, **ENGR 1510**, **ENGR 1520**, and **ENGR 1640**. The combination of **ENGR 1510** and **ENGR 1520** may be substituted for **ENGR 1020**. **ENGR 1640** may be substituted for **ENGR 1410**.

¹¹ See the Policy on Humanities and Social Sciences for Engineering Curricula.

Other notes

1. The following courses must be completed with a grade of C or better: [CE 2010](#), [CE 2080](#), [CE 3410](#), [CH 1010](#), [ENGL 1030](#), [ENGR 1020](#) (or [ENGR 1050](#) and [ENGR 1060](#) or [ENGR 1510](#) and [ENGR 1520](#) if substituted for [ENGR 1020](#)), [MATH 1060](#), [MATH 1080](#), [MATH 2060](#), [MATH 2080](#), [PHYS 1220](#), and [PHYS 2210](#).
2. Depending on a student's math placement, they may be invited to take part in the General Engineering Learning Community where they complete the following courses: [ENGR 1000](#), [ENGR 1010](#), [ENGR 1100](#), [ENGR 1110](#), [ENGR 1510](#), [ENGR 1520](#), and [ENGR 1640](#). The combination of [ENGR 1510](#) and [ENGR 1520](#) may be substituted for [ENGR 1020](#). [ENGR 1640](#) may be substituted for [ENGR 1410](#).
3. A transfer course may not be used to satisfy the General Education Global Challenges Requirement. While a transfer course may fulfill other degree requirements, students must enroll in a Clemson course(s) on the Global Challenges list to fulfill the Global Challenges Requirement.

GEOL 3000	Environmental Geology	3
GEOL 3180	Introduction to Geochemistry	3
GEOL 4210	GIS Applications in Geology	3
GEOL (CE) 4820	Groundwater and Contaminant Transport	3
MATH 3110	Linear Algebra	3
MATH 3650	Numerical Methods for Engineers	3
MATH 4340	Advanced Engineering Mathematics	3
MICR 4000	Public Health Microbiology	3
MICR 4100	Soil Microbiology	3
PES 2020	Soils	4
PES (ETOX, GEOL) 4850	Environmental Soil Chemistry	3
PHYS 2400	Physics of the Weather	3
PHYS 2450	Physics of Global Climate Change	3
PHYS 4200	Atmospheric Physics	3

Graduate Course Options

Course	Title	Credits
EES 8020†	Environmental Engineering Principles	3
EES 8030†	Physicochemical Operations in Water and Wastewater Treatment Systems	3
EES 8040†	Biochemical Operations in Wastewater Treatment Systems	3
EES 8430†	Environmental Chemistry	3
EES 8510†	Biological Principles of Environmental Engineering	3

†For students eligible to take graduate courses either for undergraduate credit or via the BS/MS program.

Research Options

Course	Title	Credits
<i>various</i>	Approved creative inquiry experience classes such as EES 4900	up to 3
EES 3000	Introduction to Research in Environmental Engineering	1
EES 3010	Honors Research in Environmental Engineering I	3
EES 4000	Honors Research in Environmental Engineering II	3
EES 4950	Honors Thesis in Environmental Engineering	1

Professional Seminar Courses

Students will have the opportunity to take courses which cover various topics related to the skills and techniques for evaluating career opportunities, seeking and obtaining environmental engineering employment, career development, professional registration, professional ethics, and other factors necessary for achieving success in a professional career.

- EES 1500
- EES 2500
- EES 3500
- EES 4500 – Senior Required Course

*EES 1500, 2500, 3500 may not be offered each semester.

Honors Program

Students who are members of the Calhoun Honors College (<https://www.clemson.edu/cuhonors/>) have the option of earning Departmental level honors, as described by the Honors College:

<https://www.clemson.edu/cuhonors/current-students/student-handbook/departmental-honors.html>

Students who are not members of the Honors College may apply to join if their cumulative GPR is 3.5 or higher by the end of the semester that they apply. The purpose of Departmental Honors is to provide Calhoun Scholars a unique opportunity to do advanced, in-depth study and research within their major academic disciplines. For the BS degree in Environmental Engineering, a four-course sequence must be completed:

- EES 3000 - Honors Seminar: Introduction to Research in Environmental Engineering (1 credit hour)
- EES 3010 - Honors Research in Environmental Engineering I (3 credit hours)
- EES 4000 - Honors Research in Environmental Engineering II (3 credit hours)
- EES 4950 - Honors Thesis in Environmental Engineering

Students interested in earning Departmental Honors are encouraged to contact a faculty member in EES who is willing to supervise these courses. Arrangements should be made prior to the start of a student's junior level courses.

Undergraduate Research

While the honors program is a formal way for undergraduate students to perform research, an appreciable number of students find other opportunities. Students are encouraged to peruse the web pages for faculty members in the Department to learn about their research activities. The faculty are receptive to student inquiries about working in a laboratory. The EEES student services coordinator stands ready to help students approach a faculty member.

The Department offers a number of Creative Inquiry (CI) courses (usually EES 4900) that focus on Environmental Engineering topics. Up to 3 credit hours of CI courses can be applied towards the elective credit hours in the degree if the courses are approved by the student's advisor and the department chair.

Preference is given to CI courses offered by our department. Students should obtain the approvals before enrolling in each CI course they wish to use for elective credit.

Combined BS and MS Degree Program

Environmental Engineering undergraduates at Clemson University may begin a Master of Science (MS) degree in Environmental Engineering and Science while completing their Bachelor of Science (BS) degree and use graduate courses to satisfy the requirements of both their undergraduate and graduate degrees. A complete description of the program may be found at:

https://www.clemson.edu/cecas/departments/ees//academics/documents/bsms/BS-MS_EES.pdf

[Interested in the B.S./M.S. Program? Contact Barbara Smith to get started.](#)

[Clemson University](#)

Office: 864.656.3278

Email: barbar2@clemson.edu

The following specific requirements apply:

Undergraduate/graduate transition (4th year)

- Undergraduate students must have an overall GPR of 3.4 or higher through their junior year. Students are expected to maintain this GPR to continue enrollment in the combined program.
- Up to 9 semester hours of 6000- or 8000- level EES courses may be used to satisfy the requirements of their BS degree. The 9 credit hours earned at the undergraduate level will be combined with 21 hours earned at the Masters level, for a total of 30 hours needed for a Master's degree. If fewer than 9 hours are taken at the BS level, these must be made up at the graduate level in order to reach the 30 hours for a Master's degree. The 9 hours taken at the undergraduate level towards the MS degree replaces the 9 hours of courses needed for the "Engineering or Science Requirement"(electives) category.
- Graduate assistantships cannot be accepted until full graduate status is attained and are contingent on availability of funds in alignment with departmental policy. Non-thesis students are not eligible for graduate assistantships.

Graduate program (5th year)

- Students can complete a thesis or non-thesis program. Most students will be non-thesis, with thesis reserved for those who show special interest and ability for research. At least one additional semester is typically needed to complete a thesis.
- Students in a combined degree program are conditionally accepted to the graduate program until completion of the BS degree requirements. Students interested in this combined degree program should consult the Graduate Program Coordinator and the Undergraduate Program Coordinator in the Department of Environmental Engineering and Earth Sciences. This program should be started by the end of the junior year, but no later than one semester prior to the expected BS graduation. Details are available in the Academic Regulations section of the Graduate School Announcements.
- EES Masters students are required to take three core courses: EES 8020, EES 8430, and EES 8510. One or more may be taken while the student is an undergraduate.

Earning Graduate Credit as an Undergraduate

Any senior with a 3.0 or higher university grade-point ratio may take graduate courses in excess of the requirements for their undergraduate degree. They may request that these courses be included as part of their graduate program if they are later admitted to the Graduate School. 6000-level courses cannot be taken if the corresponding 4000-level course is required for the undergraduate degree in the same academic major as the proposed graduate course.

General Education Requirements

The University has General Education requirements that must be satisfied prior to graduation. Some of these are built into the Environmental Engineering curriculum. Others are satisfied by selecting the appropriate elective courses in the curriculum. More information about General Education requirements can be found in the [online Academic Catalogs | Clemson University, South Carolina](#)

A minimum of 31 General Education credits, in addition to 2 credits of Academic and Professional Development included within the major, is required. BS environmental engineering students take at least fourteen credits of science courses that are not counted under general education in Degree Works. These include: BIOL 1030/1050 (4), GEOL 1010/1030 (4), PHYS 1220 (3) and PHYS 2210 (3).

In addition, many of the courses taken to satisfy the Arts & Humanities/Social Science Requirement for Engineering are on the general education list. Any BS environmental engineering student that completes these courses and the general education requirements in Degree Works satisfies the 31- credit General Education rule.

Arts/Humanities and Social Sciences Policy

This program includes a minimum of 12 credits in the Engineering Arts/Humanities and Social Sciences. Twelve credits are satisfied by completing the appropriate General Education requirements.

Global Challenges Requirement

Global Challenges credit hours must be selected from two different fields unless identified as interdisciplinary. At least three credit hours must be selected from a course(s) at the 3000-level or higher. A transfer course may not be used to satisfy the General Education Global Challenges Requirement. While a transfer course may fulfill other degree requirements, students must enroll in a Clemson course(s) on the Global Challenges list to fulfill the Global Challenges Requirement.

Registration Requirements

A cumulative grade-point ratio of 2.0 or higher is required for registration in engineering courses at the 3000-level or higher. Priority for registration in engineering courses is given to those majors for whom the course is a degree requirement. Exceptions to this requirement may be granted by the department offering the course.

Departmental Undergraduate Degree Requirements

All environmental engineering majors are encouraged to complete a Senior Exit Interview and Online Survey prior to graduation. Normally, graduating seniors are contacted toward the end of their final semester to schedule a date and time for the Senior Exit Interview. Unless there are unusual circumstances, all graduating seniors are expected to participate in the exit interview at the specified time.

The Exit Interview takes approximately 15 minutes and consists of a meeting with either the department chair or a representative. The meeting is a candid conversation about the program and its strengths and weaknesses with the topics being student-led. The online survey takes up to 20 minutes and asks students to evaluate the program and respond to specific questions and inquiries. These confidential ratings and accompanying comments are important as they are considered in degree program accreditation processes.

At the time of the Senior Exit Interview, you will also be asked to provide personal contact information. This is important as it allows us to get in touch with you about job openings or other opportunities that may arise once you have left campus. Your name will also be placed on the mailing list of alumni; among other things, you will receive copies of the departmental newsletter, which will allow you to stay abreast of what is happening in the Department of Environmental Engineering and Earth Sciences.

FE Exam Partial Reimbursement

Students may be reimbursed for \$50 of the cost to take the FE exam. Students are strongly encouraged to take the exam and seek reimbursement while they are still enrolled as a student.

To receive reimbursement, an itemized receipt showing your registration, date of exam, and payment for the exam is required. Unless requested otherwise, the reimbursement will be sent to the official address the student has on file with the university. These requests are to be submitted to the main Brackett Hall office, room 445.

Students may still seek reimbursement after graduation but will be required to register as a vendor in Clemson's procurement system, Buyways. Students must submit any reimbursement requests within one year of graduation to qualify. Exam receipts should be emailed to Melyssa Flinchum at mflinch@clemson.edu.

Student Groups

Environmental Engineering Club

The Environmental Engineering Club is a club for undergraduates in the BS Environmental Engineering program. The club provides a link between students, faculty, administration, and alumni to promote a network in the department and field. Students in the club hold meetings, on-campus activities, and field trips to stay engaged with one another and the community. Overall, the club is a place for those with common interests in environmental engineering to connect. Dr. David Freedman is the faculty advisor for the Environmental Engineering Club and can be contacted for more information (dfreedm@clermson.edu).

AWWA-WEF Student Chapter

The Department of Environmental Engineering and Earth Sciences sponsors a student chapter for the American Water Works Association (AWWA) and the Water Environment Federation (WEF). AWWA (www.awwa.org) is a professional organization focused on the drinking water industry. WEF (www.wef.org) is a professional organization focused on the wastewater and water resource recovery industry. The student chapter holds meetings, on-campus activities, and field trips to stay engaged with one another and the community. AWWA offers information about internships and full-time employment and invites industry representatives to chapter activities so students can network with professionals in the field. Through activities such as the annual career panel, students are assisted in launching satisfying careers in environmental engineering and other related fields. Dr. David Ladner is the faculty advisor for the student chapter and can be contacted for more information (ladner@clermson.edu).

Engineers Without Borders

The Clemson University student chapter of Engineers Without Borders (EWB) develops sustainable solutions to meet basic needs in areas of clean water, power, sanitation and education for communities in developing countries. Past projects have been in Nicaragua, Liberia, El Salvador, and Vietnam. Students have traveled to these countries to evaluate the needs of the communities. Additionally, the group has assisted hurricane-ravaged residents of New Orleans. There is interest in other domestic outreach projects closer to Clemson. During the semester teams of EWB members, working in conjunction with the Creative Inquiry program, meet weekly to develop a solution plan for each project. There are also monthly meetings for the entire club where a guest will speak about their projects or industries. Dr. Mark Schlautman is the faculty advisor and can be contacted for more information (mshclau@clermson.edu).

Sustainable Remediation Forum (SURF)

The Department of Environmental Engineering and Earth Sciences sponsors a student chapter for the Sustainable Remediation Forum (SURF). SURF (www.sustainableremediation.org) is a professional organization focused on promoting sustainability in the field of remediation. SURF provides an ongoing forum for incorporating societal and economic considerations into environmental cleanup projects. By including representatives of government, industry, consultancy, and academia, SURF allows students to become a part of the growing network of the field. The student chapter holds meetings, on-campus activities, and field trips to stay engaged with one another and the community. Dr. David Freedman is the faculty advisor for the student chapter and can be contacted for more information (dfreedm@clermson.edu).

Course Descriptions

The best way to find the most recent course descriptions is in the University's online course catalog. The 2022-2023 descriptions may be found online here: [Academic Catalogs | Clemson University, South Carolina](#)

For environmental engineering courses use EES as the "Prefix" and click on "Filter."

Faculty

Faculty in EEES who teach Environmental Engineering courses and advise undergraduates are listed on the Department's web site, under People and Current Faculty:

<https://www.clemson.edu/cecas/departments/eees/>.

Faculty members who teach courses and/or advise students in the undergraduate Environmental Engineering program include:

- **Dr. Michael Carbajales-Dale**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/dale.html>
- **Dr. Ezra Cates**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/cates.html>
- **Dr. Kevin T. Finneran**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/finneran.html>
- **Dr. David L. Freedman**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/freedman.html>
- **Dr. David A. Ladner**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/ladner.html>
- **Dr. Nicole Martinez**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/martinez.html>
- **Dr. Andrew R. Metcalf**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/metcalf.html>
- **Dr. Sudeep Papat**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/papat.html>
- **Dr. Mark Schlautman**
<https://www.clemson.edu/cecas/departments/eees/people/facultydirectory/schlautman.html>

Staff

Staff members in EEES are listed on the Department's web site:

<https://www.clemson.edu/cecas/departments/eees/people/index.html#staff>

The staff who work most closely with Environmental Engineering undergraduate students include:

Jenna Elliott

Undergraduate Coordinator

444 Brackett Hall

864-656-0470

elliott3@clemson.edu

Lori Alexander

Administrative Assistant

445 Brackett Hall

864-656-3438
