

The Chronological Tree of PhD Advisors

Advisor Co-advisors
 +
 Advisee

Peter Werenfels
University of Basel
 1627 – 1703

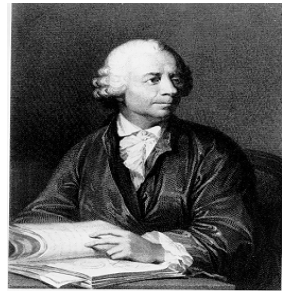

Jacob Bernoulli
University of Basel
Bernoulli distribution, Law of large numbers
 1655 – 1705

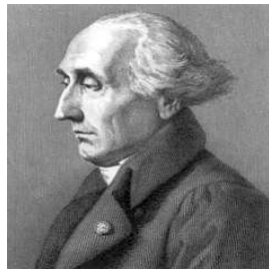

Johann Bernoulli
University of Basel
Infinitesimal calculus
 1667 – 1748

Leonhard Euler
Imperial Russian Academy of Sciences
Euler-Lagrange equations, Graph theory
 1707 – 1783

Joseph-Louis Lagrange + **Pierre-Simon Laplace**
École Polytechnique *École Militaire*
Lagrange multipliers *Laplace transforms*
 1736 – 1813 1749 – 1827

Siméon Poisson
École Polytechnique
Poisson distribution, Poisson processes
 1781 – 1840

Michel Chasles
École Polytechnique
Chasles' theorems
 1793 – 1880

Pafnuty Chebyshev
St. Petersburg University
Chebyshev inequality
 1821 – 1894

Jean Darboux + **Charles Picard**
University of Paris *University of Paris*
Differential geometry *Picard functor*
 1842 – 1917 1856 – 1941

Andrey Markov
St. Petersburg University
Markov chains, Markov processes
 1856 – 1922

Stanisław Zaremba + **Georgy Voronoi**
University of Warsaw *University of Warsaw*
Partial differential equations *Voronoi diagram*
 1863 – 1942 1868 – 1908

Wacław Sierpiński
University of Warsaw
Sierpinski triangle, Set theory
 1882 – 1969

Jerzy Neyman
University of California, Berkeley
Neyman-Pearson lemma, Confidence interval
 1894 – 1981

George Dantzig
Stanford University
Linear programming, Simplex algorithm
 1914 – 2005

Richard Van Slyke
University of California, Berkeley
L-shaped linear programs

Kailash (Kal) Kapur
Professor Emeritus, University of Washington
Linear optimal control systems, Reliability algorithms for large systems

B. Rae Cho
Clemson University
MC_{pmc} index, Special statistical inference and convolutions
