STUDY ABROAD
CARIBBEAN
ENGINEERING SMALL ISLAND DEVELOPING STATES

DESCRIPTION

Students will travel to multiple countries in the Caribbean to study how engineering and international development have had both positive and negative impacts in the countries of Haiti, the Dominican Republic and Dominica. Students will have the opportunity to study the effects of building the hydroelectric dam in Haiti as well as the impact and the remaining effects of the 2015 Storm Erica on the developing economy of Dominica.

These three small island developing states have many things in common as well as differences which will be explored. Students will also have numerous occasions to engage with the local community and explore opportunities for educational programming for the youth population in the area. Cultural site visits will be included. Students from all majors in CECAS are welcome to apply.

LOCATIONS
- Haiti, Dominican Republic and Dominica

DATES
- Summer Term 1: May-June

FIELDS OF STUDY
- Engineering: Open to all rising sophomores in CECAS

COURSE CREDIT
- CE 3990 and ENGL 3140

HOW TO APPLY
