COLLEGE OF ENGINEERING, COMPUTING AND APPLIED SCIENCES

The College of Engineering, Computing and Applied Sciences offers a broad range of rigorous and stimulating baccalaureate programs that provide unexcelled educational opportunities. The innovative combination of engineering and science disciplines that comprises the College, facilitates study and research in fields transcending the traditional disciplines. Students enjoy close interaction with a distinguished faculty committed to excellence in undergraduate education, as well as in research. Additional information on the College and its programs is available at www.clemson.edu/ces.

Minors

Engineering and science students can complement their majors by selecting minor concentrations of study. Available minors include International Engineering and Science, and one in each of the science majors (see page 110).

International Programs

The world economy has become very tightly integrated, making it highly important that engineering and science students prepare themselves for this global environment. The College offers a minor in International Engineering and Science coupled with several programs that provide opportunities for students to gain international experience. These include study abroad at many locations around the world and EPIC (an international co-op program). In addition, engineering and science students are encouraged to pursue study of a modern language. A Certificate in International Engineering and Science, that combines language study and an international practicum, is also offered. Information is available in the Undergraduate Studies Office (107 Riggs Hall) and at www.clemson.edu/ces/students/global.

Modern Language Requirement

A number of Clemson University degree programs require the completion of a modern language through a specific course level. Modern languages taught at Clemson University or accepted for transfer credit include American Sign Language, Arabic, Chinese, French, German, Italian, Japanese, Latin, Portuguese, Russian and Spanish. While many degree programs accept any of these modern languages for the requirement, certain programs may have specific modern language requirements. Students should consult their program’s curriculum map for details.

ENGINEERING PROGRAMS

The Bachelor of Science engineering degree programs in Bioengineering, Biosystems Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, Materials Science and Engineering, and Mechanical Engineering are each accredited by the Engineering Accreditation Commission (EAC) of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; telephone: (410) 347-7700.

All engineering programs have the common goal of producing engineering graduates who are able to:

- apply knowledge of math, science, and engineering
- identify, formulate, and solve engineering problems
- design and conduct experiments and analyze data
- design systems or components to meet needs within realistic constraints
- function on multidisciplinary teams
- communicate effectively
- conduct themselves professionally and ethically
- understand engineering’s global, economic, environmental, and societal context
- understand contemporary engineering issues
- apply modern engineering methods and tools
- appreciate the need for lifelong learning

Each engineering program has objectives specific to the discipline. All prepare students for a wide range of career opportunities and provide sound preparation for graduate study. Each curriculum provides opportunities for students to pursue individual areas of interest.

Admission Requirements

The University admission requirements are given under the section entitled Admission. Engineering applicants are strongly advised to include the following in their high school programs:

Mathematics—Four units, including geometry, trigonometry, and introductory calculus

Laboratory Science—At least three units, including both chemistry and physics

Computing—At least one unit, including introduction to a programming language. Applicants should have good keyboarding skills.

General Engineering Program

All new engineering students (including transfer students who have not completed all courses in the freshman engineering curriculum) are admitted into General Engineering. The General Engineering Program provides students an opportunity to explore various engineering fields while getting a sound academic preparation for engineering study.

Freshman Curriculum

First Semester

1. ENGR 1050 Engineering Disciplines and Skills I
2. ENGR 1060 Engineering Disciplines and Skills II
3. ENGL 1030 Accelerated Composition
4. ENGR 1090 Programming and Problem Solving I

Second Semester

1. ENGR 1070 Programming and Problem Solving II
2. ENGR 1080 Programming and Problem Solving II
3. MATH 1060 Calculus of One Variable I
4. PHYS 1220 Physics with Calculus I

3 - General Education Requirement

16-18

See Policy on General Education Requirements for Engineering Curricula below.

Students who plan to pursue a Chemical Engineering degree should consult an advisor for requirements.

Admission into Engineering Degree Programs

To transfer into an engineering degree program, a student must have completed the following courses in the freshman engineering curriculum with a grade of C or better:

1. ENGR 1050 Engineering Disciplines and Skills I
2. ENGR 1060 Engineering Disciplines and Skills II
3. ENGR 1090 Programming and Problem Solving I
4. MATH 1060 Calculus of One Variable I
5. MATH 1080 Calculus of One Variable II
6. PHYS 1220 Physics with Calculus I

Students who plan to pursue a Chemical Engineering degree should consult an advisor for specific engineering major requirements.

Admission into Engineering Degree Programs

To transfer into an engineering degree program, a student must have completed the following courses in the freshman engineering curriculum with a grade of C or better:

1. ENGR 1050 Engineering Disciplines and Skills I
2. ENGR 1060 Engineering Disciplines and Skills II
3. ENGR 1090 Programming and Problem Solving I
4. MATH 1060 Calculus of One Variable I
5. MATH 1080 Calculus of One Variable II
6. PHYS 1220 Physics with Calculus I

In addition, the student must have the minimum grade-point average specified by the engineering program for admission.

Students should initiate a change-of-major request prior to the registration period during the semester when they expect to complete the freshman curriculum. Students who fail to meet the requirements for admission into a degree program may remain in General Engineering until those requirements are met; however, General Engineering majors are not permitted to take 3000- or 4000-level engineering courses. Engineering departments may allow General Engineering majors to enroll in selected 2000-level engineering courses (policy varies by department). Students admitted into an engineering degree program will follow the curriculum in effect at the time of admission into General Engineering, unless otherwise approved by the specific engineering department.

General Education Requirements for Engineering Curricula

Engineers have an obligation to practice their profession in a socially responsible manner. The education of engineers must prepare them for this responsibility and make them aware of the constraints imposed by societal and cultural factors. Thus, the humanities and social sciences are an important component of the engineering curricula. Further, the program of study must include educational experiences addressing the intersection of science and technology with society and cross-cultural awareness.

In addition to the University General Education Requirements, some engineering majors are required to complete additional credit hours from a college approved list. Individual engineering curricula may have more specific requirements. For a complete list of acceptable courses, please speak with an advisor.

Electives for Engineering Curricula

Advisors must approve any course taken for elective credit in the Engineering curricula. Courses excluded for elective credit include PHYS 2000, 2070/2090, 2080/2100.

1-2 Students who plan to pursue a Chemical Engineering degree should consult an advisor for requirements.

3-4 See advisor for specific engineering major requirements.

5-6 Chemical Engineering requirements vary; please see an advisor for details.
BIOENGINEERING
Bachelor of Science

The undergraduate program in Bioengineering is built upon a rigorous engineering science foundation that is, in turn, based upon a broad curriculum of applied and life sciences, mathematics, electives in humanities, social science, and design. Students select a formal focus that concentrates in a subfield of interest in bioengineering: Bioelectrical Concentration or Biomaterials Concentration.

The curriculum provides undergraduates with a solid background in engineering and life sciences in preparation for advanced studies. Through the Bioengineering program, graduates acquire an understanding of biology, biochemistry, and physiology and the capability to apply advanced mathematics, including differential equations and statistics, science, and engineering, to solve the problems at the interface of engineering and biology. Graduates also have an ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and nonliving materials and systems.

Combined Bachelor’s/Master’s Plan
Bioengineering undergraduates may begin a Master of Science degree program or a Master of Engineering degree program while completing the Bachelor of Science degree and use a limited number of courses to satisfy the requirements of both the undergraduate and graduate degrees. Details are available from the Department of Bioengineering.

BIOELECTRICAL CONCENTRATION

Freshman Year
First Semester
4. CH 1010 General Chemistry
3. ENGR 1030 Accelerated Composition
1. ENGR 1050 Engineering Disciplines and Skills I
1. ENGR 1060 Engineering Disciplines and Skills II
4. MATH 1060 Calculus of One Variable I
3. Arts and Humanities Requirement1 or
3. Social Science Requirement1

Second Semester
4. CH 1020 General Chemistry
1. ENGR 1070 Programming and Problem Solving I
1. ENGR 1080 Programming and Problem Solving II
1. ENGR 1090 Programming and Problem Solving Applications
4. MATH 1080 Calculus of One Variable II
3. PHYS 1220 Physics with Calculus I2
3. Arts and Humanities Requirement1 or
3. Social Science Requirement1
1. Biology Requirement1

Sophomore Year
First Semester
3. BIOE 2010 Intro. to Biomedical Engineering
2. ECE 2010 Logic and Computing Devices
3. ECE 2020 Electric Circuits I
1. ECE 2090 Logic and Computing Devices Lab.
1. ECE 2110 Electrical Engineering Lab. I
4. MATH 2060 Calculus of Several Variables
3. PHYS 2210 Physics with Calculus II2

Second Semester
0. BIOE 2000 Bioengineering Professional Development
3. CE 2010 Statics
1. ECE 2120 Electrical Engineering Lab. II
3. ECE 2620 Electric Circuits II
2. ENGR 2080 Engineering Graphics and Machine Design
4. MATH 2080 Intro. to Ordinary Diff. Equations
3. MSE 2100 Introduction to Materials Science

Junior Year
First Semester
4. BIOL 3150 Functional Human Anatomy
3. CH 2010 Survey of Organic Chemistry1 and
1. CH 2020 Survey of Organic Chemistry Lab.2
1. ECE 3110 Electrical Engineering Lab. III
3. ECE 3200 Electronics I
3. ECE 3300 Signals, Systems, and Transforms

Second Semester
3. BCHM 3050 Essential Elements of Biochem.
0. BIOE 3000 Bioengineering Ethics and Entrepreneurship
3. BIOE 3020 Biomaterials
3. BIOE 3700 Bioinstrumentation and Bioimaging
3. ECE 3800 Electromagnetics
3. BIOE or ECE Technical Requirement1

Senior Year
First Semester
3. BIOE 3200 Biomechanics
3. BIOE 4010 Bioengineering Design Theory
3. BIOL 4610 Cell Biology
3. Arts and Humanities Requirement1 or
3. Social Science Requirement1
3. BIOE or ECE Technical Requirement1

Second Semester
1. BIOE 4000 Bioengineering Leadership and MedTech Commercialization
3. BIOE 4030 Applied Biomedical Design
3. BIOL 4480 Tissue Engineering
3. Arts and Humanities Requirement1 or
3. Social Science Requirement1

18

128 Total Semester Hours

Notes:
1. To transfer from General Engineering into the Bioengineering degree program, students must have a minimum cumulative grade-point average of 3.0 in courses taken at Clemson and must have earned a C or better in each course in the General Engineering freshman curriculum, including the Arts and Humanities/Social Science Requirements.
2. A student is allowed to enroll in ECE courses (excluding ECE 2070, 2080, 3080) only when all prerequisites have been passed with a grade of C or better.
3. All Bioelectrical Concentration students must have a cumulative engineering grade-point average of 2.0 to enroll in any 3000- or 4000-level ECE courses.
4. No student may exceed a maximum of two attempts, excluding ECE 2070, 2080, 3080 only when all prerequisites have been passed with a grade of C or better.

BIOMATERIALS CONCENTRATION

128 Total Semester Hours
¹See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.
²Students planning to enter medical school should take CH 2230/2270 instead of CH 2010/2020 and take CH 2240/2280 as an additional course sequence. Students planning to enter medical school should also take physics laboratories as additional courses (PHYS 1220 course with PHYS 1240 lab and PHYS 2210 course with PHYS 2230 lab).
³Select from department-approved list.
Note: To transfer from General Engineering into the Bioengineering degree program, students must have a minimum cumulative grade-point average of 3.0 in courses taken at Clemson and must have earned a C or better in each course in the General Engineering freshman curriculum including the Arts and Humanities/Social Science Requirements.

BIOSYSTEMS ENGINEERING
Bachelor of Science
Bioengineering is the field of engineering most closely allied with advances in biology. Bioengineers apply engineering design and analysis to biological systems and incorporate fundamental biological principles to engineering designs to achieve ecological balance.

The Bioengineering program emphasizes two main areas – sustainable bioprocess engineering, with its basis in microbiology, and ecological engineering, with its basis in ecology. Bioprocess engineering focuses on the sustainable production of bioenergy compounds - biofuels, nutraceuticals, bioactive molecules, and biomaterials - using metabolic pathways found in nature and green processing technologies. Ecological engineering focuses on the design of sustainable communities utilizing low-impact development strategies such as bioretention basins, rainwater harvesting, and bioswales for stormwater retention, treatment, and management. Both emphasis areas interface with ecologically-sound food and energy crop and feedstock production systems.

Bioengineers lead teams to:
• Design bioprocesses and systems for biofuels (biodiesel, hydrogen, ethanol), biopharmaceutical, bioplastics, and food processing industries
• Develop ecological designs (permeable pavement, bioswales, green infrastructure) to integrate stormwater management into the landscape
• Integrate biological sustainability into energy, water and food systems
• Provide engineering expertise for agriculture, food processing, and manufacturing industries.

Bioengineering graduates are highly qualified to pursue graduate studies in biosystems engineering, biomedical engineering or ecological engineering fields, or medical or veterinary school.

Students are urged to complete a minor and participate in the Cooperative Education, Biosystems Engineering Intern, and/or Study Abroad Programs. Those interested in medical school can fulfill requirements for the dual degree from the academic departments involved as early as possible in their undergraduate program. See Academic Regulations in this catalog for enrollment guidelines and procedures.

Freshman Year
First Semester
4 - CH 1010 General Chemistry
3 - ENGL 1030 Accelerated Composition

Any 3000-level or higher ENGR or other approved course.
Select from Sustainability Minor course list or other approved course.

CHEMICAL ENGINEERING

Bachelor of Science

The Department of Chemical and Biomolecular Engineering offers the Bachelor of Science degree in Chemical Engineering. Chemical Engineering students must take one of several emphasis areas (such as energy studies or environmental engineering), a concentration in Biomolecular Engineering (to prepare them for medical school or a career in biotechnology), or any approved minor.

Chemical engineering is based on chemistry, biology, physics, and mathematics. The curriculum at Clemson includes classroom and laboratory instruction and emphasizes broadly applicable fundamental principles and current technology to prepare graduates for professional practice and professional growth. The Educational Objective of the BS degree program is for graduates to have careers characterized by:

- success in chemical engineering practice, post-graduate education, or other areas making use of engineering skills, as defined by accomplishments and/or job satisfaction;
- demonstrated success in the design of chemical processes and/or identification, formulation, and solution of chemical engineering problems;
- ethical behavior in all endeavors;
- demonstrated effectiveness in teamwork, communication, and service to society through professional contributions;
- demonstrated technical and/or managerial leadership;
- demonstrated commitment to lifelong learning.

Chemical engineers are involved in the research, manufacture, sales, and use of commodity and specialty chemicals, fuels, pharmaceuticals, electronic components, synthetic fibers and textiles, food and consumer goods, and many other products. They work on environmental pollution prevention and remediation and apply engineering science to solve medical and health-related problems.

Combined Bachelor of Science/Master of Science

Qualified students can reduce the time to earn a Master’s Degree by applying graduate credits to both the Bachelor’s and Master’s program requirements. Undergraduate Chemical and Biomolecular Engineering students who have earned a grade-point average of 3.4 or above and completed 90 credit hours can begin work toward a Master of Science in Chemical Engineering or a Master of Science in Environmental Engineering and Science by selecting approved graduate courses for their emphasis area.

Details are available in the ChBE Undergraduate Handbook, which can be found at www.clemson.edu/ces/chbe.

Note: No student may exceed a maximum of two attempts, including a W, to complete successfully any CHE course.

CIVIL ENGINEERING

Bachelor of Science

Civil Engineering involves the planning, design, construction management, operation, and maintenance of facilities and systems in the built environment, including bridges, buildings, airports, water supply systems, ports, dams, and highways. The Bachelor of Science degree program in Civil Engineering includes the common educational goals listed on page 96 for the College of Engineering, Computing and Applied Sciences. The complete objectives of the program can be found at www.clemson.edu/ce.

The first two years provide students with building blocks necessary to be successful civil engineers, including proficiency in calculus, engineering mechanics, physics, and chemistry. During the junior year, students receive a broad introduction to the fundamental areas of civil engineering (structures, hydraulics, geotechnical, transportation, environmental, construction materials, and construction engineering and management). Design experiences are integrated throughout the curriculum, culminating in the senior year with a major capstone design project. In addition, during the senior year, students can select from available emphasis areas that serve to strengthen their undergraduate background.

The Civil Engineering program prepares students to work immediately upon graduation in most areas of civil engineering or to pursue graduate degrees. Students are also exposed to issues related to professional practice, including professional registration, lifelong learning, and communication and team skills. Because a concerned society demands a realistic consideration of the impacts of engineering projects, civil engineering students are also educated in the broad areas of the humanities and social sciences.

To be eligible for admission into the Bachelor of Science degree program in Civil Engineering, students must have completed the courses outlined in the freshman core curriculum and have a cumulative grade-point average of 2.6 or higher.

The Department of Civil Engineering allows eligible students to count up to six hours of graduate credit (6000- and 8000-level courses) toward both the bachelor’s and master’s degrees. Students participating in this program must have completed the junior year, must have earned a minimum 3.4 grade-point average, and must be approved by the department.

Details of the suggested curriculum and program information are available from the department.

Freshman Year
First Semester
- CH 1010 General Chemistry
- ENGL 1030 Accelerated Composition
- ENGR 1050 Engineering Disciplines and Skills I
- ENGR 1060 Engineering Disciplines and Skills II

- PHYS 2210 Physics with Calculus II
- PHYS 2230 Physics Lab. II
- Arts and Humanities Requirement* or
- Social Science Requirement

Second Semester
- CE 2060 Structural Mechanics
- CE 2080 Dynamics
- CE 3520 Economic Evaluation of Projects
- COMM 2500 Public Speaking
- MATH 2080 Intro. to Ordinary Diff. Equations

Junior Year
First Semester
- CE 3010 Structural Analysis
- CE 3310 Construction Engineering and Mgt.
- CE 3410 Introduction to Fluid Mechanics
- CE 3510 Civil Engineering Materials
- MATH 3020 Statistics for Engineering and Science

1 See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.
2 See advisor for details. Nine credit hours devoted to completion of an emphasis area or approved minor are required. Emphasis areas are Applied Engineering, Mathematics and Science; Biomolecular Science and Engineering; Business Management; Energy Studies; Environmental Engineering and Science; and Polymeric Materials.

Note: No student may exceed a maximum of two attempts, including a W, to complete successfully any CHE course.
COMPUTER ENGINEERING

Bachelor of Science

Computer engineers have excellent career opportunities in the design and application of hardware and software components for a variety of computer applications. These include mainframe, desktop, and embedded microprocessor platforms, as well as the networking of various types of computers and peripherals.

Based on a strong foundation in mathematics, computer science, and the physical sciences, the Computer Engineering program includes engineering science and design in circuits, electronics, computer organizations and design, peripheral interfacing, and software engineering. Emphasis is placed on hands-on experience with networked computer systems, micro-, mini-, and mainframe computers, and the solution of a wide range of practical problems using engineering principles. In addition to these technical skills, students learn to communicate effectively and to develop interpersonal, teamwork, and management skills, all of which contribute to success in a professional engineering career. The program is also an excellent preparation for graduate study.

Information on the program and its objectives is available at www.clemson.edu/ces/departments/ece/.

Senior Year
First Semester
3 - COMM 1500 Intro. to Human Comm. or
3 - COMM 2500 Public Speaking
3 - ECE 4090 Intro. to Linear Control Systems
2 - ECE 4950 Integrated System Design I
3 - ENGL 3140 Technical Writing
6 - Computer Engineering Technical Requirement

Second Semester
2 - ECE 4960 Integrated System Design II
3 - Arts and Humanities Requirement or
3 - Social Science Requirement
6 - Computer Engineering Technical Requirement
3 - Special Requirement

127 Total Semester Hours

Notes:
1. A student is allowed to enroll in ECE courses (excluding 1000-level or above) only if they have a 2.0 Engineering grade-point average.
2. Students who change majors into Computer Information Systems must have a cumulative engineering grade-point average of 2.0 to enroll in any 3000 or 4000-level ECE courses.
3. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any ECE course.

COMPUTER INFORMATION SYSTEMS

Bachelor of Science

The Computer Information Systems degree program is oriented toward computer applications in management-related problems. The program emphasizes functional areas of management, including accounting, production, marketing, and finance and the applications of computers in these areas. The curriculum is designed to prepare students for careers in areas such as systems design and analysis, applications programming, database administration, and information retrieval, as well as for continued study toward an advanced degree.

Students who change majors into Computer Information Systems must have a cumulative engineering grade-point average of 2.0 or higher.

Additional information can be found at www.cs.clemson.edu.

Electrical Engineering Bachelor of Science
Electrical engineers are in high demand for a wide range of influential positions. Professional duties range from analytical problem solving to the design of components and systems. The scope of employment requires a unique breadth and depth of knowledge and technical skills, which are reflected in the Electrical Engineering program. This program also offers an excellent preparation for graduate education. Detailed information can be found at www.clemson.edu/cece/.

Building on a foundation of mathematical and physical sciences, students progress into the application of these in the engineering science areas of circuits, electronics, communications, controls, power, and electromagnetics. In these subjects, students also begin to apply the concepts and techniques learned to the design of circuits and systems. Senior technical design courses offer the opportunity to further develop expertise in a selected area.

In addition to these technical skills, students learn to communicate effectively, both orally and with the written word. Because engineers work for the benefit of society, the curriculum includes a strong component of humanities and social science courses. Also, many project design assignments enable the development of interpersonal, teamwork, and management skills, which are necessary for success in a professional engineering career.
Sophomore Year

*Three additional credits of university or college approved Arts and Humanities or Social Science courses; or ELE 3010 or 4010; or any additional three-credit, 4000-level course from the departmental Computer Engineering Technical Requirement list or Electrical Engineering Technical Requirement list, or one additional course selected from MATH 3110, 4120, 4190, 4340, 4350, 4430, 4460, 4490, 4530, or 4540.

Note:
1. A student is allowed to enroll in ECE courses (excluding ECE 2070, 2080, 3080) only when all prerequisites have been passed with a grade of C or better.
2. All Electrical Engineering students must have a cumulative engineering grade-point average of 2.0 to enroll in any 3000- or 4000-level ECE courses.
3. No student may exceed a maximum of two attempts, excluding ECE 2070, 2080, 3080) only when all prerequisites have been passed with a grade of C or better.

ENVIRONMENTAL ENGINEERING
Bachelor of Science
Our complex world faces many challenges, including contaminated water supplies, hazardous wastes, an increasing population and limited resources. Environmental engineers help to solve many of the environmental problems faced by society using the principles of biology, chemistry, physics, mathematics and earth sciences. An undergraduate degree in Environmental Engineering opens the door to a variety of rewarding career options. Environmental engineers protect water quality by designing water and wastewater treatment systems; ensure public safety by managing solid, hazardous and radioactive wastes; improve air quality by controlling emissions from mobile and stationary sources; reduce human health risks by tracking contaminants as they move through the environment; clean up toxic waste spills and restore historically contaminated sites; and design a more sustainable future by understanding our use of resources.

The curriculum for the Bachelor of Science degree in Environmental Engineering consists of 127 credit hours. All students participate in one professional seminar course and complete a capstone design project.

Within the Geology curriculum, students who are particularly interested in environmental or water resources issues may choose to specialize in the Environmental Science Concentration or the Hydrogeology Concentration. These two concentrations provide more structured course pathways through the curriculum and help prepare students for careers in these specific areas. The Environmental Science Concentration in Geology focuses on environmental aspects of geoscience and is well suited for students interested in topics such as environmental policy, natural hazard assessment and remediation, evaluation of land use impacts, understanding geochemical cycles, and environmental systems analysis. This concentration provides a rigorous background in the sciences so that students can scientifically address environmental issues and integrate material from several fields to solve complex environmental problems. The Hydrogeology Concentration in Geology is designed for students who want to specialize in areas such as surface- and ground-water systems, treatment of water and cleanup of contaminated sites, contaminant flow and fluid transport, and water resource sustainability.

120 Total Semester Hours

*CH 2230 may be substituted.
*ENGR 2080 may be substituted.
May substitute PES 2010 for GEOL 1010 and GEOL 1030.
*Select CE 3520 or IE 3540.
*Select any combination of engineering and/or science courses from a department-approved list.

Notes:
1. The following courses must be completed with a C or better:
   CE 2010, CE 2080, CE 3410, MATH 2060, MATH 2080, PHYS 2210.

2. May substitute PES 2020 for GEOL 1010 and GEOL 1030.
3. ENGR 2080 may be substituted.
4. CH 2230 may be substituted.
5. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
6. Twenty-eight credit hours selected from department approved list. No more than 14 hours below the 2000 level and no more than eight hours below the 2000 level. Courses may not be used to satisfy any other requirement.
7. Select from department-approved list. Courses may not be used to satisfy any other requirement.
8. Fifteen credit hours. Select from GEOL 3150, 3180, 4050, 4090, 4150, 4210, or (CE) 4820. Only excess hours may be used to satisfy STEM requirement hours.
9. OGE 4750, or other six-credit summer geology field camp, or a combination of GEOL 2750 plus a three-credit field course in geology or other approved discipline. Students desiring to become registered professional geologists should take a six-credit summer field camp in geology/hydrogeology.

**INDUSTRIAL ENGINEERING**

**Bachelor of Science**

Industrial engineers design, install, and improve the complex systems that provide goods and services vital to our society and economy. These systems place unique demands for breadth of preparation on industrial engineers. The Industrial Engineering baccalaureate program prepares graduates to: (1) design, develop, implement, and improve integrated systems that include people, materials, information, equipment, and energy; and use appropriate analytical, computational, and experimental practices; (2) apply these technologies to the practice of industrial engineering; (3) conduct themselves in a professional and ethical manner; and (4) work and communicate effectively with colleagues at every level in the organization.

The traditional arenas for the practice of industrial engineering are the manufacturing facilities of industry; however, many practicing industrial engineers are employed in non-manufacturing institutions such as hospitals, financial institutions, consulting firms, and government agencies. In addition to numerous employment opportunities in professional practice, industrial engineering graduates may further their formal education. The Department of Industrial Engineering offers programs leading to the Master of Science and Doctor of Philosophy degrees.

The Industrial Engineering program also offers a combined Bachelor’s/Master’s plan in which accepted students may count up to 12 hours of graduate credit (approved 6000- and 8000-level courses) toward both a bachelor’s and a master’s degree, with the stipulation that a minimum of 150 credit hours must be earned. To be eligible, the student must have senior standing and a minimum overall grade-point average of 3.4. Most students completing the joint BS/MS program in IE can only double count nine units. Details of the suggested curriculum and program information are available from the Industrial Engineering Department.

Detailed curriculum and department information is available at http://www.clemson.edu/ces/departments/ie/

**Freshman Year**

| First Semester | 4. CH 1010 General Chemistry  
3. ENGL 1030 Accelerated Composition  
3. GEOL 1010 Physical Geology

3 - Social Science Requirement\(^2\)
3 - Technical Requirement\(^7\)
13

125 Total Semester Hours

Notes:
1. No student may exceed three attempts, including a W and academic forgiveness (with the exception of a withdrawal from the University), to successfully complete any IE course (with a grade of D or better). Moreover, a third attempt is only granted by a written request to the department chair before the deadline to add a course in a subsequent term.
2. Industrial Engineering students who have a cumulative grade-point average or cumulative engineering grade-point average (EGPA) below 2.0 are on probation and will have restricted enrollment in classes. Students whose cumulative grade-point average is below 2.0 are subject to the regulations stipulated under the University's Academic Eligibility Policy. Students on probation for an EGPA below 2.0 who fail to recover (i.e. raise their EGPA above 2.0) in the first regular semester (fall or spring) will not be allowed to register for industrial engineering classes. After one year, such students may petition the Industrial Engineering Department for continued enrollment. An advising policy for students on probation is available from the Industrial Engineering Department.

MATERIALS SCIENCE AND ENGINEERING

Bachelor of Science
Materials scientists and engineers design, develop, and produce traditional and new advanced materials with diverse applications intended for use in a wide variety of industries. These include traditional materials-intensive industries such as structural clay, foundry, whiteware, polymers, plastics, fibers, textiles, composite materials, and automotive industries. Also included are high performance technology industries such as semiconductor, defense, biomaterials, aerospace, and communication industries. The broad career responsibilities of this discipline require competence in science, engineering, mathematics, and the social sciences. The curriculum develops skills in problem solving, engineering analysis, and design, as well as oral and written communication.

The Department of Materials Science and Engineering offers two areas of concentration within the Bachelor of Science degree in Materials Science and Engineering. The Inorganic Materials Concentration provides for more in-depth study of the engineering and science of materials such as ceramics, glasses, metals, optical and electronic materials; while the Polymeric Materials Concentration provides more emphasis on plastics, elastomers, fibers and fibrous materials, films, coatings and adhesives. Students select either the Inorganic Materials Concentration or the Polymeric Materials Concentration at the beginning of their sophomore year. Both concentrations in Materials Science and Engineering integrate laboratory with classroom experiences to prepare students for life-long learning and exciting career opportunities. Courses covering thermodynamics, kinetics, mechanical behavior, processing, fabrication and characterization of materials prepare students for careers in industry and for graduate school.

INORGANIC MATERIALS CONCENTRATION

Freshman Year

First Semester
4 - CH 1010 General Chemistry
3 - ENGL 1030 Accelerated Composition
1 - ENGR 1050 Engineering Disciplines and Skills I
1 - ENGR 1060 Engineering Disciplines and Skills II
4 - MATH 1060 Calculus of One Variable I
3 - Arts and Humanities Requirement\(^3\) or
3 - Social Science Requirement\(^3\) 16

Second Semester
4 - CH 1020 General Chemistry
1 - ENGR 1070 Programming and Problem Solving I
1 - ENGR 1080 Programming and Problem Solving II
1 - ENGR 1090 Programming and Problem Solving Applications
4 - MATH 1080 Calculus of One Variable II
3 - PHYS 2210 Physics with Calculus II
3 - Arts and Humanities Requirement\(^3\) or
3 - Social Science Requirement\(^3\) 17

Sophomore Year

First Semester
3 - CH 2230 Organic Chemistry
1 - CH 2270 Organic Chemistry Lab.
1 - CH 2280 Organic Chemistry Lab
2 - ENGR 2080 Engineering Graphics and Machine Design
4 - MATH 2080 Intro. to Ordinary Diff. Equations
3 - MSE 3160 Process of Metals & Their Composites 16

Junior Year

First Semester
3 - COMM 2500 Public Speaking
3 - MATH 3190 Materials Processing I
3 - MSE 3260 Thermodynamics of Materials
3 - MSE 3270 Transport Phenomena
3 - MSE 4150 Intro. to Polymer Sci. and Engr. 15

Second Semester
3 - IE 3840 Engineering Economic Analysis
3 - MATH 3202 Statistics for Science and Engr. or
3 - STAT 2300 Statistical Methods I
3 - MSE 3280 Phase Diagrams for Materials Processing and Applications
2 - MSE 3420 Structure/Property Laboratory
3 - MSE 4220 Mechanical Behavior of Materials
3 - Arts and Humanities Requirement\(^3\) 17

\(^1\)This course must be passed with a C or better either to transfer into IE from General Engineering or to satisfy later course prerequisites.

\(^2\)See General Education Requirements. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

\(^3\)Select from department-approved list. See advisor.

\(^4\)ME 2010 may be substituted.

\(^5\)PHYS 1240 may be substituted.

\(^6\)See General Education Requirements. COMM 1500 is recommended.
### Senior Year

#### First Semester
- MSE 4020 Solid State Materials
- MSE 4130 Noncrystalline Materials
- MSE 4320 Manufacturing Processes and Systems
- MSE 4410 Manufacturing Laboratory
- MSE 4910 Undergraduate Research
- Arts and Humanities Requirements or Social Science Requirement
- **16**

#### Second Semester
- MSE 4070 Senior Capstone Design
- MSE 4160 Electrical Properties of Materials
- MSE 4240 Optical Materials and Applications
- MSE 4330 Combustion Systems and Environmental Emissions
- MSE 4450 Practice of Materials Engineering
- **13**

**Total Semester Hours**: 127

---

### Junior Year

#### First Semester
- CH 3310 Physical Chemistry
- COMM 2500 Public Speaking
- MSE 3270 Transport Phenomena
- MSE 4150 Intro. to Polymer Sci. and Engineering
- MSE 4550 Polymer and Fiber Lab.
- Arts and Humanities Requirements or Social Science Requirement
- **16**

#### Second Semester
- CH 3320 Physical Chemistry
- IE 3840 Engineering Economic Analysis
- MATH 3020 Stat. for Science and Engr. or
- STAT 2300 Statistical Methods I
- MSE 4220 Mechanical Behavior of Materials
- MSE 4560 Polymer and Fiber Science II
- **15**

### Senior Year

#### First Semester
- MSE 4580 Surface Phenomena in Materials Science and Engineering
- MSE 4600 Surface Phenomena in Materials Science and Engineering Laboratory
- MSE 4610 Polymer and Fiber Science III
- MSE 4910 Undergraduate Research
- Technical Requirement
- **13**

#### Second Semester
- MSE 4070 Senior Capstone Design
- MSE 4450 Practice of Materials Engineering
- MSE 4570 Color Science
- MSE 4590 Color Science Laboratory
- Arts and Humanities Requirements or Social Science Requirement
- Technical Requirement
- **14**

**Total Semester Hours**: 124

---

### Mechanical Engineering

#### Bachelor of Science

Breadth, individuality, and flexibility are inherent characteristics of the mechanical engineering profession. Mechanical engineers, in a broad sense, make major contributions to the creation of products and systems that benefit mankind. They work in a variety of areas, including bioengineering, energy systems, environmental and life-support systems, propulsion and transportation systems, food production, materials processing, automated manufacturing, and construction. A wide spectrum of career opportunities is open to them. The practice of mechanical engineering includes one or more of the following activities: manufacturing, testing, research, development, design, technical management, technical sales and marketing, construction, and teaching.

Preparation for a 40-45-year professional career requires development of the whole person through a balanced program encompassing the humanities, social sciences, communication and computer skills, physical and engineering sciences, design, and laboratory experience. Students start with the physical sciences and communication skills and progress through the engineering sciences, ultimately applying the principles learned in such areas as energy conversion and transfer, mechanical design, and systems analysis. Throughout the curriculum, the fundamental nature of engineering as a problem-solving discipline is emphasized.

Most graduates take positions in industry, government, or business. Many, however, continue their formal education in a graduate program. The Department of Mechanical Engineering offers study leading to the Master of Science and Doctor of Philosophy degrees.

Mechanical Engineering students who have a cumulative grade-point average or cumulative engineering grade-point average (EGPA) below 2.0 are on probation and will have restricted enrollment in classes. Students whose cumulative grade-point average is below 2.0 are subject to the regulations stipulated under Academic Eligibility Policy. Students on probation for EGPR below 2.0 who fail to recover in the first regular semester (fall or spring) will not be allowed to register for mechanical engineering classes. After one year, such students may petition the Mechanical Engineering Department for continued enrollment. An advising policy for students on probation is available from the Mechanical Engineering Department.

Additional information can be found at [www.clemson.edu/me](http://www.clemson.edu/me).

#### Freshman Year

#### First Semester

125 Total Semester Hours

Notes:
1. Enrollment Policy (see website for Complete Statement of Department Policy): A student is allowed to enroll in any ME course only when all prerequisites, as defined by current official listings for that course, have been passed with a grade of C or higher.
2. No student may exceed three attempts to complete successfully ME 2010, 2030, or 2040. Registration for a third attempt to complete one of these ME courses requires the approval of the undergraduate coordinator in the Department of Mechanical Engineering. A grade of W counts as an unsuccessful attempt at completing the course.
3. For students repeating an ME course, registration preference will be given to students in a degree-granting engineering major whose curriculum requires the course in question.
4. To change majors into the Mechanical Engineering degree program, students must have a minimum cumulative grade-point average of 2.60 or higher at Clemson and earned a C or better in each course in the General Engineering freshman curriculum, EXCLUDING the Arts and Humanities/Social Science requirements.

1Select from MATH 3020 or STAT 4110
2See advisor. Select from department-approved list.

3Both are required but may be taken in either semester.
4See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements. These requirements may be filled in any order.
5Both are required but may be taken in either semester.
6See Policy on Humanities and Social Sciences for Engineering Curricula.
MINORS

Following are minors acceptable for students in the College of Engineering, Computing and Applied Sciences. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting
Adult/Extension Education
Aerospace Studies
Agricultural Business Management
Agricultural Mechanization and Business
American Sign Language Studies
Animal and Veterinary Sciences
Anthropology
Architecture
Art
Athletic Leadership
Biochemistry
Biological Sciences
Brand Communications
British and Irish Studies
Business Administration
Chemistry
Chinese Studies
Cluster
Communication Studies
Computer Science—not open to Computer Information Systems majors
Creative Writing
Crop and Soil Environmental Science
Digital Production Arts
