Health Disparities in New York City

Findings come from the Empire State Pride Agenda’s comprehensive report on lesbian, gay, bisexual and transgender (LGBT) health disparities in New York City using data collected by the New York City Department of Health and Mental Hygiene. This is the first report to examine how race, ethnicity, gender, poverty and age affect the health of the LGBT communities. Visit prideagenda.org/healthreport to learn more.

1 in 5

White lesbian and gay students (18.4%) have missed school due to “feeling unsafe” in the last 30 days.

Nearly one quarter of Latino LGB people have recently experienced mental distress, nearly double their heterosexual counterparts.

24.4%

1 in 5 gay males have vomited or used laxatives for weight control in the past 30 days.

Almost half of white LGB youth smoke compared to just 17.1% of their heterosexual counterparts.
