

SC BIOCRAFT BIOREACTOR FACILITY

The **SC BIOCRAFT BIOREACTOR FACILITY** is a manufacturing facility specializing in the design and fabrication of experimental devices for biomedical applications.

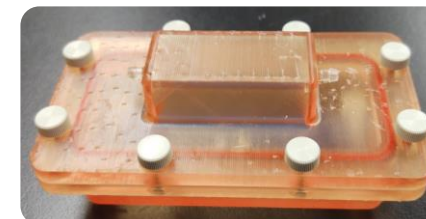

Our goal is to help Clemson students and faculty conduct high quality, innovative research by providing access to a variety of services related to building bioreactors.

Our services allow for the development of ideas into physical products and enable rapid prototyping that allows for an iterative design process to achieve the optimal device performance.

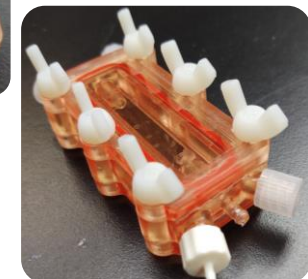

Recently Completed Projects

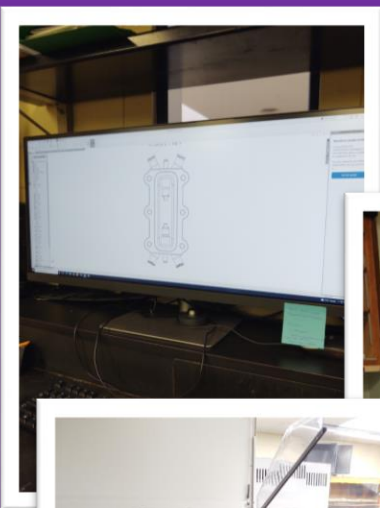

Pressure Gauge Adapter

Vascular Tissue Culture Chamber

Vascular Imaging Chamber

Available Services

High Precision 3D Printing

SolidWorks/LabView Consulting

Electronics Soldering

Drill/Mill Machining

Tissue Culture

Relevant Research Applications

Microfluidics - Cell Culture - Tissue Engineering - Biomedical Imaging – Medical Device Design
