

EXPANDED COLOR GAMUT SEMINAR

SEE WEBSITE FOR DATES

Clemson's Sonoco Institute is the perfect place to learn about the in's and out's of Expanded Color Gamut for package decoration. Use state-of-the-art software, color management and production flexographic equipment to get hands-on with the ECG process workflow, while engaging with industry experts around this exciting and beneficial technology.

This seminar has recently been modified to fit in a short, two-and-a-half day session, to better fit your busy schedule.

Presentation topics include:

- Why Expanded Color Gamut for your packaging?
- Defining ECG ink and process limitations
- Proofing options and considerations for ECG
- Implementing technology and the "tipping point"
- Color tolerances, process control and managing expectations

Hands-on sessions include:

- Defining ECG inks and creating standards
- Press calibration and characterization
- Selective gamut expansion and spot color conversion
- Production color separation and proofing
- Production printing... and more!

RATES:

- \$995/person
- \$895/person for early bird or 3+ registrants
