FINANCIAL MANAGEMENT
Bachelor of Science
The Bachelor of Science in Financial Management covers how to plan for and manage monetary resources based on expectations about the future. Finance deals with how to price assets, how to make investment and project decisions, and how financial markets work. The curriculum prepares students for careers in such areas as corporate finance, banking, investments, financial planning, insurance, and real estate. The curriculum also provides excellent preparation for students interested in graduate studies, including law school, accounting or business administration.

The core of the curriculum provides a broad overview of the major fields of finance, including corporate finance, investments, real estate, and financial markets and institutions. Students then have the ability to tailor courses by choosing an emphasis area that focuses on a specific area of finance. Students who complete the Financial Planning emphasis area are eligible to sit for the Certified Financial Planner (CFP®) examination.

Students wishing to change majors into the Financial Management program must have a 2.0 or higher Clemson/Bridge cumulative grade-point average.

GRAPHIC COMMUNICATIONS
Bachelor of Science
The Bachelor of Science degree in Graphic Communications prepares students for professional careers in printing, publishing, packaging, and related industries. The core curriculum assures graduates of having the skills and knowledge required by most entry-level jobs. The major requirements allow each student to select courses that enhance career preparation in specific segments of graphic communications. Coursework is heavily oriented around individual laboratory performance, which stresses the development of problem-solving skills in a broad cross-section of manufacturing areas. Applications include all major processes and a variety of industry segments, including commercial printing, publishing, package production, specialty printing, and industrial applications of printing technology beyond communications. The most common career opportunities are in printing management, production planning and supervision, and commercial and technical sales.

The Graphic Communications program is designed to be completed in four years (eight semesters and one or two summers). While students must take one internship during a fall or spring semester, one or two summers are typically used to make up for that semester. The department schedules courses in summers for that purpose. Taking a reduced load per term or other circumstances could extend the time needed to meet graduation requirements.

Policy on Advancement in Graphic Communications
Graphic Communications majors must earn a C or better in prerequisite GC courses before enrolling in the next level GC course. Registration priority is given to those students for whom the course is a requirement.
