PROGRAM PURPOSE

A Doctor of Philosophy (Ph.D.) degree is an academic degree that offers benefits to society as well as the person earning the degree. While professional degrees, such as the Educational Specialist (Ed.S.) or the Educational Doctorate (Ed.D.) offer both advanced graduate work and credentialing, the Ph.D. requires one to develop skills for the advancement of knowledge and practice available to the field. Clemson’s Ph.D. in Educational Leadership is designed to prepare students to become scholars and leaders who can discover, integrate and apply knowledge as leaders in schools and post-secondary educational institutions and agencies. This is accomplished through close association with, and apprenticeship to, faculty members experienced in research, teaching and leadership. Doctoral students in Educational Leadership work closely with faculty on shared interests focused on leadership issues from the point of admission through their dissertation defense. Typical time-to-degree is 4-7 years. Courses are offered through multiple modalities: face-to-face, on-line, and hybrid. Courses are offered on-campus, at the University Center Greenville (UCG), and other locations across the state.

FIVE DOMAINS

The Ph.D. in Educational Leadership program is designed primarily for working professionals to provide a strong background in five domains: leadership, ethics, diversity, research, and policy.

Leadership
The Leadership domain includes the critical study of leadership and organizational theories and how they inform effective and ethical educational leadership, vision, and practices for the purpose of improving educational institutions and the communities they serve.

Ethics
The Ethics domain includes the legal and moral foundations for the purpose of informing and guiding the work of ethical leaders, researchers, and academics who serve educational institutions, agencies, and organizations.

Diversity
The Diversity domain includes knowledge of various cultural groups and knowledge of diverse groups’ historical and contemporary experiences and outcomes for the purpose of strengthening educational institutions, organizations, and communities as well as providing equitable experiences for all.

Research
The Research domain includes identifying, gathering, analyzing, and presenting data for the purpose of solving problems of practice and knowledge production.

Policy
The Policy domain includes identification and analysis of current and emerging trends and problems in educational institutions, organizations, and agencies for the purpose of policy improvements.

ADMISSION PROCEDURES

Application for admission to Clemson’s Ph.D. program in Educational Leadership (EDL) begins with an online-application at the Clemson Graduate School’s website. All application materials must be sent to the Clemson Graduate School and should not be sent electronically or through ground mail to faculty or any department members. The process starts and ends at the Clemson Graduate School and is a two-part process. Both the Graduate School and the EDL program must accept students.

There is a non-degree application option for students who have a relevant Master’s degree. Students who choose this option may only enroll in EDL 9100, Introductory Doctoral Seminar. Students who enter the program as a non-degree seeking student must reapply for full admission to the program before taking other courses in the program.
DEADLINES
There are two deadlines for application to Clemson’s Ph.D. program in Educational Leadership.
- March 1 for summer or fall and October 1 for spring semester enrollment.

APPLICATION COMPONENTS
Applications are reviewed shortly after the above deadlines. Applicants are evaluated on a variety of criteria that includes: cover letter with specified information, transcript, reference letters, curriculum vitae, and GRE scores. Packets must be complete to be reviewed.

1. Cover Letter – The cover letter, which will be evaluated for content and as a writing sample, must be 2-pages or less and include:
   a. Reasons for pursuing the Ph.D. degree in Educational Leadership, including research interests and career goals
   b. Professional and/or personal experiences shaping your current research interests and career goals
   c. How the program faculty can support you in completing this degree

2. Transcripts - Unofficial transcripts from all previous institutions are uploaded for the application review. Official transcripts are required after admission and must be sent directly to the Clemson Graduate School.

3. Letters of Recommendation – Three letters of recommendation from current or prior supervisors and at least one professor from a prior degree program should be submitted to the Clemson Graduate School. A form is available on the Clemson Graduate School web site, if desired.

4. Résumé/CV - A resume or curriculum vitae that supports candidacy with evidence of pertinent educational leadership experience and evidence that the candidate can perform in a scholarly environment.

5. GRE Scores - GRE scores must be acceptable. GRE scores more than five years old, relative to the date of initial enrollment, will not be accepted.

ADMISSION CONSIDERATIONS

Non-Native English Speakers
Because of the strong communication component of the Ph.D., non-native speakers of English are urged to contact the Clemson Graduate School to initiating an application. Potential applicants will have to demonstrate English proficiency through TOEFL or ELS 112. More information is available through the Clemson Graduate School.

Prospective Applicants with Related Master’s Degrees
A master’s degree in educational leadership or comparable degree program with an acceptable grade point average is required for admittance to the program.

Borderline Applications
Students whose credentials are borderline may be invited to an interview by the Admissions Committee. Appeal procedures are available for students who are not accepted to the program through the Clemson University Graduate School.

ED.S. EN ROUTE TO PH.D.
Students who have been accepted to the Ph.D. in P-12 Educational Leadership who desire to be awarded an Educational Specialist’s degree (Ed.S.) en route to the Ph.D. may apply coursework from the doctoral program toward the Ed.S. degree. To apply for the Ed.S. en Route to the Ph.D., students must have completed the courses that lead to licensure in South Carolina as a building-level or district-level leader (See Appendix B a list of the required courses.), and successfully defended their comprehensive exam. The form to apply for the Ed.S. en Route to the Ph.D. is the GS2-14. After students are awarded the Ed.S. en Route to the Ph.D., they will remain enrolled as doctoral students.

THE ADMISSIONS COMMITTEE
The Admissions Committee is composed of full-time, tenure-track faculty members who teach courses and/or advise students for the Ph.D. in Educational Leadership. The Admissions Committee meets within one month of the October 1 and March 1 deadlines to permit Graduate School and College of Education offices adequate
time for processing applications. The Admissions Committee’s meeting, to the extent possible, occurs sufficiently before new student registration is opened by Clemson’s Registrar’s Office to allow notification of acceptance.

MENTORS
Based on application materials, especially the cover letter and curriculum vitae, the Admissions Committee will determine whether there is a relationship between applicant interests and faculty expertise. Based on that determination, a mentor will be assigned to each admitted new student. A student’s mentor is not expected to serve as the student’s major advisor/doctoral advising committee chair.

Mentors act in the role of advisors to new students through the initial preliminary core courses. Mentors answer general questions about registration and enrollment processes. Mentors help new students identify and enroll in the preliminary core courses. Mentors also encourage students to progress to the preliminary exam within the first two years of enrollment in the program.

Mentors are eligible to serve on their protégés’ Doctoral Advising Committees, but are not required to do so. As students experience the preliminary core courses, interests change and the association between mentor expertise and student research agenda may change. That is, by the time of preliminary exams and the selection of a Doctoral Advising Committee, mentors and students may mutually decide to part.

CURRICULUM VITAE
Many accomplished educational leaders apply for studies in the Ph.D. program for Educational Leadership with a résumé as opposed to a curriculum vita. A résumé is an acceptable documentation of professional work, but a curriculum vita is a more appropriate documentation of a scholar’s accomplishments along with the emergence of that scholar’s growing research agenda. Clemson’s doctoral students will be asked to document their growth as a scholar at several points in the Ph.D. program process.

The introductory course EDL 9100: Introductory Doctoral Seminar, includes the initial guidance to students on the construction of a curriculum vitae. Then, throughout the program, students should add to their vitae such evidence of their scholarly development in collaboration with faculty as participation in research proposals, proposals for scholarly conferences, and manuscripts submitted to peer-reviewed publications. These vitae may be reviewed at any time by the faculty to determine adequacy of progress toward degree. The most likely reviews will occur with the preliminary exam; the work required in EDL 9860, research internship; the dissertation proposal; and as an appendix in the doctoral dissertation.

PROGRAM OF STUDY
The program of study for the Ph.D. includes both courses as well as non-course requirements. In general, Ph.D. program courses provide prerequisite knowledge and skills for the Ph.D. program’s non-course requirements. The table below illustrates the courses and progression required for degree completion. Appendix A also outlines the Ph.D. program process and non-course requirement. Appendix B describes the P-12 concentration options.

PROGRAM REQUIREMENTS (76 Credit Hours)

- EDF 9790: Qualitative Research in Education | 13 Hours (min.) | 
| Advanced:  
- EDF 9720: Phenomenology & Grounded Theory Research Methods & Design |
PRELIMINARY COURSES
The faculty for the Ph.D. in Educational Leadership has determined that four courses provide new Ph.D. students foundational knowledge in the domains of Leadership, Ethics, Diversity, Research, and Policy. These four courses infuse these domains from a variety of perspectives among the disciplines that offer research-based knowledge to the theories and practice of Educational Leadership for life-long learning (P-20). Among the purposes of these core courses is the opportunity for mid-career professionals to develop identities as researchers and scholars in the field of Educational Leadership. The Ph.D. is an academic degree offering students more than advancement in their careers, and including the opportunity to participate in the community of scholars producing and disseminating knowledge for the field.

PRELIMINARY EXAMS (“PRELIMS”)
The Prelim serves to assess the student's current academic performance level and readiness to continue in the program with more specialized doctoral scholarship. Students should have the majority of their Doctoral Advising Committee members selected prior to taking the Preliminary Examination. Students are responsible for obtaining consent among the faculty about serving in the capacity of Doctoral Advising Committee members and will be asked to document this consent before being permitted to take the Prelim. These faculty members review the student’s written exam and updated curriculum vitae. They also meet with the student for advice on the Ph.D. program of study and sign the Graduate School's form (GS-2) in a follow-up oral exam.

Significant failure to demonstrate competencies required of a Ph.D. student could result in a hearing before the committee to determine whether the student may proceed in the program. Less significant weaknesses may be addressed with additional course requirements or other non-course requirements.
The Prelim is a written test of knowledge and skills in the five domains of Leadership, Ethics, Diversity, Research, and Policy needed to function successfully in the Ph.D. program. The Prelim exam is set via the Doctoral Program Committee and is taken over a ten-day period. Historically, the preliminary exam is offered during the first week of November in the fall semester and the first week of April in the spring.

The exam is given once each semester (fall and spring), and is usually taken after the student’s completion of the Preliminary Core courses (a minimum of four courses/12 credits) within 2 years of admission to the program. The Prelim evaluates the student’s performance on questions based upon 4 doctoral courses (EDL 9100, EDL 9000, EDL 9050, EDL 9110) and the 5 domains of Leadership, Ethics, Research, Diversity, and Policy.

Students may take the exam while enrolled in the final semester of the preliminary core coursework or in the following semester. Students are discouraged from waiting more than a semester past the completion of the twelfth credit of the preliminary core courses before taking the exam. Students who delay their Prelim beyond the recommended period of within 2 years of admission may be required to take additional courses by their Doctoral Advising Committees.

THE DOCTORAL ADVISING COMMITTEE

According to Clemson’s Graduate School, the Doctoral Advising Committee holds the ultimate responsibility for program design and supervision of students and candidates for the degree. All of EDL’s Ph.D. students are encouraged to review Clemson’s academic policies and requirements for Graduate studies on the Graduate School’s website. Students are responsible for obtaining consent among the faculty about serving in the capacity of Doctoral Advising Committee members. A full list of EOLD faculty can be found on the department website.

Committee membership typically adheres to the following characteristics for committee members.

- Four full-time, tenure-track faculty members from the EDL program and other disciplines or areas of expertise relevant to the doctoral student’s topic, theory, or methods for dissertation preparation and completion. One member must be a non-EDL faculty member.
- At least half of the faculty members on the Doctoral Advising Committee must hold expertise in the EDL Ph.D. program.
- In some cases, non-Clemson committee members may be included on the Doctoral Advising Committee due to their unique expertise germane to the student’s research. Such members are subject to Clemson’s peer review process for adjunct faculty. Tenured faculty within the Department of Educational and Organizational Leadership Development (EOLD) have the final jurisdiction in determining a non-Clemson committee member’s suitability to serve on any Doctoral Advising Committee.

The table below demonstrates the possible configurations of faculty expertise in a student’s doctoral advising committee.

At Clemson, even though faculty may hold what is termed a full-time position, most hold only a 9-month contract that covers the period of August 15 through May 15 of the academic year. During the contract period, faculty members have responsibilities for teaching, research and service. Because Clemson is a research-extensive university, not a teaching university, faculty members are involved in research and service (such as committee meetings) when they are not scheduled for courses. Summer contracts generally cover teaching...
assignments, not research or advising assignments, except in rare cases. Course schedules during the summer usually span three to eight hours daily, which also limit faculty availability for advising during summers. Wise students will anticipate the limited availability of faculty based on these multiple time-demands and make appointments and plan their advising sessions well in advance.

Although drop-ins are welcome, a student who drops-in may be disappointed in not finding faculty in their offices as faculty have prior appointments with other students and/or may be out-of-office for committee meetings or for research. To avoid this disappointment, make appointments through email or via the phone. Faculty members keep their own schedules, so students must accomplish appointments directly.

**MAJOR ADVISOR & CHAIR OF THE DOCTORAL ADVISING COMMITTEE**

Anyone holding a full-time, tenure-track position among the EOLD faculty of the College of Education (COE) may serve as a chair of a student’s Doctoral Advising Committee. **The terms, Chair and Major Advisor, are used interchangeably.** Some Clemson policies also include the term Dissertation Director.

Because Clemson is a research university and a member of the University Council for Educational Administration (UCEA), and because the Ph.D. is an academic degree, the selection of a Major Advisor should focus primarily on expertise in the focus of the student’s research. Clemson’s Ph.D. program in Educational Leadership is designed to support faculty and student productivity in terms of conference presentations and publications based on EDL field research. Therefore, the Major Advisor, as well as other members of the Doctoral Advising Committee, and Ph.D. students will write, present, and publish together. Students need to consider this expectation in selecting their advisors and choose the faculty members whose expertise is most closely aligned with their intended research.

According to Clemson’s Institutional Review Board (IRB) policies, the Major Advisor serves as the Principal Investigator (PI) of the student's dissertation research project, not the student. That fact places the Major Advisor and student in a mutual, high stakes relationship requiring the student’s careful attention to research protocols.

Major Advisors are responsible for directing students toward appropriate literature and methods, providing feedback on progress to degree, and assuring that the student is aware of deadlines and institutional requirements for progress toward degree. Students must willingly take such degree progress feedback and research advice, and ultimately hold responsibility for meeting requirements at both program and institutional levels.

**PLAN OF STUDY AFTER PRELIMINARY PROGRAM**

Plan of Study (Clemson Graduate School’s **GS-2 form**) is established post-preliminary exam by the Doctoral Advising Committee. The Doctoral Advising Committee scores the student’s prelims and then holds a meeting to review the student’s performance and to advise on the remaining coursework in four study areas: (1) Research Courses, (2) Research Internship, (3) Cognate Courses, and (4) Concentration Options, either Higher Education or P-12. The Doctoral Advising Committee has the final ruling on the maximum number of courses in any student’s program of studies. Given students’ background, goals, and interests, some coursework may exceed minimum requirements. Post-prelims, students must earn at least 21 credits before eligibility for the Comprehensive Exam and moving to candidacy.

**RESEARCH COURSES**

Educational Leadership is a diverse multi- and interdisciplinary field. Research courses offer a variety of tools for Ph.D. students who also are mid-career professionals; therefore, EDL Ph.D. students are expected to develop general knowledge about a variety of research epistemologies and methods. All students will be introduced to fundamental research designs and analysis techniques spanning the realms of qualitative and quantitative methods. At the introductory level, students must complete both one qualitative and one quantitative course. Then the Doctoral Advising Committee directs students on further research requirements in advanced qualitative and/or advanced quantitative course work. The recommended sequence of research
courses can be found in the Program of Study section of this handbook. It should be noted that EDF 9270 is a prerequisite for EDF 9770; EDF 9770 is a prerequisite for advanced quantitative courses. EDF 9790 is a prerequisite for advanced qualitative courses; EDF 9770 and 9790 are prerequisites for mixed methods.

RESEARCH INTERNSHIP
The purpose of the required, three-hour course EDL 9860: Research Internship is to provide students an apprenticeship with faculty members who have current research projects underway. Preferably, students will work under the guidance of their Major Advisors or any other member of their Doctoral Advising Committee. The Research Internship provides students an opportunity to develop viable research questions from the problems and issues of practice and then participate in the development of the research design, data collection, analysis, and reporting phases of research studies. Student products from the Research Internship may include conference proposals, presentations, and manuscripts prepared as a co-author with the faculty member/s to whom they apprenticed during the Research Internship. All research conducted in this internship must meet Clemson’s Institutional Review Board (IRB) requirements, including the requirement that students have valid IRB certification. Students may also use the Research Internship to build their curriculum vitae demonstrating their growth in scholarship and their emerging research agenda for their dissertations.

COGNATE COURSES
The definition of the cognate, for the purposes of Clemson’s Ph.D. program in Educational Leadership, is a related body of knowledge important for the student’s research agenda. Some programs refer to these courses as a minor. Cognate courses should support the foundational domains for Educational Leadership. Because Educational Leadership is a broad multi- and interdisciplinary field, the determination of an appropriate cognate is ultimately at the discretion of each student’s Doctoral Advisory Committee. Students are encouraged to seek cognates beyond the field of Educational Leadership in such supporting disciplines as Business, Counselor Education, Family and Community Studies, Political Science, Public Administration, Psychology, Sociology, Teacher Education, Human Resource Development, or Youth Development. For those aspiring to administrative or faculty roles in higher education, students are encouraged to meet institutional accreditation standards through the pursuit of 18 to 21 credits in a cognate field beyond Educational Leadership. The required minimum number of cognate credits is 6.

CONCENTRATION OPTIONS
Clemson’s Ph.D. in Educational Leadership recognizes the importance of life-long learning as well as leadership policy and systemic issues between schooling and post-secondary education. This P-20 framework is addressed through preliminary and candidacy core coursework as well as through faculty and students’ research agenda. For the Comprehensive program of studies post-prelims, the Doctoral Advising Committees focus students’ programs in one of two concentrations, Higher Education (HE) or elementary and secondary education (P-12). The minimum number of concentration credit hours is 18, but as with all categories of coursework, the Doctoral Advising Committee may recommend exceeding the minimum based on the student’s research agenda and career aspirations.

For the Higher Education Concentration, students are required to take 6 predetermined courses (which are outlined in the Program of Study section of this handbook) and work with their Doctoral Advising Committees to choose a possible elective. The Higher Education and Student Affairs faculty will offer additional coursework and select seminars germane to leadership in Higher Education and on immediate issues that arise affecting higher educational leadership, policy, and practice.

Students interested in the P-12 concentration (see Appendix B) have four options among their concentration coursework. In three of these options, students may choose to obtain state of South Carolina licenses for work as school administrators at the building level or at the district level. Note that state regulations provide the requirements for certification; Doctoral Advisory Committees do not have the jurisdiction to change state regulations and requirements. Students must work with EDL’s certification officer (an EDL faculty member) in completing a worksheet of requirements. In many cases, this certification officer may not be a member of the Doctoral Advising Committee. The Major Advisor and Doctoral Advising Committee will need the completed worksheet to enable advising and completion of degree program of studies form, the GS-2. Students who select a certification option are responsible for meeting with the EDL faculty member designated as the
certification officer and obtaining a completed worksheet to circulate among their Doctoral Advising Committee members.

The certification worksheet and the GS-2 are two different forms required for P-12 students who have selected a certification option. The certification worksheet is Clemson’s documentation to the state of South Carolina of the approved program for certification. The GS-2 is the Doctoral Advising Committee’s documentation to Clemson’s Graduate School of the course requirements for obtaining the Ph.D. Students who select one of the three certification options for their concentration in P-12 must complete the state’s approved program requirements. These certification requirements range in credit hours from 21 to 36. More information can be obtained from the South Carolina Department of Education website.

P-12 students have a fourth option should they not require any state certification to attain their goals professionally or academically. The fourth option is a non-certification option and the coursework design is completely at the discretion of the Doctoral Advising Committee. Students may select a combination of coursework among courses for both higher education and P-12 concentrations. The minimum number of credits for this non-certification P-12 concentration option is 18. P-12 concentration courses are typically offered through cohorts established with local school districts and are frequently taught off-campus. More information about cohort course delivery can be obtained by contacting the EOLD Student Services Coordinator.

ELECTIVE COURSE
Students are required to take one elective course of their choice. This is an opportunity for students to take courses that will expand their credentials in a given area or that would supplement their dissertation content area.

COMPREHENSIVE EXAMS AND CANDIDACY
The Comprehensive Examination is taken by doctoral students at the end of their academic course work (based on the committee’s recommendation, it could be prior to, or simultaneously with, taking EDL 9880). The primary purpose is to give the student an opportunity to perform the following:

1. Demonstrate an understanding of basic concepts beyond the final examination taken in specified courses,
2. Form and articulate scholarly arguments and concepts in areas of study,
3. Use the methods of argument, presentation, conclusion, implication, application, and organization to synthesize knowledge from the student’s studies,
4. Illustrate an ability to integrate concepts from multiple disciplines, and
5. Through the presentation of an updated curriculum vitae, demonstrate qualifications for proceeding to a guided-independent research project (the dissertation).

The Comprehensive Examination provides students the opportunity to synthesize knowledge at an advanced academic level. At Clemson, students who successfully complete the Comprehensive Exam are admitted to Candidacy upon the Doctoral Advising Committee members’ signatures on the Graduate School’s GS-5D.

Final Comprehensive exams are comprised of the following:

- **A scholarly project**
  - The semester-long project must advance the student’s research agenda for his/her dissertation proposal. This project should be planned a semester ahead of the written and oral exams. The Major Advisor confirms the project assignment with the Doctoral Advising Committee. Students prepare a written product such as a pilot study, literature review, or a paper for publication or presentation at a conference.
- **An oral exam**
  - Approximately two weeks after submitting the scholarly project, the student presents the project to the Doctoral Advising Committee in what is commonly referred to as an oral defense. The oral defense permits students and Doctoral Advising Committee members to engage in a discussion of the students’ project. A typical presentation begins with a brief overview of the
Then faculty members engage the student in further analysis, clarification, and discussion of the concepts presented. In many cases, it is appropriate for the final portion of the orals to include an overview of the student’s research agenda and timeline to proposal development and proposal defense.

**Passing the Comprehensive Exam**

Once the student has successfully completed the Comprehensive Exam the committee will forward a signed GS-5D form to Clemson’s Graduate School requesting that the student be admitted to candidacy for the Ph.D. degree.

**TIME-TO-DEGREE CLOCK/DEADLINE**

Successful completion of the Comprehensive Exam starts the time-to-degree clock. Students must complete all degree requirements within five years of attaining candidacy, the date of the GS-5D form signatures filed with Clemson’s Graduate School.

**CANDIDACY CORE COURSE**

South Carolina’s colleges and universities offer degrees through approval of the SC Commission on Higher Education (CHE). Upon proposal for Clemson’s Ph.D. in Educational Leadership in the early 1990s, CHE insisted that this degree provide access to advanced graduate studies for a specific population of working professionals, teachers, and administrators in SC schools and colleges. At the time, one of the issues for traditional Ph.D. programs included the notion of residency, a period of close association with campus faculty necessary for apprenticeship in developing research agenda and skills. The concern was that nontraditional students who remain on-the-job as they pursue advanced degrees tend to complete coursework, but not the dissertation; a phenomenon known as ABD – All But Dissertation. The remedy for this set of potential issues is found in the Candidacy Core, a course for Ph.D. candidates that offers a structure for proposal production.

**EDL 9880: Directed Research** is the required post-candidacy course in which students refine the conceptual basis for their research questions in directed study with faculty. Ph.D. candidates use this course to complete their reviews of research and draft their three-chapter dissertation proposal. In consultation with their Major Advisors and Doctoral Advising Committee members, some students may have an alternate proposal model, but all students are strongly encouraged to use this course to draft the proposal for their dissertation. Prior to taking EDL 9880, students must have submitted their GS-2, completed the vast majority of their coursework, including at least three research courses, and developed a plan for completing their Comprehensive Exam.

**STATE REQUIREMENTS FOR CERTIFICATION**

Note that given state requirements attached to accreditation for certification, P-12 students who have selected a certification option must complete the required certification assessment. Typically, certification concentration assessment involves more than one question and can be arranged with the certification officer, who is an EDL faculty member. The certification officer is the faculty member who signed the certification worksheet that the student submitted to the Doctoral Advising Committee when setting up the program of studies post-prelims for the GS-2.

**DISSERTATION RESEARCH & WRITING**

The dissertation research and writing process is a highly intensive (18 credit hours minimum) experience that requires close association between the dissertator (Ph.D. Candidate) and the Major Advisor. Particularly concerning IRB requirements, both are ultimately responsible for fidelity in the research protocols. Furthermore, both are also accountable for meeting all of Clemson’s requirements as well as the professional demands for ethics and knowledge development in the field of Educational Leadership. Clemson’s requirements are enumerated on the Graduate School’s web pages for the formatting and submission of dissertations. The field of Educational Leadership demands appropriate written communications and attention to matters of spelling, grammar, and ethics as detailed in the latest edition of the American Psychological Association’s Publication Manual (also known as the APA Manual).
As adult professionals, Ph.D. candidates assume primary responsibilities for establishing their research and writing deadlines and must accommodate the research, teaching and service assignments of their Major Advisors and Doctoral Advising Committee members in setting and meeting those deadlines. Clemson’s Graduate School provides a specific list of deadlines germane to each semester’s timeline for graduation ceremonies, and Ph.D. students must meet such deadlines and should build them into their plans for progressing from the point of their proposal defense through the research and writing processes up to the dissertation defense.

Successful Ph.D. graduates attribute the following strategies to their degree completion:

- Meet at least monthly, if not more with the Major Advisor, and as needed, with other Doctoral Advising Committee members.
- Divide the research process into sub-tasks based on the study's methods and protocols and set firm dates for completing those sub-tasks.
- Outline the final dissertation chapters and use those sections as sub-tasks with firm dates for completing those sub-tasks.
- Each sub-task completed should involve informing the Major Advisor as well as receiving Doctoral Advising Committee faculty members’ (primarily the Major Advisor’s) feedback and advice on the next sub-task.

**DISSERTATION PROPOSAL**

The candidacy core course (EDL 9880) should be used to prepare the dissertation proposal. This is developed under the tutelage of the Major Advisor. The proposal is comprised of the first three chapters of the dissertation: Introduction, Literature Review, and Research Design. In the dissertation proposal defense meeting (which can, with approval of the Major Advisor, be conducted at the same time as the Comprehensive Exam although, given time constraints, this should be considered carefully), candidates are expected to present and defend a complete dissertation proposal. The dissertation advisory committee will support the candidate in further developing and refining the proposal. The student may not submit an IRB application or collect data without committee approval.

The hallmark of research at Clemson, a research-extensive university and a UCEA institution, is the transparent dissemination of knowledge. All EDL Ph.D. proposal defenses are public events. Working with the Doctoral Advising Committee, the Ph.D. candidate schedules a date acceptable to all of the committee members. The candidate works with the administrative assistants in the College of Education to reserve a suitable location (conference room) for the proposal. Once the date and location have been determined, the candidate emails the graduate programs coordinator (or designee) in the College who will circulate an announcement of the proposal defense and publishes the dates online with the Graduate School’s online process. Typical attendees are other Ph.D. students and interested faculty.

The Ph.D. candidate distributes a complete proposal upon approval of the Major Advisor/Doctoral Advising Committee Chair to the Doctoral Advising Committee at least two weeks prior to the scheduled defense.

The agenda of the defense includes the following items:

1. A brief overview of the research study by the Ph.D. candidate.
   a. The overview typically includes a discussion of concepts/theory and prior research, a clear statement of the problem with associated research questions, a design appropriate to the research problem, an explicit specification of the research procedures from data generation/collection through analysis with projected formats for presentation of results.
2. The Doctoral Advising Committee members and others attending the proposal defense may ask questions of the candidate on any aspect of the proposal.
   a. Generally, faculty members focus their questions on proposal elements most germane to their areas of expertise.

The outcome of the proposal defense may range from full Doctoral Advising Committee support to proceed (pending IRB approval) to a request for substantial revision to the proposal and scheduling of a new defense. Sometimes the Ph.D. candidate and the Major Advisor receive instructions from the Doctoral Advising
Committee to implement minor revisions, circulate the revised proposal, and pending full approval from all of the Doctoral Advising Committee members, then proceed with the study. The next step for proposals approved by the Doctoral Advising Committee is obtaining Clemson’s Institutional Review Board approval.

**IRB Approval**

Ph.D. candidates must not seek IRB approval for their dissertation research until successfully defending their proposals. Ultimately, the Major Advisor serves as the Principal Investigator (PI) for the candidate’s research. The steps in this process are key to Clemson’s procedures assuring the ethical construction and trustworthiness of research protocols.

The Doctoral Advising Committee serves as the first step in screening the design and methods of Ph.D. research for validity and ethical treatment of participants. The IRB is a second step in this process, not an initial one. Major Advisors and their immediate supervisors (department chair) must sign the IRB forms before transmitting them to Clemson’s Office of Research Compliance. The Office of Research Compliance communicates through the Major Advisor, not the Ph.D. candidate. In addition to the prerequisite of a successful proposal defense, the Office of Research Compliance has two other prerequisites:

1. Research Certification of the Ph.D. Candidate, which should have been obtained in EDL 9100, and renewed, if more than two years have elapsed since then
2. Research Certification of the Major Advisor

**DISSERTATION OPTIONS**

Students in the EDL program have two options for their dissertations:

1. They may develop a traditional five chapter dissertation (introduction, literature review, design, results, and discussion).
2. The student may develop a three article dissertation
   a. This is particularly attractive for students certain of pursuing an academic career or who are working closely with a faculty member on his or her research agenda. The student needs to work closely with the Advisor to meet the requirements of both options.

**GRADUATE SCHOOL DEADLINES**

Every semester Clemson’s Graduate School publishes specific deadlines on its website for students planning to graduate. Students, not faculty, are responsible for being aware of and meeting all university requirements, especially the deadlines published by the Graduate School. Some of these deadlines occur as early as the first week of classes, and potential graduates must meet those deadlines. Otherwise, the Graduate School will charge and collect late fees for missing any of these deadlines. EDL’s Ph.D. students must meet these deadlines and Graduate School requirements and policies without exception.

**DISSERTATION DEFENSE & PUBLICATION**

As is the case with the proposal defense, the dissertation defense is a public event for the transparent dissemination of knowledge. Dissertation defense dates are communicated within the College of Education and Clemson’s Graduate School calendar. Ideally, throughout the program and process, the Major Professor and Doctoral Advising Committee members have worked with the Ph.D. candidate in increasing knowledge dissemination and productivity through presentation of aspects of the student’s research agenda at conferences and in preparing manuscripts. Such presentations serve as preparation for the public defense of the dissertation. These experiences should be apparent in the student’s updated curriculum vitae, which appears as an appendix in the dissertations from EDL’s Ph.D. program.

All members of the Doctoral Advising Committee and the student have agreed to the defense date at least a month in advance. Students may not attempt to schedule their defenses without explicit permission from their Major Advisor. The Ph.D. candidate submits a final draft of the dissertation to the Doctoral Advisory Committee at least two weeks before the defense date. The candidate works with the administrative assistants in the College of Education to reserve a suitable location (conference room) for the defense. Once the date and location have been determined, the candidate contacts the graduate programs coordinator (or
designee) in the College who will make a public announcement of the defense date and location and to alert the Graduate School. The defense date must also be published using the Graduate School’s online process.

Generally, the agenda for the dissertation defense follows a similar format as the proposal defense. Candidates provide a brief presentation of their research studies from the theoretical contributions through design, data collection, analysis and results with a discussion of implications for research and practice. Members of the Doctoral Advising Committee as well as other attendees may question the candidate about any aspect of the study. Typically, each faculty member focuses on areas of the study that sustain his or her areas of expertise. Those candidates who have worked closely with their Doctoral Advising Committees, and who have taken the opportunities for co-authoring conference presentations, papers, and manuscripts with faculty, will find the defense a collegial and rewarding conversation among peers.

A successful defense leads to graduation and the receipt of the Ph.D. with a hooding ceremony. The Doctoral Advising Committee determines the next steps if the defense is unsuccessful.

The consequences of failure may range from reconfiguration of the Doctoral Advising Committee to adding to the research protocol or to restarting the process from the proposal stage. As at any point in the Ph.D. program, the Doctoral Advising Committee also has the right to prescribe additional coursework and preparation to aid the student in successfully completing the degree. Usually, the requirements set by the Doctoral Advising Committee require time for completion, which means that the earliest a new dissertation defense may be scheduled is in the next semester.

Information about dissertation manuscript submission process is available on the Graduate School’s website.
Appendix A: Educational Leadership Program Process and Non-Course Requirements

Scholarship in a terminal degree requires completion of coursework combined with non-course degree requirements. For the Ph.D. in Educational Leadership (EDL), the process occurs as follows:

**Admission to Ph.D. in Educational Leadership & Clemson’s Graduate School**
- Use the Clemson Graduate School [Online Application](#).
- Include additional EDL Program Admissions Requirements for Higher Ed. & P-12.
- Review Clemson University Financial Support and Tuition Information.
- Consult with a Ph.D. faculty member in chosen concentration (i.e. Higher Education or P-12).
- Review Course Work and Clemson’s General Guidelines and Regulations. See the Clemson [Graduate School Catalogue](#) and [Graduate School Handbook](#) for the following:
  - Registration for Courses, The Grading System, Required GPA and Scholastic, Probation, Independent Study, and Student Academic Responsibilities
- Formation and Approval of Preliminary Committee (Filing of CoE Preliminary Exam Committee by beginning of 2nd year)

**Preliminary Core Studies (min. of 4 courses/12 cr. within 2 yrs. of admission)**
- EDL 9000 Principles of Educational Leadership (3 credits)
- EDL 9050 Theory and Practice in Educational Leadership (3 credits)
- EDL 9100 Introductory Doctoral Seminar (3 credits)
- EDL 9110, Systematic Inquiry in Educational Leadership
- Preliminary Examination (be enrolled in or have completed all Prelim Core courses)

**Preparation for Preliminary Examination**
- Study for questions representing the following domains:
  - Leadership, Research, Policy, Ethics, and Diversity
- Complete the initial Program of Study Plan (Filing of [GS-2 Form](#))
- Select of Doctoral Advisory Committee and Chair (Major Advisor) prior to taking the Prelim
- Schedule the Prelim defense with the Committee for approximately two weeks after taking the Prelim

**EDL Ph.D. Program of Study**
- See Program of Study section in this handbook

**The Comprehensive Examination**
- Confirmation of Doctoral Advisory Committee membership and audit of [GS-2 courses](#)
- Preparation for Comprehensive Examination
  - Successful Completion of the Comprehensive Examination (Filing of [GS-5D Form](#))
- Completion of the Dissertation Residency (EDL 9880)
- Dissertation Proposal Defense Committee Meeting
- Receipt of Institutional Review Board Approval

**Dissertation Research and Writing**
- Writing the Dissertation (traditional 5 chapter or 3 publishable articles)
- EDL 9910 Doctoral Dissertation Research (18 hours)
- [The Final Timeline](#) – See Clemson Graduate School Deadlines
- Filing of graduation application (iRoar) & [GS-7D forms](#) are not considered complete until Committee indicates successful completion of the Dissertation Defense

**Dissertation Defense**
- Filing of Announcement for the Dissertation Defense
- The Dissertation Defense
- Dissertation Defense Results and Final Dissertation Copy
- [The Ending Steps](#) in the Dissertation Process, includes filing of [GS-7D](#)

**Publication of Results**
- Selection of a Portion of Dissertation to Publish
- Submission of Manuscript to a Refereed Journal
## Appendix B: Ph.D. in Educational Leadership P-12 Concentration Options

### Total Credits = 24²

### Total Credits=24

### Total Credits=36

### Total Credits = minimum of 18

---

1. The courses listed meet SC Department of Education requirements for approved programs at the building level and the program meets CAEP/ELCC National Recognition for an accredited program.
2. Candidates must have both teacher certification and 3 years of teaching experience at the level of principal/supervisor certification sought. For example, to be eligible for SC Elementary Principal/Supervisor certification, the candidate must have a valid SC Elementary Teacher Certificate and three years of teaching in one or more the of elementary grades, 1 through 5.
3. For final approval of the superintendent’s certification, the state of SC requires not only holding the principal certificate, but also completion of two years of employment in a position utilizing that certificate as prerequisites. Therefore, completion of coursework satisfies only a portion of the requirements for district superintendent under SC statutes and regulations.
4. Note: Certification Field Experiences/Practical do not substitute for the required Research Internship (EDL 9860) nor vice versa.
5. To meet SC certification requirements, some concentration options must exceed the degree minimum of 18 credits.
