EDISTO FORAGE BULL TEST
EDISTO HEIFER DEVELOPMENT PROGRAM

Announcements:

Announcements from the auction box will take precedence over the information printed in the sale book.

Auctioneer:

Carroll T. Cannon, Ty Ty, GA

Sale Manager:

Scott Sell, Edisto Bull Test Coordinator/Research Associate
O - (803) 284-3343 • M - (912) 682-9590
Email: gsell@clemson.edu

Cattle Managers: Gillian Tuttle, Harry McElhaney

Station Director: Dr. Chris Ray

Farm Manager: Dan Ulmer

Edisto Research Education Center

64 Research Rd., Blackville, SC 29817
www.clemson.edu/extension/bulltest/edisto/
P (803) 284-3343

Sale Day Telephone: (912) 682-9590

Livestock Mortality Insurance:

A representative from American Live Stock Insurance Company will be available to assist you with mortality insurance for your purchases.

ALL bulls must be picked up the day of the sale or arrangements made for their transportation within 3 days.

Sale Information and Dates

In anticipation of questions and concerns regarding the logistics and flow of how we conduct the 2020 Edisto Bull Test and Heifer Sale, we have prepared this page of "how to's", help, and sale logistics.

To receive a sale book via USPS mail please go here: <http://bit.ly/EBT2020CATALOG>

- 1) DV Auction Homepage - <https://www.dvauction.com/>
- 2) DV Auction Basic How To Page - <https://www.dvauction.com/howto>
- 3) Online Bidding Tutorial - This resource is excellent for beginners who are using the online format for the first time. <https://www.dvauction.com/pages/bidding-tutorial>
- 4) DV Auction's Support Page - <https://www.dvauction.com/support>

Here is a short synopsis of how this year's sale will work/timeline:

August 25, 2020 - Bulls and Heifers will be clipped

September 1-15, 2020 - Breeding Soundness Exams and Final Heifer Pregnancy Tests

September 28, 2020 - Bulls and Heifers Filmed - Posted within a few days of the 28th

September 21 - October 9, 2020 - Bulls and Heifers Available for in person viewing. This will be in accordance with the University's COVID-19 policies and procedures. We will require at least a call, email, or text 24 hours ahead of a visit (**you cannot just show up**). This is for everyone's scheduling and sanity.

October 10, 2020 - 11:00 AM Sale at www.dvauction.com

- Auctioneer/Test Station Manager and employees/DV Auction Technician will all be in a conference room at the Edisto REC conducting the sale live.
- A video feed of each lot filmed as noted above will play as the auctioneer sells the lots, just as if we were running them through the ring.
- We will have multiple telephones for phone bids available
- We will take pre-bids for lots if preferred - meaning we will bid for you up to a certain pre-set amount you have provided us. This would be the least preferred method of participating.

October 12 - October 31, 2020 - This will be the pick up period for your purchases. ALL heifers and/or bulls must be picked up no later than October 31, 2020. We bring in new heifers and bulls for the 2021 test the first week of December, and we need the short time in between for maintenance on the lots, pens, working facilities, and electronic data collection systems. Since both of these are long test time wise, the 5 weeks between testing years is a rushed/important time for us.

COOPERATIVE EXTENSION

Test and Sale Sponsored by:

Clemson University Cooperative Extension Service

This sale will be broadcast live on the internet.

Visit www.DVAuction.com and register today.

GENERAL INFORMATION

Entry Requirements:

1. All consignors must be members of the South Carolina Cattlemen's Association.
2. Breeders' herds must be enrolled in their respective breed association's performance records program.
3. All bulls must be registered purebreds or registered hybrids (Balancer, SimAngus, etc.)
4. Embryo transplant calves will be accepted.
5. Actual birth weights are required for all bulls.
6. Minimum Adj. 205-Day Weaning Weight: British breeds - 575 lbs. and All Other Breeds - 625 lbs.
7. Minimum Adj. 205-Day Weaning Weight Ratio of 93. All bulls, except embryo transplants, must be raised by their genetic dams.
8. All bulls must have a negative blood test for persistent BVD. Pre-Delivery Health Requirements:
 - a. Vaccinations - IBR, PI3, BVD, BRSV, 5-way Leptospirosis, 7-way Blackleg (Clostridials) and Pasteurella haemolytica
 - b. Dewormed.

Sale Requirements:

1. Minimum performance requirements:
 - a. Average Daily Gain Ratio - 85
 - b. Weight per Day of Age Ratio - 90
 - c. Adjusted 452-Day Yearling Weight Ratio - 90
2. Bulls must pass a Breeding Soundness Exam from a Licensed DVM within 1 month of sale.
3. Sale eligible bulls must pass a Screening Committee's evaluation of frame size, structural soundness, disposition and muscling.
4. All bulls sell under their respective breed association guarantees.
5. Sale order based on INDEX = ADG + WDA across breed-age groups.

How Bulls Have Been Handled:

1. December 1, 2019 - Bulls were delivered to the test station, tagged, dewormed with Ivermectin Plus INJ, ear notch sampled, temperature recorded, and vaccinated with (modified live IBR, PI3, BVD, BRSV, 5-way Leptospirosis), (Pasteurella haemolytica and Multocida) and (7-way Blackleg - Clostridials) vaccines. The 14-day pre-test warm-up period began.
2. December 15, 2019 - Bulls were weighed on-test.
3. June 2020 - All bulls were weighed off-test weight and yearling scrotal circumference measurements were taken on the junior bulls.
4. May 31, 2020 - Bulls dewormed with Cydectin pour on.
5. Bulls were maintained all summer on millet, Tifton 85 and crabgrass.

Feed Program:

Bulls were developed strictly on a diet of ryegrass, arrowleaf clover, wheat grazing, oat grazing, Tifleaf 3 millet, cow peas, crabgrass, and Tifton 85 bermuda grass. Free choice Tifton 85 hay was also provided, as well as free choice minerals. This is and was a 100% forage test. No grain was fed during the testing period. During the final three to four weeks leading up to the sale, the bulls were supplemented with a commodity blend based ration at the rate of 1.0% of body weight per/hd per/day to get them in sale condition.

Genetic Defects:

All Angus, Balancer, Red Angus and SimAngus bulls are free of the Arthrogryposis Multiplex (AM) and Neuropathic Hydrocephalus (NH) lethal genetic defects by pedigree or DNA test if there were potential carriers in their pedigrees.

Contributors to the Clemson Bull Test Program:

The following companies and representatives contributed supplies to the Clemson Bull Testing Program. Their generous support of this program for the genetic improvement of South Carolina's beef cattle industry is appreciated:

Faculty and staff of the Edisto REC
Zoetis Animal Health - Tyler Thoreson

TERMS AND CONDITIONS OF SALE

1. The Auctioneer will settle any disputes as to bids.
2. Terms of the sale are cash or check payable to: Clemson University.
3. Each animal will be at the purchaser's own risk as soon as sold.
4. Bulls will be fed and cared for free of charge up to 48 hours after the sale.
5. A certificate of registration will be furnished by the consignor for each bull.
6. The test manager will handle the transfer of registration papers to the buyers.
7. Angus and Polled Hereford bulls are guaranteed not to be carriers of dwarfism under their respective breed association's guarantees.
8. All bulls are guaranteed breeders, if properly cared for. Any bull failing to breed may be returned to the seller's farm at the buyer's expense. If the bull is in good condition and complies with the health requirements, the buyer is entitled to a satisfactory settlement. **Settlement is between the buyer and seller.**
9. The above guarantees and terms of the sale shall constitute a contract between the buyer and seller of each lot and shall be equally binding upon both parties.
10. A "CONSIGNOR" may not "**NO SALE**" a bull during or after the sale.
11. Clemson University in its capacity as an educational institution and in carrying out its public responsibilities is vitally interested in promoting quality and healthy livestock. In doing so, the University acts solely as an agent and is not responsible for any losses incurred by individuals.
12. All persons attending the sale do so at their own risk. Neither Clemson University nor the Sales Manager assumes liability for the safety of the test station facilities or for the behavior of the animals.
13. **FLOOR PRICE - a minimum floor price of \$1,750 is set on each bull.** This is the average value of bulls of this weight and condition if sold for beef at the stockyards. Bulls not selling during the auction will be taken home by the consignor or shipped directly to slaughter following the sale.

% INTRAMUSCULAR FAT TO QUALITY GRADE, MARBLING DEGREE AND MARBLING SCORE CONVERSION

PERFORMANCE RECORD

1. Tag No. = bull's test ear tag number.
2. Registered Name = bull's registered name.
3. Birth Date = actual birth date.
4. Reg No. = breed association official registration number.
5. Tattoo No. = bull's permanent identification in ear.
6. BWT EPD = birth weight EPD (lbs.) is a within breed predictor of a bull's ability to transmit birth weight to his progeny compared to other bulls.
7. WWT EPD = weaning weight EPD (lbs.) is a within breed predictor of a bull's ability to transmit preweaning growth to his progeny compared to other bulls.
8. YWT EPD = yearling weight EPD (lbs.) is a predictor of a bull's ability to transmit yearling growth to his progeny compared to other bulls.
9. YHT EPD = yearling height EPD (inches) is a within breed predictor of a bull's ability to transmit yearling height to his progeny compared to other bulls.
10. YSC EPD = yearling scrotal circumference EPD (cm) is a within breed predictor of a bull's ability to transmit yearling scrotal size to his sons compared to other bulls.
11. Milk EPD = maternal milk EPD (lbs. of calf weaning weight) is a within breed predictor of a bull's ability to transmit milk and maternal ability to his daughters compared to daughters of all other bulls.
13. RADG EPD = residual average daily gain (lbs.), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.
13. \$Wean = \$wean index (\$ per head) is a within breed predictor of the expected average difference in a bull's progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.
14. \$Beef = \$beef index (\$ per head) is a within breed predictor of the expected average difference in a bull's progeny performance for postweaning and carcass value compared to progeny of other sires.

15. BWT = actual birth weight (lbs.)
16. AWWT = weaning weight (lbs.) adjusted to 205 days of age and for age-of-dam.
17. AWWT Ratio = ratio of bull's adj. 205-day weaning weight to the average for all bulls in the same weaning-management group.
18. AYWT = adjusted 365-days yearling weight (lbs.)
19. AYWT Ratio = ratio of bull's adjusted 365-days yearling weight to his breed-age group average.
20. On-WT = on-test weight (lbs.)
21. Off-WT = off-test weight (lbs.)
22. ADG = test average daily gain (lbs./day) = [On-Test Weight - Off-Test Weight] / Days on Test.
23. ADG Ratio = ratio of bull's ADG to his breed-age group average.
24. WDA = weight per day of age (lbs./day) = (Off-Test Weight / Off-Test Age).
25. WDA Ratio = ratio of bull's WDA to his breed-age group average.
26. uREA = adjusted 365-days yearling 12th rib ribeye area (in²).
27. uREA Ratio = ratio of bull's adjusted 365-days yearling ribeye area to his breed-age group average.
28. AYSC = adjusted 365-days yearling scrotal circumference (cm).
29. AYFS = adjusted 365-days yearling frame score.
30. Index = ADG + WDA.
31. Index Ratio = ratio of bull's index to his breed-age group average

Association Perspective Low-birth-weight EPDs

Looking at a single trait on EPDs costs performance and money.

by **David Gazda**,
regional manager,
American Angus Association

One of the most common concerns I hear from commercial producers using Angus genetics is the size of calves at birth. Instinctively, my first thought is that the producers experienced calving problems due to the calves being too large at birth. However, the problem generally tends to be just the opposite, where the calves have been extremely small and light at birth, struggled to nurse and never caught up with their contemporaries from a growth standpoint.

Upon visiting with the producer and reviewing the bull's registration certificate and EPD profile, I usually discover a common theme – the producer had been selecting primarily for calving-ease, low-birth-weight EPD bulls with no regard to any other traits. This is certainly understandable if the producer is breeding heifers and needs a certain level of calving ease delivered by low-birth-weight Angus bulls. Furthermore, in the southeast, like many other areas of the country where cow herds are relatively small, the herd bull may have to be multipurpose, breeding both heifers and mature cows with, again, emphasis being placed on calving ease.

At the risk of being controversial, many of these small calf scenarios could be eliminated if the producers would simply be willing to accept more birth weight, particularly when breeding mature cows. One only has to attend a production or test station sale to witness firsthand how the heavier-birth-weight-EPD bulls are penalized and therefore sell at a substantial discount. Have calving-ease and low-birth-weight EPDs been overemphasized to commercial producers? Maybe; maybe not.

Regardless, the commercial producer equates Angus genetics with calving ease, fertility, maternal strength and carcass quality, and as seedstock producers we are challenged daily to deliver those genetics.

In closing, producers need to select bulls that allow them to reach their production goals; however, single-trait selection based upon an individual's birth weight EPD may needlessly sacrifice additional pounds at weaning. Next time you are in the market for a bull, don't discriminate against a little more birth weight EPD. You will still receive the calving ease you have always expected from Angus and a few extra dollars in your pocket at weaning!

5 WAYS A BAD HERD BULL CAN WRECK YOUR PROFITABILITY

A good or bad herd bull will impact your cow herd for years to come. Here are 5 critical items cattlemen should consider when buying a herd bull.

1 STERILE OR SUBFERTILE -NO BSE

If you're purchasing bulls, they should have all passed a BSE before sale day. If you have other bulls in your battery, they all need to be tested before turn-out.

2 STRUCTURAL ISSUES

To do his job, a bull must be sound in his structure so that he lasts many years, serving many cows in a short period of time without suffering injury. Structural soundness is an integral part of this fertility. The bull's ability to remain fertile is dependent on his structural soundness.

3 GENETIC DEFECTS

Depending on the breed of your cattle, you should ensure a bull is not a carrier of a lethal genetic defect confirmed by genetic DNA test, when available. These defects include: Arthrogyposis Multiplex (AM), Neuropathic Hydrocephalus (NH), Contractural Arachnoidactyly (CA), Osteopetrosis (OS), Tibial Hemimelia (TH), and Pulmonary Hypoplasia with Anasarca (PHA).

4 UNMANAGEABLE DISPOSITION

Not only is a bull with a poor disposition hard to manage, but he can wreck gates and equipment, thus increasing the cost to keep him around. Disposition may also be heritable, decreasing growth and productivity of offspring.

5 DISEASE

Bulls should test negative for BVD-P1 and bTB, as well, come from a program with a comprehensive vaccination program recommended for your part of the country.

Only purchase herd bulls from trusted sources who provide data verifying these criteria and meeting your expectations.

2020 Edisto Heifer Development Program

Sale Order Index Guide

Scott Sell, Research Associate
Clemson Edisto REC

Unlike the Edisto Forage Bull Test where the sale order is generated using average daily gain and weight per day of age; our heifer development program seeks to identify females who breed early in the season, are likely to calve unassisted, raise that calf to produce a profitable weaning weight with minimal feed/forage input, and have genetic indications that she will remain in the herd for 10 plus years.

With these factors in mind we ranked the heifers in this year's heifer test based primarily on breeding date (AI pregnancies placed at the top of the sale order and natural service ranked second). Within each pregnancy category we then used a secondary ranking based on the Igenity Total Cow Index (TCI), obtained using the latest in genomic testing from Neogen's Igenity beef genomic testing products.

In the table below is an explanation of how genomic traits are weighted within the TCI. Stayability and weaning weight combined comprise 40% of the total index weighting. Calving ease maternal and heifer pregnancy rates combined comprise an additional 30% of the total index with calving ease direct, residual feed intake and milk combining to represent the remaining 30% of the total index. We believe this is a well-balanced index that utilizes the important traits, in a manner allowing selection of genetically valuable replacement heifers.

Genomic Trait	Weight in TCI
CE	10%
CEM	15%
HEIFER PREG	15%
RFI	10%
STAY	20%
WW	20%
MILK	10%

Calving Ease Direct (CE) – Percentage of unassisted births, indicating greater probability a calf will be born unassisted out of a first-calf heifer. Genetic factors such as birth weight and shape of the calf are included in Calving Ease Direct (CED). A higher value is greater calving ease.

Calving Ease Maternal (CEM) – The probability a first-calf heifer will calve unassisted. Calving Ease Maternal (CEM) includes all genetic factors that impact a heifer's ability to calve unassisted, such as pelvic area and her genetic contribution to birth weight. A higher value is greater calving ease.

Heifer Pregnancy Rate – A heifer's potential to conceive during breeding season, relative to other heifers. A higher value is desired.

Residual Feed Intake (RFI) – This is an indicator of feed efficiency. It is the difference in animals' daily consumption of feed to achieve the same level of daily gain. Lower RFI indicates greater feed efficiency

Stayability (STAY) – The chance a heifer will remain in the herd as a productive cow until at least six years of age. A higher value is desired.

Weaning Weight (WW) – lbs at 205 days. A higher value is better

Milk - Is expressed as pounds of calf weaning weight affected by the milk production of a calf's dam. This is not a prediction of actual pounds of milk produced.
