<https://www.fsa.usda.gov/programs-and-services/disaster-assistance-program/noninsured-crop-disaster-assistance/index>

The Noninsured Crop Disaster Assistance Program helps producers manage risk by covering crop losses and crop planting that was prevented due to natural disasters. The eligible or “noninsured” crops include agricultural commodities not covered by federal crop insurance. Producers must be enrolled in the program and have purchased coverage for the eligible crop in the crop year in which the loss incurred to receive program benefits following a qualifying natural disaster.

Prepare for your visit to the service center

Producers who have not participated in a USDA program should contact their local USDA service center to establish farm records. To establish a farm tract number, be sure to bring the following items:

-  Proof of identity such as driver's license or Social Security number/card
-  Copy of recorded deed, survey plat, rental, or lease agreement of the land (You do not have to own property to participate in USDA programs.)
-  Articles of incorporation, estate, or trust documents for entities

For the Livestock Indemnity Program, we also recommend that you bring:

-  Adequate proof that the eligible livestock deaths occurred, such as purchase records, veterinarian records, written contracts, bank or loan documents, and/or production records

During your visit, you may need to complete or update the following forms for your farm records:

- [CCC-941](https://www.farmers.gov/sites/default/files/documents/Form-CCC0941-Adjusted-Gross-Income.pdf) (<https://www.farmers.gov/sites/default/files/documents/Form-CCC0941-Adjusted-Gross-Income.pdf>) – Reports your average adjusted gross income for programs where income restrictions apply (Note: This form does not apply to the 2017 Wildfires and Hurricanes Indemnity Program)
- [AD-1026](https://www.farmers.gov/sites/default/files/documents/Form-AD1026-Highly-Erodible-Land.pdf) (<https://www.farmers.gov/sites/default/files/documents/Form-AD1026-Highly-Erodible-Land.pdf>) – Ensures a conservation plan is in place before lands with highly erodible soils are farmed, identified wetland areas are protected, and conservation compliance provisions are met
