The workshop will focus on informing landowners, conservation non-profits, and state agencies about current efforts to quantify carbon and ecosystem services on the landscape to better understand future conservation goals and funding opportunities, especially carbon markets.

Presenters and Presentations Include:

**Lucas Clay** – Ph.D. Student, Clemson University  
*Topic*: The future of Longleaf Pine restoration and Carbon Markets in South Carolina

**Katie Perkins** – Student, Environmental and Natural Resources, Clemson University  
*Topic*: A spatial analysis of carbon stocks in South Carolina to inform Ecosystem Services Conservation

**John Quinn** – Associate Professor, Furman University  
*Topic*: Prioritization of Land Conservation and Payments for Ecosystem Services

**Marzieh Motallebi and Tom O’Halloran** – Assistant Professors, Clemson University  
*Topic*: Overview of Past and Current Projects on Carbon Sequestration

**SAF CFE Cat. 1: 1.0 hours**  
In collaboration with: TNC and SC NRCS.
