# SOUTH CAROLINA FFA FORESTRY CAMP

While we want to ensure all students have fun, as part of the Agricultural Education model we want to emphasize experiential learning opportunities.

## **Learning Objectives covered:**

- **Apply relevant forestry terms to industry based problems.**
- **Promote an understanding of the economic impact of the forest environment and the forest industry to the American economy.**
- **Recognize sustainability (multiple use) opportunities in the forests.**
- **Recognize environmental and social factors affecting the management of forests.**
- **Identify major species of trees of economic importance to the United States and internationally.**
- **Identify and properly use hand tools and equipment in forestry management.**
- **Recognize and understand approved silvicultural practices in the United States.**
- **Analyze forest/tree disorders to promote overall natural resource well - being.**
- **Recognize safety practices in forest management.**

These learning objectives align with the South Carolina Agricultural Education standards and the Career Development Event (CDE) In line with the National FFA Organization.

*In partnership with the  
South Carolina Forestry Commission*
