North Myrtle Beach, SC 29582

SOUTH CAROLINA FFA OUTDOOR RECREATION/ENR CAMP

While we want to ensure all students have fun, as part of the Agricultural Education model we want to emphasize experiential learning opportunities.

Learning Objectives Covered:

- Discuss the role that soil, water, and vegetation play into park planning.
- Expose students to outdoor recreational activities that will enrich their leisure time, promote self-fulfillment, and help to re-create the mind and spirit.
- Develop the behavior of good judgment in the selection of recreational pursuits that meet physical, emotional, social, and spiritual needs.
- Enhance through education, public awareness and understanding of the important role hunting plays in the conservation of wildlife resources.
- Provide students an awareness of their legal and ethical responsibilities when enjoying and/or harvesting wildlife.
- Provide students with a better understanding of the principles of wildlife management practices and the need for wildlife laws and regulations
