Ann Mayfield, Director
Abigail Winburn, Program Coordinator

\$195/Individual

**Registration Opens:
February, 26, 2025**

South Carolina FFA

Outdoor Recreation Camp

While we want to ensure all students have fun, as part of the Agricultural Education model we want to emphasize experiential learning opportunities.

Learning Objectives Covered:

- Discuss the role that soil, water, and vegetation play into park planning.
 - Expose students to outdoor recreational activities that will enrich their leisure time, promote self-fulfillment, and help to re-create the mind and spirit.
 - Develop the behavior of good judgment in the selection of recreational pursuits that meet physical, emotional, social, and spiritual needs.
 - Enhance through education, public awareness and understanding of the important role hunting plays in the conservation of wildlife resources.
 - Provide students an awareness of their legal and ethical responsibilities when enjoying and/or harvesting wildlife.
 - Provide students with a better understanding of the principles of wildlife management practices and the need for wildlife laws and regulations
