

MASTER OF TRANSPORTATION SAFETY ADMINISTRATION

Want to learn more?
Ready to apply?

Clemson University's **Master Of Transportation Safety Administration (MTSA)** degree is the first of its kind in the U.S. with a focus on the management and administration of road safety programs. This innovative degree is aligned with national and international standards for core competencies that all transportation safety professionals should possess.

SAVE LIVES. CHANGE FUTURES. BE A TRAILBLAZER.

Created by Clemson's Institute for Global Road Safety and Security (IGRSS), the Master of Transportation Safety Administration (MTSA) is a two-year, 30-credit-hour, non-thesis interdisciplinary program developed in collaboration with national leaders in the field. MTSA is delivered completely online to facilitate access by working professionals and students who aspire to pursue a graduate degree.

As a groundbreaking master's degree, MTSA accepts candidates from many professional backgrounds. For instance, MTSA students can represent education, enforcement, emergency response, engineering, research and evaluation, public policy, public health and injury prevention, driver and vehicle services, alcohol and drug prevention, communications and marketing, transportation safety planning, and transportation finance and grants administration. Anyone with an interest in the field and a passion for the work should consider applying for this program.

MTSA graduates will be trailblazers, creating a pipeline of leaders to fill critical roles in the creation and management of high quality, effective road safety programs—saving lives and building safer communities throughout the world. Visit clemson.edu/MTSA to learn more or to access the application portal. Because we offer a rolling enrollment process, you can apply for consideration for any term at any time.
