Major Research Interest

My research aims to maximize the treatments of pelvic floor disorders, especially in older women. Further, I have gained expertise in the conduct and publication of systematic reviews/ clinical guidelines for gynecologic disorders, and more, recently, pelvic anatomy.

Grant Support

10/30/19-current \$7,625 Research Incentive Fund (Departmental)

A Non-Opioid Multimodal Pain Regimen in Urogynecologic Surgery an RCT- Wheeler (col, senior mentor for resident research team)
The objective of this study is to evaluate narcotic use after implementation of a Non-Opioid Multimodal Pain (NOMO) protocol in patients who are undergoing a urogynecologic procedure.

5/10/2019-current \$20,000 Prisma Health-Health Sciences Center Seed Grant

Biomarkers of Adverse Reactions to Surgical Vaginal Implants (Wheeler coPI in collaboration with Dr Moss at Univ of South Carolina)
The purpose is to identify cytokines that may be used as a basis for dividing patients into reactive (mesh exposure occurs through the vaginal wall) and non-reactive (no exposure occurs through the vaginal wall) groups. When considering surgery, these biomarkers could predict deleterious inflammation in response to a polymeric implant and aid in preoperative counseling.

11/14/2013-current \$121,000 Boston Scientific Corporation Xenform Postmarket Surveillance Study

A Prospective, Non-Randomized, Parallel Cohort, Multi-Center Study of Xenform versus Native Tissue for the Treatment of Women with Anterior/Apical Pelvic Organ Prolapse (Wheeler site PI)

The purpose of this study is to compare transvaginal repair with a biologic graft to traditional native tissue repair in women surgically treated for anterior and/or apical pelvic organ prolapse.

11/14/2013-current \$28,000 Boston Scientific Corporation Uphold Lite Postmarket Surveillance Study

A Prospective, Non-Randomized, Parallel Cohort, Multi-Center Study of Uphold Lite versus Native Tissue for the Treatment of Women with Anterior/Apical Pelvic Organ Prolapse (Wheeler site PI)

The purpose of this study is to compare transvaginal repair mesh repair to traditional native tissue repair in women surgically treated for anterior and/or apical pelvic organ prolapse.

7/01/07-3/30/10 \$200,000 American Geriatrics Society: Dennis W. Jahnigen Career Development Scholar

Life Space Assessment in Older Women Undergoing Non-surgical Treatment for Urinary Incontinence - Wheeler (PI, statistician)

The purpose is to describe the change in mobility via the Life Space Questionnaire in older women (70 years or older) undergoing nonsurgical treatment for urinary incontinence.

10/01/05 -05/31/08 \$30,000 Southeast Center of Excellence in Geriatric Medicine, Training Support and Pilot Grant

Low dose 17- β -estradiol cream: serum and local/cellular vaginal response

Wheeler (PI, statistician, fellowship thesis)

The purpose of this study is to demonstrate local/vaginal response to low dose intravaginal estrogen cream (17 β -estradiol) that does not cause any significant systemic absorption, over four months of therapy, in twenty women with symptoms of atrophic vaginitis.

9/6/06 – 12/31/10 \$62,500 Pfizer Pharmaceuticals Investigator Initiated Research Award

Randomized Controlled Trial Of Tolterodine Versus Low-Dose Vaginal Estradiol Cream For The Treatment Of Overactive Bladder In Postmenopausal Women, Gerten, PI

Wheeler (Co investigator, statistician)

The goal is to compare the efficacy of tolterodine and estradiol alone or in addition to each other.

Other Ongoing Projects

Urinary Tract Infection after Gynecologic Surgery. In write up. Co-Author. SGS-SRG.

Recommended standardized terminology of the posterior female pelvis. In write up. Co-Author. SGS-PAG.

Recommended standardized histology terminology of the female pelvis. In process. Co-I. SGS-PAG.
