Guidance from the General Education Committee for a course to be included in the *Global Challenges* area of the general education curriculum - Crossings:

**Background:**
Please review the [For Faculty page](#) of the Crossings website and the links therein.

**Criteria to consider in the course design and syllabus:**
Please review the [For Faculty page](#) of the Crossings website and the links therein. The [What is a “Global Challenges” Course in the Clemson General Education Curriculum page](#) and any follow-up faculty teaching development will be especially useful to you.

**Submitting a course for review:**
If you believe that you are prepared to submit a course for review in the Global Challenges area to be included in the fall 2022 catalog or after, please submit a "Gen Ed Course Review" form using Curriculog.

Be sure to do the following.
1. Please read the [Curriculog Guidelines document](#) for instructions.
2. Please prepare an updated syllabus, where the Global Challenges learning outcomes are clearly integrated into the course through content/pedagogy/assignments/etc., the signature assignment is apparent, and where there is a topical or by-week outline of what the course will cover.
3. Please read the [Course Review page](#) on the Crossings Curriculum website.

**Student learning outcomes & assessment rubric:**

*(Also available via the [For Faculty page](#) of the Crossings website.)*

Student learning outcomes for the Global Challenges area: 1.) *Students will demonstrate critical thinking through analysis of global challenges.* 2.) *Students will evaluate how varying perspectives influence global challenges.* 3.) *Students will demonstrate the integration of ethics into analysis of global challenges.* (Each Global Challenges course will incorporate at least two of the three student learning outcomes.)

Assessment rubric for Global Challenges student learning outcomes:

(In submitting student work for assessment, faculty will have the opportunity to check which rubric rows are most appropriate to the signature assignment instructions.)

Definitions:

Complex, multi-layered context: The sub-parts or situational conditions of a scenario that bring two or more ethical dilemmas (issues) into the mix/problem/context for students’ identification.

Context: The historical, ethical, political, cultural, environmental, or circumstantial settings or conditions that influence and complicate the consideration of any issues, ideas, artifacts, and events.

Cross-relationships among the issues: Obvious or subtle connections between/among the sub-parts or situational conditions of the issues present in a scenario.

Perspective-taking: The ability to engage and learn from perspectives and experiences different from one’s own and to understand how one’s place in the world both informs and limits one’s knowledge.
The goal is to develop the capacity to understand the interrelationships between multiple perspectives, such as personal, social, cultural, disciplinary, environmental, local, and global.

Strategies for improvement: A plan/plans of action or an approach/approaches designed to arrive at a solution.

Worldview: Worldview is the cognitive and affective lens through which people construe their experiences and make sense of the world around them. It involves metacognition on behalf of the learner, through student self-awareness in relating one's own perspective to the perspectives of those in a position of knowledge.
