

South Carolina Registered Pesticide Products | NWS Reference Guide

New World Screwworm (NWS), *Cochliomyia hominivorax*

Clemson University | Department of Pesticide Regulation | Prepared October 2026

This reference guide identifies pesticide products registered in South Carolina that may be relevant to the control of **New World Screwworm (NWS)**, *Cochliomyia hominivorax*. Products are organized into two categories: those identified for FIFRA Section 2(ee) review and those without a Section 2(ee) indicator in DPR's source list.

Inclusion on this list does not necessarily indicate that a product is labeled or authorized for NWS control.

Before selling, recommending, or applying any listed product:

- **Verify** the product's current South Carolina registration status.
- **Review** the EPA-approved product label to confirm the intended pest, animal or treatment site, and application method are permitted.
- **Consult** any applicable FIFRA Section 2(ee) bulletin for additional use information.

Important: A Section 2(ee) designation does not independently authorize a particular use. All pesticide products must be used in accordance with applicable federal and state regulations and labeling requirements.

Products Without a Section 2(ee) Indicator in DPR's Source List

The absence of a 2(ee) mark in the source list is not a substitute for reviewing the current product label.

Product name	EPA registration no.	Active ingredient(s)
CATRON IV	11556-171	Permethrin
PROZAP SCREW WORM/EAR TICK	47000-100	Permethrin
