ADMINISTRATION

UNIVERSITY GOVERNANCE AND ADMINISTRATION

The University is governed by a board of 13 members, six selected by the state Legislature and seven self-perpetuating life members, in accord with the will of Thomas Green Clemson. The Board of Trustees is primarily responsible for adopting the long-range objectives of the University and the basic policies for achieving them; providing policy instruction for long-range planning; adopting the statutes of the University; electing the president of the University; employing the secretary of the board; maintaining ownership of University assets; and overseeing the evaluation of the University.

The president is the chief executive officer of the University, providing leadership to all phases of University planning, coordinating the operations of all units of the University, carrying out major University public relations functions, evaluating the results of University plans, and appointing personnel who report to the president. The day-to-day operations of the University are administered by the president and executive officers for advancement, public service and agriculture, student affairs, and Research and Economic Development.

The Provost and Vice President for Academic Affairs is the chief academic officer of the University. The Provost is responsible directly to the president for all academic matters and has administrative jurisdiction over teaching and computing services. Vice provosts assist in administering and performing duties in coordinating graduate and undergraduate curricula; supervising computer information services, the libraries, scholarship and award programs; and other duties assigned by the Provost.

Academic deans are the chief administrative officers of their individual colleges and report directly to the Provost. They provide leadership in formulating and carrying out educational policy, review and make recommendations on personnel matters, and carry out and administer the academic and financial affairs of their colleges.

BOARD OF TRUSTEES

Leon J. Hendrix, Jr., Kiawah Island, Chair
John J. Britton, Sumter, Vice Chair
Bill L. Amick, Batesburg-Leesville
Thomas C. Lynch, Clemson
Louis B. Lynn, Columbia
Patricia H. McBee, Greenville
Leslie G. McGraw, Greenville
E. Smyth Mickissick III, Greenville
Thomas B. McTeer, Jr., Columbia
Robert L. Peeler, Lexington
William C. Smith, Jr., Columbia
Joseph D. Swann, Greenville
David H. Wilkins, Greenville
Clayton D. Steadman, Interim Executive Secretary

TRUSTEES EMERITI

Louis P. Barston, Jr., Greenville
Fletcher C. Derrick, Jr., Charleston
W. G. DesChamps, Jr., Bishopville
Lawrence M. Gressette, Jr., Columbia
Harold D. Kingsmore, Aiken

D. Leslie Tindal, Pinewood
Allen P. Wood, Florence

PRESIDENT
James F. Barker, FAIA, MArch

VICE PRESIDENTS
Doris R. Helms, PhD, Vice President for Academic Affairs and Provost
A. Neill Cameron, Jr., MBA, Vice President for Advancement
John W. Kelly, PhD, Vice President for Public Service and Agriculture
Gail DiSabatino, EdD, Vice President for Student Affairs
Christian E. G. Prizemberg, PhD, Vice President for Research and Economic Development

CHIEF BUSINESS OFFICER
Steven E. Copeland, MPA

CHIEF FINANCIAL OFFICER
Brett A. Dalton, MA

GENERAL COUNSEL
Clayton D. Steadman, JD

CHIEF HUMAN RESOURCES OFFICER
Lawrence Nichols II, MSW

DIRECTOR OF ATHLETICS
Terry D. Phillips, PhD, JD

ACADEMIC AFFAIRS
Doris R. Helms, PhD, Vice President for Academic Affairs and Provost
Debra B. Jackson, PhD, Associate Provost for Academic Affairs and Assistant to the Provost
David W. Williams, PhD, Interim Senior Vice Provost for Academic Affairs
Janice W. Murdoch, PhD, Vice Provost and Dean of Undergraduate Studies
J. Bruce Durrant, PhD, Vice Provost and Dean of Graduate School
Jerome V. Reel, Jr., PhD, University Historian
Gary L. Wall, MLS, Dean of Libraries
James R. Bottom, MS, Vice Provost for Computing and Information Technology and Chief Information Officer
Karen Burg, PhD, Interim Provost for Research and Innovation
Patricia T. Smart, PhD, Special Assistant to the Provost for Faculty Relations

STUDENT AFFAIRS
Gail DiSabatino, EdD, Vice President for Student Affairs
Verna G. Howell, MAEd, Associate Vice President for Student Affairs (Student Engagement)
Joy S. Smith, PhD, Associate Vice President for Student Affairs and Dean of Students
Mary F. Poore, MPA, Associate Vice President for Student Affairs (Municipal and Community Affairs)
Althea L. Richardson, MBA, Assistant Vice President for Student Affairs and Executive Director of the Garnet Intercultural Center
Stephen A. Robbins, MBA, Associate Vice President for Student Affairs (Operations)
George N. Smith, PhD, Associate Vice President for Student Affairs (Campus Life)

COLLEGIATE DEANS
Alan R. Sams, PhD, Dean, College of Agriculture, Forestry, and Life Sciences
Clifton S. M. Egan, MA, Interim Dean, College of Architecture, Arts, and Humanities
Claude C. Lilly III, PhD, Dean, College of Business and Behavioral Science
Esin Gulari, PhD, Dean, College of Engineering and Science
Lawrence R. Allen, PhD, Dean, College of Health, Education, and Human Development

BOARD OF VISITORS
Louis P. Batson III, Greenville
Sterling W. Beckman, Columbia
William P. Bradley, Johns Island
William H. Burton, Spartanburg
Darryl C. Caldwell, Columbia
Chalmers R. Carr III, Ridge Spring
Jack W. Carter, Jr., Columbia
Rhonda Collins, Columbia
James R. Coute, Columbia
James P. Creele, Jr., Myrtle Beach
Walter Dantzler, Santee
William H. Davis, Jr., Snellville, GA

Marshall White, Jr., Columbia
Kim Wilkerson, Columbia
James R. Williams, Newberry
GENERAL INFORMATION

PURPOSE OF CATALOG

The purpose of this catalog is to give a general description of Clemson University and to provide prospective students with detailed information regarding the various colleges and departments within the University and curricula offered by the University. Inasmuch as the educational process necessitates change, the information and educational requirements in this catalog represent a flexible program which may be altered where such alterations are thought to be in the mutual interest of the University and its students.

The provisions of this catalog do not constitute a contract which may be accepted by students through registration and enrollment in the University. The University reserves the right to change without notice any fee, provision, offering, or requirement in this catalog and to determine whether a student has satisfactorily met its requirements for admission or graduation. The University further reserves the right to require a student to withdraw from the University for cause at any time. Each curriculum shall be governed by the requirements in effect on the date of enrollment. If a student withdraws from the University and subsequently returns or does not remain continuously enrolled (summers excluded), the requirements in effect at the time of return will normally prevail.

STUDENT RESPONSIBILITY

All colleges and departments establish certain academic requirements that must be met before a degree is granted. Advisors, department chairs, and deans are available to help the student understand and meet these requirements; but the student is responsible for fulfilling them. If, at the end of a student's course of study, the requirements for graduation have not been satisfied, the degree will not be granted. For this reason, it is important for students to acquaint themselves with all academic requirements throughout their college careers and to be responsible for completing all requirements within prescribed deadlines and time limits.

HISTORY

When one man of wisdom and foresight can look among the despair of troubled times and imagine what could be, great things can happen. That is what the University's founder, Thomas Green Clemson, was able to do in the post-Civil War days. He looked upon a South that lay in economic ruin, once remarking that "conditions are wretched in the extreme" and that "people are quitting the land." Still, among the ashes he saw hope. Joined by his wife, Anna Calhoun Clemson, Mr. Clemson envisioned what could be possible if the South's youth were given an opportunity to receive instruction in scientific agriculture and the mechanical arts. He once wrote, "The only hope we have for the advancement of agriculture (in the U.S.) is through the sciences, and yet there is not one single institution on this continent where a proper scientific education can be obtained." When he was president of the Pendleton Farmers Society in 1866, Mr. Clemson served on a committee whose purpose was to promote the idea of founding an institution for "educating the people in the sciences" and "which will in time secure permanent prosperity."

When he died on April 6, 1888, a series of events began that marked the start of a new era in higher education in the state of South Carolina, especially in the study of science, agriculture, and engineering. Mr. Clemson's passing set the stage for the founding of the university that bears his name—the beginning of a true "people's university," which opened the doors of higher education to all South Carolinians, rich and poor alike. In his will, which was signed November 6, 1886, Mr. Clemson bequeathed the Fort Hill plantation and a considerable sum from his personal assets for the establishment of an educational institution of the kind he envisioned. He left a cash endowment of approximately $80,000 as well as the 814-acre Fort Hill estate to South Carolina for such a college. The biggest obstacle in the creation of an agricultural college—the initial expense—was removed by Mr. Clemson's bequest.

On November 27, 1889, Governor Richardson signed the bill accepting Thomas Clemson's gift. Soon after, a measure was introduced to establish the Clemson Agricultural College, with its trustees becoming custodians of Morrill Act and Hatch Act funds made available for agricultural education and research by federal legislative acts. The founding of Clemson Agricultural College supplanted the South Carolina College of Agriculture and Mechanics, which had been designated in Columbia in 1880.

Thomas Green Clemson came to the foothills of South Carolina when he married Anna Maria Calhoun, daughter of South Carolina's famous statesman John C. Calhoun. Born in Philadelphia, Mr. Clemson was educated at schools both in the United States and France, where he attended lectures at the Royal School of Mines, studied with prominent scientists in the private laboratories of the Sorbonne Royal College of France, and received his diploma as an assayer from the Royal Mint in Paris. Mr. Clemson, then in his mid-20s, returned to America greatly influenced by his European studies. He became a great advocate of the natural sciences, achieving a considerable reputation as a mining engineer and a theorist in agricultural chemistry. He also was a gifted writer whose articles were published in the leading scientific journals of his day, an artist and a diplomat who represented the U.S. government as chargé d'affaires to Belgium for almost seven years.

Mr. Clemson had a lifelong interest in farming and agricultural affairs. He served as the nation's first superintendent of agricultural affairs (predecessor to the present secretary of agriculture position) and actively promoted the establishment and endowment of the Maryland Agricultural College in the 1850s. Though remembered today for these accomplishments, Thomas Clemson made his greatest historical contribution when, as a champion of formal scientific education, his life became intertwined with the destiny of educational and economic development in South Carolina. Although he never lived to see it, his dedicated efforts culminated in the founding of Clemson Agricultural College.

The enrollment of Clemson has grown from 446 students at the opening of the University to 17,385 for the first semester 2007-2008. Since the opening of the University, 102,484 students have been awarded Bachelor's degrees. During this same period, 426 Associate degrees, 28,221 Master's, 350 Education Specialist, and 3,014 Doctor's degrees have been awarded, a total of 134,495 degrees.

Today, more than a century later, the University is much more than its founder ever could have imagined. With its diverse learning and research facilities, the University provides an educational opportunity not only for the people of the State, as Mr. Clemson dreamed, but for thousands of young men and women throughout the country and the world.

THE CAMPUS

The 1,400-acre University campus is sited on the former homestead of statesman John C. Calhoun. Nestled in the foothills of the Blue Ridge Mountains and adjacent to Lake Hartwell, the campus commands an excellent view of the mountains to the north and west, some of which attain an altitude of over 5,000 feet above mean sea level.

The Norfolk and Southern Railway and U.S. Highways 76 and 123 provide easy access to the City of Clemson and to the University. Oconee County Airport is four miles from the library. Both Atlanta and Charlotte are two hours driving time away.

Clemson College formally opened in July 1893, with an enrollment of 446. From the beginning, the college was an all-male military school. It remained this way until 1955, when the change was made to "civilian" status for students and Clemson became a coeducational institution. In 1964, the college was renamed Clemson University as the state legislature formally recognized the school's expanded academic offerings and research pursuits.

On November 27, 1889, the University observed the 100th anniversary of the State's acceptance of the terms and conditions of Mr. Clemson's bequest.

The enrollment of Clemson has grown from 446 students at the opening of the University to 17,385 for the first semester 2007-2008. Since the opening of the University, 102,484 students have been awarded Bachelor's degrees. During this same period, 426 Associate degrees, 28,221 Master's, 350 Education Specialist, and 3,014 Doctor's degrees have been awarded, a total of 134,495 degrees.

Today, more than a century later, the University is much more than its founder ever could have imagined. With its diverse learning and research facilities, the University provides an educational opportunity not only for the people of the State, as Mr. Clemson dreamed, but for thousands of young men and women throughout the country and the world.

THE CAMPUS

The 1,400-acre University campus is sited on the former homestead of statesman John C. Calhoun. Nestled in the foothills of the Blue Ridge Mountains and adjacent to Lake Hartwell, the campus commands an excellent view of the mountains to the north and west, some of which attain an altitude of over 5,000 feet above mean sea level.

The Norfolk and Southern Railway and U.S. Highways 76 and 123 provide easy access to the City of Clemson and to the University. Oconee County Airport is four miles from the library. Both Atlanta and Charlotte are two hours driving time away.

Campus architecture is a pleasing blend of traditional and modern facilities enhanced by a beautiful landscape of towering trees, grassy expanses, and flowering plants. Academic, administrative, and student service buildings on campus represent an insured value of $627 million. Clemson University's real estate holdings include over 32,000 acres of forestry and agricultural lands throughout the state, the majority of which are dedicated to Clemson's research and public-service missions.
Fort Hill, the former home of John C. Calhoun inherited by Thomas Clemson, and the Hanover House are listed on the National Register of Historic Places and are open to the public. The campus also has two recognized Historic Districts.

The Strom Thurmond Institute houses the institute offices, Senator Thurmond's papers and memorabilia, and the special collections of the Cooper Library including papers of John C. Calhoun and James Byrnes, the most important South Carolinians since 1877. The Institute is a part of an instructional and public-service district that includes the Brooks Center for the Performing Arts and the Madren Center for Continuing Education. In addition, the University offers limited graduate and undergraduate coursework in Greenville, SC, and is building a graduate and research center, the International Center for Automotive Research (ICAR), also in Greenville.

**VISION STATEMENT**

Clemson University will be one of the nation’s top-20 public universities.

**MISSION STATEMENT**

The mission of Clemson University is to fulfill the covenant between its founder and the people of South Carolina to establish a “high seminary of learning” through its historical land-grant responsibilities of teaching, research, and extended public service. Clemson University will be one of the nation’s leading public universities in education and scholarship in selected areas of the creative arts, health, human development, global awareness, and scientific and technological improvement, communication, policies, and funding.

**ACREDITATION**

Clemson University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the Bachelor's, Master's, Education Specialist, and Doctor's degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097 or call 404-679-4500 for questions about the accreditation of Clemson University.

Curricula are accredited by AACSB International (Association to Advance Collegiate Schools of Business), Accreditation Board for Engineering and Technology, American Council for Construction Education, American Dietetic Association (CADE), American Society of Landscape Architects, Commission on Collegiate Nursing Education (CCNE), Council for Accreditation of Counseling and Related Education Programs (CACREP), National Architectural Accrediting Board, National Association of Schools of Art and Design, National Council for Accreditation of Teacher Education, NRPA/AALR Council on Accreditation, Planning Accreditation Board, and Society of American Foresters. Documentation of accreditation is available in the college deans’ offices.

**ADVISING POLICY**

To ensure that students receive both personal and professional assistance in navigating their curricula and University requirements toward degree completion and graduation, the Academic Council adopted the following policy: Each student is assigned to an academic advisor (either professional advisor or faculty advisor) upon admission to the University. Responsibilities of the student and the advisor are clearly delineated in the advising process. The University maintains continual and systematic assessment of the process. The University Academic Advising Committee is responsible for implementing specific guidelines and evaluating effectiveness.

Goal I—The following University mission statement on academic advising shall be widely disseminated and implemented:

Academic advising is an ongoing educational process that connects the student to the University. Academic advising supports the University’s mission of preparing the student for learning beyond the confines of the academy. Academic advisors represent and interpret University policies and procedures to the student and help the student navigate the academic and organizational paths of the institution.

Goal II—The University shall demonstrate a continuing commitment to effective academic undergraduate and graduate advising through appropriate recognition, communication, policies, and funding.

Goal III—Each college and department shall develop a plan of action for continued commitment to effective academic advising consistent with the University’s philosophy.

Goal IV—Academic advisors (faculty and professional staff) shall demonstrate effective academic advising consistent with the University, college, and departmental philosophies.

Goal V—Students shall be informed of their personal responsibilities in the advising process.

**LIBRARIES**

The Libraries’ Web site at www.lib.clemson.edu provides access to a multitude of information resources, including the library catalog, hundreds of databases, over 34,000 electronic journals, and information regarding library services.

The Libraries’ services include circulation, reference, interlibrary loan, class instruction, and tours. Cooper Library houses a computer lab (maintained by CCIT), Java City Cyber Café, Snax & Stax convenience store, and a popular reading and audiobooks collection. Equipment available includes copiers, scanners, fax machines, and wireless laptops in Cooper Library and a color laser printer, engineering plotter, and large-format copier in the Gunnin Architecture Library.

The Clemson University Libraries consist of a main library and three branches. R. M. Cooper Library, Clemson’s main library, is located at the center of campus. Most of the books and journals are located there, as well as government publications, microforms, and electronic materials. The Gunnin Architecture Library in Lee Hall contains collections that focus on architecture, city and regional planning, construction science, landscape architecture, and visual arts. Special Collections, on the lower level of the Strom Thurmond Institute, houses the rare book collection, University Archives, and many manuscript collections, including the papers of John C. Calhoun and Thomas Green Clemson. The Chemistry Reading Room in Hunter Chemistry Building contains periodical literature related to chemistry.

Total holdings for the library system include more than 1.8 million items in the form of books, periodicals, electronic resources, government publications and patents, musical recordings, DVDs and videos, audiobooks, maps, and microforms.

**COMPUTING RESOURCES**

Clemson Computing and Information Technology (CCIT) supports the computing needs of students and employees with comprehensive services including laptop support, training, printing, computer repair, software licenses, wireless access points, network and information security, course management system, and more.

CCIT also maintains numerous computer labs throughout the campus, five of which are public access. The labs contain high-end PCs running Windows XP and laser printing equipment. Students have access to the Internet, e-mail, Google Apps for Education, and Microsoft Office Suite, which includes Word, Excel, and PowerPoint applications.

CCIT provides computer training and support to faculty, staff, and students in the use of the MyCLE portal and the Web-based course management system (Blackboard), the Clemson computer network, e-portfolios, and many desktop applications. Training is offered as part of regular University courses, through short courses, through special training programs, and through e-learning courses. Distance-learning processes and technologies are also supported with the goal of enhancing the design, production, and delivery of an increasing
number and variety of University distance education courses. On-line registration and a complete list of courses are available at ccit.clemson.edu.

CCIT Customer Support Center
CCIT provides support and consulting in a comprehensive Customer Support Center (CSC) located in the University Union. The CSC serves as a central point of contact for those who need general computing assistance, laptop support, and consulting services. A satellite CCIT Help Desk is located in the Cooper Library on Level 5. This Help Desk can assist students in the use of hardware, software, and services. Students and employees may call (864) 656-3494, e-mail ITHELP@clemson.edu, or check the information and hours of desk operations at ccit.clemson.edu.

Wireless Access
The campus computer network can be accessed through wired network connections found in all on-campus residences or through the University’s extensive wireless network. This wireless access network provides coverage to most areas of Clemson’s campus. Students wishing to connect to the wireless network are encouraged to buy a wireless card with Cisco certified extensions. More information and complete coverage details, including a list of compatible wireless cards, can be found on the CCIT Web site.

Security
Clemson University requires all users to run virus protection and install the latest operating system patches on their computers. Clemson has a site license for the McAfee products, VirusScan (Windows), and Virex (Mac OS). These are located on the Software Archive at download.clemson.edu.

Laptop Program
All undergraduate students are required to have a laptop. While students may bring any laptop, that meets the minimum specifications, recommended laptops are posted at laptop.clemson.edu. Clemson University has worked with vendors to offer recommended laptops at special discounted prices. Students using the recommended laptops will receive both software and hardware support. Limited support is also offered to students who have non-recommended laptops.

As part of the CCIT Customer Support Center services, student employees are available to perform diagnostics and software assistance on laptops. Repair technicians are on hand to do warranty repairs on the recommended Clemson laptops, and many spare parts for these laptops are kept in stock. Students whose laptops must be in PC Repair for an extended period of time may check out a loaner laptop, subject to availability. Only students who have one of the recommended laptop models in repair may take advantage of the loaner service; however, many other brands of computers can also be serviced and repaired.

Additional information is available at ccit.clemson.edu or by e-mail from ITHELP@clemson.edu.

CALHOUN HONORS COLLEGE
Established in 1962, Calhoun Honors College strives to enrich the educational experience of highly motivated, academically talented students by providing opportunities for scholarship and research not always available to undergraduates.

Freshman admission to Calhoun Honors College requires the submission of an application separate from and in addition to the application for undergraduate admission to Clemson University. In addition to the student’s application, the Honors College requires a copy of the student’s high school transcript and two letters of recommendation, one from a high school guidance counselor and one from a teacher. Admission is highly selective and is based, in part, on the quality of the applicant pool and the availability of space for freshmen in the Honors College.

Currently-entered Clemson students may apply for membership if they are full-time, degree-seeking undergraduates and have earned a cumulative grade-point ratio of 3.50 or higher as full-time students at Clemson. Students must have at least four semesters remaining to complete their degree requirements.

Special opportunities include summer study programs in Brussels, Belgium, and India, and EURKA!, a summer research program for entering freshmen. Each of these programs requires a separate application.

The Calhoun Honors College is institutionally responsible for all Honors competitive fellowships and awards including Rhodes, Marshall, Truman, Goldwater, and Fulbright.

In addition to the intellectual challenge of Honors, advantages of membership include priority course scheduling, honors housing (on a space-available basis), extended library loan privileges, and special lectures and cultural events.

Additional information is available at www.clemson.edu/honors.

COOPERATIVE EDUCATION
The Cooperative Education Program is a planned program in which students combine alternate periods of academic study and periods of related work with a participating business, industry, agency or organization. Work periods normally take place during the sophomore and junior years (including summers), while the freshman and senior years are spent in full-time study.

Students may qualify to participate in the Cooperative Education Program by satisfactorily completing 30 credit hours of academic work. Transfer students may qualify in one semester. Three, four, or five co-op work periods are projected and included in each student referral. Usually two students from the same academic area are paired to fill a full-time position.

Students enrolled in the Cooperative Education Program pay a nominal registration fee each semester or summer session which coincides with their work period. That fee enables students to maintain student status and participate in student activities and services that are normally associated with enrollment at the University; however, the fee does not cover the cost of tuition for academic courses, health service, or any of the other benefits normally associated with the standard University fee. In responding to insurance, tax, loans, and other questionnaires about status, the University classifies a student on work assignment as a full-time continuing student. The work assignment is considered an integral part of the student’s education, but no academic credit is awarded for this experience.

STUDY AND WORK ABROAD PROGRAMS
Through International Affairs, students may choose from a variety of programs offered overseas for a semester, academic year, or summer. Programs are varied to fulfill the needs of most students, such as the exchange programs at ICHEC Business School in Brussels, Belgium, the University of Aberdeen in Scotland, and the University of Newcastle in Australia; the University of Stellenbosch in South Africa; and the Universidad de Alicante in Spain. There are programs for every academic major at Clemson. Programs are offered in Chile, China, Czech Republic, Ecuador, England, France, Germany, Japan, Mexico, Portugal, Russia, Scotland, and more. Both Clemson Programs Abroad and the International Student Exchange Program (ISEP) allow students to enroll and pay fees directly to Clemson while they study abroad. With the ISEP and GE3 consortia programs, students study for a semester or an academic year at one of more than 80 institutions world-wide. Transfer credit usually applies within the major with prior academic department approval. Financial aid and scholarships may also transfer for many of the programs abroad.

Internships and work abroad programs are also available. Applications are usually due in October for spring programs, in March for fall and academic year programs, and not later than April for summer programs. Interested students are encouraged to contact International Affairs, E-309 Martin Hall, at the beginning of each semester and throughout the academic year to explore opportunities abroad.

RESERVE OFFICERS TRAINING CORPS
Air Force and Army
The Departments of the Air Force and the Army maintain ROTC units at Clemson University. Their mission is to produce officers of high quality for technical and nontechnical careers in the U.S. Air Force and Army. Two-, three-, and four-year programs are available. The four-year program consists of the basic course for freshmen and sophomores and the advanced course for juniors and seniors.

Scholarships, available to selected ROTC students, pay for tuition, books, and laboratory expenses, in addition to a variable stipend ranging from $250–400 per month during the school year. Non-scholarship advanced cadets also receive a stipend. Basic course credit may be awarded to students having prior military service.
Selected advanced Air Force cadets receive flight training at government expense. Reserve or National Guard duty can be guaranteed by the U.S. Army. 

Cadets who complete the Advanced or Professional Course and satisfy commissioning requirements are appointed Second Lieutenants. Ample opportunity exists for graduate study in both services, with temporary deferments possible.

HONOR ORGANIZATIONS
Clemson University has a number of academic honorary societies which recognize outstanding scholarship by students, faculty, and staff:

- Alpha Epsilon Delta (Premedical)
- Alpha Epsilon Lambda (Graduate Students)
- Alpha Kappa Delta (Sociology)
- Alpha Lambda Delta (Freshmen)
- Alpha Pi Mu (Industrial Engineering)
- Alpha Zeta (Agriculture)
- Beta Alpha Psi (Accounting and Financial Management)
- Beta Gamma Sigma (Business)
- Blue Key (Juniors and Seniors)
- Calhoun Honors Society (Honors College)
- Chi Epsilon (Civil Engineering)
- Eta Kappa Nu (Electrical and Computer Engineering)
- Eta Sigma Gamma (Health Education)
- Gamma Epsilon Tau (Graphical Communications)
- Golden Key National Honor Society (Juniors and Seniors)
- Kappa Delta Pi (Education)
- Keramos (Ceramic and Materials Engineering)
- Mortar Board (Seniors)
- Mu Beta Psi (Music)
- Mu Kappa Tau (Marketing)
- Omicron Delta Epsilon (Economics)
- Omicron Delta Kappa (Leadership)
- Order of Omega (Seniors)
- Phi Kappa Phi
- Phi Psi (Textiles)
- Phi Sigma Pi (Honorary)
- Pi Delta Phi (French)
- Pi Sigma Alpha (Political Science)
- Pi Tau Sigma (Mechanical Engineering)
- Psi Chi (Psychology)
- Sigma Tau Delta (English)
- Tau Beta Pi (Engineering)
- Tau Sigma Delta
- Upsilon Pi Epsilon (Computer Science)
- Xi Sigma Pi (Forestry)

CLEMSON UNIVERSITY FOUNDATION
The Clemson University Foundation is a nonprofit organization that solicits, manages, and administers gifts from private sources for academic programs at Clemson University.

Chartered in 1933, the Foundation is a primary component of the advancement program at the University. There are 36 elected members of the Board of Directors. Currently, 21 of the 36 are Clemson alumni. The Board also includes six automatic directors: five alumni directors, including a graduate and an undergraduate student representative, and a honorary director.

The Foundation operates through committees that report to an Executive Committee to the full board. These include the Finance Review, Development, Investment, Nominations, and Policy and Constitution Committees. The Audit Committee is responsible directly to the Board. Fund raising is managed by the Development Committee and, if applicable, a Campaign Executive Committee. This includes solicitation of annual, major, planned, corporate, and foundation gifts in support of University priorities and coordination of college-based fund-raising initiatives. Organizations affiliated with the Clemson University Foundation include the Clemson University Continuing Education/Conference Complex Corporation, the Clemson University Real Estate Foundation, and the Wallace F. Pate Foundation for Environmental Research and Education. As of June 30, 2007, the Clemson University Foundation managed approximately 1,300 endowments. The combined CUF-CU managed investment portfolio totaled $375 million.

Clemson researchers collaborate with colleagues on studies that span the globe. These include the genetic structure and functions for plants and animals, the impact of urban sprawl on the environment, techniques to reduce bullying in schools, the active ingredients in medicinal plants, and the use of nanotechnology in food packaging to detect contamination. Their work has produced more than 100 new varieties of food and fiber crops and more than 40 patents. Each year work is conducted on more than 150 projects funded through federal, state, and private sources, including the U.S. Department of Agriculture, the U.S. Forest Service, the National Science Foundation, the South Carolina General Assembly, and corporate partners.

CAMPUS VISITS AND TOURS
One of the best ways to discover all Clemson has to offer is through a visit to the campus. The Class of 1944 Visitors Center, a gift of the Class of 1944, is adjacent to the Alumni Center and is an excellent spot for anyone visiting or returning to campus.

Alumni-sponsored awards programs such as Alumni Distinguished Service, Alumni Fellows, professorships, scholarships, and awards for outstanding teaching, research, and public service are among the prestigious awards given by the Clemson Alumni Association.

Alumni employees coordinate the Alumni Career Services program and the activities of the open-membership student organization, Student Alumni Association. From the Welcome Back Festival held each August to the Senior Picnic held each May, the Alumni Association provides a lifelong connection to Clemson.
ADMISSION

Admission information can be found at www.clemson.edu/admission.

APPLICATION FORMS AND DATES

Applicants are encouraged to apply on-line. Copies of both the preliminary application and the application for admission are available at www.clemson.edu/prospectivestudent/index.html. Paper applications can be downloaded or obtained by writing the Office of Admissions, Clemson University, 105 Sikes Hall, Box 345124, Clemson, SC 29634-5124. Freshman candidates are especially encouraged to submit preliminary applications and sit for the SAT or ACT during the spring semester of their junior year.

Candidates should understand that admission is closed when all classroom space has been committed. The majority of freshman admission decisions are communicated during the middle of February. Transfer students seeking entrance in August are usually notified between February and July. Candidates must submit a nonrefundable fee of $55 (subject to change) with the application. This fee is not applicable toward tuition and/or other University fees.

FRESHMEN

Admission to the University is competitive and is based primarily upon high school curriculum, grades, class standing, and SAT or ACT scores. An applicant’s intended major and state residency also receive consideration. To apply for admission, a candidate must submit a high school transcript through his/her counselor and have results of the SAT or ACT sent directly from the testing agency. In addition, all applicants for freshman admission should complete the following courses in high school:

  - **English**—4 credits
  - **Mathematics**—3 credits
  - **Laboratory Science**—3 credits
  - **Foreign Language**—3 credits
  - **Social Sciences**—3 credits
  - **Chemistry**—4 credits
  - **Physical Education/ROTC**—1 credit
  - **IB Higher Level Courses**
    - **English (Language A1)**
      - 4 credits
      - **Anthropology**
        - 1, 5, 6, 7
      - **Biology**
        - 4, 5, 6, 7
      - **Business and Management**
        - 4, 5, 6, 7
      - **Chemistry**
        - 4, 5, 6, 7
      - **Economics**
        - 4, 5, 6, 7
      - **Environmental Systems**
        - 4, 5, 6, 7
      - **Foreign Language**
        - 4
      - **Geography**
        - 4, 5, 6, 7
      - **History-European**
        - 4, 5, 6, 7
      - **History-Americas**
        - 4, 5
      - **Mathematics**
        - 4, 5
      - **Music**
        - 4, 5, 6, 7
      - **Philosophy**
        - 4, 5, 6, 7
      - **Psychology**
        - 4, 5, 6, 7
      - **Theatre Arts**
        - 4, 5, 6, 7
      - **Visual Arts**
        - 4, 5, 6, 7

  - **IB Higher Level Examinations**
    - **Anthropology**
      - ANTH Elective
    - **Biology**
      - BIOL 101/105, 104/106
    - **Business and Management**
      - MGT 201
    - **Chemistry**
      - CH 101
      - (for majors requiring organic chemistry)

      - PSYCH 201
    - **Theatre Arts**
      - Determined on individual basis
    - **Visual Arts**
      - ART 103

Entrance Examinations

All freshman candidates and some transfer students must submit scores from either the SAT or ACT. For August enrollment, it is recommended that students complete the SAT or ACT no later than the preceding December. Registration materials for these tests are readily available at high schools or can be obtained by contacting the College Board at 609-771-7600 or 800-SAT-SCOR or the American College Testing Service at 319-337-1313. All candidates must have their scores reported to Clemson by contacting the appropriate testing agency. The College Board’s institutional code for Clemson is 5111. The ACT code for Clemson is 3842. Photocopies of student test reports or those submitted by third parties, such as high schools and colleges, are not accepted.

International Baccalaureate (IB) Credit Policy

Clemson University endorses the International Baccalaureate (IB) Program and awards credit for IB Higher Level scores as indicated below.

¹Students who earn a score of 3 or 4 should register for ENGL 103.
²Students who earn a score of 2 on the Calculus BC examination, but have earned a score of 3 (or better) on the AB subcore of the BC examination, may receive credit for MTHSC 106.
³Students who earn a score of 4 on Computer Science may request a personal interview with a departmental representative to determine whether credit will be given for CP SC 102.
⁴Students entring in curricula requiring calculus-based physics (PHYS 122, 124, 221, 222, 223, 224), but who earn a grade of 5 on Physics B, will be asked to meet with a departmental representative for further evaluation and placement counseling.

College Board Advanced Placement Program

The College Board Advanced Placement Program (AP) gives highly motivated high school students an opportunity to begin their college careers during the last year or two of high school. AP participants take college-level courses in high school, sit for nationally administered examinations in the subjects concerned, and submit test grades to Clemson for credit. Credit is awarded to those earning grades of 3, 4, or 5 on AP exams.

Applicants should be sure to include their social security numbers when registering for AP examinations; this will save time and ensure that credit is automatically awarded to their Clemson academic records.

South Carolina Governor’s School for Science and Mathematics

Clemson awards college credit for selected biology, chemistry, and mathematics courses taken at the South Carolina Governor’s School for Science and Mathematics. Credit is awarded to students enrolled at Clemson University who earn A or B in the SCGSSM course(s).

Placement Tests

Mathematics Placement—Freshmen mathematics placement is determined by the applicant’s score on the Clemson Mathematics Placement Test (CMPT). The CMPT is required for all freshmen and transfer students. Failure to complete the CMPT satisfactorily will result in placement in preparatory work that, in most cases, will not apply toward the general education mathematics requirement. Placement will be adjusted as needed after AP and IB scores have been received by Clemson.

Foreign Language Placement—The Department of Languages offers placement tests that students are required to take during summer orientation. Any student who has had at least one year of a foreign language and who decides to continue with the same language at Clemson, must take one of these tests. Applicants desiring advanced placement in a foreign language may take the College Board’s SAT Subject Test, Advanced Placement (AP) Examinations, or the International Baccalaureate (IB) Higher Level Examination. SAT Subject Test scores of 450 or higher enable students to exempt one or more language courses. These students will receive credit following the successful completion (grade of C or better) of a qualifying course at Clemson.

GED

Candidates submitting General Educational Development (GED) credentials in lieu of a high school diploma must be 19 years of age or older. Official GED score results must be received directly from the General Educational Development Testing Service along with an official copy of the high school transcript and SAT or ACT scores. Applicants presenting the GED will be reviewed by the Undergraduate Admissions Committee.
Applies
Any freshman or transfer candidate who is denied admission may appeal for reconsideration provided the student (1) presents new information, such as improved grades and/or class rank, improved SAT or ACT scores; and (2) submits a letter outlining the rationale for the appeal. All appeals will be reviewed by the Office of Admissions. In some instances, appeals will be referred to the Undergraduate Admissions Committee.

Freshman students who are accepted to and enrolled in Clemson University in a conditional admissions program through the appeals process must meet the conditions of their admission or be subject to disenrollment.

Admissions Exceptions
If it is not possible to make a positive decision on the basis of previous academic performance and SAT or ACT scores, other factors, such as special talents or high school profile, may be considered. Where appropriate, the Office of Admissions will refer such cases to the Undergraduate Admissions Committee. Student athletes who do not meet regular admissions standards may be admitted if they meet Atlantic Coast Conference (ACC) and National Collegiate Athletic Association (NCAA) eligibility requirements.

TRANSFER STUDENTS
All transfer applicants must have original transcripts of their records sent to Clemson directly from each college or university attended. Unless so stated on the transcript, the candidate should present statements of honorable dismissal and of eligibility on the transcript, the candidate should present each college or university attended. Unless so stated when all classroom space has been committed. All classroom space has been committed.

In Clemson University in a conditional admissions
statement for the spring semester and July 1 for consideration for the fall semester. In most cases, admission decisions will be made once the year of college study is completed. Summer school applicants should have all credentials sent at least two weeks prior to the beginning of the term. Admission is closed when all classroom space has been committed.

Information regarding transfer from a South Carolina technical college is contained in the brochure S.C. Technical College Transfer Guide, available through the Office of Admissions at the address below. Prospective transfer students are also encouraged to refer to the University’s Web site at www.clemson.edu or the South Carolina Commission on Higher Education’s Web site at www.sche40.state.sc.us.

Students who are unsure to which South Carolina college or university they would like to transfer after their initial coursework at a South Carolina technical college may follow the transfer block system. These transfer blocks are posted at www.clemson.edu/prospectuLstudents/transferblock.html. Depending on the student’s chosen major, some courses may not be applicable toward graduation requirements. Contact the Office of Admissions for information.

College Board College-Level Examination Program (CLEP)
This program has very limited recognition at Clemson. A few departments accept credit for CLEP subject-matter examinations; however, CLEP General Examinations are not recognized. Credit is awarded for introductory-level courses according to criteria established by the following departments: Chemistry, English (composition only), and Mathematical Sciences. Numerical scores plus essays, required when offered as part of a CLEP examination, will be evaluated by the appropriate department. CLEP is designed primarily for adults with nontraditional learning experiences.

ADMISSION DEPOSIT
With the exception of certain University scholarship recipients, all accepted freshman and transfer candidates for fall semester are required to submit a nonrefundable $100 admission deposit. This deposit is applicable toward tuition and other University fees and may be paid by credit card.

HOUSING
All 2008-2009 entering freshmen are guaranteed on-campus housing. The University housing policy requires all freshmen to live in University housing, unless they live with a parent or other close adult relative. New transfer students are offered University housing as space permits.

ORIENTATION PROGRAMS
The University offers a series of orientation programs during the summer for freshmen and transfer students and their parents. All accepted students are expected to attend one of the sessions. During orientation, students will have an opportunity to discuss their educational objectives with an advisor, to register for the fall semester, and to learn about student life and other co-curricular activities. Transfer students will have their transcripts evaluated and select appropriate courses for their first semester at Clemson. The freshman student program fee is $100 per student, and the transfer student program fee is $85 per student, subject to change.

</tr>
</tbody>
</table>

International students are expected to attend the session held on August 17 after attending the mandatory orientation for all international students on August 15, which is conducted by International Student Programs in the Gantt Interultural Center.
INTERNATIONAL UNDERGRADUATES
Admissions services for undergraduate international students are provided by the Office of Admissions. International students who come from abroad or transfer from another school must meet academic, language, and financial qualifications as determined by Clemson University. The SAT or ACT is required of all international applicants (freshman or transfer). The Test of English as a Foreign Language (TOEFL) is required of applicants from countries where English is not the native language. Financial qualifications are determined by the submission of a financial certification form and bank statements verifying adequate funding. Student visa services are provided by Campus Immigration Services.

SPECIAL STUDENT STATUS
The special student classification is designed for high school graduates, 19 years of age or older, who wish to take a limited number of courses for personal or professional development. This program is not appropriate for individuals who are interested in earning an undergraduate degree. In addition, it is not a “trial admission” status or one for candidates who apply too late to submit credentials for consideration for regular admission. Applicants denied regular admission to Clemson are not eligible to apply as special students.

None of the usual credentials supporting an application are required of special student applicants. A cumulative maximum of 18 undergraduate credit hours may be taken. Contact the Office of Admissions, 105 Sikes Hall, Clemson, SC 29634-5124.

READMISSION OF FORMER UNDERGRADUATES
Undergraduate students who have previously attended Clemson and wish to return must secure an application for re-entrance from the Registrar’s Office. Students are re-admitted into the major they were in when they last attended Clemson. Changes-of-major forms are available in the Enrolled Student Services Office. Former students must meet the catalog curriculum requirements for graduation in effect at the time of their return. Students are required to satisfy the University’s general education requirements in addition to curricular requirements. Any variations in curricular requirements will be considered under the substitution procedures. If all work toward a degree is not completed within six years after entrance, the student may be required to take additional courses. Other information can be obtained from the Registrar’s Office.

POSTBACCALAUREATE STUDENTS
Applicants may be accepted by the Graduate School as postbaccalaureate if they apply to a graduate degree program but do not have the appropriate academic background. Applicants must be recommended by the appropriate department or program chair and should meet all other requirements for admission to the degree program with respect to grade-point ratio and standardized test scores. Postbaccalaureate applicants who are denied admission because of failure to meet the minimum requirements have access to the same appeal procedure as other applicants applying for admission.

Applicants will be classified as postbaccalaureate if they are not qualified to take at least one graduate course per semester which can be included in the minimum hours required for the graduate degree. Additionally, students required to complete eighteen or more semester hours of undergraduate credits prior to enrolling in graduate credits will be classified as postbaccalaureate. The postbaccalaureate status will remain in effect until the number of required undergraduate credit hours is less than or equal to eighteen and the student is qualified to take, each semester, a graduate course which can be included in the minimum hours required for the graduate degree. Departments or students may request postbaccalaureate status even though the above criteria are satisfied.

Once postbaccalaureate students become eligible for classification as graduate students, the decision as to eventual admission status (full or provisional) will be made based on criteria utilized by the department and Graduate School for all other applicants to the degree program. Postbaccalaureate students are expected to maintain a B average and receive no graduate degree until they qualify for admission to a graduate program.

Postbaccalaureate students may enroll in the same number or credits per semester as undergraduate students but may not enroll in graduate courses or receive graduate assistantships. No degree or certificate shall be awarded to students in a postbaccalaureate status, and such students who subsequently wish to obtain an additional baccalaureate degree must apply through the Office of Admissions. The applicability of credits earned toward the undergraduate degree will be determined by the policy pertaining to transfer students. Tuition and fees for postbaccalaureate students shall be those applicable to undergraduate students and are subject to out-of-state fees, if applicable.

Students possessing undergraduate degrees or graduate degrees who wish to enroll in undergraduate courses for reasons other than future admission to graduate study shall not be classified as postbaccalaureate and shall be governed by policies established by the Office of Admissions.
FINANCIAL INFORMATION

The annual State Appropriation Act imposes the general requirement that student fees be fixed by the University Board of Trustees. The Act imposes two specific requirements on the Board: (1) In fixing fees applicable to academic and general maintenance and operation costs, the Board must maintain a minimum student fee not less than the fee charged the previous year. (2) In fixing fees applicable to residence hall rental, dining halls, laundry, infirmary, and all other personal subsistence expenses, the Board must charge students an amount sufficient to cover fully the cost of providing such facilities and services.

The tuition and fees for all students—full or part time and auditing—are available at www.clemson.edu/receivables/fees.htm. Satisfactory settlement of all expenses is a requirement for completing each semester’s class registration, and no student is officially enrolled until all past due accounts have been satisfied. Financial aid cannot be used to satisfy balances forward from a prior academic year.

In special cases, the University will accept, at the beginning of a semester, a noninterest-bearing promissory note for a portion of the semester housing and semester meal plan fee. Amounts up to $1500 may be included in the note. In such cases, a note for the fall semester charges will be due October 1, and for the spring semester, March 1. Failure to pay the note when due will result in the assessment of late fees, including collection costs and denial of future deferred payment note privileges.

Currently enrolled students who expect to continue enrollment may make housing reservations by pre-registering on-line during the spring semester at a time designated by the Housing Office.

New students who are offered on-campus housing accommodations must pay a nonrefundable $50 housing application fee and a $100 admission deposit. The admissions deposit is deducted from the amount otherwise due for the first semester deposit. (Note: Policies regarding priority to offering of on-campus housing are subject to change.)

TUITION AND FEES

Detailed tuition and fee information is available at www.clemson.edu/receivables/fees.htm. Note: A late payment fee will be assessed if fees are not satisfied by published deadlines.

Full-Time Fees

Students must be enrolled in 12 semester hours to pay full-time fees. Students enrolled in less than 12 hours or who drop below 12 hours may become ineligible for some student services, financial aid, or other programs.

Part-Time Fees

Students taking less than 12 semester credit hours will be charged according to the schedule at www.clemson.edu/receivables/fees.htm. These fees do not provide for admission to athletic events, concert series, and other such activities.

Notice to Customers Making Payment by Check

If a check is mailed for payment, it may be converted into an electronic funds transfer (EFT). This means a copy of the check will be made and the account information will be used to debit the bank account electronically for the amount of the check. The debit from the bank account will usually occur within 24 hours and will be shown on the drawer’s bank account statement. The original check will not be returned to the drawer. It will be destroyed, but University Revenue and Receivables will retain a copy of it. If the EFT cannot be processed for technical reasons, the drawer authorizes the University to process the copy in place of the original check. If the EFT cannot be completed due to insufficient funds, the University may try twice more to make the transfer. A returned item fee of $25 will be charged and collected by EFT.

Returned Checks, EFTs, and Credit Card Payments

A check, EFT, or credit card given in payment of University expenses that is returned unpaid by the bank creates an indebtedness to the University. University Revenue and Receivables administrators will charge a minimum student fee not less than the fee charged the previous year, and deduct from the student’s account the amount of the check plus the $25 returned item fee.

In addition, students with returned items for payment of academic fees are also subject to a late payment fee of $25 per calendar day, not to exceed $350, beginning on the last day of late registration. If the item is returned to the University in a timely manner, with no response from the student or drawer, a written request to disenroll the student will be made to the Registrar. If the request is approved, the percentage of refund will be applied to the debt. If the item is returned after the mid-point of the semester with no response, a decision will be made by the Director of University Revenue and Receivables and the Registrar as to the extent of disenrollment. The University may restrict subsequent payment for academic and other fees by accepting only cash, certified checks, or money orders.

Any individual who uses a two-party check for payment of University expenses will be held responsible for that check if it is returned unpaid by the bank. Items used as payment for various University services such as meal plans, housing, etc., that are later returned unpaid by the bank, give the University the right to cancel such services and cause forfeiture of any refund.

Any returned items not collected by the above procedures may be turned over to a collections agency and the indebtedness reported to a credit bureau. All collection costs will be added to the debt. Transcripts and diplomas will be withheld pending payment, and the debt may be deducted from state income tax refunds.

Abuse of check payment privileges may result in the restriction of such privileges for an indefinite period of time based on the frequency and/or dollar amount, as determined by University Revenue and Receivables.

Past Due Accounts

Any indebtedness to the University which becomes past due immediately jeopardizes the student’s enrollment, and no such student will be permitted to re-enroll for an ensuing semester or summer term. Billing fees and/or collection costs may be added to the indebtedness. Further, any student who fails to pay all indebtedness, including collection costs, to the University may not be issued a transcript or diploma. Unresolved debts may be turned over to a collections agency, reported to a credit bureau, and deducted from state income tax refunds. Debts include, but are not limited to, parking violations, library fines, rent, and academic fees.

Refund of Academic Fees

(Tuition, University Fee, and Medical Fee) for Students Withdrawing, Dropping to Part Time, or Part-Time Students Dropping Credit Hours

No refunds will be made on a student’s tuition and fees after four weeks from the last day to register.

In the case of a withdrawal from the University, refunds will be based on the effective date of the withdrawal. In the case of a withdrawal from a course, refunds will be based on the date the student drops the course using the on-line registration system. To be eligible for a refund, the student’s request must be received by University Revenue and Receivables prior to the beginning of the next fall/spring semester or subsequent summer term. Beginning with the day following the last day to register, refunds for periods of four weeks or less during fall/spring semester shall be made on the following basis.

Students receiving Title IV Financial Aid follow a different policy. Contact University Revenue and Receivables, G-08 Sikes Hall, for details.

Refund of Dining Hall Fees
See the section on Dining Services on page 20.

Cancellation of Housing Contract
Cancellation of the Contract Prior to the Start of the Academic Year for All New Students
(a) July 31, 2008—If cancellation request is received by the Housing Office on or before this date, the contract is cancelled without charge.
(b) After July 31, 2008—The contract is binding and students are obligated to pay rent for the entire academic year, unless they fail to enroll.

Cancellation of the Contract Prior to the Start of the Academic Year for All Continuing Students and Former Students Returning
(a) April 15, 2008—If cancellation request is received by the Housing Office on or before this date, the contract is cancelled without charge.
(b) April 16–May 15, 2008—If cancellation request is received by the Housing Office on or between these dates, the contract is cancelled, and a $150 contract cancellation charge is placed on the student's University account.
(c) May 16–June 15, 2008—If cancellation request is received by the Housing Office on or between these dates, the contract is cancelled, and a $300 contract cancellation charge is placed on the student's University account.
(d) June 16–July 31, 2008—If cancellation request is received by the Housing Office on or between these dates, the contract is cancelled, and a $150 contract cancellation charge is placed on the student's University account.
(e) July 31, 2008—After this date, the contract is binding, and the student is obligated to pay the entire academic year's rent unless he/she fails to enroll.
(f) Students who sign contracts after July 31, 2008, are obligated to pay the entire academic year's rent unless they fail to enroll.
(g) In all cases where the student fails to enroll, a $150 contract cancellation charge is placed on the student's University account. If a student's plans change and he/she re-enrolls after canceling, the full rental charge will be added back to the student's account. The $150 cancellation charge is waived only in cases where the University denies readmission.

Cancellation of the Contract after the Start of Each Semester of the Academic Year
(a) The contract may be terminated after the start of each semester for the following reasons: withdrawal from school, marriage (no more than four weeks prior to the wedding date), or circumstances determined by the University to be sufficiently extenuating as to warrant cancellation. (Documentary evidence will be required.)
(b) Any student qualifying for cancellation under paragraph (a) above will have his/her bill adjusted to show a prorated housing charge based on the number of days of the semester that housing is held in reservation for the student or $150, whichever is greater.
(c) In cases where neither (a) nor (b) above applies, the student may “buy out” his/her contract by paying a prorated housing charge based on the number of days of the semester that housing is held in reservation for the student plus one-half (50%) of all time remaining in the total contract period. (This option is not available to freshmen.)

Cancellation of the Contract at the End of the First Semester
(a) The contract may be terminated at the end of the first semester without penalty for the following reasons: graduation, withdrawal from school, ineligibility to continue enrollment due to a failure to meet academic requirements, completion of graduate requirements, failure to enroll a second semester, or participation during the second semester in anything required by the University that takes the student away from the main campus.
(b) The contract may be cancelled at the end of the first semester with a $150 contract cancellation charge for the following reasons: marriage or circumstances determined by the University to be sufficiently extenuating as to warrant cancellation. (Documentary evidence will be required.)
(c) In cases where neither (a) nor (b) above applies, the contract may also be cancelled at the end of the first semester by paying a “buyout” charge equal to 50% of the first semester's rental fee. (This option is not available to freshmen.)

Proper Notice of Cancellation Request
Students wishing to request cancellation of this contract must do so by:
(a) logging into University Housing's contract cancellation system at www.housing.clemson.edu and completing the cancellation process or
(b) submitting signed, written correspondence to the Housing Office.

Refunds of Financial Aid for Students Withdrawing from the University
Refunds of academic fees are made in accordance with semester and summer session refund policies. First semester freshmen and first semester transfers receiving Title IV financial aid are under a different policy based on federal guidelines. Details are available on the Housing Office.

In addition to the amount of federal aid that Clemson must return, students who received financial aid for other educational costs, including off-campus living expenses, may be required to repay a portion of those funds to the federal programs. Failure to return aid owed to the federal aid programs may result in loss of eligibility for federal aid assistance.

Federal aid funds to be returned are distributed to the programs in the following order:
• Unsubsidized Federal Stafford Loan
• Subsidized Federal Stafford Loan
• Federal Perkins Loan
• Federal PLUS Loan
• Federal Pell Grant
• Federal SEOG
• Other Title IV Programs
• Non-Title IV Programs

After the refund has been applied to the Title IV and non-Title IV programs, any refund balance will be refunded to the student.

Refunds were incurred before withdrawing, such as books, checks, unpaid traffic ticket fines, etc., the refund will cover these obligations first. Academic fees, housing, and meal plan refunds for students withdrawing will be paid to the student.

RESIDENT TUITION AND FEES

Application for Resident Status
Any undergraduate student or prospective student whose status concerning entitlement to payment of in-state tuition and fees is uncertain has the responsibility of securing a ruling from the University by providing all relevant information on special application forms. These forms can be obtained from the Student Financial Aid Office, G-01 Sikes Hall, and are to be completed and returned to that office prior to the first day of class for any semester or summer term for which the student is attempting to qualify for payment of the in-state tuition and fee rate.

Entitlement
Eligibility for payment of in-state tuition and fees shall be determined under the provisions of Sections 59-112-10 through 59-112-100, South Carolina Code of Laws, 1976, as amended. This law is set forth in its entirety as follows (subject to further amendment by the General Assembly).

Statutes
59-112-10—Definitions. As used in this chapter:
A. The words “State Institution” shall mean those post-secondary educational institutions under the jurisdiction of the following: (1) Board of Trustees, Clemson University; (2) Board of Trustees, Medical University of South Carolina; (3) Board of Trustees, South Carolina State College; (4) State College Board of Trustees; (5) Board of Visitors, The Citadel; (6) Board of Trustees, University of South Carolina; (7) Board of Trustees, Winthrop University; and (8) State Board of Technical and Comprehensive Education.
B. The word “student” shall mean any person enrolled for studies in any state institution.
C. The word “residence” or “reside” shall mean continuous and permanent physical presence within this State, provided, that temporary absences for short periods of time shall not affect the establishment of a residence.

D. The word “domicile” shall mean a person’s true, fixed, principal residence and place of habitation; it shall indicate the place where such person intends to remain, and to which such person expects to return upon leaving without establishing a new domicile in another state. For purposes of this section one may have only one legal domicile; one is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for students at State institutions shall be presumed not to be a place of principal residence, as residency in such housing is by nature temporary.

E. The words “in-state rates” shall mean charges for tuition and fees established by State Institutions for persons who are domiciled in South Carolina in accordance with this act; the words “out-of-state rates” shall mean charges for tuition and fees established by State Institutions for persons who are not domiciled in South Carolina in accordance with this act.

F. The words “independent person” shall mean a person in his majority, or an emancipated minor, whose predominant source of income is his own earnings or income from employment, investments, or payments from trusts, grants, scholarships, loans, or payments of alimony or separate maintenance made pursuant to court order.

G. The words “dependent” or “dependent person” mean: (1) one whose financial support is provided not through his own earnings or entitlements, but whose predominant source of income or support is payments from a parent, spouse, or guardian, and who qualifies as a dependent or an exemption on the federal tax return of the parent, spouse, or guardian; or (2) one for whom payments are made, under court order, for child support and the cost of his college education by an independent person meeting the provisions of Section 59-112-20 A or B. However, the words “dependent” or “dependent person” do not include a spouse or former spouse who is the recipient of alimony or separate maintenance payments made pursuant to court order.

H. The word “minor” shall mean a person who has not attained the age of eighteen years; and the words “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

I. The word “parent” shall mean a person’s natural or adoptive father or mother; or if one parent has custody of the child, the parent having custody; or if there is a guardian or other legal custodian of such person, then such guardian or legal custodian; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

J. The word “spouse” shall mean the husband or wife of a married person.

59-112-20—South Carolina Domicile Defined for Purposes of Rates of Tuition and Fees. South Carolina domicile for tuition and fee purposes shall be established as follows in determinations of rates of tuition and fees to be paid by students entering or enrolling in State Institutions:

A. Independent persons who reside in and have been domiciled in South Carolina for a period of not less than one year, and who have domiciliary status for tuition and fee purposes shall be considered eligible for in-state rates.

B. Independent persons who reside in and have been domiciled in South Carolina for a period of not less than one year, and who have domiciliary status for tuition and fee purposes shall be considered eligible for in-state rates.

C. Where an independent person meeting the provisions of Section 59-112-20 A above, is a resident of the out-of-state rate for one semester; and until the beginning of the next academic session in which the loss occurs; however, application of this subsection shall be at the discretion of the institution involved.

C. Notwithstanding the other provisions of this section, any dependent person who has been domiciled with his family in South Carolina for a period of at least twelve months immediately preceding his birth, and who has been domiciled in South Carolina for a period of not less than one year, and who has domiciliary status for tuition and fee purposes shall be considered eligible for in-state rates.

D. Where an independent person who has been domiciled in South Carolina for a period of not less than one year, and who has domiciliary status for tuition and fee purposes shall be considered eligible for in-state rates.

E. Where an independent person who has been domiciled in South Carolina for a period of not less than one year, and who has domiciliary status for tuition and fee purposes shall be considered eligible for in-state rates.

F. Where an independent person who has been domiciled in South Carolina for a period of not less than one year, and who has domiciliary status for tuition and fee purposes shall be considered eligible for in-state rates.

G. The word “spouse” shall mean the husband or wife of a married person.

59-112-50—Military Personnel and Their Dependents. Notwithstanding other provisions of this act, during the period of their assignment to duty in South Carolina members of the armed services of the United States stationed in South Carolina and their dependents may be considered eligible for in-state rates. When such armed service personnel are ordered away from the State, their dependents may continue for an additional twelve months to have this eligibility at the State Institutions where they are enrolled at the time such assignment ends. Such persons and their dependents may be considered eligible for in-state rates for a period of twelve months after their discharge from the armed services even though they were not enrolled at a State Institution at the time of their discharge, if they have evinced an intent to establish domicile in South Carolina if they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge.

59-112-60—Faculty, Administrative Employees and Dependents Thereof. Full-time faculty and administrative employees of State Institutions, and their spouses and children of such persons, shall be exempted from the provision of this act.

59-112-70—Abatement of Rates for Non-Residents on Scholarship. Notwithstanding other provisions of this act, the governing boards listed in Section 59-112-10 A above, are authorized to adopt policies for the abatement of any part or all of the out-of-state rates for students who are recipients of scholarship aid.

59-112-80—Administration of Chapter; Burden of Proving Eligibility of Students. Each State Institution shall designate an official to administer the provisions of this act. Students making application to pay tuition and fees at in-state rates shall have the burden of proving to the satisfaction of the aforesaid officials of State Institutions that they have fulfilled the requirements of this act before they shall be permitted to pay tuition and fees at such rate.

59-112-90—Penalties for Willful Misrepresentation. Where it appears to the satisfaction of officials charged with administration of these provisions that a person has assumed domiciliary status improperly by making or presenting willful misrepresentations of fact, such persons should be charged tuition and fees past due and unpaid at the out-of-state rate, plus interest at a rate of eight percent per annum, plus a penalty amounting to twenty-five percent of the out-of-state rate for one semester; and until these charges have been paid no such student shall be allowed to receive transcripts or graduate from any State Institution.

59-112-100—Regulations. The Commission on Higher Education may prescribe uniform regulations for application of the provisions of this act and may provide for annual review of such regulations.

ARTICLE V
Determination of Rates of Tuition and Fees
(Statutory Authority: 1976 Code Sections 59-112-10 to 59-112-100)

62-600—Rates of Tuition and Fees. A. Resident classification is an essential part of fee determination, admission regulations, scholarship eligibility, and other revelant policies of the
state. It is important that such institutions have fair and equitable regulations which can be administered consistently and are sensitive to the interests of both students and the State. The Commission on Higher Education hereby establishes regulations for the Statute Governing Residence and Tuition for Fee Purposes to be applied consistently by all South Carolina institutions of higher education. These regulations do not address residency matters relating to in-county categories used within the State's technical colleges.

B. Institutions of higher education are required by the Statute to determine the residence classification of applicants. The initial determination of one's resident status is made at the time of admission. The determination made at that time, and any determination made thereafter prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the student to show evidence as deemed necessary to establish and maintain their residency status.

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112 of the 1976 South Carolina Code of Laws, as amended.

62-602—Definitions. [SC ADC 62-602]
A. “Academic Session” is defined as a term or semester of enrollment. (62-607.B)
B. “Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions. (62-607.A)
C. “Dependent Person” is defined as one whose predominant source of income or support is from payments to a parent, spouse, or guardian and who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and is not the appropriate adult person upon whom the student is dependent who claims the dependent person as a dependent for federal income tax purposes. Thus, the resident status of the dependent person may affect the establishment of permanent residence. Excluded are any legal obligation to support or maintain such minor and are no longer under physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained. (62-602.A) (62-602.B) (62-609.A)
D. “Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes. Thus, the residence and domicile of a minor shall be considered readmissions. (62-609.A.4)
E. “Family’s Domicile in this State is Terminated” is defined as an employer-directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of his own (e.g., plant closure, downsizing, etc.) who accepts employment in another state prior to relocating. (62-607.A)
F. “Full-time employment” is defined as employment that consists of at least 37½ hours a week on a single job in a full-time status. However, a person who works less than 37½ hours a week but receives or is entitled to receive full-time employee benefits shall be considered to be employed full-time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must satisfy their prescribed employment specifications in order to qualify as having full-time employment. (62-605.C.1) (62-609.A.2) (62-609.A.3)
G. “Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child or one qualified to claim a dependent person based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect. (62-602.C) (62-602.I) (62-602.J) (62-607.B) (62-607.C)
H. “Immediate Prior Residence” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year. (62-607.A)
I. “Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested. (62-602.N) (62-603.A) (62-603.B) (62-607.B) (62-608.B)
J. “Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody, and earnings of such minor and are no longer under any legal obligation to support or maintain such minor. (62-602.G)
K. “Nonresident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their nonresident status “nonresident aliens” generally do not have the capacity to establish domicile in South Carolina. (62-602.M) (62-604.A)
M. “Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained. (62-602.A) (62-602.B) (62-609.A)

62-603—Citizens and Permanent Residents. [SC ADC 62-603]
A. Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date that classes begin for the semester for which resident status is claimed may qualify to pay in-state tuition and fees. The twelve-month residency period starts when the independent person establishes the intent to become a South Carolina resident per section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” Absences from the State during the twelve-month period may affect the establishment of permanent residence for tuition and fee purposes.

B. The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person’s support and claims or qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

C. In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for...
tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

62-604—Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents. [SC ADC 62-604]

A. Except as otherwise specified in this section or as provided in section 62-609 (1) and (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out-of-state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in-state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non-resident aliens present in the United States in specified visa classification are eligible to receive in-state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

B. Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

62-605—Establishing the Requisite Intent to Become a South Carolina Domiciliary. [SC ADC 62-605]

A. Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole purpose of enrollment in an institution or for access to state-supported programs designed to serve South Carolina residents.

B. If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

C. For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full-time employment;
2. Possession of a valid South Carolina vehicle registration card;
3. Designating South Carolina as state of legal residence on military record;
4. Possession of a valid South Carolina driver's license or, if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility.

5. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility.
6. Maintenance of domicile in South Carolina;
7. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
8. Ownership of principal residence in South Carolina; and
9. Licensing for professional practice (if applicable) in South Carolina.

D. The absence of indicia in other states or countries is required before the student is eligible to pay in-state rates.

62-606—Maintaining Residence. [SC ADC 62-606]

A. A person's temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person's absence from the State. The burden is on the person to show retention of South Carolina residence during the person's absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records; and
2. Retaining South Carolina voter status;
3. Maintaining South Carolina driver's license;
4. Maintaining South Carolina vehicle registration;
5. Satisfying South Carolina resident income tax obligations. Individuals claiming permanent residence in South Carolina are able for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

B. Active duty members of the United States Armed Forces and their dependents are eligible to pay in-state tuition and fees as long as they continuously claim South Carolina as their state of legal residence during their military service. Documentation will be required in all cases to support this claim. South Carolina residents who change their state of legal residence while in the military lose their South Carolina resident status for tuition and fee purposes.

62-607—Effect of Change of Residency. [SC ADC 62-607]

A. Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in-state rate. A student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in-state rates in subsequent semesters.

62-608—Effect of Marriage. [SC ADC 62-608]

A. In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

B. If a non-resident marries a South Carolina resident, the non-resident does not automatically acquire South Carolina resident status. The non-resident may acquire South Carolina resident status if the South Carolina resident is an independent person and the non-resident is a dependent of the South Carolina resident.

C. Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

D. No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

62-609—Exceptions. [SC ADC 62-609]

A. Persons in the following categories qualify to pay in-state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in-state tuition and fees is requested.

1. “Military Personnel and their Dependents”: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in-state tuition and fees. When personnel are transferred from the State, their dependents may continue to pay in-state tuition and fees for an additional twelve months. Such persons (and their dependents) may also be eligible to pay in-state tuition and fees for a period of twelve months after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in-state tuition and fees.

2. “Faculty and Administrative Employees with Full-Time Employment and their Dependents”: Full-time faculty and administrative employees of South Carolina state-supported colleges and universities and their dependents are eligible to pay in-state tuition and fees.
(3) “Residents with Full-Time Employment and their Dependents:” Persons who reside, are domiciled, and are full-time employed in the State and who continue to work full-time until they meet the twelve-month requirement and their dependents are eligible to pay in-state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary”.

(4) “Retired Persons and their Dependents:” Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in-state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in-state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

B. Each institution will develop an appeals process to accommodate persons wishing to appeal residency determinations made by the institution’s residency official. Neither the primary residency official nor appellate official(s) may waive the provisions of the Statute or regulation governing residency for tuition and fee purposes.

Appeals should be sent to the Student Financial Aid Office, G-01 Sikes Hall.

DINING SERVICES
The University provides a variety of meal plans to meet student needs. The meal plan dining halls, Harcombe, Schilletter, and Clemson House are located in different areas of the campus and feature an unlimited seconds policy. Meals may also be purchased on a cash basis or by using a debit/credit card, Tiger Stripe, or Paw Point account. Meal plans become effective when University housing is opened for occupancy at the beginning of each semester and expire after the meal period of the day of graduation at the end of each semester. Meal plans are not effective during official University breaks.

The Eastside Food Court, Einstein Brothers Bagels, the Canteen, Java City Cyber Cafe, and Fernow Street Cafe provide a wide assortment of dining selections on an à la carte basis. Nationally branded food concepts are available in cash dining facilities on campus: Burger King and Li’l Dino and Salad Express. The Eastside Food Court, 99 Cents, A and Starbucks at the Union Canteen and Java House Express in the Fernow Street Cafe. All retail dining facilities and dining halls accept Visa, Mastercard, debit cards, and Tiger I and Paw Point cards.

All first-year freshmen who live in University housing, excluding apartments with kitchens, are required to subscribe to one of the following meal plans for the first two semesters: Any Ten, Plus Any Ten, Any 15, Plus Any 15, Seven Day (Unlimited Access), or Plus Unlimited Access. All other students may choose a meal plan on a semester basis or pay for individual meals. First-year freshmen living in University housing (excluding the aforementioned housing) may terminate their meal plan for one of the following reasons:

- withdrawal from the University
- change in housing assignment to an apartment with kitchen facilities
- medical condition with dietary requirements that cannot be met by Dining Services. Documentation from a medical doctor must be provided along with specific dietary requirements. This documentation will be reviewed by the Dining Services Food Service Administrator.
- other circumstances determined by the University to be beyond the student’s control

Freshmen students must provide the necessary documentation for any of the above reasons before cancellation of their meal plan will be considered. Upperclassmen may terminate their meal plans for any reason. Failure to participate in a meal plan does not automatically release a student from the freshman requirement to subscribe to a meal plan.

Students may change meal plans at the Tiger 1 Card Office, in 304 Fike Recreation Center, on Mondays only. Students may change meal plans at the billing of spring and fall semester fees with no service charge or after the first two weeks and prior to the last six weeks of the semester by paying a $35 service charge. All adjustments will be prorated, except for students withdrawing from the University. Students may upgrade meal plans during the registration period.

Meal plans cancelled for any reason after service of the first meal will result in a refund of advance payment, minus a $55 termination charge, and a weekly charge for meals available. The meals available charge applies to the meals that have been served, not those that have been eaten by the individual student. The Paw Points which are associated with the Plus plans are not refundable; however, they do carry forward to the next semester. No changes, meal plan cancellations, or refunds will be made during the last six weeks of a semester. Requests for refunds may be made at the Tiger 1 Card Office.

Upperclassmen will be responsible for all service charges related to changes or termination of a meal plan.

Note: Meal plans may not be shared with other students. Only the meal plan purchaser may utilize their meal plan.

TIGER STRIPE ACCOUNT
The Tiger Stripe account is equivalent to a prepaid debit card. Under the Tiger Stripe account program, funds are deposited into the account along with payment of fees. As items are purchased from over 200 locations that accept Tiger Stripe, the amount spent is deducted from the Tiger Stripe account balance. All students are eligible. Additional funds may be added to the account via the Tiger 1 On-Line Card Office at www.tiger1.clemson.edu. Students may also pay in person at the Tiger 1 Card Office with cash, check, or credit card; or they may call 864-656-0763 to pay with Visa, MasterCard, or Discover. Office hours are Monday–Friday, 8:00 A.M.–4:30 P.M.

Tiger Stripe accounts are non-refundable except for students withdrawing, graduating, or not returning to the University. Tiger Stripe cannot be used for the payment of tuition. Transactions are limited to $250 per day in the University Revenue and Receivables Office for the payment of incidental fees. Credit balances at the end of each semester will carry forward to the next term. (Students withdrawing must go to E-103 Martin Hall. Balances greater than $5 will be refunded.) Any indebtedness to the University will be deducted from refunds. All graduating students will be required to request a refund at the Tiger 1 Card Office two weeks prior to graduation. Any account that remains dormant for 18 months or longer will have the balance transferred to a University scholarship account.

More information is available at www.tiger1.clemson.edu, by calling 864-656-2763, or e-mailing tiger1-1@clemson.edu.
FINANCIAL AID
The Office of Student Financial Aid administers and coordinates various types of undergraduate financial aid administered by Clemson University: scholarships, loans, grants, and work-study employment. The office works jointly with the University Scholarships and Awards Committee.

Students may apply after January 1 for financial assistance for the next academic year. Financial aid requests, based on financial need, must be supported by a processed Free Application for Federal Student Aid (FAFSA) and renewed annually. No application is required for the LIFE Scholarship.

The FAFSA must be submitted by February 15 for need-based scholarship consideration and by April 1 for the Federal Supplemental Educational Opportunity Grant (FSEOG), Federal Work-Study, Federal Perkins Loan, South Carolina State Need-Based Grant, and Clemson Community Service Grant. April 1 is the suggested deadline for application for the Federal Pell Grant, Federal Stafford Loan, and Federal PLUS Loan. June 1 is the suggested deadline for application for private/alternative loans. PLUS and private loans require a separate application.

Transfer students applying for student loans will be considered as entering freshmen in determining maximum loan limits. Following enrollment, after the credit evaluation process has been completed, students may submit a request for additional funds due to changes in class standing.

Information regarding financial aid programs at Clemson University is available at www.clemson.edu/finaid or from the Student Financial Aid Office, G-01 Sikes Hall, Box 345123, Clemson, SC 29634-5123.

Satisfactory Academic Progress for Financial Aid Eligibility
Students must maintain satisfactory academic progress to be eligible for financial aid. This policy contains both qualitative (grade-point ratio) and quantitative (credit hours completed) requirements. Students must meet the grade-point ratio requirement as stated under the Academic Eligibility Policy. Students must also complete 12, 9, or 6 hours per semester according to their enrollment (full time, ¾ time, or ½ time) as of the last day to add a class. Students have a maximum of 12 full-time semesters in which to finish their degrees, or the equivalent in part-time enrollment. Duplicate credits, including courses repeated for Academic Redemption, do not count as credits completed for satisfactory academic progress. Details are available in the publication Financing Your Clemson University Education or at www.clemson.edu/finaid. Students wishing to appeal their academic progress status may submit a letter to the Student Financial Aid Office. This appeals process is separate from the Appeals Committee on Academic Eligibility. Students returning under the academic renewal policy who apply for financial aid should also submit a letter to the Student Financial Aid Office to update their academic progress record. Prior terms will be counted in the 12 semesters allowed for satisfactory academic progress.

Educational Benefits for Veterans, War Orphans, and Children of Deceased or Disabled Law Enforcement Officers or Fire Fighters
The Veterans Administration provides educational assistance for veterans and children of deceased or totally disabled veterans who meet requirements of applicable laws and regulations. Any veteran or child of a deceased or totally disabled veteran should communicate with the nearest Veterans Administration Office to determine whether he/she is entitled to any educational benefits. Free tuition is available to children of South Carolina law enforcement officers or fire fighters who were totally disabled or killed in the line of duty. Certification is required from the agency of the parent’s employment. Upon presentation of proof of eligibility, a student shall not become eligible for educational assistance until the beginning of the next academic term.
STUDENT SERVICES

HOUSING
Single Student Housing
University Housing provides a “home away from home” for approximately 6,200 single students in 24 residence halls, four apartment complexes, and the Clemson House. Most rooms are double occupancy with a limited number of single rooms available. Most two-bedroom apartments accommodate four students. All University housing is equipped to meet the needs of today’s college student. Approximately two weeks after acceptance to the University, housing information will be mailed to students. Incoming freshmen should apply for on-campus housing at www.housing.clemson.edu. Transfer students and former students returning are offered on-campus housing if space is available.

REDFERN HEALTH CENTER
Medical Services
Redfern Health Center, an outpatient facility, operates Monday–Friday, 8:00 A.M.–5:00 P.M. (summer hours, 8:00 A.M.–4:30 P.M.). Students are seen on an appointment basis. Students without appointments are seen in the Nurses Clinic. The student health center offers outpatient ambulatory care for illnesses and injury, pharmacy, lab, x-ray, and specialty clinics including women’s health and allergy/immunization clinics.

An on-line medical clearance form, available at staff.clemson.edu/redfern/content/immunization-policy.php, is required of all students entering the University for the first time. Documentation of two doses of MMR (measles, mumps, and rubella) vaccines since the student’s first birthday is required. Students born prior to January 1, 1957, are exempt from the measles requirements. A tuberculin skin test (PPD) is required only for students coming from countries identified by the U.S. Centers for Disease Control (CDC) as a high risk for tuberculosis. The PPD skin test must be done at Clemson. Test results from the student’s home country will not be accepted. Students not in compliance with immunization requirements will not be allowed to complete registration for the next semester.

After Hours
Emergency 911 services are available after hours. Students with questions about their health care needs should call the NurseLine at 1-888-525-1333. A registered nurse is available by telephone to answer questions and offer advice about health care needs.

Students requiring the care of a physician after hours choose from area emergency rooms and urgent care facilities including Clemson Health Center (an urgent care facility), Oconee Memorial Hospital, AnMed Health Center, Palmetto Baptist Medical Center, and Greenville Memorial Medical Center. Medical costs incurred are the student’s responsibility. Students should contact Redfern the next business day for follow-up care.

The University ambulance transports on-campus medical emergencies to the closest community medical resource. The University ambulance is staffed with licensed emergency medical personnel 24 hours a day. Students are required to pay for off-campus ambulance transportation.

Counseling and Psychological Services (CAPS)
Located within (and administratively a part of) Redfern Health Center, CAPS provides comprehensive mental health services from a holistic perspective. Students are seen within their context and developmental stages as psychotherapy/counseling is delivered in individual, group, or couples format. Specialized services are delivered by nutritionist, psychiatrist, and addictions counselors. All services are confidential. Students who pay the health fee are allowed up to ten individual counseling sessions per semester at no charge. Services not covered by the health fee are discussed before services are provided.

CAPS offers the convenience of accessing services Monday through Friday from 10:00 A.M.–2:30 P.M. through the walk-in clinic. Students complete paperwork and are seen for this initial brief evaluation on a first-come, first-served basis. Students who cannot meet the walk-in clinic’s hours may call 656-2451 for an appointment during 8:00 A.M.–5:00 P.M. hours of operation.

The CU Sister/CU Brother and Lifestyles Programs assist students with substance abuse/concerns. CU CARES provides counseling, advocacy, referral, education, and support to students with concerns about sexual assault and relationship violence. Students with eating concerns/disorders are treated with a multidisciplinary approach that involves nutritionists, medical, and nutritional perspectives. CAPS conducts a limited number of psychological evaluations for learning disabilities and attention disorders on a first-come, first-served basis each semester.

In case of emergency, assistance and consultation are available by calling 656-2451 during regular business hours. After hours and on weekends, the on-call counselor can be reached through the University Police Department at 656-2222.

Health Promotion
The Office of Health Promotion reaches out to the entire campus community and encourages the adoption of healthy lifestyles, general positive attitudes, and the modification of risky health behaviors. In addition, the office selects and trains student peer educators to become healthy role models on campus, engages fellow students in peer counseling, gives presentations on health issues relevant to college students, and collects and disseminates information about current health topics to the whole community. The Health Promotion program covers topics such as alcohol and other drug issues, HIV/AIDS awareness and prevention, sexual health and responsibility, dating violence, healthy sleep lifestyles, nutrition, stress management, and tobacco cessation efforts, among other topics.

Health Fee
University policy requires that all students registered for seven or more credit hours on campus during the fall or spring semester or three or more on-campus credit hours during a summer session pay the University health fee. The health fee provides access to the professional services of University physicians, nurse practitioners, counselors, and health educators at no additional cost; reduced costs for medical diagnostics; and an after-hours urgent care excess insurance benefit. Students pay for pharmaceuticals, orthopedic equipment, specialty clinics, and psychological testing. Payment is expected at the time of service and may be made by cash, check, MasterCard, Visa, or Tiger Stripe.

Health Insurance—The University offers a student health insurance plan to help cover major medical expenses. Information is available at www.studentinsurance.com. Students are strongly encouraged to have comprehensive health insurance coverage during their tenure at the University.

ACADEMIC SUCCESS CENTER
The Academic Success Center (ASC) provides comprehensive academic support programs and services that enhance students’ learning potential, thereby promoting academic success and personal growth. The ASC provides a nurturing environment in which students are better able to learn how to learn as well as enhance their collegiate experiences. The Center serves as a catalyst to help achieve University goals by promoting high graduation rates, promoting excellence in advising, providing support systems to all students, and increasing freshmen retention. The ASC offers the following programs and services to all students at no charge:

• Supplemental Instruction (SI) allows students enrolled in high-risk courses to work in a study group setting with peer leaders who have successfully completed the course and who have been trained to facilitate SI help sessions.

• Course specific tutoring is offered each week, Sunday through Thursday, in a group setting on a walk-in basis. The ASC Tutor Request Policy allows students in need of tutoring for a course not listed in the tutoring or SI schedule to request a tutor.

• Academic Skills Workshops are held throughout the academic year to enhance the learning experience and build academic skills.

• One-on-one academic counseling sessions help students evaluate their study skills and develop strategies for academic success.

• Individual academic coaching sessions provide structure, support, and feedback to help students stay on course for success.

The ASC offers C U 101 (University Success Skills), a two-credit-hour course to assist freshmen and first-semester transfer students with developing academic and intellectual competence, exploring educational and career opportunities, developing an e-portfolio, establishing and maintaining interpersonal relationships, and becoming members of the Clemson Family.
Student Disability Services (see Disability Services below) coordinates the provision of reasonable accommodations for students with documented disabilities.

**CAREER CENTER**

The Michelin® Career Center assists undergraduate and graduate students in selecting an appropriate field of study, furthering their education, and/or learning effective job searching strategies as well as making connections with employers.

Students can utilize a complete range of services and career development resources in the career library in both print and electronic formats. Career counselors are available to meet one-on-one with students to explore career or education options, devise résumés and cover letters, hone interviewing techniques, conduct searches for internships and full-time jobs, and ready themselves for interviewing with employers on campus. In addition, students may utilize ClemsonJobLink, the Career Center's on-line recruiting system, to view part-time jobs, internships, and full-time job positions and to sign up for on-campus interviews.

For students in majors that do not offer internship credit, the Career Center offers zero-credit-hour internships courses (CCINT). Students may participate in either a part-time or full-time internship.

Major events sponsored by the Career Center include a fall and spring Career Fair, Graduate Professional School Day, and University Placement/Recruitment for Educators Program (UPREP) Teacher Fair.

Information is available from the Career Center at career.clemson.edu or by calling 656-6000.

**DISABILITY SERVICES**

Student Disability Services coordinates the provision of reasonable accommodations for students with physical, emotional, or learning disabilities. Accommodations are individualized, flexible, and confidential based on the nature of the disability and the academic environment in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990.

Students are encouraged to consult with the Disability Services staff early in the semester, preferably prior to the first day of class. Current documentation of a specific disability from a licensed professional is needed. For additional information or an appointment, contact Student Disability Services, G-23 Redfern Health Center at 656-6848. Details on policies and procedures are available at www.clemson.edu/asc.
Students are not permitted to enroll in courses with be approved by the student's academic advisor. session, and seven credit hours in second summer

1. The applicant must present evidence that he/she has received training or taken work which is approximately equivalent to that given in the course at Clemson for which an examination is requested. 

2. The applicant must not have previously failed or has audited the course at Clemson. 

3. The applicant must apply in writing for the examination; the request must be approved by the instructor, chair of the department in which the course is taught, and the Enrolled Student Services Office. Application forms are available in the Enrolled Student Services Office, 104 Sikes Hall. Credit (CR) will be awarded for acceptable work in lieu of letter grades in recognition of college-level achievement as determined by College Board Advanced Placement Examination, International Baccalaureate Program, College-Level Examination Program subject examination, institutional special examinations, and similar instruments. 

Transfer Credit

For Clemson students, coursework completed with a grade of C or better at other regionally accredited institutions, including non-matriculated courses and appropriate examination credit, will be evaluated for transfer in terms of equivalent courses included in the Clemson curriculum of the student’s choice. This does not guarantee that all courses taken at other institutions will be accepted for transfer. The acceptability of each course for exemption will be based on an evaluation by the faculty concerned. Coursework earned at different institutions will not be joined to equate with a single course at Clemson. No course taken at a non-baccalaureate-degree granting institution may be used as an equivalent or substitute for any 300- or 400-level Clemson course. Relative to the continuing enrollment, graduation, and transcripts, only grades earned at Clemson are used in computing the student’s grade-point ratio. Grades earned in qualifying (i.e., non-remedial) transfer courses will be used in calculating the student’s grade-point average for South Carolina LIFE Scholarship awards. Non-remedial college classes completed while in high school are included in this calculation. 

Learning Experiences

All “for credit” learning experiences conducted with organizations other than accredited higher education institutions must be regularly supervised by appropriate members of the Clemson University faculty or staff. The student must be enrolled at the time the credit is generated, and the level of credit (grade) is the responsibility of the faculty member(s) in the discipline from which the grade originates.

External Education Experiences

In all “for credit” external educational programs which Clemson University may have with professional, vocational, technical, clinical, and foreign study, the agreements are to be agreed to through signature of the Provost and the President. In such cases, learning experiences for which credit is awarded must be under the ultimate control and supervision of Clemson University.

GRADING SYSTEM

The grading system is as follows: 

A—Excellent indicates work of a very high character and of the highest grade given. 

B—Good indicates work that is definitely above average, though not of the highest quality. 

C—Fair indicates work of average or medium character. 

D—Pass indicates work below average and unsatisfactory, the lowest passing grade. 

F—Failed indicates that the student knows so little of the subject that it must be repeated in order that credit can be received. 

I—Incomplete indicates that a relatively small part of the semester’s work remains undone. Grade I is not given a student who made a grade F on his/her daily work. The incomplete grade is calculated as an F in the student’s grade-point ratio until the work is made up and a final grade is assigned. Students are allowed thirty days after the beginning of the next scheduled session, excluding summers and regardless of the student’s enrollment status, to remove the incomplete grade. Normally, only one extension for each I may be granted, and this under unusual circumstances. The extension must be approved in writing by the instructor of the course and the chair of the department in which the course was taken. The extension will indicate the nature and amount of work to be completed and the time limit. (Students under this policy are prohibited from removing the I by repeating the course.) A letter grade of I converts to F unless the incomplete is removed within the time specified.

W—Withdraw indicates that the student withdrew from the course or was withdrawn by the instructor after the first two weeks of classwork and prior to the last seven weeks of courses, not including the examination period. Proportionate time periods apply during summer and other shortened sessions. Each undergraduate student is allowed to withdraw or be withdrawn with a grade of W for no more than 17 hours of coursework during the entire academic career at Clemson University. Transfer students may withdraw from no more than 12 percent of the total work remaining to be done in the chosen undergraduate curriculum at the time of transfer.
to Clemson University up to a total of 17 hours of coursework, whichever is fewer. Partial credit for courses cannot be dropped. A student who exceeds these limits of hours or who is enrolled during any part of the last seven weeks of classes shall have final grades recorded. A student may withdraw from the University subject to the restrictions above. Additionally, pending approval from the provost or the provost’s designee, students may withdraw from Clemson University one time only during their academic careers prior to the final seven weeks of classes (proportionate time periods apply during summer and other shortened sessions), without reduction from their allotted W hours. Any variance from these restrictions must be approved by the provost or the provost’s designee. The student must document the circumstances supporting the request. For financial aid purposes, enrollment is defined and satisfactory academic progress levels are established as of the last day to register or add classes. Withdrawal can negatively impact financial aid eligibility if a student does not complete a sufficient number of hours. Details are available in the publication Financing Your Clemson University Education or at www.clemson.edu/financial.

Grade-Point Ratio
In calculating a student’s grade-point ratio, the total number of grade points accumulated by the student is divided by the total number of credit hours attempted at Clemson during the semester, session, or other period for which the grade-point ratio is calculated. For each credit hour, the student receives grade points as follows: A–4, B–3, C–2, D–1. No grade points are assigned for grades F, I, P, or W.

Pass/Fail Option
Juniors or Seniors enrolled in four-year curricula may take four courses (maximum of 15 credit hours), with not more than two courses in a given semester, on a Pass/Fail basis. Transfer and five-year program students may take Pass/Fail courses on a pro rata basis. Only courses to be used as electives may be taken optionally as Pass/Fail.

Letter-graded courses which have been failed may not be repeated Pass/Fail.

Registration in Pass/Fail courses will be handled in the same manner as letter-graded courses. Departmental approval must be obtained via approval form and returned to the Registrar’s Office by the last day to register or add a class, as stipulated in the Academic Calendar. Instructors will submit letter grades to the Registration Services Office. These grades will be converted as follows: A, B, C to P (pass); D, F to F (fail). Only P (minimum letter grade of C) or F will be shown on a student’s permanent record and will not affect the grade-point ratio.

If a student changes to a major which requires a previously passed course and this course has been taken Pass/Fail, he/she may request either to take the course on a letter-graded basis, that the P be changed to C, or that another course be substituted.

In the event limited enrollment in a class is necessary, priority will be given as follows: majors, letter-graded students, Pass/Fail students, auditors.

Dropping Classwork
A subject dropped after the first two weeks of coursework and prior to the last seven weeks during the fall and spring semesters is recorded as W—Withdraw. Proportionate time periods apply during summer sessions.

Mid-Term Evaluation
Once, near mid-term, but no later than five days before the last day students can drop courses without receiving final grades, instructors of every undergraduate course shall make available for each student (a) that student’s numerical course grade or (b) that student’s letter ranking to date in that course (A–F or P/F). More frequent feedback is strongly encouraged.

Both student and instructor are to recognize that this feedback reflects the student’s performance up to that point in time, and as such, that student’s final course grade may change based upon subsequent coursework performance(s).

The policy includes all undergraduate courses and applies to all terms, including Maymester and summer sessions.

Final Examinations
The standing of a student in his/her work at the end of a semester is based upon daily classwork, tests, or other work, and final examinations. Final examiners may excuse from final examinations all students having the grade of A on the coursework prior to the final examination. For all other students, examinations are required in all subjects at the end of each semester, except in courses in which final examinations are not deemed necessary as approved by the department faculty.

Final examinations must be given or due on the dates assigned by the registrar designated in the final examination schedule, except in laboratory and one-credit-hour courses where the final exam will be given at the last class meeting.

Grade Reports
Students may access their end-of-term grades online. Final grade reports are mailed to undergraduates on academic probation and to other students upon request. Request forms are available in the Enrolled Student Services and Registration Services Offices.

Academic Eligibility Policy
All students are expected to study and perform to the best of their abilities. The academic eligibility standards listed below represent minimum levels to remain enrolled at the University. Students failing to meet these standards are not making satisfactory degree progress and should seek additional assistance from their academic advisor, the Academic Success Center, or other appropriate University resources.

Academic Eligibility
Eligibility for continued enrollment is evaluated at the end of the spring semester unless otherwise indicated. Students who fail to maintain minimum standards as set forth below are subject to academic suspension or dismissal.

Academic Alert
Students who earn a semester grade-point ratio below 1.5, regardless of their cumulative grade-point ratio, will be placed on semester probation. No notation concerning semester probation will appear on the student’s permanent record.

Academic Probation
Students who fail to maintain a cumulative grade-point ratio of 2.0 or higher will be placed on academic probation. No notation concerning probation will appear on the student’s permanent record.

Academic Suspension
A student on academic probation (cumulative grade-point ratio below 2.0) is subject to suspension at the end of the spring semester if he/she does not meet one of the academic eligibility criteria listed below. Students entering Clemson University for the first time will not be subject to suspension until they have attempted coursework at Clemson for two semesters, excluding summer terms. Suspended students are ineligible to enroll in classes for the regular academic semester (fall or spring) immediately following the decision to suspend. Suspension does not apply to the fall semester only, and the student is eligible for readmission the following term.

Academic Eligibility Criteria
Students have three options to avoid suspension or dismissal:
1. To pass at least 12 credit hours and earn a 2.4 or higher grade-point ratio in the immediately subsequent term (fall or spring). Duplicate credits do not count as credits passed unless otherwise required to meet an alternative departmental standard.
2. To enroll in summer school and achieve the minimum cumulative grade-point ratio (MCGPR) listed below.

Total Credit Hour Level includes all credit hours attempted at Clemson, plus any advanced standing received from transfer credits and credits based on approved examination programs. Only grade points earned at Clemson are used to calculate the MCGPR.

3. To enroll in summer school and pass at least 12 credit hours and earn a 2.4 or higher grade-point ratio in Maymester, first, and/or second summer sessions. Duplicate credits do not count as credits passed unless otherwise required to meet an alternative departmental standard.

In the event a student subject to suspension or dismissal is unable to achieve one of the above outcomes as a result of extenuating circumstances, the student may appeal to the Appeals Committee on Academic Eligibility at the end of the fall, spring, or second summer session.

Academic Dismissal
A student reenrolling after a suspension is subject to dismissal at the end of the semester (fall or spring) in which he/she did not meet one of the academic eligibility criteria listed above. The period of dis-
missal is for one calendar year and readmission is by appeal only. The student may file an appeal for readmission with the Appeals Committee on Academic Eligibility. If this appeal is denied, the student may file subsequent appeals for readmission after any intervening term. Dismissed students who are readmitted and again fail to meet the requirements for academic eligibility will be permanently dismissed. Permanent dismissal may not be appealed.

Appealing Suspension or Dismissal
The Appeals Committee on Academic Eligibility meets approximately one week after final examinations in the fall, spring, and second summer session. Students should contact the Office of Undergraduate Studies for further information on the appeals process.

Appeals will be granted only in the most exceptional cases and may require the student to adhere to additional criteria in order to remain enrolled at the University. Students who return on a successful appeal will be reevaluated for academic eligibility at the end of each semester until a cumulative grade-point ratio of 2.0 or higher is achieved.

The evaluation for academic eligibility is separate from the evaluation for satisfactory academic progress required for Student Financial Aid. Further information on satisfactory academic progress for financial aid purposes is available in the Financial Information section of this catalog and in the publication Financing Your Clemson University Education.

Grade Protests
A student wishing to protest a final course grade must first try to resolve any disagreement with the instructor. If unable to reach a resolution, the student may follow the procedures listed under Academic Grievance Board. Grievances must be filed within 90 calendar days (exclusive of summer vacation) of the date of the last exam for the term involved.

Repeating Courses Passed
A student may repeat a course passed with a grade lower than B. If the grade is a D and the student has sufficient W hours and sufficient Academic Redemption hours, the Academic Redemption Policy below will apply. Otherwise, both grades will be calculated in the grade-point ratio. In either case, credit for the course will be counted only once toward the number of hours required for graduation. For academic eligibility purposes, duplicate credits do not count as credits passed. For financial aid purposes, duplicate credits do not count as credits completed for satisfactory academic progress. If a student repeats a course passed with a grade of B or better, the credits attempted as well as credits and grade points earned will be removed from the cumulative summary.

Repeating Courses Failed
A student who has failed a course cannot receive credit for that course until it has been satisfactorily repeated. Hours for hour in a class; except that in the case of co-related laboratory work, the number of hours to be taken shall be determined by the instructor. Where separate grades for class and laboratory work are given, that part of the subject shall be repeated in which the failure occurs. Successfully repeating a course previously graded F does not erase the original F grade from the student’s record.

A student repeats a course in which the previous grade was F and the student has not exhausted his/her allotment of W hours or Academic Redemption hours, the Academic Redemption Policy below will apply. Otherwise, both grades appear on the record and are computed in the cumulative grade-point ratio.

Academic Redemption Policy
The Academic Redemption Policy (ARP) allows a student enrolled before August 2007 to repeat up to nine hours of coursework in which a D or F was earned if he/she has sufficient W hours remaining. Students whose initial enrollment occurs August 2007 or later may redeem up to ten credit hours. In all cases, the grade earned in the course used to redeem the earlier course will be used in computing the grade-point ratio and satisfying degree requirements. When the earlier grade is D and the second grade is F, the student cannot use the D grade to satisfy any degree requirement.

The following conditions apply:
Courses taken prior to fall semester 2003 may not be considered for academic redemption.
For students with sufficient W hours, the first ten hours of repeated coursework (nine hours for those enrolled before August 2007) will automatically be computed for academic redemption, and these hours will be deducted from the student’s allotted W hours. If sufficient W hours are not available, the ARP will not apply.
Both grades will remain on the transcript, degree progress report, and other official documents. For financial aid purposes, courses repeated under this policy resulting in duplicate credits do not count for satisfactory academic progress.
If a student drops a repeated course during the period in which the Academic Calendar indicates a W grade is assigned, then both the ARP hours and W hours will be subtracted from the student’s remaining ARP and W hours.

The ARP shall apply only to courses taken at Clemson University. The earlier course graded D or F can only be redeemed by repeating the same course. Course substitutions are not permitted.

Students may not invoke the ARP after they have graduated. After graduation, students may repeat coursework, but both grades will be calculated in the grade-point ratio.

The ARP may not be applied to a course taken on a Pass/Fail basis or to any course in which the student was previously found in violation of the academic integrity policy.

CLASSWORK

Academic Advising
Each student is assigned an academic advisor in his/her major area. It is the responsibility of the student to consult with the advisor during registration. The advisor will assist the student in scheduling courses so as to fulfill the requirements of the degree program; nevertheless, it is the responsibility of the student to fulfill the relevant requirements of the degree. Advisors also maintain files on individual advisees to assist in academic planning.

Course Prerequisites
Prerequisites for each course are enumerated in the Courses of Instruction section of this catalog. In addition to these requirements, colleges and departments may also establish other standards as conditions for enrollment. It is the student’s responsibility to refer to individual college and curricular information for specific standards.

Class Attendance
College work proceeds at such a pace that regular attendance is necessary for each student to obtain maximum benefits from instruction. Regular and punctual attendance at all class and laboratory sessions is a student obligation, and each student is responsible for all the work, including tests and written work, in all class and laboratory sessions. No right or privilege exists that permits a student to be absent from any given number of class or laboratory sessions except as stated in the syllabus for each course. At the same time, it is obvious that students have valid reasons for missing classes; the instructor is expected to be reasonable in the demands he/she places on students. In this regard, instructors must inform the students in the syllabus that constitutes excessive absences penalty, if any, for such absences. Faculty who impose penalties for excessive absences must keep accurate attendance records.

Some students are on scholarships and/or grants-in-aid overseen by the University Scholarships and Awards Committee. The acceptance of such scholarships and/or grants-in-aid may require participation in events both on and off campus. Additionally, students occasionally are required to miss class because of participation in co-curricular activities, such as class trips, that the faculty member note on their syllabi. The student must discuss these activities with the faculty members whose classes will be missed well in advance of their occurrences. The documentable absences are necessary, and the instructor will make arrangements for those students to make up graded work that takes place during those necessary absences. The time, location, and nature of the make-up work will be at the discretion of the instructor. If required, documentation will be provided to instructors by students.

Instructors are expected to set reasonable policies in working with those student personal documentable absences that are truly beyond the student’s control. After reviewing the reason for the absence, the instructor at his/her discretion may allow the student to make up the graded work missed.

All other aspects of class attendance are within the discretion of the instructor, department, or college responsible for the course. If a student feels unfairly treated in any attendance-related situation, the student has the right of appeal to the Academic Grievance Committee.

First Day Class Attendance
All students are required to attend the first scheduled day of classes and labs. Students who cannot attend the first class are responsible for contacting the instructor to indicate their intent to remain in that class. If a student does not attend the first class meeting or contact the instructor by the second
meeting or the last day to add, whichever comes first, the instructor has the option of dropping that student from the roll.

**Dead Days**

During the last two class days of the fall and spring semesters, commonly referred to as Dead Days, all regularly scheduled classes are conducted; however, course testing on these days is limited to scheduled laboratory and one-semester-hour course final exams and make-up tests. Dead Days are observed during fall and spring semesters only. Dead Days do not apply to courses numbered 600 or above.

**Auditing Policies**

Qualified students may audit courses upon written approval of the instructor. Auditors are under no obligation of regular attendance, preparation, recitation, or examination and receive no credit. Participation in classroom discussion and laboratory exercises by auditors is at the discretion of the instructor. A student who has previously audited a course is ineligible for credit by examination.

Undergraduate and graduate students enrolled in 12 or more hours may audit courses at no additional charge. Others interested in auditing should verify their eligibility through the Registrar's Office.

**Combined Bachelor's/Master's Plan**

Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements.

To be eligible for this plan, students must have completed their bachelor's curriculum through the junior year (minimum 89 credits) and have a minimum overall grade-point ratio of 3.40. Information and application forms are available from the Graduate School Office. Endorsements by the program coordinator or department chair of both programs are required. If accepted, students will be given conditional admission to the master's program pending completion of their bachelor's degree and submission of satisfactory GRE or GMAT scores, if required. Combined Plan students are not eligible for graduate appointments for financial aid until their bachelor's degrees have been awarded.

A maximum of 12 credits of graduate courses in the master's program may be applied to the bachelor's program. As determined by the participating bachelor's program, graduate courses may be applied to the bachelor's degree as free or technical electives, or by substitution of 800-level courses for required undergraduate courses. Under no circumstances can 600-level counterparts of courses required in the bachelor's program be counted toward master's requirements.

Not all programs may choose to participate in the Combined Bachelor's/Master's Plan. Those bachelor's programs that do participate may permit fewer than 12 graduate credits to count toward the bachelor's degree. Furthermore, the bachelor's programs determines the acceptability of specific graduate courses to meet their curriculum requirements, and the participating master's programs control admission of students into their programs and their courses. Students should consult individual academic units for specific requirements.

**Enrollment in Graduate Courses**

Enrollment of Clemson University seniors in any graduate course is subject to approval by the department offering the course and the Graduate School. This approval is required prior to registration. Approval forms are available from the Graduate School Office in E-106 Martin Hall or at www.grad.clemson.edu/forms/GeneralForms.php. The total course workload for the semester must not exceed 18 hours, and the cumulative graduate credits earned by seniors shall not exceed 12 semester hours.

Seniors with a cumulative grade point ratio of 3.0 or higher may enroll in 700- or 800-level courses and may use these courses to meet requirements for the bachelor's degree; however, courses used for this purpose cannot be counted later toward an advanced degree. Alternatively, such students may take 600-, 700-, or 800-level courses in excess of the requirements for their undergraduate degrees and may request that these courses be included as a part of their graduate program if they are subsequently admitted to the Graduate School. Courses cannot be taken at the 600 level if their 400-level counterparts are required for the undergraduate degree in the same academic major as the proposed graduate degree.

A Clemson senior with a cumulative grade-point ratio less than 3.0 may apply to the Graduate School for conditional acceptance. If accepted, the student may enroll in graduate courses for inclusion in the future graduate program subject to approval of Form GS6. The form must be turned in and accepted by the Graduate School before a student can register for graduate courses.

In all cases, the credits and quality points associated with senior enrollment in graduate courses will be part of the undergraduate record.

**Make-up of Incompletes Received in Last Semester**

A candidate for a degree who receives one or more grades of I in the semester immediately prior to graduation shall have an opportunity to remove the unsatisfactory grades provided the final grades are received in the Registration Services Office, E-206 Martin Hall, by the time grades for candidates for graduation are due. A student who qualifies for graduation under this regulation will be awarded his/her higher degree on the regular date for the award of degrees.

**Special Requirements**

A cumulative grade-point ratio of 2.0 is required for graduation, and candidates for degrees must be officially accepted in the major in which they are applying for a degree in the term prior to application for the degree.

**Awarding of Degrees Posthumously**

An undergraduate student may be awarded a degree posthumously on the recommendation of the faculty of the college concerned, subject to the following conditions:

- the student had at least a 2.0 grade-point ratio at time of death
- including credits scheduled in the term in which death occurred, the student a) had satisfied 75% of the degree requirements and b) met the residence requirement for a degree which requires that 37 of the last 43 credits presented for a degree be earned at Clemson.

**Credit Limitation**

If all work toward a degree is not completed within six years after entrance, the student may be required to take additional courses.

**Academic Honors**

**Honor Graduates**

To be graduated with honors, a student must have a minimum cumulative grade-point ratio as follows: cum laude—3.40, magna cum laude—3.70, and summa cum laude—3.90.

**Honor Lists**

At the end of the fall and spring semesters, the following lists shall be compiled of undergraduate students who have achieved grade-point ratios of 3.50–4.00 on a minimum of 12 semester hours, exclusive of Pass/Fail coursework.

- Dean's List—3.50 to 3.99 grade-point ratio
- President’s List—4.00 grade-point ratio

**Honors and Awards**

The University offers a number of awards for outstanding achievement in specific fields and endeavors. Recipients are chosen by selection committee and are announced at the annual Honors and Awards Day program or other appropriate ceremonies. Detailed information relating to such awards is available in the offices of the academic deans and department chairs.

**Preprofessional Studies**

Clemson University will award the degree of Bachelor of Arts or Bachelor of Science in Preprofessional Studies to a student who is pursuing a degree in a professional school. The student must
have also satisfactorily completed three years of undergraduate work in an appropriate curriculum and the first year of work in an accredited medical, dental, veterinary, or other accredited professional school, provided the student fulfills the requirements for the three-year program as follows and the other specified conditions are met.

1. At least two of the student's years of preprofessional work, including the third year, must be taken in residence at this University.
2. A minimum of three years of undergraduate work (i.e., preprofessional school credit) must be presented.
3. Normal progress must have been made toward fulfilling the degree requirement of the curriculum in which the student is enrolled at Clemson.
4. The student applying for the Bachelor of Arts or Bachelor of Science in Preprofessional Studies must be recommended by the college at Clemson in which the curriculum that he/she is majoring as a Clemson student is located or by the college in which three years of normal progress toward a degree can be demonstrated.
5. If the combination of preprofessional work taken and the work in the first year of professional school is equivalent to that which is required in some other bachelor's degree program at Clemson, the college concerned may recommend the other bachelor's degree.

The above requirements and conditions became effective July 1, 1974, and will apply to all students who satisfy these requirements and conditions after that date.

A Clemson student having left the University before receiving the bachelor's degree (prior to July 1, 1974) and having enrolled immediately in an accredited professional postgraduate school may apply for a bachelor's degree from Clemson and have his/her application considered on an individual basis. The college(s) at Clemson considering the application is authorized to examine the student's enrollment in both preprofessional and professional schools and exercise its own judgment concerning the three-year requirement for Preprofessional Studies.

Second Baccalaureate Degree
To complete a second baccalaureate degree, a student must complete a minimum of 30 semester hours at Clemson in addition to the greater number of hours required for either degree and satisfy all course and grade requirements for the second degree.

Double Major
A student in a Bachelor of Arts degree program may be awarded a single baccalaureate degree with a double major. The two majors may be within a single college or may involve two colleges but are limited to Bachelor of Arts degree programs.

Graduate Degrees
Graduate degrees are available from all five colleges in addition to several interdisciplinary programs. Clemson University offers more than 100 graduate degree programs. The degrees of Doctor of Philosophy, Education Specialist, Master of Arts, Master of Science, Master of Agricultural Education, Master of Architecture, Master of Arts in Teaching, Master of Business Administration, Master of City and Regional Planning, Master of Construction Science and Management, Master of Education, Master of Engineering, Master of Fine Arts, Master of Forest Resources, Master of Human Resource Development, Master of Landscape Architecture, Master of Parks, Recreation, and Tourism Management, Master of Professional Accountancy, Master of Public Administration, and Master of Real Estate Development are awarded to students who complete prescribed graduate programs.

Additional information is available in the Graduate Announcements.

ACADEMIC RECORDS
The student's permanent academic record is maintained in the Registrar's Office and contains personal identifying information, grades, and credits. Where appropriate, statements of a corrective nature, withdrawals, suspension for failure to meet academic standards, suspension for disciplinary reasons, and graduation data are added. The academic record is a historical record of the student's academic progress.

Classification
All new students are classified as freshmen unless they have attended another college prior to entrance. Students who have completed college work elsewhere will be classified on the basis of semester hours accepted at Clemson rather than the amount of work presented. To be classified as a member of any class other than freshmen, students must meet the credit-hour requirements below.

- Sophomore—minimum of 30 credit hours
- Junior—minimum of 60 credit hours
- Senior—minimum of 90 credit hours

Change of Major
Any undergraduate student who meets the Academic Eligibility Policy after attempting 12 credit hours at Clemson University (or who is allowed to continue by virtue of a semester 2.4 grade-point ratio on 12 earned credits or who is allowed to continue through appeal to the Appeals Committee on Academic Eligibility or by other authorization of this committee) may transfer from one major to another. Any college or department which seeks an exception to this policy must have the approval of the college concerned.

Withdrawal from the University
A student may withdraw from the University subject to the restrictions in the section on W—Withdrawal. Students who exceed these restrictions shall have final grades recorded. Any variance from the restrictions must be approved by the provost or the provost's designee. The student must document the circumstances supporting the request. All University withdrawals (including withdrawing from the only course in which a student is enrolled) must be processed by the Associate Dean of Undergraduate Studies. Students should report to E-103 Martin Hall. Students receiving financial aid who withdraw from the University may have to repay significant portions of their financial aid. Students should report to G-08 Sikes Hall to determine the amount. For financial aid purposes, enrollment is defined and satisfactory academic progress levels are established as of the last day to register or add classes. Withdrawing from the University can negatively impact financial aid eligibility if a student has not completed a sufficient number of hours. Details are available in the publication Financing Your Clemson University Education or at www.clemson.edu/finaid.

Academic Renewal
The student who has not enrolled at Clemson for a period of two or more academic years may apply to the Appeals Committee on Academic Eligibility for readmission under special conditions known as academic renewal. Under these conditions, the previous credits attempted and grade-point deficit will not constitute a liability in a new grade-point computation; however, no credits passed or their attending grade points will be available to the student for a degree at Clemson, and any courses previously passed may not be validated by special examination. The previous record will appear on the permanent record as well as the notation of readmission under the policy of academic renewal. Students returning under the academic renewal policy who apply for financial aid should submit written notification of their status to the Office of Student Financial Aid in order to update their academic progress record.

For financial aid purposes, terms enrolled in prior to academic renewal are counted in the 12 semesters allowed for satisfactory academic progress.

Transcripts
Official transcripts are issued only at the authorized, written request of the student. Requests should be directed to Transcripts, 104 Sikes Hall, Box 345125, Clemson, SC 29634-5125. Payment in advance is required and may be made by Discover, Visa, MasterCard, Tiger Stripe, check (payable to Clemson University), or cash. The following must be included with the transcript request: full name (including any names used while at Clemson), social security number, current address, date of birth, date the student last attended Clemson, where the transcript is to be sent, and payment of $10 per transcript. Telephone requests will not be honored. Transcript requests are normally processed within 48 hours, but additional processing time may be required at the end of a semester. Information is available from the Enrolled Student Services Office at the address above or by telephone at 864-656-2173. Official transcripts are not issued for those who are indebted to the University.

ACADEMIC INTEGRITY
As members of the Clemson University community, we have inherited Thomas Green Clemson's vision of this institution as a "high seminary of learning." Fundamental to this vision is a mutual commitment to truthfulness, honor, and responsibility, without which we cannot earn the trust and respect of others. Furthermore, we recognize that academic dishonesty detracts from the value of a Clemson degree. Therefore, we shall not tolerate lying, cheating, or stealing in any form.

I. Academic Integrity Policy
A. Any breach of the principles outlined in the Academic Integrity Statement is considered an act of academic dishonesty.
B. Academic dishonesty is further defined as:
1. Giving, receiving, or using unauthorized aid on any academic work;
2. Plagiarism, which includes the intentional or unintentional copying of language, structure, or ideas of another and attributing the work to one's own efforts;
3. Attempts to copy, edit, or delete computer files that belong to another person or use of Computer Center account numbers that belong to another person without the permission of the file owner, account owner, or file number owner;
C. All academic work submitted for grading contains an implicit pledge and may contain, at the request of an instructor, an explicit pledge by the student that
D. It is the responsibility of every member of the Clemson University community to enforce the Academic Integrity Policy.

II. Academic Integrity Committee
The power to hear cases of academic dishonesty is vested in an Academic Integrity Committee.

A. Structure—The Academic Integrity Committee is composed of twenty members as follows:
1. Ten tenured members of the faculty; two members from each college elected by their respective collegiate faculties. Faculty members will be elected on a staggered term basis, serving for a period of two years after initiation of staggered terms. Terms commence with fall semester late registration.
2. Ten members of the undergraduate student body; two from each college. Student members are nominated by the Student Body President, through an application and interview process in the spring semester, approved by the Student Senate, and appointed by the provost for terms of two years. Students must have a 3.0 grade-point ratio at the time of appointment and must have completed 30 hours by the end of the spring semester. Nominations will be made in the spring semester with terms commencing with fall semester late registration.
3. The committee is divided into four hearing boards, hereafter referred to as hearing boards, which will hear the cases of academic dishonesty. Hearing boards convene on a weekly, rotational basis unless there are no cases to be heard. For summer sessions, the Associate Dean of Undergraduate Studies must maintain at least one hearing board to hear cases.
4. Hearing boards are comprised of two faculty members, two students, and one chairperson. Quorum, for a hearing board, is one student, one faculty member, and a chairperson. Decisions by the hearing board will be by majority vote.
5. Chairpersons will be elected from within the Committee's membership. Two chairpersons are selected from the faculty membership and two from the student membership.
6. Before hearing any cases, a new member of the committee must undergo a training session(s) with the Associate Dean of Undergraduate Studies.
7. The Associate Dean of Undergraduate Studies is the administrative coordinator of the Academic Integrity Committee.

B. Procedures
1. When, in the opinion of a faculty member, there is evidence that a student has committed an act of academic dishonesty, the faculty member shall make a formal written charge of academic dishonesty, including a description of the misconduct, to the Associate Dean of Undergraduate Studies. At the same time, the faculty member may, but is not required to, inform each involved student privately of the nature of the alleged charge.
2. When, in the opinion of the student, there is evidence that another student has committed an act of academic dishonesty, he/she should contact the faculty member for the course to discuss the incident. After being contacted, if, in the opinion of the faculty member, there is evidence that a student has committed an act of academic dishonesty, the faculty member shall make a formal written charge of academic dishonesty, including a description of the misconduct, to the Associate Dean of Undergraduate Studies. At the same time, the faculty member may, but is not required to, inform each student involved privately of the nature of the alleged charge.
3. When the Associate Dean of Undergraduate Studies has received a formal charge of an alleged violation, he/she will contact the student involved privately to notify him/her of the charge and at the same time will provide the student with a copy of the charge and a copy of the procedures that the Academic Integrity Committee has adopted pursuant to number 6 below. If a student is charged with academic dishonesty, he/she may not withdraw from the course unless he/she is exonerated of the charge. If a student is found innocent of an academic dishonesty violation and receives a D/F grade, he/she will not be allowed to receive that grade unless he/she is exonerated of the charge.
4. After informing the student involved, the Associate Dean of Undergraduate Studies will convene one or the boards of the Academic Integrity Committee within 14 calendar days (exclusive of University holidays) of his/her being notified of an alleged violation. (Students charged in the spring term, but not enrolled in summer sessions, may be given a continuance to the next fall term. Should the university schedule be interrupted due to emergency circumstances, academic integrity cases will be resolved as soon as possible once classes resume.) All students will be presumed not in violation of a charge until found in violation by a hearing board. Each party is responsible for having present at the hearing all witnesses that he/she wishes to speak on his/her behalf. Witnesses must have first-hand knowledge of the events under discussion.
5. A charge of academic dishonesty in a course must be made within thirty days after the beginning of the next term, exclusive of summer vacation. If an I (Incomplete) is given in a course, the grade in the course is considered to be final when the I is replaced.
6. The Academic Integrity Committee will adopt its procedures, to be followed by all hearing boards, prior to the first case heard by a hearing board. In addition to providing the student with a copy of the procedures, as stated in number 3 above, the Associate Dean of Undergraduate Studies will provide a copy of the procedures to the involved faculty member and also the hearing board members. The Associate Dean of Undergraduate Studies will retain copies of these procedures. The procedures must afford both faculty and students the opportunity to present their cases and the opportunity for rebuttal.
7. In cases in which there is a finding of “in violation,” the faculty member may consult with the Associate Dean of Undergraduate Studies to consider any past precedent established regarding academic penalties levied in similar cases. Faculty members must inform the Associate Dean of Undergraduate Studies of the academic penalty for a student found “in violation” by a hearing board.
8. The Associate Dean of Undergraduate Studies is responsible for notifying the registrar and all other appropriate University personnel of the finding of “in violation” and the academic penalty. The Associate Dean of Undergraduate Studies retains all records of academic dishonesty cases and their findings in accordance with the University's Records Retention Policy.

C. Penalties
1. Upon a finding of “in violation” by a hearing board, the student’s record will not reflect the incident.
2. Upon a finding of “in violation” by a hearing board, the Associate Dean of Undergraduate Studies will notify the student and faculty member of the decision immediately. If the offense is the first for the student, the faculty member has the ability to determine the academic penalty, which shall not exceed a grade of F for the course.
3. If the finding of “in violation” is not the student's first offense, the student will receive a grade of F for the course, will be suspended from the University for one or more semesters, and may be permanently dismissed from the University. The hearing board will determine the period for which the student will be suspended or, if applicable, permanently dismissed. Suspension or dismissal requires the approval of the President of the University.

D. Appeals
1. Students do not have the option to appeal a decision rendered by the hearing board, whether it is the first, second, or any subsequent offense. Students do not have the option to appeal the penalty determined by the faculty member for first offenses or to appeal the grade of F for the course given for second offenses.
2. For offenses resulting in suspension or permanent dismissal, students have the option to present written information to the Dean of Undergraduate Studies to appeal the length of the suspension or to appeal a decision of permanent dismissal. Students must present information in their defense, as allowed in this paragraph, to the Dean within five working days after receipt of written notification of the suspension or dismissal. However, as stated in number 1 above, students cannot appeal a decision rendered by the hearing board.
ACADEMIC GRIEVANCE BOARD

I. Purpose
Clemson University is dedicated to the fair and impartial review of grievances by students against faculty and staff. The Academic Grievance Board is responsible for reviewing and adjudicating allegations by undergraduate students of unfairness or inequity in the assigning of final grades. Only grievances that contest a final grade are considered by the Academic Grievance Board.

II. Definitions
The Academic Grievance Board comprises two separate entities: a seven-person Academic Grievance Panel and a 25-person Academic Grievance Committee.

The Academic Grievance Panel is responsible for the initial review of grievances and for determining which grievances will go forward to the Academic Grievance Committee (see section IV.4 below). There are five faculty representatives to the Academic Grievance Panel, one from each of the five colleges. The members of the Academic Grievance Panel are appointed by the Dean of Undergraduate Studies for three-year terms. In addition, there are two undergraduate student representatives to the panel appointed for two-year terms. Undergraduate student representatives are selected on a rotating basis from each of the five colleges. The representatives are appointed to the Academic Grievance Panel by the President of the Student Senate. The Academic Grievance Panel will elect a chair each year, chosen from among the faculty members on the Academic Grievance Panel.

The Academic Grievance Committee is responsible for hearing student grievances, proposing resolutions to grievances, and, in the case of appeals, forwarding recommendations to the Dean of Undergraduate Studies. Grievances are heard by three-person subcommittees, appointed by the Chair of the Academic Grievance Committee. The Academic Grievance Committee may hear a grievance only if a recommendation for a hearing is made by the Academic Grievance Panel. The Academic Grievance Committee consists of 15 faculty representatives, three from each college, and ten student representatives, two from each college. Faculty representatives are elected by their colleges and serve three-year terms. Student representatives are appointed by the President of the Student Senate and serve two-year terms. The Chair of the Academic Grievance Committee is appointed by the Dean of Undergraduate Studies.

III. Grounds for Academic Grievances
The Academic Grievance Board provides for hearings on academic grievances that are based on either or both of the following claims:
A. The method used for arriving at a student’s final grade was in clear violation of the method described in the instructor’s course syllabus.
B. The method used for arriving at a student’s final grade was in clear violation of departmental, college or university policy.

The Academic Grievance Board will not attempt to substitute its judgment for an instructor’s on such matters as a) quality of the instructor’s teaching, b) quality of the student’s work, or c) quality of course content.

The Academic Grievance Committee shall not hear any grievances including allegations of discrimination based on age, color, disability, gender, national origin, race, religion, sexual orientation, or veteran’s status even if the grievance falls within one of the categories noted above. All such discrimination complaints should be submitted to the Office of Access and Equity in 110 Hotzendorff, 656-3181. The Academic Grievance Committee shall refer any such discrimination complaints it receives to the Office of Access and Equity.

IV. Rules and Procedures for Academic Grievances

1. Any student filing a grievance must first attempt to resolve it by consulting with the involved faculty member. In the event that the student and faculty member cannot resolve the grievance, the student shall consult with the department chair of the faculty member and the dean of the college of the faculty member, respectively. The department chair and dean shall make every effort to help the student and the faculty member arrive at a resolution to the problem. At any time during this process, the student may consult with the Undergraduate Student Ombudsman.

2. If the grievance remains unresolved, the student may bring the grievance before the Academic Grievance Board. The student shall first meet with the Academic Dean of Curriculum in the Office of Undergraduate Studies. The Academic Dean of Curriculum will describe the grievance process to the student, tell the student wishes to proceed with the grievance. The student will be provided with a written statement detailing the grievance to the Academic Dean for Curriculum. The written statement must specify the specific syllabus, departmental, college or university policy that the student alleges to have been violated. In addition, the student will submit, from the Office of Undergraduate Studies, a grievance checklist form. On this form, identified by complaint number, the student will document the following: a) the dates of those consultations described in procedure IV.1 above, b) the names of those persons consulted, and c) the signature of the collegiate dean attesting that no resolution could be reached. The completed checklist form will then be returned to the Academic Dean for Curriculum for signature. Both the written statement and the completed checklist form must be delivered to the Office of Undergraduate Studies within 90 calendar days (exclusive of summer vacation) of the date of the last exam for the term in which the student alleges to have been aggrieved. The failure of a student to file a grievance within the 90-day period will cause him/her to forfeit his/her right to file a grievance under this procedure.

3. When all procedures described in item IV.2 have been completed, the Office of Undergraduate Studies will forward a copy of the grievance to the chair of the Academic Grievance Panel. The chair of the Academic Grievance Panel shall, upon receipt of the grievance, convene the Academic Grievance Panel to review the grievance. The Office of Undergraduate Studies shall retain the original documents.

4. The Academic Grievance Panel will review the grievance and ascertain whether the complaint meets the criteria for “Grounds for Academic Grievances” (III above). The Academic Grievance Panel shall handle each case in a confidential manner.

5. Following the complaint review, the Academic Grievance Panel will make a written recommendation to the Academic Dean for Curriculum to dismiss the grievance, with the grievance identified by complaint number, or (b) make a written recommendation to the Academic Grievance Committee to hear the grievance and arrive at a recommendation. In the case that the Academic Grievance Panel recommends that the grievance be heard by the Academic Grievance Committee, a copy of the recommendation, identified by complaint number, will be forwarded to the Office of Undergraduate Studies.

6. If the Academic Grievance Panel recommends dismissal of the case, the Academic Dean for Curriculum will notify the student, the involved faculty member, the department chair of the involved faculty member, and the involved collegiate dean.

7. If the Academic Grievance Panel recommends a hearing, the Chair of the Academic Grievance Committee shall, upon receipt of the recommendation from the Academic Grievance Panel and all relevant documents, appoint a three-person subcommittee to hold a hearing on the grievance.

8. The subcommittee will be selected from among the members of the Academic Grievance Committee. The subcommittee will consist of a faculty member assigned to serve as the subcommittee chairperson, another faculty member, and a student representative to the subcommittee. The Chair of the Academic Grievance Committee may serve as one of the two faculty representatives to the subcommittee. If possible, the subcommittee shall include members who are not in the same college as the grievant or the faculty member against whom the grievance has been filed.

9. Prior to chairing a hearing (see item 9 below) the chairperson of the subcommittee will contact the student who has filed the grievance as well as the faculty member against whom the grievance has been filed. The chairperson of the subcommittee will provide copies of the grievance to both parties, answer any procedural questions that the parties have, and also ask each party if they have anything to add to the written record prior to the hearing. If additional written materials are submitted prior to the hearing, the chairperson of the subcommittee will distribute copies to all subcommittee members and to all parties to the grievance. The chairperson of the subcommittee will, to the extent possible, handle each case in a confidential manner.

10. The hearing on the grievance will be informal and shall be closed to the public. The chairperson shall take whatever action is necessary to ensure an equitable, orderly and expeditious hearing. All parties to the grievance shall be given an opportunity to be heard. In addition, the chairperson may request the presence of any other person who can supply information pertinent to the grievance. Witnesses shall not be present during the hearing proceedings except when they are called to speak...
before the committee. The parties shall be permitted to question all individuals who are heard by the committee. If any witness is unable to be present at the hearing, the chairperson may, at his/her discretion, accept a written statement from that witness to be presented at the hearing. The parties shall be accorded the right to assistance of counsel of their own choice; however, counsel shall not be permitted to participate actively in the proceedings.

10. Upon conclusion of the hearing, the subcommittee shall reach, by majority vote, a posed solution to the grievance. The subcommittee chairperson shall then formulate the findings in writing and seek to obtain from the parties involved in the grievance signed acceptance of the recommended solution to the grievance. If all parties to the grievance accept the solution posed by the subcommittee, the matter of the grievance will be considered closed when the solution has been implemented. Copies of the written findings and recommended solution will be forwarded by the subcommittee chairperson to both parties to the grievance for acceptance via return receipted certified mail. Each party will be asked to indicate acceptance of the posed solution by signing and returning the letter within 14 calendar days of its date. Failure to respond within 14 calendar days will constitute acceptance. Proper notification of the solution arrived at by the subcommittee will then be mailed by the subcommittee chairperson to the involved faculty member, the department chair of the faculty member, the involved collegiate dean, the Chair of the Academic Grievance Committee, and the Associate Dean for Curriculum. In the event that both parties agree to a change in grade, the Chair of the Academic Grievance Committee will also notify the Office of Records and Registration of the University’s decision.

11. If, after the conclusion of the hearing on the grievance, the chairperson cannot accept the pose solution, the grievance shall be referred, by the subcommittee chairperson, to the Dean of Undergraduate Studies. The subcommittee chairperson shall submit the subcommittee’s recommended solution to the grievance along with all supporting evidence previously submitted to the subcommittee. When grievances are referred in this manner, the Dean of Undergraduate Studies, on behalf of the University, shall make the final decision on the solution to the grievance and will then notify the student, the involved faculty member, the department chair of the involved faculty member, the involved collegiate dean, the Chair of the Academic Grievance Committee and the Associate Dean for Curriculum of the University’s final decision. In the event that the Dean of Undergraduate Studies decides in favor of a change in grade, the Dean of Undergraduate Studies will also notify the Office of Records and Registration of the University’s decision.

12. To the extent permitted by law, the Associate Dean for Curriculum shall keep in confidence all records pertinent to grievances. Records shall be available to succeeding chairpersons of the Academic Grievance Committee.

13. The Academic Grievance Committee shall make every reasonable effort to resolve each grievance by the end of the semester that follows the semester in which the student received the grade that is being contested (summers not included). 14. These procedures can be changed by the Academic Council. Such changes shall not affect any case under consideration at the time of the change. Notification of any changes to the procedure shall be given to the Dean of Undergraduate Studies of the University via the Academic Council.

ACADEMIC MISCONDUCT FOR FORMER STUDENTS

It is possible that an act of academic misconduct will remain undiscovered until after a degree is awarded. In such a case, Clemson University reserves the right to revoke any degree based on new revelations about scholarly issues including, but not restricted to, admissions credentials, all forms of coursework, research, theses, dissertations, or other final projects.

I. Submission of Fraudulent Admissions Credentials

The submission of fraudulent admissions credentials in the student’s application or any other document submitted for admission to Clemson University may result in initiation of action under the Policy and Procedures on Revocation of Academic Degrees.

II. Academic Dishonesty in Coursework

A. In the event that the act is alleged to have occurred within the context of a course and is consistent with the general definition of academic dishonesty presented in Sections I.A of the Academic Integrity Policy, the same procedures in that policy will apply except to academic misconduct listed in III below.

B. Graduate Students—If the resulting penalty is either the assignment of a grade of D or F in a required graduate course, or the issuance of any grade that causes the student not to possess a cumulative B average, both graduate courses and in all courses, action under the Policy and Procedures on Revocation of Academic Degrees may be initiated.

C. Undergraduate Students—If the resulting penalty causes the student to no longer have the necessary credit hours, coursework, or grade average for receiving a degree, action under the Policy and Procedures on Revocation of Academic Degrees may be initiated.

III. Falsification of Data and Plagiarism in Theses, Dissertations, or Other Final Projects

Data falsification, plagiarism (as defined in the Academic Integrity Policy) and other acts of academic dishonesty in a thesis, dissertation, or other final project are serious acts of misconduct. Allegations of this type of misconduct may result in initiation of action under the Policy and Procedures on Revocation of Academic Degrees.

REVOCAITION OF ACADEMIC DEGREES

Preamble

Academic institutions have a critical responsibility to provide an environment that promotes integrity, while at the same time encouraging openness and creativity among scholars. Care must be taken to ensure that honest error and ambiguities of interpretation of scholarly activities are distinguishable from outright misconduct. This policy is applicable to fraudulent or other misconduct in obtaining an academic degree which is so egregious that a mechanism for revoking an academic degree, either graduate or undergraduate, must be undertaken. The Clemson University Board of Trustees has the sole authority to revoke any degree previously awarded.

Definitions

As used herein, the following terms shall apply:

A. When the degree holder was an undergraduate student:
   1. “Dean” shall mean the dean of the academic college where student was enrolled.
   2. “Committee of Investigation and Recommendation” shall be composed of the members of the standing University undergraduate Continuing Enrollment Appeals Committee. An undergraduate student will be appointed to the Committee of Investigation and Recommendation by the President of the Faculty Senate. Any member of the Continuing Enrollment Appeals Committee who is a faculty member in the department which awarded the degree involved shall not be a member of the Committee of Investigation and Recommendation for that particular investigation.
   If there are fewer than three (3) non-disqualified faculty members, the President of the Faculty Senate shall appoint additional faculty members to bring the number of faculty committee members up to three (3). If the President of the Faculty Senate is from the same department that awarded the degree involved, the President-Elect of the Faculty Senate shall appoint the additional member.

B. When the degree holder was a graduate student:
   1. “Dean” shall mean the Dean of the Graduate School.
   2. “Committee of Investigation and Recommendation” shall be composed of the members of the standing University Graduate Admissions and Continuing Enrollment Appeals Committee, except for the Associate Dean of the Graduate School who shall not be a member of the Committee of Investigation and Recommendation. A graduate student will be appointed to the Committee of Investigation and Recommendation by the President of Graduate Student Government within ten (10) calendar days of notification by the President of the Faculty Senate. Any member of the Graduate Admissions and Continuing Enrollment Appeals Committee who is a faculty member in the department which awarded the degree involved shall not be a member of the Committee of Investigation and Recommendation for that particular investigation.
   If there are fewer than three (3) non-disqualified faculty members, the President of the Faculty Senate shall appoint additional faculty members to...
Complaint
An allegation or complaint involving the possibility of misconduct can be raised by anyone. The allegation should be made in writing to the dean.

Initial Review
The dean will conduct the initial review to determine whether or not the allegation has merit. The dean may discuss the matter with the former student's advisory committee (if any) and other faculty as appropriate. The dean may also contact persons outside the University who may be able to provide factual information on the alleged misconduct or who may otherwise have expertise concerning issues involved in the alleged misconduct. If the dean determines that the allegation has no merit, he/she will terminate the investigation. If the dean determines that serious academic misconduct is suspected, the dean will notify the President of the Faculty Senate in writing in a confidential manner. The dean shall also notify the Vice President for Academic Affairs and Provost of the charge but will not discuss any details of the charge.

Committee of Inquiry
The President of the Faculty Senate shall, within (10) calendar days of receipt of the notification from the dean, appoint three (3) faculty members to the Committee of Inquiry and notify the President of Graduate Student Government or the President of the Student Body, as appropriate, who shall appoint a graduate or undergraduate student, as appropriate, to the Committee of Inquiry within ten (10) calendar days of notification. The President of the Faculty Senate shall also notify the degree holder of the formation of a Committee of Inquiry. If the Faculty Senate President is from the same department that awarded the degree involved, the President-Elect of the Faculty Senate shall appoint the Committee of Inquiry. The faculty members will be appointed from departments which did not award the degree involved. The Committee will elect its chairman from the faculty members on the Committee.

For each allegation, the Committee of Inquiry will review the complaint and any other information provided by the dean and determine whether there is sufficient evidence to warrant a formal charge of academic misconduct and further investigation under this policy. While the Committee of Inquiry shall not make a recommendation as to whether a degree should be revoked, the purpose is to provide a review to separate frivolous, unjustified or mistaken allegations from those requiring a more detailed and formal investigation. The Committee of Inquiry will review the evidence and must determine that the alleged misconduct more probably than not occurred in order for the committee to recommend a formal charge and further investigation.

Within thirty (30) calendar days of the formation of the Committee of Inquiry, the Committee of Inquiry will submit a written report to the President of the Faculty Senate. If the Committee of Inquiry's report finds that the investigation should not proceed, the President of the Faculty Senate shall terminate the investigation and notify the appropriate persons. If the Committee of Inquiry's report finds that a formal charge and further investigation are warranted, the President of the Faculty Senate shall, within ten (10) calendar days of receipt of the report of the Committee of Inquiry, send a copy of that report to the dean and to the Committee of Investigation and Recommendation. The President of the Faculty Senate shall also immediately notify the President of Graduate Student Government or President of the Student Body (whichever is appropriate) that a student representative needs to be appointed to the Committee of Investigation and Recommendation. The President of the Faculty Senate shall also notify the Vice President for Academic Affairs and Provost of the Committee of Inquiry's recommendation. No details of the charge will be discussed. Note: A majority vote of the Committee of Inquiry is necessary to recommend that a formal charge and further investigation are warranted. A tie vote means that the investigation is terminated as stated herein.

Notification to Degree Holder
The dean shall issue in writing, within ten (10) calendar days of receipt of the report of the Committee of Inquiry, a formal charge of academic misconduct to the degree holder. This written notice shall detail the factual allegations for the charge and the evidence supporting the charge. This written notice shall also inform the degree holder that if the charges are substantiated, the degree holder's degree could be revoked. This written notice shall also inform the degree holder of his/her right to appear at a hearing as stated in this policy. The dean shall also send with this notice a copy of this Policy and the Student's Handbook of Academic Degrees to the degree holder. This notice shall be delivered to the accredited in person or sent by certified mail, return receipt requested.

Committee of Investigation and Recommendation
The Committee of Investigation and Recommendation shall extend to the degree holder the following process:

1. Notice of the nature of the complaint
2. Notice of the evidence supporting the complaint
3. Notice of the hearing
4. The opportunity to present evidence, including testimony
5. The opportunity to hear the testimony against the degree holder
6. The opportunity to ask questions of all witnesses
7. The opportunity to have an attorney or advisor present at the hearing; however, the role of the attorney or advisor shall be solely to assist the party, and the attorney or advisor shall not be permitted to participate actively in the proceedings.

The degree holder shall not be entitled to know the identity of the person(s) who originally made the complaint unless that person agrees that his/her identity can be revealed.

The chair of the Committee of Investigation and Recommendation shall inform the degree holder of the time and date of the hearing.

The dean or his/her designee shall present the accusation against the degree holder at the hearing and may have one additional representative present during the hearing. Under this section the term “dean” is understood to include the dean’s designee, if such a designation is made.

The degree holder and the dean may submit written materials to the Committee of Investigation and Recommendation prior to the hearing. The chair of the Committee of Investigation and Recommendation shall make available the materials received to the other party and to all committee members.

The hearing before the Committee of Investigation and Recommendation shall be held no sooner than thirty (30) calendar days after receipt of the report of the Committee of Inquiry unless the degree holder and the dean agree to a different date. All matters pertaining to the hearing shall be kept as confidential as possible and the hearing shall be closed to the public. A verbatim record of the hearing will be made and shall be made a part of the hearing record. The degree holder and the dean shall be responsible for having any witnesses they wish to testify in attendance at the hearing. Witnesses will be present only while testifying.

The chair of the Committee of Investigation and Recommendation shall take whatever action is necessary during the hearing to ensure a fair, orderly, and expeditious hearing. No formal rules of evidence will be followed. If any objection is made to any evidence being offered, the decision of the majority of the committee shall govern. Irrelevant, immaterial, or unduly repetitious evidence shall be excluded.

The degree holder and the dean shall be permitted to offer evidence and witnesses pertinent to the issues.

The dean shall present the case against the accused first. The accused shall then present his/her response.

The chair will allow each party to ask questions of the other party and will allow each party to ask questions of the other party's witnesses at the appropriate time during the hearing as determined by the chair. Members of the committee may ask questions of any party or any witness at any time during the hearing.

Within fifteen (15) calendar days of the conclusion of the hearing, the Committee of Investigation and Recommendation shall submit a written report to the Vice President for Academic Affairs and Provost. The report shall contain findings and a recommendation as to whether the degree holder's degree should be revoked. The Committee of Investigation and Recommendation must find clear and convincing evidence that serious academic misconduct has been committed in order to recommend the revocation of the degree holder's degree. If the Committee of Investigation and Recommendation does not find clear and convincing evidence of serious academic misconduct, the Committee of Investigation and Recommendation cannot recommend revocation.
of the degree holder's degree and the matter shall be closed. Note: A majority vote of the Committee of Investigation and Recommendation is necessary to recommend the revocation of a degree holder's degree. This means that a tie vote will result in the matter being closed.

At the same time that the report is sent to the Vice President for Academic Affairs and Provost, the chair of the Committee of Investigation and Recommendation shall send a copy of the report to the degree holder, the Dean, and other appropriate persons involved in the process.

If the Committee of Investigation and Recommendation recommends that the degree holder's degree be revoked, the chair shall also send a complete copy of the hearing record to the Vice President for Academic Affairs and Provost. The hearing record shall consist of the transcript of the hearing and all documents that were submitted to the committee. The chair of the Committee of Investigation and Recommendation shall label which documents were submitted by each party when forwarding this information to the Vice President for Academic Affairs and Provost.

If the Committee of Investigation and Recommendation recommends that the degree holder's degree be revoked, the chair shall also send a copy of the transcript of the hearing to the degree holder and the Dean at the same time that it is sent to the Vice President for Academic Affairs and Provost.

Vice President for Academic Affairs and Provost

If the Committee of Investigation and Recommendation recommends that the degree be revoked, the Vice President for Academic Affairs and Provost shall review the hearing record and the report of the Committee of Investigation and Recommendation. If the Vice President for Academic Affairs and Provost decides that the degree holder's degree should not be revoked, he/she shall notify the degree holder, the Dean, the Committee of Investigation and Recommendation and other appropriate persons involved in the process, in writing, within twenty-one (21) calendar days of receipt of the transcript of the hearing, and the matter shall be closed. If the Vice President for Academic Affairs and Provost decides to recommend that the degree holder's degree should be revoked, the Vice President for Academic Affairs and Provost shall send that recommendation in writing to the President of the University within twenty-one (21) calendar days of receipt of the transcript of the hearing. The Vice President for Academic Affairs and Provost shall send to the President, along with his/her recommendation, the Committee of Investigation and Recommendation's report and the hearing record. The Vice President for Academic Affairs and Provost shall send a copy of his/her recommendation to the degree holder, the Dean, the Committee of Investigation and Recommendation, and other appropriate persons involved in the process.

If the Vice President for Academic Affairs and Provost is disqualified from reviewing the case, the Dean of Undergraduate Studies shall be substituted for the Vice President for Academic Affairs and Provost.

President

If the Vice President for Academic Affairs and Provost recommends to the President that the degree holder's degree should be revoked, the President shall transmit that recommendation along with the report of the Committee of Investigation and Recommendation and the hearing record to the Executive Secretary of the Board of Trustees within thirty (30) calendar days of receipt. If the President wishes to make a recommendation, he/she shall review the recommendation of the Vice President for Academic Affairs and Provost, the report of the Committee of Investigation and Recommendation, and the hearing record and forward his recommendation to the Executive Secretary of the Board of Trustees within thirty (30) calendar days of receiving the recommendation of the Vice President for Academic Affairs and Provost.

Board of Trustees

The Executive Secretary of the Board of Trustees shall send to all trustees the hearing record, the recommendation of the Vice President for Academic Affairs and Provost, the report of the Committee of Investigation and Recommendation, and the recommendation of the President, if any. A majority vote by the Board of Trustees, at a duly constituted Board meeting, is required to revoke an academic degree. The decision of the Board of Trustees shall be final.

Guiding Principles

All actions taken by committees shall be effective by a majority vote.

All investigations, hearings, and actions shall be kept as confidential as possible except for notice of any revocation approved by the Board of Trustees.

A decision not to proceed at any stage of the proceeding set forth in the policy does not necessarily mean that the original complaint was groundless.

For good cause shown, at the request of either party and the approval of the other, the Vice President for Academic Affairs and Provost shall extend any time limit set forth in this policy. Any such time extension shall be communicated in writing to all appropriate parties.

Administrative Action if Degree is Revoked

If a degree is revoked by the Board of Trustees, the former student’s transcript will be modified to reflect that the degree was revoked, and the former student will be informed of the revocation and requested to return the diploma. If the former student was enrolled in a program requiring a thesis or dissertation, all bound copies will be removed from the Clemson University Library. In addition, for doctoral students, University Microfilms, Inc. will be notified and requested to take appropriate action.

Students whose degrees have been revoked may be eligible to reapply for admission according to normal University procedures and policies in effect at the time of reapplication.
III. Academic and Professional Development

Departmental courses approved on an interim basis by the Undergraduate Curriculum Committee addressing the general academic and professional development of the student.................. 2 credits

IV. Mathematical, Scientific, and Technological Literacy

Mathematics ................................................. 3 credits

EX ST 222, 301, MTHSC 101, 102, 106, 108, 203, 207, 301, 309

Natural Science with Lab............................... 4 credits

Mathematics or Natural Science................. 3 credits

Any general education Mathematics or Natural Science course listed above or AGRIC (EN SP) 155, BIOL 201, 203, 210, 220, BIOSS 200, 208, EN SP 200, GEOL 301, PHYS 240, 241, 340, 341, 342, 343

V. Arts and Humanities

Literature.................................................. 3 credits

Any 200-level ENGL literature course, C H S HI90, CHIN 401, FR 300, 304, GER 260, 306, ITAL 301, 302, JAPN 401, 403, RUSS 360, 361, SPAN 311, 313

Non-Literature........................................... 3 credits

VI. Social Sciences

Selected from two different fields ............... 6 credits

ANTH 201, AP EC 202, 257, C H S HI92, HI202, ECON 200, 211, 212, GEOG 101, 103, 106, HIST 101, 102, 122, 124, 172, 173, 193, P A S 301, PO SC 101, 102, 104, PSYCH 201, 250, 275, R S 301, SOC 201, 202

Note: AP EC and ECON are considered the same field.

VII. Cross-Cultural Awareness

A A H 210, A S L 305, ANTH 201, AP EC 205, C H S HI93, HI209, GEOG 103, HIST 173, 193, HUM 309, I S 101, 210, MUSIC 210, 314, P A S 301, PO SC 102, 104, PSYCH 250, REL 101, 102, W S 103, or through a University-approved cross-cultural experience

VIII. Science and Technology in Society

IX. Distributed Competencies

Each degree program will integrate into the program of study competencies in the following areas and provide an integration plan which addresses competencies and implementation: Ethical Judgment; Information Technology; Reasoning, Critical Thinking, and Problem Solving.

GENERAL EDUCATION COMPETENCIES

This course also satisfies the Science and Technology in Society Requirement.

This course also satisfies the Cross-Cultural Awareness Requirement.

Through the General Education experience at Clemson University, undergraduate students will accomplish the following:

Written and Oral Communication Skills

1. Demonstrate effective communication skills appropriate for topic, audience, and occasion
2. Compose coherent, well-supported, and carefully edited speeches, essays, or reports suitable for a range of different audiences and purposes
3. Employ the full range of the composition process, from rough draft to edited product
4. Incorporate both print and electronic resources into speeches, presentations, and written documents

Mathematical, Scientific, and Technological Literacy

1. Demonstrate mathematical literacy through solving problems, communicating concepts, reasoning mathematically, and applying mathematical or statistical methods using multiple representations
2. Develop an understanding of the principles and theories of a natural science and its applications
3. Explain and apply the methods of a natural science in laboratory or experimental settings
4. Apply information technologies to intellectual and professional development
5. Understand the role of science and technology in society
Arts and Humanities
1. Develop an understanding of the history and cultural contexts of the arts and humanities.
2. Examine the arts and humanities as expressions of the human experience
3. Experience and evaluate productions of the performing and visual arts

Social and Cross-Cultural Awareness
1. Develop an understanding of social science methodologies
2. Explore the causes and consequences of human actions
3. Develop an understanding of world cultures in historical and contemporary perspectives
4. Recognize the importance of language in cultural contexts

Reasoning, Critical Thinking, and Problem Solving
1. Summarize, analyze, and evaluate fictional and non-fictional texts
2. Differentiate deductive and inductive reasoning processes
3. Acquire and analyze information to determine its quality and utility
4. Recognize parallels between and among disciplines and apply knowledge, skills, or abilities learned in one discipline to another

Ethical Judgment
1. Demonstrate knowledge of what ethics is and is not, its relation to academic integrity, and its importance as a field of study
2. Demonstrate understanding of common ethical issues and construct a personal framework in which ethical decisions can be made in a systematic, reflective, and responsible way

The General Education competencies may be met in a variety of ways. In some areas, specific courses will be selected from a list of approved courses. In other areas, more flexibility is afforded to each degree program. In all cases, the Undergraduate Curriculum Committee will be the faculty body to define approval criteria, to approve courses as meeting these criteria, and to approve curricula as meeting these general education requirements.
MINORS

Clemson University offers 74 baccalaureate degree programs in the Colleges of Agriculture, Forestry, and Life Sciences; Architecture, Arts, and Humanities; Business and Behavioral Science; Engineering and Science; and Health, Education, and Human Development. Bachelor of Arts degree programs require completion of two semesters of a modern foreign language.

MINORS

A minor consists of at least 15 semester hours, with no fewer than nine credits at the 300 level or higher. A student cannot major and minor in the same field or acquire a minor that is not allowed by the degree program. In programs that require a minor, courses may not be used to fulfill both the major and minor requirements. Courses used to fulfill general education requirements, however, may be counted toward the minor. Students are encouraged to contact the department offering the minor for advising. A student may specify one completed minor on the graduation application to be recorded in his/her academic record. Specific requirements are detailed below.

Accounting

A minor in Accounting requires ACCT 201, 204, 311, 312, and nine hours selected from 300- or 400-level accounting courses. Students planning to pursue the Master of Professional Accountancy degree program should select courses in consultation with the school's graduate coordinator.

Adult/Extension Education

A minor in Adult/Extension Education requires AG ED 403, 440, and nine additional credits selected from the following: AG ED 407, 428, ED F (AG ED, CTE) 482, PRTM 308.

Aerospace Studies

A minor in Aerospace Studies requires A S 109, 110, 209, 210, 309, 310, 409, and 410. Completion of A S Leadership Laboratory and participation in cadet activities are mandatory. Students must compete for an allocation and be accepted into the Professional Officer Course before enrolling in A S 309.

Agricultural Business Management

A minor in Agricultural Business Management requires AP EC 302, 309, 319, and at least two courses selected from AP EC 308, 351, 402, 409, 433, 452, 456, 460.

Agricultural Mechanization and Business

A minor in Agricultural Mechanization and Business requires six credit hours selected from AG M 205, 206, 221, 301, 303; and nine credit hours from AG M 402, 405, 406, 410, 452, 460, 472.

American Sign Language Studies

A minor in American Sign Language Studies requires 15 credit hours in A S L above the 200 level.

Animal and Veterinary Sciences

A minor in Animal and Veterinary Sciences requires AVS 150 and 151; one course selected from AVS 200, 201, 203, 204, 206; and nine hours selected from AVS 301, 310, 370, 375, 410, 415, 453.

Anthropology

A minor in Anthropology requires ANTH 201 and at least six hours selected from ANTH 301, 331, 351, LANG (ANTH) 371. Nine additional hours may be selected from the courses above or from the following: ANTH 320, 403, (W S) 423, 495, 496, 498, CHIN (ANTH) 418, JAPN (ANTH) 417, SOC 433. No more than six credits of ANTH 496 may be counted toward the minor.

Athletic Leadership

A minor in Athletic Leadership requires 17 credit hours arranged as follows: A L 349, 350, 353, 361, 362, 376, and one of the following: A L 371, 372, 373, 374, 375, 377. Students must complete a coaching internship or athletic administrative internship under the direction of the Athletic Leadership Minor Coordinator.

Biochemistry

A minor in Biochemistry requires BIOCH 301, 302, plus at least eleven credits in any other biochemistry course at the 400 level.

Bioengineering

A minor in Bioengineering requires at least 15 credits and must include BIOE 302, 320, 401. The remaining six credits may be chosen from B E 312, BIO E 201, 420, 450, BIOSC 223, 223, 458, 459, C M E 362, M E 302, 303.

Biological Sciences

A minor in Biological Sciences requires 15 credits and may include both a lecture and corresponding laboratory on animal diversity (BIOCH 302/306 or 303/307) and a lecture and corresponding laboratory on plant diversity (BIOCH 304/308 or 305/309); remaining credits (minimum of seven) must be selected from BIOCH, BIOSC, or GEN courses numbered 300 or higher.

Business Administration

A minor in Business Administration requires ACCT 201, ECON 211, 212, FIN 306, LAW 322, MGT 201, MKT 301.

Chemistry

A minor in Chemistry requires CH 101, 102, and 15 additional credits in Chemistry, at least nine of which must be at the 300 or 400 level, selected in consultation with the Department of Chemistry.

Cluster

The Cluster minor allows students a somewhat wider choice of course materials than is possible with the conventional subject-matter minor. The general requirement for the Cluster minor is 15 credits in courses numbered higher than 300, except where noted differently, chosen according to one of the plans below. Courses within the student’s major area may not be included in the Cluster minor.

Group I—Social Sciences: anthropology, economics, geography, history, political science, psychology, sociology

Group II—Life Sciences: biochemistry, biological sciences, genetics, microbiology

Group III—Physical Sciences: chemistry, geology, physics

Group IV—Engineering: courses in all engineering majors plus engineering mechanics and engineering graphics

No course in the 100 series is acceptable toward the minor and no more than six hours in the 200 series are acceptable.

Communication Studies

A minor in Communication Studies requires completion of one of the following options: General—COMM 201 (with a C or better) and 12 additional credits in communication studies, nine of which must be at the 300–400 level. Three hours at the 400 level must be included. Sports Communication—COMM 201 (with a C or better) COMM 325, 326, 327, and 425

Community Recreation, Sport, and Camp Management

A minor in Community Recreation, Sport, and Camp Management requires PRTM 101, 205, 241, and nine additional credits selected from the following: PRTM 304, 305, 307, 308, 317, 321, 352, 380, 392, 398, 407, 421, 445, 446, 455, 498

Computer Science

A minor in Computer Science requires CP SC 212 and 12 additional credits in computer science of which at least nine credits must be at the 300 level or higher.

Crop and Soil Environmental Science

A minor in Crop and Soil Environmental Science requires AGRIC 104, CSENV 202, and nine or more credits at the 300 level or higher.

East Asian Studies

A minor in East Asian Studies requires 15 credits, of which at least six credits must be at the 400 level, distributed as follows: three credits from Group I, six additional credits selected from Group I or from Group II, and six credits from Group III: Group I—CHIN (ANTH) 418, HIST 334, JAPN (ANTH) 417, PO SC 372 Group II—HIST 330, 333, PHIL (CHIN) 312, (CHIN) 313, PO SC 472, 477, REL 314, or any other approved courses selected from department list Group III—E A S 123, JAPN 401, 499, LANG 401, any Chinese or Japanese language course, or any other approved courses selected from department list Courses in Groups II and III must represent a combination of Chinese and Japanese courses.

Economics

A minor in Economics requires ECON 314, 315, and nine additional credits from economics courses numbered 300 or higher.

Education

A minor in Education requires ED 405, ED F 301, 302, 334 or 335, ED SP 370. This minor does not meet the requirements for teacher certification and is not intended for persons who plan to teach in grades K–12.
English
A minor in English requires 15 credits in English above the sophomore level, arranged as follows:

Group I—ENGL 411

Group II—Three credits from ENGL 396, 397, 407, 408, 410, 414, 415, 416, 417, 418, 433, 446, 465

Group III—Three credits from ENGL 398, 399, 425, 426, 427, 455, 463

Group IV—Six additional credits above the sophomore level, including at least three credits from the 400 level

Entomology
A minor in Entomology requires ENT (BIOSC) 301 and 12 credits in entomology courses at the 300 level or higher.

Entrepreneurship
A minor in Entrepreneurship consists of 15 credits including the following: ACC 201, ECON (MGT) 306 or 314, and FIN 306. Six credit hours from one of the following tracks are also required: Planning—MKT (E L E) 314, MGT (E L E) 315, Experimental—E L E 301, 401.

Foundations—ECON (E L E) 321, SOC (E L E, PO SC, PSYCH) 356

Note: Not open to business majors except BA in Economics.

Environmental Engineering
A minor in Environmental Engineering requires at least 15 credits as follows: EE&S 401, at least six credits selected from Group I, and at least three credits from Group II. The remaining three credits may be selected from either group. All courses are to be chosen in consultation with the Department of Environmental Engineering and Science.

Group I—EE&S 402, 410, 411, 430, (B E) 484, 485, 486

Group II—BE 322, CE 342, 447, CH 223, 411, 413, CH E 401, 450, EN SP 200, 400, ENTOX 400, (ENT) 430, GEOL 408, MICRO 305, 413

Environmental Science and Policy
A minor in Environmental Science and Policy requires at least 18 credits including EN SP 200, 400, and at least 12 credits from the following:

Group I—Science and Engineering: at least six credits selected from BIOSC 410, 441, 442, 443, 446, CH 413, CSENV 202, (B E) 408, 475, 490, EE&S 401, 402, 430, 485, ENT 300, ENTOX 400, 421, (ENT) 430, FOR 206, W F B 414

Group II—Resource Management: at least two credits selected from AGRIC (EN SP) 315, B E 464, CM E 433, C R D (AP EC) 357, CSENV 404, ECON 319, EE&S (B E) 484, FOR 315, 406, GEOL 300, W F B 306, (BIOSC) 313, 350, 412, 462

Group III—Environmental Policy and Social Impacts: at least two credits selected from AP EC 433, EN SP 472, HIST 392, HLTH 431, PHIL 345, PSYCH 355, R S (SOC) 401, W F B 430

Equine Business
A minor in Equine Business requires AVS 150, 151, and 204; three hours selected from AVS 301, 310, 370, 375, 410, 415, 453; and six hours selected from the AVS 309, 385, 386, 412, 416, 417.

Film Studies
A minor in Film Studies requires 15 credits in ENGL above the sophomore level, arranged as follows: ENGL 357, 450, (COMM) 451, 452; and one of the following: ART 313, ENGL 348, (THEA) 430, 453, 459, 485, or other course approved by the departmental Director of Undergraduate Studies.

Financial Management

Food Science
A minor in Food Science requires FD SC 214, 401, and eight additional credits in FD SC or NUTR courses numbered 300 or higher.

Forest Products
A minor in Forest Products requires 15 credits which must include at least four courses selected from FOR 341, 400, 441, 442, 444, 447. Other courses at the 300 level or above may be selected with a Forest Products advisor's approval.

Forest Resource Management
A minor in Forest Resource Management requires FOR 205, 206, 305, and at least seven additional credits of forestry courses at the 300 level or higher, excluding FOR 300, 400, 419, 447.

Genetics
A minor in Genetics requires GEN 302, 303, plus at least 11 credits in any other genetics course at the 400 level.

Geography
The Geography minor consists of three credits of geography at the 100 level plus 15 credits of geography at the 300 level. At least one 400-level geography course must be taken. One of the following courses may be taken as part of the 15-credit, upper-level requirements but may not be substituted for the required 400-level geography course: BIOSC 442, SOC (R S) 471.

Geology
A minor in Geology requires GEOL 101/103, 102, and 12 additional credits in geology, at least nine of which must be drawn from 300—400-level geology courses.

Global Politics
A minor in Global Politics requires PO SC 102 or 104; 361; and 12 additional credits from the list below. At least three of these credits must be from Group I and at least three credits from Group II:

With the approval of the Political Science department chair, a maximum of three credits from PO SC 305, 311, (SPAN) 382, (FR) 383, or 410 also may be applied toward a Global Politics minor. Students majoring in Political Science may not minor in Global Politics.

Great Works
The Great Works minor requires G W (ENGL) 301 plus one course from each of the following groups. A minimum of nine credits must be at the 400 level.

Group I—Classical Civilization: Three credits from ENGL 403, 429, (COMM) 491, HIST 354, 355, 450, PHIL 315

Group II—Post-Classical Literature: Three credits from ENGL 408, 411, 414, 416, FR 400, G W 403, SPAN 313, 401

Group III—Philosophy, Religion, and Social Thought: Three credits from ENGL 350, HIST 495, PHIL 316, 317, PO SC 450, REL 301, 302, 401

Group IV—The Arts: Three credits from A A H 423, 424, HUM 301, 302, MUSIC 415, 416, THEA 315, 316

Group V—The Sciences: BIOSC 486, ENGL 427, 434, G W 402, 405

History
A minor in History requires 15 credits in history at the 300 and 400 level. Three credits at the 400 level must be included.

Horticulture
A minor in Horticulture requires HORT 101 and 12 additional credits of horticulture courses (excluding HORT 271, 408, 471), nine credits of which must be at the 300 level or higher.

International Engineering and Science
The minor in International Engineering and Science, open to students in any major in the College of Engineering and Science, requires

1. Completion of a foreign language through at least 202 and
2. Either (a) nine credits of engineering or science courses at the 300 level or higher transferred from a foreign institution during an approved study abroad program of at least three months or (b) an approved international internship or research program in engineering or science of at least three months duration, plus nine credits chosen from 300 level or higher foreign language courses; ECON 310, 412, 413; and PO SC 361, 362, 371, 375, 472, 477, 478.

The international study, internship, or research program must be approved in advance by the Associate Dean for Undergraduate Studies of the College of Engineering and Science.

Legal Studies
A minor in Legal Studies requires 15 credits at the 300—400 level, with at least six credits selected from Group I, at least six credits selected from Group II, and the remaining three credits selected from either group at the student's option:

Group I—HIST 328, 329, 496, PHIL 343, PO SC 437, 438, SOC 290

Group II—ECON 402, LAW 322, 333, 405, 420, 499

Additional courses may be approved by a committee composed of representatives selected by the Dean of the College of Architecture, Arts, and Humanities and by the Dean of the College of Business and Behavioral Science.

Management
A minor in Management requires 15 credits as follows: MGT 201, 307, 310, 318, 390.
Management Information Systems
A minor in Management Information Systems requires 15 credits as follows: ACCT 322 or MGT 318; MGT 411, 452, and two of the following: MGT 312, 454, 455, 456.

Mathematical Sciences
A minor in Mathematical Sciences requires MTHSC 208 and 12 additional credits in mathematical sciences courses numbered 300 or higher.

Microbiology
A minor in Microbiology requires MICRO 305 and eleven additional credits selected from 400-level microbiology courses.

Military Leadership
A minor in Military Leadership requires at least 15 credits including ML 301, 302, 401, 402, and one of the following: HIST 390, NURS 305, or PO SC 428. Completion of Leadership Laboratory and participation in cadet activities are mandatory. (ML 100 and 200 levels may be taken concurrently in the sophomore year.)

Modern Languages
A minor in Modern Languages requires 15 credits from one modern language (Chinese, French, German, Italian, Japanese, or Spanish) from courses at the 300 and 400 levels, including at least one literature course at the 400 level. In French, one of the 300-level courses must be FR 305. FR H438 and H439 and SPAN H438 and H439 may not be used to satisfy requirements for the French or Spanish minor.

Music
A minor in Music requires MUSIC 151, 152, 205, 206, 207, 208, 251, 252; 415 or 416; four semesters of ensemble, totaling four credits, selected from MUSIC 323, 361, 362, 363, 369, 370, 371, 372; and one three-hour music course at 300–400 level.

Natural Resource Economics
A minor in Natural Resource Economics requires AP EC 457; C R D (AP EC) 357; and three courses selected from AP EC 352, 403, 409, 421, 433, 452, 475; C R D (AP EC) 412; ECON 319.

Nonprofit Leadership
A minor in Nonprofit Leadership requires NPL 300, 390, 490, and one course selected from each of the following areas:

Group I—COMM 348, 480, PRTM 308
Group II—ED F 334, 335, PSYCH 340, SOC 350
Group III—HLTH 401, MKT 428, 429, PRTM 421
Group IV—MGT 307, PO SC 427, PSYCH 368
Group V—HLTH 440, PHIL 344, PO SC 321, PRTM 305, 321

Packaging Science
A minor in Packaging Science requires 18 credits and must include PKGSC 102, 202, 204, and 206. The remaining eight credits may be selected from FD SC 401, 402, FOR 441, 442, G C 405, 406, PKGSC 320, 368, 401, 404, 416, 420, 430, 440, 454, 464.

Pan African Studies
A minor in Pan African Studies requires 18 credits as follows: HIST 311 or 312, P A S 301, and 12 credits arranged as follows:

Group I—Three credits from GEOG 330, HIST 337, 338, 339, 438; P A S 310, 498
Group II—Three credits from ENGL 482, 483, PSOC 381, SOC 460, THEA 317
Group III—Three credits in any 300–400-level course in the social sciences approved by the Director of the Pan African Studies Program
Group IV—Three credits in any 300–400-level course in the humanities approved by the Director of the Pan African Studies Program

Courses are to be scheduled in consultation with the appropriate advisors. Pan African Studies advisors will provide all affected advisors with a list of approved courses prior to registration.

Park and Protected Area Management
A minor in Park and Protected Area Management requires PRTM 101, 205, 270 and nine additional credits from PRTM 320, 330, 403, (GEOG) 430, 431, 474.

Philosophy
A minor in Philosophy requires 15 credits in philosophy, nine of which must be at the 300 level or above.

Physics
A minor in Physics requires PHYS 222, 221, 222, and nine additional credits in physics courses at the 300 level or higher.

Plant Pathology
A minor in Plant Pathology requires PL PA 310 and 12 credits from the following: BIOSC (PL PA) 425, 430; P A S 315, GEN (BIOSC, MICRO) 418, 470; (ENGL) 347; or other course approved by the departmental Director of Undergraduate Studies.

Political Science
A minor in Political Science requires PO SC 101 or 102 or 104 plus 15 additional credits at the 300–400 level, nine of which must be selected from three different fields of political science as follows:

American Government—PO SC 403, 405, 416, 436, 442
Comparative Politics—PO SC 371, 372, 466, 471, 476, 477, 478
International Politics—PO SC 361, 362, 363, 375, 429

Political Theory—PO SC 450, 453
Public Policy and Public Administration—PO SC 302, 421, 422, 423, 424

At least one 400-level course must be included. No more than a total of three credits from PO SC 310, 311, 312, 409, 410 may be applied to the requirements for a Political Science minor.

Psychology
A minor in Psychology requires PSYCH 201 and 15 credits from PSYCH 275 and/or 300–400-level psychology courses. At least one 400-level course must be included.

Public Policy
A minor in Public Policy requires PO SC 321, 421, and 430, plus nine credit hours in courses dealing with specific policy domains and approved by the Department of Political Science.

Religion
A minor in Religion requires 15 credits, nine of which must be at the 300-level or above. PHIL 303 and PO SC 407 may be included.

Russian Area Studies
A minor in Russian Area Studies requires 15 credit hours of which three credits must be in Russian language courses at the 200 level or above. The remaining twelve credits are distributed as follows:

Group I—three credits from RUSS 307, 340, 360, 361, 398, 460
Group II—three credits from HIST 385, 386, 387, 494
Group III—three credits from PO SC 471, 473
Group IV—three additional credits from any of the courses listed above

Science and Technology in Society
A minor in Science and Technology in Society requires 15 credits, at least six of which must be at the 400 level. See History Department advisor for list of approved courses.

Screenwriting
A minor in Screenwriting requires 15 credits in ENGL above the sophomore level as follows: ENGL 348, 357, 448 (six credits); and one of the following: ENGL 450, (COMM) 451, 452, 453, THEA (ENGL) 347, or other course approved by the departmental Director of Undergraduate Studies.

Sociology
A minor in Sociology requires SOC 201 and 15 credits from sociology and rural sociology courses numbered 300 or higher. At least one 400-level course must be included.

Spanish-American Area Studies
A minor in Spanish-American Area Studies requires the equivalent of SPAN 202, ECON 410, plus 12 credits distributed as follows: six credits from GEOG 340, HIST 340, 341, 342, 440; and six credits from PO SC (SPAN) 382, SPAN 308, 311, 403, 422, 435.

Textiles
A minor in Textiles requires 15 credits from the following: TEXT 201, 202, 460, and any other approved textile course such as TEXT 308, 314, 416, 426, 428, 470, 472, 475.

Theatre
A minor in Theatre requires 20 credits arranged as follows: three credits of dramatic literature and history (ENGL 410, 411, 429, (THEA) 430, THEA (ENGL) 347); three credits of theatre history (THEA 315, 316, 317); six credits in a sequence (THEA 278/479, 315/316, (ENGL) 347/447, 372/472, 376/476, 377/477 or 487 or 497); six credits in THEA at the 300–400 level; and two credits of THEA 279.
Therapeutic Recreation
A minor in Therapeutic Recreation requires PRTM 101, 205, 311, 417, and at least two courses selected from PRTM 210, 308, 309, 317, 416, 418, 420.

Travel and Tourism
A minor in Travel and Tourism requires PRTM 101, 205, 342, and nine additional credits from PRTM 334, 344, 349, 392, 398, (GEOG) 430, 441, 443, 444, 445, 446, 447, 498.

Turfgrass
A minor in Turfgrass requires CSENV 202, HORT 212, 412, and two of the following: AG M 402, HORT (CSENV) 433, PL PA (ENT) 406.

Urban Forestry
A minor in Urban Forestry requires a minimum of 16 credits, distributed as follows:
Group I—FOR (HORT) 427, 450, 480, HORT 208
Group II—A minimum of three credits selected from CRP 401, HORT 308
Group III—A minimum of three credits selected from ENT 401 or HORT 303

Wildlife and Fisheries Biology
A minor in Wildlife and Fisheries Biology requires W FB 300; 350; six additional hours selected from 300-level or higher W FB courses, except 463; and three credits from AP EC 475, BIOSC 464, 465, 470, 472, 477, ENTOX 400, FOR 415.

Women’s Studies
A minor in Women’s Studies requires 15 credits at the 300 and 400 level, distributed as follows:
Group I—Six credits: W S 301 and any 400-level W S course
Group II—Six credits from courses which deal entirely with women and gender issues: COMM 455, ENGL 380, HIST 318, PHIL (W S) 349, PSYCH 308, SOC 461, SPAN 403, and any additional courses approved for Group II
Group III—Three credits may be earned by taking any approved Women’s Studies minor course. Courses selected in Groups II and III must represent at least two disciplines. Courses are to be scheduled in consultation with the appropriate advisor. The Women’s Studies Director will provide all affected advisors with a list of approved courses prior to registration each semester.

Writing
A minor in Writing requires 15 credits as follows:
Business and Technical Option—AP EC 351 or G C 104, CP SC 120, ENGL 304 or 314, 490, 495
Journalism Option—ENGL 231, 333, 334, 335; one of the following: AP EC 351, COMM 250, CP SC 120, CTE 468, ENGL 217, 304, 312, 314, G C 104, PHIL 102, and any course approved by the Chair of the English Department
Writing Pedagogy Option—ENGL 312, 400, 401, 485, and any 300- or 400-level writing course offered by the Department of English

Creative Writing Options
Drama—ENGL (THEA) 430, THEA (ENGL) 347, (ENGL) 447 (six credits), and one of the following: ENGL 312, 410, 411
Fiction—ENGL 345, 432, 445 (six credits), and one of the following: ENGL 312, 418, 425, 426, 428
Poetry—ENGL 346, 431, 446 (six credits), and one of the following: ENGL 312, 416, 417, 428, 444
COLLEGE OF AGRICULTURE, FORESTRY, AND LIFE SCIENCES

The mission of the College of Agriculture, Forestry, and Life Sciences is to provide teaching, research, and service in agriculture, forestry, and life sciences that will benefit the citizens of South Carolina and the nation. The College of Agriculture, Forestry, and Life Sciences serves more than 2,700 graduate and undergraduate students.

The ability to understand and manipulate the molecular structure of biological systems while at the same time understanding their practical management offers immense potential to improve our world, whether it is to improve foods, building products, the environment, or our health. The College of Agriculture, Forestry, and Life Sciences is using the same expertise to produce more food on a shrinking globe; package environmentally sound products; grow better foods to fight breast cancer, prevent heart disease, and increase dairy production; increase timber production and provide new fuels; and develop businesses and promote a “green” society.

To assist students in achieving these goals, the William B. Bookhart, Jr., Student Services Center provides academic advising and developmental services to promote success for students in the related degree programs. These services involve recruitment and retention, academic advising, multicultural affairs, study abroad, career development, and placement.

The College of Agriculture, Forestry, and Life Sciences is impacting the world one graduate at a time—from cell research to food production to packaged materials to the globe—developing partnerships for the future to make the world greener, healthier, tastier, and wealthier.

AGRICULTURAL EDUCATION

Bachelor of Science

Agricultural Education provides broad preparation in agricultural sciences and professional education, including communications and human relations skills. In addition to required courses, students may select a minor. (See page 58.)

The Bachelor’s degree prepares students for professional education positions in the mainstream of teaching, cooperative extension service, and government agricultural agencies. The Agricultural Education degree also prepares students for other educational work such as agricultural missionary, public relations, and training officers in agricultural industry.

Freshman Year

First Semester
1. AG ED 102 Agric. Ed. Freshman Seminar
3. BIOL 103 General Biology I
1. BIOL 105 General Biology Lab. I
3. PHIL 102 Introduction to Logic
2. Emphasis Area Requirement1
3-4. Mathematics Requirement2
16-17

Second Semester
1. AG ED 100 Orientation and Field Experience
3. AG ED 204 Applied Agriculture Calculations
3. AG ED 355 Team and Organizational Leadership in Food and Fibers Systems
1. BIOL 104 General Biology II
1. BIOL 106 General Biology Lab. II
3. ENGL 103 Accelerated Composition
15

Sophomore Year

First Semester
3. AG ED 201 Intro. to Agricultural Education
3. AG ED 204 Applied Agriculture Calculations
3. AG ED 355 Team and Organizational Leadership in Food and Fibers Systems
1. BIOL 104 General Biology II
1. BIOL 106 General Biology Lab. II
3. ENGL 103 Accelerated Composition
15

Second Semester
3. AG ED 203 Teaching Agriculture
3. AG M 205 Principles of Fabrication
4. CH 105 Chemistry in Context I
1. HORT 212 Intro. to Turfgrass Culture
1. HORT 213 Turfgrass Culture Lab.
3. Arts and Humanities (Literature) Requirement1
17

Junior Year

First Semester
2. AG M 221 Surveying
3. ANTH 201 Introduction to Anthropology
4. CSENV 202 Soils
3. ED F 302 Educational Psychology
3. HORT 303 Landscape Plants
18

Second Semester
1. AG ED 302 Agric. Education Junior Seminar
3. COMM 150 Intro. to Human Comm. or
3. COMM 250 Public Speaking
3. HORT 305 Plant Propagation
3. Advanced Writing Requirement3
6. Emphasis Area Requirement1
16

Senior Year

First Semester
3. AG ED 401 Instructional Methods in Ag. Ed.
3. AG ED 404 Biotechnology in Agricultural Ed.
6. Emphasis Area Requirement1
12

Second Semester
12 - AG ED 406 Directed Teaching
2. Emphasis Area Requirement1
14

124-125 Total Semester Hours

*ASee advisor. Select one of the following emphasis areas by the end of the sophomore year: Teacher Certification, Leadership, Public Relations, and Training.

MTHSC 101, 102, 106, or 203

*See General Education Requirements.

AGRICULTURAL MECHANIZATION AND BUSINESS

Bachelor of Science

The Agricultural Mechanization and Business major provides a program for students who desire training in areas relevant to dynamic agricultural enterprise. The program is organized with strength in both business management and technical support of agriculture and agribusiness. To produce well-rounded individuals with good communication skills, the curriculum includes courses in the humanities, social sciences, English composition, and public speaking.

Graduates in Agricultural Mechanization and Business find meaningful and remunerative employment in a variety of situations directly and indirectly related to agricultural production, processing, marketing, and the many services connected therewith. Farming and technical sales in the agricultural, industrial, and heavy equipment industries are frequently chosen careers.

By completing this curriculum, graduates will have fulfilled the requirements for an Agricultural Business Management minor or other selected minor. Contact the Enrolled Student Services Office to have the minor recorded.

Additional information is available from the departmental offices or can be found at www.clemson.edu/agbioeng/agmech/index.htm.

Freshman Year

First Semester
3. AG ED 200 Agricultural Applications of Educational Technology
1. AG M 101 Intro. to Ag. Mech. and Business
3. BIOL 103 General Biology I
1. BIOL 105 General Biology Lab. I
4. CH 105 Chemistry in Context I
3. MTHSC 102 Intro. to Mathematical Analysis
15

Second Semester
3. BIOL 104 General Biology II
1. BIOL 106 General Biology Lab. II
4. CH 106 Chemistry in Context II
3. ENGL 103 Accelerated Composition
3. EX ST 301 Introductory Statistics
1. Elective
15
Sophomore Year
First Semester
1 - AG M 205 Principles of Fabrication
2 - AP EC 202 Agricultural Economics
3 - PHYS 200 Introductory Physics or
   3 - PHYS 207 General Physics I and
   1 - PHYS 209 General Physics I Lab.
3 - Arts and Humanities (Literature) Requirement1
2 - Elective
123–126 Total Semester Hours

Second Semester
1 - ACCT 201 Financial Accounting Concepts
2 - AG M 206 Machinary Management
3 - AG M 303 Calculations for Mechanized Agric.
3 - COMM 250 Public Speaking
2 - E G 209 Intro. to Engr./Comp. Graphics
3 - Minor Requirement2
17

Junior Year
First Semester
2 - AG M 221 Surveying
2 - AG M 301 Soil and Water Conservation
3 - AG M 460 Electrical Systems
3 - AP EC 302 Economics of Farm Management
3 - ENGL 304 Business Writing or
   3 - ENGL 314 Technical Writing
3 - Minor Requirement2
16

Second Semester
3 - AG M 406 Mechanical and Hydraulic Systems
3 - AP EC 309 Econ. of Agricultural Marketing
4 - CSENV 202 Soils
3 - Arts and Humanities (Non-Lit.) Requirement1
3 - Minor Requirement2
16

Senior Year
First Semester
3 - AG M 402 Drainage, Irrigation and Water Management
3 - AP EC 319 Agribusiness Management
3 - Agriculture Requirement1
3 - Social Science Requirement1
12

Second Semester
3 - AG M 405 Agricultural Structures and Environmental Control
3 - AG M 410 Precision Agriculture Technology
3 - AG M 452 Mobile Power
3 - AG M 472 Capstone
3 - Minor Requirement2
15

121 Total Semester Hours

ANIMAL AND VETERINARY SCIENCES

Bachelor of Science
The Animal and Veterinary Sciences curriculum provides students with both a basic and applied understanding of the scientific principles needed for successful careers in the scientific, technical, and business phases of livestock and poultry production, processing, and marketing. Strengths of this program include extensive hands-on instruction at Clemson’s five animal farms, personalized advising, and the opportunity for valued-added experiences including involvement in research, teaching, extension, student travel, and internships. Students choose from three concentrations.

The Animal Agribusiness Concentration prepares students for careers in the many facets of the animal industries including production, sales and marketing, business management, advertising, and extension. The Equine Business Concentration prepares students for professions such as trainers, managers, riding instructors, sales or media representatives, breed association representatives or other equine entrepreneurial careers such as owners of tack shops, boarding facilities, or riding schools.

The Preveterinary and Science Concentration prepares students to meet the requirements for most veterinary schools, graduate schools, and graduate and dental schools in the United States, as well as in South Carolina.

College of Agriculture, Forestry, and Life Sciences

Sophomore Year
First Semester
3 - AG M 205 Principles of Fabrication
3 - AP EC 202 Agricultural Economics
4 - PHYS 200 Introductory Physics or
   3 - PHYS 207 General Physics I and
   1 - PHYS 209 General Physics I Lab.
3 - Arts and Humanities (Literature) Requirement1
2 - Elective
15

Second Semester
3 - ACCT 201 Financial Accounting Concepts
3 - AP EC 202 Agricultural Economics
3 - AVS 312 Forages and Grazing Systems or
   3 - CSENV 423 Field Crops—Forages
3 - Arts and Humanities (Literature) Requirement1
2 - AVS Techniques Requirement2

Select AVS 302, 309, 311, or 323. One of these courses in combination with AVS 406 will satisfy the General Education Oral Communication Requirement.
ACCT 201, AP EC 202 or ECON 211, BIOSC 222, 223, CSENV 202, ECON 212, MGT 201, SPAN 101, 102, or any graded (not pass/fail) 300–400 level course with advisor's consent.
May be taken either semester of the junior year
AVS 360, 441, 442, 443, or 491

1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2AVS 200, 201, 203, 206, or 209
3Select AVS 302, 309, 311, or 323. One of these courses in combination with AVS 406 will satisfy the General Education Oral Communication Requirement.
4ACCT 201, AP EC 202 or ECON 211, BIOSC 222, 223, CSENV 202, ECON 212, MGT 201, SPAN 101, 102, or any graded (not pass/fail) 300–400 level course with advisor's consent.
5May be taken either semester of the junior year
6AVS 360, 441, 442, 443, or 491
APPLIED ECONOMICS AND STATISTICS

Bachelor of Science

The Applied Economics and Statistics curriculum helps the student build a strong understanding of economic principles as applied in agribusiness, community and economic development, and other fields. Courses in applied statistics and quantitative methods help build decision-making and problem-solving skills and acquaint the student with tools for data analysis.

In the Agribusiness Emphasis Area, core courses focus on agribusiness management, leadership, marketing and sales, finance, accounting, and other business skill development. Employment opportunities for Agribusiness graduates are many and diverse. Private sector opportunities include agribusiness management, banking, finance, sales, marketing, and public relations. Public sector opportunities include positions in organizations which promote food, agriculture, and natural resource interests; government agencies; and educational institutions.

In the Community and Economic Development Concentration, core courses focus on community development methods, regional economic development, leadership, experiential learning, communication skills, and behavioral science principles. Employment opportunities for Community and Economic Development graduates include positions in social science administration, management, and research. Other careers include community development and economic development specialist positions with local, county, and state governments. Additional opportunities exist in a variety of agencies, research and consulting firms, foundations and councils, financial institutions, public and private utilities, and organizations looking for entrepreneurial skills.

In both plans of study, there is an increasing emphasis on globalization and information technology. Students are encouraged to participate on a creative inquiry student research team and to take advantage of an internship and/or study abroad opportunity. Both the Agribusiness and Community and Economic Development study options provide an excellent background for professional or graduate study in several disciplines.

For students interested in economics and natural resources, the Department of Applied Economics and Statistics also administers the Natural Resource and Economic Policy Concentration within the Environmental and Natural Resources degree program. See page 47 for program details.

AGRIBUSINESS EMPHASIS AREA

Freshman Year

First Semester
3 - AP EC 205 Agriculture and Society
2 - C U 101 University Success Skills
3 - MTHSC 102 Intro. to Mathematical Analysis
4 - Natural Science Requirement
3 - Oral Communication Requirement

Second Semester
3 - AP EC 202 Agricultural Economics
3 - ENGL 103 Accelerated Composition

BIOCHEMISTRY

Bachelor of Science

Biochemistry is the study of the molecular basis of life. To comprehend current biochemical information and make future contributions to our molecular understanding of life processes, students must obtain a broad background in biology and a firm foundation in chemistry, mathematics, and physics. This is the basis of the biochemistry curriculum.

The program provides an excellent educational background for professional school (medicine, dentistry, or veterinary medicine) and graduate school in biochemistry, molecular biology, or another biological science discipline. Graduates will find employment opportunities in the research and service programs of universities, medical schools, hospitals, research institutes, and industrial and government laboratories.

Freshman Year
First Semester
1 - BIOCH 103 Careers in Biochem. and Genetics
2 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
4 - MTHSC 106 Calculus of One Variable I

Second Semester
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
4 - MTHSC 108 Calculus of One Variable II

Sophomore Year
First Semester
3 - CH 223 Organic Chemistry
1 - CH 227 Organic Chemistry Lab.
3 - GEN 302 Molecular and General Genetics
1 - GEN 303 Molecular and General Genetics Lab.
2 - PHYS 122 Physics with Calculus I
1 - PHYS 124 Physics Lab. I
3 - Advanced Mathematics Requirement
15-16

Second Semester
3 - BIOCH 301 Molecular Biochemistry
3 - CH 224 Organic Chemistry
1 - CH 228 Organic Chemistry Lab.
1 - CH 228 Organic Chemistry Lab. 2
3 - COMM 150 Intro. to Human Comm. or
1 - COMM 250 Public Speaking
3 - PHYS 221 Physics with Calculus II
1 - PHYS 223 Physics Lab. II
3 - Arts and Humanities (Literature) Requirement

Junior Year
First Semester
3 - BIOCH 431 Physical Approach to Biochem.
2 - BIOCH 433 General Biochemistry Lab. I
3 - CH 330 Introduction to Physical Chemistry
3 - ENGL 314 Technical Writing
3 - Science Requirement
2 - Elective
16

Second Semester
3 - BIOCH 432 Biochemistry of Metabolism
1 - BIOCH 434 General Biochemistry Lab. II
3 - BIOCH 436 Nucleic Acid and Protein Biochem.
3 - PHIL 326 Science and Values
3 - Science Requirement
14

Senior Year
First Semester
3 - BIOCH 491 Directed Research in Biochemistry
3 - BIOL 461 Cont. Biochemistry
3 - GEN (BIOCH) 440 Bioinformatics
3 - Social Science Requirement
4 - Elective
16

Second Semester
3 - BIOCH 491 Directed Research in Biochemistry
2 - BIOCH 493 Senior Seminar
3 - Social Science Requirement
6 - Elective
14

122-123 Total Semester Hours

Notes:
1. See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2. CH 331 may be substituted.
3. A student is allowed to enroll in science and mathematics courses only when all prerequisites have been passed with a grade of C or higher.
4. A minimum grade of C is required in all science and mathematics courses. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any science or mathematics course.

BIOLGICAL SCIENCES

Bachelor of Science

Biology encompasses the broad spectrum of the modern life sciences, including the study of all aspects of life from the structure and function of the whole organism down to the subcellular levels and up through the interactions of organisms to the integrated existence of life on the entire planet. Descriptive, structural, functional, and evolutionary questions are explored through the hierarchy of the organization of life. Applications of current advances to the health and well-being of man and society, to nature and the continuation of earth as a balanced ecosystem, and to an appreciation of the place of natural science in our cultural heritage receive emphasis.

Majors in Biological Sciences receive classroom, laboratory, and field training in biology with an emphasis on chemistry, mathematics, and physics as necessary tools. The Bachelor of Science in Biological Sciences curriculum prepares students for graduate study in any of the life science areas (such as agricultural sciences, biochemistry, botany, cell and molecular biology, conservation, ecology and environmental science, entomology, forestry, genetics, industrial and regulatory biology, microbiology, morphology, physiology, wildlife biology, and zoology; for the health professions (medicine, dentistry, etc.), veterinary medicine; and for science teaching.

Combined Bachelor of Science in Biological Sciences/Master of Science in Bioengineering

Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. See Academic Regulations in this catalog for enrollment guidelines and procedures. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Biological Sciences or Bioengineering as early as possible in their undergraduate program as a number of required courses have prerequisites not normally taken by Biological Sciences majors.

Freshman Year
First Semester
5 - BIOL 110 Principles of Biology I
1 - BIOSC 101 Frontiers in Biology I
4 - CH 101 General Chemistry
3 - COMM 150 Intro. to Human Communication
4 - MTHSC 106 Calculus of One Variable I

Second Semester
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
4 - MTHSC 108 Calculus of One Variable II
17

Notes:
1. See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2. CH 331 may be substituted.
3. A student is allowed to enroll in science and mathematics courses only when all prerequisites have been passed with a grade of C or higher.
4. A minimum grade of C is required in all science and mathematics courses. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any science or mathematics course.

1A minor is required and must be selected from the following: Biochemistry; Biological Sciences; Chemistry; Community Recreation, Sport, and Camp Management; Crop and Soil Environmental Science; Environmental Science and Policy; Forest Resource Management; Geology; Horticulture; Legal Studies; Microbiology; Natural Resource Economics; Non-profit Leadership; Park and Protected Area Management; Therapeutic Recreation; Travel and Tourism; Urban Forestry; Wildlife and Fisheries Biology.
2See advisor.

FOOD SCIENCE
Bachelor of Science
Food Science majors apply principles of basic and applied sciences to the design, creation, manufacture, packaging, distribution, and utilization of safe, nutritious, and enjoyable foods and food products. The curriculum allows flexibility for concentrating in one of two areas.

In the Food Science and Technology Concentration, students may emphasize business, culinary science (one of three national programs that have been approved by the Research Chef’s Association as Culinary16), engineering, food packaging, and additional sciences that complement requirements of the Institute of Food Technologists.

The Nutrition and Dietetics Concentration emphasizes nutrition and related areas. It is currently initially accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association.

Food processing industries, ingredient manufacturers, and packaging suppliers employ graduates in new food product development, quality assurance, production management, and technical sales. State and federal agencies also need graduates for food safety and regulatory positions. With the Nutrition and Dietetics Concentration, employment opportunities include dietitians, nutritionists, consultants, and food specialists. Placement rates are high for all of these fields, and graduates are also well prepared to pursue graduate study in many areas.

The Department of Food Science and Human Nutrition also offers an accelerated five-year combined bachelor’s/master’s program that allows students to count up to twelve hours of graduate credit toward both the BS degree in Food Science and the MS degree in Food, Nutrition, and Culinary Sciences. Details are available from the Department of Food Science and Human Nutrition or at www.clemson.edu/foodscience.

FOREST RESOURCE MANAGEMENT

Bachelor of Science

The Forest Resource Management curriculum combines a broad education in the arts and sciences with applied forest sciences. This combination provides the necessary foundation for the scientific management of forest resources, products, and services.

Foresters are qualified for a broad spectrum of employment opportunities in the public and private sectors. They may be engaged as managers, administrators, or owners of forest lands or forest-based businesses; as technical specialists in the production of timber, useable water, wildlife, and aesthetic values, and in the recreational use of the forest; or as professionals in other areas where the conservation of natural resources is a concern.

Foresters earning advanced degrees find employment opportunities in the public and private sectors. They may be engaged as managers, administrators, or owners of forest lands or forest-based businesses; as technical specialists in the production of timber, useable water, wildlife, and aesthetic values, and in the recreational use of the forest; or as professionals in other areas where the conservation of natural resources is a concern.

The curriculum, accredited by the Society of American Foresters, provides a strong program in the basic knowledge and skills required of a professional forester. Forest Resource Management majors will select a minor. (See page 58.) The curriculum also provides the necessary prerequisites for graduate study.

For students interested in conservation biology, water, and natural resources, the Department of Forestry and Natural Resources also administers the Conservation Biology and Natural Resources Management Concentrations within the Environmental and Natural Resources degree program. See page 48 for program details.

130 Total Semester Hours

1CH 101 and 102 may be substituted; however, students selecting this option may be required to use elective hours to satisfy the General Education Science and Technology in Society Requirement.

3See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement. (Note: Social Science Requirement must be in an area other than economics or applied economics.)

4AP EC 257, ECON 200, 211, or 212

To be selected by the middle of the sophomore year

GENETICS

Bachelor of Science

Genetics is the study of heredity. Genetics research takes many forms, from the study of heredity at the level of individual molecules to study at the level of cells and chromosomes, individuals, or populations. To comprehend current genetic information and to make future contributions to our molecular understanding of life processes, students must obtain a broad background in biology and a firm foundation in chemistry and mathematics. This is the basis of the genetics curriculum.

A degree in Genetics is a strong preparation for many careers. The degree provides an excellent foundation for medical, veterinary, or pharmacy school as well as graduate research in any discipline related to biology, including bioinformatics, forensic technology, and genetic counseling. Because of the increasing emphasis on genetics in everyday life, a Bachelor of Science in Genetics can also be a direct path to a career in the emerging biotechnology industries (pharmaceuticals, agricultural technologies, biomimetic minerals) either in research, sales, or business operations. Combined with a law degree, a genetics bachelor of science is a good background for a career as a patent attorney.

Freshman Year

First Semester
5 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
1 - GEN 101 Careers in Biochem. and Genetics
4 - MTHSC 106 Calculus of One Variable
14

Second Semester
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
4 - MTHSC 108 Calculus of One Variable II
16
Sophomore Year

First Semester
3 - CH 223 Organic Chemistry
1 - CH 227 Organic Chemistry Lab.
3 - COMM 150 Intro. to Human Comm. or
3 - COMM 250 Public Speaking
3 - GEN 302 Molecular and General Genetics
3 - PHYS 122 Physics with Calculus I
1 - PHYS 124 Physics Lab. I

Second Semester
3 - BIOCH 301 Molecular Biochemistry
1 - BIOCH 302 Molecular Biochemistry Lab.
3 - CH 224 Organic Chemistry
1 - CH 228 Organic Chemistry Lab.
3 - EX ST 301 Introductory Statistics
3 - Arts and Humanities (Literature) Requirement
3 - Social Science Requirement

Junior Year

First Semester
3 - BIOSC 461 Cell Biology
2 - BIOSC 462 Cell Biology Lab.
3 - ENGL 314 Technical Writing
3 - GEN 410 Fundamentals of Genetics I
1 - GEN 411 Fundamentals of Genetics I Lab.
3 - Science Requirement

Second Semester
3 - GEN 420 Fundamentals of Genetics II
1 - GEN 421 Fundamentals of Genetics II Lab.
3 - GEN (BIOCH) 440 Bioinformatics
3 - PHIL 326 Science and Values
3 - Genetics Requirement
3 - Elective

Senior Year

First Semester
3 - GEN 450 Comparative Genetics
3 - GEN 491 Directed Research in Genetics
3 - Science Requirement
3 - Social Science Requirement
3 - Elective

Second Semester
3 - GEN 491 Directed Research in Genetics
2 - GEN 493 Senior Seminar
6 - Genetics Requirement
4 - Elective

122 Total Semester Hours

Second Semester
4 - CH 105 Chemistry in Context I
3 - HORT 304 Annuals and Perennials
3 - HORT 305 Plant Propagation
1 - HORT 306 Plant Propagation Techniques Lab.
3 - Arts and Humanities (Literature) Requirement

Summer
3 - HORT 271 Internship or
3 - HORT 471 Advanced Internship

Junior Year

First Semester
4 - CSENV 202 Soils
3 - Advanced Writing Requirement
3 - Horticulture Specialization Requirement
3 - Oral Communication Requirement
3 - Spanish Language Requirement

Second Semester
3 - BIOCH 401 Plant Physiology
1 - BIOCH 402 Plant Physiology Lab.
1 - HORT 409 Seminar
3 - Applied Science Requirement
3 - Business Requirement
3 - Horticulture Specialization Requirement

Senior Year

First Semester
6 - Applied Science Requirement
3 - Business Requirement
6 - Horticulture Specialization Requirement

Second Semester
3 - Applied Science Requirement
6 - Horticulture Specialization Requirement
4 - Laboratory Science Requirement
1 - Elective

120 Total Semester Hours

Notes:
2. Two semesters of a foreign language are strongly recommended.
3. To be taken over two semesters, preferably with the same faculty member.

Horticulture

Bachelor of Science

Horticulture connects plants and people to improve our world, be it through the enhancement of the foods we eat, the creation of healthy natural living spaces, the economic and aesthetic enhancement of our homes and communities, or the application of green solutions to the challenges of environmental quality. The plants of horticulture are the foundation of human and environmental well-being, and it is horticulture professionals who have the knowledge, skills, and passion to utilize those plants for the betterment of humankind.

The Horticulture degree program includes courses in science, mathematics, business, leadership, law, and communication combined with a strong foundation in horticultural sciences and arts. The curriculum provides the flexibility to choose courses within those categories that best support the student's personal interests, goals, and success. Career opportunities are endless.

Students work closely with faculty in creative inquiry groups to investigate and implement solutions to real problems. Internships are excellent opportunities to learn and explore potential careers.

Freshman Year

First Semester
3 - BIOL 103 General Biology I
1 - BIOL 105 General Biology Lab. I
3 - HORT 101 Horticulture
3 - MTHSC 102 Intro. to Mathematical Analysis
3 - Arts and Humanities (Non-Lit.) Requirement
3 - Social Science Requirement

Second Semester
3 - ENGL 103 Accelerated Composition
1 - HORT 102 Experience Horticulture
3 - MTHSC 101 Essential Math. for Informed Soc.
4 - Laboratory Science Requirement
3 - Social Science Requirement

Sophomore Year

First Semester
4 - CH 105 Chemistry in Context I
3 - HORT 303 Landscape Plants
3 - Business Requirement
4 - Plant Biology Requirement

Second Semester
4 - CH 106 Chemistry in Context II
3 - HORT 304 Annuals and Perennials
3 - HORT 305 Plant Propagation
1 - HORT 306 Plant Propagation Techniques Lab.
3 - Arts and Humanities (Literature) Requirement

Summer
3 - HORT 271 Internship or
3 - HORT 471 Advanced Internship
MICROBIOLOGY
Bachelor of Science

Microbiology deals with the study of bacteria, viruses, yeasts, filamentous fungi, protozoa, and unicellular algae. Microbiologists seek to describe these organisms in terms of their structures, functions, and processes of reproduction, growth, and death at both the cellular and molecular levels. They are also concerned with their ecology, particularly in regard to their pathological effects on man, and with their economic importance.

The Microbiology major provides a thorough training in the basic microbiological skills. Further, students receive instruction in mathematics, physics, chemistry, and biochemistry, all essential to the training of a modern microbiologist. Students can prepare for a variety of careers through a wide choice of electives. The Microbiology curriculum with a Biomedicine Concentration is recommended for students planning postgraduate programs. Microbiology graduates may enter graduate school in microbiology, biochemistry, bioengineering, or related disciplines; they may enter medical or dental schools or pursue careers in one of the many industries or public service departments dependent upon microbiology. Some of these are the fermentation and drug industries, medical and public health microbiology, various food industries, and agriculture.

Microbiology majors planning to apply for admission to a medical or dental school should inform their advisors immediately upon entering the program.

Freshman Year
First Semester
5 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
3 - COMM 150 Intro. to Human Communication
1 - MICRO 101 Microbes and Human Affairs
4 - MTHSC 106 Calculus of One Variable
17
Second Semester
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
3 - Elective
3 - Mathematics Requirement
15-16

Sophomore Year
First Semester
3 - CH 223 Organic Chemistry
1 - CH 227 Organic Chemistry Lab.
4 - MICRO 305 General Microbiology

16

Total Semester Hours
124–126

Students planning on applying to medical/dental schools should take PHYS 208 and 210 during the second semester of the junior year.
PACKAGING SCIENCE

Bachelor of Science

The Bachelor of Science degree in Packaging Science prepares students for careers in industries producing and utilizing packages for all types of products. Packaging is an essential part of industrialized economies, protecting, preserving, and helping to market products. The field of packaging is highly competitive and highly innovative, requiring an ever-increasing number of professional positions.

Opportunities for employment include a wide variety of career paths such as manufacturing, marketing, sales, design, purchasing, quality assurance, and customer services. Most career opportunities are in positions requiring technical knowledge combined with marketing and management skills.

The core curriculum assures graduates of having the skills and knowledge required by most entry-level packaging positions. Emphasis area choices or approved minors allow students to select courses to improve career preparation for specific industry segments, including distribution and transportation, engineering technology, food and health care packaging, graphic communications, materials, business administration, entrepreneurship, environmental engineering, environmental science and policy, and management.

Students changing majors to Packaging Science must have at least a 2.0 cumulative grade-point ratio.

Freshman Year

First Semester
1 - BIOL 103 General Biology I
1 - CH 105 General Biology Lab. I
4 - CH 101 General Chemistry
4 - MTHSC 106 Calculus of One Variable I
1 - PKGSC 101 Packaging Orientation1
3 - Social Science Requirement2

Second Semester
3 - BIOL 104 General Biology II
1 - BIOL 106 General Biology Lab. II
4 - CH 102 General Chemistry
3 - ENGL 131 Accelerated Composition
2 - PKGSC 102 Intro. to Packaging Science1
1 - PKGSC 103 Packaging Science E-Portfolio

Sophomore Year

First Semester
4 - CH 201 Survey of Organic Chemistry or 3 - CH 223 Organic Chemistry and 1 - CH 227 Organic Chemistry Lab.
3 - COMM 250 Public Speaking
1 - PHYS 207 General Physics I and 1 - PHYS 209 General Physics I Lab. or
3 - PHYS 122 Physics with Calculus I and 1 - PHYS 124 Physics Lab. II
4 - PKGSC 202 Packaging Materials and Manuf.1

Second Semester
1 - PHYS 208 General Physics II and 1 - PHYS 210 General Physics II Lab. or
3 - PHYS 221 Physics with Calculus II and 1 - PHYS 223 Physics Lab. II
1 - PKGSC 201 Packaging Perishable Products
1 - PKGSC 204 Container Systems1
1 - PKGSC 206 Container Systems Lab.1

Junior Year

First Semester
3 - PKGSC 310 Package Design Fundamentals 3 - PKGSC 368 Packaging and Society
3 - PKGSC 404 Mechanical Properties of Packages and Principles of Protective Packaging
3 - PKGSC 430 Converting for Flexible Packaging 1 - PKGSC 454 Product and Package Eval. Lab.1
3 - Emphasis Area Requirement6

Second Semester
3 - ENGL 134 Technical Writing
3 - PKGSC 301 Packaging Machinery
3 - PKGSC 440 Packaging for Distribution
3 - Arts and Humanities (Literature) Requirement2
3 - Emphasis Area Requirement6

Senior Year

First Semester
3 - EX ST 301 Introductory Statistics
4 - PKGSC 416 Appl. of Polymers in Packaging
4 - PKGSC 464 Food and Health Care Pkg. Syst.
3 - Emphasis Area Requirement6

Second Semester
3 - AP EC 202 Agricultural Economics or 3 - ECON 211 Principles of Microeconomics
1 - PKGSC 403 Packaging Career Preparation
3 - PKGSC 420 Package Design and Development
3 - Arts and Humanities (Non-Lit.) Requirement2
6 - Emphasis Area Requirement6

124 Total Semester Hours

1A C- or better is required in this course for graduation.
2See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement. Note: Social Science Requirement must be in an area other than economics or applied economics. A 200-level or higher foreign language course is recommended to satisfy the Arts and Humanities (Non-Literature) Requirement.
3Students interested in minors or emphasis areas should take any prerequisites in the sophomore year.
4At least one 15-week period (six months preferred) of Cooperative education is required.
5PKGSC 404 and 454 must be taken concurrently.
6Completion of an approved minor or emphasis area is required.
7Approved minors are Business Administration, Entrepreneurship, Environmental Engineering, Environmental Science and Policy, Management. Emphasis Areas consist of 15 credit hours selected from one of the following areas: Distribution and Transportation, Engineering Technology, Food and Health Care Packaging, Graphic Communications, Materials. See advisor.

PREPROFESSIONAL HEALTH STUDIES

Non-degree

The health professions need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. The philosophies of education, the specific preprofessional course requirements, the recognizable qualifications for enrollment, and the systems of training vary among the professional health schools; but all recognize the desirability of a broad education—a good foundation in the natural sciences, highly developed communication skills, and a solid background in the humanities and social sciences. The absolute requirements for admission to professional health schools are limited to allow latitude for developing individualized undergraduate programs of study; however, most schools of medicine and dentistry require 16 semester hours of chemistry, including organic chemistry; eight hours of biological sciences; eight hours of physics; and six hours of mathematics. These requirements should be balanced with courses in vocabulary building, the humanities, and social sciences. The basic requirements in the natural sciences and as many of the courses in the humanities and social sciences as possible should be completed by the third year so that students will be prepared to take the Dental Admission Test or the Medical College Admission Test prior to applying to a professional school.

Undergraduates may also prepare to study optometry, podiatry, and other health professions. While the basic requirements for these professional schools are essentially the same as those for schools of medicine and dentistry, specific requirements for individual schools in these professions vary somewhat; consequently, interested students are advised to consult with the chief health professionals advisor.

At Clemson, rather than having a separate, organized preprofessional health study program, students are allowed to major in any curriculum, as long as the basic entrance requirements of the professional health school are fulfilled. These schools are not as concerned about a student’s major as they are about academic performance in whichever curriculum the student chooses. Professional health schools have neither preferences nor prejudices concerning any major, which is evidenced by the fact that their entering students represent a broad spectrum of curricula. The emphasis is placed on the student’s doing well in the curriculum chosen, and this becomes critical as competition increases for the limited number of places available in professional health schools.
PREPHARMACY
The two-year Prepharmacy program requires of 66–72 credit hours depending on the pharmacy school of interest. Upon completion of the program, students will be eligible to apply to a college of pharmacy, usually the South Carolina College of Pharmacy (MUSC and USC campuses), and may be eligible to apply for the Bachelor of Science in Preprofessional Studies. The degree in Pharmacy is awarded by the institution attended. It is important for students to work closely with their advisor as there are variations in courses required by the pharmacy schools.

For financial aid purposes, students in the Prepharmacy program are considered to be enrolled in a degree-seeking program.

2Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.
3See advisor.
4Students planning to receive the Bachelor of Science degree upon completion of the program are required to complete an additional 24 credit hours. See advisor for requirements.
5Students planning to receive the Bachelor of Science degree upon completion of the program are required to complete a minimum of 18 additional credit hours which must include MICRO 305. See advisor for requirements.

PREHABILITATION SCIENCES
The Prehabilitation Sciences major includes concentrations in physical therapy, occupational therapy, communication sciences and disorders, as well as in physician assisting and allied health areas. This curriculum is designed to meet the requirements of the programs in the College of Health Professions at the Medical University of South Carolina and other professional schools. The program requires a minimum of 90 semester hours of undergraduate coursework. In addition, students must apply to a professional school for acceptance into its program.

Because preparation for some of the concentrations, such as the physical therapy, occupational therapy, and communication sciences and disorders programs at MUSC, requires a baccalaureate degree in any area, students are advised to select a major with similar requirements after consultation with the Prehabilitation Sciences advisor. The following curriculum fulfills the general requirements for those fields, requiring less than a baccalaureate degree. Electives should be chosen after consultation with the advisor. Professional schools may change their requirements at any time, so it is imperative that students in this major stay in close contact with their advisor.

For financial aid purposes, students in the Prehabilitation Sciences program are considered to be enrolled in a degree-seeking program.

Since out-of-state students attending Clemson are ineligible to apply to the University of Georgia or Tuskegee University under the South Carolina quota, they should contact the college(s) of veterinary medicine to which they plan to apply. They may apply at the University of Georgia for at-large admission.

Veterinary schools accept students with a broad range of academic backgrounds; therefore, it is recommended that the beginning university student select any undergraduate major and simultaneously complete the courses required for veterinary school entrance and those required for completion of a BS or BA degree. For students selecting Animal and Veterinary Sciences or Biological Sciences at Clemson University, the basic curricula have been designed to accommodate Georgia’s entrance requirements. Further information is available from the Department of Animal and Veterinary Sciences at 864-656-3427.

SOILS AND SUSTAINABLE CROP SYSTEMS

Bachelor of Science

The BS degree program in Soils and Sustainable Crop Systems is a multidisciplinary program that educates students with expertise in soils, crop sciences, and applied agricultural biotechnology. It offers students a rigorous, science-based degree with educational opportunities related to management of agricultural commodities and natural resources as well as soil and water resources. Students can tailor the program to fit their professional and academic goals by selecting one of three concentrations with emphasis areas.

The Agricultural Biotechnology concentration integrates conventional disciplines with molecular advances in plants, pathogens, and biotechnology interactions and responds to the educational void between the rapid adoption of biotechnology products into agricultural production and the intermediate- and end-users, farmers, and consumers. Graduates in this concentration will be competitive as scientists in emerging agricultural biotechnology industries, as educators, and as policy makers and officers in regulatory agencies.

Students with a concentration in Soil and Water Environmental Science can address compelling problems including land application of agricultural and industrial wastes, reduction of contamination of ground and surface waters, establishment of functional septic drain fields, and production of food and fiber crops. Graduates will be able to establish careers in traditional agrarian fields such as soil scientists and conservationists, extension agents, and farm consultants and in the broader environmental arenas of DHEC, consulting engineering firms, and environmental consulting. Graduates will be well prepared for graduate work in fields ranging from soil science to environmental engineering and law.

Students with a concentration in Sustainable Crop Production will graduate with comprehensive knowledge to increase farm profits by decreasing the costs of crop and production; build soil tilth and fertility through rotations, multiple cropping, and nutrient cycling; protect the environment by minimizing or more efficiently using synthetic agrochemicals; manage crop pests and weeds with integrated, ecologically sound strategies; develop strategies for profitable marketing of agricultural commodities; and create a strong, diversified agriculture that is stable through market and weather fluctuations. Graduates can assume positions as self-employed farmers, farm managers, state and federal natural resource managers, research technicians, agricultural industry employees, greenhouse managers, consultants in pest management and sustainable agriculture, field ecology professionals, agri-food industry specialists, extension personnel, or regulatory officers.

Freshman Year

First Semester
1  - SSCS 101 Survey of Soils and Sustainable Crop Systems

TURFGRASS
Bachelor of Science
Turfgrass is a major part of our built environment and daily life including home lawns, sports fields, and golf courses. Grassed areas are aesthetically attractive and provide many environmental benefits including the prevention of soil erosion, noise reduction, improved water quality, and reduced injuries from sports.

Graduates pursue careers in management of professional golf courses and sports fields and in lawn care; production and sale of seed, sod, supplies, and equipment; or as technicians for businesses or government agencies. The curriculum provides a strong foundation in science, advanced business, and environmental and leadership skills that are needed for success in today's competitive environment. Courses in horticulture also provide a background for turfgrass managers who may have responsibilities for landscaped areas.

Students work closely with faculty in creative inquiry groups to investigate and implement solutions to real problems. Student interns experience a wide range of turf facilities, businesses, and public institutions to develop skills and experience needed for successful careers. In addition, the University's golf course (Walker Golf Course) and athletic fields offer great employment and learning opportunities.

WILDLIFE AND FISHERIES BIOLOGY

Bachelor of Science
Increased interest in conservation of natural resources and the environment and demand for seafood products have resulted in these areas becoming increasingly technical and requiring highly qualified wildlife and fisheries biologists. Greatest demands for graduates are in the areas of management, research, survey, and regulatory positions with state and federal agencies; industrial research and quality control laboratories; conservation, recreational, and other public service agencies; and private enterprises.

The Bachelor of Science degree program in Wildlife and Fisheries Biology provides a solid foundation for many careers in the sciences. The curriculum is strong in basic and applied sciences, communication skills, and the social sciences. In addition, three credit hours are available for field training with appropriate natural resource agencies. Students may satisfy coursework requirements for professional certification by the Wildlife Society and/or the American Fisheries Society.

For students interested in conservation biology, water, and natural resources, the Department of Forestry and Natural Resources also administers the Conservation Biology and Natural Resource Management Concentrations within the Environmental and Natural Resources degree program. See page 47 for program details.

Combined Bachelor of Science/
Master of Science Degree Program
Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits toward both the undergraduate and graduate program requirements. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Forestry and Natural Resources as early as possible in their undergraduate program as a number of required courses have prerequisites not normally taken by Wildlife and Fisheries Biology majors. Enrollment guidelines and procedures can be found under Academic Regulations in this catalog.

Freshman Year

122 Total Semester Hours

Notes:
1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2See advisor. Select from department-approved list.
3Internship must be completed in one or two semesters. Internship may be done fall, spring, or summer after completing HORT 212/213. Prior approval is required for internships, and a 2.0 grade-point ratio is required for registration. Note: Turfgrass majors may take a C or better in all HORT-designated courses. Courses may be repeated as often as necessary to achieve the minimum grade.
4Students planning to take organic chemistry should substitute CH 105 and 106.
5See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement; and, if CH 105 is not selected, three credits must also satisfy the Science and Technology in Society Requirement. (Note: Social Science Requirement must be in an area other than economics or applied economics.)
6Select from department-approved list.
MINORS

Following are minors acceptable for students in the College of Agriculture, Forestry, and Life Sciences. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting
Adult/Extension Education
Aerospace Studies
Agricultural Business Management
Agricultural Mechanization and Business
American Sign Language Studies
Animal and Veterinary Sciences
Anthropology
Athletic Leadership
Biochemistry
Bioengineering
Biological Sciences
Business Administration
Chemistry
Cluster
Communication Studies
Community Recreation, Sport, and Camp Management
Computer Science
Crop and Soil Environmental Science
East Asian Studies
Economics
Education
English
Entomology
Entrepreneurship
Environmental Engineering
Environmental Science and Policy
Equine Business—*not open to Animal and Veterinary Sciences majors*
Film Studies
Financial Management
Food Science
Forest Products
Forest Resource Management
Genetics
Geography
Geology
Global Politics
Great Works
History
Horticulture—*not open to Turfgrass majors*
International Engineering and Science
Legal Studies
Management
Management Information Systems
Mathematical Sciences
Microbiology
Military Leadership
Modern Languages
Music
Natural Resource Economics
Nonprofit Leadership
Packaging Science
Pan African Studies
Park and Protected Area Management
Philosophy
Physics
Plant Pathology
Political Science
Psychology
Public Policy
Religion
Russian Area Studies
Science and Technology in Society
Screenwriting
Sociology
Spanish-American Area Studies
Textiles
Theatre
Therapeutic Recreation
Travel and Tourism
Turfgrass—*not open to Horticulture majors*
Urban Forestry
Wildlife and Fisheries Biology
Women’s Studies
Writing

See pages 36–39 for details.
COLLEGE OF ARCHITECTURE, ARTS, AND HUMANITIES

The collaboration of Architecture (Landscape Architecture, Construction Science and Management, City and Regional Planning, and Architecture) with Arts (Visual Arts and Performing Arts) and the Humanities (Communication Studies, English, History, Languages, Philosophy, and Religion) produces a remarkably rich environment for study. The mixture of core disciplines with applied professions/disciplines in the College provides both depth and breadth in learning. This structure affords students and faculty with skills that address the complex and interconnected challenges of the future, where it is no longer possible for these problems to be solved in a single discipline or profession. It is through the connections and communication between specialized knowledge areas that significant cultural progress will be made. These kinds of thoughts and actions form a fundamental part of the College of Architecture, Arts, and Humanities.

To illustrate these ideas, consider the diversity of communication skills practiced and taught in the College. Students learn graphic and artistic communication, technical communication with computers, spoken communication, and communication through the written word. Each skill is vital to a successful student, and it is the collaboration between these forms of communication that prepares students for the complex challenges of the future.

SCHOOL OF DESIGN AND BUILDING AND SCHOOL OF THE ARTS

The Bachelor of Arts in Architecture degree is the preprofessional preparation for graduate study leading to the Master of Architecture degree, which is the fully accredited professional degree in the field. The accredited Bachelor of Science in Construction Science and Management program prepares students for careers as professional managers in the construction industry. A graduate program is also offered leading to the Master of Construction Science and Management. The Visual Arts program offers professional study in the studio visual arts leading to the Bachelor of Fine Arts degree. A graduate program leading to the Master of Fine Arts is also offered. The accredited five-year Bachelor of Landscape Architecture degree program prepares students for careers as professional landscape architects. The Bachelor of Arts in Production Studies in Performing Arts is a distinctive degree program that combines practical hands-on experiences in performing arts production technologies with classes in music and theatre performance, history, and theory. A graduate program in City and Regional Planning is housed within the school and accepts graduates from a variety of baccalaureate programs and prepares them for careers in both public and private sector planning through its Master of City and Regional Planning degree. The Master of Science in Historic Preservation degree is a professional degree program designed for students who will specialize in working with historic buildings, landscapes, and the decorative arts. The Master of Real Estate Development is a full-time, two-year professional degree jointly offered by the Department of Planning and Landscape Architecture and the Department of Finance in the College of Business and Behavioral Science.

In addition to the facilities housed on the Clemson campus, the College offers third- and fourth-year Architecture and fourth-year Landscape Architecture students the opportunity to earn credit toward their degrees at three off-campus sites. Students may spend a semester at the Charleston Architecture Center earning credit from both Clemson University and the College of Charleston. Additionally, the Charles E. Daniel Center for Building Research and Urban Studies in Genoa, Italy, and the Barcelona Program in Barcelona, Spain, provide students with an intensive program of study and travel in Europe.

Architecture Charleston Program

Located in Charleston, South Carolina, this program is available to qualified undergraduates in Architecture, Construction Science and Management, Landscape Architecture, and Visual Arts. Studio work is oriented toward design within the historic seaport setting. Students are enrolled in classes at the College of Charleston campus. The program is enriched by visiting scholars and professionals from the area.

Architecture Overseas Program

The Daniel Center for Design Research and Urban Studies in Genoa, Italy, is available to qualified Bachelor and Master of Architecture, Construction Science and Management, Fine Arts, City and Regional Planning, and professional year Landscape Architecture students. Studio and classroom work is enriched by visiting scholars and complemented by scheduled field trips, both in Italy and continental Europe. Undergraduate Architecture students in their third year or first semester of their fourth year may also participate in the Italian program.

Entrance Requirements

Admission to degree programs in the School of Design and Building and the School of the Arts is based on academic performance and is limited based on space availability in the various programs. Students seeking admission are advised to apply to the Admissions Office early in the fall of their senior year in high school. They are also encouraged to visit the school during their senior year. Faculty are available to meet with them and their parents informally and answer questions and discuss individual programs in more detail. Prospective students may schedule appointments by calling the individual department.

Advancement in Architecture

Students enrolled in second-, third-, or fourth-year design studios and theory courses must attain at least a 2.0 grade-point ratio in each year level (by repeating one or both semesters, if necessary) to qualify for advancement to the next year level or, in the case of fourth-year Architecture studios, to qualify for the Architecture degree, or in Landscape Architecture at the fifth year, to qualify for the Bachelor of Landscape Architecture degree.

SCHOOL OF HUMANITIES

The Bachelor of Arts degree is offered in Communication Studies, English, History, Language and International Trade, Modern Languages, and Philosophy. The Bachelor of Science degree is offered in Language and International Health.

To achieve depth as well as breadth in their education experiences, students majoring in Communication Studies, English, History, Modern Languages, and Philosophy complete at least 24 semester hours from courses above the sophomore level. As soon as feasible and not later than the end of the sophomore year, students in these fields also select a minor consisting of at least 15 additional semester hours. Courses satisfying the major may not also be included in the minor. A second major (a double major) may substitute for the minor, provided all requirements are fulfilled for each major.

The foreign language requirement is a proficiency requirement. Students must complete through 202 in Chinese, French, German, Italian, Japanese, Latin, Portuguese, Russian, or Spanish.

Students enrolled in degree programs offered in the humanities who expect to teach in the public schools may elect education courses required for teaching certificates by the South Carolina Department of Education. Such courses are to be approved by their own department advisors.

Students may transfer into the Undeclared category in the humanities only if they have completed 45 or fewer credit hours. For more information, contact the College of Architecture, Arts, and Humanities Advisement Center in 101 Strode Tower.

ARCHITECTURE

Bachelor of Arts

The Bachelor of Arts in Architecture prepares students for subsequent professional education by providing a sound general education, focused design studies, complementary support courses, and the opportunity to study abroad. The School of Architecture emphasizes the relationship of buildings to the rest of the environment: built, natural, and cultural. The curriculum includes seven semesters of studio in addition to complementary courses in architectural history and theory and building technology. Four of the studios are collaborative, taught by faculty in Architecture as well as Communication Studies and English. The Bachelor of Arts also includes requirements for a minor and foreign language.
In the first two years of the program, students learn to apply the thinking and communications skills needed to pursue higher-level work in the discipline. The curriculum in the first two years also allows students to complete most of the University's general education requirements. In the last two years, students must select at least one of the location-specific studios and corequired coursework and may elect to take these studios for up to three semesters. The final studio focuses on reflection and synthesis by incorporating the General Education Advanced Writing Requirement.

Architectural Registration/Licensure

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree. The Bachelor of Arts in Architecture provides a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in related fields.

Freshman Year

First Semester
3 - A A H 101 Survey of Art and Arch. History I
3 - ARCH 101 Introduction to Architecture

COMMUNICATION STUDIES

Bachelor of Arts

The Bachelor of Arts in Communication Studies provides a thoroughly integrated yet individual degree program that prepares students for careers in business, government, and public sectors. In addition, the program provides a foundation for graduates who wish to pursue advanced degrees in the humanities, social sciences, business, and law. Through their coursework and extracurricular experiences, Communication Studies majors develop a set of skills in oral, written, and visual communication that enables them to research, design, present, and evaluate messages across diverse contexts and from a variety of platforms, including digital communication technology.

Students may change majors into the Communication Studies program based on approval of a committee of faculty from the College of Architecture, Arts, and Humanities.

First Semester

CONSTRUCTION SCIENCE AND MANAGEMENT

Bachelor of Science

As the largest single industry in the United States and one of the most important, construction offers unlimited opportunities to highly motivated and professionally educated men and women. Future professionals must be skilled in managing people, equipment, and capital, coupled with a grasp of construction materials and methods and the complex technologies of modern construction. The Bachelor of Science in Construction Science and Management curriculum is the basis for a career in construction or as a developer or building management specialist.

ENGLISH

Bachelor of Arts

The core courses of the English major help students acquire an understanding of literature as a humanistic study; develop an appreciation and practical knowledge of the modes of literary expression, research, and criticism; and improve the ability to communicate effectively and intelligently.

By the end of the sophomore year, students choose between two emphasis areas: Literature or Writing and Publication Studies. The Literature Emphasis Area offers an extensive exploration of American and British literature, literary theory, and related disciplines such as creative writing and film. The Writing and Publication Studies Emphasis Area focuses on digital publishing, professional communication, rhetoric, creative writing, and writing about the arts. By teaching students to read closely, think critically, and communicate effectively, both emphasis areas prepare English majors for work in a variety of professional and academic fields.

The standard program of study consists of courses structured in the map below, which includes 24 credit hours of core courses and 15 hours chosen from one of the two emphasis areas.

Core Courses
ENGL 190, 310, and 390 and 18 additional credits selected from the following:

Literature Survey Requirement—Six credit hours from ENGL 396, 397, 398, 399
Shakespeare—ENGL 411
Language, Criticism, and Theory—Three credits from ENGL 400, 401, 435, (W S) 436, 440, 442, (COMM) 491, (COMM) 492
Major Electives—Three credits from 300- or 400-level ENGL courses
Capstone Seminar—ENGL 496

Literature Emphasis Area
Literature I (to 1699)—Three credits from ENGL 403, 407, 408, 410, 414, 420, 427, 429, 444, 446
Literature II (1700–1899)—Three credits from ENGL 415, 416, 417, 418, 421, 425, 426, 444
Literature III (from 1900)—Three credits from ENGL 428, (THEA) 430, 431, 432, 433, 434, 455, 465
Diversity—Three credits from ENGL 353, 380, 419, (HUM) 456, 482, 483
Major Electives—Three additional credits from 400-level ENGL courses

Writing and Publication Studies Emphasis Area
ENGL 499 plus 12 additional credits selected from the following:

Language, Criticism, and Theory—Three credits in addition to core requirements from ENGL 400, 401, 435, (W S) 436, 440, 442, (COMM) 491, (COMM) 492
Advanced Writing—Three credits, in addition to the General Education Advanced Writing Requirement, selected from ENGL 304, 312, 314, 345, 346, (THEA) 347, 348, 445, 446, (THEA) 447, 448, 490
WPS Courses—Six credits from ENGL 332, 387, 441, 460, 475, 478, 489, 495
**Freshman Year**

**LANDSCAPE ARCHITECTURE**

**Bachelor of Landscape Architecture**

The profession of landscape architecture is broad and interdisciplinary. Practicing landscape architects work on a wide range of project types including, but not limited to, urban design, community design, historic preservation, ecological restoration, parks and park systems, institutional landscapes, memorials, cemeteries, industrial site reclamation, golf courses, wilderness areas and trails, residential landscapes, and gardens.

The profession is both an art and a science. Successful landscape architects are creative professionals who hold an environmental imperative and a social conscience. They are also excellent facilitators, able to bring numerous disciplines and professions together to work on complex projects in the landscape. Landscape Architecture students gain an understanding of this diverse range of subjects by participating in Clemson University’s Creative Inquiry Initiative. As a consequence of numerous creative inquiry experiences within the program, students will develop greater skills in teamwork, creative thinking, problem solving, and communication.

Clemson’s Landscape Architecture program is noted for a special emphasis on the art of design. Consequently, the landscape architecture design studio experience is at the center of the student’s education—forty-two hours of studio are required. The five-year program leads to an accredited
Bachelor of Landscape Architecture degree. The program is generalist—covering the major areas of practice—and builds from design basics to sophisticated studio experiences such as regional design, urban design, and community design. The studio experience is supported by other courses inside and outside the Landscape Architecture curriculum that provide the necessary grounding in landscape history and social, cultural, environmental, and aesthetic theories. Students may also choose to focus elective credits on one of three areas: cultural issues, environmental issues, or professional development. Outstanding fifth-year students may apply for admission into a shortened Master of City and Regional Planning, Master of Landscape Architecture, or Master of Real Estate Development program.

**Freshman Year**

**First Semester**
3 - A A H 210 Intro. to Art and Architecture
1 - BIOL 103 General Biology I
1 - BIOL 105 General Biology Lab. I
3 - ENGL 103 Accelerated Composition
6 - LARCH 128 Technical Graphics
3 - LARCH 151 Basic Design I
1 - LARCH 153 Landscape Arch. Design Theory I
3 - GEOL 101 Physical Geology
3 - GEOG 101 Introduction to Geography

**Second Semester**
3 - BIOL 104 General Biology II
1 - BIOL 106 General Biology Lab. II
1 - HORT 101 Horticulture
1 - LARCH 103 Landscape Arch. Portfolio I
3 - LARCH 116 History of Landscape Arch.
3 - LARCH 152 Basic Design II
1 - LARCH 154 Land. Arch. Design Theory II
3 - MTHSC 102 Intro. to Mathematical Analysis
6 - LARCH 428 Landscape Architecture

**Sophomore Year**

**First Semester**
3 - B E 222 Geomeasurements
1 - COMM 150 Intro. to Human Comm.
3 - COMM 250 Public Speaking
1 - HORT 303 Landscape Plants

6 - LARCH 452 Off-Campus Studio

**Professional Year**

**First Semester**
3 - LARCH 453 Key Issues in Landscape Arch.
1 - LARCH 503 Landscape Arch. Portfolio II
3 - LARCH 550 Professional Project Studio
3 - Social Science Requirement
1 - Elective

**Second Semester**
1 - LARCH 552 Landscape Arch. Exit Project
6 - Elective

8

**Total Semester Hours**

1Other elective courses from a department-approved list may be substituted.
2ENGL 402 may be substituted.
3Two electives are required. A minimum of six hours credit of internship may be scheduled.
4Select from department-approved list.
5Students who plan to enter the MRED, MLA, or MCRP program should substitute a research methods course (e.g., ARCH 282, C R P 803).
6See General Education Requirements.

**LANGUAGE AND INTERNATIONAL HEALTH**

**Bachelor of Science**

The Bachelor of Science program in Language and International Health is jointly administered by the Department of Languages and the Department of Public Health Sciences in the College of Health, Education, and Human Development. Students acquire knowledge in public health theory and practice, including the history and philosophy of public health and medicine; the organization, management, and financing of health services; the social and behavioral aspects of health, epidemiology, health evaluation methods, and health communications. Students also acquire communicative competence in Spanish and a familiarity with Hispanic cultures, literatures, health environments, and multicultural issues.

The program requires study abroad and the completion of a practicum in a Spanish-speaking country. Graduates will be qualified to assume positions in a variety of settings including integrated hospital systems, consulting firms, managed care organizations, pharmaceutical companies, as well as multicultural community centers. They can also pursue graduate degrees in community health, epidemiology/bio-statistics, health administration, health systems research, and Spanish.

Students who have completed less than 50 credit hours may change majors into Language and International Health with a minimum cumulative grade-point ratio of 2.5. Students with 50 or more credit hours may apply for a change of major into Language and International Health, based on space availability, with a minimum cumulative grade-point ratio of 2.75.

**Freshman Year**

**First Semester**
3 - BIOL 103 General Biology I
1 - BIOL 105 General Biology Lab. I

121 Total Semester Hours

Select one of the following emphasis areas:

Health Administration—select one course from four of the following groups:

Accounting—ACCT 201
Economics—ECON 211, 212
Finance—FIN 306
Health—C R D (AP EC, HLTH) 361, HLTH 475
Law—LAW 322
Management—MGT 201, 218, 390, 411, 416, 422, 423, (I E) 444, 452
Marketing—MKT 301

Community Development—select one course from four of the following groups:

Applied Economics—AP EC 202, 352
Community Development—C R D (AP EC) 357, (AP EC) 411, (AP EC) 412
Economics—ECON 211, 212, Health—C R D (AP EC, HLTH) 361

Rural Sociology—R S (SOC) 401, (SOC) 459, SOC (R S) 371, (R S) 471
Sociology—SOC 433

1ANTH 201, GEOG 103, HIST 172, 173, 193, PO SC 102, 104
See General Education Requirements. For students not taking the CH 105/106 sequence, three of these credit hours must also satisfy the Science and Technology in Society Requirement.
1Internship must be taken in a Spanish-speaking country during the second semester of the junior year or later. The study abroad semester courses and internship must be taken concurrently as listed. See advisor.
2Select from 300-400-level courses in Spanish except SPAN 310.
3Select from 300-400-level courses in Health.

LANGUAGE AND INTERNATIONAL TRADE

Bachelor of Arts

Students in the Bachelor of Arts program in Language and International Trade acquire communicative competence in the target language; a familiarity with specific peoples, cultures, literatures, and business environments; and the knowledge and skills to pursue graduate studies or careers in business within their language of specialization.

The Language and International Trade program combines foreign languages and international trade. Students choose one language concentration (Chinese, French, German, Japanese, or Spanish) and one professional concentration (Applied International Economics, International Trade, Textiles, or Tourism).

The language component emphasizes speaking and writing skills, cultures, civilization, and business/technical languages. The professional component introduces students to the core content of their preferred concentration as well as to the international dimensions of that concentration.

Study abroad of at least one semester in the target language setting is mandatory. In addition, internships with international companies in the United States or summer internships with companies abroad give students the opportunity to apply classroom learning to the business/industrial work environment. Internships are subject to approval by the Language and International Trade Director. Students are strongly encouraged to participate in the Clemson Language Immersion Program (CLIP) prior to enrolling in study abroad programs.

In addition to the curriculum requirements below, students are required, as a condition of graduation, to pass a noncredit examination and submit a noncredit senior dossier to assess their language competence in various areas. Both assessments take place in the student’s last full semester at the University.

Freshman Year
First Semester
4 - CHIN 101 Elementary Chinese or
4 - FR 101 Elementary French or
4 - GER 101 Elementary German or
4 - JAPN 101 Elementary Japanese or

MODERN LANGUAGES

Bachelor of Arts

The Bachelor of Arts degree in Modern Languages provides a broadly humanistic course of study in four areas of concentration: French, German, Japanese, and Spanish. This course of study seeks to provide students with basic competence in both the relevant language and the literary and cultural heritage pertaining to that language. Moreover, students will be required to take at least two courses in cultural inquiry which are designed to sharpen their sense of cultural difference, to enhance their critical thinking skills, and to prepare them for citizenship in a global community of diverse cultural precepts and practices. In this respect, the Bachelor of Arts in Modern Languages is intended to prepare students for a wide range of careers in the international arena as well as for the kinds of graduate programs that are an appropriate starting point for such careers.

All Modern Languages students are required to study abroad with a Clemson-approved program for at least one semester in the case of Japanese and Spanish or for at least two semesters in the case of French and German.

As a condition of graduation, students in the Modern Languages program will be required to pass a noncredit examination and to submit a senior dossier in the relevant language to assess their competence in that language. Both assessments take place in the student’s last full semester of study.

### Bachelor of Philosophy

The required coursework for the Philosophy major includes:

- **Philosophy Major:** PHIL 101, 102, 301, 302, 401, 402, and 12 additional credits in PHIL selected with the advice and consent of the advisor. Three of these credits must be at the 400 level.

**Philosophy Major Emphasis Areas**

- **Law and Legal Studies Emphasis Area:** PHIL 301, 302, 401, 402, and 4 additional credits in PHIL selected with the advice and consent of the advisor. These credits must be at the 400 level.

- **Environmental Ethics Emphasis Area:** PHIL 301, 302, 401, 402, and 4 additional credits in PHIL selected with the advice and consent of the advisor. These credits must be at the 400 level.

- **Religious Studies Emphasis Area:** PHIL 301, 302, 401, 402, and 4 additional credits in PHIL selected with the advice and consent of the advisor. These credits must be at the 400 level.

- **Business Ethics Emphasis Area:** PHIL 301, 302, 401, 402, and 4 additional credits in PHIL selected with the advice and consent of the advisor. These credits must be at the 400 level.

Required courses include:

- **First Year:**
  - **Fall Semester:** PHIL 101, 102
  - **Spring Semester:** PHIL 301, 302

- **Second Year:**
  - **Fall Semester:** PHIL 401, 402

PRODUCTION STUDIES IN PERFORMING ARTS
Bachelor of Arts
The Production Studies in Performing Arts degree is a nationally distinctive Bachelor of Arts degree that prepares students for careers in many aspects of the arts, including but not limited to performance, design, arts administration, and arts technologies. The curriculum offers specialized study in music, theatre, and audio engineering. In addition to discipline-specific concentrations, all performing arts students take classes in performance, production, history, theory, and arts technology. The Brooks Center for the Performing Arts is a living performing arts laboratory where visiting artists and industry professionals provide additional experiential educational opportunities for Clemson students. Students may choose from more than 70 minors and select elective courses to tailor their degrees to their individual interests.

The degree is rooted in the liberal arts traditions with specific training in the performing arts. It provides the background for a number of career options or advanced studies such as graduate school, professional internships, and specialized postgraduate training.

The curriculum features a senior capstone project, in which students spend their final year working as a production team, writing, composing, designing, marketing, and performing a final project.

To be considered for admission to this program, students must undergo an interview and/or audition with the Department of Performing Arts. Please note that students will not be eligible for admission to Clemson University in Production Studies in Performing Arts until this interview/audition is completed. Contact the department for specific requirements.

As a requirement for graduation, all Music Concentration students will be required to demonstrate piano competence equivalent to the 102 level, and all Audio Engineering students will be required to demonstrate piano competence equivalent to the 101 level.

- **Advanced Writing Requirement**
- **Minor Requirement**
- **Elective**

Note: As a requirement for graduation, Music Concentration students will be required to demonstrate piano competence at the 101 level.
VISUAL ARTS

Bachelor of Fine Arts

The Bachelor of Fine Arts degree is the recognized professional undergraduate degree in the visual arts. The program offers students a balanced curriculum of academic coursework and studio art and art history courses in preparation for careers in studio-related areas of the visual arts. The department offers coursework in six studio disciplines: drawing, painting, sculpture, printmaking, photography, and ceramics.

For admittance into the BFA program in Visual Arts, prospective students must submit a portfolio to the Department of Art. Guidelines are available from the Department or at www.clemson.edu/caah/art/degree_programs/undergraduate/degree_undergrad_portfolio.html.

In the freshman year, students participate in a foundations program comprised of four studio classes. These classes expose first-year art students to 2-D, 3-D, and 4-D studio practices; utilize traditional and new media; and place special emphasis on drawing. At the end of the freshmen year, students exhibit their work in a mandatory Foundations Review.

In the sophomore year, students take beginning-level courses in the six studio disciplines. In the junior year, students begin to concentrate their studio coursework in a specific discipline of the visual arts in preparation for the Senior Studio experience. The Senior Studio is a time in which concepts and skills are focused and developed to produce a cohesive body of artwork and a portfolio for graduate study and professional application.

Freshman Year

First Semester
3 - A A H 101 Survey of Art and Arch. History I
3 - ART 105 Foundation Drawing I
3 - ART 151 Foundations in Visual Art I
1 - ART 153 Orientation to Visual Arts I
3 - ENGL 103 Accelerated Composition
1 - Mathematics Requirement

Spanish-American Area Studies
Textiles
Theatre
Therapeutic Recreation
Travel and Tourism
Turfgrass
Urban Forestry
Wildlife and Fisheries Biology
Women’s Studies
Writing

See pages 36–39 for details.
COLLEGE OF BUSINESS AND BEHAVIORAL SCIENCE

Students in the College of Business and Behavioral Science seek to understand and organize human behavior in a business, economic, and social context. The College promotes scholarship with broad awareness of the individual, cultural, political, and global levels and develops distinctive leaders in industry, higher education, professional and public service. The College includes the School of Accountancy and Legal Studies, and the Departments of Aerospace Studies, Economics, Finance, Graphic Communications, Management, Marketing, Military Leadership, Political Science, Psychology, and Sociology.

BUSINESS AND PROFESSIONAL PROGRAMS

Bachelor of Science degrees are offered in Accounting, Economics, Financial Management, Graphic Communications, Industrial Management, Management, and Marketing. With the exception of Graphic Communications, these programs share a common curriculum during the first year, allowing the student maximum flexibility in choosing an appropriate major. Accreditation by AACSB International (Association to Advance Collegiate Schools of Business) has been earned by the Business Programs which include Accounting, Financial Management, Industrial Management, Management, and Marketing. All business and professional curricula prepare students for a variety of careers and furnish an education that recognizes the need and an understanding of the basic principles of science, appreciation for the nature of human interaction, and the comprehension of the economic, political, and social environment.

Pre-Business Program

The Pre-Business program provides students planning to earn Bachelor of Science degrees in Accounting, Economics, Financial Management, Industrial Management, Management, and Marketing with a sound academic preparation for these degrees. All Pre-Business students complete a common curriculum during the freshman year. All new Business students (including transfer students) are admitted into the Pre-Business program until the following core classes are satisfactorily completed and the grade-point ratio requirement is met: ECON 211, 212, MTHSC 102, 207 or an acceptable sequence, ENGL 103, and a natural science requirement.

Change of Major into Pre-Business

Students who change majors into Pre-Business must have completed at least 12 credit hours at Clemson and must have a 2.0 minimum cumulative grade-point ratio.

Freshman Curriculum

First Semester
1. BUS 101 Business Foundations
2. ECON 211 Principles of Microeconomics
3. MTHSC 102 Intro. to Math. Analysis or MTHSC 106 Calculus of One Variable II.1
4. PSYCH 201 Introduction to Psychology or SOC 201 Introduction to Sociology
5. Natural Science Requirement1
6. Elective
15

Second Semester
3. COMM 150 Intro. to Human Comm. or COMM 250 Public Speaking
4. ECON 212 Principles of Macroeconomics
5. ENGL 103 Accelerated Composition
6. MTHSC 207 Multivariable Calculus or MTHSC 108 Calculus of One Variable II.2
7. Science and Tech. in Society Requirement1

To achieve depth as well as breadth in the educational experience, students select a major consisting of courses above the sophomore level. Students also choose a minor consisting of additional credit hours. Students should contact their advisor for additional information and approval before pursuing a minor. See page 83 for a list of acceptable minors.

Students in Bachelor of Arts programs who plan to teach in public schools may elect education courses required for certification by the South Carolina Department of Education. Such courses are to be approved by their own department advisors.

ROTC PROGRAMS

Aerospace Studies (AFROTC)

Air Force Reserve Officer Training Corps (AFROTC) is designed to "develop the best Air Force leaders and citizens of character, dedicated to serving the Nation." Students can earn a minor in Aerospace Studies and a commission as second lieutenants while pursuing a bachelor's degree. Clemson's program is recognized as best in the nation and includes courses in air power history, written and oral communications, leadership and teamwork, and political science. The first year of the program consists of The Foundation of the United States Air Force, which introduces students to AFROTC and the Air Force: how it is organized, how it works, and how college students can "try out" the program to see if the Air Force is right for them. The second year involves The Evolution of USAF Air and Space Power, which explores the development and milestones of aerospace power—from balloons to the most advanced systems of today. The third year, Air Force Leadership Studies, teaches leadership skills and personal strengths and weaknesses as applied in an Air Force environment; the responsibility and authority of an Air Force officer; ethical behavior; and the application of listening, speaking, and writing skills in Air Force-specific formats and situations with accuracy, clarity, and appropriate style. In the fourth year, National Security Affairs and Preparation for Active Duty, students learn to examine the national security process, regional studies, advanced leadership ethics, Air Force doctrine, the military as a profession, officerhood, military justice, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. Additional information is available from the department of Aerospace Studies.

Military Leadership (Army ROTC)

Army Reserve Officer Training Corps is all about leadership. It allows students the opportunity to become Army officers in the Reserves, National Guard, or active Army. The first two years of the program are open to all students. During the freshman year, the focus is on learning individual leadership skills such as time management, leadership character, values, setting goals, and conducting meetings. The sophomore year emphasizes teamwork, team leading, communication/briefings, decision making, organizational culture, vision, and team values. Juniors primarily learn planning and conducting training for large groups and are evaluated in leadership exercises. Seniors focus on organizational leadership.
They plan and run the 170-person organization, conduct individual counseling, and evaluate the juniors’ leadership exercises. A minor in Military Leadership can be earned by completing the program. Enrollment requires no military obligation until the sophomore year for those on an Army scholarship or the junior year for those without a scholarship. Additional information is available from the Military Leadership Department.

ACCOUNTING

Bachelor of Science

The program leading to the Bachelor of Science degree in Accounting prepares students for careers as professional accountants. Students completing this program are well prepared to begin professional careers in corporate accounting or internal auditing or to continue study at the graduate level.

Students planning to become Certified Public Accountants should note that the requirements to sit for the CPA examination in South Carolina include 150 hours of collegiate education and completion of a bachelor’s degree. Other states have, or will soon have, similar requirements. The faculty of the School of Accountancy and Legal Studies believes these requirements are best met with a bachelor’s degree in Accounting and completion of the Master of Professional Accountancy (MPAcc) degree program. The MPAcc program also enhances the preparation of students pursuing accounting careers in areas of specialization such as assurance and management services and taxation.

Admission to the MPAcc program is separate from admission to the undergraduate program. It is based on the student’s undergraduate record and score on the Graduate Management Admissions’ Test (GMAT). For information, contact the School of Accountancy and Legal Studies, 301 Sirrine Hall.

In addition to accounting and business courses, approximately one-half of the Bachelor of Science curriculum is devoted to English, public speaking, mathematics, natural and social sciences, and the humanities. Thus, students in the accounting program obtain a broad-based education that not only gives them accounting expertise but also contributes to their proficiency in analytical, communicative, and interpersonal skills. Along with the general business accreditation held by the College, the degree programs offered by the School of Accountancy and Legal Studies are separately accredited by AACSB International, the only accrediting agency for accounting programs. Students wishing to change majors into the accounting program must have a 2.0 or higher cumulative grade-point ratio.

Sophomore Year

First Semester
3 - ACCT 201 Financial Accounting Concepts
3 - EX ST 301 Introductory Statistics or MTHSCC 309 Intro. Business Statistics
3 - MGT 201 Principles of Management
3 - Arts and Humanities (Non-Lit.) Requirement1
3 - International Studies Requirement1

Second Semester
1 - ACCT 204 Accounting Procedures
3 - CP SC 220 Microcomputer Applications
3 - MGT 310 Intermediate Business Statistics
3 - Arts and Humanities (Literature) Requirement1
3 - International Studies Requirement1
3 - Elective

Junior Year

First Semester
3 - ACCT 311 Intermediate Financial Acct. I
3 - ACCT 322 Accounting Information Systems
3 - ENGL 304 Business Writing
3 - FIN 311 Financial Management I
3 - Fine Arts Requirement1

Second Semester
3 - ACCT 312 Intermediate Financial Acct. II
3 - ACCT 340 Internal Auditing Theory1 or 3 - ACCT 415 Auditing1
3 - FIN 312 Financial Management II
3 - LAW 322 Legal Environment of Business
3 - PHIL 344 Business Ethics
1 - Elective

Senior Year

First Semester
3 - ACCT 303 Cost Accounting
3 - ACCT 313 Intermediate Financial Acct. III
3 - ACCT 404 Individual Taxation1 or 3 - MGT 418 Business Strategy
3 - MGT 310 Intermediate Business Statistics
3 - International Business Requirement1

Second Semester
Option A: Internship
3 - ACCT 309 Internship in Accounting6
3 - ACCT 410 Budgeting and Executive Control
3 - MGT 415 Business Strategy
6 - Business Requirement1

Option B: Business Management
3 - ACCT 410 Budgeting and Executive Control
3 - MGT 415 Business Strategy
9 - Business Requirement1

122 Total Semester Hours

1See General Education Requirements. Note: Cross-Cultural Awareness Requirement may be satisfied by other General Education courses, by the International Studies Requirement, or through the use of elective hours. See advisor.

2A H 210, MUSIC 210, or THEA 210

3Students planning to pursue the Master of Professional Accountancy degree program should take ACCT 404 and 415. Students planning to work in industry upon completion of the degree program should take ACCT 404 and 406.

4ACCT 340, any 400-level ACCT course, ECON 302, (MGT) 306, FIN 304, 305, 308, 402, 404, MGT 390, 411, 452, or 456

5Note: At least 50 percent of the total credits taken in ACCT, ECON, FIN, LAW, MGT, and MKT must be taken at Clemson University.

ECONOMICS

A bachelor’s degree in Economics provides a thorough understanding of business, society, and public policy and prepares students for a wide range of careers. By combining general education courses and a strong course of study in economics, students can prepare for graduate studies in business, law, or any of the social sciences as well as for careers in business and government.

The Department of Economics offers two undergraduate degree paths. The Bachelor of Arts degree emphasizes foreign language skills and offers students maximum freedom to tailor their course of study to their specific interests and career goals. A broad choice of minors is available for this program. The Bachelor of Science program requires 30 credit hours in economics, which should be satisfied by completing ECON 211, 212, and 24 credits of coursework above the sophomore level. Bachelor of Science majors must complete ECON 314 and 315. ECON 405 is strongly recommended but not required.

ECONOMICS

A minor field is required of students in both the Bachelor of Arts and the Bachelor of Science degree programs. Economics majors may choose, in consultation with their advisors, any University-approved minor. (See page 83.)

Students who wish to combine the curriculum in Economics with secondary-school teaching should take the degree in Education with a teaching area in Economics. The courses taken will be those required for teaching certification as specified by the South Carolina Department of Education as well as those required for an Economics major.

Combined Bachelor’s/Master’s Plan

The Department of Economics allows students to count up to 12 hours of graduate credit (600-level courses) toward both the bachelor’s and master’s degrees. Students participating in this program must have a minimum grade-point ratio of 3.4 and be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the Department of Economics.
Dual Degree Program with Université Catholique de Louvain in Belgium

The Economics Department has a dual degree program with the Université Catholique de Louvain in Belgium. Students spend one semester taking courses at the University of Maastricht in The Netherlands and two semesters at UCL in Louvain la Neuve, Belgium. The instruction at Maastricht is in English, and the instruction at UCL is in French. After returning to Clemson to complete their studies, students will earn bachelor degrees from both Clemson and UCL.

Students must be proficient in French to participate in the program. Interested students should contact the Department of Economics for information.

Change of Major into Bachelor of Arts in Economics

Students who change majors into Bachelor of Arts in Economics must have completed at least 12 credit hours at Clemson and must have a 2.0 minimum cumulative grade-point ratio.

FINANCIAL MANAGEMENT

Bachelor of Science

The Bachelor of Science in Financial Management program is designed to develop an understanding of financial markets in the contemporary economy, the operation of financial institutions, and the financial management of business operations. The curriculum prepares students for careers in such areas as corporate finance, banking, investments, financial planning, insurance, and real estate. Governments of all levels also employ finance graduates in many of their divisions. The curriculum also provides excellent preparation for students interested in graduate studies or law school.

The core of the curriculum provides a broad range of subjects with an emphasis on technical and communication skills. Students then have the flexibility to tailor courses to their own needs by choosing emphasis areas that will enhance career preparation in specific areas of finance. Students who complete a specific set of courses are eligible to sit for the certified financial planner (CFP®) examination.
Students wishing to change majors into the financial management program must have a 2.0 or higher cumulative grade-point ratio.

Sophomore Year
First Semester
3 - ACCT 201 Financial Accounting Concepts
3 - EX ST 301 Introductory Statistics or
3 - MTHSC 309 Intro. Business Statistics

121 Total Semester Hours

Accounting courses may be selected from any 300- or 400-level courses offered by the School of Accountancy. Credit may not be received for both ACCT 303 and 357.

Financial Planning—ACCT 404, 406, FIN 304, 405, 409
Financial Services—FIN 405, 406, 408, 411, and one course from FIN 304, 399 (three credits), 417
Real Estate—FIN 415, 416, 417, LAW 333, plus one course from FIN 399 (three credits), 408, 408A

Notes:
1. Financial Management majors are required to have a minimum grade-point ratio of 2.0 in all FIN-designated courses to graduate. Only the last grade for courses that are repeated is used in computing this grade-point ratio.
2. At least 50 percent of the total credits taken in ACCT, ECON, FIN, LAW, MGT, and MKT must be taken at Clemson University.

GRAPHIC COMMUNICATIONS
Bachelor of Science
The Bachelor of Science degree in Graphic Communications prepares students for professional careers in printing, publishing, packaging, and related industries. The core curriculum assures graduates of having the skills and knowledge required by most entry-level jobs. The major requirements allow each student to select courses that enhance career preparation in specific segments of graphic communications. Coursework is heavily oriented around individual laboratory experiences which stress the development of problem-solving skills in a broad cross-section of manufacturing areas. Applications include all major processes and a variety of industry segments, including commercial printing, web printing, package production, specialty printing, and industrial applications of printing technology beyond communications. The most common career opportunities are in printing management, production planning and supervision, and commercial and technical sales.

The Graphic Communications program is designed to be completed in four years (eight semesters and one or two summers). While students must take one internship during a fall or spring semester, one or two summers are typically used to make up for that semester. The department schedules courses in summers for that purpose. Taking a reduced load per term or other circumstances could extend the time to meet graduation requirements.

Policy on Advancement in Graphic Communications
Graphic Communications majors must earn a C or better in prerequisite G C courses before enrolling in the next level G C course. Registration priority is given to those students for whom the course is a requirement.

Change of Major into Graphic Communications
Students who change majors into Graphic Communications must have completed at least 12 credit hours at Clemson, must have a 2.0 minimum cumulative grade-point ratio, and must have earned a B or better in G C 104.

Freshman Year
First Semester
1 - G C 101 Orientation to Graphic Comm.

Industrial Management
Bachelor of Science
The Bachelor of Science degree in Industrial Management prepares students for management challenges in manufacturing, production planning, inventory control, quality assurance, and service operations. Students receive a broad-based education in business, but particular emphasis is placed on systems, theories, and issues dealing with the production of goods and services. The program is particularly relevant in today's economic environment, where improvements in productivity and quality are essential to meet the growing challenges of foreign producers. In addition to jobs in manufacturing management, graduates in Industrial Management are sometimes sought for positions as project directors by government agencies and research centers. Financial institutions have found the Industrial Management graduate well prepared for internal operations management as well as for liaison positions dealing with manufacturing companies as bank customers. The Industrial Management program is accredited by AACSB International and has received a special commendation for excellence from the South Carolina Commission on Higher Education.

Management
Bachelor of Science
The Bachelor of Science degree in Management prepares students for careers as professional managers in corporations, governmental organizations, and small businesses. In addition, the program provides a foundation for graduates who wish to pursue advanced degrees in business and public administration, law, and the social sciences. The curriculum gives students a broad exposure to the functional areas of business and allows each to select an emphasis area in a subject that is germane to individual career interests. The Management curriculum provides an examination of the social, legal, political, and economic environments in which organizations must operate; an understanding of the functional areas of business and their interrelationships; and a knowledge of behavioral science, applied statistics, and mathematics as they relate to organizational problem solving. The program is accredited by AACSB International.

Note:
Grade of C or better in this course is required for graduation.
See General Education Requirements. Note: Cross-Cultural Awareness Requirement may be satisfied by other General Education courses, by the International Studies Requirement, or through the use of elective hours.
See advisor.
Fifteen credit hours in addition to other curriculum requirements. Support requirement must be satisfied by (1) completing a minor requiring at least 12 hours of additional
coursework. If the minor is less than 15 additional hours, up to three hours of 300- and 400-level MGT courses beyond those already required by the Management degree program can be included or (2) completing fifteen hours of coursework selected from department-approved list.

3Any 300- and 400-level MGT courses beyond the required courses.

Note: At least 50 percent of the total credits taken in ACCT, ECON, E L E, FIN, LAW, MGT, and MKT must be taken at Clemson University.

MARKETING
Bachelor of Science
The Bachelor of Science degree program in Marketing develops an understanding of various aspects of marketing. The curriculum prepares students for professional marketing careers in industry, government, or the nonprofit sector. Graduates are also well prepared for entrance into the Master of Business Administration, law, or other graduate programs. For students who want a general perspective of marketing, the curriculum provides a broad range of subjects with the flexibility to tailor courses by choosing areas that will enhance career preparation in various areas of marketing. Subjects include promotional strategy, professional selling, sales management, public and nonprofit marketing, entrepreneurship, marketing research, product management, marketing management, and international marketing. Emphasis areas in services marketing, sport marketing, and technical marketing are available to students who seek to specialize. The Marketing curriculum, whether approached from a general or specialized perspective, provides the conceptual, quantitative, and analytical skills necessary to function in a dynamic business environment. The Marketing degree is accredited by AACSB International.

Students wishing to change majors into the Marketing program must have a cumulative grade-point ratio of 3.0 or higher.

POLITICAL SCIENCE
The Department of Political Science offers two degree programs: a Bachelor of Arts and a Bachelor of Science, each requiring a total of 120 credit hours. Both prepare students for a wide range of graduate programs and career opportunities. The Bachelor of Arts program provides broad coverage of the political science discipline and emphasizes communication skills and humanities. The Bachelor of Science program is recommended for those with an aptitude for mathematics and/or an interest in political economy, public administration, public policy, or other fields requiring advanced quantitative skills. Both programs are appropriate for pre-law students and for students interested in global politics. Note that the Bachelor of Arts degree requires a minor, and the Bachelor of Science degree requires a field of concentration and, depending on the concentration, requires or allows a minor.

Bachelor of Arts
The requirements for a Bachelor of Arts degree in Political Science consist of PO SC 101, 102 or 104, 199, 499, and at least 24 additional credit hours in political science at the 300-400 level, including at least one course from each of the following fields:

American Government—PO SC 403, 405, 416, 436, 442
Comparative Politics—PO SC 371, 372, 466, 471, 476, 477, 478
International Relations—PO SC 361, 362, 363, 375, 429
Political Theory—PO SC 450, 453, 455
Public Policy and Public Administration—PO SC 302, 321, 421, 423, 424

The student’s additional coursework in political science is chosen with the consent and advice of the departmental advisor to ensure an appropriate balance of breadth and specialization within the field of political science. In addition to the courses listed above, the department offers a wide range of specialized courses in each of the subfields of the political science discipline.

Note: No more than three hours credit from PO SC 310, 311, 312, 499, and 410 may be applied toward a Political Science major.

### Political Science

#### Bachelor of Science

The requirements for a Bachelor of Science degree in Political Science consist of PO SC 101, 102 or 104, and at least 24 additional credit hours in political science at the 300–400 level, including one upper-level American politics course and one upper-level global politics course.

In consultation with the departmental advisor, students choose one of the following concentrations: American Politics, Global Politics, Political Economy, Public Administration, or Public Policy.

Note: No more than three hours credit from PO SC 310, 311, 312, 409, and 410 may be applied toward a Political Science major.

### PSYCHOLOGY

Psychology is the study of human and animal behavior and the biological, psychological, and social processes related to that behavior. The Bachelor’s degree in Psychology prepares students for a variety of professional careers related to human resources, personnel, counseling, and other people-oriented positions in human services, business, and industry. Additionally, the Bachelor’s degree provides excellent preparation for graduate training in such areas as clinical, counseling, industrial, experimental, cognitive, social, biological, health, developmental, and school psychology. The program also provides excellent preparation for students who intend to pursue professional training in medicine, physical or occupational therapy, dentistry, pharmacy, veterinary science, or law. Further information is available at www.clemson.edu/psych/.

### Change of Major into Psychology

Students who change majors into Psychology must have completed at least 12 credit hours at Clemson and must have a 2.4 minimum cumulative grade-point ratio.

### Bachelor of Arts

The Bachelor of Arts program requires PSYCH 201, 202, 309, 310, 492, and 19 additional credits selected from PSYCH 275 and/or 300-400-level psychology courses as arranged as follows:

- Two courses from the Biological and Cognitive menu: PSYCH 324, 333, 422

One course from each of the following menus:

- **Applied**—PSYCH 275, 355, 364, 368, 375, 435, 456, 480, 483, 488
- **Individuals and Groups**—PSYCH 340, 352, 370
- **Laboratory**—PSYCH 325, 334, 423, 456, 471, 1H490, 493, 495, 496, 497, 498

At least six credits must be from 400-level psychology courses, with at least three of those credits from psychology courses numbered between 400 and 489. BIOSC 470 may be taken in lieu of one elective psychology course. Students should consult their advisors for degree requirements and course recommendations.

1. See General Education Requirements. (Note: Two Cross-Cultural Awareness and two Mathematics courses are required.)
PSYCHOLOGY

Bachelor of Science
The Bachelor of Science program in Psychology requires PSYCH 201, 202, 309, 310, 492, and 19 additional credits selected from PSYCH 275 and/or 300–400-level psychology courses arranged as follows:

Two courses from the Biological and Cognitive Menu: PSYCH 324, 333, 422

One course from each of the following menus:

- **Applied**—PSYCH 275, 355, 364, 368, 375, 435, 456, 480, 483, 488
- **Foundations of Science**—G W 402, PHIL 326, 327, 425, PSYCH 415
- **Individuals and Groups**—PSYCH 340, 352, 370
- **Laboratory**—PSYCH 325, 334, 423, 456, 471, H 490, 493, 495, 496, 497, 498

At least six credits must be from 400-level psychology courses, with at least three of those credits from psychology courses numbered between 400 and 489. BIO SCI 470 may be taken in lieu of one elective psychology course. Students should consult their advisors for other degree requirements and course recommendations.

120 Total Semester Hours

*Biology 110 and 111 may be substituted. In this case, the extra two credit hours will count toward the Science Requirement.

1See major requirements in program description above.

2See General Education Requirements. (Note: Three courses in mathematics are required.)

3See major requirements in program description above.

4See General Education Requirements. A two-semester sequence in the same natural science other than biology is required.

5See General Education Requirements. A two-semester sequence in the same natural science other than biology is required.

6Select any minor listed on page 83.

7Three credit hours, in addition to the Natural Science Requirement, in any natural or physical science are required.

SOCIOMETRY

The Sociology major offers two degree programs: a Bachelor of Arts and a Bachelor of Science. Both degrees prepare students for a variety of professional careers related to human resources, management, public relations, social services, criminal justice, health services, social research, and other people-oriented positions in the public and private sector. In addition, the Bachelor’s degree provides excellent preparation for graduate training in sociology, anthropology, social services, law, and business. Both degrees require a total of 121 semester hours, including 34 credit hours in sociology and/or anthropology, as identified below. Courses used to fulfill General Education Requirements may be used to fulfill minor requirements.

Change of Major into Sociology

Students who change majors into Sociology must have completed at least 12 credit hours at Clemson and must have a 2.0 minimum cumulative grade-point ratio.

Emphasis Areas in Sociology

- Community Studies—R S (SOC) 459, SOC 331, 431 (R S) 495; and nine credits from all courses offered in anthropology or sociology not already taken to fulfill requirements.

- Criminal Justice—SOC 290, 293; nine credits selected from SOC 391, 392, 396, 397, 491, 493, 494, (R S) 495; and three credits from all courses offered in anthropology or sociology not already taken to fulfill requirements.

- Social Services—SOC 380, 414, (R S) 495; and nine credits from all courses offered in anthropology or sociology not already taken to fulfill requirements.

General Sociology—12 credit hours selected from ANTH 201, SOC 202, 311, 330, 331, 350, 351, 380, 391, 414, 430, 432, (R S) 471, 480, 481, (R S) 495; and six additional credits from all courses offered in anthropology or sociology not already taken to fulfill requirements.

At least 12 of the total credits must be from 400-level sociology, rural sociology, and/or anthropology courses; no more than nine credit hours may be taken in courses at the 100 or 200 level, except with approval of the department chair. Additional electives are added to meet the minimum of 121 hours required for graduation.

Substance Abuse Certificate Program

The Substance Abuse Certificate Program is an interdisciplinary program drawn from courses in sociology, education, health, and psychology. Students study the causes, consequences, prevention, and treatment of substance abuse. They also study delivery systems and policy issues associated with legal and illicit substances. Through field placement, students come face to face with the problem and gain practical experience to prepare them to enter the field of practicing specialists. The credential requires knowledge in theory and treatment of substance abuse problems.

Junior Year

First Semester
3 - ANTH 301 Cultural Anthropology or
3 - SOC 433 Globalization and Social Change
3 - ENGL 314 Technical Writing
4 - SOC (R S) 303 Methods of Social Research I
3 - Emphasis Area Requirement
3 - Philosophy Requirement
1 - Elective
17

Second Semester
3 - Advanced Humanities Requirement
6 - Emphasis Area Requirement
3 - Minor Requirement
3 - Elective
15

Senior Year

First Semester
3 - Arts and Humanities (Non-Lit.) Requirement
3 - Departmental Math or Science Requirement
6 - Minor Requirement
3 - Science and Tech. in Society Requirement
15

Second Semester
3 - Arts and Humanities (Non-Lit.) Requirement
3 - Departmental Math or Science Requirement
6 - Minor Requirement
3 - Science and Tech. in Society Requirement
15

Note:
1. See General Education Requirements. (Note: Social Science Requirement must be in an area other than anthropology or sociology.)
2. See advisor. At least six of the 15 hours must be at the 300 level or above.
3. See page 83 for approved minors.
4. Humanities courses numbered 300 or higher (A A H 210, MUSIC 210, THEA 210 excepted). The humanities for this purpose include art and architectural history, communication studies (except 364 and 368), English (except 304, 312, 314, 316, 333, 334, 335, 485, 490, 495), languages, music, philosophy, religion, theatre (except 377, 487, 497), and women's studies, as well as courses entitled Humanities. See emphasis area requirements in program description above.
5. May not be used to fill the 34 credits for the major.
6. Humanities courses numbered 300 or higher (A A H 210, MUSIC 210, THEA 210 excepted). The humanities for this purpose include art and architectural history, communication studies (except 364 and 368), English (except 304, 312, 314, 316, 333, 334, 335, 485, 490, 495), languages, music, philosophy, religion, theatre (except 377, 487, 497), and women's studies, as well as courses entitled Humanities. See emphasis area requirements in program description above.
7. See General Education Requirements. (Note: Social Science Requirement must be in an area other than anthropology or sociology.)
8. Humanities courses numbered 300 or higher (A A H 210, MUSIC 210, THEA 210 excepted). The humanities for this purpose include art and architectural history, communication studies (except 364 and 368), English (except 304, 312, 314, 316, 333, 334, 335, 485, 490, 495), languages, music, philosophy, religion, theatre (except 377, 487, 497), and women's studies, as well as courses entitled Humanities. See emphasis area requirements in program description above.
9. Humanities courses numbered 300 or higher (A A H 210, MUSIC 210, THEA 210 excepted). The humanities for this purpose include art and architectural history, communication studies (except 364 and 368), English (except 304, 312, 314, 316, 333, 334, 335, 485, 490, 495), languages, music, philosophy, religion, theatre (except 377, 487, 497), and women's studies, as well as courses entitled Humanities. See emphasis area requirements in program description above.

MINORS

Following are minors acceptable for students in the College of Business and Behavioral Science. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting
Adult/Extension Education
Aerospace Studies
Agricultural Business Management
Agricultural Mechanization and Business
American Sign Language Studies
Animal and Veterinary Sciences
Anthropology
Athletic Leadership
Biochemistry
Bioengineering
Biological Sciences
Business Administration—*not open to Accounting, BS Economics, Financial Management, Industrial Management, Management, or Marketing majors*
Chemistry
Cluster
Communication Studies
Community Recreation, Sport, and Camp Management
Computer Science
Crop and Soil Environmental Science
East Asian Studies
Economics
Education—*not open to Graphic Communications majors*
English
Entomology
Entrepreneurship—*not open to Accounting, BS Economics, Financial Management, Industrial Management, Management, or Marketing majors*
Environmental Engineering
Environmental Science and Policy
Equine Business
Film Studies
Financial Management
Food Science
Forest Products
Forest Resource Management
Genetics
Geography
Geology
Global Politics—*not open to Political Science majors*
Great Works
History

Horticulture
International Engineering and Science
Legal Studies
Management—*not open to Industrial Management majors*
Management Information Systems—*not open to Industrial Management or Management Majors*
Mathematical Sciences
Microbiology
Military Leadership
Modern Languages
Music
Natural Resource Economics
Nonprofit Leadership
Packaging Science
Pan African Studies
Park and Protected Area Management
Philosophy
Physics
Plant Pathology
Political Science
Psychology
Public Policy—*not open to Political Science majors*
Religion
Russian Area Studies
Science and Technology in Society
Screenwriting
Sociology
Spanish-American Area Studies
Textiles
Theatre
Therapeutic Recreation
Travel and Tourism
Turfgrass
Urban Forestry
Wildlife and Fisheries Biology
Women’s Studies
Writing

See pages 36–39 for details.
COLLEGE OF ENGINEERING AND SCIENCE

The College of Engineering and Science offers a broad range of rigorous and stimulating baccalaureate programs which provide unexcelled educational opportunities. The innovative combination of engineering and science disciplines which comprises the College facilitates study and research in fields transcending the traditional disciplines. Students enjoy close interaction with a distinguished faculty committed to excellence in undergraduate education as well as in research. Additional information on the College and its programs is available at www.clemson.edu.

Minors

Engineering and science students can complement their majors by selecting minor concentrations of study. Available minors include Bioengineering, Environmental Engineering, International Engineering and Science, one in each of the science majors, and in Textiles. (See page 102.)

International Programs

The world economy has become very tightly integrated, making it highly important that engineering and science students prepare themselves for this global environment. The College offers a minor in International Engineering and Science coupled with several programs that provide opportunities for students to gain international experience. These include study abroad at many locations around the world and EPIC (an international co-op program). In addition, engineering and science students are encouraged to pursue study of a foreign language. Information is available in the Undergraduate Studies Office (107 Riggs Hall) and at www.ces.clemson.edu/ global.

ENGINEERING PROGRAMS

The Bachelor of Science engineering degrees in Biosystems Engineering, Ceramic and Materials Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, and Mechanical Engineering are each accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). The Biosystems Engineering program is administered jointly with the College of Agriculture, Forestry, and Life Sciences. The new BS in Bioengineering is designed with the College of Agriculture, Forestry, and Life Sciences. The new BS in Bioengineering is designed to ABET for accreditation review when eligible.

Each engineering program has additional objectives specific to the discipline. All prepare students for a wide range of career opportunities and provide sound preparation for graduate study. Each curriculum provides opportunities for students to pursue individual areas of interest.

Admission Requirements

The University admission requirements are given under the section entitled Admission. Engineering applicants are strongly advised to include the following in their high school programs:

- Mathematics—Four units, including geometry, trigonometry, and introductory calculus
- Laboratory Science—At least three units, including both chemistry and physics
- Computing—At least one unit, including introduction to a programming language. Applicants should have good keyboarding skills.

General Engineering Program

All new engineering students (including transfer students who have not completed all courses in the freshman engineering curriculum) are admitted into General Engineering. The General Engineering Program provides students an opportunity to explore various engineering fields while getting a sound academic preparation for engineering study. To prepare students for entry into a specific engineering degree program, the second semester of the curriculum includes a Major Requirement of 6-7 credits. Additional information can be found at www.clemson.edu/gel/

Freshman Curriculum

First Semester

1. CES 102 Engineering Disciplines and Skills
2. ENGL 103 Accelerated Composition
3. MTHSC 106 Calculus of One Variable I
4. Arts and Humanities Requirement
   or
   3 - Social Science Requirement
   16

Second Semester

4. MTHSC 108 Calculus of One Variable II
   or
   3 - Physics Requirement
   3 - Arts and Humanities Requirement
   or
   3 - Social Science Requirement
   6-7 - Major Requirement
   16-17

n See Policy on Humanities and Social Sciences for Engineering Curricula below.

Registration Requirements

A cumulative grade-point ratio of 2.0 or higher is required for registration in engineering courses numbered 300 or higher. Priority for registration in engineering courses is given to those majors for whom the course is a degree requirement. Exceptions to this requirement may be granted by the department offering the course.

Admission into Engineering Degree Programs

Students should initiate a change-of-major request prior to the registration period during the semester when they expect to complete the freshman curriculum. Students who fail to meet the requirements for admission into a degree program may remain in General Engineering until those requirements are met; however, General Engineering majors are not permitted to take 300- or 400-level engineering courses. Engineering departments may allow General Engineering majors to enroll in selected 200-level engineering courses (policy varies by department). Students transferring into an engineering degree program will follow the curriculum in effect at the time of transfer.

Humanities and Social Sciences for Engineering Curricula

Engineers have an obligation to practice their profession in a socially responsible manner. The education of engineers must prepare them for this responsibility and make them aware of the constraints imposed by societal and cultural factors. Thus, the humanities and social sciences are an important component of the engineering curriculum. Further, the program of study must include educational experiences addressing the intersection of science and technology with society and cross-cultural awareness.

Engineering curricula include a minimum of 15 credits of humanities/social science courses selected so as to satisfy the University’s General Education Arts and Humanities and Social Science Requirements, as well as specific program objectives. Individual engineering curricula may have more specific requirements or may require more than 15 hours of humanities/social science courses. A list of acceptable courses is available at www.ces.clemson.edu/main/students/undergrad/humanities_policy.htm.

Electives for Engineering Curricula

Advisors must approve any course taken for elective credit in the Engineering curriculum. Courses excluded for elective credit include PHYS 200, 207/209, 208/210.

Suggested Curricula

The Bachelor of Science degree in Engineering offers the following concentrations:

- Mechanical Engineering
- Civil Engineering
- Electrical Engineering
- Computer Engineering
- Chemical Engineering
- Environmental Engineering
- Materials Engineering
- Bioengineering
- Industrial Engineering
- Biomedical Engineering
- Engineering Management
- Environmental Science
- Engineering and Science
- International Engineering and Science
- Textiles

Specific course requirements, including prerequisites and co-requisites, are specified for each concentration. Additional information on these concentrations is available in the Undergraduate Studies Office (107 Riggs Hall) and at www.ces.clemson.edu/.

For more information, please visit the College of Engineering and Science website at www.clemson.edu/ces/.

Graduation Requirements

In addition to other institutional requirements, candidates for a baccalaureate degree in Engineering are required to have a 2.0 or higher cumulative grade-point ratio in all engineering courses taken at Clemson. All courses with “Engineering” in the course designator (e.g., ENGR 130, M E 453, etc.) are used in this calculation.

The baccalaureate programs in Engineering are designed to be completed in four years (eight regular semesters). Taking a reduced load or participating in cooperative education will extend this time. On average, Clemson engineering students take about four and one-half years to complete the requirements for graduation.

BIOENGINEERING

Bachelor of Science

The undergraduate program in Bioengineering is built upon a rigorous engineering science foundation that is, in turn, based upon a broad curriculum of applied and life sciences, mathematics, electives in humanities, social science, and design. Students select a formal focus that concentrates in a subfield of interest in bioengineering: Biomaterials Concentration or Bioelectrical Concentration.

The curriculum provides undergraduates with a solid background in engineering and life sciences in preparation for advanced studies. Through the Bioengineering program, graduates acquire an understanding of biology, biochemistry, and physiology and the capability to apply advanced mathematics including differential equations and statistics, science, and engineering to solve the problems at the interface of engineering and biology. Graduates also have an ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and nonliving materials and systems.

Combined Bachelor’s/Master’s Plan

Bioengineering undergraduates may begin a Master of Science degree program while completing the Bachelor of Science degree and use a limited number of courses to satisfy the requirements of both the undergraduate and graduate degrees. Details are available from the Department of Bioengineering.

BIOELECTRICAL CONCENTRATION

Freshman Year

First Semester

2 - CES 102 Engineering Disciplines and Skills
3 - ENGL 103 General Chemistry
3 - ENGL 103 Accelerated Composition
4 - MTHSC 106 Calculus of One Variable I
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester

4 - CH 102 General Chemistry
3 - ENGR 141 Programming and Problem Solving
4 - MTHSC 108 Calculus of One Variable II
3 - PHYS 122 Physics with Calculus I
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1
1 - Biology Requirement2

Sophomore Year

First Semester

3 - BIO E 201 Intro. to Biomedical Engineering
3 - E C E 201 Logic and Computing Devices
3 - E C E 202 Electric Circuits I
1 - E C E 211 Electrical Engineering Lab. I
4 - MTHSC 206 Calculus of Several Variables
3 - PHYS 221 Physics with Calculus II

Second Semester

3 - C M E 210 Introduction to Materials Science
1 - E C E 212 Electrical Engineering Lab. II
3 - E C E 262 Electric Circuits II
3 - M E 201 Engineering Mechanics: Statics
4 - MTHSC 208 Intro. to Ordinary Diff. Equations

Junior Year

First Semester

4 - CH 201 Survey of Organic Chemistry
1 - E C E 311 Electrical Engineering Lab. III
3 - E C E 320 Electronics
3 - E C E 330 Signals, Systems, and Transforms
3 - E C E 382 Electromagnetics
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester

3 - BIO E 301 Biomaterials
3 - BIO E 320 Biostatistics
3 - BIOE 390 Essential Elements of Biochem.
6 - E C E Technical Requirement2

Senior Year

First Semester

3 - BIO E 320 Biomechanics
4 - BIOSC 315 Functional Human Anatomy
3 - BIOSC 461 Cell Biology
2 - BIOSC 462 Cell Biology Lab.
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester

1 - BIO E 400 Senior Seminar
1 - BIO E 401 Biomedical Design
3 - BIO E 488 Tissue Engineering
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1
6 - Bioengineering Technical Requirement2

128 Total Semester Hours

Notes:

1. Students planning to enter medical school should take CH 221/222 instead of CH 201 and take CH 224/225 as an additional course sequence.
2. Students must have earned a C or better in each course in the General Engineering freshman curriculum including the Arts and Humanities/Social Science Requirements.
3. All Bioelectrical Concentration students must have a cumulative engineering grade-point ratio of 2.0 to enroll in all 300- or 400-level E C E courses.

BIOENGINEERING CONCENTRATION

Freshman Year

First Semester

3 - CES 102 Engineering Disciplines and Skills
3 - CH 101 General Chemistry
3 - ENGR 101 General Chemistry
3 - ENGL 103 Accelerated Composition
3 - MTHSC 106 Calculus of One Variable I
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester

1 - BIO E 101 Biology for Bioengineers
4 - CH 102 General Chemistry
3 - ENGR 130 Engineering Fundamentals
4 - MTHSC 108 Calculus of One Variable II
3 - PHYS 122 Physics with Calculus I
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Sophomore Year

First Semester

3 - BIO E 201 Intro. to Biomedical Engineering
3 - CES 102 Engineering Disciplines and Skills
4 - CH 101 General Chemistry
3 - ENGL 103 Accelerated Composition
3 - MTHSC 106 Calculus of One Variable I
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester

3 - BIO E 301 Biomaterials
1 - BIO E 320 Biostatistics
3 - BIOE 390 Essential Elements of Biochem.
6 - E C E Technical Requirement2

Junior Year

First Semester

3 - BIO E 320 Biomechanics
4 - BIOSC 315 Functional Human Anatomy
3 - BIOSC 461 Cell Biology
2 - BIOSC 462 Cell Biology Lab.
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester

3 - BIO E 301 Biomaterials
1 - BIO E 211 Biology for Bioengineers
4 - CH 102 General Chemistry
3 - ENGR 130 Engineering Fundamentals
4 - MTHSC 108 Calculus of One Variable II
3 - PHYS 122 Physics with Calculus I
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Notes:

1. To transfer from General Engineering into the Bioengineering degree program, students must have a minimum cumulative grade-point ratio of 3.0 in courses taken at Clemson and must have earned a C or better in each course in the General Engineering freshman curriculum including the Arts and Humanities/Social Science Requirements.
2. A student is allowed to enroll in E C E courses (excluding E C E 307, 308, 309) only when all prerequisites have been passed with a grade of C or better.
3. All Bioelectrical Concentration students must have a cumulative engineering grade-point ratio of 2.0 to enroll in all 300- or 400-level E C E courses.
4. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any E C E course.
Second Semester
3 - BIOCH 305 Essential Elements of Biochem.
3 - C M E 422 Mechanical Behavior of Materials
3 - MTHSC 302 Statistics for Science and Engr.
3 - Bioengineering Technical Requirement1
3 - Arts and Humanities Requirement2 or 3 - Social Science Requirement1
15

Senior Year
First Semester
3 - BIO E 370 Bioinstrumentation and Bioimaging
3 - BIOSC 461 Cell Biology
3 - BIO E 448 Tissue Engineering
3 - Arts and Humanities Requirement1 or 3 - Social Science Requirement1
3 - Bioengineering Technical Requirement1
13
128 Total Semester Hours

1See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.
2Students planning to enter medical school should take CH 223/227 instead of CH 201 and take CH 224/228 as an additional course sequence.
3Select from department-approved list.

Note: To transfer from General Engineering into the Biosystems degree program, students must have a minimum cumulative grade-point ratio of 3.0 in courses taken at Clemson and must have earned a C or better in each course in the General Engineering freshman curriculum including the Arts and Humanities/Social Science Requirements.

BIOSYSTEMS ENGINEERING

Bachelor of Science
The principal objective of the Biosystems Engineering program is to educate and prepare students for a wide range of engineering endeavors involving biological entities. Two main areas are supported: engineering for management of natural resources and the environment and engineering for production of value-added products from bioprocessing technologies.

Biosystems engineers work at the interface between engineering and life sciences and must be knowledgeable in both disciplines. In addition to the common objectives of all engineering programs listed on page 84, Biosystems Engineering students should achieve familiarity with both biosystems concentrations, experience an interdisciplinary education, and develop a career goal of professional recognition and licensure.

Students develop specialization in one of two concentrations. The Applied Biotechnology Concentration equips students to apply engineering and biological sciences to problem solving for biological systems and production of value-added bioproducts in a wide range of industries. The Natural Resources and Environment Concentration equips students to apply engineering, agricultural, and environmental sciences to assess and control the impact of human activities on the biosphere.

Students are urged to complete a minor and participate in the Cooperative Education, Biosystems Engineering Intern, and/or Study Abroad Programs. Those interested in medical careers should consider graduate study and/or medical school.

Additional information is available from the departmental offices or at www.clemson.edu/agsbioeng/home.htm.

Combined Bachelor of Science in Biosystems Engineering/Master of Science in Bioengineering

Under this plan, students in Biosystems Engineering may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. See Academic Regulations in this catalog for enrollment guidelines and procedures.

Students in the Applied Biotechnology Concentration may apply graduate credits toward a Master of Science Degree in Bioengineering while pursuing a Bachelor of Science Degree in Biosystems Engineering. Students are encouraged to obtain the specific requirements for the major degree from the Department of Biosystems Engineering as early as possible in their undergraduate program.

APPLIED BIOTECHNOLOGY CONCENTRATION

Freshman Year
First Semester
2 - CES 102 Engineering Disciplines and Skills
3 - CH 101 General Chemistry
4 - ENGL 103 Accelerated Composition
3 - MTHSC 106 Calculus of One Variable I
3 - Arts and Humanities Requirement1 or 3 - Social Science Requirement1
16

Second Semester
4 - CH 102 General Chemistry
2 - ENGR 130 Engineering Fundamentals
4 - MTHSC 108 Calculus of One Variable II
3 - PHYS 122 Physics with Calculus I
3 - Arts and Humanities Requirement1 or 3 - Social Science Requirement1
16

Sophomore Year
First Semester
2 - B E 210 Intro. to Biosystems Engineering
4 - MTHSC 206 Calculus of Several Variables
3 - PHYS 221 Physics with Calculus II
4 - Biology Requirement2
3 - Statics Requirement2
16

Second Semester
2 - B E 212 Fundamentals of Biosystems Engr.
2 - E G 209 Intro. to Engr./Computer Graphics
3 - M E 310 Thermodynamics and Heat Transfer or 3 - CH E 220 Chem. Engr. Thermodynamics I
4 - MICRO 305 General Microbiology
4 - MTHSC 208 Intro. to Ordinary Diff. Equations
2 - Dynamics Requirement2
17

Junior Year
First Semester
3 - B E 312 Biol. Kinetics and Reactor Modeling
4 - C E 341 Introduction to Fluid Mechanics or 4 - CH E 230 Fluids/Heat Transfer
2 - E C E 307 Basic Electrical Engineering
3 - Mechanics of Materials Requirement2
4 - Organic Chemistry Requirement1
16

Second Semester
4 - B E 314 Biosystems Engr. Mechanical Design or 4 - M E 306 Fundamentals of Machine Design
3 - B E 412 Heat and Mass Transport in B E
2 - B E 415 Instrumentation and Control for Biosystems Engineers
2 - (CH E) 425 Biochemical Engineering
4 - Biochemistry Requirement4
17

Senior Year
First Semester
3 - B E 414 Biosystems Engr. Unit Operations
3 - B E 438 Bioprocess Engineering Design
2 - B E 474 Biosystems Engr. Design/Project Mgt.
6 - Arts and Humanities Requirement1 or 6 - Social Science Requirement1
3 - Life Science Requirement1
17

Second Semester
3 - B E 435 Appl. in Biotechnology Engineering
2 - B E 475 Biosystems Engr. Capstone Design
3 - Arts and Humanities Requirement1 or 3 - Social Science Requirement1
3 - Engineering Requirement1
2 - Elective
13
128 Total Semester Hours

1See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.
2See advisor. Select from department-approved list.
3CH 223 and 227 (preferred) or CH 201
4BIOCH 301/302 or 305/306
5MICRO 413 or any approved 300-400-level course in BIOCH, BIOSC, GEN, or MICRO

Notes: 1. Biosystems Engineering students are allowed to enroll in upper-level B E courses only when the following prerequisites have been completed with C or better: C E 206, 208, 341, CH E 222, 230, E M 201, 202, M E 201, 302, 310, MTHSC 206, 208, PHYS 221.
2. Students accepted to a combined BS/MS program must take 600-level instead of 400-level courses for Life Science and Engineering Requirements.
3. To complete premedicine requirements, students must take BIOL 105, 106, or 111, CH 224, 228, and PHYS 124, 223 as additional courses.
NATURAL RESOURCES
AND ENVIRONMENT
CONCENTRATION

128 Total Semester Hours

CERAMIC AND MATERIALS ENGINEERING
Bachelor of Science

The School of Materials Science and Engineering offers undergraduate degrees in Ceramic and Materials Engineering, Polymer and Fiber Chemistry, and Textile Management.

Ceramic and materials engineers design, develop, and participate in the manufacture of both standard and new materials intended for use in a wide variety of industries with diverse applications. These range from the traditional materials industries such as structural clay, foundry, or whiteware industries to the newer industries such as the semiconductor or aerospace industries. The broad career responsibilities of this discipline require competence in science, engineering, mathematics, and the social sciences. The curriculum develops skills in problem solving, engineering analysis, and design as well as oral and written communication.

The baccalaureate program integrates laboratory with classroom experiences to prepare students for life-long learning. Courses covering thermodynamics, kinetics, mechanics, processing, and characterization of materials prepare students for careers in industry and/or for graduate school.

In addition to the common educational objectives of all engineering programs, baccalaureate degree graduates in Ceramic and Materials Engineering will be able to

- demonstrate learning consistent with Accreditation Board for Engineering and Technology Engineering Criteria 2000 for ceramic and materials engineering programs
- function easily and well in the laboratory and plant environments and
- serve the local, national, and international ceramic and materials communities

Specifically, the Accreditation Board for Engineering and Technology Engineering Criteria 2000 requires that baccalaureate degree graduates in Ceramic and Materials Engineering be able to

- apply advanced scientific and engineering principles to materials systems
- demonstrate an integrated understanding of the scientific and engineering principles underlying structure, properties, processing, and performance relationships
- apply this understanding to the solution of ceramic and materials engineering selection and design problems and
- apply appropriate experimental, statistical, and computational methods to advantage in the solution of ceramic and materials problems

Freshman Year
First Semester
2 - CES 102 Engineering Disciplines and Skills
4 - CH 101 General Chemistry

Second Semester
1 - C M E 241 Metrics Lab.
2 - E G 209 Intro. to Engr./Comp. Graphics
3 - E M 201 Engineering Mechanics: Statics
3 - MS&E 324 Statistics for Materials Science and Engineering
4 - MTHSC 208 Intro. to Ordinary Diff. Equations
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1
16
### Junior Year

#### First Semester
- 3 - C M E 319 Materials Processing I
- 3 - C M E 326 Thermodynamics of Materials
- 3 - C M E 327 Transport Phenomena
- 3 - COMM 250 Public Speaking
- 3 - ENGL 314 Technical Writing

#### Second Semester
- 3 - C M E 328 Phase Diagrams for Materials Processing and Applications
- 2 - C M E 342 Structure/Property Lab.
- 3 - C M E 361 Process of Metals and Composites
- 3 - C M E 422 Mechanical Behavior of Materials
- 3 - I E 384 Engineering Economic Analysis
- 3 - PFC 303 Textile Chemistry

### Senior Year

#### First Semester
- 3 - C M E 402 Solid State Materials
- 3 - C M E 413 Noncrystalline Materials
- 3 - C M E 432 Manufacturing Processes and Syst.
- 1 - C M E 441 Manufacturing Lab.
- 3 - PFC 415 Intro. to Polymer Science and Engr.
- 3 - Research Requirement

#### Second Semester
- 3 - C M E 407 Senior Capstone Design
- 3 - C M E 416 Electronic Properties of Materials
- 3 - C M E 424 Optical Materials and Applications
- 3 - C M E 433 Combustion Systems and Environmental Emissions
- 1 - C M E 445 Practice of Materials Engineering

125 Total Semester Hours

### Second Semester

1See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

2See advisor.

### CHEMICAL ENGINEERING

#### Bachelor of Science

The Department of Chemical and Biomolecular Engineering offers the Bachelor of Science degree in Chemical Engineering. Chemical Engineering students select one of several emphasis areas (such as environmental or polymer engineering), a concentration in Biomolecular Engineering (to prepare them for medical school or a career in biotechnology), or any approved minor.

Chemical engineering is based on chemistry, biology, physics, and mathematics. The curriculum at Clemson includes classroom and laboratory instruction and emphasizes broadly applicable fundamental principles and current technology to prepare graduates for professional practice and professional growth. Graduates will have careers characterized by success in chemical engineering practice, postgraduate education, or other areas such as medicine and law that make use of engineering skills; demonstrated success in the design of chemical processes and/or identification, formulation, and solution of chemical engineering problems; ethical behavior in all endeavors; demonstrated effectiveness in teamwork, communication, and service to society through their professional contributions; demonstrated technical and/or managerial leadership; and demonstrated commitment to lifelong learning.

Chemical engineers are involved in the research, manufacture, sales, and use of commodity and specialty chemicals, fuels, pharmaceuticals, electronic components, synthetic fibers and textiles, food and consumer goods, and many other products. They work on environmental pollution prevention and remediation and apply engineering science to solve medical and health-related problems.

The Department of Chemical and Biomolecular Engineering also offers advanced study leading to the Master of Science and Doctor of Philosophy degrees. Additional information is available at www.ces.clemson.edu/chemeng.

### Freshman Year

#### First Semester
- 2 - CES 102 Engineering Disciplines and Skills
- 4 - CH 101 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 4 - MTHSC 106 Calculus of One Variable I
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement

#### Sophomore Year

#### First Semester
- 3 - CH 223 Organic Chemistry
- 4 - CH E 211 Intro. to Chemical Engineering
- 4 - MTHSC 206 Calculus of Several Variables
- 4 - PHYS 221 Physics with Calculus I
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement

#### Second Semester
- 3 - CH 224 Organic Chemistry
- 1 - CH 229 Organic Chemistry Lab.
- 3 - CH E 220 Chemical Engr. Thermodynamics I
- 4 - CH E 230 Fluids/Heat Transfer
- 4 - MTHSC 208 Intro. to Ordinary Diff. Equations

#### Junior Year

#### First Semester
- 1 - CH 339 Physical Chemistry Lab.
- 3 - CH E 307 Unit Operations Lab. I
- 3 - CH E 319 Engineering Materials
- 2 - E C E 307 Basic Electrical Engineering
- 1 - E C E 309 Electrical Engineering Lab. I
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement
- 3 - Biochemistry Requirement

### Second Semester
- 3 - CH 332 Physical Chemistry
- 1 - CH 340 Physical Chemistry Lab.
- 3 - CH E 321 Chemical Engr. Thermodynamics II
- 4 - CH E 330 Mass Transfer and Separation Proc.
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement
- 3 - Emphasis Area Requirement

#### Senior Year

#### First Semester
- 3 - CH E 407 Unit Operations Lab. II
- 3 - CH E 431 Chemical Process Design I
- 1 - CH E 443 Chemical Engr. Senior Seminar I
- 3 - CH E 450 Chemical Reaction Engineering
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement
- 3 - Emphasis Area Requirement

17127 Total Semester Hours

2See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

3See advisor for details. Nine credit hours devoted to completion of an emphasis area or approved minor are required. Emphasis areas are Applied Engineering, Mathematics, and Science; Biomolecular Science and Engineering; Biomedical Science and Engineering; Polymeric Materials; Management; Environmental Engineering; Polymeric Materials.

Note: No student may exceed a maximum of two attempts, including a W, to complete successfully any CH E course.

### BIOMOLECULAR ENGINEERING CONCENTRATION

#### Freshman Year

#### First Semester
- 2 - CES 102 Engineering Disciplines and Skills
- 4 - CH 101 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 4 - MTHSC 106 Calculus of One Variable I
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement

#### Second Semester
- 3 - CH 223 Organic Chemistry
- 1 - CH 229 Organic Chemistry Lab.
- 3 - CH E 220 Chemical Engr. Thermodynamics I
- 4 - CH E 230 Fluids/Heat Transfer
- 4 - MTHSC 208 Intro. to Ordinary Diff. Equations

#### Junior Year

#### First Semester
- 1 - CH 339 Physical Chemistry Lab.
- 3 - CH E 307 Unit Operations Lab. I
- 3 - CH E 319 Engineering Materials
- 2 - E C E 307 Basic Electrical Engineering
- 1 - E C E 309 Electrical Engineering Lab. I
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement
- 3 - Biochemistry Requirement

#### Second Semester
- 3 - CH 332 Physical Chemistry
- 1 - CH 340 Physical Chemistry Lab.
- 3 - CH E 321 Chemical Engr. Thermodynamics II
- 4 - CH E 330 Mass Transfer and Separation Proc.
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement
- 3 - Emphasis Area Requirement

#### Senior Year

#### First Semester
- 3 - CH E 407 Unit Operations Lab. II
- 3 - CH E 431 Chemical Process Design I
- 1 - CH E 443 Chemical Engr. Senior Seminar I
- 3 - CH E 450 Chemical Reaction Engineering
- 3 - Arts and Humanities Requirement or 3 - Social Science Requirement
- 3 - Emphasis Area Requirement

17127 Total Semester Hours

2See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

3See advisor for details. Nine credit hours devoted to completion of an emphasis area or approved minor are required. Emphasis areas are Applied Engineering, Mathematics, and Science; Biomolecular Science and Engineering; Biomedical Science and Engineering; Polymeric Materials; Management; Environmental Engineering; Polymeric Materials.

Note: No student may exceed a maximum of two attempts, including a W, to complete successfully any CH E course.
### CIVIL ENGINEERING

**Bachelor of Science**

Civil Engineering involves the planning, design, construction management, operation, and maintenance of facilities and systems in the built environment including bridges, buildings, airports, water supply systems, ports, dams, and highways.

The Bachelor of Science degree program in Civil Engineering includes the common educational goals listed on page 84 for the College of Engineering and Science. The complete objectives of the program can be found at [www.cc.clemson.edu](http://www.cc.clemson.edu).

The first two years provide students with building blocks necessary to be successful civil engineers, including proficiency in calculus, engineering mechanics, physics, and chemistry. During the junior year, students receive a broad introduction to the fundamental areas of civil engineering (structures, hydraulics, geotechnical, transportation, environmental, construction materials, and construction engineering and management). Design experiences are integrated throughout the curriculum, culminating in the senior year with a major capstone design project. In addition, during the senior year, students can select from available emphasis area which serves to strengthen their undergraduate background.

The Civil Engineering program prepares students to work immediately upon graduation in most areas of civil engineering or to pursue graduate degrees. Students are also exposed to professional practice, including professional registration, life-long learning, and communication and team skills. Because a concerned society demands a realistic consideration of the impact of engineering projects, civil engineering students are also educated in the broad areas of the humanities and social sciences.

The Department of Civil Engineering allows eligible students to count up to six hours of graduate credits (500- and 800-level courses) toward both the bachelor’s and master’s degrees. Students participating in this program must have completed the junior year, must have earned a minimum 3.4 grade-point ratio, and must be approved by the department. Details of the suggested curriculum and program information are available from the department.

### Freshman Year

**First Semester**
- CES 102 Engineering Disciplines and Skills
- CH 101 General Chemistry
- MTHSC 106 Calculus of One Variable
- ENGL 103 Accelerated Composition
- Social Science Requirement
- Technical Requirement
- Elective

**Second Semester**
- ENGR 130 Engineering Fundamentals
- GEOL 101 Physical Geology
- MTHSC 108 Calculus of One Variable II
- PHYS 122 Physics with Calculus I
- Elective

### Sophomore Year

**First Semester**
- E O 209 Intro. to Engr./Computer Graphics
- EM 201 Engineering Mechanics: Statics
- MTHSC 206 Calculus of Several Variables
- PHYS 221 Physics with Calculus II
- PHYS 223 Physics Lab. II
- Arts and Humanities Requirement
- Technical Requirement

**Second Semester**
- C E 206 Structural Mechanics
- C E 208 Civil Engineering Dynamics
- C E 235 Geomatics
- C E 332 Economic Evaluation of Projects
- MTHSC 208 Intro. to Ordinary Diff. Equations

### Junior Year

**First Semester**
- Arts and Humanities Requirement
- CH 223 Mass Transfer and Separation Proc.
- CH 221 Chemical Engineering Thermodynamics II
- C E 331 Construction Engineering and Mgt.
- Physics Requirement
- Technical Requirement

**Second Semester**
- E C 311 Transportation Engineering Planning and Design
- E C 321 Geotechnical Engineering
- E C 342 Applied Hydraulics and Hydrology
- C E 333 Professional Seminar
- C E 406 Structural Steel Design
- EE KS 401 Environmental Engineering

### Senior Year

**First Semester**
- C E 431 Structural Steel Design
- C E 402 Reinforced Concrete Design
- C E 403 Intro. to Civil Engineering
- C E 459 Capstone Design Project
- Technical Requirement
- Elective

**Second Semester**
- MTHSC 109 Intro. to Ordinary Diff. Equations
- Technical Requirement

120 Total Semester Hours

See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

Electrical Engineering Bachelor of Science

Electrical engineers are in high demand for a wide range of influential positions. Professional duties range from analytical problem solving to the design of components and systems. The scope of employment requires a unique breadth and depth of knowledge and technical skills, which are reflected in the Electrical Engineering program. This program also offers an excellent preparation for graduate education. Detailed information can be found at www.ece.clemson.edu/ece/index.shtml.

Building on a foundation of mathematical and physical sciences, students progress into the application of these in the engineering science areas of circuits, electronics, communications, controls, power, and electromagnetics. In these subjects, students also begin to apply the concepts and techniques learned in the design of circuits and systems. Senior technical design courses offer the opportunity to further develop expertise in a selected area.

In addition to these technical skills, students learn to communicate effectively, both orally and with the written word. Because engineers work for the benefit of society, the curriculum includes a strong component of humanities and social science courses. Also, many project design assignments enable the development of interpersonal, teamwork, and management skills which are necessary for success in a professional engineering career.

Freshman Year

First Semester
2 - CES 102 Engineering Disciplines and Skills
4 - CH 101 General Chemistry
3 - ENGL 103 Accelerated Composition
4 - MTHSC 106 Calculus of One Variable I
3 - Arts and Humanities Requirement1 or 3 - Social Science Requirement1

Second Semester
4 - CH 102 General Chemistry
3 - ENGR 141 Programming and Problem Solving
4 - MTHSC 108 Calculus of One Variable II
3 - PHYS 122 Physics with Calculus I
3 - Arts and Humanities Requirement1 or 3 - Social Science Requirement1

Sophomore Year

First Semester
3 - CP SC 111 Elementary Computer Programming in C/C++
3 - ECE 201 Logic and Computing Devices
3 - ECE 202 Electric Circuits I
1 - ECE 211 Electrical Engineering Lab. I
1 - ECE 211 Electrical Engineering Lab. I
4 - MTHSC 206 Calculus of Several Variables
3 - PHYS 221 Physics with Calculus II

1This may be substituted: CH 102; BIOL 120 and 121, 122, 123, or 124.
2Select from department-approved list.
3See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.
4See General Education Requirements.
5Note: 1) A student is allowed to enroll in ECE courses (excluding ECE 307, 308, 309) only when all prerequisites have been passed with a grade of C or better.
6All Computer Engineering students must have a cumulative engineering grade-point ratio of 2.0 to enroll in any 300- or 400-level ECE courses.
7No student may exceed a maximum of two attempts, excluding a W, to complete successfully any ECE course.
INDUSTRIAL ENGINEERING

Bachelor of Science
Industrial engineers design, install, and improve the complex systems that provide goods and services vital to our society and economy. These systems place unique demands for breadth of preparation on industrial engineers. Baccalaureate degree graduates demonstrate the ability to design, develop, implement, and improve integrated systems that include people, materials, information, equipment, and energy. Graduates will demonstrate the ability to apply the principles and techniques of industrial engineering analysis and design supported by a foundation in mathematical, physical, and social sciences, and economic, operational, and engineering analyses. Graduates will possess a breadth of knowledge that allows them to practice industrial engineering with an appropriate awareness of information issues in systems improvement. In addition, graduates are able to work and communicate effectively with colleagues at every level in the organization.

The traditional arenas for the practice of industrial engineering are the manufacturing facilities of industry; however, many practicing industrial engineers are employed in non-manufacturing institutions such as hospitals, banks, and government agencies. In addition to numerous employment opportunities in professional practice, industrial engineering graduates may further their formal education. The Department of Industrial Engineering offers programs leading to the Master of Science and Doctor of Philosophy degrees.

The Department of Industrial Engineering allows students to count up to 12 hours of graduate credit (approved 600- and 800-level courses) toward both the bachelor’s and master’s degrees. Students participating in this program must have a minimum grade-point ratio of 3.4 and be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the Industrial Engineering Department.

Detailed curriculum and department information is available at www.ces.clemson.edu/i.e.

Sophomore Year

126 Total Semester Hours

See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

Students may enroll in E C E 222 for a common semester with Computer Engineering. Those not selecting this option should complete the Technical Requirement (E C E) in the senior year.

Select from department-approved list.

MTHSC 434, 43S, 453, or 454

Notes:
1. A student is allowed to enroll in E C E courses (excluding E C E 307, 308, 309) only when all prerequisites have been passed with a grade of C or better.
2. All Electrical Engineering students must have a cumulative engineering grade-point ratio of 2.0 to enroll in any 300- or 400-level E C E courses.
3. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any E C E course.
MECHANICAL ENGINEERING

Bachelor of Science

Breadth, individuality, and flexibility are inherent characteristics of the mechanical engineering profession. Mechanical engineers, in a broad sense, make major contributions to the creation of products and systems that benefit mankind. They work in a variety of areas including bioengineering, energy systems, environmental and life-support systems, propulsion and transportation systems, food production, materials processing, automated manufacturing, and construction. A wide spectrum of career opportunities is open to them. The practice of mechanical engineering includes one or more of the following activities: manufacturing, testing, research, development, design, technical management, technical sales and marketing, construction, and teaching.

Preparation for a 40–45-year professional career requires development of the whole person through a balanced program encompassing the humanities, social sciences, communication and computer skills, physical and engineering sciences, design, and laboratory experience. Students start with the physical sciences and communication skills and progress through the engineering sciences, ultimately applying the principles learned in such areas as energy conversion and transfer, mechanical design, and systems analysis. Throughout the curriculum, the fundamental nature of engineering as a problem-solving discipline is emphasized.

Most graduates take positions in industry, government, or business. Many, however, continue their formal education in a graduate program. The Department of Mechanical Engineering offers study leading to the Master of Science and Doctor of Philosophy degrees.

Mechanical Engineering students who have cumulative grade-point ratio or cumulative engineering grade-point ratio (EGPR) below 2.0 are on probation and will have restricted enrollment in classes. Students whose cumulative grade-point ratio is below 2.0 are subject to the regulations stipulated under Academic Eligibility Policy. Students on probation for EGPR below 2.0 who fail to recover in the first regular semester (fall or spring) will not be allowed to register for mechanical engineering classes. After one year, such students may petition the Mechanical Engineering Department for continued enrollment. An advising policy for students on probation is available from the Mechanical Engineering Department.

Additional information can be found at www.ces.clemson.edu/me.

See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

SCIENCE PROGRAMS

The College offers curricula leading to the Bachelor of Science in Chemistry, Computer Information Systems, Computer Science, Geology, Mathematical Sciences, Physics, Polymer and Fiber Chemistry, and Textile Management. The Bachelor of Arts is offered in Chemistry, Computer Science, Geology, Mathematical Sciences, and Physics.

The science departments in the College work closely with the other academic departments in the University, including such disciplines as economics and management as well as engineering. This allows students in the sciences great flexibility and responsibility in designing their own programs.

Bachelor of Science Curricula

The Bachelor of Science degree prepares graduates for professional employment or graduate study in the chosen science discipline. BS curricula are more highly structured than BA curricula but nonetheless offer opportunity for students to pursue a minor or secondary area of interest.

Bachelor of Arts Curricula

The curricula leading to the Bachelor of Arts degree are designed to meet the needs of students who desire a broad general education. They require a minor (or a second major) as well as the major concentration. A major requires a minimum of 24 credits from courses above the sophomore level including or in addition to courses specified by the major department. In some major disciplines, certain prescribed courses at the sophomore level are counted toward the 24-credit requirement.

Students have a large degree of flexibility and responsibility in selecting a minor from those listed on page 102. Courses for these minors are to be selected in consultation with the appropriate department.

CHEMISTRY

Bachelor of Science

Chemistry, an experimental discipline based on observation guided by molecular theory, is of fundamental importance in much of modern science and technology. Its molecular concepts form the basis for ideas about complex material behavior. Due to the fundamental nature and extensive application of chemistry, an unusually large variety of challenging opportunities to contribute in the science-oriented community are open to students whose education is built around the principles of this discipline.

The Chemistry curriculum, through the career requirement options and the large number of electives, provides students the opportunity to select a coherent program of study beyond the basic courses. Career requirement options are provided for students
anticipating graduate study in chemistry or related fields; employment following the BS degree in laboratory, production, technical sales, or management positions; professional studies (e.g., medicine); chemical physics; geochemistry; and employment in fields requiring extensive preparation in courses other than sciences (e.g., patent law and technical writing). Significant features of the curriculum are the student's extensive participation in experimental work and the opportunity to take part in a research investigation during the junior and senior years.

### Freshman Year

**First Semester**
- 4 - CH 101 General Chemistry
- 1 - CH 141 Chemistry Orientation

### Computer Information Systems

#### Bachelor of Science

The Computer Information Systems degree program is oriented toward computer applications in management-related problems. The program emphasizes functional areas of management including accounting, production, marketing, and finance and the applications of computers in these areas. The curriculum is designed to prepare students for careers in areas such as systems design and analysis, applications programming, database administration, and information retrieval as well as for continued study toward an advanced degree.

Students who change majors into Computer Information Systems must have a cumulative grade-point ratio of 2.0 or higher.

Additional information can be found at [www.cs.clemson.edu](http://www.cs.clemson.edu).
### Freshman Year

**First Semester**
- CP SC 101 Computer Science I
- ENGL 103 Accelerated Composition
- MTHSC 106 Calculus of One Variable I
- Social Science Requirement

14

**Second Semester**
- CP SC 102 Computer Science II
- MTHSC 108 Calculus of One Variable II
- MTHSC 119 Introduction to Discrete Methods
- Arts and Humanities (Non-Lit.) Requirement
- Social Science Requirement

17

### Sophomore Year

**First Semester**
- CP SC 212 Algorithms and Data Structures
- Arts and Humanities (Literature) Requirement
- Humanities or Social Science Requirement
- Natural Science Requirement
- Oral Communication Requirement

17

**Second Semester**
- CP SC 215 Tools and Tech. for Software Dev.
- CP SC 231 Intro. to Computer Organization
- CP SC 291 Seminar in Professional Issues I
- MTHSC 210 Applied Matrix Algebra
- MTHSC 311 Linear Algebra
- Natural Science Requirement

15

### Junior Year

**First Semester**
- ACC 201 Financial Accounting Concepts
- CP SC 322 Introduction to Operating Systems
- CP SC 372 Intro. to Software Development
- ECON 211 Principles of Microeconomics
- MTHSC 301 Statistical Methods I

15

**Second Semester**
- CP SC 202 Managerial Accounting Concepts
- CP SC 360 Networks and Network Program.
- CP SC 371 Systems Analysis or
- MGT 452 Systems Analysis and Design
- MGT 201 Principles of Management

122 Total Semester Hours

See General Education Requirements. Three credit hours satisfying the Arts and Humanities or Social Science Requirement must also satisfy the Science and Technology Society Requirement.

Select from courses in A A H, ANT, ART, CHIN, COMM, DANCE, E A S, ECON, ENGL, FR, GEOG, GER, HIST, HUM, ITAL, JAPN, MUSCI, P A, P A S, PHIL, PO SC, PSYCH, REL, RUSS, SOC, SPAN, THEA, W S.

See General Education Requirements. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

Select from courses in A A H, ANTH, ART, CHIN, COMM, DANCE, E A S, ECON, ENGL, FR, GEOG, GER, HIST, HUM, ITAL, JAPN, MUSCI, P A, P A S, PHIL, PO SC, PSYCH, REL, RUSS, SOC, SPAN, THEA, W S.

Select from the following sequences: BIOL 103/105, 104/106, 110, 111; CH 101, 102; 105, 106; PHYS 122/124, 221/223; 207/209, 208/210.

Notes:
- A grade of C or better must be earned in all prerequisite courses (including CP SC and MTHSC courses) before enrolling in the next CP SC course.
- A grade of C or better must be earned in all prerequisite courses.
- The Computer Science program is oriented toward design, implementation, and application of software systems to solve information processing problems. Emphasis areas outside computer science allow students to tailor the program to the individual needs and interests. This program is more technically oriented than the Computer Information Systems curriculum. It prepares students for employment in the computer software field or for advanced study toward an advanced degree in computer science. This program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Additional information can be found at www.cs.clemson.edu.

Students who change majors into Computer Science must have a cumulative grade-point ratio of 2.0 or higher.

**Combined Bachelor's/Master's Plan**

The School of Computing allows students to count up to nine hours of graduate credit (600- and 800-level courses) toward both the bachelor's and master's degrees. Students participating in this program must have a minimum grade-point ratio of 3.4 and be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the Department.

**Freshman Year**

**First Semester**
- CP SC 101 Computer Science I
- ENGL 103 Accelerated Composition
- MTHSC 106 Calculus of One Variable I
- Social Science Requirement

14

**Second Semester**
- CP SC 102 Computer Science II
- MTHSC 108 Calculus of One Variable II
- MTHSC 119 Introduction to Discrete Methods
- Arts and Humanities (Non-Lit.) Requirement
- Social Science Requirement

17
COMPUTER SCIENCE

Bachelor of Arts

The Bachelor of Arts in Computer Science is ideal for students interested in acquiring a broad-based liberal arts education that includes a strong and solid understanding of computer science. The curriculum is oriented toward design, implementation, and application of computer software systems to solve information processing problems. The program prepares students for employment in the computer software field or for continued study toward an advanced degree in computer science. Additional information can be found at www.cs.clemson.edu.

Students who change majors into Computer Science must have a cumulative grade-point ratio of 2.0 or higher.

122 Total Semester Hours

Notes:
1. For graduation, a candidate for the BS degree in Computer Science must have earned a grade of C or better in each CP SC course applied to the degree.
2. A grade of C or better must be earned in all prerequisite courses (including CP SC and MTHSC courses) before enrolling in the next CP SC course.

GEOLGY

Bachelor of Science

Geology and biogeochemical environmental science involve the physics and chemistry of materials which comprise the earth, as well as the development and influence of life on earth and the environmental systems and processes involved. The chemical, physical, and biological responses to environments on and in the earth must be thoroughly understood at a fundamental level so that the history of the earth can be deduced, future changes and natural disasters might be predicted, and sustainable approaches to natural resources developed. We depend on many geological resources, for example, water from ground and surface systems, metals from minerals, and power from coal, petroleum, and radioactive minerals. Geology integrates the science and engineering principles used for understanding and managing these geological and environmental systems. The Geology curriculum is built around three themes in geology and environmental science: appreciation for spatial and temporal scales, knowledge of earth materials and compositions of environmental systems, and understanding geological and environmental processes. The Bachelor of Science degree can be earned in traditional geology or with a concentration in Hydrogeology or Environmental Science. All majors participate in an interdisciplinary problem-oriented group research sequence and capstone course.

Employment opportunities for geologists and environmental scientists are numerous and varied. Included are such far-reaching fields as environmental and engineering consulting firms, mineral-producing industries, railroads, municipalities, natural resources conservation organizations, and water authorities. Many students go on to graduate study. It is important, therefore, that a geology or biogeochemical environmental science education develop a broad and rigorous base integrating a variety of descriptive and quantitative material.

The traditional curriculum provides the fundamentals of geology and excellent support in basic sciences. Graduates are prepared for employment or for graduate study in any field of geology. The Environmental Science Concentration provides an appropriate quantitative science base for students interested in environmental science and an introduction to environmental systems. It prepares students for careers in natural resources, the environmental consulting industry, government agencies or graduate school in environmental fields. The Hydrogeology Concentration may be taken by students interested in surface and groundwater systems and applies engineering principles to geologic problems. Graduates from the Hydrogeology Concentration work for consulting companies, government agencies and in the natural resources area or go on to graduate study.

Freshman Year

First Semester
4 - CH 101 General Chemistry

**MATHEMATICAL SCIENCES**

**Bachelor of Science**

The Mathematical Sciences curriculum is designed to be versatile, students gain a broad knowledge of mathematical concepts and methods that are applicable in sciences, engineering, business, industry, and other professions requiring a strong mathematical background. In addition to the basic courses which provide necessary mathematical skills, the curriculum allows students to select an emphasis area or concentration, providing an introduction to a specific area where mathematics is used. These are Abstract Mathematics, Actuarial Science/Financial Mathematics, Applied and Computational Mathematics, Biology, Computer Science, Operations Research/Management Science, and Statistics. In addition to the overall goal of preparing students to cope with a variety of mathematical problems, the curriculum seeks to provide an adequate background for students who plan to pursue graduate study or positions in business, industry, or government. Students electing the Biology Concentration will have the necessary preparation for entering medical school. More information about the degree program can be found at www.math.clemson.edu.

All mathematical sciences majors are required to complete a capstone experience which provides an opportunity to pursue research, independent study, or an approved internship under the direction of a faculty member or the opportunity to study mathematical models in some area of the mathematical sciences. The capstone experience requires a written report (thesis, computer code, project description, intern experience, etc.) and an oral or poster presentation by each student.

---

**Combined Bachelor’s/Master’s Plan**

Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Students are encouraged to obtain the specific requirements for pursuing the dual degree from the Department of Mathematical Sciences (www.math.clemson.edu) as early as possible in their undergraduate program. Enrollment guidelines and procedures can be found under Academic Regulations in this catalog.

§BIOSC 302, 303, 304, or 305

May be satisfied by (1) completion of six credits of MTHSC 482 or H482; (2) completion of six credits of MTHSC 491 or an approved substitution; or (3) completion of three credits of MTHSC 450 and three credits of an additional course approved by advisor.

‡‡BIOSCI 301, GEN 302/303, MICRO 305, or any 300–400-level BIOSCI course

Notes:
1. For graduation, a candidate for the BS degree in Mathematical Sciences will be required to have a 2.0 or higher cumulative grade-point ratio in all required MTHSC courses.
2. A grade of C or better must be earned in all prerequisite courses before enrolling in the next MTHSC course.

EMPHASIS AREAS

- PHYS 322 Mechanics II
- PHYS 326 Experimental Physics II
- PHYS 356 Modern Physics Overview
- PHYS 441 Electromagnetics I
- Emphasis Area Requirement

See General Education Requirements. Six of these credit hours must also satisfy the Science and Technology in Society Requirement and, if HIST 173 is not selected, the Cross-Cultural Awareness Requirement.

See from department-approved list of courses in astronomy, chemistry, computer science, engineering, environmental engineering, geology, mathematical sciences, and physics. Twelve credit hours in one of these areas, with at least six at the 300–400 level, are required. Note: Requirements for a minor in one of these areas might be satisfied with three additional credits at the 300–400 level.

Any 200–400-level science course

Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.
BIOPHYSICS CONCENTRATION

The Biophysics Concentration offers an excellent preparation for medical school or graduate work in biological sciences. It includes the flexibility of selecting courses in chemistry, biological sciences, physics, and mathematics. This concentration also provides the necessary background for employment in industry, manufacturing, and instrumentation for clinical or molecular biology applications.

Freshman Year
First Semester
1 - PHYS 101 Current Topics in Modern Physics
2 - MTHSC 108 Calculus of One Variable I
3 - PHYS 122 Physics with Calculus I
4 - CH 102 General Chemistry
5 - Arts and Humanities (Non-Lit.) Requirement

Second Semester
1 - PHYS 124 Physics Lab. I
2 - PHYS 321 Mechanics I
3 - PHYS 311 Intro. to Meth. of Theoretical Phys.
4 - Arts and Humanities (Literature) Requirement
5 - Oral Communication Requirement

Sophomore Year
First Semester
1 - PHYS 221 Physics with Calculus II
2 - MTHSC 206 Calculus of Several Variables
3 - PHYS 222 Physics Lab. II
4 - Biophysics Requirement
5 - Social Science Requirement

Second Semester
1 - PHYS 223 Physics Lab. II
2 - PHYS 356 Quantum Physics II
3 - PHYS 465 Thermodynamics and Statistical Mechanics
4 - Arts and Humanities (Literature) Requirement
5 - Biophysics Requirement

125 Total Semester Hours

See General Education Requirements. Six of these credit hours must also satisfy the Science and Technology in Society Requirement and, if HIST 173 is not selected, the Cross-Cultural Awareness Requirement.

Select from department-approved list of courses in biological sciences, chemistry, mathematical sciences, and physics. At least six credit hours must be in biological sciences.

Two semesters (through 102) in same modern foreign language are required.

Any 200-400-level science course

An approved physics course may be substituted if CH 101 and 312 have been completed.

Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.

PHYSICS

Bachelor of Arts
The Bachelor of Arts in Physics program is ideal for students interested in acquiring a broad-based liberal education that includes a strong and solid understanding of either science or a broad exposure to engineering with a strong physics foundation.

Freshman Year
First Semester
1 - PHYS 101 Current Topics in Modern Physics
2 - MTHSC 108 Calculus of One Variable I
3 - PHYS 101 Intro. to Ordinary Diff. Equations
4 - PHYS 311 Intro. to Meth. of Theoretical Phys.
5 - CH 101 General Chemistry
6 - ENGL 103 Accelerated Composition
7 - MTHSC 106 Calculus of One Variable I
8 - PHYS 101 Current Topics in Modern Physics

Second Semester
1 - PHYS 221 Physics with Calculus II
2 - MTHSC 206 Calculus of Several Variables
3 - PHYS 222 Physics Lab. I
4 - Elective
5 - Oral Communication Requirement

150 Total Semester Hours

See General Education Requirements. Six of these credit hours must also satisfy the Science and Technology in Society Requirement and, if HIST 173 is not selected, the Cross-Cultural Awareness Requirement.

Four semesters (through 202) in the same modern foreign language are required.

See advisor.

Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.

POLYMER AND FIBER CHEMISTRY AND TEXTILE MANAGEMENT

The School of Materials Science and Engineering offers undergraduate degrees in Ceramic and Materials Engineering, Polymer and Fiber Chemistry, and Textile Management.

The Bachelor of Science degree in Polymer and Fiber Chemistry is based on a foundation in physical and mathematical sciences. From this base, students are taught, using classroom instruction, laboratory
courses, and individual research, to apply their scientific knowledge to the solution of problems in polymeric and fiber-based materials for diverse applications ranging from biomedical and sports to construction and communication. The degree in Polymer and Fiber Chemistry also prepares students for graduate studies in a number of science and engineering disciplines.

Students majoring in Textile Management study the production, structure, and properties of natural and man-made fibers; the processes for converting these fibers into textile structures; the science of coloring agents and finishes to improve the desirability and serviceability of the product; and the methods for evaluating the performance of textile materials.

Graduates in Polymer and Fiber Chemistry and Textile Management hold jobs in corporate and personnel management, manufacturing management, design, research, development, technical service, quality control, and sales. They create new products and processes and solve problems. They create styles, patterns, textures, and colors for apparel, home, industry, and special applications. Their jobs utilize computers, automation, and product quality and are concerned with plant design, environmental control, and consumer safety.

POLYMER AND FIBER CHEMISTRY

Bachelor of Science

Freshman Year

First Semester
1 - CH 101 General Chemistry
2 - ENGL 103 Accelerated Composition
3 - MTHSC 106 Calculus of One Variable I
4 - TEXT 175 Intro. to Textile Manufacturing
3 - History Requirement1

Second Semester
1 - CH 102 General Chemistry
2 - MTHSC 108 Calculus of One Variable II
3 - PHYS 122 Physics with Calculus I
3 - Arts and Humanities (Non-Lit.) Requirement1

Sophomore Year

First Semester
1 - CH 223 Organic Chemistry
1 - CH 227 Organic Chemistry Lab.
2 - MTHSC 206 Calculus of Several Variables
3 - PHYS 221 Physics with Calculus II
3 - PHYS 223 Physics Lab. II
3 - Arts and Humanities (Literature) Requirement1

Second Semester
1 - CH 224 Organic Chemistry
1 - CH 228 Organic Chemistry Lab.
2 - ECON 200 Economics Concepts
2 - EN SP 200 Intro. to Environmental Science or
3 - HIST 122 History, Tech., and Science or
3 - HIST 124 Environmental History Survey
1 - MS&E 251 Materials Science Portfolio I
2 - MTHSC 208 Intro. to Ordinary Diff. Equations

Junior Year

First Semester
3 - CH 331 Physical Chemistry
3 - ENGL 314 Technical Writing
1 - PFC 415 Intro. to Polymer Science and Engr.
1 - PFC 417 Polymer and Fiber Lab.
4 - TEXT 201 Yarn Structures and Formation
2 - Social Science Requirement1

Second Semester
3 - CH 332 Physical Chemistry
3 - COMM 250 Public Speaking
3 - MS&E 324 Statistics for MS&E
3 - PFC 416 Chemical Preparation of Textiles
2 - TEXT 202 Fabric Struct., Des., and Analysis
1

Senior Year

First Semester
3 - PFC 457 Dyeing and Finishing I
1 - PFC 459 Dyeing and Finishing I Lab.
1 - TEXT 421 Fiber Science
3 - Approved Requirement1
3 - Departmental Requirement4

Second Semester
1 - MS&E 451 MS&E Portfolio II
3 - MS&E 491 Undergraduate Research
1 - PFC 458 Dyeing and Finishing II
3 - PFC 460 Dyeing and Finishing II Lab.
3 - TEXT 422 Properties of Textile Structures
3 - Departmental Requirement4

120 Total Semester Hours

HIST 172 or 173

Social Science Requirement. This course must also satisfy the Cross-Cultural Awareness Requirement. (Select any 200-level ENGL course from General Education Requirement in Arts and Humanities (Literature) Requirement. See advisor.)

TEXTILE MANAGEMENT

Bachelor of Science

Freshman Year

First Semester
4 - CH 101 General Chemistry or
4 - CH 105 Chemistry in Context I
3 - ENGL 103 Accelerated Composition
2 - MTHSC 106 Calculus of One Variable I
3 - TEXT 175 Intro. to Textile Manufacturing
3 - History Requirement1

Second Semester
3 - CH 102 General Chemistry or
4 - CH 106 Chemistry in Context II
3 - CP SC 120 Intro. to Information Technology
3 - ECON 200 Economic Concepts
3 - MTHSC 207 Multivariable Calculus
3 - TEXT 176 Natural and Man-Made Fibers

Sophomore Year

First Semester
3 - ACCT 201 Financial Accounting Concepts
3 - COMM 250 Public Speaking
3 - PSYCH 201 Introduction to Psychology
4 - TEXT 201 Yarn Structures and Formation
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Second Semester
3 - ACCT 202 Managerial Accounting Concepts
3 - MGT 201 Principles of Management
3 - MS&E 324 Statistics for MS&E
4 - TEXT 202 Fabric Struct., Des., and Analysis
3 - Arts and Humanities Requirement1 or
3 - Social Science Requirement1

Senior Year

First Semester
3 - TEXT 470 Textile Costing and Inventory Control
6 - Concentration Requirement2
3 - Emphasis Area Requirement3

Second Semester
3 - MGT 415 Business Strategy
2 - MS&E 450 MS&E Portfolio
3 - TEXT 429 Textile Research
3 - Concentration Requirement2
3 - Emphasis Area Requirement3

1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement. For students not selecting the CH 105/106 sequence, three of these credits must also satisfy the Science and Technology in Society Requirement. (Note: Three additional credit hours in social sciences or arts and humanities are required beyond the basic General Education Requirements.)

2Chemical—PFC 303/305, 304/306, 405, 406, 416, 457/459
Manufacturing—TEXT 308, 314, 403, 411, 422, 426

3See advisor.
MINORS

Following are minors acceptable for students in the College of Engineering and Science. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting
Adult/Extension Education
Aerospace Studies
Agricultural Business Management
Agricultural Mechanization and Business
American Sign Language Studies
Animal and Veterinary Sciences
Anthropology
Athletic Leadership
Biochemistry
Bioengineering
Biological Sciences
Business Administration
Chemistry
Cluster
Communication Studies
Community Recreation, Sport, and Camp Management
Computer Science—not open to Computer Information Systems majors
Crop and Soil Environmental Science
East Asian Studies
Economics
Education
English
Entomology
Entrepreneurship
Environmental Engineering
Environmental Science and Policy
Equine Business
Film Studies
Financial Management
Food Science
Forest Products
Forest Resource Management
Genetics
Geography
Geology
Global Politics
Great Works
History
Horticulture
International Engineering and Science
Legal Studies
Management
Management Information Systems
Mathematical Sciences
Microbiology
Military Leadership
Modern Languages
Music
Natural Resource Economics
Nonprofit Leadership
Packaging Science
Pan African Studies
Park and Protected Area Management
Philosophy
Physics
Plant Pathology
Political Science
Psychology
Public Policy
Religion
Russian Area Studies
Science and Technology in Society
Screenwriting
Sociology
Spanish-American Area Studies
Textiles—not open to Polymer and Fiber Chemistry or Textile Management majors
Theatre
Therapeutic Recreation
Travel and Tourism
Turfgrass
Urban Forestry
Wildlife and Fisheries Biology
Women’s Studies
Writing

See pages 36–39 for details.
The Eugene T. Moore School of Education trains teachers, counselors, university administrators, and leaders for the P–12 schools and training and development programs including the Department of Public Health Sciences; the National Dropout Prevention Center; and the HEHD Advising Center in 309 Edwards Hall. Prior to admission, the student must have passed all areas of the Praxis I Professional Skills Test (PPST) and have a minimum cumulative grade-point ratio of 2.5. A student may exempt the PPST by meeting minimum ACT or SAT requirements as determined each year by the South Carolina Department of Education.

Directed Teaching/Teaching Internship (Secondary). A student shall apply to the field experience director prior to the semester in which block methods courses are to be scheduled. The following conditions must be met prior to registration for directed teaching: (1) admission to the professional level of a program; (2) completion of at least 95 semester hours; (3) a minimum cumulative grade-point ratio of 2.5. Students with a grade-point ratio of 2.25 to 2.45 may appeal to the Director of the School of Education, but exceptions are not common.

Enrollment in Professional Courses

Enrollment in 400-level professional education courses is contingent upon admission to the professional level as described above. Any student who desires to enroll in education courses must meet the cumulative grade-point requirements established for education majors. Appeals to continue taking classes may be made to the Chair of Teacher Education, but exceptions are not common.

Change of Major

Changing majors into Education is highly competitive and limited in Early Childhood Education and somewhat competitive and limited in Elementary Education, Secondary Education–Social Studies, and Secondary Education–English. The process involves a formal application and an essay. Requests for a change of major application can be made at the Health, Education, and Human Development Academic Advising Center in 309 Edwards Hall and should be accompanied by an advising appointment with an advisor.

Graduation

To graduate, a student must have scores for all state-mandated certification exams on file with the Academic Advising Center in the College of Health, Education, and Human Development. As of July 2006, students must pass all required Praxis II tests, including PLT (Principles of Learning and Teaching), before becoming program completers and receiving recommendation for certification.

Graduate Study

Clemson University offers programs leading to the Master of Arts in Teaching, Master of Education, Master of Human Resource Development, Specialist in Education, and Doctor of Philosophy degrees.

AGRICULTURAL EDUCATION

Bachelor of Science

The College of Health, Education, and Human Development and the College of Agriculture, Forestry, and Life Sciences conduct a cooperative program to produce agricultural teachers (grades 9–12) for South Carolina. See page 40 for the curriculum.

CAREER AND TECHNOLOGY EDUCATION

Bachelor of Science

The Career and Technology Education major is designed for students who plan to teach industrial technology in the secondary schools (grades 6–12). Industrial technology is the subject area in the public school system which provides youth with an interpretation of American industry. It is a general education subject designed to give students exploratory experience in the classroom and laboratory. Majors in this concentration are qualified to seek certification as secondary school teachers of industrial technology.

Freshman Year

First Semester

1. BIOL 120 Biological Inquiry Lab. and
2. BIOL 121 Keys to Human Identity or
3. BIOL 122 Keys to Human Biology or
4. BIOL 123 Keys to Human Biology or
5. BIOL 124 Keys to Reproduction
6. CTE 110 Introduction to Career and Technology Education
7. CTE 180 Introduction to Technical Drawing and Computer-Aided Drafting
8. ED 105 Orientation to Education
9. Mathematics Requirement
10. Elective
11. 15-16
Second Semester
- CTE 181 Technical Design
- CTE 240 Power Technology I: Production
- CTE 280 Communications Technology I: Processes and Materials
- ENGL 103 Accelerated Composition
- PSYCH 201 Introduction to Psychology

Sophomore Year
First Semester
- CTE 220 Manufacturing Technology I: Systems
- CTE 230 Construction Technology I: Materials
- Arts and Humanities (Literature) Requirement
- Science and Tech. in Society Requirement
- Social Science Requirement

Second Semester
- A A H 210 Intro. to Art and Architecture or
- MUSIC 210 Music Appreciation
- COMM 150 Intro. to Human Communication
- CTE 250 Electricity
- EX ST 301 Introductory Statistics
- Elective

Junior Year
First Semester
- CTE 360 Safety
- CTE 484 Communications Technology II: Systems
- ED F 302 Educational Psychology
- ED F 335 Adolescent Growth and Development
- ENGL 314 Technical Writing

Second Semester
- CTE 420 Manufacturing II: Computer-Integrated Manufacturing
- CTE 430 Construction Technology II: Practices and Systems
- CTE 468 Public Relations
- CTE 486 Instructional Media Development
- ED SP 370 Introduction to Special Education

Senior Year
First Semester
- CTE 415 History and Philosophy of Career and Technology Education
- CTE 471 Teaching Career and Technology Education
- CTE 473 Assessment in Career and Technology Education
- PSYCH 330 Motivation
- Elective

Second Semester
- CTE 371 Management of Career and Technology Education Laboratories
- CTE 478 Internship in Career and Technology Education I
- CTE 479 Internship in Career and Technology Education II

120–121 Total Semester Hours

EARLY CHILDHOOD EDUCATION
Bachelor of Arts
The Early Childhood Education curriculum prepares students for teaching positions on the pre-kindergarten and primary levels (Pre-K–3).

Freshman Year
First Semester
1 - ED 105 Orientation to Education
3 - HIST 173 The West and the World I
3 - MTHSC 101 Essential Math. for Informed Soc.
3 - Foreign Language Requirement
3 - Natural Science Requirement
1 - Elective

Second Semester
1 - A A H 210 Intro. to Art and Architecture or
3 - COMM 150 Intro. to Human Commun. or
3 - COMM 250 Public Speaking
3 - ENGL 103 Accelerated Composition
3 - MTHSC 117 Mathematics for Elementary School Teachers I
3 - Foreign Language Requirement

Sophomore Year
First Semester
3 - ED EC 300 Found. of Early Childhood Educ.
3 - ED EC 340 Early Childhood Mathematics
3 - ED EL 321 Physical Education Methods for Classroom Teachers
3 - ED EL 458 Health Education Methods for the Classroom Teacher
3 - ED SP 468 Early Intervention for Infants and Children with Special Needs
3 - READ 458 Early Literacy: Birth–Kindergarten

Second Semester
12 - ED EC 484 Directed Teaching in Early Childhood Education
1 - ED F 425 Instructional Technology Strategies

123 Total Semester Hours

ELECTIVE REQUIREMENTS
Bachelor of Arts
The Elective Requirement prepares students for teaching on the elementary school level (grades 2–6).

Freshman Year
First Semester
3 - GEOG 103 World Regional Geography
3 - MTHSC 101 Essential Math. for Informed Soc.
3 - HIST 122 History, Technology, and Society
4 - Natural Science with laboratory, must be selected from General Education Requirements. See advisor.
3 - Music Requirement
1 - Foreign Language Requirement

Second Semester
1 - ED 105 Orientation to Education
3 - ENGL 103 Accelerated Composition
3 - MTHSC 117 Mathematics for Elementary School Teachers I
4 - PH SC 108 Introduction to Physical Science
3 - Advanced Writing Requirement

Second Semester
1 - ED EC 450 Early Childhood Curriculum
3 - READ 459 Teaching Reading in the Early Grades: K–3

14
Sophomore Year
First Semester
4 - BIOL 109 Introduction to Life Science
3 - COMM 150 Intro. to Human Comm. or
  - COMM 250 Public Speaking
3 - ED F 301 Principles of American Education
3 - MTHSC 118 Mathematics for Elementary
School Teachers II
3 - Arts and Humanities (Literature) Requirement1

Second Semester
3 - ED F 302 Educational Psychology
1 - ED F (CTE) 315 Technology Skills for Learning
1 - ED F 334 Child Growth and Development
1 - ED SP 370 Introduction to Special Education
1 - MUSIC 210 Music Appreciation or
  - MUSIC 400 Music in the Elem. Classroom
3 - Arts and Humanities (Non-Lit.) Requirement1

Junior Year
First Semester
3 - CTE 310 Designing Creative Instruction
3 - ED 322 Responding to Emergencies or
  - PTM 317 Group Initiatives
3 - ED EL 458 Health Education Methods for the
  Classroom Teacher
3 - ENGL 385 Children’s Literature
3 - Multicultural Requirement1

Second Semester
3 - ED F 321 Physical Education Methods for
  Classroom Teachers
3 - ED F 308 Classroom Assessment
3 - ENGL 304 Business Writing or
  - ENGL 312 Advanced Composition
3 - READ 460 Teaching Reading in the
  Elementary Grades: 2–6
3 - Elective

Senior Year
(Courses must be taken as listed in both semesters.)
First Semester
3 - ED EL 401 Elementary Field Experience
3 - ED EL 451 Elem. Methods in Science Teaching
3 - ED EL 452 Elem. Methods in Math. Teaching

MATHEMATICS
TEACHING
Bachelor of Science
The program leading to a Bachelor of Science degree in Mathematics Teaching is designed for students planning to teach mathematics on the
secondary school level (grades 9–12).

Freshman Year
First Semester
4 - CH 105 Chemistry in Context I
1 - ED 105 Orientation to Education
4 - MTHSC 106 Calculus of One Variable I
3 - PHIL 102 Introduction to Logic
3 - Cross-Cultural Awareness Requirement1

Second Semester
4 - CH 106 Chemistry in Context II
3 - ENGL 103 Accelerated Composition
4 - MTHSC 108 Calculus of One Variable II
3 - Science Requirement1

Sophomore Year
First Semester
3 - COMM 150 Intro. to Human Communication
3 - COMM 250 Public Speaking
4 - MTHSC 206 Calculus of Several Variables
3 - PHYS 122 Physics with Calculus I
1 - PHYS 124 Physics Lab. I
1 - Arts and Humanities (Literature) Requirement1
3 - Science Requirement1

Second Semester
3 - ECCS 221 Economic Concepts or
  - ECCS 222 Economic Concepts or
  - ECCS 220 Principles of Microeconomics
1 - ED F (CTE) 315 Technology Skills for Learning
4 - MTHSC 208 Intro. to Ordinary Diff. Equations
3 - MTHSC 311 Linear Algebra
3 - PHYS 221 Physics with Calculus II
2 - PHYS 223 Physics Lab. II

Junior Year
First Semester
3 - ED F 301 Principles of American Education
3 - EDSEC 326 Practicum in Secondary Math.
3 - ENGL 314 Technical Writing
1 - MTHSC 302 Statistics for Science and Engr.
3 - SOC 201 Introduction to Sociology or
  - SOC 202 Social Problems

Second Semester
3 - ED F 335 Adolescent Growth and Development
3 - ED SP 370 Introduction to Special Education
4 - EDSEC 446 and 456 must be taken concurrently. Offered
  spring semester only.

Senior Year
First Semester
1 - ED F 425 Instructional Technology Strategies1
3 - EDSEC 446 Teaching Internship in
  Secondary Mathematics3
3 - EDSEC 456 Secondary Math. Capstone Sem.5

12

125 Total Semester Hours

1See General Education Requirements.
2Select from courses in ASTR, BIOL, BIOSC, CH, GEOL,
  PHYS.
3ENGL 212, 213, 214, or 215
4ED F 425, EDSEC 426, and READ 498 must be taken concur-
  rently during fall semester.
5EDSEC 446 and 456 must be taken concurrently. Offered
  spring semester only.

SCIENCE TEACHING
Bachelor of Science
The program leading to a Bachelor of Science degree in Science Teaching is designed for students planning to teach biological sciences, chemistry,
earth sciences, or physical sciences on the secondary school level (grades 9–12).

TEACHING AREA:
BIOLOGICAL SCIENCES
Freshman Year
First Semester
3 - BIOL 103 General Biology I and
1 - BIOL 105 General Biology Lab. I or
  - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
3 - COMM 150 Intro. to Human Communication
4 - MTHSC 106 Calculus of One Variable I
15-16

Second Semester
3 - BIOL 104 General Biology II and
1 - BIOL 106 General Biology Lab. II or
  - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
1 - ED 105 Orientation to Education
3 - ENGL 103 Accelerated Composition
3 - Statistics Requirement1

15-16

Sophomore Year
First Semester
4 - CH 201 Survey of Organic Chemistry
3 - HIST 122 History, Technology, and Society
1 - PHYS 207 General Physics I
1 - PHYS 209 General Physics I Lab.
3 - Arts and Humanities (Literature) Requirement1
4 - Biochemistry or Genetics Requirement3

105

### SECONDARY EDUCATION

The Bachelor of Arts degree in Secondary Education is available to students preparing to teach English, mathematics, modern languages (French and Spanish), and science on the secondary school level (grades 9–12). The Bachelor of Science degree is offered to students planning to teach science, social studies, (economics, history, political science, psychology, and sociology). The teaching field should be selected as early as possible so that appropriate freshman and sophomore courses may be taken.

The curriculum requires a major concentration in the teaching field. Specific courses and sequences have been designated to meet requirements for those planning to teach. Students who have elective courses in the teaching area should consult their advisors prior to scheduling these courses. The professional education courses should be completed in sequence.

### TEACHING AREA:

#### BIOLOGICAL SCIENCES

**Bachelor of Arts**

**Freshman Year**

| First Semester | 5 - BIOL 110 Principles of Biology  
|                | 3 - BIOL 103 General Biology I and  
|                | 1 - BIOL 105 General Biology Lab. I  
|                | 4 - CH 101 General Chemistry  
|                | 3 - COMM 150 Intro. to Human Communication  
|                | 4 - MTHSC 106 Calculus of One Variable I  
|                | 3 - Foreign Language Requirement  
|                | 18-19 |

| Second Semester | 5 - BIOL 111 Principles of Biology II  
|                | 5 - BIOL 104 General Biology I and  
|                | 1 - BIOL 106 General Biology Lab. I  
|                | 4 - CH 102 General Chemistry

Special Education
Bachelor of Arts
The Bachelor of Arts degree in Special Education prepares students to teach individuals with mild disabilities in grades K–12. The curriculum is designed to meet the competencies outlined by the Council for Exceptional Children for beginning special education teachers. Students completing the program receive instruction and practical experiences that lead to Multi-Categorical Special Education Certification in South Carolina.

Freshman Year

HEALTH SCIENCE
Bachelor of Science
The Department of Public Health Sciences prepares students for careers in the health field, one of the largest industries in the United States. It includes hospitals and other medical service providers, public health organizations, health insurance companies, health/medical related sales, health fitness organizations, and community and nonprofit health agencies.

Plans of study can be arranged in health promotion and education, health services administration, and preprofessional health studies. Students in the Health Promotion and Education Concentration have the skills to assess, plan, communicate, implement, manage, and evaluate public health promotion programs. Students in the Preprofessional Health Studies Concentration obtain the coursework and experience necessary for acceptance into various graduate programs in clinical health professions. The Health Services Administration Concentration allows students to develop skills and competencies in health administration/management for entry-level careers or graduate study in this area. A minor in Business Administration is integral to the concentration. The department, in cooperation with the College of Architecture, Arts, and Humanities, also offers a joint Bachelor of Science degree in Language and International Health (see page 63).

When space is available, students with less than 50 credit hours may change majors into Health Science with a minimum cumulative grade-point ratio of 2.25. Students with 50 or more credit hours may apply for a change-of-major into Health Science when space is available based on the following restrictions:

• completion of the Health Science Mathematics and Statistics Requirements and the General Education Natural Science Requirement
• minimum cumulative grade-point ratio of 2.5
• submission of a 1–3-page document detailing why the applicant desires to major in Health Science and how this major would support his/her career goals

Additional information is available at www.hehd.clemson.edu/PublicHealth/WebSite/Home/Main.htm.

124 Total Semester Hours

Notes:
1. See General Education Requirements.
2. This requirement is satisfied by another course in the curriculum, elective hours may be substituted.

To comply with clinical agency contract requirements and South Carolina law, students enrolled in nursing courses with a clinical laboratory must meet specific requirements listed in the School of Nursing Student Handbook which can be found at www.hed.clemson.edu/nursing.

The School of Nursing programs are accredited by the CCNE (Commission on Collegiate Nursing Education), One Dupont Circle NW, Suite 530, Washington, DC 20036-1120.

Entrance Requirements

To facilitate admission of students who can achieve at an appropriate level in the program, admission is selective. Consideration is given to performance in secondary school and on the College Board Examination (SAT). Those seeking admission are advised to apply to the University early in the fall of the senior year in high school.

Transfer admission is competitive and students are encouraged to apply early to the Office of Admissions. The University admits ten new transfer students to the Nursing major during the fall semester only. Potential students should have a minimum grade point ratio of 3.0 and completion of 30 semester hours of transferable courses. Placement in the nursing curriculum will be determined after credit evaluation is completed.

Students may change majors into Nursing based on approval of an Admissions Committee in the School of Nursing, applications will be accepted each year during January with a deadline of January 31. Decisions are made by February 28. Change-of-major students will have a start date of the following January into upper division (junior-level) nursing courses.

Applicants should meet the following requirements prior to the semester of application:

- A minimum cumulative grade-point ratio of 2.75.
- Completion of a minimum of two required science courses in the nursing curriculum with a C or better.

Selection priority is based on grade-point ratio and number of completed nursing prerequisites. Students are allowed to apply only twice. Detailed information is available from the Academic Advising Center in 309 Edwards Hall or at www.hed.clemson.edu/nursing.

FRESHMAN YEAR

First Semester

LANGUAGES AND INTERNATIONAL HEALTH

Bachelor of Science

The Language and International Health program is administered by the College of Architecture, Arts, and Humanities and the College of Health, Education, and Human Development. See pages 63 and 64 for the curriculum.

NURSING

Bachelor of Science

The Bachelor of Science degree program in Nursing prepares students for professional nursing practice in a variety of settings, such as hospitals, industry, clinics, and public health agencies. During the first two years, emphasis is on liberal arts and basic science courses arranged to provide a foundation for the nursing major. Junior and senior courses emphasize the study of nursing. Clinical nursing experiences, guided by the Nursing faculty, involve acute and community-based settings. Students are responsible for their own transportation to clinical laboratory experiences, which may extend throughout the Upstate.

Throughout the clinical laboratory period, Nursing majors are required to carry current, valid student nurses’ professional liability insurance with minimum limits of liability of $1,000,000 per occurrence and $6,000,000 in aggregate. Documentation of such coverage must be provided to the Director of the School of Nursing. No student may participate in clinical learning activities without this insurance coverage.
ing the allotted three elective credit hours, will be used to calculate this grade-point ratio.

5. Students may repeat only one NURS course, excluding a W or redemption. Further, students may repeat that NURS course one time only. Students who are unsuccessful on the second attempt in a nursing course will be counseled to select another major and will not be permitted to continue in the Nursing program.

6. Students must pass didactic and clinical components to pass all clinical courses.

Registered Nurse BS Completion Program
The RN/BS curriculum offers an individualized study option for the registered nurse to obtain a baccalaureate degree in Nursing. Credits may be earned through an accelerated program of study, combining transfer credits for selected courses from accredited institutions of higher learning, credit by examination for previously completed nursing courses, and enrollment in courses at Clemson University. Qualified students may take up to six hours of graduate courses towards the master's degree in Nursing. Registered nurses interested in pursuing a baccalaureate degree in Nursing, must contact the School of Nursing. Registered nurses interested in pursuing a baccalaureate degree should contact the School of Nursing. Registered nurses interested in pursuing a baccalaureate degree should contact the School of Nursing.

First Semester
3 - HIST 101 American History I
4 - MTHSC 101 Essential Math. for Informed Soc.
3 - PSYCH 201 Intro to Psychology
3 - PRTM 200 Profession and Practice in PRTM
3 - ECON 211 Principles of Microeconomics
4 - BIO SCI 222 Human Anatomy and Phys. I
4 - ECON 211 Principles of Microeconomics
3 - COMM 250 Public Speaking

5 - NURS 401 Mental Health Nursing
3 - NURS 403 Complex Nursing of Adults
3 - NURS 405 Leadership and Mgt. in Nursing
15

124 Total Semester Hours

Notes:
- See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
- See advisor.
- This course is exempt if the student achieves a B or better in NURS 307.

Students must achieve a B or better in NURS 307.

The Parks, Recreation, and Tourism Management program is accredited by the National Council on Accreditation (National Recreation and Park Association/Council on Postsecondary Accreditation). Graduates are immediately eligible to apply to become “Certified Park and Recreation Professionals,” a valuable credential for professional advancement.

When space is available, a student may change majors to one of the degree concentrations in the Department of Parks, Recreation, and Tourism Management with a 2.0 cumulative grade-point ratio, at least 30 credit hours earned, and approval of the department chair or his/her designee.

Graduate degrees offered are Master of Parks, Recreation, and Tourism Management; Master of Science; and Doctor of Philosophy.

COMMUNITY RECREATION, SPORT, AND CAMP MANAGEMENT CONCENTRATION
The Community Recreation, Sport, and Camp Management (CRSCM) Concentration prepares students for careers in community recreation, amateur athletics, and camp management by developing theoretical, conceptual, and applied knowledge bases necessary for success in its diverse field. The focus of this program is on community, family, and individual development. Career opportunities include, but are not limited to, community recreation programming, community athletic programming, camp administration, facility operation and management, special events, campus recreation, and fitness and wellness programming.

### PROFESSIONAL GOLF MANAGEMENT CONCENTRATION
The Professional Golf Management (PGM) Concentration provides a unique educational background for students who desire to become PGA professionals. Students obtain specialized knowledge and skills which prepare them to become leaders in the golf industry. The PGM Concentration combines academics, career training, and extensive internship experience to develop well-rounded, service-oriented professionals who can meet and respond to the personal as well as business management requirements of golf programs and facilities.

### Freshman Year
**First Semester**
1. BIOL 120 Biological Inquiry Lab.
3. BIOL 122 Keys to Biodiversity
2. C U 101 University Success Skills
3. PSYCH 201 Introduction to Psychology or
4. SOC 201 Introduction to Sociology
5. Mathematics Requirement
6. Elective
15

**Second Semester**
1. ANTH 201 Introduction to Anthropology or
3. GEOG 101 Introduction to Geography
3. ENGL 103 Accelerated Composition
1. PRTM 200 Profession and Practice in PRTM
5. Elective
15

### Sophomore Year
**First Semester**
1. COMM 150 Intro. to Human Comm. or
3. COMM 250 Public Speaking
2. PRTM 220 Conceptual Foundations of Parks, Recreation, and Tourism
3. Arts and Humanities (Literature) Requirement
4. Arts and Humanities (Non-Lit.) Requirement
6. Elective
17

**Second Semester**
1. PRTM 198 Creative Inquiry—PRTM I
2. PRTM 221 Delivery Systems for Parks, Recreation, and Tourism
3. PRTM 222 Program and Event Planning in Parks, Recreation, and Tourism
4. PRTM 223 Administration/Management in Parks, Recreation, and Tourism
2 - PRTM 224 Legal Aspects of Parks, Recreation, and Tourism
12 - Concentration Requirement

### Summer
1. PRTM 206 Practicum I
2. PRTM 207 Practicum II

### Junior Year
**First Semester**
3. ENGL 304 Business Writing or
3. ENGL 314 Technical Writing
2. PRTM 298 Creative Inquiry—PRTM II
12 - Concentration Requirement

### Summer
6 - PRTM 405 Field Training II

### Senior Year
**First Semester**
1. PRTM 498 Creative Inquiry—PRTM IV
12 - Concentration Requirement

**Second Semester**
12 - Concentration Requirement

124 Total Semester Hours

### PARK AND PROTECTED AREA MANAGEMENT CONCENTRATION
Students in Park and Protected Area Management (PPAM) prepare for work as park rangers, planners, educators, law enforcement officers, and administrators of our nation’s federal, state, and county public lands that hold unique natural, cultural, and historic resources. PPAM focuses on helping visitors enjoy and appreciate parklands while protecting those resources for future generations. Besides taking coursework in PRTM, many students choose to complete a minor field of study in forest resource management, wildlife and fisheries biology, history, or anthropology.
Sophomore Year
First Semester
1. ACCT 201 Financial Accounting Concepts
2. COMM 150 Intro. to Human Comm. or
3. COMM 250 Public Speaking
4. ECON 212 Principles of Microeconomics
5. PRTM 295 PGM Seminar II
6. Arts and Humanities (Literature) Requirement
7. Arts and Humanities (Non-Lit.) Requirement
8. PRTM 220 Conceptual Foundations of Parks, Recreation, and Tourism
9. ECON 212 Principles of Macroeconomics
10. COMM 150 Intro. to Human Comm.
11. LA 1
12. FIN 306 Corporation Finance
13. CO-OP 105 Cooperative Education
14. Summer

TRAVEL AND TOURISM CONCENTRATION
The Travel and Tourism (T&T) Concentration prepares students for interesting and challenging careers working in one of the world’s most diverse and dynamic industries. Students in this concentration are introduced to issues pertaining to the management, planning, and promotion of places and events such as tourist attractions. The program is designed to provide an understanding of the linkages that exist between local communities, their populations, and various public, private, and special interest groups. Students in Travel and Tourism can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, as well as other tourism-affiliated organizations.
### Freshman Year

#### First Semester
- 1 - BIOL 120 Biological Inquiry Lab. and
- 3 - BIOL 121 Keys to Human Identity or
  - 3 - BIOL 122 Keys to Biodiversity or
  - 3 - BIOL 123 Keys to Human Biology or
  - 3 - BIOL 124 Keys to Reproduction
- 2 - C U 101 University Success Skills
- 3 - GEOG 103 World Regional Geography
- 3 - Mathematics Requirement
- 3 - Elective
- Total: 15

#### Second Semester
- 3 - BIOL 220 Biology: Concepts, Issues, Values
- 3 - ECON 211 Principles of Microeconomics
- 3 - ENGL 103 Accelerated Composition
- 1 - PRTM 200 Profession and Practice in PRTM
- 5 - Elective
- Total: 15

### Sophomore Year

#### First Semester
- 3 - COMM 150 Intro. to Human Comm. or
  - 3 - COMM 250 Public Speaking
- 2 - PRMT 220 Conceptual Foundations of Parks, Recreation, and Tourism
- 3 - Arts and Humanities (Literature) Requirement
- 3 - Arts and Humanities (Non-Lit.) Requirement
- 6 - Elective
- Total: 17

#### Second Semester
- 1 - PRMT 198 Creative Inquiry—PRMT I
- 2 - PRMT 221 Delivery Systems for Parks, Recreation, and Tourism
- 3 - PRMT 222 Program and Event Planning in Parks, Recreation, and Tourism
- 4 - PRMT 223 Administration/Management in Parks, Recreation, and Tourism
- 2 - PRMT 224 Legal Aspects of Parks, Recreation, and Tourism

MINORS

Following are minors acceptable for students in the College of Health, Education, and Human Development. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting
Adult/Extension Education
Aerospace Studies
Agricultural Business Management
Agricultural Mechanization and Business
American Sign Language Studies
Animal and Veterinary Sciences
Anthropology
Athletic Leadership
Biochemistry
Bioengineering
Biological Sciences—not open to Science Teaching—Biological Sciences or Secondary Education—Biological Sciences majors
Business Administration
Chemistry
Cluster
Communication Studies
Community Recreation, Sport, and Camp Management
Computer Science
Crop and Soil Environmental Science
East Asian Studies
Economics—not open to Secondary Education: Social Studies (Economics) majors
Education
English
Entomology
Entrepreneurship
Environmental Engineering
Environmental Science and Policy
Equine Business
Film Studies
Financial Management
Food Science
Forest Products
Forest Resource Management
Genetics
Geography
Geology
Global Politics
Great Works
History—not open to Secondary Education: Social Studies (History) majors
Horticulture

International Engineering and Science
Legal Studies
Management
Management Information Systems
Mathematical Sciences—not open to Mathematics Teaching or Secondary Education—Mathematics majors
Microbiology
Military Leadership
Modern Languages—not open to Secondary Education—Modern Languages majors
Music
Natural Resource Economics
Nonprofit Leadership
Packaging Science
Pan African Studies
Park and Protected Area Management
Philosophy
Physics—not open to Science Teaching—Physical Sciences majors
Plant Pathology
Political Science—not open to Secondary Education: Social Studies (Political Science) majors
Psychology—not open to Secondary Education: Social Studies (Psychology) majors
Public Policy
Religion
Russian Area Studies
Science and Technology in Society
Screenwriting
Sociology—not open to Secondary Education: Social Studies (Sociology) majors
Spanish-American Area Studies
Textiles
Theatre
Therapeutic Recreation
Travel and Tourism
Turfgrass
Urban Forestry
Wildlife and Fisheries Biology
Women’s Studies
Writing

See pages 36–39 for details.
COURSES OF INSTRUCTION

This list includes for each course the catalog number, title, credit hours, class and laboratory hours per week, description, and prerequisites. Courses numbered 600 and above are graduate courses.

Cross-Listed Courses
A cross-listed course is one that can be taken for credit under different departmental titles. For example, students can take SOC (R S 471 Demography as either R S 471 or SOC 471. The student should select the desired departmental title in conference with an advisor. The departmental title may be changed only during the period allowed by the University calendar for adding a course.

ACCOUNTING

ACCT 201, H201 Financial Accounting Concepts 3(3,0) Introduction to accounting principles with emphasis on the use of financial data and analysis of financial statements.

ACCT 202, H202 Managerial Accounting Concepts 3(3,0) Introduction to managerial accounting with emphasis on using accounting information to make decisions.

ACCT 204 Accounting Procedures 1(1,2) Lectures, demonstrations, and hands-on experience with accounting systems and analysis required to complete the accounting cycle and prepare financial statements. Intended for students who plan to enroll in ACCT 303 or 311.

ACCT 299 Creative Inquiry—Accounting 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. To be taken Pass/Fail only.

ACCT 303, H303 Cost Accounting 3(3,0) Application of cost analysis to manufacturing and distributing problems; analysis of behavior characteristics of business costs and a study of principles involved in standard cost systems; lectures and problems. Prereq: ACCT 201 and 204 with a C or better.

**A S 109 Air Force Today I 2(1,2)**

Deals with Air Force in the contemporary world through a study of the total force structure: strategic offensive and defensive, general purpose, and aerospace support. Leadership laboratory activities include drill fundamentals, customs, and courtesies of the service.

**A S 110 Air Force Today II 2(1,2)**

Continuation of A S 109. Leadership laboratory includes drill, ceremonies, and an introduction to Air Force career opportunities.

**A S 209 Development of Air Power I 2(1,2)**

Study of the development of air power from balloons and dirigibles through the peaceful employment of U.S. air power in relief missions and civic action programs in the late 1960s and also the air war in Southeast Asia. Leadership laboratory provides experience in guiding, directing, and controlling an Air Force unit.

**A S 210 Development of Air Power II 2(1,2)**

Continuation of A S 209.

**A S 308 Air Force Leadership and Management 3(3,0)**

Motivational and behavioral processes, leadership, communication, and group dynamics are covered to provide a foundation for development of the leader's professional skills using Air Force examples and methods.

**A S 309 Air Force Leadership and Management I 4(3,2)**

Emphasizes the individual as a manager. Individual motivational and behavioral processes, leadership, communication, and group dynamics are covered to provide a foundation for the development of the Air Force officer's professional skills. Students prepare individual and group presentations, write reports, participate in group discussions, seminars, and conferences.

**A S 310 Air Force Leadership and Management II 4(3,2)**

Continuation of A S 309. Uses the basic managerial processes involving decision making, utilization of analytical aids in planning, organizing, and controlling environment. Actual case studies are used to enhance learning and communication processes.

**A S 409 National Security Policy I 4(3,2)**

Analysis of the role and function of the military officer in a democratic society and the relationships involved in civil-military interactions. Students prepare individual and group presentations, write reports, and participate in group discussions.

**A S 410 National Security Policy II 4(3,2)**

Continuation of A S 409. Examines the environmental context in which U.S. defense policy is formulated and implemented. Emphasizes initial commissioned service and military justice. Students prepare individual and group presentations for the class, write reports, and participate in group discussions, seminars, and conferences.
AGRICULTURAL EDUCATION

Professors: T. R. Dobbins, D. R. King, C. D. White, Sr.; Associate Professor: P. M. Fravel

AG ED 100 Orientation and Field Experience 1(0,2) Supervised observations and explanations of vocational agriculture teaching while serving as teacher aides. One full week of field experience in representative high schools is required.

AG ED 102 Agricultural Education Freshman Seminar 1(2,0) Introduces students to the South Carolina agriculture education structure and provides opportunities to prepare oral presentations on selected agricultural education organizations. Assists students in understanding the value of professional organizations to agriculture education in the state and nation. Preq: Agricultural Education major.

AG ED 103 Multiculturalism in Agricultural Education 3(3,0) Studies the influence of various groups and their contributions to agriculture. Includes the roles of women, African-, Hispanic-, Asian-, Native, and European-Americans.

AG ED 200 Agricultural Applications of Educational Technology 3(2,2) Overview of microcomputer hardware and software encompassing word processing, spreadsheet, utility, Web development, and graphic communications in an agricultural context.

AG ED 201 Introduction to Agricultural Education 3(2,3) Principles of education, development of agricultural education, and an introduction to the formulation of instructional programs for the teaching of agricultural courses.

AG ED 202 Agricultural Education Sophomore Seminar 1(2,0) Instruction on how to establish a comprehensive student record-keeping system. Includes integration of that data into the FFA Awards program. Allows students hands-on experience with the total FFA Awards program on the state and national level. Preq: AG ED 102.

AG ED 203 Teaching Agriscience 3(2,3) Integrates biological and technological concepts appropriate for teaching introductory middle or secondary school level courses in agricultural science. Topics emphasize disciplines, theories, and applications in modern agricultural production. Experiences include teaching techniques, materials, resources, and the design and implementation of new activities to facilitate teaching agriscience. Preq: BIOL 104/106.

AG ED 204 Applied Agriculture Calculations 3(3,0) Demonstrates basic mathematical applications in crop and livestock production and agribusiness and financial management. These applications aid students in understanding the mathematical applications needed in the agriculture field.

AG ED 302 Agricultural Education Junior Seminar 1(2,0) Allows students the opportunity to prepare and deliver information on Career Development Events (CDE) and to understand fully the CDE concepts. Students receive much needed hands-on experience at the state and national levels. Preq: AG ED 202.

AG ED 303 Mechanical Technology for Agriculture Education 3(2,3) Study of technical content and new technology utilized in agriculture mechanics. Integrates agriculture mechanics topics such as electrical wiring and controls, green industry maintenance, irrigation systems, and agriculture construction. Offers a delivery of mechanics instruction in the classroom and laboratory setting.

AG ED 355 Team and Organizational Leadership in the Food and Fiber System 3(3,0) Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. Focuses on helping students better understand themselves and others; improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies.

AG ED 400 Supervised Field Experience II 1(0,3) Special emphasis is placed on enhancing existing knowledge and experiences of the students. Primary focus is on becoming acquainted with the student teaching center well in advance of the customary twelve-week directed teaching experience.

AG ED 401, 601 Instructional Methods in Agricultural Education 3(2,3) Appropriate methods of teaching vocational agriculture in high schools. Includes curricular organizing teaching programs, reaching high school students, and directing FFA activities.

AG ED 402 Agricultural Education Senior Seminar 1(2,0) Provides an opportunity to prepare and deliver information on continuing adult education. Assists students in fully understanding the adult education component of the total Secondary Agriculture Education Program. Preq: AG ED 355.

AG ED 403, 603 Principles of Adult/Extension Education 3(3,0) Overview of adult/extension education and adult learning. Selection of adult education providers is reviewed with emphasis on extension. Preq: Junior standing or consent of instructor.

AG ED 404 Biotechnology in Agricultural Education 3(2,3) Multidisciplinary introduction to theories and applications of biotechnology in agriculture and high school agricultural education. Topics include common techniques used in modern biotechnology, examples of their applications, and social considerations that impact the use of biotechnology in agricultural research and development. Laboratories illustrate principles covered in lecture. Preq: BIOL 104/106.

AG ED 406 Directed Teaching 12(0,36) Guided participation in the professional responsibilities of a teacher of vocational agriculture including extensive study of the problems encountered and competencies developed. Twelve weeks of directed teaching in selected schools are required. Preq: AG ED 400, 401.

AG ED 407 Internship in Extension and Leadership Education 6-12(0,18-36) Internship placements may include county extension offices and other appropriate extension units. Six weeks of supervised experience must be completed for six hours of credit. Twelve weeks of supervised experience must be completed for 12 hours of credit. May be repeated for a maximum of 12 credits. Preq: AG ED 400, 401, Senior standing, and consent of instructor.

AG ED 409, 609 Agriscience Institute: Applications of Agriscience to the Secondary Curriculum 3(2,2) Designed for pre-service and in-service agricultural educators or secondary-level counselors. Surveys current developments in agriscience with an emphasis on modern practices, current job opportunities, and meeting state and national science and math education standards through agricultural instruction. Students construct lesson plans and career planning modules for high school. Preq: AG ED 102.

AG ED 412 Senior Agriculture Leadership Seminar 1(1,0) Emphasizes leadership techniques and policies that affect agriculture. Students conduct research and make presentations on issues which influence agriculture policy. Preq: BIOL 202, 302.

AG ED 415, 615 Leadership of Volunteers 3(3,0) Provides an overview of volunteer management. Examines the knowledge, skills, and abilities required of professional managers to involve volunteers effectively in the work of organizations.

AG ED 416, 616 Ethics and Issues in Agriculture and the Food and Fiber System 3(3,0) Explores ethical theories, concepts of critical thinking, and major ethical issues in American agriculture. The major social, political, economic, and ethical issues that arise in connection to the “food and fiber system” are examined and potential solutions considered.

AG ED 423, 623 Curriculum 2(2,0) Curriculum goals and related planning for career and continuing education programs.

AG ED 425, 625 Teaching Agricultural Mechanics 2(1,3) Instruction in organizing course content, conducting and managing an agricultural mechanics laboratory, shop safety, microteaching demonstrations of psychomotor skills, and methods of teaching manipulative abilities.

AG ED 428, 628 Special Studies in Agricultural Education 1-3(1-3,0) Students study, individually or collectively, selected topics and/or problems in agricultural education to meet the particular needs of the clientele enrolled. May be repeated for a maximum of six credits.

AG ED 440, 640 Program Development in Adult/Extension Education 3(3,0) Principles, theory, and practice in planning and conducting educational programs in adult/extension settings. Preq: Junior standing or consent of instructor.

AG ED 450 Modern Topics and Issues 3(3,0) Students select a major area of concern to teachers of agriculture and county agents for intensive study at least one semester prior to offering the course. Team teaching with faculty from other departments in the College of Agriculture, Forestry, and Life Sciences is utilized when feasible. Preq: Senior standing or relevant experience.
AG M 101 Introduction to Agricultural Mechanization and Business 1(0,3) Introduces the Agricultural Mechanization and Business program. Gives an overview of the curriculum and explains the opportunities for extracurricular activities. Covers long-term interaction between the department and alumni.

AG M 206 Machinery Management 3(2,3) Teaches agriculture students to apply physical principles and sound reasoning to the mechanization of modern agricultural production and processing enterprises. Stresses planning efficient operational systems and wise selection of equipment, based on function and economic suitability. Preq: MTHSC 105, PHYS 207 or consent of instructor.

AG M 301 Soil and Water Conservation 2(2,0) Water management in agriculture is studied by applying principles of mathematics, fluid flow, hydrology, and soils as related to soil-water-vegetation complexes in erosion control, water conservation, drainage, and irrigation.

AG M 303 Calculations for Mechanized Agriculture 3(2,3) Enhances students’ ability to analyze and solve a wide range of problems requiring engineering technology. Laboratory periods introduce students to microcomputer hardware. Basic programming and typical applications to agricultural mechanization problems are included. Preq: PHYS 200, 207, or consent of instructor.

AG M 371 Agricultural Mechanization Practicum 1-3 Preplanned internship with an approved employer involved in agricultural technical or business endeavors. A minimum 130 hours of supervised responsibility are required per credit hour. A work journal, written/oral reports, company consent and evaluation must be on file. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Preq: Sophomore standing and consent of department.

AG M 402, 602 Drainage, Irrigation, and Waste Management 3(2,3) Uses basic soil-water-plant relationships to determine the need for and methods of irrigation, drainage, and waste management. Topics include irrigation methods, drainage needs, drainage methods, and waste-treatment methods.

AG M 405, 605 Agricultural Structures and Environmental Control 3(2,3) Technical considerations of buildings used for agriculture emphasizing structural materials, structural adequacy, environmental control, and indoor air quality. Preq: AG M 221, 303, PHYS 200.

AG M 406, 606 Mechanical and Hydraulic Systems 3(2,3) Study of power transmission systems for agricultural production emphasizing mobile equipment. Characteristics, requirements, and design of both V-belt drive and roller-chain drives are presented. Emphasizes hydraulic power transmission systems, including pumps, actuators, control devices, and hydraulic circuitry. Preq: AG M 206, PHYS 200 or 207, or consent of instructor.

AG M 410, 610 Precision Agriculture Technology 3(2,3) Includes principles and hands-on application of technologies supporting precision agriculture. Topics include global positioning system (GPS), geographic information system software, variable rate technologies, collection of spatial data, automated guidance of equipment, spatial data mapping and analysis, remote sensing, and economic considerations. Preq: Junior standing.

AG M 452, 652 Mobile Power 3(2,3) Study of tractors, emphasizing internal combustion engines and support systems necessary for their proper functioning. Also covers application of power, maintenance, adjustments, and general repair. Preq: PHYS 200, 207 or consent of instructor.

AG M 460, 660 Electrical Systems 3(2,3) Students analyze electrical and related curricula study electric and other utilities on the farm and in the home. Emphasizes selection, installation, and maintenance of wiring systems, lighting systems, motors, controls, water systems, and waste disposal systems. Preq: Junior standing.

AG M 472 Capstone 3(2,3) Covers professional conduct, ethics, oral and written communication, and financial matters. Each student completes a comprehensive project on a technical subject. The results are given in a written report and oral presentation. Students use digital portfolio technology to assess their education.

AG M 473 Special Topics in Agricultural Mechanization 1-3(1-3,0) Comprehensive study and application of new technologies and methods not covered in existing courses. Emphasizes independent study using innovative approaches to problem solving. May be repeated for a maximum of six credits. Preq: Consent of instructor.
AGRICULTURE, FORESTRY, AND LIFE SCIENCES

AFLS 191 Directed Research 1-3(0,3-9) Research projects, supervised by faculty in the College of Agriculture, Forestry, and Life Sciences introducing research methods. Restricted to outstanding high school students, selected using Governor’s School for Science and Mathematics ranking criteria. May be repeated for a maximum of six credits. Prereq: Entering high school junior or senior status and consent of faculty research supervisor and department in which research is conducted.

AMERICAN SIGN LANGUAGE

Associate Professor: W. A. Brant; Lecturer: B. D. Jordan

A S L 101 American Sign Language I 4(3,1) Introduction to the basics of American Sign Language, its history, and culture. Visual-gestural communication techniques are used.

A S L 102 American Sign Language I 4(3,1) Continuation of A S L 101 and culture to develop further communicative competencies. Proficiency oriented with the use of visual-gestural communication skills. Prereq: A S L 101 or consent of instructor.

A S L 201 American Sign Language II 3(3,0) Continuation of A S L 102. Covers additional vocabulary, sentences, and grammar structures. Main focus is on conversational and receptive skills as well as a better understanding of Deaf culture. Prereq: A S L 102 or consent of instructor.

A S L 202 American Sign Language II 3(3,0) Continuation of A S L 201, concentrating on intermediate conversational and discourse skills using American Sign Language, more complex American Sign Language grammar, reading comprehension, and composition of short stories, narrations, and dialogues with an emphasis on topics related to the Deaf community. Class is conducted totally in American Sign Language using visual-gestural communicative techniques. Prereq: A S L 201 or consent of instructor.

A S L 297 Creative Inquiry—American Sign Language I 1-4(1-4,0) In-depth look into language, culture, and daily lives of approximately one million people who use American Sign Language as their primary language. Traces the roots of American Sign Language from pre-revolutionary times to current science and knowledge and how it applies to professional fields. Taught in American Sign Language. Prereq: A S L 202 or consent of instructor.

A S L 305 Deaf Studies in the United States 3(3,0) Continuation of American Sign Language II 3(3,0) In-depth look into language, culture, and daily lives of approximately one million people who use American Sign Language as their primary language. Traces the roots of American Sign Language from pre-revolutionary times to current science and knowledge and how it applies to professional fields. Taught in American Sign Language. Prereq: A S L 202 or consent of instructor.

A S L 397 Creative Inquiry—American Sign Language I 1-4(1-4,0) Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project, develop a critical framework, and initiate research on a specific topic.

A S L 401 Discourse in American Sign Language I 3(3,0) Designed for advanced-level students in American Sign Language. Primary goal is to further develop students’ understanding and knowledge of American Sign Language by incorporating in-depth analysis of American Sign Language’s historical development, linguistic structures, syntax, grammar, and pragmatics. Prereq: A S L 302 or consent of instructor.

A S L 402 Discourse in American Sign Language II 3(3,0) Continuation of American Sign Language 401. Primary goals is to further develop students’ understanding and knowledge of American Sign Language by incorporating a more complex analysis of time and space, social structure, and ethnicity, and focus on the Deaf community. Prereq: A S L 401 or consent of instructor.

A S L 400 Deaf Literature and Folklore 3(3,0) Designed for advanced-level students in American Sign Language. Primary goal is to further develop students’ understanding and knowledge of Deaf literature, folklore, and the community at large. Includes introductions to deaf authors, literary works, plays, poetry, painting, and sculpture. Prereq: A S L 302 or consent of instructor.

A S L 497 Creative Inquiry—American Sign Language I 1-4(1-4,0) Continuation of research initiated in A S L 397. Students complete their projects and disseminate their research results. Prereq: A S L 397 or consent of instructor.

ANIMAL AND VETERINARY SCIENCES

AVS 100 Orientation to Animal, Dairy, and Veterinary Sciences 1(2,0) Study of the role of animal agriculture in the world today emphasizing supply and demand of end products and careers available in the animal industry.

AVS 101 Dairy Foods 1(1,0) Study of production aspects of dairy foods from the farmer to the consumer including such products as ice cream, yogurt, and various cheeses. Considers the use of these foods for nutrition and pleasure. Students who have received credit for AVS 430 will not be allowed to enroll in or receive credit for AVS 101.

AVS 150 Introduction to Animal Science 3(3,0) Survey of animal industries and their role in society. Examines the relationship between man and animals in both a current and historical context.

AVS 151 Introduction to Animal Science Laboratory 1(0,2) Examines the basic principles in the handling of livestock and techniques of farm animal production as well as orientation to animal production units. Coreq: AVS 150.

AVS 200 Beef Cattle Techniques 2(1,2) Examines basic principles in the techniques and management associated with production of both beef cattle and sheep. Students may take only one technique course per semester. Coreq: AVS 150.

AVS 201 Poultry Techniques 2(1,2) Basic principles of the production of poultry are discussed and demonstrated. Students receive hands-on experience in the production and processing of poultry. Students may take only one technique course per semester. Prereq: AVS 151.

AVS 203 Dairy Science Techniques 2(1,2) Introduction to dairy production and processing. Laboratories include hands-on opportunities for management of dairy cattle, quality control of milk, and processing of milk and dairy products. Students may take only one technique course per semester. Prereq: AVS 151.

AVS 204 Horse Care Techniques 2(1,2) Basic principles of equine behavior, handling, and management are discussed and demonstrated. Students receive hands-on experience with various management techniques including handling and all aspects of health care. Students may take only one technique course per semester.

AVS 205 Horsemanship I 2(0,4) Designed for beginner to intermediate riders. The mechanics of safety, safety, basic position, cues, and rider's aids for both western and English disciplines are covered. Prereq: AVS 151.

AVS 206 Swine Techniques 2(1,2) Examines the basic principles in the techniques and management associated with production of swine. Students may take only one technique course per semester. Prereq: AVS 150, 151.

AVS 207 Horsemanship II 2(0,4) Designed for intermediate to advanced riders to enhance basic horsemanship and develop specific skills for advanced maneuvers in both western and English disciplines. Students concentrate on individual work and establish finesse and subtlety of aids. Training and artificial aids are discussed and/or implemented in riding sessions. Prereq: AVS 205 and consent of instructor.

AVS 208 Techniques of Teaching Horsemanship 3(2,2) Discusses teaching techniques and theory and handling of large mounted groups. Trains beginner through advanced levels. Prereq: AVS 205.
AVS 209 Livestock Exhibition Techniques 2(1,2)
Students learn techniques associated with exhibition and evaluation of beef, dairy, equine, poultry, and swine.

AVS 301 Anatomy and Physiology of Domestic Animals 4(3,3) Study of physiology and associated anatomy of the body systems, including nervous, skeletal, muscular, respiratory, digestive, circulatory, urinary, reproductive, and endocrine systems. Designed primarily for students in Animal and Veterinary Sciences. Preq: BIOL 104/106 or 111.

AVS 302 Livestock Selection and Evaluation I 2(1,2) Selection and evaluation of the meat species of livestock with application of theory applied in multiple field exercises.

AVS 303 Livestock Selection and Evaluation II 2(1,2) Selection and evaluation of the meat species of livestock with application of theory applied in multiple field exercises. AVS 302.

AVS 305 Meat Grading and Selection 2(1,2) Classification, grading, and selection of beef, lamb, and pork carcasses and wholesale cuts and factors influencing quality and value are studied. Students are eligible to compete in intercollegiate meat-judging contests. Students are eligible to compete in intercollegiate poultry judging contests. May be repeated for a maximum of four credits. To be taken Pass/Fail only. Preq: Junior standing in Animal and Veterinary Sciences and consent of instructor.

AVS 370 Principles of Animal Nutrition 3(3,0) Familiarizes students with nutrients and feeds used in livestock and specialty animal production. Methods of evaluating common feed-stuffs are covered along with a survey of the functioning of the various digestive systems. Practical aspect to feeding each species is covered. Preq: AVS 150, CH 102.

AVS 375, H375 Applied Animal Nutrition 2(2,2) Students learn procedures for formulating diets that meet nutrient requirements of livestock and poultry, utilizing traditional mathematical approaches and computerized formulation. Computerized least-cost formulation of diets is covered along with familiarization with feeding systems and approaches. Preq: AVS 370.

AVS 385 Equine Behavior and Training 2(0,6) Introduces students to the initial processes in gentling and riding young horses. Students work with two- and three-year-old horses to desensitize them to stimuli in preparation for riding. Students do groundwork and put the initial rides on the horses. Preq: AVS 205 or 207.

AVS 386 Advanced Equine Behavior and Training 2(0,6) Students train young horses advanced skills in western or English disciplines. Students actively prepare horses for show or sale and participate in a show or marketing/sale of their assigned horse. Develops students' negotiation and communication skills, industry insight, and industry-specific jargon. May be repeated for a maximum of four credits. Preq: AVS 385.

AVS 390 Practicum 1-3(0,3-9) On-campus, pre-planned, supervised learning experience in an area related to animal and veterinary sciences. Gives experience not covered in other coursework. May be repeated for a maximum of four credits. To be taken Pass/Fail only. Preq: Consent of instructor supervising practicum.

AVS 401, H401, 601 Beef Production 4(3,2) Discusses breeding, feeding, reproduction, and management of beef cattle. Emphasizes production systems integrating disciplines of animal agriculture into management plans and alternatives. Practical applications of beef production and management practices are also presented. Preq: AVS 202, 370.

AVS 405 Advanced Selection and Evaluation 2(0,4) Special and advanced training in selection and evaluation of breeding, performance, and market animals or their products. Species used are beef and dairy cattle, sheep, swine, and horses. Preq: AVS 302 or 303 or 305 or FD SC 304; 309 or 311 and consent of instructor.

AVS 406 Seminars and Related Topics 2(3,0) Students conduct in-depth library research on current topics related to animal science and give formal presentations using multimedia technology. Students also prepare scientific posters, learn interviewing skills, prepare résumés, and observe professional speakers. Preq: Senior standing.

AVS 409 Selected Topics 1-3(1-3,0) Topics of interest to students at the undergraduate, graduate, and professional levels. Provides experience with problems not covered in other courses or on thesis research. May be repeated for a maximum of six credits, but only if different topics are covered.

AVS 410, 610 Domestic Animal Behavior 3(3,0) Provides knowledge and understanding of behavior related to perception, learning, sociality, reproduction, feeding, and health for application in production, training, and design of environments for optimum health and welfare of domestic animals. Preq: AVS 150, 151.

AVS 411, 611 Animal Growth and Development 3(3,0) Integration of the nutritional, physiological, and genetic basis for animal growth and development with application to livestock and poultry production. Includes the cellular and molecular mechanisms controlling these processes and emphasizes the genes that regulate animal products (meat, eggs, wool, and milk). Preq: AVS 301.

AVS 412, H412, 612 Advanced Equine Management 4(3,2) Further discussion of special considerations of the equine regarding housing, manure management, nutrition, reproduction, transportation, and behavior. Students gain insight into how horses differ from other livestock species and their unique requirements for the above systems. Preq: AVS 370.

AVS 413 Animal Products 3(2,3) Introduction to the safe and humane production of red meat, poultry, and dairy products. Includes HACCP principles and production of value-added animal products.

AVS (BIOSC, MICRO) 414, H414, 614 Basic Immunology 4(3,3) See MICRO 414.

AVS 415, 615 Contemporary Issues in Animal Science 3(3,0) Provides knowledge, understanding, and critical analytical skills on current issues in animal agriculture in diverse regional, national, and global social-cultural and political environments as they impact animals and man. Preq: Junior standing in Animal and Veterinary Sciences.

AVS 416 Equine Exercise Physiology 4(3,2) Integration of muscle, bone, cartilage, cardiovascular, and respiratory systems as related to the equine athlete. Encompasses biomechanics, kinetics, and kinesiology related concepts specific to the horse. Further discussion of diseases related to specific systems is covered. Preq: AVS 301.

AVS 417 Animal Agribusiness Development 4(3,2) Team-based development of a business relating to the animal industries. Students develop the business from the initial idea through operations. Focuses on the development of the business plan including financials, personnel management, and resource needed. Preq: ACCT 201 and AP EC 202 or consent of instructor.

AVS 420, 620 Poultry Science On-line 3(3,0) On-line course covering the physiology, nutrition, health, reproduction, genetics, breeding, housing, and management of commercial poultry species including the processing of meat and egg products.

AVS 422 Special Problems 1-3(0,3-9) Laboratory, library, or field study of problems related to animal and veterinary sciences, emphasizing development and testing of hypothesis and reporting of results. May be repeated for a maximum of four credits. Preq: Junior standing and consent of instructor supervising study.

AVS 441 Animal and Veterinary Sciences Teaching Experience 1-3(1-3,0) Formal teaching experience related to animal and veterinary sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of four credits. To be taken Pass/Fail only. Preq: Consent of instructor.

AVS 442 Animal and Veterinary Sciences Extension Experience 1-3(1-3,0) Formal experience in extension education. Students are involved in development, implementation, or assessment of adult or youth educational programs related to animal and veterinary sciences, under supervision of extension professional. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of four credits. To be taken Pass/Fail only. Preq: Consent of instructor.

AVS 443 AVS International Experience 1-3(1-3,0) Preplanned and approved international experience supervised by an Animal and Veterinary Sciences faculty member. Periodic reports or record keeping are required. Final report and oral presentation are required at the end of the experience. May be repeated for a maximum of four credits. To be taken Pass/Fail only. Preq: Consent of instructor.

AVS 444 AVS Animal Agribusiness Travel Experience 2(1,2) Classroom and travel course to expose students to animal production operations, agribusiness, and industry leaders across various geographical areas. Travel is conducted during spring break and includes visits to farms, universities, and agribusinesses. Additional fee is required. To be taken Pass/Fail only. Preq: Junior standing in Animal and Veterinary Sciences, consent of instructor.

AVS 453, H453, 653 Animal Reproduction 3(2,2) Reproductive physiology and endocrinology of mammals with emphasis on farm animals and frequent reference to reproduction in laboratory animals and humans. Preq: AVS 150, 301.

AVS 455, 655 Animal Reproductive Management 1(0,3) Physiology and endocrinology of pregnant and nonpregnant cows are discussed. Emphasizes methods of artificial insemination, pregnancy detection, and computer record keeping to achieve a high level of reproductive efficiency in cattle. Preq: AVS 150, 301; AVS 453 (or concurrent enrollment).

AVS 465 Advanced Animal Physiology 3(3,0) Fundamental principles relating to the breeding and improvement of livestock including variation, heredity, selection, linebreeding, inbreeding, crossbreeding, and other related subjects. Preq: AVS 150.

ANTH (LANG) 371 Language and Culture 3(3,0) See LANG 371.

ANTH 403, 603 Qualitative Methods 3(3,0) Methods and techniques of qualitative field research, including participant observation, ethnographic interviewing, data analysis, and report writing. Preq: ANTH 201 or consent of instructor.

ANTH (JAPN) 417 Japanese Culture and Society 3(3,0) See JAPN 417.

ANTH (CHIN) 418 Chinese Culture and Society 3(3,0) See CHIN 418.

ANTH (W S) 423 Women in the Developing World 3(3,0) Comparative anthropological study of women and their status in developing countries around the world. A survey of women's daily lives in a global context, emphasizing education, economics, and the environment. Case studies include microfinance, literacy, reproductive rights, and practices, and the impact of religious fundamentalism on women. Preq: Sophomore standing.

ANTH 495 Field Studies 1-6(1,2-12) Group study projects in settings selected by the instructor to provide students with a variety of exposures to various cultural contexts. Archaeological digs are included. Project progress and student interpretations of findings are monitored by periodic group meetings and shared experiences. May be repeated for a maximum of six credits. Preq: ANTH 301 or equivalent and consent of instructor.

ANTH 496 Creative Inquiry—Cultural Anthropology 1-3(1-3,0) Investigates topics in cultural anthropology selected by faculty and students. Goals, research, and outcomes vary from semester to semester and project to project. May be repeated for a maximum of 12 credits. Preq: ANTH 201.

ANTH 498 Independent Study 1-3(1-3,0) Individual readings or projects in anthropological areas not covered in other courses. Preq: ANTH 201.

APPLIED ECONOMICS

AP EC 102 South Carolina and the Global Economy 3(3,0) Explores important aspects of globalization. Includes the role of market-based systems, trade, financial flows, and immigration. Emphasizes the world-wide economic integration of the United States, generally, and South Carolina in particular.

AP EC 202 Agricultural Economics 3(3,0) Analytical survey of the various subdivisions of agricultural economics, including farm organization, enterprise, land economics, marketing, farm prices, governmental farm policies, and the relation of agriculture to the national and international economy.
AP EC 205 Agriculture and Society 3(3,0) Introduction to the development of world society focusing on food production, from early hunting and gathering to modern biotechnology. Covers factors driving societal growth with a global perspective. Explores systematic impacts of growth in technical capacity to produce agricultural products on farm and community organization, industrialization, and the global economy.

AP EC 257 Natural Resources, Environment, and Economics 3(3,0) Economic principles applied to resource allocation problems related to environmental and natural resource issues.

AP EC 302 Economics of Farm Management 3(3,0) Economic principles underlying the organization and operation of agricultural firms and related business enterprises. Particular emphasis is placed on management aspects of the farm as a production unit. Preq: AP EC 302 or ECON 211.

AP EC 308 Quantitative Applied Economics 3(3,0) Basic quantitative relationships in applied economics are examined and interpreted. Emphasizes the mathematical aspects of applied economics. Microcomputer software is utilized for problem solving.

AP EC 309, H309 Economics of Agricultural Marketing 3(3,0) General course in marketing agricultural commodities with particular emphasis upon food products. Analyzes efficiency criteria, consumer behavior, market organizations and institutions, and marketing functions. Preq: AP EC 202.

AP EC 313 Principles of Real Estate Appraisal 3(3,0) Introduction to basic principles and procedures of real estate appraisal. Topics include the real estate market, principles of valuation, legal concepts, and the application of the comparable sales, cost, and income approaches to real estate valuation. Preq: FIN 307 or consent of instructor.

AP EC 319 Agribusiness Management 3(3,0) Study of the principles used in making management decisions and the application of these principles in agribusiness. Emphasizes the application of economics to the solution of problems facing managers of agricultural supply and marketing firms. Preq: AP EC 302 or 309.

AP EC 351 Principles of Advertising 3(3,0) Introduction to the various functions of advertising: research and audience analysis; various media formats; planning, research, and production necessary to create an advertising campaign; social effects, economic effects, and ethical considerations of advertising.

AP EC 352 Public Finance 3(3,0) Principles of financing government, sources of public revenue, objects of public expenditures, programs of fiscal administration, and the application of fiscal policies to stabilizing the national economy. Preq: Junior standing.

AP EC (C R D) 357 Natural Resources Economics 3(3,0) See C R D 357.

AP EC (C R D, HLTH) 361 Introduction to Health Care Economics 3(3,0) See C R D 361.

AP EC 402, 602 Production Economics 3(3,0) Economic analysis of agricultural production involving the concept of the farm as a firm; principles for decision making; the quantitative nature and use of production and cost functions and the interrelations and applications of these principles to resource allocation in farms and among areas. Preq: AP EC 308, ECON 314.

AP EC 403, 603 Land Economics 3(3,0) Study of the characteristics of land and of the physical, legal, social, and economic principles and problems relating to the control and use of land resources. Preq: AP EC 202 or ECON 200.

AP EC 409, 609 Commodity Futures Markets 3(3,0) Introduction to the economic theory, organization, and operating principles of agricultural commodity futures markets in the United States. Emphasizes speculating, hedging, and investing in agricultural commodity futures contracts from the standpoint of the agribusiness entrepreneur. Preq: AP EC 202 or ECON 211.

AP EC (C R D) 411, 611 Regional Impact Analysis 3(3,0) See C R D 411.

AP EC (C R D) 412, 612 Regional Economic Development Theory and Policy 3(3,0) See C R D 412.

AP EC 413, 613 Advanced Real Estate Appraisal 3(3,0) Topics include highest and best use analysis, data collection, and analysis of advanced appraisal procedures for income, cost, and comparable sales approach to real estate valuation. Covers eminent domain, the appraisal of property in transition, and specialized property. Preq: AP EC 313, FIN 307, or consent of instructor.

AP EC 420, 620 World Agricultural Trade 3(3,0) Review of practical considerations of agricultural trade and trade policy analysis. Considers the role of international institutions. Special emphasis is placed on concepts of agricultural trade, analysis of trade policies of major trading partners/competitors, and export/import marketing of products. Offered spring semester only. Preq: AP EC 309, ECON 412 or consent of instructor.

AP EC 421, 621 Globalization 3(3,0) Utilizes the principles of international economics (comparative advantage, free trade versus protectionism, exchange rate determination, etc.) to analyze the contemporary problems and issues of the world economy. Emphasizes application of economic principles to current globalization trends. Preq: ECON 310 or 412 or 413 or consent of instructor.

AP EC (CSENV) 426, 626 Cropping Systems Analysis 3(2,2) See CSENV 426.

AP EC 433, 633 Agricultural Law and Related Environmental Issues 3(3,0) Introduction to agricultural and agriculture-related environmental legal issues. Topics include a review of laws, agencies, programs, court structure, torts, taxation, biotechnology, land and water use, regulated industry, and environment liabilities as they relate to agriculture and natural resources. Preq: LAW 322 or consent of instructor.

AP EC 452, H452, 652 Agricultural Policy 3(3,0) Review of public agricultural policy programs in the United States and a critical examination of current and proposed government policies and programs affecting the agricultural sector of the economy. Includes economic considerations as related to past and current farm price and income problems. Preq: AP EC 302, 309.

AP EC 456, H456, 656 Prices 3(3,0) Review of the basic theory of price under competitive conditions and various modifications; nature, measurement, and causes of daily, seasonal, and cyclical price fluctuations; geographical price relationships; nature, function, and behavior of futures markets; government price programs. Preq: AP EC 308, ECON 314, EX ST 462.

AP EC 457, 657 Natural Resource Economic Theory and Policy 3(3,0) Focuses on analysis of actual, efficient, and sustainable use of natural resources. Topics may vary but include land-use change and regulation, water use and marketing, harvesting trees or fish on farms, harvesting and developing property rights to open-access resources, renewable versus nonrenewable energy use, and sustainable development. Preq: MTHSC 102; C R D 357 or ECON 314.

AP EC 458, 658 Economics of Risk Management 3(3,0) Focuses on cost-benefit analysis of risks, incorporation of economic considerations into risk assessments, and microeconomic analysis of activities, insurance, and policies that reduce, mitigate, or increase these risks. Possible topics include climate change, wildland fire, erosion, pest and invasive species, pestilence, food contamination, and hurricanes. Preq: MTHSC 102 and C R D 357 or ECON 314.

AP EC 460, 660 Agricultural Finance 3(3,0) Study of the principles and technique of financing in the agricultural sector. Topics include the capital situation in agriculture, concepts of farm financial management, use of credit, capital markets, lending agencies, and estate planning. Preq: ACCT 201, AP EC 202.

AP EC 475, 675 Economics of Wildlife Management and Policy 3(3,0) Integrated approach to the study of the economics of wildlife. Topics include determination of market and nonmarket value, single and multiple species management, enterprise cost and returns, marketing wildlife, leasing methods, complementarity and competitiveness of agricultural and forestry enterprises, and timber and crop damage cost estimates and control. Preq: AP EC 202, ECON 200, FOR 304, W F B 306, or consent of instructor.

AP EC 490 Selected Topics I-15(0,2-30) Study of topics in applied economics. Topics may include classroom and/or field experience not normally covered in other classes. May be repeated for credit, but only if different topics are covered. Preq: Junior standing or consent of instructor.

AP EC (C R D) 491 Internship, Agribusiness, and Community and Rural Development 1-6(0,2-12) See C R D 491.

ARABIC

ARABIC 101 Elementary Arabic I 4(3,1) Introductory course for beginners emphasizing acquisition of the Arabic alphabet and writing, basic grammar, vocabulary, speaking and listening skills, and developing strategies for the successful long-term acquisition of Arabic.

ARABIC 102 Elementary Arabic II 4(3,1) Continuation of ARAB 101 consisting of three hours a week of classroom instruction and one hour a week in the language laboratory. Preq: ARAB 101.
ARCHITECTURE

ARCH 101 Introduction to Architecture 3(3,0)
Introduction to the discipline and profession of architecture. Lectures and discussion cover a broad range of architectural issues throughout history. Emphasizes the relationship between architecture and other disciplines as well as across cultures. Includes the development of individual digital portfolio.

ARCH 151 Architecture Communication 4(2,4)
Introduction to principles and elementary vocabulary of architectural design. Collaborative studio which offers instruction in the specific skills of formal design composition, visual communication, oral presentation, and computer literacy. Prereq: ARCH 101.

ARCH 152 Collaborative Studio II 3(1,6)
Continuation of ARCH 151. Introduction to an elemental vocabulary of architecture within basic spatial design problems, emphasizing visual communications skills, oral presentations of work, and analysis and discussion of design issues through critical readings of canonical texts and buildings. Prereq: ARCH 151.

ARCH 201 Introduction to Architecture 3(3,0)
Examines basic concepts of architectural design using historic and contemporary examples. Principles of design, programmatic concerns, design documents, and construction are discussed in the context of the practice of architecture.

ARCH 251 Architecture Foundations II 6(3,6)
Architectural analysis and design problems with a focus on understanding the context of architecture. Specific investigation of buildings as part of the cityscape and the landscape. Instruction on visual communications skills, computer modeling, and oral presentation techniques support the design discussions. Prereq: ARCH 151.

ARCH 252 Architecture Foundations II 6(3,6)
Continuation of ARCH 251. Architectural design problems with a focus on structural and construction principles and their relationship to contextual situations. Instruction in oral communication skills and computer graphics support the design discussions. Prereq: ARCH 251.

ARCH 351 Studio Clemson 6(1,11)
Addresses architectural problems with varied scales, programs, and locations. Emphasizes the relationship between architecture and context. Projects include analysis, conceptual development, and architectonic resolutions. Continued development of graphic and oral communication skills. Design problems vary every semester according to current issues. May be repeated for a maximum of 18 credits. Prereq: ARCH 252.

ARCH 352 Studio Charleston 6(1,11)
Addresses architectural problems with varied scales and programs in the context of Charleston, South Carolina. Emphasizes the relationship between architecture and context. Projects include analysis, conceptual development, and architectonic resolutions. Continued development of graphic and oral communication skills. Design problems vary every semester according to current issues. May be repeated for a maximum of 12 credits. Prereq: ARCH 252.

ARCH 353 Studio Genoa 6(1,11)
Addresses architectural problems with varied scales and programs in the context of Genoa, Italy, and historic Europe. Emphasizes the relationship between architecture and context. Projects include analysis, conceptual development, and architectonic resolutions. Design problems vary every semester according to current issues. Continued development of graphic and oral communication skills. May be repeated for a maximum of 12 credits. Prereq: ARCH 252.

ARCH 354 Studio Barcelona 6(1,11)
Addresses architectural problems with varied scales and programs in the context of Barcelona, Spain. Emphasizes the relationship between architecture and context. Projects include analysis, conceptual development, and architectonic resolutions. Continued development of graphic and oral communication skills. Design problems vary every semester according to current issues. May be repeated for a maximum of 12 credits. Prereq: ARCH 252.

ARCH 355 Studio South 6(1,11)
Addresses architectural problems with varied scales and programs in the context of the South. Emphasizes the relationship between architecture, community, and context. Projects include analysis, conceptual development, and architectonic resolutions. Continued development of graphic and oral communication skills. Design problems vary every semester according to current issues. May be repeated for a maximum of twelve credits. Prereq: ARCH 252.

ARCH 401 Architectural Portfolio II 1(1,0)
Continued portfolio development for the architecture student including professional portfolio, academic portfolio, and digital portfolio. Prereq: ARCH 101. Coreq: ARCH 452, 453; Graduating Senior standing. 

ARCH 403 The Modern Architectural Movement 3(3,0)
Seminar in the analysis and criticism of architectural and town building works. Course sequence includes historic and contemporary examples, literary searches, field trips, essays, and oral reports. Prereq: Senior standing or consent of instructor.

ARCH 404 Current Directions in Architecture 3(3,0)
Critical analysis of the development and current directions of modern movements in architecture. Prereq: Senior standing or consent of instructor.

ARCH 405, 605 American Architectural Styles 1650–1950 3(0,3)
Survey of American architectural styles and of the architects responsible for them, from the Colonial period to our recent past. Considerable emphasis is placed on identifying those architectural elements which serve as clues in determining a building's architectural style.

ARCH 412, 612 Architectural History Research 3(3,0)
Directed investigations related to the art and architectural history of Europe. May be repeated for a maximum of six credits. Prereq: Junior standing or consent of instructor.

ARCH 414, 614 Design Seminar 3(3,0)
Exploration of topical issues in architecture, art, construction, and planning. May be repeated for a maximum of six credits. Prereq: Junior standing or consent of instructor.

ARCH 416, 616 Field Studies in Architecture and Related Arts 3(0,9)
Documentation and analysis of architectural structures observed during European travels in graphic and written form. May be repeated for a maximum of six credits. Prereq: Junior standing or consent of instructor.

ARCH 421 Architectural Seminar 3(3,0)
Lectures and seminars dealing with pertinent topics related to environmental and technological considerations in architecture and the building industry. Prereq: Senior standing or consent of instructor.

ARCH 422 New Directions Seminar 3(3,0)
Preparation into careers which relate directly (i.e., construction law) or indirectly (i.e., public relations) to the making of our built environment.

ARCH 424, 624 Product Design 3(0,9)
Furniture and product system design with emphasis on ergonomics and the relationship of form and materials. Prereq: Senior standing and consent of instructor.

ARCH 425, 625 Energy in Architecture 3(3,0)
Climate design methodology and its influence on building energy patterns and architectural form. Prereq: Senior standing and consent of instructor.

ARCH 426, 626 Architectural Color Graphics 3(3,0)
Architectural color graphics by computer. Theories of color classification and interaction; application of color theories to art and architecture. Prereq: Consent of instructor.

ARCH 427, 627 Advanced Color Graphics 3(3,0)
Theories of color classification and interaction; three-dimensional color modeling by computer; advanced application of color theories to art and architecture. Prereq: ARCH 426 or consent of instructor.

ARCH 428, 628 Computer-Aided Design 3(2,3)
Introduction to the concepts, skills, and applications of computer-aided design as they relate to the practice of architecture. Prereq: Senior standing or consent of instructor.

ARCH 429, 629 Architectural Graphics 3(3,0)
Provides students with an understanding of the concepts, skills, techniques, and strategies of visual presentation/graphics as they relate to the design professions—architects/landscape architects. Prereq: Junior standing or consent of instructor.

ARCH 430, 630 Theories and Philosophies of Technology and Architecture 3(3,0)
Theoretical and practical examination of technology and architecture from pre-modern and modern viewpoints to study its nonneutral role in shaping and reflecting knowledge, beliefs, and actions within a cultural context.
ARCH 431, 631 Virtual Reality in Architecture 3(3,0) Introduction and exploration of the theories and concepts of virtual reality and their use in modeling three dimensional spaces. Instruction in computer modeling, lighting, and texture mapping is offered. Projects focus on the creation and presentation of a virtual environment. Prereq: Junior standing or consent of instructor.

ARCH 440, 640 New York Field Study 3(3,0) Study of architecture, art, planning, and urban design in New York. Two weeks of residence are required with scheduled field trips to relevant sites in all five boroughs, with counseling to determine research interests. Guidance is provided to resources in the city. A final report is required. Offered Maymester only.

ARCH 451 Architecture Studio III 6(1,11) Studio projects in basic visual elements and principles. The development of creative design process, visual organization, and design skills are introduced as a foundation for further study in visual arts.

ART 103 Visual Arts Studio 3(0,6) Studio projects in basic visual elements and principles. The development of creative design process, visual organization, and design skills are introduced as a foundation for further study in visual arts.

ART 105 Foundation Drawing I 3(0,6) Introduction to drawing. Presents exploration of observational drawing practices with an emphasis on structural investigations of form and application of spatial systems. Basic materials and approaches associated with drawing are studied and applied. Prereq: Visual Arts major, Visual Arts minor, or consent of instructor.

ART 106 Foundation Drawing II 3(0,6) Further exploration of introductory drawing. Emphasizes use of tone and color. Students work primarily with representational categories, developing comprehension of complex forms and spaces in relation to the 2-D plane. Includes use of rigorous observational drawing practices in conjunction with the 3-D. Prereq: ART 105, ART 151, or consent of instructor.

ART 151 Foundations in Visual Arts I 3(0,6) Intensive introduction to the fundamentals of visual art. Studio projects, discussions and those projects relative to foundation-level art students. Explores historical and contemporary applications of the elements and principles of design. Prereq: Visual Arts major.

ART 152 Foundations in Visual Arts II 3(0,6) Intensive introduction to the fundamentals of visual art. Studio projects, discussions, and topics and projects relative to foundation-level art students. Explores historical and contemporary applications of the elements and principles of design. Prereq: Visual Arts major.

ART 153 Orientation to Visual Arts I 1(1,0) Introduction to the visual arts profession focusing on issues related to various career opportunities, creativity, problem-solving methodologies, and current thinking in contemporary art. Prereq: Visual Arts major.

ART 205 Beginning Life Drawing 3(0,6) Primary emphasis is on drawing from the live model. Students' drawing skills and fundamental understanding of the structure and form of the human figure are reviewed through studio practice, augmented by lectures, discussions, demonstrations, and critiques. Addresses historical and contemporary use of the human figure in visual arts. Prereq: ART 106, 151, 152; or consent of instructor.

ART 207 Beginning Painting 3(0,6) Introduction to basic materials, methods, and techniques of painting. Primary medium used is acrylic, and other painting media may also be introduced. Emphasizes basic skills in painting plus individual creative development. Prereq: ART 151, 153, 205 (Visual Arts majors); ART 103 (non-Art majors); ARC152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 209 Beginning Sculpture 3(0,6) Studio course investigating the meaning of sculpture through traditional and nontraditional approaches. Establishes a working knowledge of material and process in several media. Personal expression is encouraged and enhanced by employment of problem-solving techniques. Static, temporal, installation, and site specific sculpture is explored. Prereq: ART 151, 152, 153, 154, 205 (Visual Arts majors); ART 103 (non-Art majors); ARCH 152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 211 Beginning Printmaking 3(0,6) Studio course introducing basic techniques of relief printing, intaglio, lithography, silkscreen, and papermaking. Each semester concentrates on two or three of these techniques. Coursework integrates print-making processes and creativity. Prereq: ART 151, 152, 153, 154, 205 (Visual Arts majors); ART 103 (non-Art majors); ARCH 152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 213 Beginning Photography 3(0,6) Introduction to the use of photography as an art medium. Lectures and studio work cover the utilization of the camera, processing, and printing in black and white, with emphasis on perception and creative expression. Prereq: ART 151, 152, 153, 154, 205 (Visual Arts majors); ART 103 (non-Art majors); ARCH 152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 215 Beginning Graphic Design 3(0,6) Introduction to fundamental techniques and principles of visual communication. Through a series of projects and studio work, students explore techniques of communication through the use of type design, typography, photography, illustration, symbolism, and product design. Individual creative development is stressed. Prereq: ART 151, 152, 153, 154, 205 (Visual Arts majors); ART 103 (non-Art majors); ARCH 152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 217 Beginning Ceramics 3(0,6) Basic studio course introducing ceramic arts through its various processes and techniques. Hand building methods as well as throwing on the potter's wheel are developed. Weekly projects emphasize imagination, self-expression, and skill development. Ceramic history is introduced through slide lectures. Prereq: ART 151, 152, 153, 154, 205 (Visual Arts majors); ART 103 (non-Art majors); ARCH 152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 221 Beginning New Media 3(0,6) Explores new media art practices and ideas. Digital tools and processes are explored relative to drawing, painting, printing, bookmaking, and photography. Introduces new media as a context of new collective, interactive, and social modes of art production. Prereq: ART 106, 151, 152, or consent of instructor.
ART 223 Woodworking Studio 3(0,6) Introduces woodworking explorations in sculpture and furniture design emphasizing technical understanding and creative application of woodworking processes and methodologies. Students experiment with wood as a vehicle for personal expression and thematic development and conduct research on the historical impact of woodworking in the visual arts. Preq: ART 151, ART 152 or ARCH 152, or LARCH 152, or consent of instructor.

ART 305 Intermediate Drawing 3(0,6) Presents drawing problems and processes directed toward the production of thematically driven projects. Exploration of diverse drawing media. Emphasizes further development of drawing skills, relationships of materials/techniques to subject matter, and the study of contemporary issues in drawing. Preq: ART 205 or consent of instructor.

ART 307 Painting 3(0,6) Continuation of ART 209 with increased emphasis on personal expression and growth in technical competence. Some study of painting history is included in studio activity. Preq: ART 207 or consent of instructor.

ART 308 Painting Research 1 1-3(0,2-6) Continuation of ART 307. Technical and conceptual research in painting to further develop self-expression. Special projects are developed in consultation with instructor. May be repeated for a maximum of five credits. Preq: ART 307 or consent of instructor.

ART 309 Sculpture 3(0,6) Continuation of ART 209 with increased emphasis on personal expression and content of work. Further exploration of materials and processes including an introduction to foundry casting and advanced welding techniques. Individual investigation into current and historical aspects of sculpture is required. Preq: ART 209 or consent of instructor.

ART 310 Sculpture Research 1 1-3(0,2-6) Continuation of ART 309. Technical and conceptual research in sculpture to further develop self-expression. Special projects are developed in consultation with instructor. May be repeated for a maximum of five credits. Preq: ART 309 or consent of instructor.

ART 311 Printmaking 3(0,6) Continuation of processes in beginning printmaking emphasizing expanding the range and depth of technique. The relationship of technique and process to creative idea development is emphasized. Preq: ART 211 or consent of instructor.

ART 312 Printmaking Research 1 1-3(0,2-6) Continuation of ART 311. Technical and conceptual research in printmaking to develop self-expression. Special projects are constructed in consultation with instructor. May be repeated for a maximum of five credits. Preq: ART 311 or consent of instructor.

ART 313 Photography 3(0,6) Continuation of ART 213. Advanced techniques and more diverse types of film and paper are used in making images of personal and expressive nature. The design and construction of a view camera, printing in color, and multiple imagery may also be included. Preq: ART 213 or consent of instructor.

ART 314 Photography Research I 1-3(0,2-6) Continuation of ART 313. Technical and conceptual research to develop personal and expressive work in photography. Projects are chosen in consultation with instructor. May be repeated for a maximum of five credits. Preq: ART 313 or consent of instructor.

ART 315 Graphic Design 3(0,6) Continuation of concepts and techniques introduced in ART 215 with emphasis on more applied projects. Individual creative solutions are emphasized. Preq: ART 215 or consent of instructor.

ART 317 Ceramic Arts 3(0,6) Continuation of skill development leading to more challenging projects and independent efforts. Further exposure to ceramic history and ceramic technology is presented. Preq: ART 217 or consent of instructor.

ART 318 Ceramics Research I 1-3(0,2-6) Continuation of ART 317. Technical and conceptual research in ceramics for the purpose of self-expression. Projects are constructed in consultation with instructor. May be repeated for a maximum of five credits. Preq: ART 317 or consent of instructor.

ART 321 Art with the Computer 3(0,6) Studio course using the microcomputer as an art medium. Studies in imaging systems emphasizing the creative use of the medium for artistic expression. Preq: ART 151, 152, 153, 154, 207 (Visual Art majors); ART 103 (non-Art majors); ARCH 152 (Architecture majors); LARCH 152 (Landscape Architecture majors); or consent of instructor.

ART 322 Art with Computer Research I 1-3(0,2-6) Continuation of ART 321. Technical and conceptual research to develop personal and expressive work on computer imaging. Projects are chosen in consultation with instructor. May be repeated for a maximum of five credits. Preq: ART 321 or consent of instructor.

ART 323 Digital Sculpture 3(0,6) Studio course covering digital processes applied to making sculpture. Explores digital media as a resource for creative development, creating digital renderings of sculptures, and the fabrication of models and sculptures using CNC technology. Preq: ART 209 and 321 or consent of instructor.

ART 405, 605 Advanced Drawing 3(0,6) Advanced level studies of drawing which explore the synthesis of refined drawing skills and philosophies of art. Students' understanding of drawing as a form of art is developed through studio practice augmented by critiques, demonstrations, lectures, field trips, and independent research. Preq: ART 305 or consent of instructor.

ART 407, 607 Advanced Painting 3(0,6) Advanced studio course in painting. Students select painting media and develop a strong direction based on prior painting experience. Includes study of contemporary painters and directions. Preq: ART 307 or consent of instructor.

ART 409, 609 Advanced Sculpture 3(0,6) Intensive independent studio concentration to further develop personal direction and content. Emphasizes continued investigation of sculptural context, materials and processes, and relative historical research. Preq: ART 309 or consent of instructor.

ART 411, 611 Advanced Printmaking 3(0,6) Culmination of process, techniques, and individual development. Students are expected to have mastered process and technique for the benefit of the image produced. Creativity and self-expression are highly emphasized as students select a process for concentrated study. Preq: ART 311 or consent of instructor.

ART 413, 613 Advanced Photography 3(0,6) Continuation of ART 313. Advanced problems in photography. Preq: ART 313 or consent of instructor.

ART 415 Advanced Graphic Design 3(0,6) Continuation of ART 315. Personal expression through communication techniques is further explored. Individual projects are emphasized. Preq: ART 315 or consent of instructor.

ART 417, 617 Advanced Ceramic Arts 3(0,6) Students are directed toward further development of ideas and skills. Glaze calculation and firing processes are incorporated to allow for a dynamic integration of form and ideas. Preq: ART 317 or consent of instructor.

ART 420, 620 Selected Topics in Art 1-3(0,6-9) Intensive course in studio art. May be repeated for a maximum of six credits. Preq: Senior standing and completion of 300/400 sequence in the chosen studio area, minimum grade-point ratio of 3.0 in focus studio area, participation in senior studio interview. Coreq: ART 473.

ART 472 Bachelor of Fine Arts Senior Studio II 5(0,15) Individual studio project directed by an instructor and determined by the student in consultation with the instructor. Focuses on a particular studio area, concept, or theme. May be repeated for a maximum of six credits. Preq: Senior standing and completion of 300/400 sequence in the chosen studio area, minimum grade-point ratio of 3.0 in focus studio area, participation in senior studio interview. Coreq: ART 473.

ART 473 Senior Seminar in Professional Career Preparation 2(2,0) Seminar and practical guide to prepare students for entry into the professional art world. Focuses on issues concerning visual artists in the early years of their professional activities. Presents career options and practical information for the graduating senior, including portfolio development. Coreq: ART 471.

ART 490, H490, 690 Directed Studies 1-5(0,2-10) Study of areas in the visual arts not included in other courses or additional advanced work. Must be arranged with a specific instructor prior to registration. May be repeated for a maximum of 18 credits. Preq: Consent of instructor.
ART AND ARCHITECTURAL HISTORY

Professor: W. W. Lew; Associate Professors: A. V. Feeser, J. B. LeBlanc; Assistant Professor: K. Kouvelis

A A H 101, H101 Survey of Art and Architectural History I 3(3,0) Comprehensive survey of art and architectural history of Western heritage as well as significant coverage of Asian, African, Native American, and South American art. The arts are studied within the contexts of history, geography, politics, religion, and culture. Survey includes Ancient through Gothic. Preq: A A H 102.

A A H 205, H205 History and Theory of Art I 3(3,0) First of a two-semester sequence on special topics and issues in the history of art. Emphasizes stylistic developments and specific art movements. Analyzes art within the larger context of social, political, and religious history. Examines art techniques and art theory as they have developed. Preq: A A H 102.

A A H 206, H206 History and Theory of Art II 3(3,0) Second of a two-semester sequence on special topics and issues in the history of art. Emphasizes stylistic developments and art movements, with specific attention directed toward post-Renaissance art. Analyzes the influence of past history on modern. Preq: A A H 205.

A A H 210, H210 Introduction to Art and Architecture 3(3,0) One-semester lecture course that introduces the nonmajor to an overview of art and architecture from different time periods and cultures. Students are encouraged to appreciate the contribution to art made by the great masters and to discern different styles, art techniques, and creative traditions.

A A H 305 Contemporary Art History 3(3,0) Study of contemporary art from World War II to the present, exploring forces that have shaped various movements and directions. Preq: A A H 206.

A A H H330 Honors Colloquium 3 Undergraduate honors colloquium emphasizing interdisciplinary interpretations. Focuses on an integration of art, architecture, landscape, and city planning. Preq: A A H 204 or 206 or consent of instructor.

A A H 395 Special Topics in Visual Studies Abroad I 3(3,0) On-site exposure to art and architecture in foreign countries, coupled with lectures and study problems. Different countries may be selected for study at faculty discretion. May be taught as a compact course during the academic year with a short stay in a foreign country or during summer with extended foreign experience. May not be taken Pass/Fail. Preq: A A H 204 or 206 or consent of instructor.

A A H 411, H411 Directed Research in Art History II 3(3,0) Comprehensive studies and research of special topics not covered in other courses. Emphasis is on field studies, research activities, and current developments in art history. Preq: A A H 412, H412 Directed Research in Art History II 3(3,0) Continuation of A A H 411.

A A H 423, H423 Studies in the Art and Architecture of the Renaissance I 3(3,0) Consideration of the visual arts and architectural monuments of the Renaissance (Western Europe from the 15th–18th centuries), with a study in depth of selected examples from the period. Preq: A A H 204 or 206 or consent of instructor.

A A H 424, H424 Studies in the Art and Architecture of the Renaissance II 3(3,0) Consideration of the visual arts and architectural monuments of the Renaissance (Western Europe from the 15th–18th centuries), with a study in depth of selected examples from the period. Preq: A A H 423.

A A H 430, H430 Twentieth Century Art I 3(3,0) Acquiring students with the major artists' monuments and themes of the modern period in art. Through lecture/discussion and the reading of primary sources, courses places the major modern movements in the context of the period (1860s–1945). Preq: Consent of instructor.

A A H 432, H432 Twentieth Century Art II 3(3,0) Explores the trends in art and architecture since World War II. Specific artists, artworks, country or movements are presented in a social/historic context with specific emphasis on the transition from a late-modernist to a post-modern perspective. Preq: Consent of instructor.

A A H (PHIL) 433, H433 Issues in Contemporary Art and Philosophy 3(3,0) See PHIL 433.

ASTRONOMY

Professors: D. D. Clayton, M. D. Leising, B. S. Meyer; Associate Professors: P. J. Flower, D. H. Hartmann, J. C. King

ASTR 101 Solar System Astronomy 3(3,0) Descriptive survey of the universe, with emphasis on basic physical concepts and the objects in our solar system. Related topics of current interest are included. For nonscience majors.

ASTR 102 Stellar Astronomy 3(3,0) Descriptive survey of the universe, with emphasis on basic physical concepts and galactic and extragalactic objects. Related topics of current interest are included. For nonscience majors. May not be taken by students who have completed ASTR 302.

ASTR 103 Solar System Astronomy Laboratory 1(0,2) Optional laboratory to accompany ASTR 101. Demonstrations, laboratory exercises, and planetarium visits supplement the lecture course. Coreq: ASTR 101.

ASTR 104 Stellar Astronomy Laboratory 1(0,2) Optional laboratory to accompany ASTR 102. Demonstrations, laboratory exercises, and planetarium visits supplement the lecture course. Coreq: ASTR 102.

ASTR 105 Physics of the Universe 3(3,0) Basic physics principles of Newtonian mechanics, special and general relativity, quantum mechanics, atomic structure, thermal physics, optics, and radiation physics are qualitatively and quantitatively presented. These principles are then applied to demonstrate their usefulness in understanding fundamental astrophysical objects and processes in the cosmos. Preq: MTHSC 105 or equivalent.

ASTR (GEOL) 220 Planetary Science I 3(3,0) See GEOL 220.

ASTR 302 Stellar Astrophysics 3(3,0) Study of the basic physical concepts necessary for understanding the sun, other stars, and their evolution. Topics include star formation, stellar structure and evolution, binary stars, and observational techniques. Preq: PHYS 221 or consent of instructor.

ASTR 303 Galactic Astrophysics 3(3,0) Study of basic physical concepts necessary for understanding the structure of the galaxy, the motions of the stars within it, the nature of the interstellar matter, other galaxies, the large-scale structure of the universe, and the origin of the solar system. Preq: PHYS 221 or consent of instructor.

ASTR 475 Selected Topics in Astrophysics 1(0-3,0-9) Comprehensive study of an area of astrophysics. Topics may include nucleosynthesis and stellar evolution, extragalactic distance scale, structure and evolution of galaxies, and large-scale structure of the universe. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: ASTR 302 or consent of instructor.

ATHLETIC LEADERSHIP

Assistant Professor: D. B. Fleming; Lecturer: D. J. Cadorette

A L 349 Principles of Coaching 3(3,0) Investigation into the scientific basis of the coaching profession, middle and high school levels. Topics include developing a coaching philosophy, sport psychology, sport pedagogy, sport physiology, athletic administration, and risk management. Current issues regarding sportsmanship, gender equity compliance, and cultural diversity are researched and synthesized. Preq: Athletic Leadership minor or consent of Athletic Leadership coordinator.

A L 350 Scientific Basis of Coaching I: Exercise Physiology 3(3,0) Increases understanding of basic scientific information concerning athletic performance by using the conceptual approach. Focuses primarily on an in-depth investigation into the physiological principles that can enhance athletic performance. Includes phases of physical training as well as comprehensive evaluative techniques. Preq: A L 349 or consent of Athletic Leadership coordinator.
A L 352 Scientific Basis of Coaching II: Kinesiology 3(3,0) Increases understanding of basic scientific information concerning athletic movement by utilizing the conceptual approach. Deals with the basic laws of human motion necessary in evaluation of athletic movement, utilizing joint structure and anatomic landmarks as a basis for motion. Preq: A L 349.

A L 353 Theory of Prevention and Treatment of Athletic Injuries 3(2,3) Increases understanding of principles involved in the prevention and treatment of athletic injuries. Deals with basic anatomy, first aid, and diagnostic techniques necessary for the understanding of basic athletic training procedures. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 361 Administration and Organization of Athletic Programs 3(3,0) Study of modern techniques and practices used in administering athletic programs. Emphasizes areas such as practice and game organization, purchase and care of equipment, budget and finances, public relations, and legal liability in athletic programs. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 362 Psychology of Coaching 3(3,0) Study of psychological techniques utilized to promote maximum athletic performance. Emphasizes motivation, coaching philosophy, athletic personality, mental preparation, and goal-oriented behavior. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 371 Coaching Baseball 1(0,3) Increases understanding of basic technical and practical information concerning the coaching of baseball by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 372 Coaching Basketball 1(0,3) Increases understanding of basic technical and practical information concerning the coaching of basketball by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 373 Coaching Cross Country 1(0,3) Increases understanding of technical and practical information concerning the coaching of cross country by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 374 Coaching Football 1(0,3) Increases understanding of basic technical and practical information concerning the coaching of football by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 375 Coaching Soccer 1(0,3) Increases understanding of basic technical and practical information concerning the coaching of soccer by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 376 Coaching Strength and Conditioning 1(0,3) Increases understanding of basic technical and practical information concerning the coaching of strength and conditioning by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 377 Coaching Track and Field 1(0,3) Increases understanding of basic technical and practical information concerning the coaching of track and field by utilizing the conceptual approach. Students study basic principles of coaching, competitive organization, and proper technical skills needed to improve athletic performances. Also covers total program development as it pertains to specific levels of competition. Preq: A L 349 or consent of Athletic Leadership coordinator.

A L 380 Athletic Leadership Internship 0 Athletic coaching and administration internship for a minimum of 60 hours. To be taken concurrently with other Clemson University course. To be taken Pass/Fail only. Preq: Current CPR certification and consent of Athletic Leadership coordinator.

A L 453, 653 Athletic Injuries: Prevention, Assessment and Rehabilitation 3(3,0) Gives students an understanding of prevention, treatment, and rehabilitation procedures of injured athletes. Preq: A L 349.

BIOCHEMISTRY

BIOCH 103 Careers in Biochemistry and Genetics 1(1,0) Introduces students to biochemistry and genetics career paths, professional organizations, ethical issues, and requirements for advanced study. Also gives students training in design of a professional portfolio. A student may not receive credit for both BIOCH 103 and GEN 103. Preq: Freshman or sophomore standing in Biochemistry or Genetics or consent of instructor.

BIOCH 301, H301 Molecular Biochemistry 3(3,0) Introduces the nature, production, and replication of biological structure at the molecular level and its relation to function. Preq: CH 223.

BIOCH 302 Molecular Biochemistry Laboratory 1(0,3) Laboratory to accompany BIOCH 301. Introduction to fundamental laboratory techniques in biochemistry and molecular biology and a demonstration of some of the fundamental principles of molecular biology discussed in BIOCH 301. Preq: CH 223. Coreq: BIOCH 301.

BIOCH 305 Essential Elements of Biochemistry 3(3,0) Introduction to structure, synthesis, metabolism and function of biomolecules in living organisms. Preq: CH 201 or equivalent.

BIOCH 306 Essential Elements of Biochemistry Laboratory 1(0,3) Introduces students to fundamental techniques associated with tissue extraction and analysis of biomolecules. Students learn both principles and practical applications. Preq or Coreq: BIOCH 305.

BIOCH 406, 606 Physiological Chemistry 3(3,0) Studies chemical basis of the mammalian physiological processes of muscle contraction, nerve function, respiration, kidney function, and blood homeostasis. Discusses composition of specialized tissue such as muscle, nerve, blood, and bone and regulation of water, electrolytes, and acid-base balance. Preq: BIOCH 305 or organic chemistry.

BIOCH 423, 623 Principles of Biochemistry 3(3,0) Study of the chemistry of amino acids, monosaccharides, fatty acids, purines, pyrimidines, and associated compounds leads to an understanding of their properties and the relationship between structure and function that makes them important in biological processes. The use of modern techniques is stressed. Preq: CH 224 or equivalent.

BIOCH 431, H431, 631 Physical Approach to Biochemistry 3(3,0) Study of chemical and physical properties of amino acids, lipids, nucleic acids, sugars, and their biopolymers. Physical and mathematical analyses are correlated with biological structure and function. Preq: BIOCH 301 with a C or better or consent of instructor. Coreq: Physical chemistry.

BIOCH 432, H432, 632 Biochemistry of Metabolism 3(3,0) Study of the central pathway of carbohydrate, lipid, and nucleotide metabolism. Emphasizes bioenergetics, limiting reactions, and the regulation and integration of the metabolic pathways. Preq: BIOCH 423 or 431 or consent of instructor.

BIOCH 433, 633 General Biochemistry Laboratory I 2(0,4) Experiments to illustrate current methods used in biochemical research. Preq: Concurrent enrollment in BIOCH 423 or 431.

BIOCH 434, 634 General Biochemistry Laboratory II 2(0,4) Continuation of BIOCH 433. Preq: Concurrent enrollment in BIOCH 432.

BIOCH 436, H436, 636 Nucleic Acid and Protein Biosynthesis 3(3,0) Examines how nucleic acids and proteins are synthesized in prokaryotic and eukaryotic cells. Designed for students interested in biochemistry, cell biology, molecular biology, and cell physiology. Preq: BIOCH 423, 431, or 432; or consent of instructor.

BIOCH (GEN) 440, H440, 640 Bioinformatics 3(3,0) See GEN 440.
BIOCH 443, 643 Biochemical Basis of Disease 3(3,0) Topics in heritable human metabolic disorders including clinical features and newborn screening, genetic testing, the biochemical basis, and treatment. Preq: BIOCH 301, GEN 302, or consent of instructor.

BIOCH 490 Selected Topics in Biochemistry 1-4(0,4-0,9) Comprehensive study of selected topics not covered in other courses. May be repeated for a maximum of eight credits, but only if different topics are covered. Preq: Junior standing or consent of instructor.

BIOCH 491, H491 Directed Research in Biochemistry 1-8(0,3-24) Orientation in biochemical research (i.e., experimental planning, execution, and reporting). May be repeated for a maximum of eight credits.

BIOCH 493, H493 Senior Seminar 2(2,0) Analysis and discussion of papers from the primary literature in the life sciences particularly in biochemistry. Students find pertinent articles in the primary literature and present and analyze the selected reading.

BIOENGINEERING

BIO E 101 Biology for Engineers 1(1,0) Provides basic introduction to fundamental principles of molecular and cellular biology. Preq: CH 101.

BIO E 201 Introduction to Biomedical Engineering 3(3,0) Provides engineering, biological, and physical science students with an overview of the replacement of human body parts and the problems related to artificial devices. Offered fall semester only. Preq: BIO E 101 or BIOE 110; CH 102; or consent of instructor.

BIO E 302 Biomaterials 3(3,0) Study of metallic, ceramic, and polymer materials used for surgical and dental implants; materials selection, implant design, physical and mechanical testing; corrosion and wear in the body. In addition, physical and mechanical properties of tissue as related to microstructure are studied. Offered spring semester only. Preq: BIO E 201, CM E 210, CH 201, or consent of instructor.

BIO E 320 Biomechanics 3(3,0) Study of relation between biological and mechanical functions of musculoskeletal tissues such as bone, ligaments, muscles, cartilage, etc.; mechanics of human joints; analysis of implants and implant failure. Preq: EM 201, MTHSC 208.

BIO E 370 Bioinstrumentation and Bioimaging 3(2,3) Introduction of fundamental topics in bioinstrumentation and bioimaging focused on the acquisition and monitoring of vital signals. Basic principles for the selection and appropriate use of instruments for solving bioengineering and medical problems such as microscopy, magnetic resonance imaging, and ultrasonics, among others, are addressed. Preq: E C E 320; or MTHSC 208 and E C E 307; or consent of instructor.

BIO E 400 Senior Seminar 1(1,0) Addresses problems to be encountered by bioengineering graduates in professional practice. Invited lecturers and faculty provide lectures and demonstrations. Pertinent information on job interview skills, career placement and guidance, professional registration, professional ethics in bioengineering, entrepreneurship and patents, and business management are provided. To be taken pass/fail only. Preq: Senior standing in Bioengineering.

BIO E 401 Biomedical Design 3(1,6) Covers basic steps in designing medical devices intended for short- or long-term implantation. Materials selection, fabrication processes, performance standards, cost analysis, and design optimization are covered. Design project is required. For engineering majors only. Preq: BIO E 302 or consent of instructor.

BIO E 402 Biocompatibility 3(2,3) Determining compatibility of biomaterials with the physiological environment using optical microscopy, microradiography, and ultraviolet fluorescence. Histological evaluation of implant-tissue interface and basic pathological reactions and tissue reactions to materials combined with the design of histotechnological processing for new biomaterials. Preq: BIO E 302 and BIOSC 541 or consent of instructor.

BIO E 444 Tissue Engineering 3(2,3) Explores the principles necessary to use microorganisms, tissue culture, and enzymes in biomedical applications, including molecular techniques, fermentation, process scale-up, purification processes, and FDA regulations. Emphasizes production of biopharmaceuticals derived from recombinant systems, including uses in medical systems. Preq: BIOCH 305 or consent of instructor.

BIO E 448 Engineering 3(1-3,0) Explores the application of engineering principles toward the development of biologically based substances that restore, maintain, or improve tissue function. Topics include biodegradable scaffolds, wound healing and tissue repair, cell-matrix interactions, immunology and biocompatibility, stem cells. Preq: BIO E 302, BIOSC 315, and 461.

BIO E 450, H450 Special Topics in Bioengineering 1-4(1-4,0) Comprehensive study of a topic of current interest in the field of biomedical engineering under the direct supervision and guidance of a faculty member. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

BIO E 451 Creative Inquiry—Bioengineering 1-3(1-3,0) Disciplinary and multidisciplinary team research projects with the goal of developing the students’ skills in literature research, engineering design, and data analysis. May be repeated for a maximum of six credits. Preq: Consent of instructor.

BIO E 460 International Special Research Topics in Bioengineering 3(0,9) Comprehensive study and research exposure relating to bioengineering research topics at an international institution through the Bioengineering study abroad program. Students are exposed to laboratory and research methods while under the direct supervision and guidance of approved international mentors. Preq: Consent of instructor.

BIO E 461 International Study in Bioengineering 3(3,0) Introduction to selected bioengineering topics through participation in international study abroad summer programs. Offers an international study experience to undergraduates through lectures, guest speakers, tours, and/or laboratory exposure on a selected bioengineering topic chosen annually by the department. Preq: Consent of instructor.

BIO E 476 Biosurface Engineering 3(2,3) Study of how surface design influences the interactions of biomolecules with biomaterials, and how this in turn influences implant biocompatibility. Laboratory addresses both the theory and application of various analytical instruments commonly used in bioengineering to characterize biomaterials interfaces and investigate biomolecule-surface interactions. Preq: Senior standing in Biomedical Engineering, BIOCH 305.

BIOE (C M E) 480, 680 Research Principles and Concepts 1(1,0) Introduces seniors and graduate students to principles and practices of scientific research. Topics include developing scientific concepts, developing projects, pursuing research, collaborating in multidisciplinary teams, patenting and publishing technical and scientific information, and reviewing professional and ethical standards of performance. To be taken Pass/Fail only.

BIO E 490 Internship 1(0,3) Observation and assignment in a medical school, dental school, hospital, regulatory agency, or industrial department. May be repeated for a maximum of two credits. Preq: Senior standing in Biomedical Engineering, consent of department chair.

BIOLOGICAL SCIENCES

BIOSC 101 Frontiers in Biology 1(1,0) Introduces Biological Sciences majors to University career and library services, evaluation of computer program proficiency, Web page development, Biological Sciences emphasis areas, and Biological Sciences faculty. Students initiate their own Web-based student portfolios, which showcase their skills and experiences (e.g., résumés, accomplishments, and work samples) during their undergraduate programs. Coreq: BIOL 103/105 or 110 or consent of course coordinator.
BIOSC 102 Frontiers in Biology II 1(1,0) Introduces Biological Sciences majors to recent advances in organismal and evolutionary biology. Topics include ecology, evolution, behavior, and organismal biology. Preq: BIOL 103/105 or 110 or consent of course coordinator.

BIOSC 200 Biology in the News 3(3,0) For non-science majors. Students examine current topics of biology appearing in newspapers and other current media. Uses a problem-based learning approach, with students working as teams and individually on areas of interest identified by the class. Preq: ENGL 103, General Education Natural Science Requirement.

BIOSC 203 Environment, Energy, and Society 3(3,0) Examines power and energy production, the resultant environmental effects, and the relationship between this technology and society. Introduces historical and contemporary sources of energy and power; the economic, social, and political forces important for types and patterns of development; and the resultant impacts to ecosystems and the environment.

BIOSC 205 Plant Form and Function 3(3,0) Introductory course for students majoring in plant sciences. Integrates lecture and laboratory and emphasizes formal structures and functions of higher plants. Preq: BIOL 103/105 or consent of instructor.

BIOSC 206 Plant Form and Function Laboratory 1(0,3) Laboratory for BIOSC 205. Preq or Coreq: BIOSC 205 or consent of instructor.

BIOSC 210 Introduction to Toxicology 3(3,0) Acquaints students with the field of toxicology, integrates the science of toxicology with regulatory policy, and demonstrates its impact on our daily lives. Preq: BIOL 103/105, 110, or consent of instructor.

BIOSC 222 Human Anatomy and Physiology I 4(3,2) Basic introductory course in integrated human anatomy and physiology covering integumentary, skeletal, muscular, and nervous systems; sensory organs. Physiology is stressed. Structured primarily for nursing and other health-related curricula. Preq: BIOL 103/105 or 110; CH 101 and 102, or 105 and 106.

BIOSC 223 Human Anatomy and Physiology II 4(3,2) Continuation of BIOSC 222 covering endocrine, reproductive, cardiovascular, lymphatic, respiratory, urinary, and digestive systems; fluid and electrolyte balance. Physiology is stressed. Preq: BIOSC 222 or consent of instructor.

BIOSC (ENT) 301 Insect Biology and Diversity 4(3,3) See ENT 301.

BIOSC 302, H302 Invertebrate Biology 3(3,0) In-depth survey and comparison of free-living invertebrate animals emphasizing functional anatomy, development, and evolutionary relationships. Preq: Introductory two-semester biology sequence with laboratory. Coreq: BIOSC 306.

BIOSC 303, H303 Vertebrate Biology 3(3,0) Comprehensive survey of vertebrate animals including their taxonomy, morphology, evolution, and selected aspects of the natural history and behavior. Preq: Introductory two-semester biology sequence with laboratory.

BIOSC 304, H304 Biology of Plants 3(3,0) Survey of the major groups of plants, their biology, diversity, and evolution. Preq: BIOL 104/106 or 111 or BIOSC 205. Coreq: BIOSC 308.

BIOSC 305, H305 Biology of Algae and Fungi 3(3,0) Introduction to the biology of the major groups of algae and fungi. Emphasizes how select representatives of the algae and fungi are adapted to their environment through structural, physiological, and life-cycle modifications. Preq: BIOL 104/106 or 111 or BIOSC 205.

BIOSC 306 Invertebrate Biology Laboratory 1(0,3) Survey and comparison of the biology of living invertebrates, examples of which are drawn primarily from the southeastern coast of the United States. Preq: Introductory two-semester biology sequence with laboratory. Coreq: BIOSC 302.

BIOSC 307 Vertebrate Biology Laboratory 1(0,3) Comparative and phylogenetic study of the gross morphology of vertebrates. Preq or Coreq: BIOSC 303.

BIOSC 308 Biology of Plants Practicum 1(0,3) Laboratory exercises that explore the major groups of plants, their biology, diversity, and evolution. Preq or Coreq: BIOSC 304.

BIOSC 309 Algae/Fungi Practicum 1(0,3) Practice in the manipulation and examination of selected algae and fungi, with emphasis on culture techniques and examination of the structural and adaptations of algae and fungi to different environments. Preq or Coreq: BIOSC 305.

BIOSC (W FB) 313 Conservation Biology 3(3,0) See W FB 313.

BIOSC (W FB) 315 Functional Human Anatomy 4(3,3) Introduction to the anatomical structures associated with all organ systems found in the human body, both the gross and microscopic level. Basic physiology is integrated into the course to assist in understanding the function of the anatomical systems. Preq: BIOL 103/105 or 110 or consent of instructor.

BIOSC 316 Human Physiology 4(3,3) Study of the functional processes associated with the various organ systems in the human body. Students develop a basic understanding of the important and fundamental concepts in human physiology and how organ systems maintain homeostasis. Preq: One year of introductory biology and introductory chemistry or consent of the instructor.

BIOSC 320 Field Botany 4(2,4) Introductory study of the taxonomy, ecology, and evolution of plants in their natural environment with an emphasis on identification and characteristics of representative species and plant communities in the Carolinas. Includes one or two required Saturday field trips. Preq: BIOL 104/106, 111, or BIOSC 205, or consent of instructor.

BIOSC 335 Evolutionary Biology 3(3,0) Introduction to basic concepts and underlying principles of modern evolutionary biology. Topics include a historical overview of evolutionary theories, elementary population genetics, principles of adaptation, speciation, systematics and phylogenetic inference, fossil record, biogeography, molecular evolution, and human evolution. Preq: GEN 302 or equivalent.

BIOSC (PL PH) 340 Plant Medicine and Magic 3(3,0) See PL PH 340.

BIOSC (MICRO) 394 Selected Topics in Creative Inquiry 1-2-3(1,3-6) Disciplinary and multidisciplinary group research projects with the goal of developing the students’ ability to discover, analyze, and evaluate data. Students are required to document their research activities in their portfolios. May be repeated for a maximum of six credits. Preq: Consent of instructor.

BIOSC (ENT) 400, H400, 600 Insect Morphology 4(3,3) See ENT 400.

BIOSC 401, H401, 601 Plant Physiology 3(3,0) Relations and processes pertaining to maintenance, growth, and reproduction of plants, including absorption of matter and energy, water relations of the plant, utilization of reserve products and liberation of energy. Preq: BIOL 104/106 or 111 or BIOSC 205 and CH 102. Coreq: BIOSC 402.

BIOSC 402, 602 Plant Physiology Laboratory 1(0,3) Laboratory exercises and experiments designed to indicate the relations and processes which pertain to maintenance, growth, and reproduction of plants, including absorption of matter and energy, water relations of the plant, utilization of reserve products, and liberation of energy. Coreq: BIOSC 401.

BIOSC (GEN) 405, H405, 605 Molecular Genetics of Eukaryotes 3(3,0) See GEN 405.

BIOSC 406, H406, 606 Introductory Plant Taxonomy 3(3,0) Introduction to the basic principles and concepts of plant systematics with emphasis on the plants of South Carolina. Preq: BIOL 104/106 or 111 or BIOSC 205. Coreq: BIOSC 407.

BIOSC 407, 607 Plant Taxonomy Laboratory 1(0,3) Introduction to basic techniques of plant taxonomy with laboratory and field emphasis on the flora of South Carolina. Coreq: BIOSC 406.

BIOSC 408, H408, 608 Comparative Vertebrate Morphology 3(3,0) Phylogeny and diversity of vertebrates and study of their comparative morphology, leading to an understanding of the relationships and functioning of living organisms. Preq: BIOL 104/106 or 111. Coreq: BIOSC 409.

BIOSC 409, H409, 609 Comparative Vertebrate Morphology Laboratory 2(0,5) Comparative anatomy of representative vertebrates; methods used in preparing specimens for study and display. Coreq: BIOSC 408.

BIOSC 410, 610 Limnology 3(3,0) Detailed introduction to the physical, chemical, and biological interrelationships that characterize inland water environments. A fundamental approach to the interactions of components of the environment is developed at a theoretical level. Preq: Junior standing in a life science or consent of instructor.

BIOSC 411, H411, 611 Limnological Analyses 2(1,2) Examines a broad range of topics covered with both standing and running fresh waters. About one-third of the laboratory exercises address the major physical components of lakes and streams. The remainder provides rationale and methods for quantitative analyses of biota, as well as some integrated analyses of whole ecosystems. Preq or Coreq: BIOSC 410 or 443.
Courses of Instruction

BIOSC (ENT) 413, 613 Restoration Ecology 3(3,0) See ENT R 413.

BIOSC (AVS, MICRO) 414, H414, 614 Basic Immunology 4(3,3) See MICRO 414.

BIOSC (ENT) 415, 615 Insect Taxonomy 3(1,6) See ENT 415.

BIOSC (GEN, MICRO) 416, 616 Recombinant DNA 3(3,0) See GEN 416.

BIOSC 417, 617 Marine Biology 3(3,0) Survey of the organisms that live in the sea and their adaptations to the marine environment. Emphasizes characteristics of marine habitats, organisms, and the ecosystems. Preq: BIOL 104/106, 111, or consent of instructor.

BIOSC (GEN, MICRO) 418, 618 Biotechnology I: Nucleic Acid Techniques 4(2,4) See GEN 418.

BIOSC 420, H420, 620 Neurobiology 3(3,0) Broad background in neurobiology. Topics include neuroanatomical structure-function; conduction in the neuron; neurite growth and development; neuromuscular junction; chemistry, physiology, and pharmacology of specific neurotransmitters and receptors; visual processing; axoplasmic transport; hypothalamic-pituitary regulation; theories of behavior; theories of learning and memory. Preq: BIOSC 301 or 305 or consent of instructor.

BIOSC (PL PA) 425, 625 Laboratory I: Nucleic Acid Techniques 4(2,4) See GEN 418.

BIOSC 426, H426, 626 Mycology Practicum 2(1,3) Application of the principles of mycological techniques, microscopic study of fungi. Examples from all major groups of fungi are included. Coreq: BIOSC (PL PA) 425.

BIOSC 432, H432, 632 Animal Histology 3(3,0) Structural and functional study of the basic tissues of animals and tissue makeup of organs. Emphasizes light microscopy level with selected tissue studied at the electron microscope level. Preq: BIOSC 303 or consent of instructor. Coreq: BIOSC 433.

BIOSC 433, H433, 633 Animal Histology Laboratory 2(1,2) Microscopic examination of basic animal tissue types and the tissue makeup of organs which comprise systems. Coreq: BIOSC 432.

BIOSC (ENT) 436, 636 Insect Behavior 3(2,3) See ENT 436.

BIOSC 440, H440, 640 Developmental Animal Biology 3(3,0) Events and mechanisms responsible for the development of multicellular animals. Gametogenesis, fertilization, embryonic development, cellular differentiation, morphogenesis, larval forms and metamorphosis, asexual reproduction, regeneration, malignancy, and aging are analyzed in terms of fundamental concepts and control processes. Preq: BIOCH 301 or 305 or consent of instructor. Coreq: BIOSC 450.

BIOSC 441, H441, 641 Ecology 3(3,0) Study of basic ecological principles underlying the relationships between organisms and their biotic and abiotic environments. Includes physiological, population, and community ecology, with applications of each to human ecological concerns. Preq: BIOL 104/106, 111, BIOSC 205, or consent of instructor.

BIOSC 442, H442, 642 Biogeography 3(3,0) Study of patterns of distribution of plants and animals in space and time. Preq: BIOSC 302 or 303 and 304 or 305 or consent of instructor.

BIOSC 443, H443, 643 Freshwater Ecology 3(3,0) Study of basic ecological principles and concepts as they apply to freshwater environments: rivers and streams, wetlands, lakes and ponds, and reservoirs. Preq: Junior standing in a life science or consent of instructor.

BIOSC 444, H444, 644 Freshwater Ecology Laboratory 2(1,2) Laboratory-based course providing a synthesis of major components of freshwater ecosystems. Activities are hypothesis driven and relate to each other to form an overall synthesis of the field. Hands-on experience allows engagement in creative inquiry. Preq or Coreq: BIOSC 443 or equivalent or consent of instructor.

BIOSC 445, H445, 645 Ecology Laboratory 2(1,2) Modern and classical approaches to the study of ecological problems discussed in BIOSC 441. Students are introduced to field, laboratory, and computer-based analyses of plant and animal populations and communities. Preq or Coreq: BIOSC 441.

BIOSC 446, H446, 646 Plant Ecology 3(3,0) Ecology of plants in relation to their biotic and abiotic environments. Individual organisms, populations, and communities are considered with reference to factors that affect plants in terrestrial environments. Preq: BIOL 104/106, 111, BIOSC 205, or consent of instructor.

BIOSC 447, H447, 647 Plant Ecology Laboratory 2(1,2) Experimental and observational approach to addressing principles discussed in BIOSC 446. Students are introduced to field and laboratory methods involving individual organisms, populations, and communities. Preq or Coreq: BIOSC 446 or consent of instructor.

BIOSC 450, H450, 650 Developmental Biology Laboratory 2(1,2) Examines a broad range of topics concerned with the development of multicellular animals such as gametogenesis, fertilization, embryonic development, cell differentiation, morphogenesis, larval metamorphosis, and regeneration. Laboratory exercises provide the rationale and methods for the descriptive and experimental analysis of development in representative invertebrates and vertebrates. Preq or Coreq: BIOSC 440 or equivalent.

BIOSC 452, H452, 652 Plant Anatomy and Morphology 3(3,0) Study of the anatomy, reproduction, and phylogenetic relationships of vascular plants. Preq: BIOL 104/106, 111, BIOSC 205, or consent of instructor.

BIOSC 453, H453, 653 Plant Anatomy and Morphology Laboratory 2(1,2) Laboratory focusing on the anatomy, reproduction, and phylogenetic relationships of vascular plants. Coreq: BIOSC 452.

BIOSC 454, H454, 654 Plant Virology 4(3,3) Study of plant viruses: their morphology, biochemistry, purification, and transmission; symptoms resulting from virus infection; virus vector relationships. Se- lectional and nucleic acid hybridization procedures. Diagnosis of viral diseases and the identification of causal agents. Replication of plant viruses, the interaction between viral host and plant genome. Control of plant viral diseases. Preq: BIOCH 301, MICRO 305, or consent of instructor.

BIOSC (ENT) 455, H455, 655 Medical and Veterinary Entomology 3(2,3) See ENT 455.

BIOSC 456, H456, 656 Medical and Veterinary Parasitology 3(3,0) Introduction to parasitism in the animal kingdom. Emphasizes basic and applied principles related to economically and medically important diseases. Classical and experimental approaches to the study of parasitism are examined in reference to protozoa, helminths, and arthropods. Preq: BIOL 104/106 or 111. Coreq: BIOSC 457.

BIOSC 457, H457, 657 Medical and Veterinary Parasitology Laboratory 2(1,2) Laboratory to reinforce material presented in BIOSC 456. Introduces students to both live and preserved human and animal parasites. Also introduces techniques used in collection, preservation, and examination of animal parasites. Coreq: BIOSC 456.

BIOSC 458, H458, 658 Cell Physiology 3(3,0) Study of the chemical and physical principles of cell function emphasizing bioenergetics and membrane phenomena. Preq: BIOCH 301 or 305 or consent of instructor.

BIOSC 459, H459, 659 Systems Physiology 3(3,0) Physiological systems of vertebrates and their homeostatic controls. Describes the function of the major physiological systems in terms of anatomical structure and chemical and physical principles. Preq: One year each of biology, chemistry, and physics or consent of instructor.

BIOSC 460, 660 Systems Physiology Laboratory 2(1,2) Modern and classical experimental methods are used to demonstrate fundamental physiological principles discussed in BIOSC 459. Students are introduced to computer-aided data acquisition and computer simulations of physiological function. Preq or Coreq: BIOSC 459.

BIOSC 461, H461, 661 Cell Biology 3(3,0) In-depth analysis of how and where intracellular and extracellular molecules control general and specific cellular functions such as gene expression, secretion, motility, signaling, cell-cycle control and differentiation. Taught and graded at a level where students are expected to infer from and integrate cellular events. Preq: BIOCH 301 or consent of instructor.

BIOSC 462, 662 Cell Biology Laboratory 2(1,2) Laboratory to accompany BIOSC 461. Focuses on molecular and microscopic analysis of eukaryotic cells. Coreq: BIOSC 461.

BIOSC 464, 664 Mammalogy 4(3,3) Origin, evolution, distribution, structure, and function of mammals, with laboratory emphasis on the mammals of the Southeast. Field trips and live trapping of mammals are required. Preq: BIOSC 303 or consent of instructor.

BIOSC (GEN, HORT) 465, 665 Plant Molecular Biology 3(3,0) See HORT 465.
BIOSC 468, 668 Herpetology 3(2,3) Systematics, life history, distribution, ecology, and current literature of amphibians and reptiles. Laboratory study of morphology and identification of world families and U.S. genera, as well as all southeastern species. Field trips are required. Preq: BIOSC 303 or consent of instructor.

BIOSC 470, H470, 670 Behavioral Ecology 3(3,0) Historical and modern developments in animal behavior emphasizing the evolutionary and ecological determinants of behavior. A synthesis of ethology and comparative psychology. Preq: BIOSC 302 or 303 or consent of instructor.

BIOSC 471, H471, 671 Behavioral Ecology Laboratory 2(1,2) Laboratory exercises that explore the behavior of animals. Emphasizes behavioral observation and analysis and presentation of findings in a report format. Includes a semester-long independent research project. Preq or Coreq: BIOSC 470 or consent of instructor.

BIOSC 472, 672 Ornithology 4(3,3) Biology of birds: their origin and diversification, adaptations, phylogeny, classification, structure and function, behavior, ecology, and biogeography. Field identification is emphasized, and field trips are required. Preq: BIOSC 303 or consent of instructor.

BIOSC 473, H473 History of Modern Biology 3(3,0) Examines the intellectual and social factors defining the study of life from the scientific revolution of the 1600s to the modern biological sciences. Investigates the historical origins of biological disciplines and explores the different cultures, methodologies, and philosophical commitments of these communities. Preq: Introductory course in biology or consent of instructor.

BIOSC 475, H475, 675 Comparative Physiology 3(3,0) Physiological systems of invertebrates and vertebrates emphasizing environmental adaptation. Physiological principles as they relate to metabolism, thermoregulation, osmoregulation, respiration, and neural and integrative physiology. Preq: One year each of biology, chemistry, and physics or consent of instructor.

BIOSC 476, H476, 676 Comparative Physiology Laboratory 2(1,2) Modern classical experimental methods are used to demonstrate fundamental physiological principles discussed in BIOSC 475. Students are introduced to computer-aided data acquisition and manipulation as well as computer simulations of physiological function. Preq or Coreq: BIOSC 475.

BIOSC 477, H477 Ichthyology 3(2,3) Systematics, life history, distribution, ecology, and current literature of fish. Laboratory study of morphology and identification of U.S. genera, as well as all southeastern species. Field trips are required. Preq: BIOSC 303 or consent of instructor.

BIOSC 478 Exercise Physiology 3(3,0) Introduction to the physiology of exercise. Focuses on the function and adaptations of body systems in response to exercise. Structured primarily for students interested in PreRehabilitation Sciences. Preq: BIOSC 222/223 or 315/316 or consent of instructor.

BIOSC 479 Kinesiology 3(3,0) Introduction to the study of human movement. Focuses on the application of biomechanical and motor control principles to human motion including daily living, sport, and work activities. Structured primarily for students interested in PreRehabilitation Sciences. Preq: BIOSC 222 or 315 or consent of instructor.

BIOSC (AVS) 480, 680 Vertebrate Endocrinology 3(3,0) Introduction to the basic principles of neuro-endocrine integration and homeostatic maintenance in vertebrates. Comparative morphology and physiology of various endocrine systems and hormones of action are considered. Preq: BIOSC 303, organic chemistry, or consent of instructor.

BIOSC 481, H481, 681 Web Design for the Life Sciences and Agriculture 3(2,2) Addresses basic principles and theories of Web design and site construction, including usability and accessibility considerations. Web and graphics design software are used to develop sites suitable for life science and agricultural organizations. Service learning is used with student projects. Preq: AG ED 200, CP SC 120, or consent of instructor.

BIOSC 482 Laboratory Techniques for Teaching Science 3(1,6) Focuses on basic skills needed to plan, prepare, and conduct inquiry-based laboratories and to familiarize pre-service teachers with a variety of scientific equipment and their methodologies. Technology is used to integrate technology into the classroom. Lab safety, and the development of exemplary lesson/classroom activities. Preq: BIOL 101(2,0) or 111.

BIOSC 483, H483 Human and Comparative Vertebrate Embryology 3(3,0) Study of human and comparative embryology with an introduction to embryological correlates of evolution. Students develop an understanding of normal and abnormal human and comparative vertebrate embryonic development. Preq: BIOL 111 or consent of instructor.

BIOSC 485, 685 Natural History 3(3,0) Intersession, through readings and critical discussion, of concepts of nature and biodiversity in relation to human endeavors. Course seeks to achieve a balanced perspective from which to see compromises between conflicting views of nature. Preq: BIOSC 441, 443, or 446, or equivalent, or consent of instructor.

BIOSC 487, H487 Electron and Optical Microscopy Theory 3(2,2) Offers a theoretical and practical introduction to light and electron microscopy. Topics include Koehler illumination, polarization, interference, phase contrast, DIC epifluorescence, laser scanning light microscopy, SEM, TEM, EDS, ultramicroscopy, tomography, and digital imaging. Preq: Consent of instructor.

BIOSC 490 Selected Topics in Biological Sciences 1-4(1-4,0-9) Comprehensive study of selected topics not covered in other courses. May be repeated for a maximum of eight credits, but only if different topics are covered. Preq: Junior standing or consent of instructor.

BIOSC 491, H491 Undergraduate Research in Biological Sciences 1-4(0,3-12) Mentored research problems introduce undergraduate students to the planning and execution of research and the presentation of research findings. May be repeated for a maximum of eight credits. Honors students must take at least six hours under a single research advisor over two semesters and must write an honors thesis. Preq: Consent of instructor.

BIOSC 492 Internship in Biological Sciences 1-4(3-12) Pre-planned internship at an advisor-approved facility to give students learning opportunities beyond their classroom experiences. Students submit a Student Internship Contract and a two-page study plan before the internship and a comprehensive report within one week of the end of the internship. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Preq: Consent of advisor.

BIOSC 493 Senior Seminar 2(2,0) Capstone course engaging students in analysis and discussion of publications from the technical and non-technical literature in biological sciences and concurrent topics of biology appearing in other media. Students complete their undergraduate on-line digital portfolios. Emphasis is placed on critical issues that arise as a result of biological research. Preq: Senior standing; COMM 150 or ENGL 314; or consent of instructor.

BIOSC (MICRO) 494 Selected Topics in Creative Inquiry II 2-3(1-3-6) Disciplinary and multidisciplinary group research projects with the goal of developing the students’ ability to discover, analyze, and evaluate data. Students are required to document their research activities in their portfolios. May be repeated for a maximum of six credits. Preq: Consent of instructor.

BIOSC 495 Service Learning in Biology 2-4(1-2,3-9) Combines service and academic learning while helping pre-college or college students learn about the fundamental aspects of science. Provides lecture and laboratory experiences as students learn to prepare and participate in supervised laboratory teaching for pre-college or college students. May be repeated for a maximum of six credits. Preq: Consent of instructor.

BIOLOGY Professors: J. L. Dickey, R. J. Kojisinski, W. M. Surver; Associate Professors: R. A. Garcia, K. D. Layfield, C. K. Revis-Wagner, A. D. Smith, S. A. Sparace, J. A. Waldvogel; Senior Lecturers: V. C. Minor; Lecturers: T. Kaisa, S. D. Stocks

BIOL 103, H103 General Biology 1 3(3,0) First in a two-semester sequence. Includes an evolutionary approach to cells, cellular activities, genetics, and animal diversity emphasizing the processes of science. Credit toward a degree will be given for BIOL 103 or 110 only.
BIOL 104, H104 General Biology II 3(3,0)
Continuation of BIOL 103. Includes an evolutionary approach to human anatomy and physiology, plant diversity, morphology, and physiology and principles of ecology. Credit toward a degree will be given for BIOL 104 or 111 only.

BIOL 105 General Biology Laboratory I 1(0,3)
Laboratory to accompany BIOL 105. Emphasizes developing laboratory techniques, becoming familiar with biological instrumentation, and performing investigations and interpreting results in the areas of biochemistry, cell biology, and molecular biology. Coreq: BIOL 103.

BIOL 106 General Biology Laboratory II 1(0,3)
Laboratory to accompany BIOL 106. Emphasizes developing laboratory techniques, becoming familiar with biological instrumentation, and performing investigations and interpreting results in the areas of organismal structure, physiology, and ecology. Coreq: BIOL 104.

BIOL 109 Introduction to Life Science 4(3,3)
Survey of topics in botany, zoology, microbiology, and ecology emphasizing comprehension and practical application of life-science concepts to experiments and activities for the elementary school classroom. Enrollment priority will be given to Early Childhood and Elementary Education majors.

BIOL 110, H110 Principles of Biology I 5(4,3)
Introductory course designed for students majoring in biological disciplines. Integrates lecture and laboratory and emphasizes modern, quantitative, and experimental approach to explanations of structure, composition, dynamics, interactions, and evolution of cells and organisms. High school chemistry is recommended. Credit toward a degree will be given for BIOL 110 or 103 only. Coreq: CH 101.

BIOL 111, H111 Principles of Biology II 5(4,3)
Continuation of BIOL 110, emphasizing the study of plants and animals as functional organisms and the principles of ecology. Credit toward a degree will be given for BIOL 111 or 103 only. Preq: BIOL 110.

BIOL 120 Biological Inquiry Laboratory I 1(0,3)
Required laboratory experience to accompany BIOL 121, 122, 123, or 124. Focuses on the process and outcomes of scientific inquiry. Students employ scientific methodology in a laboratory environment as well as critical analysis of biological problems in a small group context. Coreq: BIOL 121, 122, 123, or 124.

BIOL 121 Keys to Human Identity 3(3,0)
Introduction to scientific inquiry that emphasizes the biological aspects of human identity, including genetics, development, and the brain. Applications in biotechnology and ethical issues associated with these topics are discussed. Credit toward a degree will be given for only one of BIOL 121, 122, 123, 124.

BIOL 122 Keys to Biodiversity 3(3,0)
Introduction to scientific inquiry through analysis of biodiversity. Biological foundations for life are studied, including evolution, ecology, genetics, cells, and molecules. Also includes discussion of ethical issues related to biodiversity. Credit toward a degree will be given for only one of BIOL 121, 122, 123, 124.

BIOL 124 Keys to Reproduction: Cells, Organisms, Populations, Ecosystems 3(3,0)
Introduction to scientific inquiry through analysis of the process of reproduction. The ethics of human reproduction and the evolution and ecological impact of population growth and extinction are emphasized. Credit toward a degree will be given for only one of BIOL 121, 122, 123, 124.

BIOL 201 Biotechnology and Society 3(3,0)
Introduction to the theories, fields, and applications of biotechnology including the structure and function of genes and their manipulation to improve plant and animal productivity and human health. Individual case studies are examined including social and ethical issues surrounding biotechnology-related research and development. Not open to Genetics majors. Coreq: BIOL 120 and 121, 122, 123, or HPS 124 or equivalent; or consent of instructor.

BIOL 203 Human Disease and Society 3(3,0)
Focuses on the basic biology underlying human disease, how disease is understood, and current methods of prevention and treatment of disease. The economics and politics of social and ethical issues surrounding biotechnology-related research and development. Not open to Genetics majors. Coreq: BIOL 120 and 121, 122, 123, or HPS 124 or consent of instructor.

BIOL 210 Evolution and Creationism 3(3,0)
Critical review of the scientific and technological basis for evolutionary theory compared to creationist explanations for the origin and diversity of life. Includes a historical survey of the impact that the evolution/creation debate has had on law, politics, education, and other important aspects of society. Preq: BIOL 104/106; 111; 121, 122, 123, or 124; or consent of instructor.

BIOL 212 Fundamentals of Biosystems Engineering 2(1,3)
Overview of topics and engineering applications to biosystems engineering, including mass, energy, and momentum transfer in biological systems. Mathematical similarities and differences in these mechanisms are stressed, and mathematical descriptions of physiological and engineering systems are formulated. Preq: CH E 330, MTHSC 208.

BIOMOLECULAR ENGINEERING

BMOLE 403, 603 Biortransport Phenomena 3(3,0)
Analysis of single and multidimensional steady-state and transient problems in momentum, mass, and energy transfer in biological systems. Mathematical similarities and differences in these mechanisms are stressed, and mathematical descriptions of physiological and engineering systems are formulated. Preq: CH E 330, MTHSC 208.

BMOLE 423, 623 Bioseparations 3(3,0)
Study of principal methods of separation and purification of bioproducts, such as proteins, amino acids, and pharmaceuticals. Topics include analytical bioseparations, membrane separations, sedimentation, cell disruption, extraction, adsorption, chromatography, precipitation, crystallization, and drying. Preq: BMOLE 301, 305, or 423; CH E 330; or consent of instructor.

BMOLE 425, 625 Biomolecular Engineering 3(3,0)
Introduction to basic principles of biomolecular engineering: the purposeful manipulation of biological molecules and processes applied to problems and issues in the life sciences, biotechnology, and medicine. Topics include carbohydrates, proteins, nucleic acids, and lipids with emphasis on their structure-property-function relations; molecular recognition; biochemical pathway engineering; and cell growth. Preq: CH E 230 and 319 or consent of instructor.

BMOLE 426, 626 Biosensors and Bioelectronic Devices 3(3,0)
Development of methodologies used to design, fabricate, and apply biosensors and bioelectronic devices for the environmental, medical, and chemical industries. Application of the fundamentals of measurement science to biological, electrochemical, mass, and thermal means of signal transduction. Use of the fundamentals of surface science to interpret bio-immobilization and biomolecule-surface interactions. Preq: CH E 330, and BMOLE 301 or 305, or consent of instructor.

BIOSYSTEMS ENGINEERING

Professors: W. H. Allen, Chair; D. E. Brune, J. P. Chastain, Y. J. Han, J. C. Hayes; Associate Professors: C. M. Drapcho, T. O. Owino, T. H. Walker; Assistant Professor: C. V. Privette

B E 199 Creative Inquiry—Biosystems Engineering I 1-3(1-3,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be taken twice for a maximum of six credits. To be taken Pass/Fail only.

B E 210 Introduction to Biosystems Engineering 2(1,3)
Overview of topics and engineering applications that comprise the biosystems engineering profession. Significant emphasis is also given to development of oral and written communication skills needed by the engineering professional, introduction to design methodology, and application of engineering fundamentals to biological systems. Preq: ENGR 130, MTHSC 106.

B E 212 Fundamentals of Biosystems Engineering 2(1,3)
Introduction to fundamental concepts in biosystems engineering, including mass, energy, and momentum balances; mass, heat, and momentum transfer; biological response to environmental variables, biological materials, biological kinetics, and techniques of measurement and analysis of engineering and biological data. Laboratory includes hands-on exercises, problem solving and computer sessions, and oral presentations. Preq: B E 210.
B E 222 Geomeasurements 2(1,3) Fundamentals of land measurement and traverse calculations. Leveling, earthwork, area, and topographic measurements using levels, total stations, and GPS. Application of mapping via GIS. Preq: MTHSC 106.

B E 299 Creative Inquiry—Biosystems Engineering II 1-3(1-3) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be taken twice for a maximum of six credits. To be taken Pass/Fail only.

B E 300 Biosystems Engineering Honors Seminar 0(0,1) Introduces undergraduate students to current faculty research. Project ideas are then developed to prepare students in choosing a research topic for the senior honors thesis. Students are required to attend senior honors thesis presentations. To be taken Pass/Fail only. Preq: Junior standing in departmental honors program.

B E 301 Biosystems Engineering Honors Thesis Research 3(0,6) Honors thesis project proposal, initial research, report, and presentation of biosystems engineering project for completion of junior requirements of the Biosystems Engineering Honors program. Preq: B E 300.

B E 312 Biological Kinetics and Reactor Modeling 3(2,3) Fundamentals of microbial and biochemical kinetics used in analysis and design of biological systems. Topics include mathematical and computer modeling of biological kinetics and systems, estimating model coefficients, and development of microbial kinetic models as basis for batch and continuous reactor design. Preq: B E 212, MTHSC 208.

B E 314 Biosystems Engineering Mechanical Design 3(3,0) Study of basic mechanical design of biosystems. Includes an introduction to biomechanics and biomaterial properties. Studies applications of machine components and their selection related to specific types of biosystems. Team design project is required. Preq: C E 206 or M E 602.

B E 322 Small Watershed Hydrology and Sedimentology 3(3,0) Fundamental relationships governing rainfall disposition are used as bases for defining the hydrology of watersheds. Emphasizes application of modeling techniques appropriate for runoff and sediment control. Preq: PHYS 122. Coreq: C E 321 or CSENV 202.

B E 370 Practicum 1-3 Preplanned internship with an approved employer involved with biosystems engineering endeavors. A minimum 130 hours of supervised responsibility is required per credit hour. Evaluation is based on activity journal, written/oral report, and an evaluation from the supervisor. May be repeated for a maximum of three credits. To be taken Pass/Fail only. Preq: Junior standing and departmental consent.

B E 399 Creative Inquiry—Biosystems Engineering III 1-3(1-3) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be taken twice for a maximum of six credits. To be taken Pass/Fail only.

B E 400 Biosystems Engineering Honors Thesis 3(0,6) Individual research projects are conducted under the supervision and guidance of a faculty member. Senior honors thesis is required. Preq: B E 300, 301.

B E 408, 408B Land Treatment of Wastewater and Sludges 3(3,0) See CSENV 408.

B E 414, 614 Biosystems Engineering Unit Operations 3(2,3) Applies the basic principles of statics, dynamics, and thermodynamics to design of mechanical and electrical systems supporting biological operations and processes. Preq: B E 314, M E 310.

B E 415, 615 Instrumentation and Control for Biosystems Engineers 4(3,3) Overview of modern instrumentation techniques and digital electronic components and subsystems to integrate them into digital data acquisition and control systems for biosystems. Laboratory use of equipment is emphasized. Topics include characteristics of instruments, signal conditioning, transducer theory and applications, programmable logic controllers, and digital data acquisition and control. Preq: B E 315.

B E 417, 617 Applied Instrumentation and Control for Biosystems 3(2,3) Hardware and software implementation of digital data acquisition and control systems for application to agriculture, aquaculture, biotechnology, and other biosystems. Topics include digital electronic circuits and components, microcomputer architecture, interfacing, and programming. Preq: B E 415 or consent of instructor.

B E 422, 622 Hydrologic Modeling of Small Watersheds 3(3,0) Design of structures and development of best management practices for runoff, flood, and sediment control from rural and urban areas, including natural and disturbed watersheds. Topics include modeling of prismatic and non-prismatic channels, culverts, and detention/retention ponds. Preq: B E 322 or consent of instructor.

B E (CH E) 428, 628 Biochemical Engineering 3(3,0) Use of microorganisms and enzymes for the production of chemical feedstocks, single-cell protein, antibiotics, and other fermentation products. Topics include kinetics and energetics of microbial metabolism, design and analysis of reactors for microbial growth and enzyme-catalyzed reactions, and considerations of scale-up, mass transfer, and sterilization during reactor design. Preq: B E 312, MICRO 305; Coreq: (for Biosystems Engineering majors) BIOCH 301 or 305; (for Chemical Engineering majors) CH E 330, 450.
BUS H392 International Business Honors Thesis Proposal 1(1,0) Students work with a Clemson advisor and an international advisor to complete a proposal for the senior thesis. Students work and conduct research while participating in an approved study abroad. To be taken Pass/Fail only. Preq: BUS H391.

BUS H399 Creative Inquiry—Business 1-4(1,4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of four credits.

BUS H491 International Business Honors Thesis I 3(3,0) Students work with an advisor to conduct literature review and research on a senior thesis topic and prepare presentations and thesis drafts based on this work. Preq: BUS H392.

BUS H492 International Business Honors Thesis II 3(3,0) Students work with an advisor to complete a senior thesis. They prepare and present a seminar on the topic for presentation to faculty and other International Business Honors students. Preq: BUS H491.

BUS H499 Creative Inquiry—Business 1-4(1,4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of four credits.

BUS H312 Calhoun Scholars Colloquium: Arts and Humanities (Literature) 3(3,0) Intellectually intensive seminar that engages freshman honors students in dialogue about the “idea of the University.” Explores traditions, customs, and value systems of peoples and cultures. Examines concepts and tools that organize scholarly inquiry into world cultures emphasizing non-Western societies. Topics vary. Preq: Membership in Calhoun Honors College.

C H S H1193 Calhoun Scholars Colloquium: Cross-Cultural Awareness 3(3,0) Intellectually intensive seminar that engages freshman honors students in dialogue about the “idea of the University.” Explores traditions, customs, and value systems of peoples and cultures. Examines concepts and tools that organize scholarly inquiry into world cultures emphasizing non-Western societies. Topics vary. Preq: Membership in Calhoun Honors College.

C H S H1194 Calhoun Scholars Colloquium: Science and Technology in Society 3(3,0) Intellectually intensive seminar that engages honors students in dialogue about the “idea of the University.” Explores interactions of the sciences and technology with society. Examines how science and technology are social enterprises and the impact of science and technology on attitudes, behaviors, and choices. Topics vary. Preq: Membership in Calhoun Honors College.

C H S H1199 Calhoun Scholars Colloquium 3(3,0) Intellectually intensive seminar that engages honors students in dialogue about the “idea of the University.” Welcomes students to a community of scholars by providing perspectives on key concepts and tools that organize intellectual inquiry across disciplines. Topics vary. Preq: Membership in Calhoun Honors College.

C H S H201 Structures and Society 3(3,0) Interdisciplinary honors seminar that examines selected structuredRegards as monuments to artistic creativity and technological genius and the ways that structures affect and are affected by the societsthat produce them. Preq: Membership in Calhoun Honors College.

C H S H202 Science, Culture, and Human Values 3(3,0) Interdisciplinary honors seminar that unifies natural scientific, social scientific, and humanistic disciplines into a holistic view of the modern world and its future. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Membership in Calhoun Honors College.

C H S H203 Society, Art, and Humanities 3(3,0) Combines readings and methodologies from the social sciences, arts, and humanities to study the interrelationships among the disciplines and their societal effects. Subjects vary. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Membership in Calhoun Honors College.

C H S H204 Honors Study/Travel 1(0,3) Study/travel experience related to a three-credit Calhoun Honors Seminar. May be repeated for a maximum of three credits, but only if different topics are covered. Preq: Membership in Calhoun Honors College.

C H S H205 Methods of Interpretation 1(1,0) Seminar to teach students how to interpret documents, works of art, structures, and scholarly materials related to a three-credit Calhoun Honors Seminar. May be repeated for a maximum of three credits, but only if different topics are covered. Preq: Membership in Calhoun Honors College.
C H S H 206 Controversies in Science and Technology 3(3,0) Interdisciplinary honors seminar that examines social issues related to science and technology, using perspectives from science, the social sciences, and humanities. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Membership in Calhoun Honors College.

C H S H 207 Reasoning, Critical Thinking, and Problem Solving 3(3,0) Interdisciplinary honors seminar that teaches a particular set of tools for thinking and analysis, showing how these tools can be applied to different kinds of problems in different disciplines. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Membership in Calhoun Honors College.

C H S H 209 Border Crossings: Experiences in World Cultures 1-3(1-3,0) Readings and studies that heighten understanding of world cultures and societies. Taken in conjunction with international educational experiences approved by Calhoun Honors College. May be repeated for a maximum of six credits, with a maximum of three credit hours per study abroad experience. Prereq: Membership in Calhoun Honors College.

C H S H 210 Exploring the Arts 3(2,3) Interdisciplinary exploration of the arts through seminar discussions and attendance at performing and visual arts events on campus. Exploration of arts and aesthetics leading to performance previews, reviews, and experiences of Brooks Center and Lee Gallery events. May be repeated for a maximum of nine credits. Prereq: Membership in Calhoun Honors College.

C H S H 300 Honors Contract 0 Advanced study and research taken in conjunction with any 300–400-level course. Contract requires prior approval by instructor and Honors Director. To be taken Pass/Fail only. May be repeated once, but only if in conjunction with different course. Prereq: Membership in Calhoun Honors College.

CAREER AND TECHNOLOGY EDUCATION

Professors: W. L. Havice, W. D. Paige; Associate Professor: C. E. Poston; Lecturer: H. L. Harrison

C T E 110 Introduction to Career and Technology Education 3(2,3) Examines the philosophy of technology education in the public school system and the philosophy and organization of training and development. Students are given an orientation to the major in Career and Technology Education and an overview of the principles of technology.

C T E 115 Contemporary Technological Problems 3(3,0) Provides students with an understanding of the problems and contributions of technology. Examples are taken from historical accounts and from analyses of contemporary technological intervention both in industrialized and nonindustrialized countries.

C T E 160 Training Programs in Industry 3(3,0) Introduction and first-hand experience in industrial training programs. Emphasis is on observing and participating in actual training situations as well as communications and media usage in industry. Prereq: CTE 110.

C T E 180 Introduction to Technical Drawing and Computer-Aided Drafting 3(1,6) Introductory drafting course utilizing traditional drafting techniques and computer software to explore technical drawing and orthographic projection through construction of multiview and isometric projections, sectional and auxiliary views, dimensioned working drawings, developments, and intersections. Frehand sketching is a means of problem solving and analysis.

C T E 181 Technical Design 3(1,6) Provides students with the basic procedures involved in the design of a new technology product, including needs identification; functional analysis; functional allocation; resource identification; optimization; and schedule, cost, and performance management. Prereq: CTE 110, 180 or equivalent; or consent of instructor.

C T E 220 Manufacturing Technology I: Systems 3(2,3) Introduction to management, personnel, and production systems studies through the creation of a corporation. Includes product identification, product research and design, selection of processes, plant design, production systems, and system enhancement. Prereq: CTE 110 and 180 or consent of instructor.

C T E 221 Exploring Technology 3(3,0) Covers a wide range of technological concepts, along with familiar examples of how technology impacts our lives as individuals, a society, and a global community.

C T E 230 Construction Technology I: Materials 3(2,3) Introduces the commonly used building materials and methods of combining them in present day construction. Prereq: CTE 110 or consent of instructor.

C T E 240 Power Technology I: Production 3(2,3) Studies power in terms of energy sources and the generation of power. Emphasizes the development of insights and understandings of the scientific and operational principles involved in the production and utilization of power. Prereq: CTE 110 or consent of instructor.

C T E 250 Electricity 3(2,3) Theory and application of DC and AC fundamentals, including instrumentation, power sources, circuit analysis, motors, construction wiring, and electronic principles and components.

C T E 280 Communications Technology I: Processes and Materials 3(2,3) Topics include graphic communications, photography, computer application and use as a visual communication medium, and audio/video production and application.

C T E 300 Designing Creative Instruction 3(2,2) Provides preservice teachers with opportunities to develop skills in technological literacy, design, inquiry-based instruction, and problem solving using a variety of media, with emphasis on their applications in the elementary curriculum. Prereq: Junior standing in Early Childhood or Elementary Education or consent of instructor.

C T E (ED F) 315 Technology Skills for Learning 1(0,2) See ED F 315.

C T E 360 Safety 3(3,0) Study of the relationship of training and safety personnel to the kinds of tasks they are asked to perform. Emphasizes safety knowledge development and techniques which may be used in safety training.

C T E 370 Motivation and Discipline in Career and Technology Education 3(3,0) Provides classroom teachers and prospective teachers with knowledge and skills in techniques of student discipline and motivation with application to the technology education settings.

C T E 371 Management of Career and Technology Education Laboratories 3(2,2) Management and operation of unit and multiple-activity laboratories, including laboratory design, selection and procurement of tools and equipment, budgeting management, and coordination of activities in laboratory courses.

C T E 390 Cooperative Experience I 6(0,18) Full-time work experience in industry. Students are requested to register with the instructor one semester prior to the summer in which they plan to enroll. Offered summer session only.

C T E 410, 610 Selected Topics 1-3(1-3,0) Subject areas organized according to program needs. Content is planned cooperatively by the University and the school system or agency requesting the course. May be repeated for a maximum of 18 credits, but only if different topics are covered. Prereq: Consent of instructor.

C T E 415, 615 History and Philosophy of Career and Technology Education 3(3,0) Study of career and technology education programs with the intent of developing a sound individual philosophy. General topics covered are history, local, state, and federal legislation; types of career and technology programs; professional organizations and career guidance.

C T E 420, 620 Manufacturing Technology II: Computer-Integrated Manufacturing 3(2,3) Study of computer-integrated manufacturing and its related concepts, including robotics, computer numeric control, electronic pneumatic and sensor systems, programmable logic controllers, and ancillary devices. Prereq: CTE 220 or consent of instructor.

C T E 430, 630 Construction Technology II: Practices and Systems 3(2,3) Study of industrial practices and systems affecting man, materials, and equipment associated with construction industries. Activities are directed toward developing a working knowledge of construction technology and a framework for incorporating this instruction into programs in the public and private sectors. Prereq: CTE 230.

C T E 440, 640 Power Technology II: Transmission and Control Systems 3(2,3) Continuation of CTE 240. Instruction in transmitting and controlling power for utilization in such areas as manufacturing, communications, construction, and transportation. Introduces concepts of automation and robotics to enable the classroom teachers and industry personnel to gain necessary insights into this important area of technology. Prereq: CTE 240.

C T E 450 Electronics for Educators 3(1,6) Principles of electronics as applied in communications and automatic controls involving transistors, integrated circuits, and other electronic devices. Prereq: CTE 250 or equivalent.
Courses of Instruction

CTE 460, 660 Developing Training Programs for Industry 3(3,0) Identification, selection, and organization of subject matter for industrial training programs. Emphasizes analysis techniques, session and demonstration planning, written instructional materials development, trainee evaluation, and planning instructional schedules. Preq: Senior standing in Career and Technology Education or consent of instructor.

CTE 461 Workplace Safety 3(3,0) Consideration of safety-related problems in the workplace. Emphasizes OSHA regulations and procedures. Preq: CTE 360.

CTE 465, 665 Conducting and Evaluating Training Programs 3(3,0) Basic concepts of supervision, administration, and management of training programs. Emphasis is on determining training requirements, planning, directing, and evaluating training programs. Preq: CTE 160, 460 or consent of instructor.

CTE 468, H468, 668 Public Relations 3(3,0) Emphasizes techniques and methods of effective public and industrial relations which contribute to understanding and cooperation of labor, business, professional, educational, and industrial groups.

CTE 470, 670 Course Organization and Evaluation 3(3,0) Problems, techniques, and procedures in the preparation, selection, and organization of subject matter for instructional purposes. Methods, techniques, and preparation of materials used in the evaluation of student achievement in industrial education subjects.

CTE 471, 671 Teaching Career and Technology Education 3(3,0) Effective methods for teaching and training in career and technology education. Emphasis is given to class organization, preparation of lesson outlines, and audio-visual aids.

CTE 472 Advanced Instructional Methods 3(3,0) Familiarizes students with the various equipment, materials, and techniques associated with the delivery of instruction. Students design, produce, and present materials to meet specific educational objectives. Preq: CTE 471 or one year of teaching experience.

CTE 473, 673 Assessment in Career and Technology Education 3(3,0) Study of competency testing in career and technology education which includes educational objectives and measurement; construction and use of oral, objective, short answer, matching, essay, and performance tests; and treatment of test data for grade assignments and statistical analysis.

CTE 477 Directed Teaching 12(0,36) Supervised observation and teaching in cooperation with selected public schools in which opportunities are provided for securing experience in teaching industrial subjects. Preq: CTE 371, 471, 2.0 cumulative grade-point ratio.

CTE 478 Internship in Career and Technology Education I 6(0,18) Supervised observation and teaching in cooperation with selected area career centers, high schools, and technical colleges to provide experience in teaching specified subjects. Preq: CTE 371, consent of instructor.

CTE 479 Internship in Career and Technology Education II 6(0,18) Continuation of CTE 478. Preq: CTE 478, consent of instructor.

CME 241 Metrics Laboratory 10(0,3) Provides basic knowledge of statistical techniques and testing procedures used to evaluate materials. Includes sampling procedures, calculation of averages, confidence intervals, Weibull statistics, precision and accuracy to enable quality decision making. Coreq: CME 210.

CME H300 Honors Seminar 1(1,0) Acquaints students enrolled in the Departmental Honors Program with current research issues in the profession. This assists students in preparing a research proposal for the Senior Thesis. To be taken Pass/Fail only. Preq: Junior standing, admission to departmental honors program.

CME 319 Materials Processing I 3(3,0) Introduction into the principles underlying the processing/manufacturing of ceramic, polymeric, and metallic materials. Coreq: CME 210 or consent of instructor.

CME 326 Thermodynamics of Materials 3(3,0) Introduction to physical laws that govern the equilibrium products of chemical and thermal reactions. Covers the three laws of thermodynamics, phase equilibria, energy requirements for reactions, material corrosion, and environmental stability. Preq: CME 210, CH 102, MTHSC 150, PHYS 221.

CME 327 Transport Phenomena 3(3,0) Kinetic aspects of mass, heat, and fluid transport as they relate to the processing and performance of materials. Coreq: CME 326, MTHSC 208.

CME 328 Phase Diagrams for Materials Processing and Applications 3(3,0) Teaches students to use single component, binary, and ternary phase diagrams to analyze material processing routes and utilization. Considers reaction pathways by which material microstructure evolves and the relationship of reaction pathway to equilibrium phase diagrams. Also considers material interactions/ degradation during use. Preq: CME 326.

CME 342 Structure/Property Laboratory 2(0,6) Provides a basic understanding of how microstructure interrelationships and processes affect the physical properties of materials and how environmental effects modify structure and mechanical behavior of materials. Preq: CME 241.

CME 361 Processing of Metals and Their Composites 3(3,0) Examines the control of microstructure-property relationships in metallic materials and their composites through development and selection of innovative manufacturing methods. Coreq: CME 327.

CME H395 Honors Research I 3(0,9) Individual research under the direction of a Ceramic and Materials Engineering faculty member. Coreq: CME 327, 328.

CME E 402, 602 Solid State Materials 3(3,0) Discussion of the properties of solids as related to structure and bonding with emphasis on electronic materials. Band structure theory, electronic, and optical properties are treated. Preq: CME 326, MTHSC 208, PHYS 221.
CHE E 407 Senior Capstone Design 3(1.6) Work with industrial partners who have materials-related processes or product problems. Emphasizes interdisciplinary team approach and global perspective of products and problems. Incorporates critical thinking, group effectiveness, and problem solving with materials and processes. Collaborative efforts between industry and student academic teams are employed. Prereq: CME 441, E 384.

CME 413 Noncrystalline Materials 3(3,0) Study of the fundamentals of the noncrystalline state. Includes cooling kinetics and effects on formation as well as physical properties of noncrystalline substances in metallic, polymeric, and ceramic systems. Prereq: CME 326; Coreq: CME 402.

CME 416, 616 Electrical Properties of Materials 3(3,0) Covers a range of topics dealing with electrical and magnetic materials including metal and polymer conductors, insulators, ceramic and polymer materials for dielectric applications, and ferroelectric, piezoelectric, pyroelectric, and electrooptic materials. Metal and ceramic magnetic materials are also discussed.

CME 422, 622 Mechanical Behavior of Materials 3(3,0) Covers the microstructural basis of deformation and fracture in ceramic, metallic, and polymeric systems. Prereq: E M 201, MTHSC 208 or consent of instructor.

CME 424, 624 Optical Materials and Their Applications 3(3,0) Introduces the interaction of materials with light. Specific topics include fundamental optical properties, materials synthesis, optical fiber and planar waveguides, and the componentry and systems-level aspects of optical communication systems. Prereq: CME 402, 413.

CME 432 Manufacturing Processes and Systems 3(3,0) Plant layout and design for manufacturing of ceramic products. Emphasizes process control and verification of processing results. Includes adaptation of computers in process simulation and optimization and the use of programmable logic controllers and robotics in processing. Prereq: CME 326.

CME 435 Combustion Systems and Environmental Emissions 3(3,0) Study of the application of burners, burner controls, firing atmospheres, hydrocarbon fuels, and other energy sources to industrial kilns, furnaces, and firing operations. Topics include energy resources, fuel chemistry, combustion analysis, ratio control systems, flow and pressure measurement and control, kiln atmosphere controls, industrial burners, and flames. Prereq: CME 326.

CME 441 Manufacturing Laboratory 10(0,3) Provides students with the understanding of process optimization. Emphasizes the use of complex experimental design schemes to elucidate the interrelationships between processing, microstructural development, and resulting properties. Prereq: CME 342.

CME 445 Practice of Materials Engineering 1(1,0) Students working in groups present and discuss practical, ethical, safety, business, and selected technical topics. Invited speakers discuss various aspects of the engineering world. To be taken Pass/Fail only. Prereq: CME 432.

CME (BIO E) 480, 680 Research Principles and Concepts 1(1,0) See BIO E 480.

CHE E 490, H490, 690 Special Topics in Ceramic Engineering 1-3(1-3,0) Study of topics not ordinarily covered in other courses. Taught as the need arises. Typical topics could include current research in a specific area or technological advances. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Consent of instructor.

CHE E H495 Honors Research II 3(0,9) Individual research under the direction of a Ceramic and Materials Engineering faculty member. Prereq: CME H395.

CHE E H497 Honors Thesis 1(1,0) Preparation of honors thesis based on research conducted in CME H395 and H495. Prereq: CME E495.

CHEMICAL ENGINEERING

Professors: C. H. Gooding, J. G. Goodwin, Jr., Chair; A. Guiseppi-Elie, S. S. Melheimser, A. A. Ogade, M. C. Thies; Associate Professors: D. A. Bruce, G. M. Harrison, D. E. Hirt, S. M. Husson; Assistant Professor: C. L. Kitchens.

CHE E 130 Chemical Engineering Tools 3(2,2) Tools and methods for analyzing engineering problems with applications in chemical and biochemical processes, including development of process flow diagrams, numerical methods, graphing, and applied statistics. Problem-solving and computer skills are developed in the lecture and laboratory activities. Prereq: CHE 102. Coreq: MTHSC 108, PHYS 12.

CHE E 199 Creative Inquiry—Chemical and Biochemical Engineering 1-4(1-4,0) In consultation with an individual the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CHE E 211 Introduction to Chemical Engineering 3(3,0) 3(3,0) Introduction to fundamental concepts of chemical engineering, including mass and energy balances, PVT relationships for gases and vapors, and elementary phase equilibria; problem-solving and computer skills are developed in lab. Prereq: CH 102, MTHSC 108, PHYS 122; and CH E 130 or ENGR 130.

CHE E 220 Chemical Engineering Thermodynamics 1 3(3,0) Topics include first and second laws of thermodynamics, ideal gases, PVT properties and thermodynamic properties of real fluids. Prereq: CHE 211, MTHSC 206.

CHE E 299 Creative Inquiry—Chemical and Biochemical Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CHE E H300 Honors Seminar 1(1,0) Acquaints students enrolled in the Departmental Honors Program with current research issues in the profession. This assists the student in preparing a research proposal for the Senior Thesis. To be taken Pass/Fail only. Prereq: Admission to departmental honors program, Junior standing.

CHE E 307 Unit Operations Laboratory I 1(2,3) Laboratory work in the unit operations of fluid flow, heat transfer, and evaporation. Stress is on the relationship between theory and experimental results and the statistical interpretation of those results and on report preparation and presentation. Prereq: CHE E 220, 230.

CHE E 311 Fluid Flow 3(3,0) Fundamentals of fluid flow and the application of theory to chemical engineering unit operations, such as pumps, compressors, and fluidization. Prereq: CHE E 211, MTHSC 206.

CHE E 312 Heat and Mass Transfer 3(3,0) Study of the basics of heat transmission and mass transport. Special emphasis is placed on theory and its application to design. Prereq: CHE E 220, 311.

CHE E 321 Chemical Engineering Thermodynamics II 3(3,0) Continuation of CHE E 220. Topics include thermodynamics of power cycles and refrigeration/liquefaction, thermodynamic properties of homogeneous mixtures, phase equilibria, and chemical reaction equilibria. Prereq: CHE E 220, MTHSC 208.

CHE E 330 Mass Transfer and Separation Processes 4(3,2) Study of mass transport fundamentals and application of these fundamentals to separation technologies, with emphasis on gas absorption, stripping, distillation, and liquid-liquid extraction. Prereq: CHE E 230. Coreq: CHE E 321.

CHE E 344 Chemical Engineering Junior Seminar 1(1,0) Preparation of junior chemical engineering students for entry into the profession. Timely information on job interviewing skills, career placement and guidance, professional registration, professional behavior and ethics, graduate school, and management of personal finances. Outside speakers are used frequently. To be taken Pass/Fail only. Prereq: CHE E 230.

CHE E 353 Process Dynamics and Control 3(3,0) Mathematical analysis of the dynamic response of process systems. Basic automatic control theory and design of control systems for process applications. Prereq: MTHSC 208, CHE E 311 or 230. Coreq: CHE E 330 or 413.

CHE E H395 Honors Research I 3(0,9) Individual research under the direction of a Chemical Engineering faculty member. Prereq: CHE E H300 or consent of department honors coordinator.

CHE E 399 Creative Inquiry—Chemical and Biochemical Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.
CH E 401, 601 Transport Phenomena 3(3,0)
Mathematical analysis of single and multidimensional steady-state and transient problems in momentum, energy, and mass transfer. Both the similarities and differences in these mechanisms are stressed. Prq: CH E 330, MTHSC 208.

CH E 407 Unit Operations Laboratory II 3(1,6)
Continuation of CH E 307 with experiments primarily on the diffusional operations. Additional lecture material on report writing and general techniques for experimental measurements and analysis of data, including statistical design of experiments. Prq: CH E 307, 330.

CH E 412, 612 Polymer Engineering 3(3,0)
Design-oriented course in synthetic polymers. Topics include reactor design used in polymer production, effect of variation among polymerization processes on reactor design, epoxy curing reactions, polymer solubility, influence of polymerization and processing conditions on polymer crystallinity. Prq: CH E 224 and 332 or consent of instructor.

CH E 413 Separation Processes 3(3,0)

CH E 418 Biochemical Engineering 3(3,0)
See B E 428.

CH E 431 Chemical Process Design I 3(3,0)
Steps in creating a chemical process design from original concept to successful completion and operation. Topics include process layout, equipment selection and sizing, safety and environmental evaluation, engineering economics, simulation, evaluation of alternatives, and optimization. Prq: CH E 307, 321, 330. Coreq: CH E 450.

CH E 432 Process Development, Design, and Optimization of Chemical Engineering Systems II 5(1,12)
Continuation of CH E 431. Principles of process development, design, and optimization are applied in a comprehensive problem analysis from a general statement of the problem to detailed design and economic evaluations. Prq: CH E 321, 353, 407, 413, and 450 or consent of department chair.

CH E 433 Process Design II 3(1,6)
Continuation of CH E 431. Principles of process development, design, and optimization are applied in a comprehensive problem analysis from a general statement of the problem to detailed design and economic evaluations. Prq: CH E 330, 407, 431, 450.

CH E 443 Chemical Engineering Senior Seminar I 1(1,0)
Preparation of senior chemical engineering students for entry into the profession. Timely information on job interviewing skills, career placement and guidance, professional registration, professional behavior and ethics, and management of personal finances. Outside speakers are used frequently. To be taken Pass/Fail only. Prq: CH E 330, Senior standing in Chemical Engineering. Coreq: CH E 431.

CH E 444 Chemical Engineering Senior Seminar II 1(1,0)
Working in groups, students present and discuss topics related to professional practice, ethics, business, industrial safety, the environment, and selected technical subjects of interest to society. To be taken Pass/Fail only. Prq: CH E 344 or 443. Coreq: CH E 432.

CH E 445 Selected Topics in Chemical Engineering 3(3,0)
Topics not covered in other courses, emphasizing current literature, research, and practice of chemical engineering. Topics vary from year to year. May be repeated, but only if different topics are covered. Prq: Consent of instructor.

CH E 450, 650 Chemical Reaction Engineering 3(3,0)
Review of kinetics of chemical reactions and an introduction to the analysis and design of chemical reactors. Topics include homogeneous and heterogeneous reactions, batch and continuous flow reaction systems, catalysis, and design of industrial reactors. Prq: CH E 330, 321, CH 332.

CH E 491, H491 Special Projects in Chemical Engineering I 3(1-3,0)
Topics requested by students or offered by faculty as the need arises. Topics may include review of current research in an area, technological advances, and national engineering goals. May be repeated for a maximum of six credits, but only if different topics are covered.

CH E 495 Honors Research II 3(0,9)
Individual research under the direction of a chemical engineering faculty member. Prq: CH E H395.

CH E 497 Honors Thesis I 1(1,0)
Preparation of honors thesis based on research conducted in CH E H395 and H495. Prq: CH E H495.

CH E 499 Creative Inquiry—Chemical and Bio-molecular Engineering 1-4(1-4,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CHEMISTRY

CH1 101, H101 General Chemistry 4(3,3)
Introduction to the elementary concepts of chemistry through classroom and laboratory experience. Emphasizes chemical reactions and the use of symbolic representation, the mole concept and its applications and molecular structure. Credit toward a degree will be given for only one of CH 101 or 201. Prq or Coreq: CMPT score of 3 or higher; or MTHSC 101, 102, 103, or 105.

CH1 102, H102 General Chemistry 4(3,3)
Continuation of CH 101, treating solutions, rates of reaction, chemical equilibrium, electrochemistry, chemistry of selected elements, and an introduction to organic chemistry. Credit toward a degree will be given for only one of CH 102 or 106. Prq: CH 101 with a C or better.

CH 105 Chemistry in Context I 4(3,3)
The chemistry of societal issues including air quality, global warming, acid rain, and alternative energy sources is discussed in the context of their impact on society. May not be taken as a prerequisite for organic chemistry. Credit toward a degree will be given for only one of CH 101 or 105.

CH 106 Chemistry in Context II 4(3,3)
Continuation of CH 105. Topics include the chemistry of nuclear energy, new energy sources, nutrition, medicines, new materials, and genetic engineering. May not be taken as a prerequisite for organic chemistry. Credit toward a degree will be given for only one of CH 102 or 106. Prq: CH 101 or 105.

CH 114 Chemistry Orientation 1(1,0) Lectures, discussions, and demonstrations devoted to health and safety in chemistry laboratories; use of the chemical literature; and career planning. Prq: Concurrent enrollment in CH 101.

CH 152 Chemistry Communication I 2(2,0) Methods for scientific communication including oral, written, and electronic formats. Service-learning projects engage participants with community needs pertaining to chemistry issues.

CH 159 Creative Inquiry—Chemistry I 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CH 201 Survey of Organic Chemistry 4(3,3)
Introduction to organic chemistry emphasizing nomenclature, classes of organic compounds, and chemistry of functional groups. For students needing a one-semester course in organic chemistry. Credit toward a degree will be given for only one of CH 201 or 223. Prq: CH 102 or consent of instructor.

CH 205 Introduction to Inorganic Chemistry 3(3,0) One semester treatment which emphasizes the properties and reactions of the more common chemical elements. Prq: CH 102.

CH 206 Inorganic Chemistry Laboratory 1(0,3) Introduction to laboratory synthesis and characterization of inorganic compounds. Laboratory sessions consist of a set of six landmark inorganic experiments for which the original authors have been awarded Nobel prizes. Coreq: CH 102, 205.

CH 223 Organic Chemistry 3(3,0) Introductory course in the principles of organic chemistry and the derivation of these principles from a study of the properties, preparations, and inter-relationships of the important classes of organic compounds. Credit toward a degree will be given for only one of CH 201 or 223. Prq: CH 102 or consent of instructor.

CH 224 Organic Chemistry 3(3,0) Continuation of CH 223. Prq: CH 223.

CH 227 Organic Chemistry Laboratory 1(0,3) Synthesis and properties of typical examples of the classes of organic compounds. Credit toward a degree will be given for only one of CH 227 or 229. Prq: CH 223 or concurrent enrollment.
Courses of Instruction

CH 228 Organic Chemistry Laboratory 1(0,3)
Continuation of CH 227. Preq: CH 224 (or concurrent enrollment) and 227.

CH 229 Organic Chemistry Laboratory 1(0,3)
One-semester laboratory for Chemical Engineering students. Credit toward a degree will be given for only one of CH 227 or 229. Preq: CH 223.

CH 299 Creative Inquiry—Chemistry II 1-4(1-4,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CH 313 Quantitative Analysis 3(3,0)
Fundamental principles of volumetric, gravimetric, and certain elementary instrumental chemical analyses. Preq: Concurrent enrollment for credit in CH 315 or 317.

CH 315 Quantitative Analysis Laboratory 2(0,6)
Laboratory techniques of volumetric, gravimetric, and elementary instrumental chemical analyses. Credit toward a degree will be given for only one of CH 315 or 317. Coreq: Concurrent enrollment for credit in CH 313.

CH 330 Introduction to Physical Chemistry 3(3,0)
One-semester treatment of physical chemistry emphasizing topics that are especially useful in the life sciences, agriculture, and medicine: chemical thermodynamics, equilibrium, solutions, kinetics, electrochemistry, macromolecules, and surface phenomena. Credit toward a degree will be given for only one of CH 330 or 331. Preq: MTHSC 206, PHYS 221.

CH 332, H332 Physical Chemistry 3(3,0)
Continuation of CH 331, including chemical kinetics, liquid and solid state, phase equilibria, solutions, electrochemistry and surfaces. Preq: CH 331 or consent of instructor.

CH 339 Physical Chemistry Laboratory 1(0,3)
Experiments are selected to be of maximum value to Chemistry and Chemical Engineering majors. Coreq: CH 331 or CH E 220.

CH 340 Physical Chemistry Laboratory 1(0,3)
Continuation of CH 339. Preq: Concurrent enrollment in CH 332.

CH 399 Creative Inquiry—Chemistry III 1-4(1-4,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CH 400 Selected Topics in Chemistry 1-3(1-3,0)
Comprehensive study of topics of current interest in chemistry. May be repeated for a maximum of twelve credits, but only if different topics are covered.

CH 402, H402, 602 Inorganic Chemistry 3(3,0)
Basic principles of inorganic chemistry are discussed with special emphasis on atomic structure, chemical bonding, solid state, coordination chemistry, organometallic chemistry, and acid-base theories. The chemistry of certain selected elements is treated. Preq: CH 331, 332.

CH 403 Advanced Synthetic Techniques 2(0,6)
Introduction to advanced laboratory techniques in synthesis and characterization of inorganic and organic compounds. Laboratory sessions consist of a set of eight experiments in modern fields of chemistry, including superconductivity, buckminsterfullerene, bioinorganic chemistry, medicinal chemistry, asymmetric synthesis, and polymer chemistry. Preq: CH 227, 228, 402, or consent of instructor.

CH 404, H404, 604 Bioinorganic Chemistry 3(3,0)
Covers fundamentals of bioinorganic chemistry with review of necessary inorganic and biochemical concepts. Topics include metal uptake, transport, and storage in biological systems; functions of metals in proteins; metal ion interactions with nucleic acids; physical methods used in bioinorganic chemistry; heavy element antimetabolites, radiopharmaceuticals, and other metallodrugs. Preq: BIOCH 301 or CH 205.

CH 411, 611 Instrumental Analysis 3(3,0)
Principles of operation and application of modern chemical instrumentation in the field of analytical chemistry. Topics include basic electronics, statistics, optical, mass, magnetic resonance, electron and x-ray spectroscopies, radiochemistry, and separation techniques. Preq: CH 331, 332.

CH 412 Instrumental Analysis Laboratory 2(0,5)
Reinforces principles of chemical instrumentation described in CH 411 by practical, hands-on experience. Aspects of sample preparation, standardization, data acquisition and interpretation, and report formulation procedures common in chemical analyses are considered for a range of modern instrumental methods. Coreq: CH 411.

CH 413, H413 Chemistry of Aqueous Systems 3(3,0)
Study of chemical equilibria in aqueous systems, especially natural waters; acids and bases, dissolved CO₂, precipitation and dissolution, oxidation-reduction, adsorption, etc. Preq: CH 102 or 106.

CH 414, 614 Bioanalytical Chemistry 3(3,0)
Survey of selected areas of importance in bioanalytical chemistry. Fundamental principles, advanced topics, and applications of analytical measurements of biomolecules, bioassays, immunoassays, separations, mass spectrometry, method validation, macromolecular crystallography, microscopy, and imaging. Preq: CH 313, 411, or consent of instructor.

CH 421, H421, 621 Advanced Organic Chemistry 3(3,0)
Survey of modern organic chemistry emphasizing synthesis and mechanisms. Preq: CH 224, 332, or equivalent.

CH 425, 625 Medicinal Chemistry 3(3,0)
Survey of the pharmaceutical drug discovery process. Covers discovery of candidate compounds, bioassay methods, and associated regulatory and commercial issues. Case studies are selected from the current literature. Preq: CH 224 or equivalent or consent of instructor.

CH 427, H427, 627 Organic Spectroscopy 3(2,3)
Survey of modern spectroscopic techniques used in the determination of molecular structure. Emphasizes the interpretation of spectra: nuclear magnetic resonance, ultraviolet, infrared, mass spectroscopy, optical rotatory dispersion, and circular dichroism. Preq: Year each of organic chemistry and physical chemistry.

CH 435, H435, 635 Atomic and Molecular Structure 3(3,0)
Introduction to quantum theory and its application to atomic and molecular systems. Topics include harmonic oscillator, hydrogen atom, atomic and molecular orbital methods, vector model of the atom, atomic spectroscopy, and molecular spectroscopy. Preq: CH 332 or consent of instructor.

CH 443, H443 Research Problems 1-6(0,3-18)
Original investigation of an assigned problem in a fundamental branch of chemistry. Work must be carried out under the supervision of a member of the staff. May be repeated for a maximum of six credits. Preq: Senior standing in chemistry or consent of instructor.

CH 444, H444 Research Problems 1-6(0,3-18)
Continuation of CH 443. Original investigation of an assigned problem in a fundamental branch of chemistry. Work must be carried out under the supervision of a member of the staff. May be repeated for a maximum of six credits. Preq: Senior standing in chemistry or consent of instructor.

CH 450 Chemistry Capstone 3(1,6)
Students undertake capstone projects in a team format. Projects necessitate the use of electronic and print resources, demonstrate expertise with a specific instrument or experimental technique, require strong collaboration within a team setting, and produce a peer-reviewed oral and written report. Preq: Senior standing or consent of instructor.

CH 451, 651 Frontiers in Polymer Chemistry 3(3,0)
Survey of selected areas of current research in polymer science with particular emphasis on polymer synthesis. Although a text is required for review and reference, course is primarily literature based and focused on areas of high impact to multidisciplined technology. Preq: CH 223, 224, PFC 415 or consent of instructor.

CH 452 Chemistry Communication II 1(1,0)
Methods for scientific communication including oral, written, and electronic forms. Student presentations focus on current chemical literature topics pertinent to their CH 443/444 undergraduate research or results of that work are appropriate. Preq: CH 152.

CH 471, 671 Teaching Chemistry 3(3,0)
Study of topics in chemistry addressed in the context of constructivist methodologies. Also considers laboratory work and management, laboratory safety, and the use of technology in the chemistry classroom. Preq: 300-level chemistry course or high school teaching experience or consent of instructor.
CH 499 Creative Inquiry—Chemistry IV 1-4(1-4.0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

CHINESE
Associate Professors: Y. An, Y. Zhang; Lecturer: S. Chen

CHIN 101 Elementary Chinese 4(3,1) Introductory course stressing speaking, listening, and writing. Attention is given to the sound system of Chinese to enable students to distinguish the four tones and to develop basic communication skills. Participation in cultural activities is encouraged.

CHIN 102 Elementary Chinese 4(3,1) Continuation of CHIN 101. Preq: CHIN 101 or consent of instructor.

CHIN 201 Intermediate Chinese 3(3,1) Intermediate course with more emphasis on communication skills and structure. Reading and writing practice without phonetic aids; oral practice in and outside the class, paying special attention to idiomatic usage; introduction to cultural perspectives through readings and cultural activities. Preq: CHIN 102 or consent of instructor.

CHIN 202 Intermediate Chinese 3(3,1) Continuation of CHIN 201. Preq: CHIN 201 or consent of instructor.

CHIN 203 Chinese Reading and Composition I 4(3,1) Designed for students who already speak Chinese but cannot read and write it well. Covers grammatical points of first-year Chinese with special attention to reading and composition. Preq: Consent of instructor.

CHIN 204 Chinese Reading and Composition II 4(3,1) Continuation of CHIN 203. Covers all grammatical points of regular second-year Chinese. Through reading and discussion of materials regarding Chinese linguistics, history, literature, and philosophy, students improve their language skills and acquire a basic knowledge of Chinese culture. Preq: CHIN 203 or consent of instructor.

CHIN 297 Creative Inquiry—Chinese 1-4(1-4.0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

CHIN 305 Chinese Conversation and Composition I 3(3.0) Practice in the spoken language emphasizing vocabulary, word-combinations, pronunciation, and comprehension. Learning practical language skills and intercultural communication by studying various topics. Preq: CHIN 305 or consent of department chair.

CHIN 306 Chinese Conversation and Composition II 3(3.0) Continuation of CHIN 305. More practice in the spoken language emphasizing vocabulary, word combinations, pronunciation, and comprehension. Learning practical language skills and intercultural communication by studying various topics. Preq: CHIN 305 or consent of department chair.

CHIN (PHIL) 312 Philosophy in Ancient China 3(3.0) See PHIL 312.

CHIN (PHIL) 313 Philosophy in Modern China 3(3.0) See PHIL 313.

CHIN 316 Chinese for International Trade I 3(3.0) Study of spoken and written Chinese common to the Chinese-speaking business community emphasizing business practices and writing/reading business letters and professional documents. Cross-cultural references are provided for comparative analyses of American and Chinese business behavior. Classes are conducted in Chinese. Preq: CHIN 202, 305 (or concurrent enrollment) or consent of department chair.

CHIN 317 Chinese for Health Professionals I 3(3.0) Study of medical concepts and terminology emphasizing communicative competence in health-related settings in a Chinese-speaking community. Designed for students who plan to work in public health-related professions. Preq: CHIN 202, 305, or consent of instructor.

CHIN 401 Pre-Modern Chinese Literature in Translation 3(3.0) Chinese literature from 8th century B.C.E. to 19th century C.E. including poetry, prose, drama, fiction, and literary criticism. All readings and discussions are in English.

CHIN 411 Studies in the Chinese Language I: Literature 3(3.0) Advanced study in the spoken and written language through readings in contemporary literature emphasizing vocabulary, syntax, and stylistics. All readings and discussions are in Chinese. Preq: CHIN 306 or consent of instructor.

CHIN 412 Studies in the Chinese Language II: Social Issues 3(3.0) In-depth study of terminology and syntax for specific subject areas in contemporary social issues. All readings and discussions are in Chinese. Preq: CHIN 306 or consent of instructor.

CITY AND REGIONAL PLANNING

Professor: M. Lauria; J. B. London, D. J. Nadenicek, Chair; B. C. Nocks; Associate Professors: M. G. Cunningham, J. T. Farris, S. L. Sperri; Visiting Assistant Professor: C. A. Schively; Lecturer: R. W. Bainbridge; Adjunct Professor: G. A. Vander Mey

C R P 401, 601 Introduction to City and Regional Planning 3(3.0) Introduces students from other disciplines to city and regional planning. Spatial and nonspatial areas of the discipline are explored through a wide ranging lecture/seminar program. Preq: Consent of instructor.

C R P 402, 602 Human Settlement 3(3.0) Overview of forces and trends affecting community growth and change—historical, ecological, economic, demographic, design, and development—pertaining to human settlement patterns and their interrelationship in the urbanization process, especially at the national, regional, town-scale, and neighborhood scale. Team-taught from various perspectives. Intended as a foundation core course for Master's in Real Estate Development, City and Regional Planning, and Landscape Architecture. Preq: Consent of instructor.

C R P 403, 603 Seminar on Planning Communication 3(3.0) In-depth analysis of methods to communicate planning and policy decisions effectively. Familiarizes students with the various communication skills needed by planners, policy makers, and other professionals to become successful practitioners. Preq: Consent of instructor.

C R P (C E) 412, 612 Urban Transportation Planning 3(3.0) See C E 412.
C E 255 Geomatics 3(2,3) Spatial data collection methods including surveying, digital photogrammetry and remote sensing, and global positioning systems. Methods and technologies used to manage, manipulate, and analyze spatial and associated attribute data including geographic information systems. Coreq: E G 209.

C E 299 Creative Inquiry—Civil Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of four credits.

C E 301 Structural Analysis 3(3,0) Calculation of design loads for buildings and other structures. Use of classical analysis techniques to determine support reactions, internal member forces, and structural displacements of statically determinate and indeterminate structural systems. Preq: C E 206 or consent of instructor.

C E 311 Transportation Engineering Planning and Design 3(3,0) Covers planning, design and operation of transportation facilities including highways and airports. Includes economic, safety, and environmental considerations. Public transit systems are covered. Preq: C E 257, EX ST 301.

C E 321 Geotechnical Engineering 4(3,3) Mechanical and physical properties of soils and their relation to soil actions. Problems of engineering, such as classification, permeability, shearing strength, and consolidation. Design of embankments and retaining walls with textiles. Preq: C E 206, C ENG 1 or EGR 1.

C E 331 Construction Engineering and Management 3(3,0) Considers construction contracts, technical specifications, cost estimating, project scheduling, quality control, materials management, quality assurance, and quality assurance. Preq: Junior standing.

C E 341 Introduction to Fluid Mechanics 4(3,3) Introduction to fluid mechanics, including hydostatics and fluid flow. Includes principles of mass, momentum, and energy conservation. Other topics include conduit flow, pump systems, and open channel flow. Laboratory experiments familiarize students with laboratory techniques and instrumentation. The Effective Technical Communications Laboratory is used to prepare a presentation for a lab assignment. Preq: C E 208 or E M 202.

C E 342 Applied Hydraulics and Hydrology 3(3,0) Study of hydrologic cycle, including precipitation, evapotranspiration, infiltration, and runoff. Includes hydrograph analysis, gradually varied flow in open channel flow, design of stable channels, flood routing, groundwater hydraulics, flood frequency analysis, and hydrologic design. Preq: C E 341.

C E 351 Civil Engineering Materials 4(3,3) Introduces students to material science and basic properties of construction materials such as aggregate, Portland cement, asphalt cement, concrete, steel, ceramics, wood, and fibers. Experiments in lab and field trips to nearby plants are required. Oral and written communication skills are an integral part of this course. Preq: C E 253 or ENGR 130; Coreq: EX ST 301 or MTHSC 302.

C E 352 Economic Evaluation of Projects 2(2,0) Comparison of design alternatives based on engineering economic analysis. Introduction of present worth, annual cost, rate of return, and benefit-cost ratio methods. Use of depreciation and taxation in project analysis.

C E 353 Professional Seminar 1(1,0) Discusses various professional topics related to skills and techniques for evaluating career opportunities, seeking and obtaining civil engineering employment, career development, professional registration, professional ethics, and other factors necessary for achieving success in a professional career. Enables students to make better decisions that will help them succeed in their careers. Preq: Junior standing.

C E H387 Junior Honors Project 1-3 Studies or laboratory investigations on special topics in the civil engineering field which are of interest to individual students and faculty members. Arranged on a project basis for a maximum of individual student effort under faculty guidance. May be repeated for a maximum of three credits. Coreq: Junior standing in Civil Engineering Senior Departmental Honors Program.

C E H388 Honors Research Topics 1(0,2) Survey of ongoing research in the Civil Engineering Department to identify potential research topics for further individual study. Preq: Junior standing in Civil Engineering Senior Departmental Honors Program.

C E H389 Honors Research Skills 1(1,0) Research problem selection, research tools, research reports organization. Preq: C E H388.

C E 399 Creative Inquiry—Civil Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of four credits.

C E 401, 601 Indeterminate and Matrix Structural Analysis 3(3,0) Analysis of indeterminate structures using moment distribution, energy methods such as virtual work and Castigliano’s Theorem and the matrix formulation of the direct stiffness method. Preq: C E 301 or consent of instructor.

C E 402 Reinforced Concrete Design 3(3,0) Design of reinforced concrete beams, slabs, columns, and footings using ultimate strength design. Includes an introduction to working stress design methods. Preq: C E 301 or consent of instructor.

C E 404, 604 Masonry Structural Design 3(3,0) Introduction to design of structural elements for masonry buildings, including lintels, walls, shear walls, columns, pilasters, and retaining walls. Reinforced and unreinforced elements of concrete or clay masonry are designed by allowable stress and strength design methods. Includes an introduction to construction techniques, materials, and terminology used in masonry. Preq: C E 402 or consent of instructor.
C E 406 Structural Steel Design 3(3,0) Introduction to the design of structural elements found in steel buildings, in particular the design of steel tension members, beams, columns, beam-columns, and connections. Additional topics include composite members and plate-girders. Emphasizes the AISC-LRFD Specifications for steel design, though reference is made to the ASD Specification with conventions made where appropriate. Preq: C E 301 or consent of instructor.

C E 407, 607 Wood Design 3(3,0) Introduction to wood design and engineering: properties of wood and wood-based materials; design of beams, columns, walls, roofs, panel systems, and connections. Preq: C E 402 or 406, or consent of instructor.

C E 408, 608 Structural Loads and Systems 3(3,0) In-depth discussion of minimum design loads and load combinations. Includes overview of various steel and concrete systems. Discusses practical selection and design issues and design of proprietary building materials and components such as steel joists, diaphragms, engineered wood products, etc. Preq: C E 206, 301.

C E 410, 610 Traffic Engineering: Operations 3(3,0) Basic characteristics of motor-vehicle traffic, highway capacity, applications of traffic control devices, traffic design of parking facilities, engineering studies, traffic safety, traffic laws and ordinances, and public relations. Preq: C E 311 or consent of instructor.

C E 411, 611 Roadway Geometric Design 3(2,3) Geometric design of roadways, at-grade intersections, and interchanges in accordance with conditions imposed by driver ability, vehicle performance, safety, and economics. Preq: C E 311 or consent of instructor.

C E (C R P) 412, 612 Urban Transportation Planning 3(3,0) Consideration of urban travel characteristics, characteristics of transportation systems, transportation and land-use studies, trip distribution and trip assignment models, layout patterns and subdivision layout. Preq: C E 311 or consent of instructor.

C E 421, 621 Geotechnical Engineering Design 3(3,0) Study of the relationship of local geology to soil formations, groundwater, planning of site investigation, sampling procedures, determination of design parameters, foundation design, and settlement analysis. Preq: C E 321 or consent of instructor.

C E 424, 624 Earth Slopes and Retaining Structures 3(3,0) Considers the principles of geology, groundwater and seepage, soil strength, slope stability, and lateral earth pressure and their application to the design of excavations, earth fills, dams, and earth-retaining structures. Preq: C E 321 or GEOL 320 or consent of instructor.

C E 433, 633 Construction Planning and Scheduling 3(3,0) Study of principles and applications of the Critical Path Method (CPM) and Project Evaluation and Review Technique (PERT). Includes project breakdown and network graphics; identification of the critical path and resulting floats; definition and allocation of materials, equipment, and manpower resources; resource leveling, compression, and other network adjustments; and computer applications using packaged routines. Preq: C E 331 or consent of instructor.

C E 434, 634 Construction Estimating and Project Control 3(3,0) Instruction in specifications, contracts, and bidding strategies; purchasing and subcontracting policies; accounting for materials, supplies, subcontracts, and labor; procedural details for estimating earthwork, reinforced concrete, steel, and masonry. Also considers overhead and profit items. Preq: C E 331 or consent of instructor.

C E 438, 638 Construction Support Operations 3(3,0) Describes activities necessary for the completion of a construction job although not specifically recognized as direct construction activities: general conditions, safety, security, quality assurance, value engineering; organizational support features and typical implementation procedures. Preq: C E 331 and EX ST 301, or consent of instructor.

C E 443, 643 Water Resources Engineering 3(3,0) Extension of the concepts of fluid mechanics to applications in water supply, water resource assessment, water transmission, water distribution networks, pump and pipe selection, pipe networks, and analysis of open channel appurtenances. Preq: C E 341.

C E 446, 646 Flood Hazards and Protective Design 3(3,0) Study of flood hazards and methods of protective design of the built environment. Floodplain mapping and delineation, methods for determining base flood elevations, flood-resistant construction, flood-proofing, and governmental regulations. Includes case studies and design projects. Preq: C E 342 or consent of instructor.

C E 447, 647 Stormwater Management 3(3,0) Evaluation of peak precipitation for urban and rural basins, design of highway drainage structures such as culverts and culverts, stormwater and receiving water quality, and management practices, detention and retention ponds, and erosion and sediment control. Preq: C E 342; Coreq: EE&S 610 or consent of instructor.

C E 458, 658 Physical Models in Hydraulics 3(2,3) Tools and techniques of physical modeling to aid in design of complex hydraulic systems. Students participate in construction, operation, and testing of physical models to solve hydraulic engineering design problems. Experimental design and operation are covered. Preq: C E 342 or consent of instructor.

C E 449, 649 Hydraulic Structures 3(3,0) Design methods and procedures are taught for a variety of hydraulic structures including intake structures, complex open-channel and closed conduit control structures, transitions, spillways, small dam, and pond design. Field trips to actual hydraulic structures may be included. Preq: C E 342 or consent of instructor.

C E 455, 655 Properties of Concrete and Asphalt 3(2,3) Properties of aggregate, concrete, and asphalt are discussed. Concrete and asphalt mix designs are conducted in the laboratory. Preq: C E 351 and EX ST 301, or consent of instructor.

C E 459 Capstone Design Project 3(1,6) Students apply creativity with their engineering knowledge in the solution of open-ended civil engineering problems. Problems are formulated and solutions are evaluated by faculty and practicing engineers. Oral communication skills are developed through presentations, correspondence, and project reports. Preq: All required 300-level C E courses and the Technical Design Requirement.

C E 462, 662 Coastal Engineering I 3(3,0) Introduction to coastal and oceanographic engineering principles, including wave mechanics, wave-structure interaction, coastal water-level fluctuations, coastal-zone processes, and design considerations for coastal structures and beach nourishment projects. Preq: C E 341 or consent of instructor.

C E 482, 682 Groundwater and Contaminant Transport 3(3,0) Basic principles of groundwater hydrology and transport of contaminants in groundwater systems; groundwater system characteristics; steady and transient flow; well hydraulics, design, and testing; contaminant sources, movement and transformations. Preq: C E 341. Coreq. EE&S 401.

C E H488 Honors Research I 2-3 Individual research under the direction of a Civil Engineering faculty member. Preq: C E H389.

C E H489 Honors Research II 3(3,0) Individual research under the direction of a Civil Engineering faculty member. Preq: C E H488.

C E 490 Special Projects 1-3(1-3,0) Studies or laboratory investigations on special topics in civil engineering which are of interest to individual students and faculty members. Arranged on a project basis for a maximum of individual student effort under faculty guidance. May be repeated for a maximum of three credits. Preq: Senior standing in Civil Engineering Senior Departmental Honors Program.

C E 491, 691 Selected Topics in Civil Engineering 1-6(1-6,0) Structured study of civil engineering topics not found in other courses. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

C E 499 Creative Inquiry—Civil Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of four credits.
COMM 107 Media Representations of Science and Technology 3(3,0) Examines mediated representations of science and technology from a communication perspective. Attention is paid to portrayals/coverage of science and technology in popular film, television, Internet, journalism, and other media. Students examine an array of theoretical issues and case studies in this area.

COMM 150 Introduction to Human Communication 3(2,2) Overview of theoretical approaches to the study of communication, including the theory and practice of interpersonal/small group/intercultural/public communication. Students complete a portfolio. Includes a laboratory.

COMM 162 Forensic Laboratory 1(0,3) Research, preparation, and practice leading to participation in on-campus and intercollegiate debate and individual events competition. May be repeated for a maximum of four credits.

COMM 163 Advanced Forensic Laboratory 1(0,3) Advanced research, preparation, and practice leading to continued participation in on-campus and intercollegiate debate and individual events competition. May be repeated for a maximum of four credits. Preq: COMM 162.

COMM 201 Introduction to Communication Studies 4(3,2) Introduces Communication Studies majors to and prepares them for continued study in the discipline by providing them with an overview of important issues, areas of study, and approaches to the field. Includes a writing laboratory experience. Preq: COMM 101.

COMM 250, H250 Public Speaking 3(3,1) Practical instruction in public speaking, practice in the preparation of delivery, and criticism of short speeches. Development and understanding and knowledge of the process of communication. Students complete a portfolio. Includes a laboratory.

COMM 256 Introduction to Public Relations 3(3,0) Students learn the context and techniques of public relations (PR), a form of corporate communication. Types of PR work, theories of PR, the four-part structure of PR, and the history of the field.

COMM 300 Communication in a World Context 3(3,0) In-depth examination of differences in communication practices and meanings seen through a global perspective. Preq: COMM 201 with a C or better or consent of instructor.

COMM 301 Communication Theory 3(3,0) Students explore the breadth and depth of theories within the major frameworks of the communication studies discipline. Students select the creative inquiry topic on which they will write a review of the literature. Preceds COMM 310, 311, and 495 in the creative inquiry experience. Preq: COMM 201 with a C or better or consent of instructor.

COMM 302 Mass Communication Theory 3(3,0) Survey of the breadth and history of theories of mass communication and mass media from the 19th century to the present. Emphasizes contemporary schools of thought, theoretical debates, and the continuing controversies in the field. Preq: COMM 201 with a C or better or consent of instructor.

COMM 303 Communication Law and Ethics 3(3,0) Major topics in communication law and free expression and in communication ethics. Preq: COMM 201 with a C or better or consent of instructor.

COMM 304 Youth, Media, and Culture 3(3,0) Grounded in the cultural studies paradigm, examines the relationship among youth, mass media, and popular culture. Focuses on issues such as how youth are portrayed in media, how young navigate the products of mass media/culture, and how youth creates its own media culture. Preq: COMM 201 with a C or better or consent of instructor.

COMM 305 Persuasion 3(3,0) Study of the processes by which communication influences attitudes, beliefs, and behaviors in our personal, social, civic, and professional lives. After discussion of definitional and methodological issues, particular theories of persuasion are examined. Treatment of political, market-driven, and social persuasion concludes the course. Preq: COMM 201 with a C or better or consent of instructor.

COMM 306 Discourse, Criticism, and Society 3(3,0) Exploration of theoretically-grounded methods of critical and cultural description, analysis, interpretation, and evaluation of public discourse. Concepts build from the literature review completed in COMM 301, as part of student’s Creative Inquiry experience. May be taken before, concurrently with, or after COMM 310 and COMM 311. Preq: COMM 301 with a C or better or consent of instructor.

COMM 307 Public Communication of Science and Technology 3(3,0) Examines the role of science and technology in society from a communication perspective. Particular attention is paid to this dynamic in public culture. Students examine an array of theoretical issues and case studies in this area. Preq: COMM 201 with a C or better or consent of instructor.

COMM 308 Public Communication and Popular Culture 3(3,0) Examines artifacts of popular culture, paying particular attention to their relationship to politics and public life. Explores the structures and constraints of the culture industry. Students apply communication principles to various examples. Preq: COMM 201 with a C or better or consent of instructor.

COMM 309 Visual Discourse and the Public 3(3,0) Examines the role of visuality in society and the cultural implications for ways of seeing. Using visual artifacts of various types, students learn the logic of visual representation. Preq: COMM 201 with a C or better or consent of instructor.

COMM 310 Quantitative Research Methods in Communication Studies 3(3,0) Explores methods of quantitative communication inquiry including theory/research relationship, conducting studies, and utilizing SPSS. Methods may include experiments, surveys, and content analysis. Concepts build from literature review completed in COMM 301 as part of student’s creative inquiry experience. May be taken before, concurrently with, or after COMM 306, 311. Preq: COMM 301 with a C or better or consent of instructor.
COMM 311 Qualitative Research Methods in Communication Studies 3(3,0) Explores methods of qualitative communication inquiry including theory/research relationship and conducting studies. Methods may include interviewing, focus groups, textual analysis, and ethnography. Concepts build from the literature review completed in COMM 301 as part of student's creative inquiry experience. May be taken before, concurrently with, or after COMM 306, 310. Prq: COMM 301 with a C or better or W S 301 or consent of instructor.

COMM (W S) 316 Girihood, Media, and Popular Culture 3(3,0) Explores how the mass media and popular culture contribute to social constructions of girihood. Employing the critical lens of feminist and communication theories, students examine mediated depictions of girls as well as how girls actively produce and negotiate media and popular culture. Prq: COMM 201 with a C or better or W S 301 or consent of instructor.

COMM 320 Television Journalism 3(2,2) Explores both the philosophy of journalism and the applied skills of the journalist. In addition to classroom activities, students experience television journalism first-hand as participants on a weekly on-campus television news program.

COMM 325 Sports Communication 3(3,0) Covers fundamentals of communicating in a sports environment. Includes the basics of communicating for print and broadcast news, as well as communicating for public relations and sports information. Also covers ethical considerations and the role of sports in American culture. Prq: COMM 201 with a C or better or W S 301 or consent of instructor.

COMM 320 Television Journalism 3(2,2) Explores both the philosophy of journalism and the applied skills of the journalist. In addition to classroom activities, students experience television journalism first-hand as participants on a weekly on-campus television news program.

COMM 330 Nonverbal Communication 3(3,0) Explores the preparation of professional sports communication materials for both internal and external audiences. Topics include the mechanics of creating press releases and other materials, as well as techniques in managing crises. Prq: COMM 201 with a C or better or consent of instructor.

COMM 327 Sports Media Criticism 3(3,0) Students gain in-depth understanding of sports communication issues through critically analyzing actual media coverage of sporting events, addressing social issues involved in college and professional sports, and developing an understanding of sports promotion and advertising. Prq: COMM 201 with a C or better or consent of instructor.

COMM 330 Nonverbal Communication 3(3,0) Explores the preparation of professional sports communication materials for both internal and external audiences. Topics include the mechanics of creating press releases and other materials, as well as techniques in managing crises. Prq: COMM 201 with a C or better or consent of instructor.

COMM 348 Interpersonal Communication 3(3,0) Survey of the theories and research in interpersonal communication with emphasis on the application of research findings and developmental strategies for intra- and intercultural relationships. Prq: COMM 201 with a C or better or consent of instructor.

COMM 350 Small Group and Team Communication 3(3,0) Examines the principles and skills involved in effective small-group communication. Prq: COMM 201 with a C or better or consent of instructor.

COMM 356 Stakeholder Communication 3(3,0) Focuses on external stakeholders such as the media, the community, and the government. Students learn theory- and research-based communication tactics to manage various stakeholder relationships. Prq: COMM 256 or consent of instructor.

COMM 361 Argumentation and Debate 3(3,0) Basic principles of argumentation with emphasis on developing skills in argumentative speech. The role of the advocate in contemporary society with an emphasis on and an appreciation of formal debate. Prq: COMM 250 or consent of instructor.

COMM 362 Communication and Conflict Management 3(3,0) Introduces the study of communication practices in conflict situations within various personal and professional settings. Emphasis is on the central role of communication in the understanding and management of conflict. Prq: COMM 201 with a C or better or consent of instructor.

COMM 363 Organizational Communication 3(3,0) Examination of the process, theories, and techniques of communications within small groups and other organized bodies. Prq: COMM 201 with a C or better or consent of instructor.

COMM 365 Special Topics in Communication Studies 3(3,0) Consideration of select major areas of study in the field. With consent of department chair may be repeated for a maximum of 15 credits but only if different topics are covered.

COMM 368 Organizational Communication Simulation 3(3,0) Students develop and apply communication skills which are useful in a variety of organizational settings: taking and conducting interviews, group decision making, and oral reporting. Discusses communication processes and provides personal and professional development. Prq: COMM 201 with a C or better and COMM 250 or consent of instructor.

COMM 369 Political Communication 3(3,0) Examination of American political rhetoric after 1900, focusing on such notable speakers as Franklin D. Roosevelt, John F. Kennedy, and Martin Luther King, Jr. Prq: COMM 201 with a C or better or consent of instructor.

COMM 370 Communication Studies Internship 3(0,9) Preplanned, preapproved, faculty-supervised internship provides Communication Studies majors with field experience in areas related to their curriculum. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Prq: Junior standing, consent of faculty advisor.

COMM 394 Communication and Aging 3(3,0) Major theories and concepts concerning communication with and between members of aging populations. Focuses on communication factors that affect the elderly and implications for the creation and maintenance of satisfying relationships within and between generations. Prq: COMM 201 with a C or better or consent of instructor.

COMM 395 Communication and Aging 3(3,0) Major theories and concepts concerning communication with and between members of aging populations. Focuses on communication factors that affect the elderly and implications for the creation and maintenance of satisfying relationships within and between generations. Prq: COMM 201 with a C or better or consent of instructor.

COMM 402 Mass Communication: History and Criticism 3(3,0) Critical examination of mass communication in America, including discussions of history, theory, and current issues in television, film, popular music, telecommunications, and other media. Prq: COMM 201 with a C or better or consent of instructor.

COMM 405 Public Contest and Change 3(0) Examines the role of public communication in the process of contesting social values and practices and in the subsequent change that sometimes occurs. Students explore the public’s relationship with mass media as well as other forms of communication practices that can produce cultural change. Prq: COMM 201 with a C or better and 305 or consent of instructor.

COMM 425 Advanced Sports Communication 3(3,0) Combination seminar and primary research class that explores contemporary sports communication issues. Students write position papers on seminar topics and conduct primary research on sports communication topics of their choice. Prq: COMM 325 or consent of instructor.

COMM (ENGL) 451, 651 Film Theory and Criticism 3(2,3) See ENGL 451.

COMM 455 Gender Communication 3(3,0) Explores the ways communication behavior and perceptions of communication behavior are affected by gender. The effects of gender on a variety of communication contexts are examined, including interpersonal, small group, organizational, and mass communication. Prq: COMM 201 with a C or better or consent of instructor.

COMM 456 Strategic Communication for Social Change 3(3,0) In-depth examination and application of the strategic use of communication for creating social change. Prq: COMM 310 or 311; 356; or consent of instructor.

COMM 462 Communication and Negotiation 3(3,0) Building on the concepts and practices of conflict management, students develop knowledge and skills for distributive bargaining and integrative negotiation climates. Focuses on the objectives, goals, positions, interests, tactic, and other elements to negotiate successfully in a variety of situations. Prq: COMM 362 or consent of instructor.

COMM 464, 664 Advanced Organizational Communication 3(3,0) Application of speech communication methodology to the analysis of organizational communication processes. Students study methods of organizational communication analysis and intervention. Prq: COMM 364 or consent of instructor.

COMM 470, 670 Communication and Health 3(3,0) Considers institutional and health care communication issues as well as the relationship between social issues, communication, and health. Prq: COMM 201 with a C or better or consent of instructor.

COMM 480 Intercultural Communication 3(3,0) Introduces the process of communication between and among individuals from different cultures or subcultures. Emphasizes the effect of cultural practices within various communication relational contexts such as interpersonal, small group, and organizational communication. Prq: COMM 201 with a C or better or consent of instructor.
COMM (ENGL) 491, 691 Classical Rhetoric 3(3,0) See ENGL 491.
COMM (ENGL) 492, 692 Modern Rhetoric 3(3,0) See ENGL 492.
COMM 495 Creative Inquiry Capstone 3(3,0) Capstone course in the Department's creative inquiry sequence that builds on students' prior work in communication theory and research methods. Students apply their theoretical understanding and research skills in completing a significant research project involving their previously selected topics. Project culminates in written, oral, and visual presentations. Preq: Two of the following: COMM 306, 310, 311 each with a C or better; Senior standing in Communication Studies; or consent of instructor.
COMM H496 Honors Creative Inquiry Capstone 3(3,0) Capstone course for honors students in the department's creative inquiry sequence. Working with their departmental honors advisor, students apply theoretical understanding and research skills in completing a written product of conference or publication length/quality, Must be taken for a total of six credits over the course of two semesters. Preq: Two of the following: COMM 306, 310, 311 each with a C or better; Senior standing in Communication Studies.
COMM 498 Communication Academic and Professional Development II 1(1,0) Students reflect upon curricular relationships among general education, major, and minor courses. They complete and revise digital portfolios for presentation to the major, University, graduate schools, or potential employers. Students participate in resume building, job seeking, and interviewing activities. Preq or Coreq: COMM 495 or H496.
COMM 499 Independent Study 1-3(1,3,0) Tutorial work for students with special interests or projects in speech communication outside the scope of existing courses. Preq: Consent of department chair.

COMMUNITY AND RURAL DEVELOPMENT
See also courses listed under Applied Economics.

Professors: D. L. Barkley, M. E. Espy, M. S. Henry, D. W. Hughes; Associate Professors: R. D. Lamie, S. R. Templeton; Assistant Professor: K. L. Robinson
C R D (SOC) 235 Introduction to Leadership 3(3,0) See SOC 235.
C R D 335 Leadership in Organizations and Communities 3(3,0) Students present leadership models, principles, skills, negotiation techniques, and practices to improve effectiveness in organizations and communities; use current theory and research findings to evaluate effective leadership; demonstrate the role of effective leadership in shaping future organizations and social structures in public and private sectors. Preq: Introductory course in a social science (sociology recommended).
C R D 336 Community Development Methods 3(3,0) Research methodology is applied to community, leadership, and economic development. Steps include problem identification, data collection, analysis, and interpretation. Special attention is given to case study approach, applied research design, data collection options, and computer-based analysis of community-based data to generate findings and implications for policy change. Preq: C R D 335, EX ST 301 or equivalent.
C R D (AP EC) 357 Natural Resources Economics 3(3,0) Principles and problems involved in the use of soil, water, forest, and mineral resources, with special emphasis on economic aspects of alternative methods of resource utilization. Preq: AP EC 202, ECON 200 or 211.
C R D (AP EC, HLTH) 361 Introduction to Health Care Economics 3(3,0) Introductory course in which students learn the basic economics of the institutions comprising the health-care industry. Topics include the underlying supply, demand, and institutional factors impacting health-care availability and cost of health care.
C R D (AP EC) 411, 611 Regional Impact Analysis 3(3,0) Techniques for analysis of the growth and decline of regions including economic base theory, shift share, regional input-output, regional econometric models, and fixed input models. Preq: AP EC 202 or ECON 211 and 212.
C R D (AP EC) 491 Internship, Agribusiness, and Community and Rural Development 1-6(0-2-12) Internship under faculty supervision in an approved agency or firm. Internships provide students with work experience in agribusiness or community and rural development. Students submit a comprehensive report within one week at the end of the internship. A maximum of six internship credits may be earned. Preq: Junior standing and/or consent of instructor.
C R D 492, 692 Case Study Project 3(3,0) Capstone course engaging students in in-depth case study projects in community and economic development. Designed to enhance professional development, career interests, and practical experience. Students may participate in an internship, field experience, service learning activity, or investigation from a community, leadership, or economic development topic. Preq: C R D 336 and consent of instructor.
C R D 494 Creative Inquiry—Community and Rural Development 1-3(1,3,0) Multi-semester commitment to participate in agricultural and applied economics and community and economic development related research experience for students working in teams, mentored and directed by a faculty member. Students learn to collect, analyze, evaluate, and present information. Suitable for inclusion in the student’s e-portfolio. May be repeated for a maximum of 12 credits. Preq: Consent of instructor.

COMPUTER SCIENCE
CP SC 101, H101 Computer Science I 4(3,2) Introduction to modern problem solving and programming methods. Special emphasis is placed on algorithm development and software life cycle concepts. Includes use of appropriate tools and discusses ethical issues arising from the impact of computing upon society. Intended for students concentrating in computer science or related fields. Preq: MTHSC 105 or satisfactory score on the Clemson Mathematics Placement Test or consent of instructor.
CP SC 102, H102 Computer Science II 4(3,2) Continuation of CP SC 101. Emphasizes problem solving and program development techniques. Examines typical numerical, nonnumerical, and data processing programs. Introduces basic data structures. Credit may not be received for both CP SC 102 and 210. Preq: CP SC 101 with a C or better.
CP SC 104 Introduction to the Concepts and Logic of Computer Programming 2(1,2) Introduction to the concepts and logic of computer programming. Simple models are used to introduce basic techniques for developing a programmed solution to a given problem. Problem solving techniques are considered. Not open to students who have received credit for CP SC 101, 111, 157, or 210.
CP SC 110, H110 Elementary Computer Programming 3(3,0) Introduction to computer programming and its use in solving problems. Intended primarily for technical majors. Basic instruction in programming techniques is combined with tools use and discussions of ethical issues arising from the impact of computing on society.
CP SC 111 Elementary Computer Programming in C/C++ 3(2,2) Introduction to computer programming in C/C++ and its use in solving problems. Intended primarily for technical majors. Basic instruction in programming techniques is combined with tools use and discussions of ethical issues arising from the impact of computing on society.
CP SC 115 Introduction to Computational Science 3(3,0) Introduction to systems thinking. Includes development of dynamical systems models using visual modeling tools and development of dynamical systems using agent based software. Class material investigates elementary science and engineering models.
CP SC 120 Introduction to Information Technology 3(2,2) Investigation of ethical and societal issues based on the expanding integration of computers into our everyday lives. Considers historical background, terminology, new technologies and the projected future of computers. Includes practical experience with common computer software technologies. Will not satisfy Computer Science Requirements in any Computer Science major.

CP SC 157 Introduction to C Programming 2(2,0) Introduction to basic programming techniques using the C programming language.

CP SC 161 Introduction to Visual Basic Programming 3(2,2) Introduction to programming using the Visual Basic language. Topics include simple and complex data types, arithmetic operations, control flow, files, and database programming. Several projects are implemented during the semester.

CP SC 210 Programming Methodology 4(3,2) Introduction to programming techniques and methodology. Topics include structured programming, stepwise refinement, program design and implementation techniques, modularization criteria, program testing and verification, basic data structures, and analysis of algorithms. Credit may not be received for both CP SC 102 and 210. Preq: CP SC 111 or equivalent; satisfactory performance on a pretest.

CP SC 212 Algorithms and Data Structures 4(3,2) Study of data structures and algorithms fundamental to computer science; abstract data-type concepts; measures of program running time and time complexity; algorithm analysis and design techniques. Preq: CP SC 102 or 210 with a C or better.

CP SC 215 Tools and Techniques for Software Development 3(2,2) Intensive course on software development using an imperative language. Topics include typical program development tools such as debuggers and “make” files, software development and testing techniques such as separate module development and testing, pointers and explicit heap management, and low-level file I/O. Preq: CP SC 102 or 210 with a C or better.

CP SC 220 Microcomputer Applications 3(3,0) Applications of microcomputers to formulate and solve problem models. Emphasizes applications development in database and spreadsheet environments. Current software products are used. Preq: CP SC 120 or MGT 218 or equivalent.

CP SC 231 Introduction to Computer Organization 4(3,2) Study of the machine architectures on which algorithms are implemented and requirements of architectures that support high-level languages, programming environments, and applications. Preq: CP SC 102 or 210 with a C or better.

CP SC 281 Selected Topics in Computer Science 1-4(0-3,0-6) Areas of computer science in which new trends arise. Innovative approaches to a variety of problems in the use and understanding of basic computing concepts are developed and implemented. May be repeated for a maximum of eight credits, but only if different topics are covered. Preq: Consent of instructor.

CP SC 291 Seminar in Professional Issues 1(1,0) Considers the impact of computer use on society. Discusses ethical use of software and protection of intellectual property rights. Professions is viewed historically; organizations important to the profession are discussed; the development process for standards is presented; and students are introduced to the professional literature. Preq: CP SC 102 or 210, or consent of instructor.

CP SC 322 Introduction to Operating Systems 3(3,0) Detailed study of management techniques for the control of computer hardware resources. Topics include interrupt systems, primitive level characteristics of hardware and the management of memory, processor, devices, and data. Credit may not be received for both CP SC 322 and 332. Preq: CP SC 215, 231 with a C or better.

CP SC 330 Computer Systems Organization 3(3,0) Introduction to the structure of computer systems. Various hardware/software configurations are explored and presented as integrated systems. Topics include digital logic, basic computer organization, computer arithmetic, memory organization, input/output organizations, interrupt processing, multiprocessors, and cluster computer. Preq: CP SC 212, 215, 231 with a C or better.

CP SC 332 Computer Systems 3(3,0) Introduces design, integration, and use of hardware and software components in standard computer systems. Emphasizes computer organization at the component level, internal basic operating system functions, and at computer hardware system. Credit may not be received for both CP SC 330 and 332. Preq: CP SC 212, 215, 231 with a C or better.

CP SC 350 Foundations of Computer Science 3(3,0) Development of the theoretical foundations of programming, algorithms, languages, automata, computability, complexity, data structures, and operating systems. A broad range of fundamental topics is consolidated and extended in preparation for further study. Preq: CP SC 212 and MTHSC 110 with a C or better.

CP SC 360 Networks and Network Programming 3(3,0) Introduction to basic concepts of computer network technologies and network programming. Topics include network programming, layered protocol architectures, local and wide area networks, internetwork and intranetwork concepts, security, Socket level programming is introduced and used throughout the course. Preq: CP SC 212, 215 with a C or better.

CP SC 361 Data Management Systems Laboratory 1(0,2) Introduction to mainstream environments typical of large-scale data processing applications; programming languages, control languages, and file utilities; use of COBOL language and IBM JCL. Preq: CP SC 102 or 210; or equivalent. Coreq: CP SC 360.

CP SC 362 Distributed and Cluster Computing 3(3,0) Introduction to the basic technology and programming techniques for distributed and cluster computing. Standard techniques for developing parallel solutions to problems are introduced and implemented. Software systems that provide high-level abstractions for data communications are considered. Preq: CP SC 360 with a C or better.

CP SC 371 Systems Analysis 3(3,0) Incorporates a study of the decision-making process at all levels with the logical design of information systems. Extensive study of the system life cycle with emphasis on current as well as classical techniques for describing data flows, data structures, file design, etc. Preq: CP SC 360.

CP SC 372 Introduction to Software Development 3(3,0) Introduces techniques and issues in software design and development; tools, methodologies, and environments for effective design, development, and testing of software; and organizing and managing the development of software projects. Preq: CP SC 212 and 215 with a C or better.

CP SC H395 Honors Seminar 1(1,0) Research topics in various areas of computer science are presented. Methods for identifying and initiating research projects are considered. May be repeated for a maximum of two credits. Preq: Admission to Departmental Honors Program.

CP SC 405, 605 Introduction to Graphical Systems Design 3(3,0) Study of principles, computational techniques, and design concepts needed for designing systems for effective graphical displays. Preq: CP SC 212, 215, MTHSC 108, 210 with a C or better.

CP SC 411, 611 Virtual Reality Systems 3(3,0) Design and implementation of software systems necessary to create virtual environments. Discusses techniques for achieving real-time, dynamic display of photorealistic, synthetic images. Includes hands-on experience with electromagnetically-tracked, head-mounted displays and requires, as a final project, the design and construction of a virtual environment. Preq: CP SC 405 with a C or better.

CP SC 412, 612 Eye Tracking Methodology and Applications 3(3,0) Introduction to the human visual system; visual perception; eye movements; eye tracking systems and applications in psychology, industrial engineering, marketing, and computer science; hands-on experience with real time, corneal-reflection eye trackers, experimental issues. Final project requires the execution and analysis of an eye tracking experiment. Preq: CP SC 360, MKT 431, or PSYCH 310.

CP SC 414, 614 Human and Computer Interaction 3(3,0) Survey of human and computer interaction, its literature, history, and techniques. Covers cognitive and social models and limitations, hardware and software interface components, design methods, support for design, and evaluation methods. Preq: CP SC 212 and 215 with a C or better, or equivalent.

CP SC 416, 616 2-D Game Engine Construction 3(3,0) Introduction to tools and techniques necessary to build 2-D games. Techniques draw from subject areas such as software engineering, algorithms, and artificial intelligence. Students employ techniques such as sprite animation, parallax scrolling, sound, AI incorporated into game sprites, and the construction of a game shell. Preq: CP SC 212 and 215 with a C or better.
CP SC 420, 620 Computer Security Principles 3(3,0)
Covers principles of information systems security, including security policies, cryptography, authentication, access control mechanisms, system evaluation models, auditing, and intrusion detection. Computer security system case studies are analyzed. Prereq: CP SC 322 and 360 with a C or better.

CP SC 424, 634 System Administration and Security 3(3,0)
Covers topics related to the administration and security of computer systems. Primary emphasis is on the administration and security of contemporary operating systems. Prereq: CP SC 360 and 322 or 332 with a C or better.

CP SC 428, 628 Design and Implementation of Programming Languages 3(3,0)
Overview of programming language structures and features and their implementation. Control and data structures found in various languages are studied. Also includes runtime organization and environment and implementation models. Prereq: CP SC 231, 350, 360 with a C or better.

CP SC 455, 655 Computational Science 3(3,0)
Introduction to the methods and problems of computational science. Uses problems from engineering and science to develop mathematical and computational solutions. Case studies use techniques from Grand Challenge problems. Emphasizes the use of networking, group development, and modern programming environments. Prereq: MTHSC 108, 311, and previous programming experience in a higher level language.

CP SC 462, H462, 662 Database Management Systems 3(3,0)
Introduction to database/data communications concepts as related to the design of online information systems. Problems involving structuring, creating, maintaining, and accessing multiple-user databases are presented and solutions developed. Comparison of several commercially available teleprocessing monitor and database management systems is made. Prereq: CP SC 360.

CP SC 463, 663 On-line Systems 3(3,0)
In-depth study of the design and implementation of transaction processing systems and an introduction to basic communications concepts. A survey of commercially available software and a project using one of the systems are included. Prereq: CP SC 462.

CP SC 464, 664 Introduction to Computer Architecture 3(3,0)
Survey of von Neumann computer architecture at the instruction-set level. Fundamental design issues are emphasized and illustrated using historical and current mainstream, supermini, and micro architecture. Prereq: CP SC 330 or consent of instructor.

CP SC 472, H472, 672 Software Development Methodology 3(3,0)
Advanced topics in software development methodology. Techniques such as chief programmer teams, structured design and structured walk-throughs are discussed and used in a major project. Emphasizes the application of these techniques to large-scale software implementation projects. Also includes additional topics such as mathematical foundations of structured programming and verification techniques. Prereq: CP SC 360 and 372.

CP SC 481, H481, 681 Selected Topics 1-3(1-3,0)
Areas of computer science in which non-standard problems arise. Innovative approaches to problem solutions which draw from a variety of support courses are developed and implemented. Emphasizes independent study and projects. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Consent of instructor.

CP SC 491 Seminar in Professional Issues II 1(1,0)
Considers the impact of computing system development on society. Discusses ethical issues in the design and development of computer software. Students discuss standards for professional behavior, the professional's responsibility to the profession, and techniques for maintaining currency in a dynamic field. Prereq: Senior standing.

CP SC H495 Senior Thesis Research 1-3(1-3,0)
Directed individual research project for honors students supervised by departmental faculty. May be repeated for a maximum of six credits. Prereq: Senior standing.

CONSTRUCTION SCIENCE AND MANAGEMENT

Professor: R. W. Liska; Associate Professors: E. J. Clarke, G. R. Corley, C. A. Piper, R. K. Schneider; Assistant Professors: D. C. Bauman, J. A. Winz

C S M 100 Introduction to Construction Science and Management 3(3,0)
Introduction to the construction industry and the Construction Science and Management Department. Prereq: Construction Science and Management major or consent of department chair.

C S M 101 Introduction to Research Methodology 1(0,2)
Fundamentals of formal research methods, critical thinking, and ethics. Prereq: Construction Science and Management major.

C S M 201 Structures I 3(3,0)
Study of statically determinate structural components and systems including force applications and distributions in structural elements and the resulting stress-strain patterns in axial, shear, and bending mechanisms. Prereq: MTHSC 102 or 106, PHYS 207; Construction Science and Management major, or consent of department chair.

C S M 202 Structures II 4(3,2)
Study of force distribution and behavior in statically determinate structural components and systems; analysis and design of basic reinforced concrete, steel, wood, and formwork components and systems including shear and moment stress, combined loading/stress conditions, and deflections. Prereq: C S M 201, Construction Science and Management or Architecture major, or consent of department chair.

C S M 203 Materials and Methods of Construction I 3(3,0)
Descriptive study of the materials and methods of construction, focusing on nomenclature, building materials, and assembly of building systems consisting primarily of wood, masonry, residential interior and exterior finishes, and building foundations. Prereq: Construction Science and Management or Architecture major, or consent of department chair. Prereq or Coreq: A A H 210, C S M 100 (Construction Science and Management majors).

C S M 204 Contract Documents 3(2,3)
Introduction to working drawings, specifications, and the various documents required to carry out a typical construction project. Prereq: Construction Science and Management major or consent of department chair. Coreq: C S M 205.

C S M 205 Materials and Methods of Construction II 3(3,0)
Descriptive study of materials and methods of construction, focusing on nomenclature, building materials, and assembly of building systems consisting primarily of steel and concrete in addition to roofing assemblies and interior and exterior commercial finishes. Prereq: C S M 203, Construction Science and Management or Architecture major, or consent of department chair.

C S M 250 Construction Problem Solving Through Research 1(0,2)
Application of the components of formal research methodology to real-life construction problems and documentation and presentation of process and solution. Prereq: C S M 150 or consent of department chair.

C S M 301 Structures III 3(3,0)
Analysis and design of basic determinate and indeterminate frames and reinforced concrete structural components and systems; introduction to special structural systems and seismic loading. Prereq: C S M 202, PHYS 208, Construction Science and Management or Architecture major, or consent of department chair.

C S M 303 Soils and Foundations 3(2,3)
Study of various types of soils and foundations, including soil testing, reports, compaction, stability, and function as they relate to the construction process. Prereq: C S M 202, Construction Science and Management major, or consent of department chair.

C S M 304 Environmental Systems I 3(3,0)
Theory and practice of heating, ventilating, air conditioning, and plumbing systems for buildings. Prereq: C S M 205, PHYS 208, Construction Science and Management or Architecture major, or consent of department chair.

C S M 305 Environmental Systems II 3(3,0)
Theory and practice of fire protection, specialty piping, lighting, and electrical systems for buildings. Prereq: C S M 304, Construction Science and Management or Architecture major, or consent of department chair.

C S M 351 Construction Estimating 3(2,2)
Study of basic estimating as applied to construction projects. Includes the take-off of material quantities, assigning labor and equipment production rates, and applying material prices, wage rates, and equipment costs to derive a total job cost. Prereq: C S M 204, 205, CP SC 120, all required MTHSC courses, Construction Science and Management major, or consent of department chair. Prereq or Coreq: B E 222, C S M 303.

C S M 352 Construction Scheduling 3(2,2)
Analysis of construction projects emphasizing estimating, scheduling, and resource leveling. Prereq: C S M 304 (or concurrent enrollment), 351, Construction Science and Management major, or consent of department chair. Coreq: C S M 353.
C S M 353 Construction Estimating II 3(2,2) Continuation of basic construction estimating with the additional component of computerized estimating. Includes material, labor and equipment costs, production rates, bid ethics, construct-ability analysis, and understanding of other types of estimating procedures. Preq: C S M 304 (or concurrent enrollment), 351, Construction Science and Management major, or consent of department chair. Coreq: C S M 352.

C S M 420 Highway Construction and Contracting 3(3,0) Study of contracting and construction of highways, including selection and use of equipment, construction of pavements, bridges, and drainage structures, and related processes. Preq: C S M 303, 352, 353.

C S M 450 Construction Internship 1(1,0) Documentation of 800 hours of approved experience in the construction industry with evaluation of student portfolio and preparation and sitting for the American Institute of Constructors CPC Level I examination. To be taken Pass/Fail only. Preq: C S M 250 or consent of department chair.

C S M 453 Construction Project Management 3(3,0) Study of construction business organization, methods of project delivery, field organization, policy, ethics, project management, control systems, labor management relations, and productivity. Preq: C S M 352, 353, LAW 322 (or concurrent enrollment), MGT 307 (or concurrent enrollment), Construction Science and Management major, or consent of department chair. Coreq: C S M 411, 461.

C S M 454 Construction Capstone 6(3,12) Students develop a capstone project that entails the knowledge obtained in all previous courses in the Construction Science and Management Program. Students must take the capstone course at Clemson University. Preq: C S M 453, Construction Science and Management major, or consent of department chair.

C S M 455, 655 Reducing Adversarial Relations in Construction 3(3,0) Focuses on the delivery of projects and how adversarial relations can affect the successful completion of the venture. Topics include management of human resources, understanding the needs and processes of the participants, where problems lie, methods of avoiding and settling disputes. Preq: Construction Science and Management or Architecture major, senior standing, or consent of department chair.

C S M 490, H490 Directed Studies 1-3(1-3,0) Comprehensive studies and research of special topics not covered in other courses. Emphasizes field studies, research activities, and current developments in construction science. May be repeated for a maximum of six credits. Preq: Consent of instructor.

C S M 498 Current Topics in Construction 1-3(1-3,0) Study of current topics in the construction industry not central to other construction science courses. Specific titles and course descriptions to be announced from semester to semester. May be repeated for a maximum of six credits. Preq: Consent of advisor.

CROP AND SOIL ENVIRONMENTAL SCIENCE

Professors: H. T. Knap, V. L. Quisenberry, E. R. Shippe; Associate Professor: W. C. Stringer; Assistant Professor: Y. Arai; Lecturer: B. E. Edge

CSENV 100 Introduction to Crop and Soil Environmental Science 1(1,0) Introduction to and survey of the agricultural and soil sciences and their application to current societal issues: career guidance, opportunities for professional certification, and discussion of skills used by agronomists and soil scientists. Offered fall semester only.

CSENV 202 Soils 4(3,2) Introduces world soil resources, soil formation, classification, and mineralogy. Emphasizes basic chemical and physical properties of soil. Also discusses soil microorganisms, plant nutrients, and fertilization. Soil properties are related to growth. Preq: CH 101, 102, or a geology sequence including GEOG 101, or consent of instructor.

CSENV 350 Practicum 1-6 Preplanned practical or research experience related to student-selected Soils and Sustainable Crop Systems concentration. Practicum is undertaken with an approved advisor or faculty member. May be repeated for a maximum of six credits. Preq: CSENV 303, 353, 355, 359, 453, or consent of department chair.

CSENV 403, 603 Soil Genesis and Classification 3(2,2) Study of soil morphology and characterization, pedogenesis processes, soil-forming factors, and classification of soils. Offered fall semester only. Preq: CSENV 202 or consent of instructor.

CSENV 404, 604 Soils and Land Use 2(1,3) Soils interpretations for nonagricultural purposes and facilities. Emphasizes use of modern soil surveys and properties and features of soils important in nonfarm land uses. Not open to Crop and Soil Environmental Science minors or to students who have taken CSENV 202. Offered fall semester only.

CSENV 405, 605 Plant Breeding 3(2,2) Application of genetic principles to the development of improved crop plants. Principal topics include the genetic and cytogenetic basis of plant breeding, mode of reproduction, techniques in selecting and crossing, methods of breeding, inheritance in the major crops, and biometrical methods. Offered spring semester only. Preq: GEN 302 or equivalent.

CSENV 406 Special Problems 1-3(0,3-9) Acquaints students with the scientific method. Literature investigation planning, and execution of an experiment are integral parts of the course. Not open to AGRIC H491 and H492 students. May be repeated for a maximum of six credits. Preq: Senior standing, minor in Crop and Soil Environmental Science, and consent of department chair.

CSENV 407, H407, 607 Introductory Weed Science 3(2,2) Weed management in crops and pastures of the Southeast. Topics include weed identification, herbicide families and modes of action, herbicide formulations, herbicide diagnosis on crops and weeds, sprayer calibration and spray application, and nonchemical weed control strategies. Preq: AGRIC 104 or consent of instructor.

CSENV (B E) 408, 608 Land Treatment of Wastewater and Sludges 3(3,0) Principles for designing environmentally acceptable land application systems using municipal and industrial wastewater and sludges are presented. Topics include land-limiting constituent analysis; soil-plant interactions; system equipment and design; system operation and management; public acceptance, social, and regulatory issues. Case studies and field trips are planned. Preq: Senior standing in agriculture or engineering or consent of instructor.

CSENV 417, H417, 617 Weed Ecology and Morphology 3(2,2) Study of the morphological characteristics of weed plants of economic importance in row crops, pastures, and turf of South Carolina. Succession, reproduction, dissemination, distribution, competition, and allelopathy are discussed. Preq: CSENV 407 or 433 or consent of instructor.

CSENV 421, 621 Principles of Field Crop Production 3(3,0) Principles for production of field crops. Topics include botany and physiology, tillage, harvesting, storage, and crop quality. Principles are illustrated using examples from various crops. Preq: AGRIC 104 or equivalent introductory plant science, CSENV 202.

CSENV 422, 622 Major World Crops 3(3,0) Examines the distribution, adaptation, production, and utilization of major agronomic crops of the world. Emphasizes crops important to U.S. agriculture. Specific crops discussed in more detail include corn, wheat, rice, sorghum, soybean, cotton, tobacco, and peanuts. Preq: AGRIC 104 or equivalent introductory plant science, CSENV 202.

CSENV 423, H423, 623 Field Crops—Forages 3(3,0) Establishment, management, and utilization of forage crops in a forage-livestock agroecosystem context. Discusses hay, silage, and pasture utilization. Uses computer models to study complexity of forage-livestock production systems. Preq: AGRIC 104, CSENV 202, or consent of instructor.

CSENV 424, 624 Applied Aspects of Forage Management 10(2,2) Hands-on exposure to forage plantings, establishment and management practices. Includes pasture and harvested forage systems, equipment and practices and analyzes forage-livestock systems. Preq: CSENV 423 (or concurrent enrollment).

CSENV 425, 625 Seed Science and Technology 3(2,2) Topics include seed development, germination, dormancy, pathology, storage, and deterioration. Also covers seed testing and commercial production of seed. Emphasizes useful applications of current seed science knowledge. Preq: AGRIC 104, BIOSC 205.
DANCE
Lecturer: C. L. Hosler
DANCE 130 Tap Dance I 1(0,3) Introduces fundamentals and vocabulary of tap dancing with opportunities to develop rhythmic patterns of various origins. May be repeated for a maximum of 8 credits, with a maximum of 16 credits of dance applied toward a degree. Applied dance fee will be assessed.
DANCE 140 Jazz Dance I 1(0,3) Introduces basic principles and fundamentals of jazz technique, as well as exploration of flexibility and strength-building exercises. May be repeated for a maximum of 8 credits, with a maximum of 16 credits of dance applied toward a degree. Applied dance fee will be assessed.
DANCE 150 Modern Dance I 1(0,3) Introduces basic principles of dance movement and vocabulary, as well as actively exploring and applying different methods of body alignment and theory. May be repeated for a maximum of 8 credits, with a maximum of 16 credits of dance applied toward a degree. Applied dance fee will be assessed.
DANCE 160 Ballet Dance I 1(0,3) Introduces basic principles and fundamentals of classical ballet, with emphasis on good technique, center work, and across the floor work. May be repeated for a maximum of 8 credits, with a maximum of 16 credits of dance applied toward a degree. Applied dance fee will be assessed.
DANCE 330 University Dance Company I 1(0,3) Perform in a dance ensemble for advanced dance students. Provides opportunities to learn and develop choreographic skills as well as to improve personal dance technique. Company is selected by audition. May include public recital(s). May be repeated for a maximum of 8 credits. Applied dance fee is assessed. Preq: Consent of instructor.

DESIGN STUDIES

DSIGN 321 Wood Shop Practices, Materials, Tools, and Equipment 3(1,6) Instruction in the use of a full range of shop machinery, tools, equipment, and craftsmanship as well as an orientation to a wide variety of materials, techniques, and procedures. The paramount importance of safety is continually emphasized. Preq: Consent of instructor.

EARLY CHILDHOOD EDUCATION
Professors: V. I. Correa, D. A. Stegelin; Assistant Professor: A. L. Eckhoff, Clinical Faculty: R. S. N. Wilson
ED EC 220 Family, School, and Community Relationships 3(3,0) Historical trends, theoretical models, and strategies of effective family/school/community relationships are examined. Special emphasis is placed on multicultural issues and on programs that support collaborative interaction with families that benefit children. Preq: Sophomore standing.
ED EC 300 Foundations of Early Childhood Education 3(3,0) Philosophical and historical foundations of early childhood education, societal changes and influences, needs of young children and families, program differentiation, and future trends are examined through coursework and experiential activities. Preq: General Education requirements; ED EC 220, ED F 334, or consent of instructor.
ED EC 336, H336 Social Development of Infants and Young Children 3(3,0) Study of the behavior of the preschool child from infancy through age five. Theoretical concepts and observation of children's behavior are integrated, analyzed, and evaluated to discover implications for teaching and guiding preschool children. Includes a minimum of 10 one-hour observation-participation visits in public kindergarten. Preq: ED F 334, minimum grade-point ratio of 2.0 or consent of instructor.
ED EC 400 Observation and Assessment in Clinical Settings 3(3,0) Clinical experiences in early childhood settings prior to student teaching provide opportunities for observing, guiding, and assessing young children, birth to age eight, in a variety of high quality preschool and primary settings. Practicum spans the entire semester. To be taken Pass/Fail only. Preq: ED EC 336; concurrent enrollment in ED EC 420, 430, 440, 450, and READ 459.
ED EC 420 Early Childhood Science 3(3,0) Students develop knowledge, skills, and attitudes needed to foster science education among young children. Emphasizes teaching strategies and techniques appropriate for young children (birth to age eight), understanding the unique learning needs of special populations, and integrating science across the curriculum. Preq: General Education requirements. Coreq: ED EC 400, 430, 440, 450, READ 459.
ED EC 430 Early Childhood Mathematics 3(3,0) Examination of theories and methods of teaching mathematics in terms of how young children develop mathematical thinking. Topics include problem solving, current issues, diversity, current technologies, reflective teaching, and applications of math in everyday life. Preq: General Education mathematics requirement; admission to the professional level. Coreq: ED EC 400, 420, READ 459.
ED EC 440 Integrated Language Arts and Social Studies in Primary Schools 3(3,0) Integrates social studies and language arts in a course that reflects recommended teaching practices for young children (birth to age eight). Uses language arts as an approach for teaching social studies content, techniques, and methods in primary schools. Preq: Admission to the professional level. Coreq: ED EC 400, 420, 430, READ 459.

ED EC 450 Early Childhood Curriculum 3(3,0) Constructivist approach is used to explore children's thinking as it influences curriculum design in early childhood. Analyzes the educational needs of the young child in the cognitive realm and examines the implementation of activities, experiences, and play-based program models. Preq: Admission to the professional level. Coreq: ED EC 400, 420, READ 459.

ED EC 484 Directed Teaching in Early Childhood Education 12(1,33) Supervised observation and teaching experiences in cooperation with nursery schools, kindergartens, and early elementary schools. Restricted to seniors or graduates who have completed prerequisite courses and have the cumulative grade-point ratio for graduation. Preq: ED EC 400, 450, ED EL 321, 488, READ 459; admission to the professional level; consent of area committee chair.

EAST ASIAN STUDIES
E AS 123 Introduction to China 3(3,0) Introduction to various aspects of Chinese civilization, including geography, ethnic groups, language, history, philosophy, religion, literature, arts, architecture, and social customs. All readings and discussions are in English.

ECONOMICS

ECON 200 Economic Concepts 3(3,0) One-semester survey of basic economic concepts that offers an overview of both microeconomics and macroeconomics. Not intended for business majors or other students seeking a comprehensive introduction to economic analysis and its applications. Credit will not be given to students who have received credit for ECON 211 or 212.

ECON 211, H211 Principles of Microeconomics 3(3,0) Introduction to economic reasoning and its application to the study of the behavior of consumers and business firms. Topics include market competition, monopoly, and oligopoly, international trade, and the impact of selected public policies. Intended as the first of a two-semester sequence in the foundations of economics.

ECON 212, H212 Principles of Macroeconomics 3(3,0) Continuation of ECON 211 in which fundamental economic principles are applied to the study of aggregate economic performance. Topics include the forces determining the rates of inflation, unemployment, and economic growth, with particular emphasis on the influence of fiscal and monetary policies through financial markets. Preq: ECON 211 or consent of instructor.

ECON 301 Economics of Labor 3(3,0) Introduces students to the economics of the labor market and labor relations. Considers the theories of wages and employment, determination, unemployment, investment in human capital, discrimination, and public policy toward the labor market. Also considers the role of labor unions. May not be used to satisfy requirements for a degree in Economics. Preq: ECON 211 or consent of instructor.

ECON 302 Money and Banking 3(3,0) Considers the function of money and banking in both the product and financial markets. Special emphasis is placed on monetary theory and current problems of monetary policy. May not be used to satisfy requirements for a degree in Economics. Preq: ECON 212 or consent of instructor.

ECON (MGT) 306 Managerial Economics 3(3,0) Uses tools of economic analysis in classifying problems in organizing and evaluating information, and in comparing alternative courses of action. Bridges the gap between economic theory and managerial practice. May be used to satisfy requirements for a degree in Economics. Preq: ECON 211 or consent of instructor.

ECON 307 Arbitration 3(3,0) Examines dispute settlement processes and机构. May be used to satisfy requirements for a degree in Economics. Preq: ECON 211 or consent of instructor.

ECON 309 Government and Business 3(3,0) Relationships between government and business, including among other topics, government efforts to enforce competition; to regulate public utilities; and to protect the special interest of laborers, farmers, and consumers. May not be used to satisfy requirements for a degree in Economics. Preq: ECON 211 or consent of instructor.

ECON 310 International Economy 3(3,0) Studies of the process of international commerce. Covers basic theory of trade and exchange rates, institutional and legal environment, current policy issues. Not open to students who have taken ECON 412. May not be used to satisfy requirements for a degree in Economics. Preq: ECON 211 and 212 or consent of instructor.

ECON 314, H314 Intermediate Microeconomics 3(3,0) Analytical study of basic concepts of value and distribution under alternative market conditions. Preq: ECON 211 or consent of instructor.

ECON 315, H315 Intermediate Macroeconomics 3(3,0) Macroeconomic problems of inflation and unemployment through the focus points. Includes statistics (measures of real output and the price level) and theory (covering the sources of short-run fluctuations and long-run growth). Analyzes appropriate public policies addressing these issues. Preq: ECON 212 or consent of instructor.

ECON 319 Environmental Economics 3(3,0) Study of the application of economic logic to issues surrounding environmental management and policy. Examines individual, firm, and collective decision making as well as the evolution of regulatory approaches for controlling environmental use. Preq: ECON 314.

ECON (E L E) 321 Economics of Innovation 3(3,0) Examines the nature of entrepreneurship and the contribution of innovation to economic growth. Investigates the organizational and institutional sources of innovation in different firms and different countries as well as the work of economic theorists concerning the role entrepreneurs play in bringing new products to market. Preq: ECON 306 or 314.

ECON 324 Economics and Sports 3(3,0) Economic analysis of sports teams, leagues, and institutions. Analyzes basic economic issues using sports data. May not be used to satisfy requirements for a degree in Economics. Credit will not be given to students who have completed ECON 426. Preq: Sophomore standing, ECON 211.

ECON 325 Personnel Economics 3(3,0) Study of various compensation and personnel practices firms employ. Explains when each of those practices should be followed to elicit the desired employee effort and labor force quality. Topics include piece-rate and time-rate systems, seniority-based incentive schemes, promotion contests, evaluation systems, mandaroy retirement, and up-or-out rules. Preq: ECON 211 or consent of instructor.

ECON 340 Behavioral Economics 3(3,0) Introduces the economic, sociological, and psychological aspects of decision making under uncertainty. Presents the psychology of prediction, intuitive prediction: biases and corrective procedures. Topics also include framing, choice with costly information, and social influences on individual behavior. Preq: ECON 211 or consent of instructor.

ECON 344 Economics of Institutions and Property Rights 3(3,0) Study of fundamental property rights structures and institutions in the capitalist economy and the arrangements that create incentives to produce and exchange. Preq: ECON 211 and 212.

ECON 350, H350 Moral and Ethical Aspects of a Market Economy 3(3,0) Can a market system produce results that are fundamentally just? Is justice possible without voluntary exchange? Applies both economic and philosophical analyses to these questions. Emphasizes the causes, consequences, and morality of the distribution of wealth and income in a free-market system. Preq: ECON 314 or consent of instructor.

ECON 360 Public Choice 3(3,0) Covers the economic approach to political activities and institutions. Topics include voting, voting rules, constitutions, political competition, political business cycles, vote trading, interest groups, bureaucrats, committees, legislators, executives, and judges. Designed for Economics and non-Economics majors and requires only basic skills in microeconomics. Preq: ECON 211 or consent of instructor.
ECON H390 Junior Honors Research 1(1,0)
Readings and research in conjunction with an approved economics course at the 300 or 400 level. Honors status required. May be repeated for a maximum of three credits.

ECON 397 Creative Inquiry—Economics 1 1-4(1-4,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of four credits.

ECON 401 Labor Market Analysis 3(3,0)
Develops the methods of economic analysis of labor markets. Requires students to apply these methods to problems of the labor market. Topics include labor demand and supply, human capital, occupational choice, compensating wage differentials, organizational wage structures and incentive systems, unemployment, and discrimination. Preq: ECON 314.

ECON 402 Law and Economics 3(3,0)
Application of economics to the law of property, torts, and contracts; regulation of markets, business organizations, and financial transactions; distribution of income and wealth; and criminal law. Preq: ECON 211 or consent of instructor.

ECON 404 Comparative Economic Systems 3(3,0)
Comparative analytical and historical study of the principal economic systems which have been important in the modern world including, among others, capitalism and socialism. Preq: ECON 314 or consent of instructor.

ECON 405, 605 Introduction to Econometrics 4(3,3)
Introduction to methods of quantitative analysis of economic data. Reviews basic statistical methods and probability distribution. Topics include data management using professional statistical software applications; multiple regression analysis; hypothesis testing under conditions of multicollinearity, heteroscedasticity, and serial correlation. Preq: ECON 211 and 212, MTHSC 108 or 207; EX ST 301 or MTHSC 301 or 309.

ECON 406, 606 Advanced Econometrics 3(3,0)
Reviews statistical inference using multiple regression (OLS) analysis and model specification. Topics include multicollinearity, heteroscedasticity, and serial correlation; two-staged least squares and instrumental variables models; simultaneous equations models; limited dependent variable models using maximum likelihood estimation and time-series analysis; and presentation of results in technical writing. Preq: ECON 405 or consent of instructor.

ECON 410, 610 Economic Development 3(3,0)
Consideration and analysis of economic and related problems of underdeveloped countries. Attention is given to national and international programs designed to accelerate solution of these problems. Preq: ECON 314 or consent of instructor.

ECON 411, 611 Economics of Education 3(3,0)
Analysis of economic issues related to education. The decision to invest in education, elementary and secondary school markets and reform, the market for college education, teacher labor markets, and education’s effects on economic growth and income distribution. Preq: ECON 314 or consent of instructor.

ECON 412 International Microeconomics 3(3,0)
Analysis of the essential aspects of international economic linkages. Discusses gains and redistributive effects of trade and the barriers to trade within the context of a variety of economic models. Also discusses the history of trade policy and the political economy of its determination. Preq: ECON 314 or consent of instructor.

ECON 413 International Macroeconomics 3(3,0)
Examination of macroeconomic linkages between an individual country and the rest of the world and how these linkages are affected by the choice of exchange rate regimes. Topics include the relation between domestic and foreign interest rates and exchange rates and the ability to pursue independent monetary policies. Preq: ECON 315.

ECON 419 Economics of Defense 3(3,0)
Examines the American defense establishment in terms of resources utilized, alternative uses, and the contribution to the national economy and scientific progress generated by resources in a defense use. Discusses economic problems inherent in shifting resources between defense and nondefense uses, and the development of alternative defense uses. Preq: ECON 314.

ECON 420 Public Sector Economics 3(3,0)
Study of the role of government and the proper functions and limitations of the market provision of goods and services by all levels of government and instruments of taxation are evaluated according to efficiency and equity criteria. Contemporary public sector issues are emphasized throughout. Preq: ECON 314 or consent of instructor.

ECON 422 Monetary Economics 3(3,0)
Intensive study of the role of monetary factors in economic change. Modern monetary theories and their empirical relevance for policy are developed against a background of monetary history and institutions. Preq: ECON 314 and 315 or consent of instructor.

ECON 423 Economics of Health 3(3,0)
Applies microeconomic theory to examine the demand for health services and medical care, the market for medical insurance, the behavior of physicians and hospitals, and the role of government in health-care provision and regulation. Preq: ECON 314.

ECON 424 Organization of Industries 3(3,0)
Empirical, historical, and theoretical analyses of market structure and concentration in American industry: the effects of oligopoly, monopoly, and cartelization upon price, output, and other policies of the firm; antitrust and other public policies and problems are studied. Preq: ECON 314 or consent of instructor.

ECON 425, 625 Antitrust Economics 3(3,0)
Analysis of the economic and legal issues created by the exercise of market power. The motivation and execution of government policy towards mergers, predatory conduct, and various restraints of trade are intensively examined. Preq: ECON 329 or 314 or consent of instructor.

ECON 426, H426, 626 Seminar in Sports Economics 3(3,0)
Economic analysis of sports teams, leagues, and institutions. Topics include antitrust issues, public funding of sports venues, labor relations, wagering markets, athlete compensation, and application of economic principles to sports settings. Empirical research project is cornerstone of course. Preq: ECON 314, 405; or consent of instructor.

ECON 428, 628 Cost-Benefit Analysis 3(3,0)
Develops techniques for the appraisal of public expenditure programs with particular emphasis on investment in infrastructure. Topics include choice of an appropriate discount rate and the calculation of social costs and benefits in the presence of market distortions. Preq: ECON 314 or consent of instructor.

ECON 430 Topics in Mathematical Economics 3(3,0)
Skills acquired in freshman mathematics are applied to selected topics in economic theory. Course is a good complement to ECON 314 and provides excellent preparation for 400-level courses in economics, especially ECON 405. May be taken concurrently with ECON 314. Preq: ECON 314, and MTHSC 108 or 207.

ECON 435 Family Economics 3(3,0)
Analysis of economic aspects of the family. Economics of marriage, divorce, fertility, public policies affecting the family, women's labor force participation, and the gender gap are studied using main economic theories and empirical studies. Preq: ECON 314 or consent of instructor.

ECON 440, 640 Game Theory 3(3,0)
Introduction to the formal analysis of strategic interaction among rational, self-interested rivals. Basic theoretical aspects of games are discussed and applied to such topics as bargaining, voting, auctions, and oligopoly. Preq: ECON 314 and MTHSC 106, or ECON 430, or consent of instructor.

ECON 455, 655 Applied Microeconomic Research 3(3,0)
Students conduct research in applied microeconomics. Topics vary according to student and professor interests. Students read papers in the literature, formulate their own economic hypotheses, and collect and analyze data to test those hypotheses. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: ECON 314 or consent of instructor.

ECON H491 Senior Honors Thesis Research 3(3,0)
Reading and research for the Senior Honors Thesis. Preq: ECON 314, 315, senior honors standing.

ECON H492 Senior Honors Thesis Writing 3(3,0) Writing and oral presentation of the Senior Honors Thesis. Preq: ECON H491.
ED 496 Independent Study 1-3(1-3,0) Research and writing on a selected economics topic chosen by the student. A written proposal must be approved by the instructor prior to the start of the semester. May be repeated for a maximum of six credits. Preq: ECON 314.

ED 479 Creative Inquiry—Economics II 1-3(1-3,0) Engages students in research projects selected by the Economics Department faculty. Research projects vary depending on faculty and student interest. May be repeated for a maximum of six credits. Preq: ECON 314 or consent of instructor.

ED 498, H498 Selected Topics in Economics 3(3,0) In-depth treatment of topics not covered fully in regular courses. Topics vary from year to year. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: ECON 314 and 315 or consent of instructor.

ED 499 Senior Seminar in Economics 1-3(1-3,0) Discussion of topics of current interest in economics. Students conduct directed research on a particular topic. Preq: Consent of instructor.

EDUCATION

Professor: W. R. Fisk, Chair; Lecturer: H. W. Millar

ED 105 Orientation to Education 1(1,0) Lectures and discussions on teaching. For a minimum of ten weeks, students spend one hour per week in schools, assisting teachers, observing, and tutoring individuals. Required of all students in approved teacher certification programs. To be taken Pass/Fail only.

ED 110 Introduction to Tutoring 1(1,0) Students develop and reinforce skills in tutoring and communication through use of techniques based in educational research. To be taken Pass/Fail only.

ED 111 Introduction to Supplemental Instruction 1(1,0) Students develop and reinforce interpersonal relationship skills in listmaking, decision making, communicating, group dynamics, leadership, assertiveness, time management, problem solving, and conflict resolution. To be taken Pass/Fail only.

ED 190 Leadership, Citizenship, and Community Service 3(3,0) Provides active learning opportunities for students to understand better the system of government, learn the mechanics of how leadership can influence education and other initiatives, and develop interpersonal skills that will assist them throughout their professional lives. Culminates with a service learning plan for the students' local community.

ED 197 Creative Inquiry—Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED 297 Creative Inquiry—Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED 322 Responding to Emergencies 3(2,1) Provides the citizen responder with the knowledge and skills necessary in a variety of emergencies to help sustain life and to minimize pain and the consequences of injury until professional help arrives. Includes first aid, CPR, and automated external defibrillation (AED).

ED 397 Creative Inquiry—Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED 405 Multiculturalism 3(3,0) Introduces prospective teachers to the influence of culture on learning from an anthropological and historical perspective. Preq: HIST 172, 173, or consent of instructor.

ED 438 Selected Topics in Education 1-3(1-3,0) Specific education topics not found in existing courses are selected for in-depth study. May be repeated for a maximum of six credits, but only if different topics are covered.

ED 439 Independent Study in Education 1-3(1-3,0) Study of selected topics in education under the direction of a faculty member chosen by the student. Student and faculty member develop a course of study different from any existing courses and design project for individual student. May be repeated for a maximum of six credits, but only if different topics are covered.

ED 441, 641 Middle School Curriculum 3(3,0) Concepts and methods for teaching middle school students. Discusses nature of middle school students, teacher characteristics, curricular and co-curricular programs, organization, and teaching.

ED 497 Creative Inquiry—Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED H499 Education Honors Capstone 3(1,4) Students seeking departmental honors complete research under faculty mentors. Seminar meetings occur across the semester and include the sharing and discussion of research results and experiences by students and faculty. Preq: ED F H301, H302, departmental honors course specified by major area.

EDUCATIONAL COUNSELING

ED C 199 Creative Inquiry—Counselor Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED C 234 Introduction to Addictions: Basic Education and Prevention 3(3,0) Basic review of addictions and chemical dependence. Gives future educators skills in the identification of chemical abuse, techniques for intervention, and methods of prevention education. SOC 396 and 397 are recommended as follow-up courses for those interested in pursuing the topic.

ED C 299 Creative Inquiry—Counselor Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED C 390 Student Development, Leadership, and Counseling for University Paraprofessionals 3(3,0) Introduction to theoretical and practical applications of student development and leadership on the university campus. Develops skills assisting students with leadership development, problem solving, conflict resolution, confrontation, and referral. Explores legal and ethical issues for practitioners and effective utilization of resources available on the campus.

ED C 399 Creative Inquiry—Counselor Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ED C 499 Creative Inquiry—Counselor Education 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

EDUCATIONAL FOUNDATIONS

Professors: D. E. Barrett, W. R. Fisk, Chair; R. P. Green, Jr., D. M. Switzer; Associate Professors: G. C. Delicio, C. L. Peters, C. G. Weatherford; Assistant Professors: L. B. Igo, S. N. Rosenblith; Lecturers: A. O. Baldwin, R. D. Visser

ED F 301, H301 Principles of American Education 3(3,0) Study of the legal basis, historical development, characteristics, and functions of educational institutions in the United States. Preq: ED 105 (or concurrent enrollment), 2.0 minimum grade-point ratio, or consent of instructor.
ED F 302, H302 Educational Psychology 3(3,0) Introduction to classroom use of objectives, motivation theories, learning theories, tests and measurements, classroom management, and knowledge of exceptional learners. Prq: ED F 105 (or concurrent enrollment), 2.0 minimum grade-point ratio, or consent of instructor.

ED F 308 Classroom Assessment 3(3,0) Introduction to classroom assessment and standardized testing. Prq: ED F 302.

ED F (CTE) 315 Technology Skills for Learning 1(0,2) Students develop technology skills, such as creating Web pages and multimedia presentations in the context of general education class requirements. Products developed are linked within the School of Education e-portfolio. Prq: Admission to a Teacher Education Program, ED F 105, or consent of instructor.

ED F 334, H334 Child Growth and Development 3(3,0) Introduction to lifespan development. Heavy emphasis is placed on the physical, social, emotional, and cognitive characteristics. Includes a minimum of five one-hour observation-participation visits to an elementary school. Prq: ED F 105 (or concurrent enrollment), 2.0 minimum grade-point ratio, or consent of instructor.

ED F 335, H335 Adolescent Growth and Development 3(3,0) Introduction to lifespan development. Emphasizes the physical, social, emotional, and cognitive characteristics of the 10- to 18-year old and the educational implications of those developmental characteristics. Prq: ED F 105 (or concurrent enrollment), 2.0 minimum grade-point ratio, or consent of instructor.

ED F 406 Philosophy, Schooling, and Educational Policy 3(3,0) Analysis of the development of contemporary educational theory and its impact on current schooling practices and educational policy development.

ED F 425 Instructional Technology Strategies 1(0,2) Helps future teachers learn to use technology effectively in support of content-area instruction. To be taken concurrently with either methods classes or during student teaching as directed by major. Prq: ED F (CTE) 315.

ED F (AG ED, CTE) 480, 680 Educational Applications of Microcomputers 3(2,2) Fundamentals of computer applications for teachers. Develops competencies in general computer applications such as word processing and database management and addresses educational uses of the Internet and computer-assisted instruction, with emphasis on legal and ethical issues and the impact of computer technology upon society. Prq: Admission to a Teacher Education Program.

ED F (AG ED, CTE) 482, 682 Advanced Educational Applications of Microcomputers 3(2,2) Provides students with the knowledge and skills needed to apply microcomputer technology to the utilization and generation of educational software in accordance with sound educational principles. Prq: ED F (AG ED, CTE) 480.

ED F 490, 690 Student Management and Discipline 3(3,0) Aids pre-service and in-service teacher development and refines knowledge, skills, and values important for managing students in school settings. Emphasizes practical application of theory and research and legal and ethical considerations. Prq: ED F 302 or FSCCH 201, ED F 334, 335, or suitable alternative; 2.0 minimum grade-point ratio.

ED F 497, 697 Instructional Media in the Classroom 3(3,0) Integrated approach to the use of audiovisual media stressing systematic planning, selection, utilization, and evaluation as well as production of materials and equipment operation. Prq: 2.0 minimum grade-point ratio.

ED F 499, 699 Student Management and Discipline 3(3,0) Aids pre-service and in-service teacher development and refines knowledge, skills, and values important for managing students in school settings. Emphasizes practical application of theory and research and legal and ethical considerations. Prq: ED F 302 or FSCCH 201, ED F 334, 335, or suitable alternative; 2.0 minimum grade-point ratio.

E C E 201, H201 Logic and Computing Devices I 3(2,2) Study of logic with an introduction to Boolean algebra; number systems and representation of information; use of integrated circuits to implement combinational and sequential logic functions and computing elements; and organization and structure of computing systems. Prq: MTHSC 108, PHYS 122.

E C E 204 Circuit Analysis Problems I 1(0,3) Analysis and solution of electrical network problems using mesh and nodal analysis, Thévenin’s and Norton’s theorems and equivalent circuits and other circuit analysis from E C E 202. Coreq: E C E 202.

E C E 211 Electrical Engineering Laboratory I 1(0,2) Principles of measurement and instruments used to measure parameters and dynamic variables in electric circuits, steady state and transient measurements in DC and AC circuits, and data analysis methods are included. Coreq: E C E 202.

E C E 212 Electrical Engineering Laboratory II 1(0,2) Emphasizes measurement techniques in AC steady-state circuits and comparison to theoretical predictions. Two-port network methodology and transfer functions are studied experimentally and related to analysis using transform techniques. Prq: E C E 202, 211. Coreq: E C E 262.

E C E 223 Computer Systems Engineering 3(3,0) Analysis of implementation techniques for systems software. Applying engineering principles including code reading to the design of data structures and algorithms for low level computer systems, embedded systems, and hardware/software systems. Includes coverage of address translation, memory management, file systems, and process management. Prq: E C E 222.

E C E 263 Circuit Analysis Problems II 1(0,3) Analysis of basic AC circuit analysis techniques to analyze the transient and steady-state behavior of both simple and complex circuits. Coreq: E C E 262, MTHSC 208.

E C E 272 Computer Organization 4(3,2) Introductory course in computer organization and architecture. Topics include basic hardware and software structure, addressing methods, programs control, processing units, I-O organization, arithmetic, main-memory organization, peripherals, microprocessor families, RISC architectures, and multiprocessors. Prq: E C E 201 and CP SC 101 or 117 or 157 or 210.

E C E 299 Creative Inquiry—Electrical and Computer Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

E C E 201, H201 Logic and Computing Devices I 3(2,2) Study of logic with an introduction to Boolean algebra; number systems and representation of information; use of integrated circuits to implement combinational and sequential logic functions and computing elements; and organization and structure of computing systems. Prq: MTHSC 108, PHYS 122.

E C E 204 Circuit Analysis Problems I 1(0,3) Analysis and solution of electrical network problems using mesh and nodal analysis, Thévenin’s and Norton’s theorems and equivalent circuits and other circuit analysis from E C E 202. Coreq: E C E 202.

E C E 211 Electrical Engineering Laboratory I 1(0,2) Principles of measurement and instruments used to measure parameters and dynamic variables in electric circuits, steady state and transient measurements in DC and AC circuits, and data analysis methods are included. Coreq: E C E 202.

E C E 212 Electrical Engineering Laboratory II 1(0,2) Emphasizes measurement techniques in AC steady-state circuits and comparison to theoretical predictions. Two-port network methodology and transfer functions are studied experimentally and related to analysis using transform techniques. Prq: E C E 202, 211. Coreq: E C E 262.

E C E 223 Computer Systems Engineering 3(3,0) Analysis of implementation techniques for systems software. Applying engineering principles including code reading to the design of data structures and algorithms for low level computer systems, embedded systems, and hardware/software systems. Includes coverage of address translation, memory management, file systems, and process management. Prq: E C E 222.

E C E 263 Circuit Analysis Problems II 1(0,3) Analysis of basic AC circuit analysis techniques to analyze the transient and steady-state behavior of both simple and complex circuits. Coreq: E C E 262, MTHSC 208.

E C E 272 Computer Organization 4(3,2) Introductory course in computer organization and architecture. Topics include basic hardware and software structure, addressing methods, programs control, processing units, I-O organization, arithmetic, main-memory organization, peripherals, microprocessor families, RISC architectures, and multiprocessors. Prq: E C E 201 and CP SC 101 or 117 or 157 or 210.

E C E 299 Creative Inquiry—Electrical and Computer Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

E C E H300 Junior Honors Seminar 1(2,0) Acquaints students enrolled in the Departmental Honors Program with current research activities in the Department. Faculty provide seminars where research interests are summarized. Seminars are planned to prepare students in choosing research topics for their senior theses.

E C E 308 Electronics and Electromechanics 2(2,0) Continuation of E C E 307. Energy conversion systems are considered, as well as basic electronics. Preq: E C E 307.

E C E 309 Electrical Engineering Laboratory I 1(0,2) Laboratory to accompany E C E 307. Basic electrical circuits and instrumentation. Coreq: E C E 307.

E C E 311 Electrical Engineering Laboratory III 1(0,2) Measurements and characteristics of electronic devices and circuits; use of manual and automated instruments to acquire data; oral and written engineering reports. Preq: E C E 262, MTHSC 208, PHYS 221. Coreq: E C E 320.

E C E 312 Electrical Engineering Laboratory IV 1(0,2) Design and characterization of functional circuits using solid-state devices; use of manual and automated instruments for measurements; statistical analysis of data; preparation of engineering reports. Preq: E C E 311, 320, Coreq: E C E 321.

E C E 320 Electronics I 3(3,0) Introduction to electronic materials and devices; principles of design; design of DC and AC circuits using diodes, bipolar junction transistors, field-effect transistors and use of transistors in digital circuits. Preq: E C E 262, MTHSC 208, PHYS 221. Coreq: E C E 311.

E C E 321 Electronics II 3(3,0) Analysis and design of discrete amplifier circuits at low and high frequencies; operational amplifiers, distortion in amplifiers, oscillator design, and circuit analysis of active digital devices. Preq: E C E 320. Coreq: E C E 312.

E C E 327 Digital Computer Design 3(3,0) Design of high-speed ALUs, control and timing circuitry, memory systems and I/O circuitry; microprogrammed computer design using soft-slice microprocessors; current hardware topics related to computer design; hands-on design experience and use of logic analyzer for system debugging. Preq: E C E 371.

E C E 329 Computer Systems Structures 3(3,0) Fundamental structures and issues that arise in the analysis and implementation of computer systems. Topics include operating systems structures and data structures and their relationship to computer organization. Engineering science background for computer systems design. Preq: E C E 223, 272.

E C E 352 Programming Systems 3(3,0) Second course in programming languages and systems. Topics include assemblers, compilers, and syntactical methods; string manipulation and list processing; concepts of executable programs and operating systems; introduction to time-sharing systems. Preq: E C E 223. Coreq: MTHSC 419.

E C E 360 Electric Power Engineering 3(3,0) Presents the basic principles of electromagnetic induction and electromagnetic forces developed. Topics include synchronous machines, power transformers, electric power transmission, and distribution systems, DC motors, and induction motors. Preq: E C E 262, PHYS 221.

E C E 371 Microcomputer Interfacing 4(1-3,1-3) Interfacing of microcomputers to peripherals or other computers for purposes of data acquisition, device monitoring and control, and other communications. The interfacing problem is considered at all levels including computer architecture, logic, timing, loading, protocols, and software laboratory for building and simulating designs. Preq: E C E 262, 272. Coreq: E C E 320.

E C E 380 Electromagnetics 3(3,0) Introduction to electric fields and potentials, dielectrics, capacitance, resistance, magnetic field, forces, work and energy, inductance, time-varying fields, and Maxwell’s equations. Preq: E C E 262, MTHSC 206, PHYS 221.

E C E 399 Creative Inquiry—Electrical and Computer Engineering I 4(1-3,1-3) In consultation with and under the direction of a faculty mentor, students pursue seminal activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits. Preq: E C E 444, 604.

E C E 403 Monolithic Circuit Design 3(3,0) Consideration of the basic principles of operation, external characteristics, and applications of some of the most important semiconductor devices presently available. Preq: E C E 320, MTHSC 311 or 434.

E C E 405 Design Projects in Electrical and Computer Engineering 1-3(0,2-6) Individually directed projects oriented toward providing experience in establishment of objectives and criteria, synthesis, analysis, construction, testing, and evaluation. Develops student creativity through the solution of open-ended problems. Includes individual instruction in design methodology. May be repeated for a maximum of three credits. Preq: E C E 330 or 409, consent of project supervisor.

E C E 409 Continuous and Discrete Systems Design 3(3,0) Introduction to classical linear control systems. Topics include continuous and discrete descriptions of systems, time and frequency response, stability, system specification, system design of continuous and discrete systems. Preq: E C E 330. Coreq: E C E 495.

E C E 410, 610 Modern Control Theory 3(3,0) Introduction to modern control theory. Topics include fundamentals of matrix algebra, state space analysis and design, nonlinear systems and optimal control. Preq: E C E 409.

E C E 412 Electrical Machines Laboratory I 0(0,2) Selected experiments to familiarize students with characteristics of transformers, DC and AC motors and generators. Measurement techniques and component modeling are included. Coreq: MTHSC 434 or consent of instructor. Preq or Coreq: E C E 360 or 419.

E C E 417, 617 Elements of Software Engineering 3(3,0) Foundations of software design, reasoning about software, the calculus of programs, survey of formal specification techniques and design languages. Preq: E C E 329, 352, MTHSC 419.

E C E 418, 618 Power System Analysis 3(3,0) Study of power system planning and operational problems. Topics include load flow, economic dispatch, fault studies, transient stability, and control of problems. System modeling and computer simulations are emphasized through class projects. Preq: E C E 360, 380.

E C E 419, 619 Electric Machines and Drives 3(3,0) Performance, characteristics, and modeling of AC and DC machines during steady-state and transient conditions. Introduction to power electronics devices and their use in adjustable speed motor drives. Preq: E C E 321, 360, 380. Coreq: MTHSC 434 or consent of instructor.

E C E 422, 622 Electronic System Design I 3(2,2) Emphasizes the application of theory and skills to the design, building, and testing of an electronic system with both analog and digital components. Application varies each semester. Computer software tools are used extensively in the design process. Preq: E C E 321, 330, 360, 371, 381.

E C E 427 Communications Systems 3(3,0) Study of communication systems design and analysis. Topics include signals and spectra, baseband signaling and detection in noise, digital and analog modulation and demodulation techniques, communications link budget analysis. Preq: E C E 317, 330.

E C E 429, 629 Organization of Computers 3(3,0) Computer organization and architecture. Topics include a review of logic circuits, bus structures, memory organization, interrupt structures, arithmetic units, input-output structures, state generation, central processor organization, control function implementation, and data communication. Registered Transfer Language (RTL) for description and design of digital systems. Preq: E C E 272 or consent of instructor.

E C E 430, 630 Digital Communications 3(3,0) Study of digital communication systems. Topics include error-control coding, synchronization, multiple-access techniques, spread spectrum signaling, and fading channels. Preq: E C E 427.
ECE 431, 631 Digital Electronics 3(2,2) Consider-ters electronic devices and circuits of importance to digital computer operation and to other areas of electrical engineering. Topics include active and passive waveshaping, waveform generation, memory elements, switching, and logic circuits. Experimentation with various types of circuits is provided by laboratory projects. Preq: ECE 321. Coreq: MTHSC 311 or 434.

ECE 432, 632 Instrumentation 3(3,0) Theory and analysis of transducers and related circuits and instrumentation. Generalized configurations and performance characteristics of instruments are considered. Transducer devices for measuring physical parameters such as motion, force, torque, pressure, flow, and temperature are discussed. Preq: ECE 321. Coreq: MTHSC 311 or 434.

ECE 436, 636 Microwave Circuits 3(3,0) Analysis of microwave networks comprising transmission lines, waveguides, passive elements, interconnects, and active solid state microwave circuits. Use of modern CAD tools to design RF/Microwave passive/active networks. Fabrication of typical circuits. Preq: ECE 381 or equivalent. Coreq: MTHSC 311 or 434.

ECE 438, 638 Computer Communications 3(3,0) Digital data transmission techniques, modems and communications channels, communications software and protocols, multiprocessors and distributed processing; concurrency and cooperation of dispersed processors. Preq: Senior standing in Electrical or Computer Engineering or Computer Science or consent of instructor.

ECE 439, 639 Fiber Optics 3(3,0) Covers the underlying principles of design for optical fibers in practical systems. Examines optical fiber as a wave-guide using wave optics and ray optics. Discusses design criteria for using mono- and multimode fibers. Other topics include fabrication, measurement. Preq: ECE 381. Coreq: MTHSC 434 or consent of instructor.

ECE 442, 642 Knowledge Engineering 3(3,0) Introduction to the theoretical and practical aspects of knowledge engineering and applied artificial intelligence. Topics include symbolic representation structures and manipulation, unification, production systems and structures, rule-based and expert systems, planning and AI system architectures; system design in PROLOG and LISP. Project is required. Preq: ECE 329, 352.

ECE 446, 646 Antennas and Propagation 3(3,0) Study of the theoretical and practical aspects of antenna design and utilization, input impedances, structural considerations, and wave propagation. Preq: ECE 330, 381 or 436, MTHSC 311 or 434.

ECE 449, 649 Computer Network Security 3(1,4) Hands-on practicum in the administration and security of modern network service emphasizing intrusion prevention techniques, detection, and recovery. Preq: Senior standing in Computer Engineering.

ECE 453 Software Practicum 3(1,6) Students design and implement a software system that satisfies both a requirements and specifications document. The resulting system is tested for compliance. Preq: ECE 329, 352.

ECE 455, 655 Robot Manipulators 3(3,0) Analysis of robot manipulator systems with special focus on interaction of these technologies with society. Emphasis is on rigid-link robot manipulator systems. Topics include history of robot technology, kinematics, dynamics, control, and operator interfaces. Case studies reinforce impact of robot technology on society and vice versa. Preq: MTHSC 206, 311, or consent of instructor.

ECE (ME) 456, 656 Fundamentals of Robotics 3(3,0) See MCE 456.

ECE 459, 659 Integrated Circuit Design 3(2,2) Design concepts and factors influencing the choice of technology: fundamental MOS device design; silicon foundaries, custom and semi-custom integrated circuits; computer-aided design software/hardware trends and future developments; hands-on use of CAD tools to design standard library cells; systems design considerations, testing, and packaging. Preq: ECE 321 Coreq: MTHSC 311 or 434.

ECE 460 Computer-Aided Analysis and Design 3(3,0) Principles and methods suited to the solution of engineering problems on the digital computer. Topics include widely used methods for the solution of systems of algebraic and/or differential equations which arise in modeling of engineering systems; data approximation and curve fitting; continuous systems simulation languages and design-oriented programming systems. Preq: ECE 262, MTHSC 311, 434, or consent of instructor.

ECE 467, 667 Introduction to Digital Signal Processing 3(3,0) Introduction to characteristics, design, and applications of discrete time systems; design of digital filters; introduction to the Fast Fourier Transform (FFT); LSI hardware for signal processing applications. Preq: ECE 330.

ECE 468, 668 Embedded Computing 3(2,2) Principles of using computing in the larger context of a system. Topics include bus and processor design types (e.g. microprocessor, microcontroller, DSP), codecs, digital circuit power management, real time scheduling, and embedded operating systems. Lab work consists of projects on embedded hardware (e.g. PC-104+). Preq: CP SC 212 and ECE 371 or consent of instructor.

ECE E H491 Undergraduate Honors Research 1-6 Individual research projects conducted under the direct supervision and guidance of a faculty member. May be repeated for a maximum of six credits.

ECE 492, 692 Special Problems 1-3 Special assignment in electrical or computer engineering. Some typical assignments include computer programs, term papers, technical literature searches, hardware projects, and design project leadership. May be taken only once for credit.

ECE 493, 693 Selected Topics 1-3(1-3,0) Classroom study of current and new technical developments in electrical and computer engineering. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

ECE 495 Integrated System Design I 2(1,3) Considers engineering design of systems in a continuous process of project definition, planning, execution, and evaluation. This process includes consideration of both technical and non-technical factors in design. Strong emphasis is placed on the development of effective technical communications skills, particularly oral communications competency. Preq: ECE 321, 330, 360, 371, 381 (three of which must have been completed prior to enrollment, with the remaining taken as corequisite courses). Coreq: ECE 409 (in addition to any deficit courses in the prerequisites).

ECE 496 Integrated System Design II 2(0,6) Project-oriented course which brings together electrical engineering students of dissimilar training into teams or project groups. Group assignments are made which are designed to develop an appreciation for individual and creative thinking as well as team effort. Preq: ECE 321, 330, 360, 371, 381, 409, 495.

ECE 499 Creative Inquiry—Electrical and Computer Engineering 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

ELEMENTARY EDUCATION

Professor: D. P. Reinking; Associate Professors: C. C. Linnell, A. Smith; Assistant Professors: C. O. Dean, D. B. Fleming, M. J. Spearman, R. D. Washington; Clinical Faculty: W. L. Calvert, R. A. Kaminski; Lecturers: W. E. Holton, R. J. Jones, J. C. Wright; Visiting Lecturers: S. Sanders

ED EL 304 Instructional Planning, Management, and Communications 3(3,0) Provides students with knowledge and techniques for short- and long-term planning of developmentally appropriate lessons. Students learn how to structure ADEPT lessons and activities to meet the needs of students. Students learn techniques for time and behavior management, organization, and effective communication with school audiences. Preq: ED F 334, admission to the professional level.

ED EL 311 Teaching Diverse Populations 3(3,0) Preservice teachers examine the role of teachers as they relate to culturally appropriate curricula, instruction, and evaluation. Preq: Admission to the professional level.

ED EL 321 Physical Education Methods for Classroom Teachers 3(3,0) Provides education majors with a basic understanding of the methods and techniques utilized in teaching elementary physical education. Emphasizes acquiring a basic understanding of the movement education approach and the ability to teach integrated lessons utilizing this approach. Preq: Junior standing, admission to the professional level.
Courses of Instruction

ED EL 401 Elementary Field Experience 3(0,9)
Practical classroom experience prior to the student teaching semester for Elementary Education majors. For a twelve-week period, students spend two hours per week in schools observing, tutoring individuals, conducting small group activities, and teaching the class. To be taken Pass/Fail only. Prereq.: ED F 334; concurrent enrollment in ED EL 488 and READ 460; admission to the professional level.

ED EL 451 Elementary Methods in Science Teaching 3(2,3)
Development of process skills, technical skills, and attitudes needed to foster increased confidence and commitment to the teaching of elementary science, with emphasis on teaching strategies and techniques and their implications for what we know of how children learn science. Prereq.: Elementary Education science requirements; concurrent enrollment in ED EL 401, 487, 488 and READ 460; admission to the professional level.

ED EL 452 Elementary Methods in Mathematics Teaching 3(2,3)
Special emphasis is given to the development of understanding, skills, and attitudes in the elementary curriculum with focus on strategies, techniques, and materials for teaching elementary mathematics. Prereq.: General Education mathematics requirements; admission to the professional level.

ED EL 458 Health Education Methods for the Classroom Teacher 3(3,0)
Study of the content, methodology, and resource materials necessary for teaching comprehensive health education in public schools. Emphasizes the National Health Education Standards and the health behaviors of youth that are allied with the Coordinated School Health Program. Prereq.: Minimum grade point ratio of 2.0.

ED EL 481 Directed Teaching in the Elementary School 12(1,33)
Supervised observation and teaching experiences in cooperation with selected elementary schools. Restricted to seniors or graduates who have completed prerequisite courses. Prereq.: ED EL 321, 401, 451, 452, 487, 488, READ 460; admission to the professional level; consent of area committee chair.

ED EL 487 Elementary Methods in Social Studies Teaching 3(2,3)
Introduction to methods, materials, and techniques needed to teach social studies in the elementary schools. Prereq.: HIST 101, 102, 172, or 173; GEOG 101 or 103; concurrent enrollment in ED EL 401, 451, 452, 488 (for Elementary majors) and READ 461; admission to the professional level; consent of instructor.

ED EL 488 Elementary Methods in Language Arts Teaching 3(2,3)
Introduction for pre-service teachers to the skills of the language arts other than reading and the methods, materials, and techniques needed to teach these skills to students in the elementary school. Prereq.: ENGL 385; concurrent enrollment in ED EL 401, 451, 452, 487, READ 461 (for Elementary majors); admission to the professional level or consent of instructor.

ENGINEERING

Professor: B. L. Sill, Director; Associate Professor: W. J. Park; Assistant Professor: L. C. Benson; Senior Lecturer: E. A. Stephan; Lecturers: D. R. Bowman, S. C. Brandon

ENGR 101 Introduction to Engineering 1(0,2)
Introduction to the engineering profession and engineering disciplines for the purpose of assisting students in their selection of an engineering major. Professional ethics, technical communications, word processing, and electronic communications are taught. Credit toward a degree will be given for only one of ENGR 101 or CES 101.

ENGR 110 Engineering Problems Workshop 1(0,2)
Workshop devoted to the analysis and solution of engineering-oriented problems. Representative problems taken from the different fields of engineering are used to illustrate such analytical and problem-solving techniques as estimation and approximation, numerical aids to computation, and solutions by graphical methods.

ENGR 120, H120 Engineering Problem Solving and Design 3(1,4)
Methodology and practice of engineering problem solving and engineering design. Selected computer tools, frameworks and communication modes are employed. Ethical, safety, economics, and environmental concerns are considered. Prereq.: ENGR 101, MTHSC 106 Coreq.: PHYS 122.

ENGR 130 Engineering Fundamentals 2(1,2)
Topics include dimensional analysis, statistics, advanced spreadsheets, graphical techniques, instrumentation used in solving problems, and graphical representation of various physical phenomena. Oral and written presentations are required. Credit toward a degree will be given for only one of ENGR 130 or 114. Coreq.: C E S 101 or 102, and MTHSC 106.

ENGR 141 Programming and Problem Solving 3(2,2)
Students formulate and solve problems using MATLAB; estimate answers for comparisons of computer-generated solutions; read, interpret, and write programs, instructions, and output; iterate, evaluate conditional statements, and debug; and analyze data using laptop-based instrumentation. Credit toward a degree will be given for only one of ENGR 130 or 141. Coreq.: C E S 101 or 102, and MTHSC 106.

ENGR 150 Introduction to Materials 1(1,0)
Introduction to materials used in modern technology. Different materials (metals, ceramics, and polymers) and different forms (bulk, fibers, gels, thin films, etc.) are discussed in the context of their application to consumer products, structural composites, refractories, biomedical implants, and electronic and optical materials. Prereq.: Enrollment in General Engineering or consent of instructor.

ENGR 180 Computers in Engineering 3(2,3)
Introduction to the use of computers in engineering analysis, design, and communications. A high-level programming language and other software are used on microcomputers. Prereq.: Engineering major; knowledge of a computer language. Coreq.: MTHSC 106.

ENGR 190, H190 Special Projects in Engineering 1-3(1-3,0)
Individual or group projects in engineering. Projects may be interdisciplinary in nature and may involve analysis, design, and/or implementation. Instruction in use of necessary tools and test equipment is included when appropriate. May be repeated for a maximum of six credits. Prereq.: Consent of instructor.

ENGR 290, H290 Special Projects in Engineering II 1-3(1-3,0)
Individual or group projects in engineering. Projects may be interdisciplinary in nature and may involve analysis, design, and/or implementation. Instruction in use of necessary tools and test equipment is included when appropriate. May be repeated for a maximum of six credits. Prereq.: Consent of instructor.

ENGR 390, H390 Special Projects in Engineering III 1-3(1-3,0)
Individual or group projects in engineering. Projects may be interdisciplinary in nature and may involve analysis, design, and/or implementation. Instruction in use of necessary tools and test equipment is included when appropriate. May be repeated for a maximum of six credits. Prereq.: Senior standing and consent of instructor.

ENGR 490, H490 Special Projects in Engineering IV 1-3(1-3,0)
Individual or group projects in engineering. Projects may be interdisciplinary in nature and may involve analysis, design, and/or implementation. Instruction in use of necessary tools and test equipment is included when appropriate. May be repeated for a maximum of six credits. Prereq.: Senior standing and consent of instructor.

ENGINEERING GRAPHICS

Senior Lecturer: R. A. Emert; Lecturer: N. Yasmin

E G 208 Engineering Graphics with Computer Applications 2(1,3)
Introduction to engineering graphics principles for mechanical engineers. Sketching and CAD tools are used to visualize, communicate, and perform graphical analysis of mechanical engineering problems. Credit toward a degree will be given for only one of E G 208, 209, or 210. Coreq.: ENGR 130 or 141.

E G 209 Introduction to Engineering/Computer Graphics 2(1,3)
Introduction to engineering graphics principles. Sketching and CAD tools are used to visualize, communicate, and perform graphical analysis of engineering problems. Credit toward a degree will be given for only one of E G 208, 209, or 210. Coreq.: ENGR 130 or 141.

E G 210 Engineering Graphics for Civil Engineering 2(1,3)
Introduction to engineering graphics principles for civil engineers. Sketching and CAD tools are used to visualize, communicate, and perform graphical analysis of civil engineering problems. Credit toward a degree will be given for only one of E G 208, 209, or 210. Coreq.: ENGR 130 or 141.

E G 412, 612 Interactive Computer Graphics 3(3,0)
Graphics hardware and display technology; reduction and presentation of engineering data; techniques of geometrical transformations, perspective, and model manipulation; methodology of computer-aided design; application of higher-level software to engineering problems. Prereq.: EG 208 and MTHSC 208 or consent of instructor.
ENGL 101, H103 Accelerated Composition 3(3,1) Training in composing correct and effective expository and argumentative essays, including writing documented essays. Students placed in ENGL 103 receive credit for ENGL 101 after completing ENGL 103 with a C or better. Students who have received credit for ENGL 102 will not be allowed to enroll in or receive credit for ENGL 103. Prq: Satisfactory score on departmental placement exam.

ENGL 111 English as a Second Language 3(3,2) Special course for students learning English as a second language. Intensive study and drill in American English pronunciation and listening comprehension. Required of all foreign students who do not make a satisfactory grade on screening examination in oral English. To be taken Pass/Fail only. Carries no credit for graduation.

ENGL 190 Introduction to the English Major 2(2,0) Orientation to the English major as a discipline and as a preparation for a range of careers. Introduction to the digital portfolio and place to collect, synthesize, and reflect on learning. Required of English majors, recommended for minors.

ENGL 202, H202 The Major Forms of Literature 3(3,0) Study of the basic structures and elements of fiction, poetry, and drama, including literary and critical theory, with readings in American, British, and world literature. Proficiency in composition must be demonstrated. Prq: ENGL 102.

ENGL H210 Introduction to Literary Study 3(3,0) Literary analysis and composition course for honors students who have excelled ENGL 101 and 102. Reading in American, English, and world literature and advanced training in writing and research. Prq: Exemption from ENGL 101 and 102 assessment or consent of instructor.

ENGL 231 Introduction to the Writing and Publication Studies Major 3(3,0) Introduces the Writing and Publication Studies major and provides an overview of courses, possible writing interests within the major, and career possibilities. Students gain an understanding of the importance of theory, close reading, textual analysis, and research methodologies. Faculty representing various writing specialties present to students. Prq: ENGL 102.

ENGL 212, H212 World Literature 3(3,0) Introduction to selected works in continental European literature in translation from Homer to the modern era, together with some Asian classics, with emphasis on major authors. Prq: ENGL 102 or 103.

ENGL 213, H213 British Literature 3(3,0) Introduction to selected authors and major periods of the British literature tradition, from the Middle Ages to World War II, with attention to poetry, fiction, and drama. Prq: ENGL 102 or 103.

ENGL 214, H214 American Literature 3(3,0) Introduction to selected authors and major periods of the American literary tradition from 1620 to 1945. Prq: ENGL 102 or 103.

ENGL 215, H215 Literature in 20th- and 21st-Century Contexts 3(3,0) Introduction to major contemporary cultural movements via selected authors in 20th- and 21st-century literature, primarily American and British, with attention to poetry, fiction, and drama since World War II. Prq: ENGL 102 or 103.

ENGL 217 Vocabulary Building 3(3,0) Development of a useful discriminating vocabulary for writing, speaking, and reading. Student notebooks and proficiency quizzes. Prq: ENGL 103.

ENGL 231 Introduction to Journalism 3(3,0) Instruction and practice in writing for mass media; editorial responsibilities. Prq: ENGL 103.

ENGL 265 Introduction to Editing 3(3,0) Introduction to the practice of editing texts. Includes instruction in the principles and symbols of copy-editing and proof-reading as well as work with electronic editing tools. Also addresses editor's role in different types of editing, including copy-editing, comprehensive editing, and developmental editing for paper and electronic publication.

ENGL (G W) 301, H301 Great Books of the Western World 3(3,0) See G W 301.

ENGL 304 Business Writing 3(3,0) Introduction to audience, context, purpose, and writing strategies for texts common in professional business settings: memoranda, letters, reports, and proposals. Includes individual and team projects. Prq: Junior standing.

ENGL 310 Critical Writing About Literature 3(3,0) Terms and techniques for literary analysis, including close reading, vocabulary for analysis, research and writing skills, casebook study of critical approaches. Discussion of poetry and genres preferred. Prq: Sophomore literature (or concurrent enrollment) or consent of instructor.

ENGL 312 Advanced Composition 3(3,0) Workshop in practical writing focusing on principles and style. Prq: Sophomore literature or consent of instructor.

ENGL 314, H314 Technical Writing 3(3,0) Intensive, project-based application of principles of audience, context, purpose, and writing strategies of technical writing; proposals, reports, communication deliverables. Individual and team projects. Prq: Junior standing.

ENGL 316 Writing and International Trade 3(3,0) Students complete projects demanding a variety of communications skills that professionals in international trade need; sensitivity to foreign audiences and cultures in oral and written communication, electronic and graphic communication, collaborative writing and management. Prq: Sophomore literature.

ENGL 332 Visual Communication 3(3,0) Hands-on survey of visual communication theories and practices used by technical communicators in business and industry environments. Class meets regularly in computer classrooms. Prq: Sophomore literature; ENGL 211 or consent of instructor.

ENGL 333 Reporting for the News Media 3(3,0) Practical experience in gathering and writing news and feature copy for the media, concentrating on print journalism; examination of the role of the modern journalist; laws governing the profession; journalistic ethics. Prq: ENGL 231 or consent of instructor.
ENGL 334 Feature Writing 3(3,0) Practical experience in writing feature articles for newspapers, magazines, and free-lance markets. Preq: ENGL 231 or consent of instructor.

ENGL 335 Editing for Newspapers 3(3,0) Examination of the editing process of newspapers and magazines. Practical experience in article selection, copy-editing, headline writing, and page design. Preq: ENGL 231 or consent of instructor.

ENGL 345 The Structure of Fiction 3(3,0) Introduction to the creative writing and critical study of prose fiction. Preq: ENGL 310 or consent of instructor.

ENGL 346 The Structure of Poetry 3(3,0) Introduction to the creative writing and critical study of poetry. Preq: ENGL 310 or consent of instructor.

ENGL (THEA) 347 The Structure of Drama 3(3,0) See THEA 347.

ENGL 348 The Structure of the Screenplay 3(3,0) Introduction to the creative writing and critical study of the screenplay. Screenplays vary from semester to semester. May be repeated once for credit with consent of instructor. Preq: ENGL 310 or consent of instructor.

ENGL 349 Technology and the Popular Imagination 3(3,0) Examines relationship between technology and fiction and creative nonfictional texts, including print, film, and electronic media. Preq: Sophomore literature or consent of instructor.

ENGL 350 Mythology 3(3,0) Study of the great myths of the world emphasizing their applications to literature. Preq: Sophomore literature or consent of instructor.

ENGL 353 Ethnic American Literature 3(3,0) Critical examination of essays, poetry, fiction, and drama written by members of a variety of American racial and ethnic groups, such as Native Americans, African Americans, Chicano/Mexican Americans, Asian Americans, Italian Americans, and American Jews. Preq: Sophomore literature or consent of instructor.

ENGL 355 Popular Culture 3(3,0) Examination of the nature, functions, history, and impact upon American society of best sellers, popular magazines, television, movies, and other like phenomena. Preq: Sophomore literature or consent of instructor.

ENGL 356 Science Fiction 3(3,0) Readings in science fiction from the 17th century to the present, with special emphasis on writers since Verne and Wells. Preq: Sophomore literature or consent of instructor.

ENGL 357 Film 3(2,3) Examination of the film medium as an art form: its history, how films are made, why certain types of films (western, horror movies, etc.) have become popular, and how critical theories provide standards for judging film. Preq: Sophomore literature or consent of instructor.

ENGL 359 Special Topics in Language, Literature, Rhetoric, or Culture 3(3,0) Studies in varied topics not central to other English courses, such as language and art/business/sports; language and style; Black literature. Specific titles and course descriptions to be announced from semester to semester. May be repeated for a maximum of six credits with department chair’s consent. Preq: Sophomore literature or consent of instructor.

ENGL H367 Special Topics for Honors Students 3(3,0) Varied topics of general interest in literature, language, rhetoric, or culture for all honors students. Specific topics announced each semester. May be repeated for a maximum of nine credits. Preq: Sophomore literature or consent of instructor.

ENGL 380 British and American Women Writers 3(3,0) Poetry, drama, fiction, and prose by established and little-known women writers in Britain and America. Particular attention to works treating themes and issues concerning women’s lives. Readings on such topics as women and work, education, religion, creativity. Preq: Sophomore literature or consent of instructor.

ENGL 385 Children’s Literature 3(3,0) Reading and analysis in a wide range of authors, illustrators, and genres appropriate for children from preschool through eighth grade, classic as well as modern. Critical approaches include historical, thematic, and social. Preq: Sophomore literature or consent of instructor.

ENGL 386 Adolescent Literature 3(3,0) Reading and analysis of literature written for readers age 12–18. Emphasis is on historical context, child themes and motifs, and censorship issues as well as connections with classic literature. Preq: Sophomore literature or consent of instructor.

ENGL 387 Book History 3(3,0) Examines the material and theoretical constructions of the book. Covers both historical and contemporary dimensions of dissemination, reception, artistry, and influence of books. Preq: ENGL 103.

ENGL 399 ElectronicPortfolios Studio 1(1,0) Studio course to enable students to complete their electronic portfolios. Preq: ENGL 200, 310 (or concurrent enrollment).

ENGL 396 British Literature Survey I 3(3,0) Examines key texts of British literature to 1789. Preq: Sophomore literature or consent of instructor.

ENGL 397 British Literature Survey II 3(3,0) Examines key texts of British literature from 1789 to the present. Preq: Sophomore literature or consent of instructor.

ENGL 398 American Literature Survey I 3(3,0) Examines key texts of American literature from beginnings of European settlement to the Civil War in historical context. Preq: Sophomore literature or consent of instructor.

ENGL 399 American Literature Survey II 3(3,0) Examines key texts of American literature from the Civil War to the present in historical context. Preq: Sophomore literature or consent of instructor.

ENGL 400, 600 The English Language 3(3,0) Studies in English usage and historical development of the language. Preq: ENGL 310 or consent of instructor.

ENGL 401, 601 Grammar Survey 3(3,0) Survey of modern grammars with a focus on exploring the impact structural grammar has had on traditional grammar. Recommended for English teachers. Preq: ENGL 310 or consent of instructor.

ENGL 403 The Classics in Translation 3(3,0) Examination of Homer’s Iliad and Odyssey, Virgil’s Aeneid, and Ovid’s Metamorphoses. A few shorter works by other Greek and Roman writers may also be read. Preq: ENGL 310 or consent of instructor.

ENGL 407, 607 The Medieval Period 3(3,0) Selected works of Old and Middle English literature, exclusive of Chaucer. Preq: ENGL 310 or consent of instructor.

ENGL 408, 608 Chaucer 3(3,0) Selected readings in Middle English from The Canterbury Tales and other works by Chaucer. Preq: ENGL 310 or consent of instructor.

ENGL 410, 610 Drama of English Renaissance 3(3,0) Selected readings in non-Shakespearean dramatic literature of the 16th and 17th centuries. Preq: ENGL 310 or consent of instructor.

ENGL 411, 611 Shakespeare 3(3,0) Study of selected tragedies, comedies, and history plays of Shakespeare. Required of all English majors. Preq: ENGL 310 or consent of instructor.

ENGL 414, 614 Milton 3(3,0) Development of Milton’s art and thought from the minor poems and selected prose through Paradise Lost, Paradise Regained, and Samson Agonistes, set against the background of the late Renaissance. Preq: ENGL 310 or consent of instructor.

ENGL 415, 615 The Restoration and Eighteenth Century 3(3,0) Readings in Dryden, Swift, Pope, and Dr. Johnson. Preq: ENGL 310 or consent of instructor.

ENGL 416, 616 The Romantic Period 3(3,0) Readings from the poetry and critical prose of Blake, Wordsworth, Coleridge, Byron, Shelley, Keats, and other representative figures. Preq: ENGL 310 or consent of instructor.

ENGL 417, 617 The Victorian Period 3(3,0) Reading from the poetry and nonfiction prose of selected Victorian authors, including works of Carlyle, Tennyson, Browning, Arnold, and other representative figures. Preq: ENGL 310 or consent of instructor.

ENGL 418, 618 The English Novel 3(3,0) Study of the English novel from its 18th century beginnings through the Victorian Period. Preq: ENGL 310 or consent of instructor.

ENGL 419, 619 Post-Colonial Studies 3(3,0) Selected readings in post-colonial literature and theory, focusing on issues of nationalism, migration, resistance, race, language, and master narratives. Preq: ENGL 310 or consent of instructor.

ENGL 420 American Literature to 1799 3(3,0) Focused study of authors, movements, themes, critical approaches, and genres in literature of colonial and early national America from early European explorations of the continent to 1799. Preq: ENGL 310 or consent of instructor.

ENGL 421 American Literature from 1800 to 1899 3(3,0) Focused study of authors, movements, themes, critical approaches, and genres in the poetry and prose of major American authors and literary movements from the nineteenth century. Preq: ENGL 310 or consent of instructor.

ENGL 425, 625 The American Novel 3(3,0) Survey of the most significant forms and themes of the American novel from its beginnings to 1900. Preq: ENGL 310 or consent of instructor.

ENGL 426, 626 Southern Literature 3(3,0) Intellectual and literary achievement of the South from 1607 to the present, with emphasis on the writers of the 19th century. Preq: ENGL 310 or consent of instructor.
ENGL 427, 627 Agrarianism and the Humanistic Tradition 3(3,0) Focuses on the importance of agriculture and rural life to the humanistic tradition of Western Civilization from antiquity through the early years of the American republic. Prerequisite: ENGL 310 or consent of instructor.

ENGL 428, 628 Contemporary Literature 3(3,0) Focuses on American, British, and other fiction, poetry, and drama from the Post-World War II to the present. Prerequisite: ENGL 310 or consent of instructor.

ENGL 429, 629 Dramatic Literature I 3(3,0) Selected readings in the dramatic literature from the classical era of Greece and Rome to the Renaissance. Prerequisite: ENGL 310 or consent of instructor.

ENGL (THEA) 430, 630 Dramatic Literature II 3(3,0) Principles and progress of drama from the Restoration to the present; analysis of representative plays; critical reports; discussion of trends in dramatic literature. Prerequisite: ENGL 310 or consent of instructor.

ENGL 431, 631 Modern Poetry 3(3,0) The modern tradition in English and American poetry from Yeats to the present; relevant critical essays. Prerequisite: ENGL 310 or consent of instructor.

ENGL 432, 632 Modern Fiction 3(3,0) American and British novels and short stories of the 20th century. Prerequisite: ENGL 310 or consent of instructor.

ENGL 433, 633 The Anglo-Irish Literary Tradition 3(3,0) Exploration of the unique literary heritage and achievement of English-language Irish writers in the 19th and 20th centuries. Major figures of the Irish tradition: W. B. Yeats, James Joyce, Samuel Beckett, and other writers; consideration of the specifically Irish aspects of their works. Prerequisite: ENGL 310 or consent of instructor.

ENGL 434, 634 Environmental Literature 3(3,0) Survey of literature that examines the relationship between human beings and the natural world, including analysis of environmental themes in myths and legends and in selected poetry and prose of 19th- and 20th-century England and America. Prerequisite: ENGL 310 or consent of instructor.

ENGL 435, 635 Literary Criticism 3(3,0) Major critical approaches to literature. Prerequisite: ENGL 310 or consent of instructor.

ENGL (W S) 436, 636 Feminist Literary Criticism 3(3,0) Introduces the gendered works of feminist literary theory and criticism. Outlines the development of modern literary criticism by studying feminist versions of the major critical methodologies. Prerequisite: ENGL 310 or consent of instructor.

ENGL 437, 637 Directed Studies 1-3(1-3,0) Class and tutorial work for students with special interests or projects in American, British, or European literature outside the scope of existing courses. Applications must be approved during the registration period of the semester preceding the one in which directed studies will occur. May be repeated by arrangement with the department. Prerequisite: ENGL 310 or consent of instructor.

ENGL H438 Departmental Honors Research 3(3,0) Research for the preparation of an honors project. Prerequisite: ENGL 310 or consent of instructor.

ENGL H439 Departmental Honors Project 3(3,0) Preparation of an honors project. Prerequisite: ENGL 310 or consent of instructor.

ENGL 440, 640 Literary Theory 3(3,0) Examination of how approaches such as Marxism, Psychoanalysis, Feminism, Deconstruction, New Historicism, Post-Colonialism, Cultural Studies, and Queer Theory answer the question, "What is literature?" Prerequisite: ENGL 310 or consent of instructor.

ENGL 441 Literary Editing 3(3,0) Examination of how the theories and practices of editing construct texts, stressing the problems and objectives of editing and providing practical experience with literary editing. Prerequisite: Sophomore literature.

ENGL 442, 642 Cultural Studies 3(3,0) Investigation of the similarities and connections between a wide variety of cultural products, events, and practices—from fast food through opera to online shopping—using theories ranging from Marxism to hybridity. Prerequisite: ENGL 310 or consent of instructor.

ENGL 444, 644 Renaissance Literature 3(3,0) Selected readings in non-Shakespearean British literature from 1500–1660. Includes drama, poetry, and prose. Prerequisite: ENGL 310 or consent of instructor.

ENGL 445, 645 Fiction Workshop 3(3,0) Workshop in the creative writing of prose fiction. May be repeated once for credit. Prerequisite: ENGL 340 or consent of instructor.

ENGL 446, 646 Poetry Workshop 3(3,0) Workshop in the creative writing of poetry. May be repeated once for credit. Prerequisite: ENGL 346 or consent of instructor.

ENGL (THEA) 447, 647 Playwriting Workshop 3(0,3) See THEA 447.

ENGL 448, 648 Screenwriting Workshop 3(3,0) Workshop in the creative writing of screenplays. May be repeated once for credit. Prerequisite: ENGL 348 or consent of instructor.

ENGL 449, 649 Creative Non-Fiction 3(3,0) Advanced workshop in writing non-fiction prose for magazine and free-lance markets. Prerequisite: ENGL 312 or consent of instructor.

ENGL 450, 650 Film Genres 3(2,3) Advanced study of films that have similar subjects, themes, and techniques, including such genres as the Western, horror, gangster, science fiction, musical, and/or screwball comedy. Also considers nontraditional genres, screen irony, genre theory, and historical evolution of genres. Topics vary. Prerequisite: ENGL 357 or consent of instructor.

ENGL (COMM) 451, 651 Film Theory and Criticism 3(2,3) Advanced study into the theory of film/video making emphasizing understanding a variety of critical methods to approach a film. Examines the history of film theory and defines the many schools of film criticism, including realism, formalism, feminism, semiotics, Marxism, and expressionism. Prerequisite: ENGL 357 or consent of instructor.

ENGL 452, 652 Great Directors 3(2,3) Intensive study of one to three film directors emphasizing understanding the entire canon of each director. Students study similarities in techniques, shifts in thematic emphasis, and critical methodologies for approaching the works of each director. Topics vary. Prerequisite: ENGL 357 or consent of instructor.

ENGL 453, 653 Sexuality and the Cinema 3(2,3) Examination of male/female sexual roles and their evolution in American genre films, avant-garde cinema, and international films. Includes the study of movies in relation to cultural values and social stereotypes, introduction to feminist film theory, and consideration of film pornography. Prerequisite: ENGL 357 or consent of instructor.

ENGL (LANG) 454 Selected Topics in International Film 3(2,3) See LANG 454.

ENGL 455, 655 American Humor 3(3,0) Native American humor of the 19th and 20th centuries. Prerequisite: ENGL 310 or consent of instructor.

ENGL (HUM) 456, 656 Literature and Arts of the Holocaust 3(3,0) Addresses the Holocaust through literature, art, architecture, music, and film. Beginning with historical, political, and economic forces that contributed to the Holocaust, course then focuses on highly diverse creative responses to this event—responses that often reflect the difficulties and politics of these commemorative gestures. Prerequisite: ENGL 310 or consent of instructor.

ENGL 459, 659 Advanced Special Topics in Language, Literature, or Culture 3(3,0) Advanced study in topics not central to other English courses, such as certain authors, works, genres, themes, or areas of knowledge and culture. Specific topics are announced when offered. May be repeated once for credit with department chair's consent. Prerequisite: ENGL 310 or consent of instructor.

ENGL 460 Issues in Writing Technologies 3(3,0) Examination of writing technologies from different historical periods. Investigates how writing is understood, circulated, legislated, and protected in terms of its production technology. Prerequisite: Sophomore literature; ENGL 211 or consent of instructor.

ENGL 463, 663 Topics in Literature to 1699 3(3,0) Selected readings in literature from antiquity through the 17th century for focused study of authors, movements, themes, critical approaches, and genres. Topics vary and are constructed by individual faculty. May be repeated for a maximum of six credits, but only if different topics are covered. Prerequisite: ENGL 310 or consent of instructor.

ENGL 464, 664 Topics in Literature from 1700 to 1899 3(3,0) Selected readings in literature from 1700 to 1899 for focused study of authors, movements, themes, critical approaches, and genres. Topics vary and are constructed by individual faculty. May be repeated for a maximum of six credits, but only if different topics are covered. Prerequisite: ENGL 310 or consent of instructor.

ENGL 465, 665 Topics in Literature from 1900 to 1999 3(3,0) Selected readings in literature from 1900 to 1999 for focused study of authors, movements, themes, critical approaches, and genres. Topics vary and are constructed by individual faculty. May be repeated for a maximum of six credits, but only if different topics are covered. Prerequisite: ENGL 310 or consent of instructor.

ENGL 475, 675 Writing for Electronic Media 3(3,0) Hands-on workshop in new forms of writing and hypertextual design for interactive electronic media. May be repeated once for credit. Prerequisite: ENGL 310 or consent of instructor.
Courses of Instruction

ENGL 478, 678 Digital Literacy 3(3,0) Examines how electronic texts differ from and resemble print texts. Includes reading, studying, and analyzing print and digital texts to determine how digital techniques change patterns of reading and how readers make sense of electronic texts. Preq: ENGL 310 or consent of instructor.

ENGL 482, 682 African-American Fiction and Nonfiction 3(3,0) Critical examination of the various forms and genres of African-American prose including the novel, short fiction, autobiography, nonfiction, and oratory with some attention to emerging theories about African-American culture and its impact on American cultural life in general. Preq: ENGL 310 or consent of instructor.

ENGL 483, 683 African-American Poetry, Drama, and Film 3(3,0) Studies in the various forms, themes, and genres of African-American poetry, drama, and film with some attention to emerging theories about African-American culture and its impact on American cultural life in general. Preq: ENGL 310 or consent of instructor.

ENGL 485, 685 Composition for Teachers 3(3,0) Practical training in teaching composition: finding workable topics, organizing and developing observations and ideas, evaluating themes, and creative writing. Preq: ENGL 310 or consent of instructor.

ENGL 488, 688 Genre and Activity Theory 3(3,0) Examination of the forms that texts take, of the print and digital media in which they are composed, and of the ways they circulate among experts, in the public, and around the world. Preq: Junior standing.

ENGL 489, 689 Special Topics in Writing and Publication Studies 3(3,0) Selected readings from topics in writing and publication studies, emphasizing areas such as major theories, practices, research, and critical approaches. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: ENGL 310 or consent of instructor.

ENGL 490, 690 Advanced Technical and Business Writing 3(3,0) Advanced work in writing proposals, manuals, reports, and publishable articles. Students produce work individually and in groups. Preq: ENGL 304 or 314 or consent of instructor.

ENGL (COMM) 491, 691 Classical Rhetoric 3(3,0) Study of the major texts in classical rhetoric. Examines the nature and functions of rhetoric in Greek and Roman societies. Traces the development of rhetoric from Protagoras through Isocrates, Plato, Aristotle, Cicero, and Quintillian and considers questions essential to understanding persuasive theory and practices. Preq: ENGL 310 or consent of instructor.

ENGL (COMM) 492, 692 Modern Rhetoric 3(3,0) Examines the "new rhetorics" of the 20th century, which are grounded in classical rhetoric but which include findings from biology, psychology, linguistics, and anthropology, among other disciplines. Considers the theories and applications of communication. Preq: ENGL 310 or consent of instructor.

ENGL 494, 694 Writing About Science 3(3,0) Advanced work in scientific writing and editing for peer and lay audiences. Preq: ENGL 310 or consent of instructor.

ENGL 495, 695 Technical Editing 3(3,0) Practical experience in editing and preparing technical manuscripts for publication. General introduction to the functions of the technical editor. Preq: ENGL 314 or consent of instructor.

ENGL 496 Senior Seminar 3(3,0) Capstone course requiring participation and a substantial essay, allowing graduating English majors the chance to work closely with faculty and other English majors on a special topic in the advanced study of literature, rhetoric, writing, and/or publication studies. Preq: ENGL 310, Senior standing in English, or consent of instructor.

ENGL 498, 698 Studio Composition and Communication 3(3,0) Preparation for students to work in the Class of 1941 Studio for Student Communication. Preq: Sophomore standing or consent of instructor.

ENGL 499 Practicum in Writing 3(3,0) Students apply their knowledge of concepts and principles to a substantive project involving their internship experiences and/or writing and publishing interests. To be taken Pass/Fail only. Preq: Sophomore standing, Junior standing in English.

ENTOMOLOGY

Professors: P. H. Adkison, B. C. Bellinger, E. P. Benson, J. D. Culin, R. W. M. Hoekstra, J. C. Morse, P. A. Zungoli; Assistant Professors: M. W. Turnbull

ENT 201 School-aged science 3(3,0) Introduction to insects, their various relationships with humans, other animals, and plants. The general nature of this course makes it beneficial to all students regardless of specialty. Not open to students who have received credit for ENT 301 or equivalent.

ENT 201 Selected Topics 1(1,0) Discussion course covering topics dealing with insects and related arthropods. Subjects are chosen to reflect issues of current interest as well as those having significance in human history. May be repeated for a maximum of three credits.

ENT 300 Environmental Entomology 3(3,0) Exploration of diversity and roles of insects in natural and affected environments, impact of insects and pesticides on environmental quality, and discussion of environmental ethics in entomological science. Preq: Any biological or physical science.

ENT (BIOSC) 301 Insect Biology and Diversity 4(3,3) Introduction to the study of insects, with emphasis on their structure, function, ecology, and behavior. Identification of commonly encountered species is highlighted. Relationships between insect and human populations are discussed. Control technologies are introduced, with emphasis on environmentally responsible tactics. Offered fall semester only.

ENT 308 Apiculture 3(2,3) Detailed study of the honey bee and its economic importance in pollination and honey production. Attention is given to bee behavior, colony management, equipment, honey-plant identification, and honey production and processing. Preq: BIOL 104/106 and consent of instructor.

ENT (BIOSC) 400, H400, 600 Insect Morphology 4(3,3) Study of insect structure in relation to function and of the variation of form in insects. Preq: ENT 301.

ENT 401, H401, 601 Insect Pests of Ornamental Plants and Shade Trees 3(2,3) Recognition, biology, damage, and control of insect pests of woody and other ornamental plants and shade trees. Preq: ENT 301.

ENT 404, H404, 604 Urban Entomology 3(2,3) Study of pests common to the urban environment with emphasis on biology, damage, control, and identification of household, structural, stored products, and food pests. Students learn both theoretical and practical aspects of urban pest management and the pest-control industry. Preq: ENT 301.

ENT (PL PA) 406, 606 Diseases and Insects of Turfgrasses 2(2,0) See PL PA 406.

ENT 407, 607 Applied Agricultural Entomology 4(3,3) Topics include recognition, biology, damage, and control of economically important insects and mites found on major Southeastern field, fruit, nut, and vegetable crops. Principles and practices of crop protection, including pesticide application, economic basis for decision making, and development of scouting programs are introduced. Preq: ENT 301 or equivalent.

ENT (PL PA) 408 Diseases and Insects of Turfgrasses Laboratory 1(0,3) See PL PA 408.

ENT (BIOSC) 415, 615 Insect Taxonomy 3(1,6) Identification of the principal families of the major orders of adult insects. Laboratory work consists of intensive practice of such identification. Lecture material deals with theoretical discussion of taxonomic features observed in the laboratory. Preq: ENT (BIOSC) 400 or consent of instructor.

ENT (ENTOX) 430, 630 Toxicology 3(3,0) See ENTOX 430.

ENT (BIOSC) 436, 636 Insect Behavior 3(2,3) Fundamentals of insect behavior in an evolutionary and ecological perspective. Laboratory emphasizes generation and testing of hypotheses and observation, description, and quantification of insect behavior. Preq: ENT 301 or consent of instructor.

ENT (BIOSC) 455, H455, 655 Medical and Veterinary Entomology 3(2,3) Insects and their arthropod relatives which are of economic importance in their effect on man and animals. Preq: ENT 301 or consent of instructor.

ENT 461 Directed Research in Entomology 1(3,0,3-9) Development of a senior thesis based on a research problem in a selected entomological area. Emphasis is on integrating the knowledge gained in the student's program with the results of the research project. May be repeated for a maximum of three credits. Preq: Senior standing, consent of instructor.
ENVIRONMENTAL AND NATURAL RESOURCES

E N R 101 Introduction to Environmental and Natural Resources I 1(1,0) Informative overview of environmental and natural resources and their impact on society. Education and career opportunities are emphasized.

E N R 102 Introduction to Environmental and Natural Resources II 1(1,0) Continuation of E N R 101 with continuing emphasis on education and career opportunities. Current issues and basic science related to the natural resource professions are introduced.

E N R 302 Natural Resources Measurements 3(2,3) Introduction to measurements of natural resources including land, vegetation, animal habitat, water quality and quantity, climate, and recreation. Remote sensing techniques are also introduced. May not be taken for credit by Forest Resource Management majors. Coreq: EX ST 301.

E N R (B IOSC) 413, 613 Restoration Ecology 3(3,0) Applies ecological principles to the restoration of disturbed terrestrial, wetland, and aquatic ecosystems. Includes the restoration of soils and waterways, of flora and fauna, and of natural ecological processes such as plant succession and nutrient cycling. Prq: Introductory course in ecology or conservation biology, consent of instructor.

E N R (FOR) 416, 616 Forest Policy and Administration 3(3,0) See FOR 416.

E N R 429 Environmental Law and Policy 3(3,0) Develops an understanding of the three branches of government that affect and dictate use and protection of natural resources. Attention is given to major federal environmental statutes. Includes examination of how policy is developed, implemented, and evaluated in the public and private sectors. Prq: Junior standing or consent of instructor.

E N R (FOR) 434, 634 Geographic Information Systems for Landscape Planning 3(2,3) See FOR 434.

E N R 450, 650 Conservation Issues 3(3,0) Interactive study and discussion of issues related to the conservation of natural resources, emphasizing current issues in the conservation of biodiversity, identification of conflicts between consumptive and nonconsumptive resource management, and development of viable solutions for conservation of natural resources. Prq: W F B (BIOSC) 313 or consent of instructor.

ENVIRONMENTAL ENGINEERING AND SCIENCE

EE&S 401, 601 Environmental Engineering 3(3,0) Introduction to the field of environmental engineering. Topics include environmental phenomena, impact of pollutants on the aquatic environment, solid-waste management, air pollution control, radiological health, and simple water and wastewater treatment systems. Prq: Junior standing in engineering or consent of instructor. Coreq: C E 341, E E 341, M E 308, or consent of instructor.

EE&S 402, 602 Water and Wastewater Treatment Systems 3(3,0) Study of fundamental principles, rational design considerations, and operational procedures of the unit operations and processes employed in water and waste treatment. Both chemical and biological treatment techniques are covered. Introduces the integration of unit operations and processes into water and waste treatment systems. Prq: EE&S 401; and C E 341, C H E 311, M E 308, or equivalent; or consent of instructor.

EE&S 410, 610 Environmental Radiation Protection I 3(3,0) Fundamental principles of radiological health and radiation safety. Topics include radiation fundamentals, basic concepts of environmental radiation protection, internal and external dosimetry, environmental dose calculations and radiation protection standards. Prq: Consent of instructor.

EE&S 411, 611 Ionizing Radiation Detection and Measurement 3(2,3) Laboratory exercises in ionizing radiation detection and measurements. Topics include nuclear electronics; counting statistics; radiation interactions; basic gas, scintillation, and semiconductor detectors; gamma-ray spectroscopy; health physics survey instrumentation; and thermoluminescent dosimetry. Prq: EE&S 410 or consent of instructor.

EE&S 430, 630 Air Pollution Engineering 3(3,0) Introductory course in air pollution and its control. Topics include air pollutants and effects, sources, dispersion models, engineering controls, and air-quality legislation. Prq: Senior standing in engineering or physical sciences.
EN SP (AGRIC) 315, H315 Environment and Agriculture 3(3,0) See AGRIC 315.

EN SP 400 Studies in Environmental Science 3(3,0) Study of historical perspectives, attitudes, and government policy within the framework of environmental case studies to illustrate the interaction between human and natural factors as they mutually affect the environment and man’s ability to deal with that environment. Prereq: EN SP 200 or consent of instructor.

EN SP 472, 672 Environmental Planning and Control 2(2,0) Application of planning and control to effective environmental quality improvement. Considers water supply and treatment, wastewater treatment and disposal, solid waste disposal, air pollution abatement, and land use and zoning from the standpoint of control. Not intended for graduate students in engineering. Prereq: Consent of instructor.

ENVIRONMENTAL TOXICOLOGY

ENTOX 400, H400, 600 Wildlife Toxicology 3(3,0) Assessment of impacts of toxic substances on reproduction, health, and well-being of wildlife species; acute and chronic effects of agricultural chemicals, pesticides, hazardous waste, industrial waste, and oil releases are discussed. Prereq: BIOCH 305 or organic chemistry, one year of general biology, W FB 350 or consent of instructor.

ENTOX 421, H421, 621 Chemical Sources and Fate in Environmental Systems 3(3,0) Chemical cycles in the environment are discussed at global and microcosm scales. The dependence of fate processes on physical and chemical properties and environmental conditions is examined. Breakdown, movement, and transport of selected toxicants are addressed. Prereq: Consent of instructor.

ENTOX (ENT) 430, 630 Toxicology 3(3,0) Basic principles of toxicology including quantitation of toxicity, toxicokinetics, biochemical action of poisons, and environmental toxicology are studied. Acute and chronic effects of various classes of poisons (e.g., pesticides, drugs, metals, and industrial pollutants) are discussed in relation to typical routes of exposure and regulatory testing methods. Prereq: Organic Chemistry, one year of general biology, or consent of instructor.

ENTOX 437, 637 Ecotoxicology 3(3,0) Study of the effects of stressors on the ecosystem. Explores the integrative relationships that comprise the field of ecotoxicology in a hierarchical format that focuses on the various levels of ecological organization. Prereq: ENTOX 430 or consent of instructor.

ENTOX 446 Soil and Water Quality: Fundamentals 3(3,0) Studies those aspects of water quality that are influenced by soil systems. Many water quality concerns arise from land-applied chemicals, natural or manufactured. Basic soil and water chemistry principles including sorption, solution chemistry, and soil chemical transport are studied. Prereq: CSENV 475 and CH 224, or consent of instructor.

ENTOX 447 Soil and Water Quality: Applications 3(3,0) Potential for water quality concerns arising from land application of natural or manufactured chemicals is varied. Case studies of potential water quality concerns related to fertilizers, pesticides, biosolids, manures, and other sources are presented. Practices that can improve water quality are also studied and evaluated. Prereq: CH 224 and CSENV 475, or consent of instructor.

EXECUTIVE LEADERSHIP AND ENTREPRENEURSHIP

Professors: D. L. Bodde, W. B. Gartner, C. Herst, J. H. Rodgers; Associate Professor: W. H. Stewart; Adjunct Assistant Professors: M. G. Mino, J. F. Wilkens; D. Wyman

E L E 301 Executive Leadership and Entrepreneurship I 3(3,0) Cross-disciplinary course which seeks to create an appreciation of the opportunities and uncertainties of an entrepreneur’s life through extensive reading and interactions with entrepreneurs. Prereq: Sophomore standing.

E L E (MGT) 314 New Venture Creation I 3(3,0) See MGT 314.

E L E (MGT) 315 New Venture Creation II 3(3,0) See MGT 315.

E L E (ECO/ENT) 321 Economics of Innovation 3(3,0) See ECON 321.

E L E (PO SOC, PSYCH, SOC) 356 Social Science of Entrepreneurship 3(3,0) See SOC 356.

E L E 357, 600 Technology Entrepreneurship 3(3,0) Introduction to technology entrepreneurship emphasizing ideation, opportunity assessment, market and technology forecasting, intellectual property protection, financial modeling and business valuation, project management, and cross-functional team building. Prereq: Junior standing in science or engineering.

E L E 401 Executive Leadership and Entrepreneurship II 3(3,0) Continuation of E L E 301 with extensive use of a computer simulated business start-up. Prereq: E L E 301.

E L E 499 Executive Leadership and Entrepreneurship III 3-6(1,3,6-12) Continuation of E L E 301 and 401. Directed practical study of entrepreneurship and leadership. Students work closely with external infant firms to develop new products and bring existing products to market successfully. Prereq: E L E 401.

EXPERIMENTAL STATISTICS

Professors: W. C. Bridges, Jr., P. D. Gerard, L. W. Grimes, H. S. Hill, Jr., Chair; J. R. Rieck, J. E. Toler; Assistant Professors: J. Luo, J. Sharp; Senior Lecturer: R. Martinez-Dawson; Lecturer: R. S. Dubsky

EX ST 222 Statistics in Everyday Life 3(3,0) Focuses on the role of statistics in a variety of areas including politics, medicine, environmental issues, advertising, and sports. Students explore common statistical misconceptions and develop an understanding of how principles of probability and statistics affect many aspects of everyday life. Not open to students who have received credit for EX ST 301, MTHSC 301, 302, or 309. Prereq: Satisfactory score on the Clemson Mathematics Placement Test or consent of department.

EX ST 301, H301 Introductory Statistics 3(2,2) Basic concepts and methods of statistical inference; organization and presentation of data, elementary probability, measures of central tendency and variation, tests of significance, sampling, simple linear regression and correlation. Stresses the role of statistics in interpreting research and the general application of the methods. Credit toward a degree will be given for only one of EX ST 301 or MGT 310. Prereq: EX ST 301 or equivalent with a C or better.

EX ST 402 Introduction to Statistical Computing 3(3,0) Introduction to statistical computing packages. Topics include data importation, basic descriptive statistic computation, basic graphic preparation, and statistical analysis methods and procedures. Prereq: EX ST 301.

EX ST 411, 611 Statistical Methods for Process Development and Control 3(3,0) Experimental design techniques for use in process development, application of screening experiments and response surface experiments, techniques for process control with implications for product quality control. Includes discussions of the use of statistical computer analyses and interpretations including computer-generated graphics. Prereq: MTHSC 226 or consent of instructor.

EX ST 462 Statistics Applied to Economics 3(3,0) Continuation of EX ST 301 emphasizing statistical methods used in the collection, analysis, presentation, and interpretation of economic data. Special attention is given to time-series analysis, the construction of index numbers, and the designing of samples for surveys in the social science fields. Prereq: EX ST 301.
FINANCE

Professors: J. C. Alexander, Jr., Chair; R. B. McElreath, Jr., M. E. Episey, T. M. Springer, N. G. Waller; Associate Professors: J. M. Harris, Jr., A. G. Morgan, J. G. Wolf; Assistant Professors: D. J. Bradley, B. N. Cline, T. Yang; Lecturer: K. D. McMillan

FIN 301 Personal Finance 3(3,0) Analysis of the preparations of personal financial plans. Topics include savings and budgeting, personal taxes, housing and automobile decisions, loans, insurance needs, investments, and retirement needs. May not be counted toward a major or minor in Financial Management.

FIN 304 Risk and Insurance 3(3,0) Studies the nature of risk and the role of insurance in risk management from individual and business viewpoints. Topics include probability, theory of the firm under uncertainty, insurance carriers and contracts, underwriting, and regulation. Preq: FIN 306 or 311 or consent of instructor.

FIN 305 Investment Analysis 3(3,0) Study of techniques useful in analyzing alternative investment opportunities with emphasis on corporate securities. Investment planning and portfolio management are considered. Preq: FIN 306 or 311 with a C or better, or consent of instructor.

FIN 306 Corporation Finance 3(3,0) Introduction to financial management of nonfinancial firms. Includes such topics as analysis of financial statements, financial forecasting, capital budgeting, working capital management, and long-term financing decisions. Credit may not be received for both FIN 306 and 311. Preq: ACCT 201; and MTHSC 301 or 309 or EX ST 301.

FIN 307 Principles of Real Estate 3(3,0) Acquaints students with the theories, practices, and principles which govern real estate markets. Major emphasis is on specifics of real estate brokerage, property rights, and ownership; making real estate investment decisions; and financing real estate investments. Preq: FIN 306 or 311 with a C or better, or consent of instructor.

FIN 308 Financial Institutions and Markets 3(3,0) Study of the various types of financial institutions and of topics critical to the financial institutions practitioner. Topics include financial regulations, financial security types and their yields, interest rate risk management, foreign currency risks management, and stock index futures. Preq: FIN 306 or 311 with a C or better, or consent of instructor.

FIN 311, H311 Financial Management I 3(3,0) First in a two-course sequence to provide in-depth exposure to the theory and practice of corporate financial management and to demonstrate how financial management techniques are applied in decision making. Credit may not be received for both FIN 306 and 311. Preq: ACCT 201 and 204 each with a C or better; and MTHSC 309 or EX ST 301.

FIN 312, H312 Financial Management II 3(3,0) Continuation of the two-course sequence that begins with FIN 311. Preq: FIN 306 or 311 with a C or better or consent of instructor.

FIN 398 Creative Inquiry—Finance 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits.

FIN 399 Finance Internship 1-3(1-3,0) Pre-planned, preapproved, faculty-supervised internships to give students-on-the-job learning in support of classroom education. Internships must be no less than six full-time, consecutive weeks with the same internship provider. Restricted to students with a major or minor in Financial Management. To be taken Pass/Fail only. Preq: Consent of instructor.

FIN 402, H402, 602 Advanced Corporate Finance 3(3,0) Study of the decision process and analytical techniques used in evaluating corporate investment and financing decisions. Topics include capital budgeting, real options, working capital management, mergers and acquisitions, bankruptcy and reorganization, and financial management in not-for-profit businesses. Preq: FIN 312 with a C or better or consent of instructor.

FIN 404, H404 Financial Modeling 3(3,0) Helps students develop the practical skills that combine theory, business planning, and forecasting needed to make financial decisions. Emphasizes the use of spreadsheet software to set up and solve these models. Topics include financial statement analysis, valuation, and financial capital. Preq: FIN 312 with a C or better; CP SC 220 or MGT 218; or consent of instructor.

FIN 406, H406 Portfolio Management and Theory 3(3,0) Introduction to portfolio management. Includes the underlying theory, managing the equipment for bond and income portfolios, portfolio evaluation, options-pricing theory, future markets and instruments. Preq: FIN 305 with a C or better or consent of instructor.

FIN 406, 606 Analysis and Use of Derivatives 3(3,0) Consideration of the option pricing theory and strategy techniques most commonly used in the market for options. Also considers an overview of the futures markets. Special emphasis is given to interest-rate futures, stock-index futures, and foreign-exchange futures. Preq: FIN 305 with a C or better or consent of instructor.

FIN 408 Management of Financial Institutions 3(3,0) Detailed study of the operational, marketing, and regulatory aspects of the management of depository financial institutions. Emphasizes decision making through the extensive use of cases. Preq: FIN 308 with a C or better or consent of instructor.

FIN 409 Professional Financial Planning 3(3,0) Concepts and practical implementation of professional financial planning focusing on essentials of budgeting and saving, risk management, tax planning, investment planning, and retirement and estate planning. Emphasizes integrating these elements into a comprehensive personal financial plan. Preq: ACCT 404, 408, FIN 304, 305.

FIN 410, H410 Research in Finance 1-3 Directed research for students interested in careers in finance. Research topic is selected by student and approved by instructor. A formal research paper is required. Preq: FIN 306 or 312, consent of instructor.

FIN 411 International Financial Management 3(3,0) Extension of the principles of finance to the international context. Focuses on implications of the existence of multiple currencies and the operations across borders of sovereign nation-states for the multinational corporation. Preq: FIN 306 or 312 with a C or better, or consent of instructor.

FIN 415, 615 Real Estate Investment 3(3,0) Focuses on the structure and analysis of real estate investment emphasizing financial theory and analysis technique. Case study and project-oriented homework assignments facilitate the understanding of real estate investments. Preq: FIN 307 with a C or better or consent of instructor.

FIN 416, 616 Real Estate Valuation 3(3,0) Advanced course in commercial real estate valuation. Topics include income capitalization, cash flow analysis, highest and best use analysis, the cost approach, the direct sales comparison approach, and ICF analysis. Preq: FIN 307 with a C or better or consent of instructor.

FIN 417, 617 Real Estate Finance 3(3,0) Advanced course applying financial analysis and theory to real estate. Emphasizes mortgage credit analysis and current financing techniques for residential and commercial properties. Topics include financial institutions, syndications, and construction financing. Preq: FIN 307 with a C or better or consent of instructor.

FIN 498 Creative Inquiry—Finance 1-4(1-4.0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits.

FOOD SCIENCE

FD SC 101 Epochs in Man’s Struggle for Food 1(1,0) Study of significant developments in food preservation methods and the impact each has had on man’s struggle for food.

FD SC 102 Perspectives in Food and Nutrition Sciences 2(2,0) Discussion course covering topics related to food science and human nutrition. Subjects include topics of current interest and involve familiarization with scientific literature in nutrition and food sciences.
Courses of Instruction

FD SC 201 Man and His Food 2(2,0) Study of food and food products emphasizing nutrients, nutrient needs, and the relationship between nutrient intake and health. Also discusses food additives, nutritional awareness (including nutrition labeling), food protection, and the influence of processing on nutritional quality of food.

FD SC 214 Food Resources and Society 3(3,0) Introduces the basics of food science (food chemistry, food microbiology, and food processing principles) and relates how advances in food science have paralleled societal advances and created social controversy.

FD SC 215 Culinary Fundamentals 1(0,3) Culinary skills development lab course emphasizing safety and sanitation. Practical preparation, evaluation, and presentation of fruits/vegetables, grains, eggs, salads/cold sauces, stocks, sauces, soups, poultry, red meat, seafood, quick breads, yeast breads, bakery desserts, frozen concoctions, and ice cream. Prq: Food Science major or consent of instructor.

FD SC 250 Culinary Science Internship 0 Students experience the science and art of food preparation, with the ultimate object of improving the ease of manufacture as well as the overall quality and nutrition of the food produced. Students are able to observe, interact, and practice principles of culinary sciences. To be taken Pass/Fail only. Prq: FD SC 215.

FD SC 304 Evaluation of Dairy Products 2(1,2) Emphasizes sensory evaluation of dairy products. Discusses basic principles of organoleptic evaluation, fundamental rules for scoring and grading dairy products; evaluation of all classes of dairy products based on established grades and score cards.

FD SC 306 Food Service Operations 3(3,0) Principles of management of resources in food service systems. Emphasizes menu planning, types of delivery systems, principles of quality food production, techniques for cost control and concepts of food science and food safety. Prq: FD SC 214 or equivalent or consent of instructor. Coreq: FD SC 404, 407.

FD SC 307 Restaurant Food Service Management 3(3,0) Essentials of successful operation of restaurants including menu design and pricing, marketing, customer satisfaction, purchasing, kitchen operations, and employment relationships.

FD SC 350 Food Science Internship 0 Summer internship offered by Food Science and Human Nutrition Department and the Clemson MicroCreamery and Food Manufacturing Industries. Students are able to observe, interact, and practice principles of food science within the food industry. To be taken Pass/Fail only. Prq: FD SC 214 or consent of instructor.

FD SC 401, H401, 601 Food Chemistry I 4(3,3) Basic composition, structure, and properties of food and the chemistry of changes occurring during processing utilization. Prq: BIOCH 305 or consent of instructor.

FD SC 402, H402, 602 Food Chemistry II 4(3,3) Application of theory and procedures for quantitative and qualitative analysis of food ingredients and food products. Methods for protein, moisture, lipid, carbohydrate, ash, fiber, rancidity, color, and vitamin analyses and tests for functional properties of ingredients are examined. Prq: BIOCH 305 or consent of instructor.

FD SC 404, 604 Food Preservation and Processing 3(3,0) Principles of food preservation applied to flow processes, ingredient functions, and importance of composition and physical characteristics of foods related to their processing; product recalls and product development concepts. Prq: Physics and organic chemistry or biochemistry.

FD SC 406, 606 Food Preservation and Processing Laboratory I 1(0,3) Laboratory exercises on preservation methods, equipment utilized, and processes followed in food manufacture. Coreq: FD SC 404.

FD SC 407, 607 Quantity Food Production 2(1,3) Principles of the production of foods in quantity for use in food service systems. Emphasizes functions of components of foods and of ingredients in food, on the quality of the final product, on safe production of food and on proper use of equipment. Coreq: FD SC 450, 404.

FD SC 408, 608 Food Process Engineering 4(3,3) Study of basic engineering principles and their application in food processing operations. Emphasizes the relation between engineering principles and fundamentals of food processing. Prq: CH 102, FD SC 214, MTHSC 106, PHYS 207 or 200 or 122 or consent of instructor.

FD SC 417, 617 Total Quality Management for the Food and Packaging Industries 3(3,0) Introduction to the principles of modern quality management emphasizing quality standards and basic analytical techniques necessary for food processing and packaging companies to survive in a customer-driven marketplace.

FD SC 417 Seminar 1(1,0) Literature research and oral presentation of a current food science topic.

FD SC 418 Seminar 1(1,0) Literature research and oral presentation of a current food science topic.

FD SC 420, H420, 620 Special Topics in Food Science 1-3(1-3,0) Special topics in food science not covered in other courses. May be repeated for a maximum of 12 credits, but only if different topics are covered. Prq: Consent of instructor.

FD SC 421, H421 Special Problems in Food Science 1-4(0,3-12) Independent research investigation in food science areas not conducted in other courses. May be repeated for a maximum of 12 credits. Prq: Consent of instructor.

FD SC 450 Creative Inquiry—Food Science 1-6(1-6,0) Individual or small team research experience in close collaboration with a faculty member. Expands undergraduate learning by application of the scientific method. Research is selected by the student with approval of faculty. May be repeated for a maximum of 6 credits.

FD SC 491 Practicum 1-4 Supervised experiential opportunities in the food industry. May be repeated for a maximum of 12 credits. Prq: Junior standing and consent of department chair.

FORESTRY

FOR 101 Introduction to Forestry 1(1,0) Informative sketch of forestry, forests, and forestry tasks of forest management. Includes education and career opportunities for foresters. Offered fall semester only.

FOR 205 Dendrology 2(1,3) Classification, nomenclature, and identification of the principal forest trees of the United States, their geographical distribution, ecological requirements, and economic importance. Includes field identification of native trees and commonly planted exotics of the Southeast. Prq: BIOL 103/105. Coreq: FOR 221 or consent of instructor.

FOR 206 Forestry Ecology 3(2,3) Study of the nature of forests and forest trees, how they grow, reproduce, and their relationships to the physical and biological environment. Offered spring semester only. Prq: BIOL 103/105, CSENV 202, FOR 205 or consent of instructor.

FOR 221 Forest Biology 3(3,0) Study of woody plant form and function, wood properties, general physiology and forest biomes of North America. Presented as a companion course to dendrology lab. Prq: BIOL 103/105. Coreq: FOR 205 or consent of instructor.

FOR 227 Arboricultural Field Techniques 1(0,3) Skills and techniques required to safely climb trees for tree maintenance. Emphasizes safety, proper equipment, and basic tree maintenance treatments. To be taken Pass/Fail only.

FOR 251 Forest Communities 2(0,6) Study of forest plant species and their successful status and habitat requirements with respect to landform, soil type, and other appropriate aspects of site classification. Prq: FOR 205 or consent of instructor.

FOR 252 Forest Operations 1(0,3) Introduction and tour of forest operations activities throughout South Carolina. Includes timber harvesting, site preparation, and applied silvicultural processes. Prq: Junior standing or consent of instructor.

FOR 253 Forest Mensuration 4(0,12) Introduction to measurements of land, individual trees, forest stands, forest products, and the application of mensurational techniques to the statistical and physical design of forest sampling methods, including measurement techniques of non-timber components of forest resources. Prq: FOR 205 or consent of instructor.
FOR 254 Forest Products (Summer Camp) 1(0,3) Tour of the forest products industry of South Carolina emphasizing those products and processes of some distinction or special interest. Preq: FOR 205 or consent of instructor.

FOR 300 Christmas Tree Production 2(2,0) Theory and practice of establishing, managing, and marketing trees emphasizing Christmas tree production in the South. Preq: Consent of instructor.

FOR 302 Forest Biometrics 2(1,3) Application of statistical methods to forestry problems including sampling theory and methods, growth measurements and prediction, and application of micro-computing to analysis of forestry data. Preq: FOR 253, Coreq: EX ST 301 or consent of instructor.

FOR 304 Forest Resource Economics 3(3,0) Economic problems and principles involved in the utilization of forest resources and distribution of forest products. Includes analysis of integrated forest operations. Preq: ECON 200 or consent of instructor.

FOR 305 Woodland Management 3(2,2) Compendium of forestry subjects providing a broad view of the forest environment as it relates to ecology, management, and utilization of forests, especially those of South Carolina. Field and laboratory exercises in the fundamentals of woodland management. Not open to Forest Resource Management majors. Preq: BIOL 103/105 or consent of instructor.

FOR 308 Remote Sensing in Forestry 2(1,3) Introduction to remote sensing, aerial photo interpretation, computer mapping, aerial photo timber estimating, and geographical information systems. Preq: Forestry summer camp or consent of instructor.

FOR 314 Harvesting and Forest Products 4(3,3) Harvesting of forest products, structure and properties of economically important timbers, and production and properties of primary forest products. Preq: Forestry summer camp or consent of instructor.

FOR 315 Woodland Ecology 3(3,0) Overview of the forest emphasizing the living and nonliving components of the woodland habitat. Understanding man's use of the forest and interpreting the signs of plants, wildlife, and landscapes.

FOR 341 Wood Procurement Practices in the Forest Industry 3(3,0) Study of wood raw material procurement practices currently employed by the forest products industry, including pulp, paper, and related areas. Preq: Forestry Summer Camp or consent of instructor.

FOR 400, 600 Public Relations in Natural Resources 3(3,0) Identifying relevant policies, their characteristics and acceptance to natural resource management, and techniques of maintaining appropriate public relations. Preq: Senior standing.

FOR 406 Forested Watershed Management 2(1,3) Lectures and discussions on measurements and processes affecting water quality and quantity within watersheds. Introduction to hydrologic principles, geomorphology, and water quality assessment. Discusses best management practices for silviculture and development of a watershed management plan. Preq: FOR 315 or consent of instructor.

FOR 408, 608 Wood and Paper Products 3(3,0) Study of wood structures and identification; physical and mechanical properties of wood products; standard testing procedures; manufacture of lumber, plywood, oriented strand board; drying, preservation, grading, and use of wood products. Also discusses common grades of paper and paperboard, fiber sources; pulping and paper-making equipment and processes; chemical recovery process; and environmental issues. Preq: Junior standing or consent of instructor.

FOR 410, 610 Harvesting Processes 4(3,3) Study of forest harvesting processes with detailed analysis of production, cost, environmental impacts, safety, transportation, and business considerations. Preq: Senior standing or consent of instructor.

FOR 413, 613 Integrated Forest Pest Management 4(3,3) Nature and control of pests of forest trees and products. Focuses on the relation of pests to silviculture, management, and natural forest ecosystems. Preq: Junior standing in Forest Resource Management.

FOR 415, 615 Forest Wildlife Management 3(2,3) Principles, practices, and problems of wildlife management emphasizing upland forest game species. Habitat manipulation through use of appropriate silvicultural practices in association with other techniques is evaluated. Preq: FOR 406 or consent of instructor.

FOR 416, 616 Forest Policy and Administration 3(3,0) Introduction to the development, principles, and legal provisions of forest policy in the United States and the examination of administrative and executive management in forestry.

FOR 417, 617 Forest Resource Management and Regulation 3(3,0) Fundamental principles and analytical techniques in planning, management, and implementation of forest operations. Preq: FOR 302, 315, or consent of instructor.

FOR 418, 618 Forest Resource Valuation 3(3,0) Analysis of capital investment tools and their application to decision making among forestry investment alternatives; valuation of land, timber, and other resources associated with forestry, including the impact of inflation and taxes. Preq: FOR 304 or consent of instructor.

FOR 419 Senior Problems 1-3(1-3,0) Problems chosen with faculty approval in selected areas of forestry. With department chair's approval, may be repeated once for credit. Preq: Senior standing.

FOR 423, 623 Current Issues in Natural Resources 2(2,0) Lectures in various fields of forestry delivered by selected representatives from forest industries, consultants, agencies, associations, and other forestry operations. Will not be taught when enrollment is less than 15. To be taken Pass/Fail only. Preq: Junior standing or consent of instructor.

FOR 425 Forest Resource Management Plans 2(1,3) Development of multiple resource forest management plans. Economic and environmental impacts of implementing management plans. Preq: FOR 417 or consent of instructor.

FOR 426, 626 Forest Resource Management Plans Seminar 1(1,0) In-depth exploration of topics and problems presented in FOR 425. To earn honors credit, students must be enrolled in corequisite FOR 425 and earn a B or better in both courses. Preq: Senior standing, approval of Department of Forest Resources. Coreq: FOR 425.

FOR (HORT) 427, 627 Urban Tree Care 3(3,0) Principles, practices, and problems of protecting and maintaining trees in urban and recreational areas. Examines environmental and biological factors affecting trees in high-use areas, their management and cultural requirements, and the practices necessary for their protection and care as valuable assets in the landscape. Preq: Junior standing or consent of instructor.

FOR 431, 631 Recreation Resource Planning in Forest Management 2(1,3) Analysis of forest recreation as a component of multiple-use forest management; techniques of planning; physical and biological effects on forest environments; and forest site, user, and facility management.

FOR 433, 633 GPS Applications 3(2,3) Develops competence in geographic information systems (GIS) technology including theory, methods, and application to natural resources mapping. Topics include basic concepts of GIS; projection systems; types of data; mission planning; and data capture, correction, and export to geographical information systems (GIS). Preq: Senior standing or consent of instructor.

FOR (E N R) 434, 634 Geographic Information Systems for Landscape Planning 3(2,3) Develops competence in geographic information systems (GIS) technology and its application to various spatial analysis problems in landscape planning. Topics include data development and management, spatial analysis techniques, critical review of GIS applications, needs analysis and institutional context. GIS hardware and software, hands-on application. Credit may be received for only one of C R P 434, FOR (E N R) 434.

FOR 441, 641 Properties of Wood Products 3(3,0) Basic properties of wood, including the hygroscopic, thermal, electrical, mechanical, and chemical properties; standard testing procedures for wood. Preq: Junior standing or consent of instructor.

FOR 442, 642 Manufacture of Wood Products 3(3,0) Study of the manufacture of lumber, plywood, poles, piles; drying, preservation, grading, and uses of wood products. Considers the manufacture of particleboard, flakeboard, oriented-strand board, fiberboard, and paper products. Includes physical, mechanical, and chemical properties and their applications. Preq: Consent of instructor.

FOR 444, 644 Forest Products Marketing and International Trade 3(3,0) Study of marketing and international trade practices currently employed by the forest products industry and the application of basic marketing principles and global trade concepts in the industry's current and future environment. Preq: FOR 442 or consent of instructor.
### Courses of Instruction

**EDSEC 457 Secondary Science Capstone Seminar 3(2,3)** Capstone seminar accompanying supervised high school science teaching internship. Satisfies part of requirement for South Carolina secondary science certification. Offered for credit and approval of department chair and thesis advisor required. **Preq:** EDSEC 427. **Coreq:** EDSEC 447.

**EDSEC 458 Secondary Social Studies Capstone Seminar 3(2,3)** Capstone seminar accompanying supervised high school social studies teaching internship. Satisfies part of requirement for South Carolina secondary certification. Offered for credit and approval of department chair and thesis advisor required. **Preq:** EDSEC 428. **Coreq:** EDSEC 448.

### SOCIOLOGY

**Professors:** J. M. Coggeshall, D. K. Sturkie, Chair; B. J. Vander Mey, W. M. Wentworth, J. C. Witte; **Associate Professors:** M. T. Britz, F. C. Mobley; **Assistant Professors:** M. L. Denton, E. M. Granberg, W. H. Haller, S. M. Nelson, M. A. Vogel, S. E. Winslow-Bowe; **Lecturers:** J. L. Holland, H. M. Kiser

**SOC 201,** **H201 Introduction to Sociology 3(3,0)** Sociological perspective: the study of contemporary groups, organizations, and societies in terms of human social behavior, social change, social structure, and social institutions.

**SOC 202 Social Problems 3(3,0)** Social problems involving the family, education, health care, political and legal systems, economy, population, environment, community; and special problems associated with age, economics, racial status, and gender inequality.

**SOC 203 Technology, Environment, and Society 3(3,0)** Considers issues involved in science, technology, and the environment in relation to human behaviors and values with an emphasis on the U.S. and globalized world contexts. Surveys the sociology of environment, science, and technology. Includes selected analysis of related controversies and policy considerations.

**SOC (C R D) 235 Introduction to Leadership 3(3,0)** Introduction to leadership in various organizational settings from a sociological perspective. Examines the concept of leadership, leadership traits, types of leadership, and the evolution of leadership behaviors in the 19th and 20th centuries.

**SOC 290 The Criminal Justice System 3(3,0)** Social systems analysis of criminal justice agencies. Primary focus is on law enforcement and corrections and their interagency relationships with courts and prosecution. **Preq:** SOC 201.

**SOC 293 Criminology 3(3,0)** Study of nature and causes of criminal behavior; societal attempts to control crime; social responses to crime, criminals, and the criminal justice system. **Preq:** SOC 201.

**SOC (R S) 303, H303 Methods of Social Research 1(4,3)** Introduction to methods of social research: research design, sampling, measurement, reliability, and validity; the relationship between theory and research. Coordinating laboratory introduces students to computer literacy through research. Required of all Sociology majors. **Preq:** MTHSC 203 or 301 or EX ST 301, SOC 201.

**SOC 310, H310 Marriage and Intimacy 3(3,0)** Examination of mate selection, living together, marital relations, family planning, conflict resolution, divorce and remarriage, later life adjustments, and singledom as a lifestyle in the United States. **Preq:** SOC 201 or consent of instructor.

**SOC 311 The Family 3(3,0)** Introduction to the family as a social institution. Primary focus is on families in the U.S. with comparisons to other cultures. Topics include history of the family, trends in family formation and dissolution, division of labor, intergenerational relationships, family violence, and policy. Analyses of race, class, and gender are incorporated. **Preq:** SOC 201 or consent of instructor.

**SOC 330 Work and Careers in Society 3(3,0)** Introduces changes in the structure of work from preindustrial to postindustrial periods. Topics include the effects of stratification on career decisions, career paths and implications for life changes, social effects of scientific management of work, unionization, globalization, the rise of multinational corporations, and cross-cultural comparisons of management styles. **Preq:** SOC 201 or consent of instructor.

**SOC 331 Urban Sociology 3(3,0)** Urbanization as a social process and related conditions of work, family structure, social mobility, crime, lifestyle, technology, and development of urban areas in the Third World. **Preq:** SOC 201.

**SOC 350 Self and Society 3(3,0)** Social psychology from the sociological viewpoint. Examination of the interactional and group influences on such individual conditions as childhood and life-course development, culture, upbringing, emotions, motives, sexual orientations, and self-concept. **Preq:** SOC 201.

**SOC 351 Collective Behavior 3(3,0)** Spontaneous, transitory, and sporadic group behavior: crowds, mobs, riots, fads, and social movements. **Preq:** SOC 201.

**SOC 352, PSYCH 356 Social Science of Entrepreneurship 3(3,0)** Examines those areas of the social sciences that have direct relevance for entrepreneurs. Topics include processes by which entrepreneurs are shaped by social institutions such as the family and community, public policy implications and influences on entrepreneurship, risk perception, decision making, motivation, leadership, and group dynamics. **Preq:** SOC 201 or (C R D) 235 or PSYCH 201 or PSYCH 101 or 102 or 104 or consent of instructor.

**SOC (R S) 371 Population and Society 3(3,0)** Social, economic, and political consequences of population structure and change, including problems of food and resources, as well as population goals and policies in developing countries and the United States. **Preq:** SOC 201.

**SOC 380 Introduction to Social Services 3(3,0)** Fundamentals of casework practice, including philosophy and values, models of group work, and ethics in social service work. **Preq:** SOC 201.

**SOC 391 Sociology of Deviance 3(3,0)** Study of patterns of deviant behavior: subcultures, careers, and life-styles of deviants; deviance theory and research. **Preq:** SOC 201.

**SOC 392 Juvenile Delinquency 3(3,0)** Study of nature, extent, and causes of juvenile delinquency; societal attempts to control delinquent conduct and gang violence; emergence of the juvenile justice system. **Preq:** SOC 201.

**SOC 394, H394 Sociology of Mental Illness 3(3,0)** Mental illness as a social phenomenon, including cultural and social influence, organizational settings of mental health-care delivery, legal issues, patient-therapist relationships, and mental illness intervention as social control. **Preq:** SOC 201.

**SOC 396 Alcoholism: Social Causes, Consequences and Treatment 3(3,0)** Issues involved in alcoholism and alcohol abuse, assessment of sociological and social-psychological theories of alcoholism and prevention; societal problems associated with the misuse of alcohol. **Preq:** SOC 201 or consent of instructor.

**SOC 397 Drug Abuse: Social Causes, Consequences and Treatment 3(3,0)** Issues involved in drug abuse other than alcohol; assessment of sociological and social-psychological theories of drug use, abuse, and treatment; societal problems associated with the misuse of drugs other than alcohol. **Preq:** SOC 201 or consent of instructor.

**SOC 398 Computer Crime 3(3,0)** Traces the history of technological crime and evaluates forensic practices in light of legislation with an analysis of emerging caselaw. Addresses guidelines for the development of forensic laboratories, the creation of computer crime task forces, search/seizure of electronic equipment, and the evaluation of criminal subcultures.

**SOC (R S) 401, 601 Human Ecology 3(3,0)** See R S 401.

**SOC 404, 604 Sociological Theory 3(3,0)** Survey of the development of sociological theory. Required of all Sociology majors. **Preq:** SOC 201 and Junior standing or consent of instructor.

**SOC H408 Honors Thesis Research I 3** Reading and research related to senior honors thesis. Completion of junior honors requirements and approval of department chair and thesis advisor required. **Preq:** SOC H303, H310, honors status.

**SOC H409 Honors Thesis Research II 3** Research and writing related to the senior honors thesis. **Preq:** SOC H408, honors status.

**SOC 414, 614 Policy and Social Change 3(3,0)** Uses the sociological perspective to examine policy development, implementation, and evaluation in the public and private sectors. Specifically, focuses on values and ethics and effects of social change efforts on the outcomes of policy formation, social planning, and implementation. **Preq:** SOC 201 and Junior standing or consent of instructor.

**SOC 430 Sociology of Organizations 3(3,0)** Analysis of administrative organizations and voluntary associations; applied analysis of their formal and informal group relations, communications, and effectiveness. **Preq:** SOC 201 and Junior standing or consent of instructor.

**SOC 432 Sociology of Religion 3(3,0)** Sociological analysis of religious systems and movements and their influence on other social institutions. **Preq:** SOC 201 and Junior standing or consent of instructor.
SOC 433, 633 Globalization and Social Change 3(3,0) Examination of the social and historical causes of development and underdevelopment. Various sociological theories of development are reviewed. Selected countries are examined in an international context. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC 435, 635 Leadership and Team Building 3(2,3) Introduction to the area of leadership and the process of building effective teams. Examines various sociological perspectives on leadership and their role in developing and maintaining various types of groups. Students are actively involved in the educational process through participation in experiential learning opportunities. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC (R S) 459, 659 The Community 3(3,0) See R S 459.

SOC 460, 660 Race, Ethnicity, and Class 3(3,0) Investigation of sociological perspectives on race, ethnic relations, and social stratification. Includes analysis of the impact of social class on minority movements. Not open to students who have taken SOC 431. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC 461 Sex Roles 3(3,0) Female and male socialization; changes in statuses, roles, inequality, and opportunities in contemporary society, with cross-cultural and social class comparisons. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC 462 Men, Masculinity, and Society 3(3,0) Considerations of masculinity and social order: norms, roles, relationships, and activities; identity and socialization: work, family, sexuality, war, sports, including subcultural comparisons. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC 463, 663 Sociology of Parenting 3(3,0) Study of sociological perspectives of parenting, parent-child, and interactions. Parenting styles and outcomes; social change and parenting: variations by sex, race, class, and class. Includes cross-cultural comparisons. Course is research-based with an applied orientation. Prereq: SOC 201, Junior standing.

SOC 468 Sociology of Criminal Evidence 3(3,0) Introduction to the types of evidence, collection of evidence, chain of custody, and procedures relating to the introduction of evidence into judicial proceedings. Attention is given to Fourth Amendment constitutional issues, the development of law within American boundaries, and the cross-cultural development of law.

SOC (R S) 471, H471, 671 Demography 3(3,0) Study of demographic concepts, theory, and research methods for vital statistics, migration, and population distribution and projections. Considerations in processing and organization of demographic data and organization of demographic data systems. Offered fall semester only. Prereq: ANTH 201 or SOC 201 or R S 301.

SOC 480, 680 Medical Sociology 3(3,0) Study of sociocultural factors in the etiology and treatment of physical illness, medical occupations and professions, and the organization of health care delivery systems. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC 481, 681 Aging and Death 3(3,0) Sociological orientation to aging populations focusing on the impact of health care, welfare, and retirement systems. Includes dying as a social phenomenon, suicide, euthanasia, and funerals. Prereq: SOC 201 and Junior standing or consent of instructor.

SOC 484, 684 Child Abuse and Treatment 3(3,0) Comprehensive examination of child abuse, neglect, and exploitation as major social problems; causes, effects, and prevalence of physical, sexual, and emotional maltreatment; definitional controversies; social policy and legal considerations; therapeutic approaches for children and their caretakers; child maltreatment and the judicial system. Prereq: SOC 201 and Senior standing or consent of instructor.

SOC 486 Creative Inquiry—Sociology 1-3(1-3) Investigates topics and engages in action research projects selected by faculty and students. Goals, research, activities, and outcomes vary from semester to semester and project to project. May be repeated for a maximum of 12 credits. Prereq: SOC 201.

SOC 491 The Sociology of Policing 3(3,0) Introduction to the major issues of contemporary policing in the U. S. from a sociological perspective. Topics include the changing functions and structure of policing, the police subculture, and the role of the police in a liberal democracy. Prereq: SOC 390 or consent of instructor.

SOC 493, 693 Sociology of Corrections 3(3,0) Analysis of correctional alternatives. Topics include sentence structures and their impact, prison populations (male, female, and juvenile), inmate social structure, treatment and custody issues, community-based alternatives (probation, parole, electronic monitoring, and work release), and institutional management issues. Prereq: SOC 390 or consent of instructor.

SOC 494, 694 Sociology of Organized Crimes 3(3,0) Examines the multifarious aspects of criminal organizations, namely their structure, methods, and networks. Specific topics may include white-collar crime and traditional, non-traditional, and transnational organized crime. Prereq: SOC 201 or consent of instructor.

SOC (R S) 495 Field Experience 3(1,8) Students participate in selected field placements under supervision for eight hours weekly and in a one-hour seminar per week. May be repeated once for credit. Prereq: SOC 380 or 390 and consent of department chair.

SOC (R S) 498 Independent Study 3(1,6) Individual readings or projects in sociological areas not covered in other courses. A written proposal must be approved by the instructor directing the work and by the department chair prior to registration. May be repeated for a maximum of six credits. Prereq: Consent of department chair.

SOC 499 Seminar in Selected Topics in Contemporary Sociology 3(3,0) Sociological areas of current interest are explored. May be repeated by special arrangement for a maximum of six credits. Prereq: Consent of department chair.

SOILS AND SUSTAINABLE CROP SYSTEMS

SSCS 101 Survey of Soils and Sustainable Crop Systems 1(1,0) Introduces majors to Soils and Sustainable Crop Systems concentrations, career paths, faculty, and University resources. Prereq: Soils and Sustainable Crop Systems major or consent of instructor.

SSCS 102 Academic and Professional Development I 1(1,1) Introduces Soils and Sustainable Crop Systems majors to University library services, evaluates computer program proficiency and begins development of portfolio. Web-based portfolio showcases skills and experiences (e.g. awards, accomplishments, and work samples) during undergraduate program. Time management and critical decision making are discussed.

SSCS 333 Agricultural Genetics 3(3,0) Broad study of genetics as it applies to agricultural species and interacting organisms: weeds, pests, pathogens, beneficial organisms. Topics include genetic centers of origin, mutations and chromosomes in species domestication, transmission genetics and reproduction, genetics of qualitative and quantitative traits, genetics of development, and stress responses, agricultural omics. Prereq: BIOL 104/106, 111, or consent of instructor.

SSCS 335 Agricultural Biotechnology 3(2,2) Strategies for the best use of biotechnology and genetic resources to alleviate constraints in global hunger, environmental sustainability, and health. Includes genetic enhancement and chromosome engineering of plant, animal, and microbial systems; issues related to commercial implementation; the impact on developing countries, environmental impact, and governmental policies. Prereq: GEN 301 or consent of instructor.

SSCS 401 Academic and Professional Development II 1(1,0) Soils and Sustainable Crop Systems majors evaluate, critique, and update portfolios for presentation to future employers. Students work with Career Center and instructor to develop interviewing skills and résumés, access professional goals, and identify skills necessary for reaching goals to be competitive. The importance of ethics in soils and sustainable crop systems careers is discussed.

SSCS 445, 645 Regulatory Issues and Policies 1(1,0) Introduction to regulations of agricultural practices and implementation of novel technologies and products. Emphasizes parent biotechnology inventions and ethical issues. Includes survey of state and governmental agencies with responsibilities to avoid risk to humans, non-target organisms, and preservation of food safety, agricultural resources, and natural ecosystems.

Courses of Instruction

221
Courses of Instruction

SSCS 450, 650 Agricultural Biosystems and Risk Assessment 1(1,0) In-depth discussion of recent articles on agricultural biotechnology and related issues. Independent and comprehensive literature survey and critical discussions on introduction of modified organisms into biological systems, agricultural adoption, and bio-risk assessment. Discussions relate to scientific discovery, application, and regulatory issues of agricultural biotechnology.

SSCS 451, 651 Agricultural Biotechnology and Global Society 1(1,0) In-depth discussion of recent articles on agricultural biotechnology and related global issues. Includes independent and comprehensive literature survey and critical discussions on implementation of biotechnology products in the context of world agricultural production systems and economics. Discusses the role of international agencies and social and ethical issues.

SSCS 496 Selected Topics in Creative Inquiry 1-3(1,2,3-6) Disciplinary and multidisciplinary research projects with the goal of developing the students' ability to discover, analyze, evaluate, and present data. Students are required to document their research activities in their e-portfolios. May be repeated for a maximum of six credits. Preq: Consent of instructor.

SPANISH

SPAN 101 Elementary Spanish 4(3,1) Course for students with no previous experience in Spanish study. The fundamentals of grammar and vocabulary are taught, and a foundation is provided for building oral and written proficiency. Three hours a week of classroom instruction and one hour a week in the language laboratory.

SPAN 102 Elementary Spanish 4(3,1) Continuation of SPAN 101.

SPAN 104 Basic Spanish 4(3,1) Condensed first-year course for students who have previously studied Spanish. Upon completion, students are prepared to enter Intermediate Spanish.

SPAN 151 Spanish for Graduate Students 3(3,0) Intensive program only for graduate students preparing for the reading examination in Spanish. A minimum grade of B on a final examination will satisfy graduate school foreign language requirement. May be repeated once. To be taken Pass/Fail only. Preq: Graduate standing.

SPAN 201, H201 Intermediate Spanish 3(3,1) Intermediate course to practice listening, speaking, reading, and writing. Grammatical structures and basic vocabulary are reviewed systematically. Includes literary and cultural perspectives. Preq: SPAN 102, 121, or consent of department chair.

SPAN 221 Accelerated Spanish II 6(6,0) Accelerated intermediate course that may be taken in lieu of SPAN 201 and 202. Through conversation, composition, dictation, and intensive grammar review, proficiency is stressed. Includes literary readings and cultural perspectives. May not be taken by students who have completed SPAN 201 or 202. Preq: SPAN 102, 121, or consent of department chair.

SPAN 297 Creative Inquiry—Spanish 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

SPAN 302 Intermediate Spanish Grammar and Composition 3(3,0) Intensive review of Spanish; verbs, idioms, and vocabulary with an introduction to syntax and stylistics through controlled and free composition. Preq: SPAN 202 or consent of department chair.

SPAN 304 Introduction to Hispanic Literary Forms 3(3,0) Introduction to the basic structures and elements of fiction, poetry, drama, and essays, including literary and critical theory, with readings in 19th- and 20th-century Spanish and Spanish-American literature. Preq: SPAN 302 or 305.

SPAN 305 Intermediate Spanish Conversation and Composition I 3(3,0) Practice in spoken Spanish with emphasis on vocabulary, pronunciation, intonation, and comprehension. Includes written work to increase accuracy and assignments in the language laboratory. Preq: SPAN 202 or consent of department chair.

SPAN 306 Spanish Conversation for Business 3(3,0) Intensive practice of business writing skills through conversations, general review of grammatical structures, and exposure to business vocabulary and concepts. Preq: SPAN 202 or consent of department chair.

SPAN 307 The Hispanic World: Spain 3(3,0) Introduction to the significant aspects of the culture of Spain from its origins to the present. Emphasizes the artistic, social, historical, political, and contemporary issues of the Iberian Peninsula. Preq: SPAN 202 or consent of department chair.

SPAN 308 The Hispanic World: Latin America 3(3,0) Introduction to the significant aspects of the culture of Spanish-American countries. Emphasis is placed on the development of the political, economical, geographical, social, and artistic aspects of Spanish America from the indigenous period to the present. Preq: SPAN 202 or consent of department chair.

SPAN 309 Introduction to Spanish Phonetics 3(3,0) Study of basic concepts of phonetics and phonology, fundamental principles of Spanish pronunciation and International Phonetic Alphabet. Preq: SPAN 202 or consent of department chair.

SPAN 310 CLIP Summer Immersion Program 6(6,0) Conducted entirely in Spanish for eight hours daily. Consists of activities that combine interrelating cultural topics with language skill practice. Frequent opportunities to converse with native speakers during meals and on excursions. Students receive six credits, three of which may be taken in lieu of SPAN 202. Preq: SPAN 201.

SPAN 311 Survey of Spanish-American Literature 3(3,0) Literary movements, influences, authors, and works from the Colonial period to the present. Preq: Six credits in Spanish at the 300 level, including at least one course in literature or culture.

SPAN 313 Survey of Spanish Literature I 3(3,0) Literary movements, influences, and authors from the beginning to the end of the 17th century; representative works, discussions. Preq: Six credits in Spanish at the 300 level, including three credits of literature or culture.

SPAN 314 Hispanic Linguistics 3(3,0) Familiarizes students with the theory and practice of linguistics as applied to Spanish, in order to deepen their knowledge of phonetics, morphology, syntax, semantics and linguistic change. Preq: SPAN 302 or consent of department chair.

SPAN 316 Spanish for International Trade I 3(3,0) Introduction to commercial Spanish; study of the spoken and written language, protocol, and cultural environment of the Spanish-speaking business world. Business vocabulary, basic business and cultural concepts, and situational practice. Grammatical review through business letters, professional documents and commercial reports. Reading and analysis of commercial texts. Preq: One 300-level Spanish language, literature, or culture courses; or consent of instructor.

SPAN 318 Spanish Through Culture 3(3,0) Topic-generated conversation course in Spanish through a broad array of artistic manifestations in the Hispanic World emphasizing conversational and short written exercises. Focuses on one Hispanic culture topic which provides a basis for class discussion and short written compositions in Spanish. Preq: One 300-level course in Spanish.

SPAN (PO SC) 382 Spanish-Language News 1(1,0) See PO SC 382.

SPAN H391 Honors Introduction to Hispanic Literary Forms 1(1,0) One-hour independent study to allow honors students to pursue supervised research on some aspect of Hispanic literature. Coreq: SPAN 301, membership in Calhoun Honors College.

SPAN H392 Survey of Spanish Literature 1(1,0) Independent study allowing honors students to pursue supervised research on witchcraft in 15th- and 16th-century Spain. Coreq: SPAN 313, membership in Calhoun Honors College.

SPAN H393 The Hispanic World: Latin America 1(1,0) One-hour independent study to allow honors students to pursue supervised research on a topic related to Hispanic American history, politics, geography, economics, social institutions, or artistic movements. Coreq: SPAN 308, membership in Calhoun Honors College.

SPAN 397 Creative Inquiry—Spanish 1-4(1-4,0) Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project, develop a critical framework, and initiate research on a specific topic.

SPAN 398 Directed Reading 1-3(1-3,0) Directed study of selected topics in Spanish literature, language, and culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.
SPAN 401 New Spanish Fiction 3(3,0) Study of selected by popular emerging and established authors of Spain, with emphasis on current cultural trends. Readings include, but are not limited to, detective novels, regional fiction, and fiction from marginalized groups in Spain. Preq: SPAN 300-level literature course or consent of department chair.

SPAN 403 Spanish American Women Writers 3(3,0) In-depth study of selected literary works by Spanish American women. Representative authors are studied within their philosophical and sociopolitical contexts. Preq: Spanish 300-level literature course or consent of department chair.

SPAN 404 Nineteenth and Twentieth Century Spanish Literature 3(3,0) Selected readings from major authors in Spain. Emphasis is on readings in poetry, theatre, short story, and novels from the 19th to the early 20th century. Preq: Spanish 300-level literature course or consent of department chair.

SPAN 405 International Trade, Film, and Literature 3(3,0) Readings and films on the social, economic, and political changes of the Hispanic world. Preq: Spanish 300-level literature or culture course or consent of department chair.

SPAN 406 Hispanic Narrative Fiction 3(3,0) Topic-generated readings from Spanish America and/or Spain. Readings consider gender issues, the family, ethnicity, religion, politics, history, or socioeconomic issues in the Hispanic world. Preq: Spanish 300-level literature or culture course or consent of department chair.

SPAN 407 Hispanic Film 3(3,0) Films are "read" as texts that mirror Hispanic society. Beside learning about cinematographic techniques in Spanish, topics include comparative analysis of film and literature, film as propaganda, film as "blockbuster," and the cinematic depiction of social, cultural, and historical realities of Hispanic nations. Preq: Spanish 300-level language, literature, or culture course or consent of department chair.

SPAN 409 Comprehensive Writing in Spanish 3(3,0) Study of stylistics in addition to grammar review; writing paragraphs, short compositions, and creative papers in Spanish on both fiction and non-fiction topics. Preq: Any 300-level Spanish course or consent of department chair.

SPAN 411 Advanced Spanish Conversation and Composition 3(3,0) Continuation of SPAN 305 with emphasis on greater fluency and sophistication in oral and written expression. Preq: SPAN 305 or consent of department chair.

SPAN 415 Spanish for Health Professionals 3(3,0) Medical concepts and terminology in Spanish; designed for students who plan to work in professions related to public health care. Preq: Six credits in Spanish at the 300-400 level.

SPAN 416 Spanish for International Trade II 3(3,0) Study of more complex business vocabulary, cultural concepts, and environment of Hispanic markets. Social, political, and economic issues related to Spanish-speaking countries and their current economies in global marketing. Economic geography of Hispanic countries, company organization, management, banking, investment, goods and services, and marketing. Preq: SPAN 316.

SPAN 417 Professional Communication 3(3,0) Skill-oriented course, taught in a seminar format. Students learn established "protocol" for addressing various Spanish-speaking audiences and learn to give professional presentations in Spanish. Preq: Spanish 300-level course or consent of department chair.

SPAN 418 Technical Spanish for Health Management Professionals 3(3,0) Technical health communication course in Spanish with emphasis on managerial and business aspects of the international health industry. Preq: SPAN 415 and six additional credits in Spanish at the 300-400 level.

SPAN 419 Health and the Hispanic Community 3(3,0) Study of cultural aspects of health and health services in Hispanic populations. Taught in Spanish. Preq: SPAN 415 and six additional credits in Spanish at the 300-400 level.

SPAN 420 Hispanic Drama 3(3,0) Exploration of contemporary Hispanic theatre. The production and reception of the plays are analyzed paying particular attention to notions of dramatic genre. Focuses on the change and continuity of the plays as well as their historical, cultural, and ideological backgrounds. Preq: Two 300-level Spanish literature or culture classes.

SPAN 421 Spanish-American Modernism and Postmodernity 3(3,0) In-depth study of Spanish-American modernism and postmodernity with focus on narrative and poetic. Preq: Any 300-level Spanish literature course or consent of department chair.

SPAN 422 The Contemporary Spanish-American Novel 3(3,0) New trends in the development of the Spanish-American novel from the 1940s to the present. Preq: Spanish 300-level literature course or consent of department chair.

SPAN 423 Advanced Topics in Hispanic Linguistics 3(3,0) Continuation of SPAN 314 with advanced topics. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: SPAN 314.

SPAN 435 Contemporary Hispanic Culture 3(3,0) Study of social, political, economic, and artistic manifestations of contemporary Hispanic culture. Preq: Spanish 300-level civilization or culture course or consent of department chair.

SPAN H438 Spanish Honors Research 3(3,0) Individual honors research conducted under the direction of Language Department faculty. May not be used to satisfy requirements for the major in Modern Languages–Spanish or Language and International Trade or the minor in Modern Languages. Preq: Junior standing, membership in Calhoun Honors College.

SPAN H439 Spanish Honors Thesis 3(3,0) Individual honors research conducted and thesis completed under the direction of Language Department faculty. May not be used to satisfy requirements for the major in Modern Languages–Spanish or Language and International Trade or the minor in Modern Languages. Preq: Junior standing, membership in Calhoun Honors College.

SPAN H491 Hispanic Narrative Fiction 1(1,0) One-hour independent study to allow honors students to pursue supervised research on the socio-political climate under Franco's dictatorship, with emphasis on contemporary literary theory. Coreq: SPAN 406, membership in Calhoun Honors College.

SPAN H492 Contemporary Latin American Novel 1(1,0) One-hour independent study to allow honors students to pursue supervised research in the literary and cinematic images of magic realism. Coreq: SPAN 422, membership in Calhoun Honors College.

SPAN 497 Creative Inquiry—Spanish 1-4(1-4.0) Continuation of research initiated in SPAN 397. Students complete their project and disseminate their research results. Preq: SPAN 397 or consent of instructor.

SPAN 498 Independent Study 1-3(1-3,0-3) Directed study of selected topics in Spanish language, literature, and culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.

SPAN 499, 699 Special Topics 3(3,0) Study of timely or special topics in Spanish. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of department chair.

SPECIAL EDUCATION

Professors: V. I. Correa, A. Katsiyannis, P. M. Stecker; Associate Professor: M. J. Hodge, P. J. Riccomini; Assistant Professors: K. A. McDuffie, J. B. Ryan; Clinical Faculty: R. E. Fish

ED SP 370, H370 Introduction to Special Education 3(3,0) Survey of students with disabilities and with gifts/talents. Individuals with Disabilities Education Act is emphasized, including general educator's role in serving students with special needs. Characteristics, assessment, and effective instructional procedures for students of varying exceptionalities are addressed. Preq: Minimum grade-point ratio of 2.0.

ED SP 371 Characteristics of the Mildly Handicapped 3(3,0) Surveys the characteristics which distinguish the mildly/moderately handicapped from the more severely handicapped. Preq: Minimum grade-point ratio of 2.0.

ED SP 372 Characteristics and Instruction of Individuals with Learning Disabilities 3(3,0) In-depth coverage of characteristics and identification procedures for individuals with learning disabilities. Effective instructional strategies are addressed. Students participate in field experience throughout the semester. Offered fall semester only. Preq: ED SP 370; admission to professional level.

ED SP 373 Characteristics and Instruction of Individuals with Mental Retardation 3(3,0) In-depth coverage of characteristics and identification procedures for individuals with mental retardation. Effective instructional strategies are addressed. Students participate in field experiences throughout the semester. Preq: ED SP 370; admission to professional level.
ED SP 374 Characteristics and Strategies for Individuals with Emotional/Behavioral Disorders 3(3,0) In-depth coverage of characteristics and identification procedures for individuals with emotional or behavioral disorders. Effective instructional strategies and behavior management are addressed. Students participate in field experiences throughout the semester. Preq: ED SP 370; admission to professional level.

ED SP 468 Early Intervention for Infants and Children with Special Needs 3(3,0) Provides students with a working knowledge of the history of early intervention, legal precedence for providing early intervention services, and effective instructional techniques for working with infants and young children with disabilities and their families. Preq: ED SP 370.

ED SP 469, 669 Characteristics of Individuals with Emotional and Behavioral Disorders 3(3,0) Addresses the characteristics of individuals with emotional and behavioral disorders. Consideration is given to historical and legal aspects, definitions, comprehensive assessment, and the impact of school, home, culture, and society on individuals with behavior disorders. Research findings in the field of behavior disorders are emphasized. Preq: ED SP 370.

ED SP 470, 670 Characteristics of Individuals with Learning Disabilities 3(3,0) Provides specific knowledge of definitions, evaluation procedures, cognitive, social, academic, and functional skills of individuals with learning disabilities across the lifespan. Preq: ED SP 370.

ED SP 472, 672 Characteristics of Individuals with Mental Retardation 3(3,0) Characteristics of mental retardation across the lifespan: learning, behavioral, and developmental aspects are examined. Preq: ED SP 370.

ED SP 473, 673 Educational Procedures for Individuals with Mental Retardation 3(3,0) Identification, selection, and preparation of functional curriculum materials and pedagogy for teaching students with mental retardation. A multidisciplinary, student-centered approach to program planning provides the framework. Preq: ED SP 472.

ED SP 474, 674 Procedures for Individuals with Emotional and Behavioral Disorders 3(3,0) Assists students in developing specific strategies for teaching individuals with emotional and behavioral disorders, utilizing preventive measures, expanding skills in behavior analysis, and implementing the least restrictive intervention warranted. Includes programmatic considerations, skill instruction, curriculum selection, IEP development, and effective transition. Preq: ED SP 469.

ED SP 475, 675 Educational Procedures for Individuals with Learning Disabilities 3(3,0) Provides knowledge of educational evaluation and instructional procedures to improve outcomes for individuals with learning disabilities. Preq: ED SP 470 or consent of instructor.

ED SP 476, 676 Practicum in Learning Disabilities 3(2,3) Addresses content knowledge, skills, and professional values for successful teaching of students with learning disabilities. Focuses on teacher-directed instruction and the use of critical instructional factors, the use of recommended practices for individuals with learning disabilities, and the measurement and analysis of student performance data. Preq: ED SP 470, 475; completion of student teaching.

ED SP 478, 678 Practicum in Emotional and Behavioral Disorders 3(2,3) Addresses content knowledge, performance skills, and professional values for successful teaching of students with emotional and behavioral disorders. Focuses on teacher-directed instruction and the use of critical instructional factors, the use of recommended practice for students with disabilities, and the measurement and analysis of student performance data. Preq: ED SP 474; completion of student teaching.

ED SP 479, 679 Practicum in Mental Retardation 3(2,3) Addresses content knowledge, performance skills, and professional values for successful teaching of students with mental retardation. Focuses on teacher-directed instruction and the use of critical instructional factors, the use of recommended practices for students with disabilities, and the measurement and analysis of student performance data. Preq: ED SP 470; completion of student teaching.

ED SP 491 Educational Assessment of Individuals with Disabilities 3(2,2) Introduction to assessment process (verification) in special education. Includes procedural safeguards; data collections via informal and standardized procedures; issues in assessment; psychometric properties of standardized tests; and administration, scoring, and interpretation of selected instruments. Offered spring semester only. Preq: ED SP 372, 373.

ED SP 492 Mathematics Instruction for Individuals with Mild Disabilities 3(3,0) Prepares students to provide explicit instruction in mathematics for individuals with mild disabilities. Students learn to assess, analyze, and teach math skills systematically. Offered fall semester only. Preq: ED SP 374, 491; concurrent enrollment in ED SP 493, 494, 496, 497.

ED SP 493 Classroom and Behavior Management for Special Educators 3(3,0) Students describe various intervention strategies for increasing and maintaining appropriate behaviors and for decreasing or eliminating inappropriate behaviors. Students accurately recognize, record, and chart inappropriate behavior; employ the least restrictive intervention; foster self-management skills; and develop preventive strategies and class-wide systems for managing academic and social behavior. Offered fall semester only. Preq: ED SP 374, 491; concurrent enrollment in ED SP 492, 494, 496, 497.

ED SP 494 Teaching Reading to Students with Mild Disabilities 3(3,0) Emphasizes the knowledge and skills necessary for teaching reading to students with mild disabilities. Offered fall semester only. Preq: ED SP 374, 491; concurrent enrollment in ED SP 492, 493, 496, 497.

ED SP 495 Written Communication and Collaboration for the Resource Teacher 3(3,0) Focuses on the development of written communication skills to enhance special education teachers' collaboration with parents, regular educators, public and private agencies. Offered spring semester only. Preq: ED SP 492, 493, 494, 496; concurrent enrollment in ED SP 416 or 498.

ED SP 496 Special Education Field Experience 3(0,9) Supervised practical experience prior to Directed Teaching for preservice special education teachers preparing to teach individuals with mild/moderate disabilities. Offered fall semester only Preq: ED SP 374, 491; concurrent enrollment in ED SP 492, 493, 494, 497.

ED SP 497 Secondary Methods for Individuals with Disabilities 3(3,0) Preparation for working with students with mild/moderate disabilities in secondary schools. Focus is on literature, methods, and materials for providing instruction in transition, self-determination, knowledge within content areas, functional skills, and integration into the community. Offered fall semester only. Preq: ED SP 374, 491; concurrent enrollment in ED SP 492, 493, 494, 496.

ED SP 498 Directed Teaching in Special Education 1(1,33) Comprehensive course providing a full-time, semester-long experience for preservice special education teachers who plan to teach individuals with mild/moderate disabilities. Generally the last course in the program; provides teaching experience under the supervision of University and school personnel. Offered spring semester only. Preq: ED SP 492, 493, 494, 496, 497; concurrent enrollment in ED SP 495.

TEXTILES

TEXT 175 Introduction to Textile Manufacturing 3(3,0) Introduction to the broad fields of textile, fiber, and polymer science and engineering with emphasis on the scientific, technological, and business principles utilized in producing fibers, yarns, and fabrics; enhancing fabric functionality by dyeing, finishing, and printing; and establishing end-use products.

TEXT 176 Natural and Man-Made Fibers 4(3,3) Introduces the concept of natural and synthetic polymers as the raw materials of the textile industry. Survey of the origin, characteristics, and processing properties of various natural fibers and fiber-forming synthetic polymers. Formation of textile fibers from polymeric materials is presented with specific emphasis on the polymer science and engineering principles.
TEXT 201 Yarn Structures and Formation 4(3,3)
Study of fiber processing systems required to transform various fibrous materials into yarn. Involves the machine principles and theories, relationship of the fibers to the process and the resultant yarn structures, and subsequent analysis of the yarn structure to define quality and to determine suitable manufacturing practices. Prereq: TEXT 175 and 176 or consent of instructor.

TEXT 202 Fabric Structures, Design, and Analysis 4(3,3)
Study of fabric formation techniques designed to explore the principles and theories of modern technology. Evaluation and analysis of weaving, knitting, and nonwoven fabrication of textile structures. Prereq: TEXT 201 or consent of instructor.

TEXT 208 Apparel 4(3,3) Introduction to apparel construction techniques and analysis of problems commonly encountered in the apparel industry. Evaluation of fabric design and properties. Prereq: TEXT 202 or consent of instructor.

TEXT 314 Chemical Processing of Textiles 4(3,2) Concepts of current procedures in the chemical, mechanical, and physical preparation and in bleaching, dyeing, printing, and finishing of fabrics are presented; colorimetric and spectrophotometric methods of color control and test methods for the evaluation of the effectiveness of the treatments are explained. Not open to Polymer and Fiber Chemistry or Textile Management (Chemical) majors.

TEXT 333 The Textile Arts 3(2,3) Surveys development of the hand loom from prehistoric times to the present. Studio work in the elements of hand-woven fabrics, their design, analysis, and production of four-harness counterbalance and jack looms. Prereq: Junior standing or consent of instructor.

TEXT 403 Fiber Processing III 3(2,2) Concepts of current fiber processing machines, techniques, practices, and their validity are investigated. Problems are assigned that require use of acquired knowledge, textile testing equipment, and production machines. The relation of fibrous material properties and processing dynamics to the fiber assemblies produced is studied. Prereq: TEXT 201.

TEXT 411 Fabric Development III 3(2,2) Study of specifications and loom details for the production of fabrics woven to the customer’s order, including multicolor layouts. Warp and filling preparation are covered as well as size formulations and their methods of application. Warping and dressing plans are developed for the warper and the slasher. Prereq: TEXT 202.

TEXT 416 Nonwoven Structures 3(2,2) Nonwoven fabric structures, their manufacture, properties, and applications. Methods of nonwoven fabric formation, resultant material characteristics and end-use applications are examined. Prereq: TEXT 201.

TEXT 421, H421 Fiber Science 3(2,2) Familiarizes students with the physical properties of textile and high performance fibers and how these properties influence process and end-use performance; method of measuring those properties; and how those properties are related to structural features of the fiber.

TEXT 422, 622 Properties of Textile Structures 3(2,2) Yarn and fabric properties, their scientific significance and analysis. Dimensional, structural, and mechanical interrelationships are established and evaluated.

TEXT 426, 626 Instrumentation 3(3,0) Principles of industrial and process instrumentation and control as applied in the textile industry; static and dynamic characteristics of measurement devices; transducer principles and techniques of their application for measurement of physical properties such as pressure, temperature, flow, weight, etc.; principles of process controllers; applications of computers in textile process control.

TEXT 428 Textile Research 1-3 Investigation of a problem in textile, fiber, or polymer science under the direct supervision of a faculty member. After completing the research, student prepares a formal written report which is presented orally. Prereq: Senior standing or consent of instructor.

TEXT 429 Textile Research 1-3 Continuation of TEXT 428.

TEXT 445, 645 Special Topics in Textile, Fiber, and Polymer Science 1-3(1-3,0) Special topics in textile, fiber, and polymer sciences. Co-enrollment course for similar courses in other departments such as for those students involved in CAE/FF projects and CH E 445. There may be different sections in a term to cover different topics. May be repeated for a maximum of nine credits, but only six credits are generally allowed to be applied to degree requirements. Prereq: Consent of instructor.

TEXT 460, 660 Textile Processes 3(3,0) Survey of machinery and processes of textile manufacturing from fiber formation through fabric finishing. For students with textmatics background. Prereq: Consent of instructor.

TEXT 470 Textile Costing and Inventory Control 3(2,3) Study of the principles of costing as they specifically apply to the manufacture of textiles. Allocation of cost of material, labor, and overhead; determining the unit cost of yarns, fabrics, and finished inventory. System of storage, materials handling, and profit calculation. Prereq: TEXT 202 or consent of instructor.

TEXT 472, 672 Textile International Trade 3(3,0) Analyzes the current structure of the international textile trade including imports, exports, tariffs, and trade requirements. Field experience with local firms is used to enhance students’ understanding. Prereq: Senior standing or consent of instructor.

TEXT 475, 675 Textile Marketing 3(3,0) Examination of the activities involved in the distribution of textile products in today’s market. Emphasis is placed on the role of consumer research and the analysis of fashion in the design and promotion of textile products.

THEATRE

THEA 195 Creative Inquiry—Theatre 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

THEA 210, H210 Theatre Appreciation 3(3,0) Examination of the theatre event approached through historical context, play reading, analysis of production practices, and field trips to live dramatic performances.

THEA 267 Stage Makeup Techniques 3(2,1) Practical study of basic stage makeup techniques for the acting student including corrective makeup, modeling with paint, three-dimensional makeup, prosthesis with latex, and makeup for other media.

THEA 277 Production Studies in Theatre 3(3,0) Study of technical production and design including scenery, costume, and lighting through the examination of plays in production.

THEA 278 Acting I 3(2,3) Fundamentals of acting; basic stage techniques; exercises in interpretation, improvisation, characterization; experience in supervised scene study.

THEA 279 Theatre Practicum 1-0(3,4,0) Practical work in theatre on a production designed for public presentation. May be repeated for a maximum of four credits.

THEA 288 Introduction to Computer-Aided Drafting 3(2,3) Introduction to the basics of computer-aided drafting. Software applications include AutoCAD, Vectorworks, and WYSYG.

THEA 295 Creative Inquiry—Theatre 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

THEA 315 Theatre History I 3(3,0) Historical survey of Western theatre. Emphasis is placed on the changing roles of the playwright, director, actor, technician, and spectator from antiquity to the Renaissance. Prereq: Sophomore standing.

THEA 316 Theatre History II 3(3,0) Historical survey of Western theatre. Emphasis is placed on the changing roles of the playwright, director, actor, technician, and spectator from the Renaissance to the present. Prereq: Sophomore standing.

THEA 317 African-American Theatre I 3(3,0) Acquaints students with the origin and development of African-American playwrights, plays, players, and their contributions to the American theatre from the 19th century to the Civil Rights Movement.
THEA 318 African-American Theatre II 3(3,0)
Acquaints students with the development of Af- 
rican-American playwrights, plays, players, and 
their contributions to the American theatre from 
the Black Arts Movement to the present.
THEA (ENGL) 347 The Structure of Drama 
3(3,0) Introduction to the creative writing and 
critical study of drama. Preq: ENGL 310 or con-
sent of instructor.
THEA 367 Costume Technology 3(2,3) Theory 
and practice of costume technology including 
equipment, patterning, fabric identification, cut-
ting, construction, and fitting.
THEA 368 Voice for the Stage 3(2,3) Study of 
the principles of vocal production and standard 
American speech for the stage; exercises in breath 
support and projection, improving tonal quality, 
and elimination of regional dialects through the 
study of the International Phonetic Alphabet. 
Preq: Sophomore standing.
THEA 372 Creative Drama 3(3,0) Practical applica-
tions using creative drama as a learning tool to 
strengthen curriculum goals and heighten student participation in the classroom. Students develop 
classroom teaching strategies based on drama edu-
cation. Appropriate for elementary and secondary 
teachers, artists, and workshop leaders.
THEA 374 Stage Movement for Actors 3(1,2) 
Study of the psychological and physical sources 
of movement in the human body, with emphasis on 
the attainment of intellectual and physical control and the application of the skills to the 
development of a role.
THEA 376 Stage Directing I 3(2,3) Directing 
and staging techniques for the proscenium stage; 
exercises in composition, movement, picturiza-
tion; experience in direction of scenes. Preq: 
Sophomore standing.
THEA 377 Stagecraft 3(2,3) Theory and practice 
of stage design and technology. Preq: Sophomore 
standing.
THEA 379 Acting Ensemble 1(0,3) Performance 
opportunities in the area of theatre for young audiences. Students are members of a theatrical 
touring troupe and perform in a variety of space 
and locations. May be repeated for a maximum of 
four credits. By audition only.
THEA 388 Stage Management 3(3,0) Examines 
the vital part stage managers play in the 
thatrical production including organizing rehearsals, 
facilitating communication between director and 
designers, and calling cues during performances. 
Introduces the art and craft of stage management by 
incorporating Performing Arts Department and 
Brooks Center productions.
THEA 395 Creative Inquiry—Theatre 1-4(1- 
4,0) In consultation with and under the direction of a faculty member, students pursue scholarly 
activities individually or in teams. These creative 
project may be interdisciplinary. Arrange-
ment with mentors must be established prior to 
registration. May be repeated for a maximum of 
five credits. 
THEA 398 Special Topics in Theatre 3(3,0) 
Select areas of study in theatre not addressed by 
other theatre course offerings. May be repeated 
one time. Preq: Consent of instructor.
THEA (ENGL) 430, 630 Dramatic Literature 
II 3(3,0) See ENGL 430.
THEA (ENGL) 447, 647 Playwriting Workshop 
3(0,3) Workshop in the creative writing of plays. 
May be repeated once. Preq: THEA (ENGL) 347 
or consent of instructor.
THEA 467 Costume Design 3(3,0) Theory and 
practice of costume design for the theatre includ-
ing the study of production concept and styles, 
sketching, and rendering. Preq: THEA 367 or con-
sent of instructor.
THEA 472, 672 Improvisation: Interpreting and 
Developing Texts 3(3,0) Practical applications 
using drama as a learning tool to strengthen 
writing skills, motivate collaboration, heighten 
analytical skills. Students use improvisation to 
analyze texts and to revise original work, consider 
three-dimensionality of movement, and re-
develop an understanding of the nature of dialogue 
and composition based on readings and drama experiences. Preq: 
Senior standing or consent of instructor.
THEA 476 Stage Directing II 3(2,3) Continued 
study in the art of stage directing emphasizing 
leading contemporary theatre and methodology. 
Culminates in the production of a one-act play for 
public presentation. Preq: THEA 376 or consent of instructor.
THEA 477 Stage Design 3(2,3) Study and prac-
tice in stage design, including drafting, graphics, 
drawing, rendering, scene painting, and light plot-
ing. Preq: THEA 476 or consent of instructor.
THEA 479 Acting II 3(3,2) Continued study 
the craft of acting with emphasis on the study of 
contemporary Western theatre and the focus on monologue 
and scene study in a variety of performance settings. 
Preq: THEA 375 and consent of instructor.
THEA 480 Advanced Scene Study for Actors 
3(2,3) Students interpret and perform characters in 
complete plays written in heightened styles and 
integrating period movement into the various styles and styles of plays performed during 
production, with emphasis on period movement. 
Preq: Either THEA 479 or consent of instructor.
THEA 487, 687 Stage Lighting I 3(2,1) Theory 
and practice of stage lighting through an under-
standing of various lighting instruments, lighting 
control systems, and execution of lighting designs.
THEA 488 Stage Lighting II 3(2,3) Study of 
advanced stage lighting theories and practices 
including script analysis, technology, software 
and execution of lighting designs. Other topics 
include unions and contracts, shop orders, and 
assisting the lighting designer. Preq: THEA 487 
or consent of instructor.
THEA 495 Creative Inquiry—Theatre 1-4(1- 
4,0) In consultation with and under the direction of a faculty member, students pursue scholarly 
activities individually or in teams. These creative 
project may be interdisciplinary. Arrange-
ment with mentors must be established prior to 
registration. May be repeated for a maximum of 
five credits.
W F B (BIOSC) 313 Conservation Biology 3(3,0)
Study of the biological bases for the conservation of flora, fauna, and habitats. Biological factors that influence the decision-making process are also addressed. Preq: One year of general biology or consent of instructor.

W F B 350 Principles of Fish and Wildlife Biology 3(3,0) Introduction to principles of fisheries and wildlife biology on which sound management practices are based. Interrelationships of vertebrate and invertebrate biology, habitat, and population dynamics of several areas where wildlife management is being practiced.

W F B 410, 610 Wildlife Management Techniques 3(3,0) Basic principles and general practices of wildlife management and conservation are covered. Major problems concerning the management of wildlife resources, with emphasis on upland game species. Laboratory work includes practical work on the Clemson University woodlands and field trips to several areas where wildlife management is practiced.

W F B 414, 616 Wildlife Nutritional Ecology 3(3,0) Concepts of how terrestrial wildlife obtains and utilizes energy and nutrients in wild ecosystems are taught. Energy and nutrient availability are discussed in the ecological context of distribution, flow, and cycling in natural and modified foraging areas. Physiology of digestion is discussed for major homeotherms. Preq: FOR 415 or W F B 412.

W F B 416, 616 Fishery Biology 3(3,0) Principles underlying freshwater fish production. Introduction to major groups of freshwater fishes and their habitats. Topics include identification, age and growth, fecundity, food habits, population estimation, environmental evaluation, management practices, and fish culture. Preq: One year of introductory biology, Junior standing.

W F B 418 Fishery Conservation 3(3,0) Survey of conservation efforts directed toward freshwater and marine fisheries resources. Topics include threatened, endangered, and over-exploited species and introductions of exotic species. Preq: Two semesters of introductory biology.

W F B 430, 630 Wildlife Conservation Policy 3(3,0) Deals with the ecological rationale and management implications of public policy designed for the conservation of American wildlife resources. Emphasis is on managed-land issues. Preq: W F B 350 or consent of the instructor.

W F B 440 Non-Game Wildlife Management 3(3,0) Basic principles and general practices of non-game wildlife management are covered. Emphasis is placed on those principles and practices most appropriately used by state agencies in their management programs for non-game species, along with real-world problems associated with implementation of such programs. Preq: Two semesters of introductory biology.

W F B 444, 644 Wildlife Damage Management 3(2,3) Covers the philosophical, sociological, ecological, and economical basis for controlling damage caused by animals problem wildlife populations. Emphasis is placed on fundamentals of prevention and control of damage caused by vertebrate species, especially mammals and birds. Includes interaction with federal and state agencies and private consultants. Preq: One year introductory biology.

W F B 445 Urban Wildlife Management 3(3,0) Focuses primarily on social, scientific, and ecological aspects of managing wildlife in the urban setting. Basic wildlife management techniques as well as urban planning for wildlife are covered. Preq: One year of general biology or consent of instructor.

W F B 450, 650 Aquaculture 3(3,0) Basic aquacultural techniques applied to freshwater and marine organisms; past and present culture of finishes and shellfishes around the world; principles underlying fish production; water quality, feeding, and nutrition as they influence production of cultured aquatic species. Preq: One year of general biology, Junior standing.

W F B 463 Directed Research in Aquaculture, Fisheries, and Wildlife Biology 3(3,0) Research problems in selected areas of aquacultural, fisheries, or wildlife science to introduce students to experimental design, research techniques, and presentation of research results. May be repeated for a maximum of three credits. Preq: Junior standing, consent of instructor.

W F B 498 Senior Portfolio 1(1,0) Collection of Web-based materials representing the creative and scientific papers, presentations, and résumés written by students to satisfy curriculum requirements. Students are regularly informed regarding the format and content of their portfolios. Preq: Senior standing in Wildlife and Fisheries Biology. Coreq: F N R 499.

WOMEN’S STUDIES
Professor: J. M. Melton; Associate Professor: E. K. Sparks; Assistant Professor: M. Shockley; Lecturer: S. Watts

W S 103 Women in Global Perspective 3(3,0) Cross-cultural and multidisciplinary introduction to issues facing women globally. Issues may include women and work, violence against women, reproduction and women’s health, sexuality and rites of passage, women and the weight of tradition, movements for women’s empowerment.

W S 301 Introduction to Women’s Studies: Women’s Lives 3(3,0) Interdisciplinary course exploring the unique features of women’s lives from childhood to old age. Content is based on new research in many disciplines, including anthropology, sociology, history, literature, and the arts. Preq: Sophomore standing.

W S (COMM) 316 Girlhood, Media, and Popular Culture 3(3,0) See COMM 316.

W S (PHIL) 349 Theories of Gender and Sexuality 3(3,0) See PHIL 349.

W S (ANTH) 423 Women in the Developing World 3(3,0) See ANTH 423.

W S (ENGL) 436 Feminist Literary Criticism 3(3,0) See ENGL 436.

W S 459, 659 Selected Topics in Women’s Studies 1-3(1-3,0) Topics change from semester to semester and are announced prior to registration. May be repeated for a maximum of six credits, but only if different topics are covered.

W S 498 Advanced Studies in Women’s Studies 3(3,0) Focuses on the theoretical foundations for women’s studies, with particular emphasis on how women’s studies research and theory influence institutions and governmental policies. Readings include essays on such central women’s studies issues as work, family, children, health care, legislation, and government policies. Preq: W S 301 or consent of instructor.
FORESTRY AND NATURAL RESOURCES

F N R 102 Forestry and Natural Resources
Freshman Portfolio 1(1,0) Informative sketch of
forestry, wildlife biology, and natural resources;
education and career opportunities for natural
resource professionals. Students initiate their
Web-based student portfolios which showcase
their skills and experiences (e.g., résumés, ac-
complishments, and work samples) during their
undergraduate degree. To be taken Pass/Fail only.
Restricted to Environmental and Natural
Resources, Forest Resource Management, Forestry
and Natural Resources—Undeclared, and Wildlife
and Fisheries Biology majors only.

F N R 204 Soil Information Systems 4(3,3)
Includes input, storage, analysis, and output of
soil information through the use of global position-
ing systems, direct/remote sensing, geographic
information systems, and web soil survey. Provides
fundamental knowledge of the role of soils in
forest and wildlife management. Preq: General
chemistry sequence.

F N R 466, 466 Stream Ecology 3(2,3) Covers
the ecology of flowing water systems. Topics include
geomorphology, physical and chemical factors of
streams, biology of stream-dwelling organisms,
trophic relationships, competition, colonization,
drift, community structure, disturbance, and hu-
man impacts. Preq: Standing in consent of
department chair.

F N R 470 Creative Inquiry II 1(1-3,0) Multi-
semester commitment to participate in forestry
and natural resources courses and with a group of
peers, mentored by faculty member or advanced
graduate student. Students learn to collect,
analyze, evaluate, and present information. May
be repeated for a maximum of six credits. Preq:
Consent of instructor.

F N R 490 Field Training in Natural Resources
3(2-0) Four to eight week internship in which
students work in natural resources. Students have
supervised management responsibility. Total of
155 hours required. Must be arranged at least
two months in advance. To be taken Pass/Fail only.
Preq: Senior standing in Environmental
and Natural Resources, Forestry, or Wildlife
and Fisheries Biology, or consent of instructor.

F N R H491 Senior Honors Thesis I 3(3,0)
Individual research for students in the Forestry
and Natural Resources Honors Program. Focuses
on developing a plan of research under the direc-
tion of a faculty advisory committee. Preq: Senior
standing, membership in Calhoun Honors Col-
lege, and approval of Department of Forestry and
Natural Resources.

F N R H492 Senior Honors Thesis II 3(3,0)
Individual natural resources research for students in
the Forestry and Natural Resources Honors Program.
Focuses on data collection, analysis, report writing,

F N R 499 Natural Resources Seminar 1(1,0)
Exploration of current literature and research in
natural resources. Students participate in the
analysis of research findings, utilizing skills acquired
in their undergraduate programs. May be repeated
for a maximum of two credits.

FRENCH

Professors: C. K. Nakama, Chair; K. M. Szmerlo;
Assistant Professors: N. C. Guss, J. A. Huntington,
J. H. Mai; Lecturers: C. S. Edwards, H. G. Newton,
K. D. Peebles, E. D. Russell, A. Sawyer

FR 101 Elementary French 4(3,1) Multimedia
course for beginners that combines video, audio,
and print to teach the fundamentals of the French
language and culture. Emphasizes communicative
proficiency (listening comprehension, speaking,
reading, and writing).

FR 102 Elementary French 4(3,1) Continuation of
FR 101; three hours a week of classroom instruction
and one hour a week in the language laboratory.

FR 104 Basic French 4(3,1) Intensive one-semester
program combining FR 101 and 102 for students
who have previously studied French. Includes funda-
mentals of grammar and vocabulary as a founda-
tion for building written and oral proficiency.

FR 151 French for Graduate Students 3(0)
Intensive program only for graduate students
preparing for the reading examination in French.
Minimum grade of B on a final examination will
satisfy graduate school foreign language require-
ments. May be repeated once for credit. To be
taken Pass/Fail only. Preq: Graduating student.

FR 201, H201 Intermediate French 3(3,1) Brief
review of FR 101 and 102, with conversation,
composition, and dictation, and the beginning of
more serious reading of French prose. Includes

FR 202, H202 Intermediate French 3(3,1) Em-
phasizes reading nontechnical French prose more
rapidly. Writing, speaking, and listening skills
continue to be developed. Includes literary and

FR 297 Creative Inquiry—French 1-4(1-4,0)
In consultation with and under the direction of
a faculty member, students pursue scholarly
activities individually or in teams. Arrangements
with faculty members must be established prior
to registration.

FR 299 Foreign Language Drama Laboratory
1(0,3) Participation in foreign drama produc-
tions. No formal class meetings, but an average
of three hours per week in a foreign language
workshop for production. May be repeated
for a maximum of three credits. Preq: Consent of
instructor directing the play.

FR 300 Survey of French Literature 3(3,0) Study
of selected masterpieces of French literature in
their artistic, cultural, and historical context. May
include theme and genre studies. Preq: FR 202 or
consent of department chair.

FR 304 French Short Story 3(3,0) Introduction to
the study of French narrative literature and the
elements of critical analysis through the examina-
tion of short stories spanning the medieval era to
the present from both France and Francophone
countries. Preq: FR 305 or consent of instructor.

FR 305 Intermediate French Conversation
and Composition 1 3(3,0) Practice in the spoken
language stressing vocabulary building, pronun-
ciation, intonation, and comprehension. Requires
written work to increase accuracy and assignments
in the language laboratory. Preq: FR 202 or con-
sent of department chair.
FR 307 French Civilization 3(3,0) Study of significant aspects of French culture from its origins to the present. Preq: FR 305 or consent of instructor.

FR 308 French Linguistics I: Phonetics, Phonology, and Morphology 3(3,0) Study of the fundamental sound patterns, melodic structure, and work-formation processes of modern standard French. Preq: FR 304 or 305 or consent of instructor.

FR 309 French Linguistics II: Syntax and Semantics 3(3,0) Study of the fundamental structures of French syntax and semantics. Preq: FR 304 or 305 or consent of instructor.

FR 310 CLIP Summer Immersion Program 6(6,0) Conducted entirely in French for eight hours daily, this summer immersion program consists of activities that combine interrelating cultural topics with language skill practice. Frequent opportunities to converse with native speakers during meals and on excursions. Students receive six credits, three of which may be taken in lieu of FR 202. Preq: FR 201.

FR 312 Writing in French I 3(3,0) Study of the vocabulary, syntax, and stylistics in short compositions and creative papers in French, on both fiction and non-fiction topics. Preq: FR 202 or consent of department chair.

FR 316 French for International Trade I 3(3,0) Spoken and written French common to the French-speaking world of business and industry, emphasizing business practices and writing and translating business letters and professional reports. Cross-cultural references provide opportunity for comparative and contrastive analyses of American and French cultural patterns in a business setting. Preq: FR 202, 305 (or concurrent enrollment); or consent of department chair.

FR 317 Contemporary French Civilization 3(3,0) Study of significant aspects of France today: the country, its economy, government, and society. Taught in French. Preq: FR 305 or consent of instructor.

FR 320 Studies in French Theatre 3(3,0) Explores a variety of genres (medieval farce, classical comedy and tragedy, romantic melodrama, and the nouveau théâtre) with emphasis on staging. Class materials consist of scripts, videotaped performances, and theoretical readings on issues pertaining to spectacle in social, political, and artistic terms. May be repeated for a maximum of six credits. Preq: FR 202 or consent of department chair.

FR 357 Selected Topics in the Culture of Paris 3(3,0) On-site study of Paris and its relationship to France and Europe through readings, lectures, field trips, small student-group explorations, and reporting sessions. All activities are conducted in French. Preq: FR 202 or consent of instructor.

FR 363 French and Francophone Poetry 3(3,0) Study of traditions and major works of French and/or Francophone poetry in their historical, cultural, and aesthetic contexts. Topics may include genres, periods, traditions (romanticism, symbolism, cubism, surrealism), or themes. Preq: FR 305.

FR (PO SC) 383 French-Language News 1(1,0) See PO SC 383.
GENETICS

GEN 103 Careers in Biochemistry and Genetics 1(1,0) Introduction to biochemistry and genetics career paths, professional organizations, ethical issues, and requirements for advanced study. Also gives students training in design of a professional portfolio. Students may not receive credit for both BIOCH 103 and GEN 103. Preq: Freshman or sophomore standing in Biochemistry or Genetics or consent of instructor.

GEN 300 Fundamental Genetics 3(3,0) Introduc
tory course covering fundamental principles of genetics in prokaryotes and eukaryotes. Emphasizes Mendelian genetics, physical and chemical basis of heredity, and population genetics. Preq: BIOL 104/106 or consent of instructor.

GEN 301 Fundamental Genetics Laboratory 1(0,3) Experimental and observational approach addressing the concepts presented in GEN 300. Inheritance patterns in a wide variety of eukaryotic and prokaryotic organisms are covered. Preq: GEN 300 (or concurrent enrollment).

GEN 302, H302 Molecular and General Genetics 3(3,0) Rapidly-paced course covering Mendelian and molecular genetics, with introductory coverage of quantitative and population genetics. Emphasizes the molecular basis of heredity and gene expression in prokaryotes and eukaryotes and modern genetic technology. Preq: BIOL 111 or consent of the instructor.

GEN 303 Molecular and General Genetics Laboratory 1(0,3) Laboratory exercises introducing fundamental principles of inheritance in prokaryotes and eukaryotes. Preq: GEN 302 or concurrent enrollment.

GEN (BIOSC) 405, H405, 605 Molecular Genetics of Eukaryotes 3(3,0) Molecular genetic analyses of eukaryotes in relation to mutations and repair, complex phenotypes, biochemical pathways, short- and long-term regulation of gene expression, and evolution. Preq: GEN 302 or equivalent and one semester of biochemistry, or consent of instructor.

GEN 410, H410, 610 Fundamentals of Genetics I 3(3,0) First in a two-semester sequence in genetics covering Mendelian genetics, topics in cyto genetics, extranuclear inheritance, quantitative, evolutionary, conservation, and population genetics. Preq: CPSC 120 (or equivalent), EXST 301, GEN 302, or consent of instructor.

GEN 411 Fundamentals of Genetics II Laboratory 1(0,3) Crosses are carried out using eukaryotic organisms (C. elegans, Drosophila, yeast) with appropriate markers to follow inheritance. Population and evolutionary genetics concepts are also examined. Preq: GEN 410 or concurrent enrollment.

GEN (BIOSC) 416, 616 Recombinant DNA 3(3,0) Familiarizes students with the most current facts and concepts of molecular genetics. Lectures focus on gene organization, structure, and expression in prokaryotes and eukaryotes, highlighting current technologies and research in these areas. Preq: GEN 302 or equivalent and one semester of biochemistry or consent of instructor. A developmental biology course is also strongly recommended.

GEN (BIOSC, MICRO) 418, 618 Biotechnology I: Nucleic Acids Techniques 4(2,4) Basic training in the manipulation of genetic information using recombinant DNA technology. Includes techniques in molecular cloning, Southern and Northern analyses, clone library construction. Preq: BIOCH 301 or 305, MICRO 305 or consent of instructor.

GEN 420, H420, 620 Fundamentals of Genetics II 3(3,0) Second in a two-semester sequence in genetics covering molecular genetics, gene expression, recombinant DNA technology, genomics, bioinformatics, proteomics, developmental human, cancer, and behavioral genetics. Preq: GEN 410 or consent of instructor.

GEN 421 Fundamentals of Genetics Laboratory 1(0,3) Molecular genetics is emphasized using prokaryotic organisms (lambda or E. coli, B. subtilis) and yeast. Slime molds are used to model developmental processes. Biotechnology methods are introduced. Laboratory exercises are designed to emphasize the principles underlying mammalian and cancer biology. Preq: GEN 420 or concurrent enrollment.

GEN (BIOSC) 440, H440, 640 Bioinformatics 3(3,0) Theory and application of computational technology to analysis of the genome, transcriptome, and proteome. Preq: CPSC 120 (or equivalent). Preq: GEN 410 or consent of instructor.

GEN 450, H450, 650 Comparative Genetics 3(3,0) Outlines the genome structure, function, and evolution based on available complete genome sequences. Topics include the evolution of multigene families, origin of eukaryotic organelles, molecular phylogeny, gene duplication, domain shuffling, transposition, and horizontal gene transfer. Preq: GEN 420, 440 or consent of instructor.

GEN (BIOSC, HORT) 465, 665 Plant Molecular Biology 3(3,0) See HORT 465.

GEN 470, 670 Human Genetics 3(3,0) Basic principles of inheritance; population, molecular and biochemical genetics; cytog enetics; immunogenetics; complex traits; cancer genetics; treatment of genetic disorders; genetic screening and counseling; and the Human Genome Project. Preq: GEN 302 or consent of instructor.

GEN 490 Selected Topics in Genetics 1-4(0,4,0-9) Comprehensive study of selected topics not covered in other courses. May be repeated for a maximum of eight credits, but only if different topics are covered. Preq: Junior standing or consent of instructor.

GEN 491, H491 Directed Research in Genetics 1-8(0,3-24) Orientation in genetic research (i.e. experimental planning, execution, and reporting). May be repeated for a maximum of eight credits. Preq: GEN 410, 411, 420, 421 or consent of instructor.

GEN 493, H493 Senior Seminar 2(2,0) Analysis and discussion of papers from the primary literature in the life sciences particularly in genetics. Students find pertinent articles in the primary literature and present and analyze the selected reading.

GEN (ENT) 495, 695 Insect Biotechnology 3(3,0) See ENT 495.

GEOGRAPHY

Associate Professors: J. A. Miller, C. A. Smith; Lecturer: L. F. Howard

GEOG 101 Introduction to Geography 3(3,0) Survey of the nature of geography emphasizing the discipline’s organizing themes of earth science, relations between people and their environments, interrelations between places, locational analysis, and area studies.

GEOG 103 World Regional Geography 3(3,0) Systematic and descriptive survey of the major regions of the world, including their physical and cultural features. Provides a global context for courses in the social sciences and humanities.

GEOG 106 Geography of the Physical Environment 4(3,3) Examines the condition of the physical environment, especially the earth’s surface and the processes that act on it. Topics range from earth-sun relations to the evolution of landscapes; human habitats and human alteration of the environment.

GEOG 301 Political Geography 3(3,0) Geographic basis of states: sovereignty, territory, power within states, relations between states. The geography of international affairs. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 302 Economic Geography 3(3,0) Spatial analysis of economic activity emphasizing regional economics and development. Topics include world population; technology and economic development; principles of spatial interaction; and geography of agriculture, energy manufacturing, and tertiary activities. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 303 Urban Geography 3(3,0) Historical and contemporary survey of the urban world, with particular attention paid to the relationship between people and urban places. Topics include the rise of cities, urban hierarchies, urban land use, and the social geography of cities. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 305 Cultural Geography 3(3,0) Broad examination of the basic cultural variables in the human occupation of the earth using ecological, spatial, regional, and historical approaches. Topics vary but may include cultural areas and distributions, cultural change, cultural landscape, and cultural ecology. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 306 Historical Geography 3(3,0) Exploration of geographical change and the varied patterns of past human activities and people's relationships with the physical environment. Case studies from around the world are used to emphasize key themes in historical geography. Preq: GEOG 101 or 103 or consent of instructor.
GEOG 330 Geography of the Middle East and North Africa 3(3,0) Thematic survey of a world region extending from Morocco to Afghanistan. Emphasizes climate, environment, social geography, historical development of the regional culture of Islam, and common problems facing the area today. Preq: GEOG 101 or 103, or consent of instructor.

GEOG 340 Geography of Latin America 3(3,0) Introduction to the physical, economic, political, and human/cultural geography of Latin America. Special focus is on regional unity and diversity and the historical interaction of man and environment.

GEOG 360 Geography of Africa 3(3,0) Study of how tropical, or sub-Saharan, Africa functions in the modern world. Africa's physical environments, peoples and cultures, colonial and post-colonial history, and ideologies of economic development. Five basic themes are covered: population, natural resources, environmental quality, political organization, economic development. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 399 Creative Inquiry—Geography 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of nine credits. Preq: GEOG 101, 103, or consent of instructor.

GEOG 401, 601 Studies in Geography 3(3,0) Intensive study of the geography of a selected world region, such as North America, Europe, or the Middle East, or the geography of a topic, such as the geography of oil or the geography of underdevelopment. May be repeated once for credit with departmental consent. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 410, 610 Geography of the American South 3(3,0) Study of the geography of the American South in its changing complexities across almost 400 years of development. Preq: GEOG 101 or 103 or consent of instructor.

GEOG 420, 620 Historical Geography of the United States 3(3,0) Survey that places the spatial concepts of geography into a time sequence with special emphasis upon the United States. Preq: GEOG 101 or 103 or consent of instructor.

GEOG (PRTM) 430, 630 World Geography

GEOL 100 Current Topics in Geology 1(1,0) Lectures and demonstrations covering topics of current interest in the different fields of geology. Recent research developments and career opportunities in the geosciences are emphasized.

GEOL 101, H101 Physical Geology 3(3,0) Study of minerals and rocks which compose earth's crust, their origins and transformations. Emphasizes geological processes, both internal and external, by which changes are produced on or in the earth.

GEOL 102, H102 Earth History 4(3,3) Survey of the earth's geologic history emphasizing how the continents and ocean basins have evolved through geologic time. Evolution of life from the beginning of the fossil record through the present; identification of fossil plants and animals and interpretation of earth's past through study of geologic maps. Field trips illustrate principles. Preq: GEOL 101, 103.

GEOL 103, H103 Physical Geology Laboratory 1(0,2) Laboratory to accompany GEOL 101. Provides instruction in the identification of minerals and rocks and in the interpretation of geologic processes through study of geologic maps. Field trips provide direct observations of processes and results. Preq: GEOL 101.

GEOL 102 Earth Resources 3(3,0) Survey of earth’s mineral, energy, water, and land resources and environmental and societal impacts associated with the use of these resources. Preq: GEOL 101.

GEOL 111 Earth Resources Laboratory 1(0,2) Laboratory to accompany GEOL 102. Provides instruction in the identification of ore and gem minerals and of other earth materials of economic importance. Land and water resources are explored through the use of topographic maps, aerial photographs, remotely sensed images, and field trips. Preq: GEOL 103. Coreq: GEOL 112.

GEOL 205 Mineralogy and Introductory Petrology 3(3,0) Includes crystal symmetry and introduction to x-ray crystallography; composition and stability of minerals, survey of common rock-forming minerals, petrological classification of rocks and introduction to rock associations. Preq: GEOL 101, 103, or consent of instructor.

GEOL 207 Mineralogy and Petrology Laboratory 1(0,2) Identification of rock-forming minerals and important ore minerals based on their physical and optical properties. Hand specimen petrology and petrography of igneous, sedimentary, and metamorphic rocks. Study of minerals in thin section using polarizing microscope. Credit toward a degree will be given for only one of GEOL 207 or 208. Coreq: GEOL 205.

GEOL 210 Geology of the National Parks 3(3,0) Survey of selected national parks and monuments emphasizing the dynamic geological processes which have shaped the landscapes of these areas. Special attention is focused on parks exhibiting recent geological activity related to volcanoes, earthquakes, and glaciers. Slides and films are used to highlight specific geological features.

GEOL 211 Geosynthesis I 4(3,3) Students develop a working knowledge of statistical methods used to formulate and solve problems in the earth sciences. Emphasis is on sampling methods and experimental design for geologic settings and on formulating and evaluating hypotheses using statistical inference of data sets. Preq: MTHSC 108.

GEOL 212 Geosynthesis II 4(3,3) Students develop a working knowledge of deterministic methods used to formulate and solve problems in the earth sciences. Emphasis is on developing conceptual models from geologic field observations, formulating idealized problems, and analyzing and interpreting solutions. Special focus is on using computer software to support analyses. Preq: GEOL 211, MTHSC 108.

GEOL (ASTR) 220 Planetary Science 3(3,0) Survey of the formation and evolution of planetary bodies. Emphasizes the origin of planetary material and comparative study of the primary processes operative on planetary surfaces. Describes major features of the planets and moons in our solar system, as revealed by recent space missions.

GEOL 270 Experiences in Sustainable Development: Water 3(3,0) Integrates cross-disciplinary perspectives on sustainability through active student participation in real-world development projects. Focuses on identifying and overcoming environmental, technical, social/organizational, and economic barriers to the sustainability of water resources. Emphasizes small-scale international water resources development.

GEOL 291 Introduction to Research I 1(1,0) Required group learning and research experience for Geology majors (open to others with consent of instructor). Introduction to problem solving through case studies and interdisciplinary team approaches. Focus is on, but not limited to, research approaches in geology. Social and ethical contexts, communication skills, and professional development are incorporated.

GEOL 292 Introduction to Research II 1(1,0) Required group learning and research experience for Geology majors (open to others with consent of instructor). Introduction to problem solving through case studies and interdisciplinary team approaches. Focus is on, but not limited to, research approaches in geology. Social and ethical contexts, communication skills, and professional development are incorporated. Preq: GEOL 291 or consent of instructor.

Courses of Instruction
Courses of Instruction

GEOL 300, H300 Environmental Geology 3(3,0)
Discussion-oriented introduction to relationships of man to his physical surroundings and problems resulting from upsetting the established equilibria of geologic systems; man’s role as a geologic agent, environmental conservation and management. Preq: GEOL 101 or consent of instructor.

GEOL 302, H302 Structural Geology 4(3,3)
Diverse geological structures of the earth, their description, origin, and field recognition. Practical problems in interpreting geologic structures are utilized, in addition to theoretical considerations of the mechanics and causes of tectonism. Preq: GEOL 102 or consent of instructor.

GEOL 313 Sedimentology and Stratigraphy 4(3,3)
Topics include origin, composition, and texture of sediments and sedimentary rocks; sedimentation processes, depositional environments, facies relationships, and diagenesis; introduction to stratigraphic methods and geochronology. Laboratory involves description and classification of hand specimens and thin sections and analytical methods. Preq: GEOL 206 or consent of instructor.

GEOL 314, H314 Sedimentary Petrology 3(2,3)
Origin, composition, and texture of sediments and sedimentary rocks, including both siliciclastic and chemical varieties. Interpretation of tectonic settings, depositional systems, facies relationships, and diagenesis. Laboratory involves description and classification of hand specimens and thin sections and analytical methods. Preq: GEOL 206 or consent of instructor.

GEOL 318 Introduction to Geochemistry 3(2,2)
Introduction to distribution of elements in the earth’s crust. Discussion of geologic processes involved in the chemical and physical processes involved in magmatic crystallization and metamorphism. Laboratory study of igneous and metamorphic rocks in hand specimen and thin section. Preq: GEOL 101 or consent of instructor.

GEOL 370 Western United States Field Study 3(1,4)
Field excursion to a geologic region in the western U.S. Students spend one week visiting sites where the stratigraphy and structure are well exposed, studying a variety of landforms and the geologic processes responsible for their formation. Pre- and post-trip sessions are held on campus. Additional fees are required. Preq: GEOL 101 or consent of instructor.

GEOL 375, H375 Bahamian Field Study 3(1,4)
Students develop an understanding of Bahamian geology, culture, and social structure (including the influences of historical context and natural environments). Students stay one week on Andros Island in the Bahamas, traveling by van and boat to various sites. Additional fees are required. Preq: GEOL 101 or consent of instructor.

GEOL 391 Research Methods I 1(1,0) Required
group learning and research experience for Geology majors (open to others with consent of instructor). Introduction to problem solving through case studies and interdisciplinary team approaches. Focus is on, but not limited to, research methods in geology. Social and ethical contexts, communication skills, and professional development are incorporated. Preq: GEOL 292 or consent of instructor.

GEOL 392 Research Methods II 1(1,0)
Required group learning and research experience for Geology majors (open to others with consent of instructor). Introduction to problem solving through case studies and interdisciplinary team approaches. Focus is on, but not limited to, research methods in geology. Social and ethical contexts, communication skills, and professional development are incorporated. Preq: GEOL 391 or consent of instructor.

GEOL 403, 603 Invertebrate Paleontology 3(2,3)
Study of life of past geologic ages as shown by fossilized remains of ancient animals, with emphasis on the invertebrates. Preq: GEOL 101 or consent of instructor.

GEOL 405, 605 Surficial Geology 4(3,3)
Study of surface features of the earth and the processes that produce them. Analysis of landforms including their form, nature, origin, development, and rates and patterns of change. Laboratory study emphasizes terrain analysis and the investigation of surficial geologic features. Preq: GEOL 102, 300, or consent of instructor.

GEOL 408, 608 Hydrogeology 3(3,0) Study of the hydrologic cycle, aquifer characteristics, thermal and geothermal energy, mechanics of well flow, experimental methods, and subsurface mapping. Preq: GEOL 101, 102.

GEOL 409 Subsurface Methods 4(3,3) Students develop an understanding of the principles and methods used to acquire, analyze, and interpret subsurface geologic data. Emphasizes borehole measurements; seismic gravimetric, magnetic, and electrical methods; and their applications to hydrogeology, remediation, and oil and gas exploration. Preq: GEOL 313.

GEOL 411, H411 Research Problems 1-3(0,3-9) Field, laboratory, or library study of an approved topic in geology. Topic would be one not normally covered in formal courses, but may be an extension of a course. Taught either semester. May be repeated for a maximum of six credits. Preq: Senior standing or consent of instructor.

GEOL 413, 613 Stratigraphy 3(2,2) Analysis of stratified rocks as the repository of earth history and the conceptual framework used to synthesize the world geologic record as a coherent whole. Emphasizes not only traditional lithostratigraphy but also modern seismic stratigraphy, biostratigraphy, magnetostratigraphy, and current stratigraphic issues. Preq: GEOL 314 or consent of instructor.

GEOL 415 Analysis of Geological Processes 3(3,0) Introduction to methods for analyzing geological processes. Mathematical methods are introduced to solve problems related to stream flow, reaction kinetics, radioactive decay, heat flow, diffusion, fluid flow through geologic media and related processes. Preq or Coreq: MTHSC 206 or consent of instructor.

GEOL 421, 621 GIS Applications in Geology 3(1,4)
Introduction to geographic information systems with applications to current geologic and hydrological problems. Topics include the use of global positioning systems, spatial analysis, and image analysis. Hands-on training with geographic information systems software and techniques is covered in lab. Preq: Senior standing, strong computer skills.

GEOL 431, 651 Selected Topics in Hydrogeology 1-4(1-3,0-3) Selected topics in hydrogeology emphasizing new developments in the field. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: GEOL 300 or 408, or consent of instructor.

GEOL 475 Summer Geology Field Camp 6(4,6)
Introduction to field techniques emphasizing methods applied to hydrogeology. Includes description and mapping of hydrogeologic units and structures using outcrop data and lithologic and geophysical well logs. Also covers construction of potentiometric maps from water level data, performance of pumping tests on mapped aquifers, and analysis of data to determine aquifer characteristics. Preq: GEOL 205 and 302, or consent of instructor.

GEOL 491 Research Synthesis I 4(3,3) Required
capstone group learning and research experience for Geology majors (open to others with consent of instructor). Involves synthesis of applied geology and other approaches for problem solving through collaborative teams. Course is the culmination of a sequence of case studies incorporating social and ethical contexts, communication skills, and professional development. Preq: GEOL 392 or consent of instructor.

GEOL 492 Research Synthesis II 4(3,3) Required
capstone group learning and research experience for Geology majors (open to others with consent of instructor). Involves synthesis of applied geology and other approaches for problem solving through collaborative teams. Course is the culmination of a sequence of case studies incorporating social and ethical contexts, communication skills, and professional development. Preq: GEOL 491 or consent of instructor.

GERMAN
Professor: H. M. Riley; Associate Professors: G. J. Love, J. Schmidt; Lecturers: L. J. Ferrell, J. T. Littlejohn; Adjunct Professor: M. M. Sinka

GER 101 Elementary German 4(3,1) Course for beginners in which, through conversation, composition, and dictation, the fundamentals of the language are taught and a foundation is provided for further study and the eventual ability to read and speak the language. Three hours a week of classroom instruction and one hour a week in the language laboratory.

GER 102 Elementary German 4(3,1) Continuation of GER 101; three hours a week of classroom instruction and one hour a week in the language laboratory.

GER 104 Basic German 4(3,1) Intensive one-semester program combining GER 101 and 102 for students who have previously studied German. Includes fundamentals of grammar and vocabulary as a foundation for written and oral proficiency.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GER 151</td>
<td>German for Graduate Students 3(3,0)</td>
<td>Intensive program only for graduate students preparing for the reading examination in German. A minimum grade of B on a final examination will satisfy graduate school foreign language requirement. May be repeated once for credit. To be taken Pass/Fail only. Preq: Graduate standing.</td>
<td></td>
</tr>
<tr>
<td>GER 201, H201</td>
<td>Intermediate German 3(3,1)</td>
<td>Brief review of GER 101 and 102, with conversation, composition, and dictation, and the reading of more serious German prose in short stories and plays. Includes literary and cultural perspectives. Preq: GER 102.</td>
<td></td>
</tr>
<tr>
<td>GER 202, H202</td>
<td>Intermediate German 3(3,1)</td>
<td>Emphasizes reading nontechnical German prose more rapidly. Writing, speaking, and listening skills continue to be developed. Includes literary and cultural perspectives. Preq: GER 201 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 260</td>
<td>Selected Topics in German Literature 3(3,0)</td>
<td>Study of significant aspects of German literature. Conducted in English.</td>
<td></td>
</tr>
<tr>
<td>GER 297</td>
<td>Creative Inquiry—German 1-4(1,4,0)</td>
<td>In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.</td>
<td></td>
</tr>
<tr>
<td>GER 299</td>
<td>Foreign Language Drama Laboratory 10(0,3)</td>
<td>Participation in foreign language drama productions. No formal class meetings, but an average of three hours per week in a foreign language drama workshop for production. May be repeated for a maximum of three credits. Preq: Consent of instructor directing the play.</td>
<td></td>
</tr>
<tr>
<td>GER 305</td>
<td>German Conversation and Composition 3(3,0)</td>
<td>Training in spoken and written German emphasizing vocabulary acquisition, oral and written communication strategies, appropriate linguistic formulations for specific cultural contexts, and stylistics. Preq: GER 202 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 306</td>
<td>The German Short Story 3(3,0)</td>
<td>Examines the Austrian, German, and Swiss short story as a distinct literary genre that flourished particularly after 1945. Provides ample conversation and composition practice, as well as an introduction to principles of literary prose analysis. Preq: GER 202 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 310</td>
<td>Summer Immersion Program 6(6,0)</td>
<td>Conducted entirely in German for eight hours daily. Program consists of activities that combine interrelating cultural topics with language skill practice. Frequent opportunities to converse with native speakers during meals and on excursions. Students receive six credits, three of which may be taken in lieu of GER 202. Preq: GER 201.</td>
<td></td>
</tr>
<tr>
<td>GER 316</td>
<td>German for International Trade I 3(3,0)</td>
<td>Spoken and written German common to the German-speaking world of business and industry emphasizing business practices and writing and translating business letters and professional reports. Cross-cultural references provide opportunity for comparative and contrastive analysis of American and German cultural patterns in a business setting. Preq: GER 202 and 305 (or concurrent enrollment); or consent of department chair.</td>
<td></td>
</tr>
<tr>
<td>GER 340</td>
<td>German Culture 3(3,0)</td>
<td>Examines the cultures of German-speaking nations from their origins to the present. Emphasizes the Federal Republic of Germany both before and after the German unification of 1990. Preq: GER 202 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 360</td>
<td>German Literature to 1832 3(3,0)</td>
<td>Examines selected topics in German literature from the Middle Ages to 1832. Readings may include works by Lessing, Goethe, Schiller, and the Romantics. Preq: GER 305 or 306 (or concurrent enrollment) or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 361</td>
<td>German Literature from 1832 to Modernism 3(3,0)</td>
<td>Examines drama, poetry, and prose from the Biedermeier period through naturalism and realism to the advent of Modernism. Preq: GER 305 or 306 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 369</td>
<td>Special Topics in German Literature 3(3,0)</td>
<td>Study of a significant aspect of German literature. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: GER 305 or 306 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 379</td>
<td>Directed Reading 1-3(1-3,0)</td>
<td>Directed study of selected topics in German literature, language, and culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.</td>
<td></td>
</tr>
<tr>
<td>GER 405</td>
<td>Advanced Contemporary German Language 1-3(0)</td>
<td>Advanced study of spoken and written contemporary German based on modern autobiographical texts, eyewitness accounts of recent historical events, and media coverage of current events. Emphasizes Internet, print and audio texts, TV programs, and photo series. Preq: One 300-level German course or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 410</td>
<td>German for International Trade II 3(3,0)</td>
<td>Studies language and cultural environment of the German-speaking markets of the world, including linguistic and cultural idioms which support global marketing in general and the international marketing of textiles, agricultural products, and tourism in particular. Preq: GER 316.</td>
<td></td>
</tr>
<tr>
<td>GER 417</td>
<td>Topics in German for International Trade 3(3,0)</td>
<td>Examination and analysis of selected topics related to the business culture and economy of Germany, Austria, Switzerland, the European Union, or the European Free Trade Association. Topics may include the reconstruction of eastern Germany's economy, the expansion of the European Union, or current events of economic importance. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: One 300-level German course or consent of department chair.</td>
<td></td>
</tr>
<tr>
<td>GER 450</td>
<td>Advanced Studies in German Drama 3(3,0)</td>
<td>Extensive study of a major theme or aspect of German drama. May include recorded live performances, stage design, theatre architecture, and the music and art of the theatre. Preq: GER 305 or 306 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 455</td>
<td>German Film 3(2,3)</td>
<td>Overview of German cinema including the expressionist classics of the Weimar Republic, entertainment and documentary movies of the Nazi era, classics of the postwar New German Wave (West Germany), distinctive East German films, and vanguard contemporary films. Preq: GER 305 or 306 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 460</td>
<td>Modernism in German Literature 3(3,0)</td>
<td>Study of major works of German literature and culture in the modernist era (1888–1933). May include drama, music, philosophy, and the plastic arts. Preq: GER 305 or 306 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 461</td>
<td>German Literature Since 1933 3(3,0)</td>
<td>Study of selected authors, texts, or genres in contemporary German literature. Preq: GER 305 or 306 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 475</td>
<td>Advanced German Seminar 3(3,0)</td>
<td>Concentrated research and discussion on advanced topics, works, or texts in German literature, film, art, drama, music, or philosophy. Conducted in German. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: One 400-level German course or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 476</td>
<td>Advanced Seminar in German Thought 3(3,0)</td>
<td>Concentrated research and discussion on advanced topics, works, or texts in German literature, film, art, drama, music, or philosophy. Conducted in English. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Senior standing or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 497</td>
<td>Creative Inquiry—German 1-4(1,4,0)</td>
<td>Continuation of research initiated in GER 397. Students complete their project and disseminate their research results. Preq: GER 397 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>GER 498, 698</td>
<td>Independent Study 1-3(1-3,0)</td>
<td>Supervised study of selected topics in German literature, language, or culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.</td>

**GRAPHIC COMMUNICATIONS**

Professors: S. T. Ingram, Chair; J. M. Leininger; Associate Professors: J. B. Simmons, E. M. Weisenmiller; Assistant Professors: L. H. O’Hara, N. L. Woolbright; Research Assistant Professor: C. E. Tonkin; Senior Lecturers: N. W. Leininger, P. G. Rose; Lecturers: K. T. Cox, C. D. Jones, R. N. Marsoun, J. K. Sprey, M. H. Wayne, D. N. Woolbright; Visiting Professors: J. P. Crouch, F. T. Simon, W. E. West; Adjunct Professors: S. Edlein, L. W. Evans; Visiting Lecturers: R. S. Edlein, K. K. Osborne; Adjunct Lecturer: F. C. Porcher

G C 101 Orientation to Graphic Communications 1(1,0) Introduction to the curriculum and the industry including its processes, products, and careers. Emphasizes the attributes which are most desirable for successful entry and advancement up a variety of career ladders.
G C 103 Graphic Communications I for Packaging Science 4(2,6) Emphasizes the interrelationships of packaging and graphic arts. Topics include theory and practice in packaging requirements relative to basic graphic arts concepts, principles, and practices; layout; design; electronic copy preparation; the printing processes of offset lithography; screen printing; gravure; and flexography. Includes digital and specialty printing processes, environmental, health, and safety concerns.

G C 104, H104 Graphic Communications I 4(2,6) Emphasizes basic graphic arts industrial concepts, principles, and practices, with laboratory applications in photography, layout and design, conventional and electronic copy preparation, reproduction photography, offset lithography, screen printing, and finishing operations. Flexography, gravure, letterpress, and specialty printing processes are also covered, along with environmental, health, and safety concerns.

G C 165 Foundations in Graphic Communications 4(2,6) Provides basic experience in CAD/technical drawing, along with a basic understanding of safety, polymers, electrical, pneumatic, hydraulic, mechanical drive, and lubrication systems as a foundation for other GC core courses and future careers in the printing, packaging, and allied industries.

G C 199 Creative Inquiry—Graphic Communications I 1-3(1-3,0) Under the direction of a faculty member, students pursue approved scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Sophomore standing.

G C 207, H207 Graphic Communications II 3(1,6) Continuation of GC 104. Intermediate course for graphic communications and graphic arts specialists which broadens skills and technical knowledge in areas of layout, copy preparation, reproduction photography, film assembly, screen printing, lithographic presswork, and finishing. Preq: GC 101, 104, typewriter/computer keyboarding skills of 20 net words per minute.

G C 215, H215 Photographic and Digital Imaging Techniques 3(1,6) Emphasizes application of black and white and color imaging by photographic and digital technologies. Laboratory experiences assure confidence in the use of photographic and digital techniques for creating and enhancing original images for graphic reproduction and distribution.

G C 299 Creative Inquiry—Graphic Communications II 1-3(1-3,0) Under the direction of a faculty member, students pursue approved scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Sophomore standing.

G C 310, H310 Applied Principles of Electronic Workflow 4(2,6) Promotes the refining of skills learned in GC 104 and 207, with an in-depth study and application of computerized press systems and methodologies. Serves as a transition course to the advanced graphic classes teaching offset lithography, flexography, screen printing, and gravure. Preq: GC 207, 215, or consent of instructor.

G C 350 Graphic Communications Internship I 1(0,3) Full-time supervised employment in an industrial in-plant setting for expansion of experience with materials and processes, production people, and organizations. Restricted to Graphic Communications majors. Preq: GC 104 or equivalent, consent of instructor. Coreq: CO-OP 101.

G C 399 Creative Inquiry—Graphic Communications III 3-1(1-3,0) Under the direction of a faculty member, students pursue approved scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Junior standing.

G C 405, H405, 605 Package and Specialty Printing 2(2,0) Problems and processes for printing and converting in package, label, and specialty printing industries. Flexographic preparation, printing, die making, diecutting, transfer printing, screen container bottom pad printing, and bar code production are covered. New developments and trends are discussed. Preq: GC 165, 310, 350; concurrent enrollment in GC 306; or consent of instructor.

G C 406, H406, 606 Packaging and Specialty Printing Laboratory 2(0,0) Laboratory in techniques for printing and converting in package, label, and specialty printing industries. Experiences in flexographic process; printing; die design, die making and diecutting for label, folding cartons and corrugated; and glass, plastic, and metal container printing. Preq: GC 165, 310, 350; concurrent enrollment in GC 405; or consent of instructor.

G C 407, 607 Advanced Flexographic Methods 4(2,6) In-depth study of the methods used in flexographic printing and converting of porous and nonporous substrates. Theory and laboratory applications include setting standards for process color, preparation of plate systems, ink mixing and color matching, testing of films and foils, analysis of recent developments, and prediction of future markets. Preq: GC 406 or consent of instructor.

G C 440, H440, 640 Commercial Printing 5(2,9) Advances skills learned in previous graphic communications courses and applies the knowledge to large format presses. Students work from the design conception stage through all aspects of preparation, production, and finishing. Emphasizes understanding and incorporating emerging technologies into the production workflow. Preq: GC 310 and 350 or consent of instructor.

G C 444, H444, 644 Current Developments and Trends in Graphic Communications 4(2,6) Advanced course for Graphic Communications majors. Emphasizes the theory and technical developments that affect process and equipment selection. Topics include color theory and application, electronic color scanning, electronic prepress and communications, gravure color quality control and analysis. Preq: GC 405, 406, 440.

G C 445, 645 Advanced Screen Printing Methods 3(2,3) In-depth study of the systems and materials used with the screen printing process. Emphasizes techniques of control and procedures for establishing screen printing methods and standards. Preq: GC 207 or consent of instructor.

G C 446, 646 Ink and Substrates 3(2,3) Covers components, manufacturing, process use as well as end use of ink and substrates used in lithography, flexography, gravure, and screen printing. Examines the interrelationship between inks, substrates, and the printing process. Through controlled testing and examination, optimum conditions for improved printability are determined. Preq: GC 405, 406 or 440; or consent of instructor.

G C 448, H448, 648 Planning and Controlling Printing Functions 3(2,3) Study of systems for controlling printing production standards, estimating, scheduling, job planning, and the selection of new hardware and technologies. Preq: GC 350, 405, 406, 440, 450 or consent of instructor.

G C 450 Graphic Communications Internship II 1(0,3) Continuation of GC 350. Preq: GC 350, 405, 406 or 440; consent of instructor. Coreq: CO-OP 102.

G C 451, H451 Special Projects in Graphic Communications 1-6(0,3-18) Advanced projects covering theory and/or practices going beyond the scope of regular coursework. Written project approval is required before registering. May be repeated with advisor’s approval. Preq: Junior standing, completion of three graphic communications courses, or consent of instructor.

G C 455 Advanced Graphic Communications Internship 1-0(3) Full-time employment in an industry directly or indirectly related to printing. Work site and job must be approved in advance. Preq: GC 350.

G C 480 Senior Seminar in Graphic Communications 2(2,0) Study of current trends and issues in the graphic communications industry. Class centers around group discussions dealing with relevant topics facing the graphic communications manager today. Students draw upon academic experiences, internship experiences, and library research to facilitate discussion. Must be taken during student’s last semester on campus. Preq: GC 450.

G C 490, 690 Graphic Communications Selected Topics 1-3(1-3,0) Subjects not covered in other graphic communications courses; organized according to industry trends and student needs. May be repeated for a maximum of 18 credits, but only if different topics are covered. Preq: Consent of instructor.
G C 499 Creative Inquiry—Graphic Communications IV 1-3(1-3,0) Under the direction of a faculty member, students pursue approved scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Senior standing.

GREAT WORKS

G W (ENGL) 301, H301 Great Books of the Western World 3(3,0) Introduces Great Works minor. Includes readings about the Great Books concept, as well as various great books from the humanities, arts, and natural and social sciences. Preq: Sophomore literature.

G W 402, H402 Great Works of Science 3(3,0) Understanding of science in terms of its history and its approach to problem-solving through study of selected great works. Emphasis is on developing students’ abilities to reflect on the problems and methodologies encountered in the scientific method.

G W 403, H403 Special Topics in Continental Literature 3(3,0) Important primary texts written in modern European languages are taught in English. Content varies according to instructor. Preq: Sophomore literature.

G W 405, H405 The Darwinian Revolution 3(3,0) Examination of Charles Darwin’s The Origin of Species and its cultural impact from his time to ours. Topics include the contemporaneous reception of Darwin’s work, the Scopes Monkey Trial, and more recent controversies over Creationism and Intelligent Design. Preq: Sophomore literature.

HEALTH

Professors: L. A. Crandall; Chair; C. J. Dye, D. B. Jackson, J. B. Kingree; Research Professor: A. B. Thompson; Associate Professors: G. E. Castello, K. A. Kemper, R. M. Mayo, W. W. Sherfill, H. D. Spitler; Assistant Professors: G. Breeeden, D. Falta, S. Griffin, J. Williams; Senior Lecturer: K. M. Meyer; Lecturers: C. S. Chambers, R. S. Welsh; Adjunct Professors: G. L. Adams, B. F. Campbell, V. S. Gallicchio, W. J. Jones, M. C. Rioridan, S. Verderber; Adjunct Lecturer: D. M. Charles

HLTH 202 Introduction to Public Health 3(3,0) Examination of the forces that have influenced current health delivery systems, health practices, and trends. General systems theory is introduced. Health majors and minors will be given enrollment priority.

HLTH 203 Overview of Health Care Systems 3(3,0) Introduction to the health care delivery system including public health and health care components. Examines and discusses individual and public expectations of need and demand for health care and delivery of public health and health care services.

HLTH 240 Determinants of Health Behavior 3(3,0) Analysis of health behaviors based on psychological, social, cultural, and environmental factors. Introduces health behavior theories. Coreq: Health Science major.

HLTH 250 Health and Fitness 3(3,0) Study of interrelationship between health and fitness. Emphasizes the cardiovascular system and benefits of exercise.

HLTH 298 Human Health and Disease 3(3,0) Study of good health practices emphasizing lifestyle and measures of health. Health majors and minors will be given enrollment priority.

HLTH 303 Public Health Communication 3(3,0) Introduction to the use of health and communication theory and social marketing strategies to create effective, evidence-based, culturally appropriate health communication messages and campaigns. Preq: HLTH 240, 298.

HLTH 305 Body Response to Health Behaviors 3(3,0) Positive benefits and the negative impact of certain behaviors at cellular, organ, and body-system levels are examined. The pathways of selected injury and disease are explored. Expected physiological changes are applied in identifying strategies for promoting health in the presence (or absence) of disease. Health majors and minors will be given enrollment priority. Coreq: BIOSC 223 or consent of instructor.

HLTH 310 Women’s Health Issues 3(3,0) Exploration of specific health needs of women, with emphasis on understanding and preventing problems of women’s health. Health majors and minors will be given enrollment priority. Preq: Two-semester sequence in science or consent of instructor.

HLTH 315 Social Epidemiology 3(3,0) Exploration of the current social and issues associated with the health of population groups. The interrelationships of biological, social-cultural, behavior, environmental, political, and economic risk factors and the health and illness patterns of those in population groups are examined. Preq: HLTH 240, 298 or consent of instructor.

HLTH 340 Health Promotion Program Planning 3(3,0) Students develop skills to conduct community health needs assessments and to plan and evaluate theoretically grounded health promotion intervention programs for diverse populations. Best practices for specific health behavior change interventions are identified. Preq: HLTH 240, 298.

HLTH 350 Medical Terminology and Communication 3(3,0) Skills in building, analyzing, defining, pronouncing, and spelling medical terms related to the human body are developed and applied through electronic communication. Preq: Junior standing or consent of instructor.

HLTH (AP EC, C R D) 361 Introduction to Health Care Economics 3(3,0) See C R D 361.

HLTH 380 Epidemiology 3(3,0) Introduces epidemiological principles and methods used in the study of the origin, distribution, and control of disease. Health majors and minors will be given enrollment priority. Coreq: Approved statistics course.

HLTH H395 Honors Research Seminar 3(3,0) Students review basic steps in the development of an honors research proposal and develop a draft of the proposal under the supervision of a faculty mentor. Students are also required to attend research presentations of senior departmental honors students. Preq: HLTH 380, Junior standing, statistics course, or consent of instructor.

HLTH 398 Health Appraisal Skills I 1(0,3) Utilizes laboratory experiences to measure health risk, interpret laboratory health data, and design personal health programs. Restricted to Health Science majors. Preq: HLTH 298.

HLTH 400, 600 Selected Topics in Health 1-3(1-3,0) Topics selected to meet special and individualized interest of students in health. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Junior standing, consent of instructor.

HLTH 401, 601 Health Consumerism 3(3,0) Exploration of consumer decisions regarding health products and services emphasizing strategies for decision making. Health majors and minors will be given enrollment priority. Preq: Two-semester sequence in science or consent of instructor.

HLTH 402 Principles of Health Fitness 4(3,1) Students apply current theories concerning physiological effects of exercise to select populations; understand the relationship between exercise and various chronic diseases; and design, execute, and evaluate exercise programs in terms of safety and effectiveness. Preq: HLTH 398, CPR certification. Coreq: BIOSC 223.

HLTH 410, 610 Maternal and Child Health 3(3,0) Focuses on key issues concerning the health status and needs of mothers and children. Topics include primary health care, measurement and indicators of health status, health of minorities, role of families, and major programmatic interventions towards the health needs of these two groups.

HLTH 411 Health Needs of High Risk Children 3(3,0) Analysis and evaluation of health needs of high-risk families and special needs children from the prenatal period to age six. Emphasizes health maintenance and early intervention strategies. Preq: HLTH 410.

HLTH 415, 615 Public Health Issues in Obesity and Eating Disorders 3(3,0) In-depth review of prevalence, risk factors, consequences, and treatments of obesity and other eating disorders. Focuses on the public health importance of cultural norms, prevention, and early intervention related to obesity and eating disorders. Preq: Junior standing in Health Science or consent of instructor.

HLTH 419 Health Science Internship Preparation Seminar 1(1,0) Preparation for internship experience. Includes topics such as résumé development, interviewing skills, internship agency selection, and responsibilities of student, department, and agency. Preq: Junior standing in Health Science, ENGL 304 or 314.
HLTH 420, 620 Health Science Internship 1-6(0,3-18) Under supervision in an approved agency, students have an opportunity for on-the-job experiences. Students are placed in an agency and develop professional goals and objectives appropriate to the setting, population, and health issues. Students create a comprehensive exit portfolio in a digital format. May be repeated for a maximum of six credits. Preq: HLTH 419, minimum grade-point ratio of 2.0, Junior standing in Health Science, consent of instructor.

HLTH 430, 630 Health Promotion of the Aged 3(3,0) Focuses on analysis and evaluation of health issues and health problems of the aged. Emphasizes concepts of positive health behaviors. Health majors and minors will be given enrollment priority. Preq: Developmental psychology, two-semester sequence in science, or consent of instructor.

HLTH 431 Public and Environmental Health 3(3,0) Principles of environmental health emphasizing understanding various health concerns created by the interactions of people with their environment. Students evaluate the impact of environmental factors on public health policy. Meets specific area of need in environmental health issues.

HLTH 440 Managing Health Service Organizations 3(3,0) Provides the conceptual and theoretical foundation of management and organizational theory of health service organizations. Focuses on the role of health services managers and how they modify and maintain organizations.

HLTH 450, 650 Applied Health Strategies 3(3,0) Students plan, implement, and evaluate strategies to promote health through individual behavior changes. Both healthful and unhealthful behaviors are included. Examples include smoking cessation, weight management, and stress management. Preq: HLTH 480, Health Science major.

HLTH 460 Health Information Systems 3(3,0) Focuses on the application of information systems to patient care and management support systems. Provides a general understanding of how the information needs of health professionals and health service organizations can be met through the proper acquisition, storage, analysis, retrieval, and presentation of data.

HLTH 470 International Health 3(3,0) Deepens students' knowledge of global health and how public health work is conducted internationally. Introduction to assessment of international health needs and designing, implementing, managing, and evaluating public health programs in international settings. Preq: HLTH 298.

HLTH 475 Principles of Health Care Operations Management and Research 3(3,0) Provides a foundation in concepts, structure, and analysis that enables an understanding of the importance of production/operations management within health care organizations and systems. Includes training in operations research methods and objectives. Preq: HLTH 490.

HLTH 478 Health Policy Ethics and Law 3(3,0) Critical examination of the legal and ethical dimensions of public health policy formation and change and how legal, ethical, and policy considerations influence health services administration and delivery. Health majors and minors will be given enrollment priority. Preq: HLTH 202, 240, 298, 380 or consent of instructor.

HLTH 479 Financial Management and Budgeting for Health Service Organizations 3(3,0) Overview of basic principles of budgeting and financial management and analysis for health services organizations. Techniques for financial management are provided with an emphasis on health services environments. Preq: HLTH 440.

HLTH 480 Community Health Promotion 3(3,0) Focuses on the participatory approach in the planning and implementation of community health programs. Emphasizes professional ethics, needs assessment, coalition building, proposal writing, and implementation of special events in the community. Preq: HLTH 303, 340, 350, Health Science major.

HLTH 490 Research and Evaluation Strategies for Public Health 3(3,0) Discusses research in health. Focuses on analysis of reported research. Ethical, moral, and legal issues are discussed. Preq: EX ST 301, MTHSC 203, or 301.

HLTH H495 Honors Thesis Seminar 3(3,0) Senior honors thesis seminar in public health sciences. Independent research is conducted under the supervision and guidance of a faculty mentor for students enrolled in departmental honors program. A research honors thesis/service learning research project. Preq: HLTH H395, Senior standing, consent of instructor.

HLTH H496 Honors Research Colloquium 1(1,0) Students enrolled in departmental honors program independent research conducted under the supervision of a faculty member in a public health research forum to other honors students and faculty. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Junior standing, consent of instructor.

HLTH H495 Honors Thesis Seminar 3(3,0) Senior honors thesis seminar in public health sciences. Independent research is conducted under the supervision of a faculty mentor for students enrolled in departmental honors program. A research honors thesis/service learning research project. Preq: HLTH H395, Senior standing.

HLTH 497 Creative Inquiry—Public Health 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

HLTH 498, 698 Improving Population Health 3(3,0) Critical examination of current and emerging issues in improving public health practice and population health. Covers examples in empirical and applied research, revealing future trends in population health. Health Science majors and minors will be given enrollment priority. Preq: HLTH 240, 298, 380, or consent of instructor.

HLTH 499 Independent Study 1-3(1-3,0) Study of selected problems in health under the direction of faculty member chosen by the student. Student and faculty member develop a course of study designed for the individual student and approved by the department chair prior to registration. May be repeated for a maximum of three credits. Preq: Junior standing or consent of instructor.

HEALTH, EDUCATION, AND HUMAN DEVELOPMENT

HEHD 199 Creative Inquiry I 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue a first phase of scholarly activities in teams. These creative inquiry projects may be discipline-specific or interdisciplinary in nature. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Consent of instructor.

HEHD 299 Creative Inquiry II 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue a second phase of scholarly activities in teams. These creative inquiry projects may be discipline-specific or interdisciplinary in nature. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Sophomore standing, consent of instructor.

HEHD 299 Creative Inquiry III 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue a third phase of scholarly activities in teams. These creative inquiry projects may be discipline-specific or interdisciplinary in nature. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Junior standing, consent of instructor.

HEHD 299 Creative Inquiry IV 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue a fourth phase of scholarly activities in teams. These creative inquiry projects may be discipline-specific or interdisciplinary in nature. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits. Preq: Senior standing, consent of instructor.

HISTORIC PRESERVATION

Professor: J. Burden
H P 410, 610 History and Theory of Historic Preservation 3(3,0) Survey history of preservation that explores a variety of theoretical issues that impact the discipline. Provides a basis for critical evaluation of historic preservation. Preq: Three semesters of Art and Architectural History or equivalent or consent of instructor.

H P 411, 611 Research and Documentation in Historic Preservation 3(3,0) Introduction to documenting and recording historic buildings and landscapes. Charleston and its environs provide case study projects for archival research, field investigation, and preparation of final documentation. Preq: Three semesters of Art and Architectural History or equivalent or consent of instructor.

H P 412, 612 Materials and Methods of Historic Construction 3(3,0) Survey of traditional materials and methods of construction in America from the 18th through the early 20th century. Scientific examination of historic construction provides case studies. Preq: Three semesters of Art and Architectural History or equivalent or consent of instructor.
HISTORY

HIST 100 Higher Education and Clemson 1(1,0) Introduction to higher education, its background and development in the western world, emphasizing land-grant institutions and Clemson University in particular.

HIST 101, H101 History of the United States 3(3,0) Political, economic, and social development of the American people from the period of discovery to the end of Reconstruction.

HIST 102, H102 History of the United States 3(3,0) Political, economic, and social development of the American people from the end of Reconstruction to the present.

HIST 122, H122 History, Technology, and Society 3(3,0) Topics in the history of technology with emphasis on how technology affects society and how society shapes technology. Emphasis is on 19th and 20th century America, but some material from other periods of Western Civilization and other world regions may be discussed.

HIST 124, H124 Environmental History Survey 3(3,0) Introduction to environmental history, in the United States and globally, with emphasis on changing attitudes toward the environment and the interaction between science and public policy.

HIST 172, H172 The West and the World I 3(3,0) Examines the history of the West from early times until the 16th century. After a comparative evaluation of the emergence of civilization around the globe, course concentrates on the history of the peoples of Europe up to the age of European exploration and overseas expansion.

HIST 173, H173 The West and the World II 3(3,0) Surveys the history of the West in modern times, from the late 15th century to the present. Particular emphasis is placed on Europe's interaction with non-western societies. Through cross-cultural comparisons, European history is placed in global context.

HIST 193 Modern World History 3(3,0) Political, economic, social, and cultural history of the modern world from the 19th century to the present.

HIST 198 Current History 1(1,0) Examination of major events and problem areas in the news emphasizing their historical context and possible long-range significance. May be repeated for a maximum of three credits. Does not count toward the requirements of the major or minor in History.

HIST 200 Fort Hill Internship 1-3 Provides practical experience in public history museum work and/or historical preservation in the setting of Fort Hill. May be repeated for a maximum of three credits. To be taken Pass/Fail only. Prq: Consent of internship committee.

HIST 201 Prelaw Internship 1-3 Faculty-supervised internship in a law firm or other legal setting. Introduces students to the workings of the legal system. To be taken Pass/Fail only. Prq: History major and sophomore standing.

HIST 202 Internship 1-3(0,3-9) Exposes History majors to hands-on experience in research, analysis, and public presentation of historical scholarship. May include working with faculty on research projects or museums, historical organizations, or sites. May be repeated for a maximum of three credits. To be taken Pass/Fail only. Prq: Sophomore standing.

HIST 289 Creative Inquiry—History 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of nine credits.

HIST 299 Seminar: The Historian's Craft 4(3,2) Writing and speaking intensive course to introduce History majors to study of what history is and what a historian does, including historiography, research techniques, ethics of the historical profession, and forms of presentation. Prq: History major.

HIST 300 History of Colonial America 3(3,0) Development of American institutions and customs in the period before 1776. Considerable emphasis is placed on the imperial relations between Great Britain and her colonies and upon the movement toward and the philosophy of the American Revolution.

HIST 311 American Revolution and the New Nation 3(3,0) Study of the various historical associations leading to an understanding of the American Revolution, the establishment of the Nation under the Constitution, and the first decade of the new nation. Special emphasis is on developing an understanding of individual motivation and ideological development present during the last four decades of the 18th century.

HIST 302 Age of Jefferson, Jackson, and Calhoun 3(3,0) Formation and growing pains of the new nation through the Federal and Middle periods of its history emphasizing economic and political development, the westward movement, and the conflicting forces of nationalism and sectionalism.

HIST 303 Civil War and Reconstruction 3(3,0) Study of the political, military, and social aspects of the sectional conflict and of the era of Reconstruction. Some emphasis is placed on the historical controversies which the period has inspired.

HIST 304 Industrialism and the Progressive Era 3(3,0) Study of American society in the period between the 1880s and 1930s. Emphasizes the effects of industrialization and urbanization on the American people.

HIST 305 The United States in the Jazz Age, Depression, and War: 1918–1945 3(3,0) Starting at Armistice Day, 1918, course analyzes the dawn of the ages of mass consumption and mass communication, the Crash of 1929, Franklin Roosevelt and the New Deal, the gathering war clouds in Europe and Asia, and the Great Crusade of World War II. Prq: Sophomore standing.

HIST 306 The United States in the Postwar World: 1945–1975 3(3,0) Examination of the American experience from the end of World War II through the period of the Korean and Vietnam wars, the Cold War, the Civil Rights movement, the counter-culture of the 1960s, assassinations, and Watergate.

HIST 308 The United States in the Age of Reagan and Clinton: 1975–Present 3(3,0) The United States and the world in the recent era of economic and political upheaval, the end of the Cold War, the rise of the global economy and terrorism, social and cultural change, and deepening political and social divisions. Prq: Sophomore standing.

HIST 311 African Americans to 1877 3(3,0) Study of the African-American experience in the United States from the African past through slavery to 1877.

HIST 312 African American History from 1877 to the Present 3(3,0) Study of African American experience in the United States from 1877 to the present.

HIST 313, H313 History of South Carolina 3(3,0) Political, economic, and social development of South Carolina from 1670 to the present.

HIST 314 History of the South to 1865 3(3,0) Origins and development of political, social, economic, and cultural institutions of the South from the Colonial period to the end of the Civil War and the role of the South in the nation's development.

HIST 316 American Social History 3(3,0) Study of American society, including the relationship among classes, ethnic groups, regions, and sexes, from the Colonial period to the present.

HIST 318 History of American Women 3(3,0) Survey course of the history of American women emphasizing the changing role of women in American culture and society.

HIST 319 Gender and Law in United States History 3(3,0) Survey of how law has reflected and created distinctions on the basis of gender and sexuality throughout United States history. Emphasizes the relationship between legal rules and social conditions and the way in which groups have challenged these legal categories over time.

HIST 321 History of Science 3(3,0) Survey of the development of science in the Western world, emphasizing the period from the Renaissance to the present.

HIST 322 History of Technology 3(3,0) History of the major developments in Western technology and their relationships to the societies and cultures in which they flourished.

HIST 323 History of American Technology 3(3,0) History of developments in technology and their role in American life with particular emphasis on the American Industrial Revolution and the 20th century.

HIST 324 History of the South, 1865 to the Present 3(3,0) Development of political, social, and cultural institutions of the South from the end of the Civil War to the present and the South's relationship to the rest of the nation.
HIST 325 American Economic Development 3(3,0) Economic development of the United States from Colonial to recent times, emphasizing the institutional development of agriculture, banking, business and labor, and government regulations and policy.

HIST 326 History of American Transportation 3(3,0) Examines the principal forms of transportation in the United States from colonial times to the present, including water, road, canal, railroad, internal combustion, and air. Emphasizes technological developments and economic, geographic, and social impact of specific transport forms.

HIST 327 American Business History 3(3,0) Survey of the history of American business using a case-study approach. Focuses on the effects that policies and institutions have on individual businesses.

HIST 328 United States Legal History to 1890 3(3,0) Survey of the American legal system in its historical perspective from Colonial times to 1890. Emphasizes the relationship between law and society, the way in which the practice of law changed American society, and the way in which social development affected both the theory and practice of the law.

HIST 329 United States Legal History Since 1890 3(3,0) Examination of the social, cultural, intellectual, economic, and political forces that have shaped the law in the U.S. since 1890.

HIST 330 History of Modern China 3(3,0) Growth and development of Chinese civilization from ancient times to the present. Emphasis is on 20th-century China, particularly since the rise to power of the Communist regime.

HIST 333 History of Modern Japan 3(3,0) Origin and development of Japanese civilization with particular emphasis on modern Japan from mid-19th century to the present.

HIST 334 Premodern East Asia 3(3,0) Introduction to histories of China and Japan, from antiquity to approximately 1850. Political, religious, artistic, and other aspects of premodern societies are examined and compared in order to gain significant insights regarding the premodern antecedents of these two dynamic and important nations.

HIST 337 History of South Africa 3(3,0) Examines the important trends in the history of South Africa from earliest times to the present. Topics include nature of precolonial society, European immigration, rise of industrial capitalism, advent of Apartheid, and the liberation struggle.

HIST 338 African History to 1875 3(3,0) Study of sub-Saharan Africa from antiquity to European colonial rule, exploring the development of Stone Age cultures, agricultural and pastoral societies, ancient civilizations, political, economic, and social systems; gradual shift of initiative from the interior to the coast; and various slave trades.

HIST 339 Modern Africa, 1875 to the Present 3(3,0) Study of sub-Saharan Africa from 1875 to the present, with the focus placed upon the development and decline of European imperialism, dilemmas of African independence, and ethnic struggles in Southern Africa.

HIST 340 Latin America: From Conquest to Independence 3(3,0) Examination of the encounters, collaborations, and clashes that characterized the conquest period and beyond in Latin America. Readings are assigned regarding the spiritual, biological, social, and political consequences of the meeting of Indians, Africans, and Europeans. Historical sources include images, artwork, letters, and memoirs.

HIST 341 Modern Mexico 3(3,0) Introduction to the geography of the region; origins and progress of the Independence movements; political, economic, and social developments after 1825; and current domestic and international problems.

HIST 342 South America Since 1800 3(3,0) Introduction to the geography of the region; origins and progress of the Independence movements; political, economic, and social developments after 1825; and current domestic and international problems.

HIST 351 Ancient Near East 3(3,0) History of the peoples and civilizations of the Near East from the Sumerians to the establishment of Roman power in this region. Includes geography, mythology, religious, and economic currents as well as the methods and discoveries of archaeology.

HIST 352 Egypt in the Days of the Pharaohs 3(3,0) Egyptian civilization from its beginning until the period of Roman conquest. Includes a survey of political history but also deals with daily life, making use of archaeological evidence.

HIST 353 Women in Antiquity 3(3,0) Focuses on women in the ancient period of Mesopotamia, Israel, Egypt, Greece, Rome, and in the early Christian Church. Formation of gender roles and issues related to ancient sexuality also receive attention.

HIST 354 The Greek World 3(3,0) Study of Greek civilization from its beginning until the time of the Roman conquest, concentrating on the social institutions of the Greek city-states.

HIST 355 The Roman World 3(3,0) Considers the rise of Rome to world empire and the international civilization it dominated. Concentrates on the nature of the political change from Republic to monarchy with particular emphasis on city life and the causes of its decline.

HIST 361 History of England to 1688 3(3,0) Examination of English political, social, economic, and cultural institutions to the 17th century. (Study Abroad)

HIST 363 Britain Since 1688 3(3,0) Study of political, cultural, social, economic, and imperial issues in the history of the British Isles from the late 17th century to the present.

HIST 365 British Cultural History 3(3,0) Examination of topics in British cultural history from the 17th century to the present. Emphasizes the 19th and 20th centuries.

HIST 367 Modern Irish History 3(3,0) Examines Irish history over the past four centuries, with particular attention to the 19th and 20th centuries. Irish political, social, economic, and cultural history, Anglo-Irish relations, and the Irish diaspora are considered.

HIST 370 Medieval History 3(3,0) Survey of the period from the eclipse of Rome to the advent of the Renaissance, emphasizing human migrations, feudalism, rise of towns, and cultural life.

HIST 372 The Renaissance 3(3,0) Examination of the transitional period of European civilization (ca. 1300–1500) emphasizing institutional, cultural, and intellectual developments.

HIST 373 Age of the Protestant Reformation 3(3,0) Evolution of Modern Europe (ca. 1500–1660), as affected by the Reformation, wars of religion, and growth of nation-states. Study includes intellectual advances and the beginnings of European expansion overseas.

HIST 374 Europe in the Age of Reason 3(3,0) Study of the quest for order and the consolidation of the European state system between 1660 and 1789 with emphasis on the idea of absolutism, the question of French hegemony, and the synthesis of the 18th-century Enlightenment.

HIST 375 Revolutionary Europe 3(3,0) History of Europe from the outbreak of the French Revolution through the Revolutions of 1848 emphasizing the conflict between the forces of change and those of conservatism, within the states and in Europe in general.

HIST 377 Europe, 1914–1945 3(3,0) Focuses on Europe during two major wars and the peace-time adjustments Europeans made, or failed to make, during the twenty-year interim between those wars.

HIST 378 Europe Since 1945 3(3,0) Focuses on how World War II completed the destruction of European global hegemony, creating a bipolar continent with the west dominated by the United States and the east by Soviet Russia, and how Europe adjusted to this situation.

HIST 380 Imperial Germany 3(3,0) German history from the beginning of the German Empire, 1870–71, through World War I. Emphasizes the influence of militarism, nationalism, anti-Semitism, and xenophobia on the German culture and political process.

HIST 381 Germany Since 1918 3(3,0) German history from the time of Germany’s defeat in World War I, through the Nazi period and World War II. Culminates with the study of a divided Germany.

HIST 384 History of Modern France 3(3,0) French history from mid-19th century to the present with particular emphasis on France since 1900.

HIST 385 History of Imperial Russia 3(3,0) Survey of the formative years of the Russian Empire from the time of accession of Peter the Great to the time of the Russian Revolution. Social, political, diplomatic, and intellectual developments are given equal treatment.

HIST 386 History of the Soviet Union 3(3,0) Soviet history from the revolution to the present. Surveys the creation and subsequent development of the communist political and social system, with attention given to culture and diplomacy.

HIST 387 The Russian Revolution 3(3,0) History of one of the most formative series of events of the 20th century. Follows the crisis of Imperial Russia, its downfall during World War I, and subsequent revolutionary upheaval leading to the formation of the USSR.
HIST 389 Creative Inquiry—History 1-4(1-4,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of nine credits.

HIST 390 Modern Military History 3(3,0)
Survey of the development of modern warfare and the influence of technological change on warfare. Particular attention is given to the major conflicts of the 20th century.

HIST 391 Post World War II World 3(3,0)
Examines the world in the age of the Cold War; the breakdown of the colonial empires; and racial, religious, ethnic, national, and social tensions. The United States provides the central core to the class.

HIST 392 History of the Environment of the United States 3(3,0)
Examination of the historical development of the attitudes, institutions, laws, people, and consequences that have affected the environment of the United States from pre-Columbian days until the present. Emphasizes the interaction of human beings within and with the environment.

HIST 393 Sports in the Modern World 3(3,0)
Analysis of the global evolution and diffusion of sports in the industrial age emphasizing the linkage of sports structure and performance to the larger social context.

HIST 394 Non-Western History 3(3,0)
Examines the important trends in world history since 1500—including capitalism, industrialization, nationalism, migration, and imperialism—with a focus on non-Western regions. Preq: HIST 173.

HIST 396 History of the Middle East 3(3,0)
Examines the histories, cultures, and societies of the Middle East from late antiquity to the present day.

HIST 397 Modern Middle East 3(3,0)
Examines the histories, cultures, and societies of the Middle East from the 18th century to the present day with particular emphasis on contemporary issues.

HIST 400, 600 Studies in United States History 3(3,0)
Topics and problems in the history of the United States from the Colonial era to the present. May be repeated once for credit with departmental consent.

HIST 409 Kennedy Assassination and Watergate 3(3,0)
Journey into the underbelly that examines the diverse elements of national security, divisive politics, the Cold War and Cuba, FBI, CIA, the mob, fanaticism, anomie, and threats to the stability of the republic that seem to have come together in Dallas in 1963 and in Watergate. Preq: Junior standing.

HIST 420, 620 History and Film 3(2,3)
Analyzes the role of the cinema in the construction and dissemination of history. May be repeated once for credit with departmental consent.

HIST 424, 624 Topics in History of Medicine and Health 3(3,0)
Selected topics in the development of medicine and health care including public attitudes toward health and medicine.

HIST 436, 636 The Vietnam Wars 3(3,0)
Wars in Vietnam are seen in two phases. The First Indochina War, 1946–54, is covered briefly. Main body of the course covers the Second Indochina War, which began as a guerrilla conflict in 1959–60 and ended as a mostly conventional war in the Communist victory of 1975.

HIST 438, 638 Problems in African Historiography and Methodology 3(3,0)
Concentrates on major issues in the field of African history with an additional focus on methodological concerns. May be repeated once for credit with departmental consent.

HIST 440, 640 Studies in Latin American History 3(3,0)
Consideration of selected and varied topics in Latin American history through readings, discussions, and individual or group projects. Special attention is given to the use of an inquiry or problem-solving method of historical analysis and to the cultivation of a comparative perspective. May be repeated once for credit with departmental consent.

HIST 450, 650 Studies in Ancient History 3(3,0)
Selected topics in ancient history ranging from pre-Biblical times to the fall of the Roman Empire. May be repeated once for credit with departmental consent.

HIST 451, 651 Alexander the Great 3(3,0)
Focuses on the career of Alexander the Great and deals with the history and archaology of ancient Macedon.

HIST 460, 640-660 Studies in British History 3(3,0)
Examines a selected theme or themes, periods, or time sequences in British history from Anglo-Saxon times to the present. May be repeated once for credit with departmental consent.

HIST 470, 670 Studies in Early European History 3(3,0)
Studies of selected topics or themes in European history from the fall of the Roman Empire to the age of industrialization. May be repeated once for credit with departmental consent.

HIST 491, 641, 671 Studies in Modern European History 3(3,0)
Study of selected topics or problems in European history from the end of the Old Regime to the present. May be repeated once for credit with departmental consent.

HIST 490 Senior Seminar 3(3,0)
Seminar in current research themes in history. Students conduct directed research on a particular topic and learn research, writing, and oral presentation techniques. Seminar topics vary from section to section and from semester to semester. Preq: History major, Senior standing, and HIST 299 with a C or better.

HIST 491, 6491, 691 Studies in the History of Science and Technology 3(3,0)
Selected topics in the development of science and technology emphasizing their social, political, and economic effects. May be repeated once for credit with departmental consent.

HIST 492, 692 Studies in Diplomatic History 3(3,0)
Selected topics and problems in international conflict and conflict resolution among nations. Concentration is usually in 20th century history. May be repeated once for credit with departmental consent.

HIST 493, 693 Studies in Social History 3(3,0)
Studies in the ways people have earned their livings and lived their lives, individually and as communities, in the confines of different societies. May be repeated once for credit with departmental consent.

HIST 494, 694 Studies in Comparative History 3(3,0)
Selected topics in comparative history, contrasting and comparing similar historic developments in different nations, geographic areas, or civilizations. May be repeated once for credit with departmental consent.

HIST 495, 695 Studies in the History of Ideas 3(3,0)
Selected topics and themes in the development of ideas that have had an impact on the behavior of individuals and civilizations. May be repeated once for credit with departmental consent.

HIST 496, 696 Studies in Legal History 3(3,0)
Study of selected problems in the development of law and the system of criminal and civil justice. May be repeated once for credit with departmental consent.

HIST 497 Senior Honors Research 3(3,0)
Research for the preparation of senior honors thesis. Preq: Senior standing, completion of a free-level history course, approval of the History Department. May be repeated once for credit with departmental consent.

HIST 498 Senior Honors Thesis 3(3,0)
Writing of the senior honors thesis. May be repeated once for credit with departmental consent. Preq: HIST 497.

HIST 499 Independent Study 1-3(1-3,0)
Study of selected problems in history under the direction of a faculty member chosen by the student. Student and faculty member develop a course of study designed for the individual student and approved by the department chair prior to registration. May be repeated once for credit with departmental consent.

HORTICULTURE

Professor: W. V. Baird; J. D. Caldwell, M. T. Haque, L. B. McCarty, T. Whitwell, Chair; Associate Professors: J. W. Adelberg, J. E. Faust, D. R. Layne, H. Liu, C. E. Wells; Assistant Professor: D. G. Bielenberg

HORT 101 Horticulture 3(3,0)
Environmental factors and horticultural practices affecting optimum production of floral, fruit, ornamental, and vegetable crops. Includes a survey of the various areas of horticulture and their importance to society.

HORT 102 Experience Horticulture 1(0,2)
Students experience the art, science, business, and diversity of horticulture through visits to greenhouses, nurseries, botanical gardens, athletic fields, golf courses, orchards, farms, and research fields and laboratories. Students learn about horticulture from a cross section of professionals sharing their work experiences. Preq: Freshman or sophomore standing in Horticulture or Turfgrass.

HORT 202 Selected Topics 1-3(1-3,0)
Introductions to developing trends, concepts or technologies in horticulture and/or turfgrass. May be repeated for a maximum of three credits, but only if different topics are covered. Preq: Consent of instructor.
HORT 208 Landscape Appreciation 3(3,0)
Depends on students’ appreciation of natural and built environments through a study of landscape elements, styles, and professions. Landscapes ranging in scale from residential to regional are critiqued, and design principles and landscape ethics are discussed.

HORT 212 Introduction to Turfgrass Culture 3(3,0)
Studies of the introductory principles associated with the art and science of turfgrass culture. Develops an understanding of the history and evolution of turfgrasses and turfgrass culture. Explores career potentials in turfgrass management. Emphasizes the basic scientific principles and techniques associated with the propagation and establishment of fine turfgrasses. Prev: BIOSC 205, 206.

HORT 213 Turfgrass Culture Laboratory 1(0,2)
Provides hands-on activities and understanding of basic principles and techniques in turfgrass culture. Students learn all phases of turfgrass management including identification, turfgrass culture, common turfgrass pest identification and control. Coreq: HORT 212.

HORT 271 Internship 1-6(0,2-12)
Preplanned, practical, supervised work experience to give beginning students on-the-job learning opportunities that support classroom experience. Students submit monthly reports and present a departmental internship seminar. Undergraduates may accumulate a maximum of six credits for participation in HORT 271 and/or 471. Prev: Consent of instructor.

HORT 303 Landscape Plants 3(2,3)
Woodly, ornamental plants and their aesthetic and functional uses in landscape developments. Study covers habit of growth, ultimate size, texture effect, period of bloom, color, and cultural requirements.

HORT 304 Annuals and Perennials 3(2,3)
Annual and perennial flowers’ aesthetic appeal and functional uses and needs. Color, texture, bloom time, form, size, and growth requirements relate to designing, planting, and maintaining colorful landscapes. Prev: HORT 208, 303, or consent of instructor.

HORT 305 Plant Propagation 3(2,3)
All phases of plant propagation from seeds, bulbs, divisions, layers, cuttings, budding, and other types of grafting are comprehensively treated. Timing, manner, and material for making cuttings; temperature and media requirements and propagation structures for rooting cuttings of ornamental and fruit trees, shrubs, and indoor plants are studied.

HORT 306 Plant Propagation Techniques Laboratory 1(0,3)
Techniques of plant propagation including sexual methods: germination, scarification, and stratification. Asexual methods including grafting, budding, cuttings, layering, tissue culture divisions, and separations. Local nurseries are visited. Coreq: HORT 305.

HORT 308 Landscape Design 4(3,3)
Landscape planning of residential and public properties in order to achieve best use and most enjoyment from a given piece of ground. Offered fall semester only. Prev: HORT 208, 303, or consent of instructor.

HORT 310 Growing Landscape Plants 3(2,3)
Principles, technologies, and techniques of landscape plant production and growth including environmental control and manipulation, water, nutrient and pest management, scheduling, propagation, and plant problem diagnostics. Emphasizes herbaceous ornamentals along with significant woody landscape plants. Prev: HORT 101 or equivalent.

HORT 400 Selected Topics 1-6(1-6,0)
Advanced study of any aspect of horticulture and/or turfgrass not addressed in other courses. May be repeated for a maximum of six credits, but only if different topics are covered. Prev: Junior standing or consent of instructor.

HORT 406, 606 Nursery Technology 3(2,3)
Principles and techniques in handling nursery crops. Prev: HORT 303, 305.

HORT 408 Horticulture Discovery and Inquiry 1-3(1-3,0)
Students learn about horticulture through research, service learning, and/or creative inquiry projects. They explore a topic of interest with faculty, organize a quality proposal, complete the project, and report results to appropriate professional audiences. May be repeated for a maximum of nine credits. Prev: Junior standing or consent of instructor.

HORT 409 Seminar 1(1,0)
Recent research work on various phases of horticulture method of conducting investigations, and presentation of report of investigations.

HORT 412, 612 Advanced Turfgrass Management 3(2,3)
Advanced principles and practices associated with turfgrass management for golf course, sports fields, sod production, and commercial lawn care. Topics include turfgrass physiology; plant growth and development, environmental turfgrass nutrition, irrigation, drainage, pesticide control and fate; and development of effective management systems. Prev: CSENV 202, HORT 212, or consent of instructor.

HORT 420, 620 Applied Turfgrass Physiology 3(3,0)
Advanced course in turfgrass science and management. Provides the current status and development of turfgrass stress physiology and research. Main topics include temperature, drought, traffic, edaphic stresses, new developments in the turf industry and environmental stewardship. Prev: HORT 212, 213.

HORT (FOR) 427, 627 Urban Tree Care 3(3,0)
See for 427.

HORT (CSENV) 433, 633 Landscape and Turf Weed Management 3(2,2)
Weed management strategies that include cultural, biological, and chemical methods are studied for landscape and turfgrass areas. Problem-solving skills and herbicide characteristics are emphasized. Prev: HORT 212 or consent of instructor.

HORT 455, 655 Just Fruits 3(3,0)
Students explore the origins, biology, culture, and production of major temperate zone fruits—apples, berries, and cherries to pawpaws, peaches, and pomegranates, the familiar to the forbidden. They discover principles, practices, and technologies employed to grow, protect, and harvest the fruits that feed us from commercial orchards, organic farms, and backyards. Prev: HORT 101 or consent of instructor.

HORT 456, 656 Vegetable Crops 3(3,0)
Principles and practices employed in commercial growing and marketing of vegetable crops with emphasis on plant characteristics, cultivars, management practices, harvest, quality factors and grading, storage, economic importance, and areas of production.

HORT 461, H461, 661 Problems in Landscape Design 4(3,3)
Landscape planning for larger residential properties, schools, industrial plants, real estate developments; detailed finished plans; further study of materials used; original problems; field study. Prev: HORT 308 or consent of instructor.

HORT (BIOSC, GEN) 465, 665 Plant Molecular Biology 3(3,0)
Study of fundamental plant processes at the cellular and molecular levels. Topics include genome structure and organization (both nuclear and organellar); regulation of gene expression and its role in cellular and whole-plant processes; transposable genetic elements; applications for biotechnology. Prev: junior standing or consent of instructor; BIOSC 304 or 305; GEN 302.

HORT 471, 671 Advanced Internship 1-6(0,2-12)
Preplanned work experience under competent supervision in approved agency dealing with horticultural endeavors. Gives advanced students on-the-job learning opportunities to apply acquired knowledge and skills. Monthly reports and final departmental seminar required. Undergraduates may accumulate a maximum of six credits for participation in HORT 271 and/or 471. Prev: Junior standing and consent of instructor.

HORT 472, 672 Garden Experiences in Youth Development 211,3 Exploration of the role of gardening and related outdoor experiences in enhancement of educational development, self-esteem and pro-social behavior in elementary school children. Prev: Senior standing and consent of instructor.

HUMANITIES
Professor: S. K. Eisminger; Associate Professor: A. Bennett

HUM 301 Humanities 3(3,0)
Introduction to humanistic studies focusing on relationships among disciplines—painting, sculpture, architecture, music, literature, philosophy, and drama—beginning with prehistory and continuing to the Renaissance.

HUM 302 Humanities 3(3,0)
Introduction to humanistic studies focusing on relationships among disciplines—painting, sculpture, architecture, music, literature, philosophy, and drama—beginning with the 17th century and continuing to the present.

HUM 306 Creative Genius in Western Culture 3(3,0)
Investigation of creativity through study of great innovators in art, literature, music, and ideas. May be repeated once for credit.

HUM 309 Studies in Humanities 3(3,0)
Interdisciplinary approach to the humanities. Special subject matter varies according to the instructor and as approved by the chair of the English Department. May be repeated once for credit.

HUM (ENGL) 456, 656 Literature and Arts of the Holocaust 3(3,0)
See ENGL 456.
Courses of Instruction

INDUSTRIAL ENGINEERING

Professors: A. K. Gramopadhye, Chair; W. G. Ferrell, Jr., D. L. Kimbler, S. A. Shappell; Associate Professors: B. R. Cho, J. S. Greenstein, B. J. Melloy; Assistant Professors: S. K. Garrett, M. E. Kurt, M. E. Mayorga, K. M. Taaffe; Research Assistant Professor: P. F. Stringfellow

I E 201 System Design I 4(3,3) Introduction to the design of industrial engineering systems. Design methodologies are introduced in the context of a design process that includes identifying user needs; developing a design specification; generating, evaluating, refining, and selecting design concepts; detail design; constructing, testing, and refining prototypes; and delivering the product to the customer. Preq: MTHSC 102, ENGL 103.

I E 210 Design and Analysis of Work Systems 3(2,3) Occupational ergonomics, cognitive human factors, and workplace design are discussed.

I E 220 Design of Information Systems in Industrial Engineering 3(3,0) Introduction to Visual Basic and object-oriented programming principles, databases, and software applications of human-centered system design.

I E 268, H268 Creative Inquiry Seminar in Industrial Engineering 1(1,0) Students are introduced to creative inquiry methods, resources, and current activities in a seminar format. To be taken Pass/Fail only.

I E 280 Methods of Operational Research I 3(3,0) Introduction to operations research models, including linear programming, integer linear programming, transportation and assignment problems, and network flows. Preq: MTHSC 106.

I E H300 Junior Honors Seminar 1(1,0) Aquaints students enrolled in the Departmental Honors Program with current research issues in the profession. This assists students in preparing a research proposal for the senior thesis. Preq: Junior standing, admission to Departmental Honors Program.

I E 360 Industrial Applications of Probability and Statistics 3(3,0) Axioms of probability, discrete and continuous distributions, and sampling distributions applied to industrial engineering applications. Engineering applications of statistical estimation, hypothesis testing, and confidence intervals. Preq: MTHSC 206.

I E 361 Industrial Quality Control 3(3,0) Quality engineering techniques focusing on process control using statistical methods including control charts and acceptance sampling. Preq: I E 360.

I E 368 Professional Practice in Industrial Engineering 1(1,0) Seminar to orient students to issues of professional development and professional practice of industrial engineering. Preq: I E 268.

I E 381 Methods of Operational Research II 3(3,0) Probabilistic modeling of engineering systems. Topics include calculus-based probability, decision analysis, Markov processes, queueing, and reliability. Preq: I E 280, 360.

I E 386 Production Planning and Control 3(3,0) Fundamentals of forecasting demand, scheduling production, and controlling the movement and storage of material associated with production are studied. State-of-the-art manufacturing techniques are discussed. Preq: I E 280; CP SC 161 or I E 220.

I E H400, 600 Honors Thesis 1-6(1-6,0) Individual or joint research project performed with a faculty mentor or committee of faculty. May be repeated for a maximum of six credits. Preq: I E H300 or consent of mentor.

I E 402 Creative Inquiry Research I 1-6(1-6,0) Research experience promoting reasoning, critical thinking, ethical judgment, communication skills, and an understanding of the scientific method and engineering design. These applied/basic research experiences are usually undertaken with a team under the mentorship of a faculty member or advanced graduate student. May be repeated for a maximum of six credits. Preq: I E 268 and consent of mentor.

I E 403 Creative Inquiry Project I 3-10(3-10) Project-oriented experience promoting reasoning, critical thinking, ethical judgment, communication skills, and an understanding of the scientific method and engineering design. Typical experiences include design projects in cooperative education or sponsored student competitions undertaken with a team, under the mentorship of a faculty member or advanced graduate student. May be repeated for a maximum of three credits. Preq: I E 268 and consent of mentor.

I E 440, 640 Decision Support Systems in Industrial Engineering 3(3,0) Study of design of decision support systems for production and service systems based on operations research models. Includes use of spreadsheets, databases, and integrated software development environments to implement decision support systems. Preq: I E 280; CP SC 161 or I E 220.

I E (MGT) 444 International Perspectives in Industrial Management 1-6(1-6,0) See MGT 444.

I E 456, 656 Supply Chain Design and Control 3(3,0) Industrial engineering aspects of supply chains including design and control of material and information systems. Preq: I E 386.

I E 457, 657 Transportation and Logistics Engineering 3(3,0) Introduces transportation and logistics systems analysis from both analytical and practical perspectives. Covers methods for identifying level-of-service metrics and measuring system performance. Discusses key aspects of modeling, simulation, and other techniques for economic and quantitative analysis of transportation and logistics planning issues. Preq: Senior standing in engineering, science, or management program; MTHSC 102 or 106.

I E 460, 660 Quality Improvement Methods 3(3,0) Study of modern quality improvement techniques presented in an integrated, comprehensive context. Preq: Junior standing.

I E 461, 661 Quality Engineering 3(3,0) Design aspects of quality and the engineer’s role in problems of quality in production systems. Preq: I E 360.

I E 462, 662 Six Sigma Quality 3(3,0) Study of DMAIC (Define, Measure, Analyze, Improve, and Control) elements of Six Sigma, project management, process analysis, quality function deployment, hypothesis testing, gage R&R, data analysis, multivariate-analysis, design of experiments, statistical process control, and process capability analysis. Preq: EX ST 301, 411, I E 360, MTHSC 301, 302, or 309.

I E 465, 665 Facilities Planning and Design 3(3,0) Study of the principles and techniques of facility planning and design. Discusses economic selection of materials handling equipment and integration of this equipment into the layout plan to provide effective product flow in production, distribution, and service contexts. Includes quantitative techniques for evaluation of facility design. Preq: I E 280.

I E 467 Systems Design II 3(2,3) Provides students with the challenge of integrating and synthesizing general engineering knowledge into creatively solving real-world, open-ended problems. This includes developing the problem statement, objectives, and criteria; data collection; technical analysis; developing and integrating recommendations; and presenting results. Preq: All required industrial engineering courses in the Industrial Engineering curriculum.

I E 469 Creative Inquiry Symposium in Industrial Engineering 1(1,0) Provides a forum for exchange of results and ideas in creative inquiry student projects. To be taken Pass/Fail only. Preq: I E 368.

I E 482, 682 Systems Modeling 4(4,0) Modeling of discrete industrial systems using a digital computer. The purpose, theory, and techniques of system modeling are presented. Preq: I E 381.

I E 485, 685 Industrial Systems Engineering 3(3,0) Modeling and analysis of multistage decision processes, recursive optimization, process and system design, and control problems. Preq: I E 280, 381.

I E 487, 687 Industrial Safety 3(3,0) Recognition and prevention of hazards; recognition and control of hazardous materials; developing and managing a safety program; designing inherently safe equipment and workplaces. Preq: Junior standing.
I E 488, 688 Human Factors Engineering 3(3,0) Introduction to human performance and limitations in the design of effective and efficient systems. Covers issues related to changes in technology, impact of design on society, ethical issues in design of systems, and the cost benefits from designing systems and environments that often challenge, perceived notions of benefits. Preq: Junior standing; MTHSC 102 or 106.

I E 489, 689 Industrial Ergonomics and Automation 3(2,3) Physical ergonomics and ergonomics in industrial settings, including work physiology, the physical environment, automated systems, and hybrid work systems. Preq: IE 210 or Senior standing.

I E 491, H491, 691 Selected Topics in Industrial Engineering 1-3(0-3,0-9) Comprehensive study of any timely or special topic in industrial engineering not included in other courses. May be repeated for a maximum of six credits. Preq: Consent of instructor.

INTEGRATED PEST MANAGEMENT

Professor: B. G. Bellinger

I P M 401, 601 Principles of Integrated Pest Management 3(3,0) Origins, theory, and practice of integrated pest management. Relationships among crop production and protection practices are explored. Economics of various control strategies are considered. Integrated pest management field projects are studied. Conventional and integrated pest management approaches are compared. Multidisciplinary plant problem analysis is introduced. Preq: CSENV 407, ENT 301, PL PA 310, or consent of instructor.

INTERNATIONAL STUDIES

I S 101 Cross-Cultural Awareness International Experience 0 Study of cross-cultural awareness as part of an international/study abroad experience. Minimum duration of the study abroad experience is four weeks. May be repeated. To be taken Pass/Fail only.

I S 210 Selected Topics in International Studies 3(3,0) Topics in cross-cultural awareness and intercultural communications are studied in situ as part of a study abroad program. Addresses the impact of culture on behavior in intercultural contact in professional and personal contexts. May be repeated for a maximum of six credits, but only if different topics are covered.

ITALIAN

Professor: B. M. Zaczek; Lecturer: L. Barattoni

ITAL 101 Elementary Italian 4(3,1) Introductory course stressing grammar, pronunciation, oral practice, and reading skills. Attention is given to practical everyday living as well as cultural considerations.

ITAL 102 Elementary Italian 4(3,1) Continuation of ITAL 101. Preq: ITAL 101 or consent of instructor.

ITAL 201, H201 Intermediate Italian 3(3,1) Intermediate course to build on the foundation of previous language courses, with practice in listening, speaking, reading, and writing. Introduction to cultural perspectives through readings of literary prose selections. Preq: ITAL 102.

ITAL 202, H202 Intermediate Italian 3(3,1) Increasingly difficult readings in Italian literature, supplemented with classroom discussions and compositions. Preq: ITAL 201.

ITAL 297 Creative Inquiry—Italian 1-4(1-4,0) in consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

ITAL 301 Introduction to Italian Literature 3(3,0) Study of selected texts of Italian literature in their artistic, cultural, and social context. May include theme and genre studies. Preq: ITAL 202 or consent of department chair.

ITAL 302 Modern Italian Literature 3(3,0) Study of selected works from major 19th- and 20th-century Italian authors, including Manzoni, Verga, Svevo, Moravia, Ginzburg. Preq: ITAL 202 or consent of department chair.

ITAL 305 Intermediate Italian Conversation and Composition 3(3,0) Practice in the written and spoken language with emphasis on vocabulary, pronunciation, and comprehension. Preq: ITAL 202 or consent of department chair.

ITAL 307 Italian Civilization and Culture 3(3,0) Study of the significant aspects of Italian civilization and culture through analysis of literary texts, paintings, films, and magazine articles. Preq: ITAL 202 or consent of department chair.

ITAL 397 Creative Inquiry—Italian 1-4(1-4,0) for comparative and contrastive analysis of selected works from major 19th- and 20th-century Italian authors, including Manzoni, Verga, Svevo, Moravia, Ginzburg. Preq: ITAL 305 or consent of department chair.

ITAL 398 Directed Reading 1-3(1-3,0) Directed study of selected topics in Italian literature, language, and culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.

ITAL 400 Image of an Italian City 3(3,0) Study of historical, social, and architectural images of Italian cities through analysis of literary texts and films. Preq: ITAL 202 or consent of instructor.

ITAL 475 Advanced Italian Seminar 3(3,0) Concentrated research and discussion on advanced topics in Italian literature, film, art, or drama. May be repeated for a maximum of six credits. Preq: One 400-level Italian course or consent of instructor.

ITAL 497 Creative Inquiry—Italian 1-4(1-4,0) Continuation of research initiated in ITAL 397. Students complete their project and disseminate their research results. Preq: ITAL 397 or consent of instructor.

ITAL 498 Selected Topics 3(3,0) Study of selected topics in Italian literature, language, and culture. Taught in Italian. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of department chair.

JAPANESE

Associate Professors: T. Kishimoto, E. L. Williams; Lecturers: M. Shimura, I. Tokunaga

JAPN 101 Elementary Japanese 4(3,1) Course for beginners in which fundamentals are taught and a foundation is provided for further study and the eventual ability to read and speak the language. The Japanese writing system is introduced. Students learn how to recognize and write the two alphabets Hiragana and Katakana. Three hours a week of classroom instruction and one hour a week in the language laboratory.

JAPN 297 Creative Inquiry—Japanese 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

JAPN 303 Intensive Conversation and Composition in Japan 3(3,0) Study of Japanese with native instructors at a university in Japan. All coursework conducted in Japanese. May be repeated for a maximum of six credits. Preq: JAPN 202 or consent of instructor.

JAPN 305 Japanese Conversation and Composition 3(3,0) Practice in the spoken language with emphasis on vocabulary, Kanji, pronunciation, and comprehension; learning practical language skills and intercultural communication through various topics. Preq: JAPN 202 or consent of department chair.

JAPN 306 Japanese Conversation and Composition 3(3,0) Continuation of JAPN 305. More practice in the spoken language emphasizing vocabulary, Kanji, pronunciation, and comprehension. Learning practical language skills and intercultural communication through various topics. Preq: JAPN 305 or consent of department chair.

JAPN 307 Japanese Civilization I 3(3,0) Study of the significant aspects of the culture of Japan. Preq: JAPN 202 or consent of department chair.

JAPN 308 Japanese Civilization II 3(3,0) Study of significant aspects of the culture of Japan. Preq: JAPN 202 or consent of department chair.

JAPN 316 Japanese for International Trade 1 3(3,0) Spoken and written Japanese common to the Japanese-speaking world of business and industry emphasizing business practices and writing and translating business letters and professional reports. Cross-cultural references provide opportunity for comparative and contrastive analysis of American and Japanese cultural patterns in a business setting. Preq: JAPN 306 or consent of department chair.
Courses of Instruction

JAPN 397 Creative Inquiry—Japanese 1-4(1-4,0) Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project, develop a critical framework, and initiate research on a specific topic.

JAPN 398 Directed Reading 1-3(1-3,0) Directed study of selected topics in Japanese literature, language, and culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.

JAPN 401 Japanese Literature in Translation 3(3,0) Introduction to Japanese literature from 712 AD to the present. Cultivates an appreciation for Japanese literature and culture. All readings and discussions are in English. May not be used to satisfy general foreign language requirements.

JAPN 403 Internship in Japan 3(3,0) Minimum of one month of full-time work experience in Japan. All work activities with host companies are conducted in Japanese. May be repeated for a maximum of six credits. Preq: JAPN 202 or consent of instructor.

JAPN 404 Cultural Studies in Japan 3(3,0) Study of Japanese cultural topics on site in Japan through lectures, field trips, small student group reconnaissance excursions, and reporting sessions. All activities are conducted in Japanese. May be repeated for a maximum of six credits. Preq: JAPN 202 or consent of instructor.

JAPN 406 Introduction to Japanese Literature 3(3,0) Students read contemporary Japanese narrative fiction, poetry, and drama in their historical and social context. Preq: 300-level Japanese course or consent of department chair.

JAPN 411 Studies in the Japanese Language I 3(3,0) Advanced training in the spoken and written language with emphasis on formal expressions. Preq: JAPN 306 or consent of department chair.

JAPN 412 Studies in the Japanese Language II 3(3,0) In-depth study of Kanji characters. Preq: JAPN 411 or consent of department chair.

JAPN 416 Japanese for International Trade II 3(3,0) Study of language and cultural environment of the Japanese-speaking market, including the linguistic and cultural idioms which support global marketing in general and the international marketing of textiles, agricultural products, and tourism in particular. Preq: JAPN 316 or consent of department chair.

JAPN (ANTH) 417 Japanese Culture and Society 3(3,0) Focuses on basic themes in Japanese culture found in social interaction and ritual behavior, Japanese social organization, including marriage and family patterns, neighborhood and community organization, and gender roles receive extensive attention. All readings and discussions are in English. May not be used to satisfy general foreign language requirements.

JAPN 490 Classical Japanese 3(3,0) Examination and analysis of premodern Japanese texts. Special emphasis is on the grammar and syntax of the classical language, its divergence from and influence upon the modern idiom. All coursework is conducted in Japanese. Preq: JAPN 306 or consent of instructor.

JAPN 491 Senior Seminar in Japanese Literature 3(3,0) Close readings of various works of premodern and modern Japanese literature. Includes study of important authors and their representative works in prose and poetry. Familiarizes students with the cultural and linguistic nuances of literature in the original language. All readings and activities are in Japanese. Preq: JAPN 306.

JAPN 497 Creative Inquiry—Japanese 1-4(1-4,0) Continuation of research initiated in JAPN 397. Students complete their project and disseminate their research results. Preq: JAPN 397 or consent of instructor.

JAPN 499 Selected Topics in Japanese Culture 3(3,0) Topic-generated examination of fundamental cultural themes in premodern and modern Japan, including, but not limited to, such topics as Japanese drama, poetry, prose, religious traditions, cinema, and folklore/mythology. May be repeated for a maximum of six credits, but only if different topics are covered. Readings and discussions are in English. May not be used to satisfy general foreign language requirements.

LANDSCAPE ARCHITECTURE

Professors: F. F. Chamberlain, D. L. Collins; D. J. Nadenicek, Chair; Associate Professor: S. Burnhill; D. Yilmaz; Assistant Professor: C. L. Goodness; Visiting Assistant Professor: R. R. Hewitt; Lecturers: R. W. Bainbridge, C. L. K. Martin

LARCH 103 Landscape Architecture Portfolio I 1(1,0) First of two one-credit portfolio courses. Students learn basic skills of digital software as a record of project development and the specific use of portfolio in landscape architecture. Preq: Landscape Architecture major or consent of instructor.

LARCH 110 History of Landscape Architecture 3(3,0) History of design on the land from prehistoric times to the present. Overview of the interface of aesthetics, science, technology, and natural features that influence cultures in shaping places.

LARCH 128 Technical Graphics 3(2,2) Introduction to rendering techniques, plan graphics, 3-D projection drawings, drafting skills, perspective drawing, and overview of computer graphics. Preq: Landscape Architecture major.

LARCH 151 Basic Design I 3(0,6) Studio introduction to design fundamentals through 2-D and 3-D application of basic systems and development of attitudes essential to the creative design process. Preq: Landscape Architecture major. Coreq: LARCH 153.

LARCH 152 Basic Design II 3(0,6) Further investigations into design fundamentals through 2-D and 3-D application of basic systems and development of attitudes essential to the creative design process. Preq: LARCH 151. Coreq: LARCH 154.

LARCH 153 Landscape Architecture Design Theory I 1(1,0) Lecture course on the underlying theories of design and visual perception that constitute the language of design. Topics include conceptual thinking and problem solving, visual communication, and interaction between design elements and principles. Preq: Landscape Architecture major. Coreq: LARCH 151.

LARCH 154 Landscape Architecture Design Theory II 1(1,0) Second in a series of lecture courses on the underlying theories of design and visual perception that constitute the language of design and landscape architecture. Topics include light and value perception, color theories, basic perspective systems. Preq: LARCH 151, 153. Coreq: LARCH 152.

LARCH 199 Creative Inquiry—Landscape Architecture I 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. Preq: LARCH 152 or consent of instructor.

LARCH 252 Site Design in Landscape Architecture 3(3,0) Students engage in real site design projects. They carry forward lessons from LARCH 151 and consider the material qualities and details of their designs. Also included are participatory and social behavioral aspects of design. Readings and seminar discussions are emphasized. Preq: LARCH 251 or consent of instructor.

LARCH 262 Design Implementation I 4(2,4) Basics of landscape architecture construction, methods, and construction documents including site information gathering and analysis, basic site grading and drainage, cut and fill, and principles of storm water management. Includes explorations in hand and computer graphic techniques used in construction drawings. Preq: Sophomore standing or consent of instructor.

LARCH 293 Field Studies Internship 1-3(0,3-9) Skill-based practical work experience to give beginning students on-the-job learning opportunities. Requires a minimum of five weeks of uninterrupted, supervised, practical experience with a preapproved commercial firm or public agency dealing with landscape architectural site issues. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Preq: Consent of instructor.

LARCH 299 Creative Inquiry—Landscape Architecture II 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. Preq: LARCH 199.

LARCH 351 Regional Design and Ecology 6(1,10) Study and analysis of natural and cultural landscapes at the regional scale. Introduction of landscape ecology as an informant to design. Basic overview of geographic information systems. Regional and ecological issues are applied in a final site design. Also includes relevant reading, discussion, and writing. Preq: LARCH 252 or consent of instructor.
LARCH 352 Urban Design Studio 6(1,10) Landscape architectural design in the urban context. Students study urban issues and offer design solutions for urban areas. Includes a readings and theory component as well as an opportunity to collaborate with architecture students. Preq: LARCH 351 or consent of instructor.

LARCH 362 Design Implementation II 4(2,4) Advanced study in construction documents and methods including road alignment, complex site grading, and storm water management. Exploration of characteristics, strengths, nominal sizes, and uses of materials (brick, concrete, stone, wood). Includes field trips, exercises, and preparation of construction documents. Students gain an understanding of how design ideas are realized in form. Preq: LARCH 262 or consent of instructor.

LARCH 399 Creative Inquiry—Landscape Architecture III 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. Preq: LARCH 299.

LARCH 405, 605 Urban Genesis and Form 3(3,0) Exploration of urban forms and developments within their historical context through off-campus, on-site lectures and exposure to historic cities and sites. Students visit historic and contemporary cities and analyze those places through readings and direct observations. Offered Maymester only. Preq: LARCH 252 or consent of instructor.

LARCH 413 Professional Development 3(2,2) Study of the various employment opportunities in the profession through a series of organized and intensive lab-based workshops with professionals and discussions of business law and operating procedures. In-depth exploration of one realm of practice. Preq: Landscape Architecture major or consent of instructor.

LARCH 418 Off-Campus Study Seminar 1(1,0) Students study various cultural and environmental factors to inform and enhance their off-campus experiences in Istanbul, Barcelona, Genoa, or Charleston. Preq: Landscape Architecture major or consent of instructor.

LARCH 419 Off-Campus Field Study 3(3,0) Intensive study of place in an off-campus setting as context for design. Numerous class trips to significant sites in the area of the off-campus programs. Bus trips to distant sites are also planned. Preq: LARCH 451 or consent of instructor.

LARCH 421 Landscape Architectural Seminar 3(3,0) Lectures and seminars dealing with pertinent topics related to environmental, technological, and theoretical issues in landscape architecture, land planning, and urban design. May be repeated for a maximum of six credits. Preq: Senior standing or consent of instructor.

LARCH 423, 623 Environmental Issues in Landscape Architecture 3(3,0) Overview of environmental and ecological issues and their relationship to landscape architecture practice and design. Preq: LARCH 452 or consent of instructor.

LARCH 428 Landscape Architecture Computer-Aided Design 3(2,2) Introduces students to the use of computer technology in the landscape architectural design process. Covers the basics of computer applications used in the industry for conceptualizing, drafting, modeling, and graphic communications. Preq: Landscape Architecture major or consent of instructor.

LARCH 433, 633 Historic Preservation in Landscape Architecture 3(3,0) Study of historic landscape preservation in a number of contexts including gardens, vernacular landscapes, parks, cemeteries, and battlefields. Preq: LARCH 452 or consent of instructor.

LARCH 438 Advanced Computer-Aided Design 3(2,2) Advanced study in computer-aided design for students wishing to develop their skills beyond LARCH 428. Students develop advanced skills in illustrative drawings, construction drawings, desktop publishing, and other computer-based applications. Preq: LARCH 428 or consent of instructor.

LARCH 443, 643 Community Issues in Landscape Architecture 3(3,0) In-depth study of issues relevant to community design. Overview of physical design and related social issues. Preq: LARCH 452 or consent of instructor.

LARCH 451 Community Design Studio 6(1,10) Studio focused on the study and design of communities. Students design a mixed-use parcel or the Department of Planning and Landscape Architecture student or consent of instructor.

LARCH 452 Off-Campus Studio 6(1,10) Off-campus land use planning or studio in Istanbul, Charleston, Genoa, or Barcelona. Preq: LARCH 451 or consent of instructor.

LARCH 453, 653 Key Issues in Landscape Architecture 3(3,0) Overview of research in landscape architecture and study of relevant research methods. Students write proposals for their own projects. Preq: Fifth-year Landscape Architecture student or consent of instructor.

LARCH 454 Landscape Architecture Design Thesis 2-3(2-3,0) Independent, student-generated research on a preapproved topic conducted under the supervision and weekly guidance of a faculty member. Second in a sequence of three required courses for students enrolled in Departmental Honors Program. Written interim report and presentation to faculty and honors students are required before the end of the semester. May be repeated for a maximum of six credits. Preq: LARCH H491, membership in Calhoun Honors College.

LARCH H494 Landscape Architecture Honors Thesis 2-3(2-3,0) Continuation of independent research, conducted under the supervision and weekly guidance of a faculty member. Third in a sequence of three required courses for students enrolled in Departmental Honors Program. Written thesis is submitted and presented before the end of the semester to qualify for Departmental Honors. Preq: LARCH H494.

LARCH 499 Creative Inquiry—Landscape Architecture IV 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. Preq: LARCH 399.

LARCH 503 Landscape Architecture Portfolio II 1(0,2) Final portfolio course. Students’ academic and design experiences over the five-year program are put in the final form that best communicates their experiences and achievements. Preq: LARCH 103 or consent of instructor.

LARCH 550 Professional Project Studio 3(0,6) Comprehensive project with a client. Projects may be linked to the Design Arts Partnership, the Center for Community Growth and Change, or the Department of Planning and Landscape Architecture among other possibilities. Preq: LARCH 452 or consent of instructor.

LARCH 551 Landscape Architecture Design V 3(1,10) Studio work and optional lectures featuring complex problem-solving projects involving regional design analysis and planning, city planning and urban design, complex building relationships and intense site utilization in an urban setting. Studio may be taken in Charleston, Genoa, or Barcelona. Preq: LARCH 452.

LARCH 552 Landscape Architecture Exit Project 6(0,12) Studio work on student-selected professional level exit project including design-build project or substantive research project. Exit studio synthesizes and builds on skills developed throughout the Landscape Architecture program. Also provides opportunities for students to inquire into areas of interest not otherwise covered. Preq: LARCH 452.
LARCH 562 Landscape Architectural Technology IV 2(0,4) Studio course for the integration of design and technology. Prq: LARCH 462, professional standing. Coreq: LARCH 552.

LARCH 581 Landscape Architectural Professional Practice 3(3,0) Lectures dealing with general consideration of landscape architectural office procedures. Study of the professional relationships of the landscape architect to client and contractor including problems of ethics, law, and business. Prq: Professional standing or consent of instructor.

LANGUAGE

LANG 297 Creative Inquiry—Language 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

LANG 300 Introduction to Linguistics and Foreign Language Learning 3(3,0) Introduction to the field of linguistics, including the study of phonetics, phonology, morphology, syntax, and semantics. Includes discussion of issues pertaining to foreign language acquisition.

LANG 303 Study Abroad Transfer 3-6(3-6,0) Course for credit transfer of any course taken abroad during a department-approved study. Requires a minimum of two contact hours per week for at least 15 weeks or equivalent. Students may take a course outside their concentration. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Prq: Consent of department chair.

LANG 340 Cosmopolis: The Myth of the City 3(3,0) Cross-cultural inquiry into the idea of the city through literary, political, and philosophical texts as well as film and architecture. Prq: Junior standing or consent of instructor.

LANG 342 Sacred and Profane Bodies 3(3,0) Cross-cultural inquiry into the ambivalence surrounding female sexuality implicit in images of women and, in particular, the division of women into “earthly” and “divine” categories. Prq: Junior standing or consent of instructor.

LANG 346 Walking and the Road 3(3,0) Cross-cultural inquiry into the epistemological, political, and aesthetic questions generated by walkers and the roads they travel in literature, philosophy, and film. Prq: Junior standing or consent of instructor.

LANG 348 The Child and the Adolescent 3(3,0) Cross-cultural inquiry into important theoretical questions of personal and political identity raised by the figure of the child and the adolescent in literature and film. Prq: Junior standing or consent of instructor.

LANG (PO SC) 350 Seminar in International News 3(3,0) Review of current news of significance for the world and for U.S. foreign policy through authentic sources such as foreign newspaper, television/radio broadcasts, and the Internet. Student-led discussions in the target language groups (i.e. French, German, Spanish) are supplemented by joint debates in English from global perspectives. May be repeated for a maximum of six credits. Prq: FR 202, GER 202, SPAN 202, or consent of department chair.

LANG 356 Faces of Evil 3(3,0) Cross-cultural inquiry into evil as an ineradicable challenge to representation disclosed by notions of the monstrous, the enemy, the infinite, and death in literature, cultural theory, and the arts. Prq: Junior standing or consent of instructor.

LANG (ANTH) 371 Language and Culture 3(3,0) Surveys key topics, theories, and methodological approaches in linguistic anthropology. Examines the complex relationships among language, culture, and communicative behavior and provides students with conceptual tools that inform the study of language in its cultural contexts.

LANG 397 Creative Inquiry—Language 1-4(1-4,0) Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project and develop a critical framework and initiate research on a specific topic.

LANG 400, 600 Phonetics 3(3,0) Study of basic phonetic concepts used in the study of sounds in language.

LANG (PO SC) 485, 685 Global Affairs and Governments 3(3,0) Study of global affairs and governments.

LANG 497 Creative Inquiry—Language 1-4(1-4,0) Continuation of research initiated in LANG 397. Students complete their project and disseminate their research results. Prq: LANG 397 or consent of instructor.

LANGUAGE AND INTERNATIONAL HEALTH

L&IH 127 Introduction to Language and International Health 1(1,0) Survey of international health and related career opportunities, focusing on the two distinct emphasis areas of the major: community development and health administration. To be taken Pass/Fail only.

L&IH 297 Creative Inquiry—Language and International Health 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

L&IH 397 Creative Inquiry—Language and International Health 1-4(1-4,0) Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project, develop a critical framework, and initiate research on a specific topic.

L&IH 400 Internship Abroad 3(3,0) One semester, full-time internship in a health care or a health administration setting abroad. To be taken Pass/Fail only. Prq: Second semester Junior standing or approval of Language and International Health director.

L&IH 497 Creative Inquiry—Language and International Health 1-4(1-4,0) Continuation of research initiated in L&IH 397. Students complete their project and disseminate their research results. Prq: L&IH 397 or consent of instructor.
LANGUAGES AND INTERNATIONAL TRADE

Professors: P. R. Heusinkveld, Director; C. K. Nakama, Chair; Associate Professors: T. Kishimoto, M. M. Rojas-Massei, J. Schmidt, G. E. Tissera, Y. Zhang; Lecturers: C. S. Edwards, L. J. Ferrell

L&IT 127 Introduction to Language and International Trade 1(1,0) Survey of the nature of international trade and related career opportunities. Information and applications of specific relevance to tourism, agriculture, and textile industries are offered. To be taken Pass/Fail only.

L&IT 297 Creative Inquiry—Language and International Trade 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. Arrangements with faculty members must be established prior to registration.

L&IT 397 Creative Inquiry—Language and International Trade 1-4(1-4,0) Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project, develop a critical framework, and initiate research on a specific topic.

LATIN 400 Language and International Trade Internship 1-3 One-semester, full-time (or equivalent part-time) work assignment which provides the opportunity for students to extend theoretical classroom learning through work experience in an appropriate setting. A final report is required. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Preq: FR 316, GER 316, or SPAN 316; 12 credit hours in a Language and International Trade technical option.

LATIN 401 Language and International Trade Practicum 1-3 Foreign language experience such as an approved study abroad program which provides the student with the opportunity to apply theoretical classroom learning to a real language experience in an appropriate setting. To be taken Pass/Fail only. Preq: FR 316, GER 316, or SPAN 316, six credits in language.

LATIN 402 Language and International Trade Directed Study 3 Directed study of an individual project in language and international trade. To be taken Pass/Fail only.

LATIN 497 Creative Inquiry—Language and International Trade 1-4(1-4,0) Continuation of research initiated in L&IT 397. Students complete their project and disseminate their research results. Preq: L&IT 397 or consent of instructor.

LATIN 202 Intermediate Latin 3(3,0) Continuation of LATIN 201 with the introduction of writings from the late Latin and Medieval periods. Preq: LATIN 201 or equivalent.

LATIN 203 Elementary Latin 4(4,0) Course for beginners designed principally to teach the reading of the language.

LATIN 204 Elementary Latin 4(4,0) Continuation of LATIN 201.

LATIN 205 Intermediate Latin 3(3,0) Review of the fundamental principles of grammar in conjunction with readings from the Classical period. Preq: LATIN 102 or equivalent.

LATIN 206 Intermediate Latin 3(3,0) Course designed to prepare students for advanced study of Latin. Preq: LATIN 202 or consent of instructor.

LATIN 207 Intermediate Latin 3(3,0) Course for students desiring intermediate level instruction in Latin. Preq: LATIN 201 or consent of instructor

LATIN 208 Elementary Latin 4(4,0) Course for beginners designed principally to teach the reading of the language. Preq: LATIN 205 or consent of instructor.

LATIN 209 Intermediate Latin 3(3,0) Review of the fundamental principles of Latin grammar in conjunction with readings from the Classical period. Preq: LATIN 102 or equivalent.

LATIN 301 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or consent of instructor.

LATIN 302 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 303 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 304 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 305 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 306 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 307 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 308 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 309 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 310 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 311 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 312 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 313 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 314 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 315 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 316 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 317 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 318 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 319 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 320 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 321 Advanced Latin 3(3,0) Course for students desiring advanced level instruction in Latin. Preq: LATIN 202 or equivalent.

LATIN 322 Legal Environment of Business 3(3,0) Examination of both state and national regulation of business. Attention is given to the constitution and limitations of power, specific areas in which governments have acted, and the regulations that have been imposed in these areas. Preq: Junior standing.

LATIN 323 Real Estate Law 3(3,0) The nature of real property and means of acquiring rights therein: conveyance of ownership, creation and execution of deeds, mortgages, etc., landlord and tenant relationships, shared concepts, and government regulation.

LATIN 399 Internship in Legal Studies 1-3 Faculty-supervised legal internship to give students learning opportunities that support their classroom experiences. Requires a minimum of six full-time weeks. Course enrollment and internship must occur in the same semester. Simultaneous credit cannot be received for another internship in the same semester. May be repeated for a maximum of three credits. To be taken Pass/Fail or Preq: Junior standing or consent of instructor.

LATIN 405, 605 Construction Law 3(3,0) Provides a practical knowledge of legal principles applied to the construction process and legal problems likely to be encountered by practicing construction professionals. Topics include construction contracting, liability, client and warranties, documentation, and responsibility and authority of contracting parties. Preq: LAW 322 or consent of instructor.

LATIN 406 Sports Law 3(3,0) Provides awareness of sport-related legal issues. Topics include contracts, torts, arbitration, mediation, criminal liability, intellectual property, gender equity, disabilities, drug testing, and professional and amateur organizations. Preq: LAW 322, Senior standing.

LATIN 420, 620 International Business Law 3(3,0) Intensive examination of the historical background of modern public and private international law; selected issues of public international law—human rights, law of war, United Nations’ system, and international litigation; selected issues of private international law—international sales, international trade, and formation and operation of multinational businesses. Preq: LAW 322 or consent of instructor.

LATIN 499 Selected Topics 1-3(1-3,0) In-depth examination of timely topics in legal studies. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Senior standing and consent of instructor.

LEISURE SKILLS

L S 100 Selected Topics 1(0,3) Presentation of leisure skills not covered in other courses. May be repeated for a maximum of three credits, but only if different topics are covered.

L S 101 Challenge Recreation Activities 1(1,0) Encourages students to broaden their leisure skills and improve self-image through challenge activities. Classroom instruction stresses how to get started safely in flying, scuba, canoeing, skiing, windsurfing, mountain-eering, hang-gliding, ballooning, and other challenge activities.

L S 111 Lapidary Arts 1(0,3) Students learn the techniques used to transform raw materials such as gemstones, minerals, gold, and silver into objects of art—primarily jewelry.

L S 113 Wood Carving 1(0,3) Introduction to the art of wood carving. Students learn about types of wood, tools, carving, and shop safety.

L S 125 Budget Travel 1(0,3) Teaches the necessary skills to travel internationally on a budget. Students learn how to get the best airfares, research destinations, and build an itinerary. Packing, security, local transportation, and culture-reverse-culture shock are also discussed.

L S 141 Top Rope Climbing 1(0,3) Basic rock climbing skills, including philosophy, safety, knots, climbing techniques, site and supplies selection, and nature/conservation issues are covered.

L S 143 Mountain Biking 1(0,3) Introduces the sport of mountain biking; guides students on techniques and procedures to plan and undertake rides. Covers both on-trail and off-trail bike mechanics used to keep bikes in proper working order.

L S 144 Performance Cycling 1(0,3) Provides aspiring cyclists with all the information necessary to be safe and successful cyclists. Students learn how to ride safely on open roadways, group riding skills, bike maintenance, and bike mechanics.

L S 145 Camping and Backpacking 1(0,3) Basic camping and backpacking skills including map and compass reading, outdoor cooking, camping hazards and safety, site selections, and trip planning.

L S 147 Alpine Skiing 1(0,3) Basic downhill snow skiing instruction including equipment selection, safety, and maintenance; parallel turns; edging; carved and linked turns; wedeling; and safety and etiquette. There is an additional fee for this course. Taught during Christmas recess. (Contact the Department of Parks, Recreation, and Tourism Management in October.)

L S 149 Snowboarding 1(0,1) Basic snowboarding instruction including equipment selection; safety; conditioning; and skills such as stopping, techniques for turning, and riding lifts. There is an additional fee for this course. Taught during Christmas recess. (Contact the Department of Parks, Recreation, and Tourism Management in October.) May not be taken concurrently with L S 147 or 347.

L S 156 Riflery 1(0,3) Introduces the basics of rifle shooting and firearm safety. Students progress from beginning rifle shooting to more advanced topics such as reloading, external ballistics, and long-range shooting.
L S 157 Shotgun Shooting 1(0,3) Introduces students to basic shotgun shooting skills and firearm safety. Topics include gun fitting, chokes, gauges, ammunition, and different shotgun disciplines such as skeet, trap shooting, and sporting clays.

L S 159 Hunting Traditions 1(0,3) Basic, hands-on instruction in the shooting sports (shotgun, rifle, and archery) and the sport of hunting. Designed to introduce students to the safe and responsible use of firearms and archery equipment and safe hunting practices. Students are required to complete the SC Department of Natural Resources Hunter Education certification.

L S 161 Turkey Hunting 1(0,3) Exposes students to the skills, techniques, and history of turkey hunting. Students learn gun and hunting safety; shotgun, muzzleloading, and archery hunting techniques; tracking; and basic calling techniques.

L S 164 Whitewater Kayaking 1(0,3) Flat-water and whitewater skills, techniques, safety, rescue, equipment selection and maintenance, and selection of routes/trips to participate in basic whitewater kayaking. Preq: Basic swimming skills.

L S 165 Inland Kayak Touring 1(0,3) Introductory course to basic skills necessary for safe enjoyment of flatwater (non-tidal waters: lakes, slow moving rivers) kayak touring. Students learn equipment selection, strokes, safety, and rescue techniques. Preq: Demonstrated swimming competence.

L S 167 Canoeing 1(0,3) Basic instruction in the nomenclature, strokes, and safety techniques in canoeing. Preq: Basic swimming skills.

L S 169 Sailing 1(0,1) Basic instruction in the nomenclature, safety and rescue techniques, and skills required to skipper sailing craft. Preq: Basic swimming skills.

L S 171 Windsurfing 1(0,3) Basic windsurfing instruction including rigging, launching, tacking, jibbing, rig and foot steering, safety, maintenance, equipment selection, rules-of-the-road, and racing techniques are covered. Offered Fall Break and first summer session. There is an extra fee for this course. Preq: Ability to swim 300 yards and tread water for five minutes.

L S 173 Bass Fishing 1(0,3) Provides basic knowledge and skills necessary to participate successfully in bass fishing.

L S 175 Fly Fishing 1(0,3) Introductory course in the techniques of fly-fishing. Students learn casting, fly-tying, and equipment selection.

L S 176 Beginning Fly Tying 1(0,3) The art of fly tying. Students learn basic fly tying techniques and gain a knowledge of materials and tools used in fly tying.

L S 177 Saltwater Fly Tying 1(0,3) Introduction to fly tying for saltwater applications of fly fishing.

L S 179 Scuba 1 1(0,3) Teaches basic open water diving techniques; prepares students to complete requirements for the open water diving certification. Certifications are granted by an internationally recognized and accepted certifying agency. Preq: Swim test required by certifying agency.

L S 183 Introduction to Rugby 1(0,3) Introduces students to the sport of Rugby. Covers history of the game, rules, and skills such as passing, kicking, and decision making.

L S 185 Bowling 1(0,3) Basic instructional program on techniques of bowling.

L S 187 Frisbee Sports 1(0,3) Focuses on the rules, history, and skills necessary for participating in various frisbee sports. Heavy emphasis is placed on Ultimate Frisbee and Frisbee Golf.

L S 189 Tennis 1(0,3) Fundamental course stressing rules, strokes, and strategy, with ample opportunity for practice.

L S 194 Racquetball 1(0,3) Basic skills, knowledge of rules, strategy, and basic strokes.

L S 195 Intermediate Racquetball 1(0,3) Builds on knowledge gained in L S 194. Students learn advanced swing mechanics, game strategy, and other advanced skills. Preq: L S 194 or equivalent skill.

L S 196 Introduction to Billiards 1(0,3) Introductory course in the history, rules, and skills necessary to participate in billiards. Students learn different types of games, proper shot techniques, and equipment selection.

L S 198 Golf 1(0,3) Fundamental course stressing rules, strategy, and basic strokes.

L S 199 Intermediate Golf 1(0,3) Builds on the knowledge gained in L S 198. Students learn to apply rules to common golf situations, improve ball striking, and course management. The skills and strategies taught are designed to improve existing golf scores. Preq: L S 198 or equivalent skill.

L S 200 Traditional Sports 1(0,3) Introductory course in the history, rules, and skills necessary to participate in traditional sports. Students learn about and participate in basketball, volleyball, football, and softball.

L S 202 Field Hockey 1(0,3) Introduces the fundamental skills, history, and rules of field hockey.

L S 203 Lacrosse 1(0,3) Introduces the fundamental skills, history, and rules of men’s and women’s Lacrosse.

L S 204 Square 1(0,3) Introduces the history, rules, and fundamental skills of soccer.

L S 210 Learn to Dance 1(0,2) Students develop an understanding of the qualities of dance, recognize the importance of dance as a leisure pursuit, and learn to dance to difference types of music. Dances include tap, charleston, box, foxtrot, and swing, as well as current dance trends.

L S 214 Modern Dance 1(0,3) Introduction to modern dance techniques with emphasis on developing the style of movement and understanding the dance art form.

L S 216 Contra Dance 1(0,2) Introduces students to the social dance of Contra. Students learn the origin and history of Contra along with the basic dance steps and styles.

L S 218 Ballroom Dance 1(0,2) Students develop an understanding of advanced dance methods, learn about dance at social and competitive levels, and increase knowledge of a variety of both smooth and Latin steps. Dances include tango, cha-cha, waltz, foxtrot, and swing.

L S 219 Country Western Dance 1(0,2) Introduces traditional country western dance. Students learn traditional couples dances, line dances, and barn dances.

L S 220 Shag 1(0,2) Develops an understanding of the South Carolina state dance, its history and impact on the state. Students learn more advanced steps in shag, including bellyroll, sugarpoot, slide step, tiptoe up the ladder, pivot, and the thirteen steps.

L S 221 Intermediate Shag Dance 1(0,2) Builds on skills learned in L S 220. Students improve their ability to improvise, add style, and add many different moves to their dance vocabulary. Preq: L S 220.

L S 222 Advanced Shag 1(0,2) Exposes students to a competition level of shag. Students learn to break down a dance routine and to choreograph short routines. Preq: L S 221.

L S 227 Introduction to Swing Dance 1(0,2) Introduction to vintage swing dance created in the 1920–1950s including Charleston, Lindy Hop, Jitterbug, and optional acoustic moves used in performance and competition.

L S 228 Intermediate Swing Dance 1(0,2) Builds on skills learned in L S 227 by improving students’ ability to improvise, add style, musicality, and many additional moves to add to their dance vocabulary. Preq: L S 227.

L S 229 Advanced Swing Dance 1(0,2) Focuses on competition level and style of swing dance. Students learn to break down and teach a routine to beginners. Students also learn the skills necessary to create and choreograph a short routine. Preq: L S 228 or consent of instructor.

L S 231 Bosu 1(0,3) Introduces the group aerobic style of Bosu, which concentrates on physical stability, core strength, and general fitness.

L S 232 Core Stability Training 1(0,3) Teaches fundamentals of core training. Students learn basic anatomy, proper strength training, and how to design a program to fit their fitness goals.

L S 233 Aerobic Dance 1(0,3) Instruction in the development of skills for the safe improvement and maintenance of cardiovascular fitness, flexibility, and muscle tone utilizing dance movements and techniques.

L S 235 Basic Yoga 1(0,3) Develops flexibility, strength, sensitivity, energy, and a sense of relaxation through the study of basic yoga postures, conscious breathing, and meditation techniques.

L S 236 Power/Ashtanga Yoga 1(0,3) Power Ashtanga Yoga is a comprehensive workout based on the Eastern philosophy of K. Pattabhi. Students learn the eight limbs of this philosophy and the rigorous series of postures that produce a high power, athletic workout with the purpose of detoxifying impurities in the body.

L S 237 Kripalu Yoga 1(0,3) Great emphasis is placed on learning breath work techniques to combine directly with the various kripalu yoga postures. The goal is to teach individuals the physiological reactions produced by this type of yoga in developing and restoring health.

L S 238 Vinyasa Flow Yoga 1(0,3) Explores the energetic, fluid movement of Yoga postures in sync with conscious breathing. Students study creative sequences using classical as well as innovative and advanced Yoga postures. Preq: L S 235 or consent of instructor.
L S 242 Meditation and Relaxation 1(0,2) Exposes students to the benefits of relaxation and meditation techniques. Students learn different techniques used to relieve stress and promote relaxation.

L S 245 Pilates 1(0,3) Study of the history, philosophy, and fundamental movement concepts of Pilates.

L S 251 Running and Jogging 1(0,3) Introduces the various components important to improving overall fitness level through a running or jogging activity. Topics include proper stretching exercises, nutrition, workout program design, and proper running techniques.

L S 258 Self Defense 1(0,3) Basic physical defense that incorporates risk avoidance and awareness techniques with basic physical defense options.

L S 264 Aikido 1(0,3) Introduces the modern Japanese martial art of Aikido.

L S 270 Sports Officiating 1(0,3) Practical study of officiating for various sports. Includes studies and practical application of officiating rules and mechanics. Sports studied include football, basketball, softball, soccer, and introductions to a variety of other team sports.

L S 275 Red Cross First Aid/CPR 1(0,3) Gives students the knowledge and skills necessary to prevent, recognize, and provide basic care for infants, children, and adults with injuries and sudden illness.

L S 347 Advanced Alpine Skiing 1(0,3) Advanced downhill snow skiing instruction in such techniques as mogul skiing, check turns, free-style, and racing. There is an additional fee for course. Taught over Christmas break. Credit is awarded for spring semester. (Contact Department of Parks, Recreation, and Tourism Management in October.) Preq: L S 147 or consent of instructor.

L S 389 Intermediate Tennis 1(0,3) Develops skills necessary to play at a competitive level in tennis. Students learn mechanically sound tennis skills, court positioning, court movement, proper shot selection, and strategic insight into the game. Preq: L S 189 or consent of instructor.

LIBRARY

LIB 199 Creative Inquiry—The Libraries 1-4(1-4) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

LIB 299 Creative Inquiry—The Libraries 1-4(1-4) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

LIB 399 Creative Inquiry—The Libraries 1-4(1-4) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

LIB 499 Creative Inquiry—The Libraries 1-4(1-4) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

MANAGEMENT

MGT 201, H201 Principles of Management 3(3,0) Management role as a factor of economic production. Functions of management, principles of organization, and behavior in organizations.

MGT 218 Management Personal Computer Applications 3(0,6) Personal computer applications that support managers. Students learn from hands-on work rather than lecture. To be taken Pass/Fail only.

MGT 297, H297 Creative Inquiry—Management 1-3(1-3,0) Students plan, develop, and execute a research project related to the field of management and present their findings. The development of the project includes lectures about research design, conduct, and data analysis. May be repeated for a maximum of six credits.

MGT 305 Economics of Transportation 3(3,0) Topics include history and structure of transportation systems in the United States, the nature of transportation costs and rates, transportation systems as factors in industrial location, transportation policy, and transportation's role in national security. Preq: Junior standing.

MGT (ECON) 306 Managerial Economics 3(3,0) See ECON 306.

MGT 307, H307 Human Resource Management 3(3,0) Principles, concepts, and techniques concerned with effective and efficient utilization of personnel. Emphasizes motivation, leadership, and human behavior related to employer-employee relations. Topics include personnel recruitment, classification, selection, training, development, and performance evaluation. Preq: MTHSC 309 or equivalent.

MGT 310, H310 Intermediate Business Statistics 3(3,0) Quantitative methods of the management scientist with applications to business and industrial problems. Topics include regression analysis, correlation analysis, analysis of variance, sampling, and nonparametric methods. Credit toward a degree will be given for only one of MGT 310 or EX ST 311. Preq: MTHSC 309 or equivalent.

MGT 312, H312 Decision Models for Management 3(3,0) Exploration of ways in which management science decision models can help in making sound managerial decisions. Problem solving is Excel-based. Topics include linear programming, project scheduling, and simulation. Preq: MTHSC 309 or equivalent.

MGT (E L E) 315 New Venture Creation II 3(3,0) Second of a two-part series examining entrepreneurship. Using opportunity analysis developed in MKT (E L E) 314, course focuses on designing and managing an organization capable of effectively pursuing the opportunity. Topics include organization strategy and design, start-up capital, operations and sourcing issues, leadership, team building, and management of rapid growth. Preq: MGT (E L E) 314.

MGT 317 Logistics Management 3(3,0) Management of physical distribution and supply systems with emphasis on design concepts, cost determinants, and control. Preq: Junior standing.

MGT 318 Management Information Systems 3(3,0) Introduction to information systems concepts and applications in business. Topics include software, hardware, decision support and knowledge based systems, database, information systems design and implementation, and the management of information systems. Preq: MGT 201 or consent of instructor.

MGT 390 Operations Management 3(3,0) Examines the role of operations management in both manufacturing and service organizations. Discusses the concepts, tools, and techniques for managing the operations function. Topics include operations strategy, design, planning, and control. Preq: MTHSC 309 or equivalent.

MGT 398 Internship in Management 1-3 Faculty-supervised management internship to give students learning opportunities that support their classroom experiences. Requires at least 150 hours of internship work per credit hour received. Course enrollment and internship must occur in the same semester. May be repeated for a maximum of three credits. To be taken Pass/Fail only. Preq: Junior standing, 2.0 cumulative grade-point ratio, consent of instructor.
MGT 400 Management of Organizational Behavior 3(3,0) Provides management students with a framework for understanding how behavior within business organizations is managed. Particular emphasis is on integrating management theory with recent developments in the behavioral sciences with distinct management applications. Theory, research, and business applications are considered. Preq: MGT 201.

MGT 402, H402 Operations Planning and Control 3(3,0) Managing, planning, and controlling production and service operations emphasizing demand forecasting, aggregate planning, production scheduling, and inventory management. Preq: MGT 390 or consent of instructor.

MGT 403 Special Problems 1-3(1-3,0) Students plan, develop, and execute a research project related to the field of management and defense studies. May be repeated for a maximum of six credits. Preq: Senior standing in Industrial Management or Management, consent of instructor.

MGT 404 Advanced Statistical Quality Control 3(3,0) Statistical quality control techniques as applied to all areas of quality control: process control, process capability, acceptance sampling, and economic aspects of quality decisions. Preq: MGT 390.

MGT 408 Lean Operations 3(3,0) Examines the use of scientific methods for the design of operating systems for both manufacturing and services. Special emphasis is on the development of the Toyota Production System for continuous improvement and the application of the relevant techniques to the design of facilities, jobs, and systems. Preq: MGT 390.

MGT 411 Project Management 3(3,0) Examination and application of the project management body of knowledge. This consists of theory, tools, and techniques to organize, plan, and control individuals, teams, quality, and operations while conducting a project. Preq: MTHSC 309 or equivalent.

MGT 412 Sourcing and Supplier Management 3(3,0) Provides an understanding of the key issues in selecting and developing suppliers. Provides a conceptual framework to understand purchasing function within the firm and its role in supply chain management. Preq: MGT 390.

MGT 414 Statistical Analysis 3(3,0) Application of statistics in management decision making. Emphasis is on the proper design, analysis, and interpretation of planned experiments. Topics include single factor through fractional factorial experiments. Preq: MGT 310 or equivalent.

MGT 415, H415 Business Strategy 3(3,0) Capstone course for seniors. Various methods are used in analyzing complex business problems, requiring students to integrate their knowledge of all areas of business. Student participation and written and oral communications are stressed. Preq: FIN 306 or 311; MGT 201; MGT 301; Senior standing.

MGT 416 Management of Human Resources 3(3,0) Recent developments in the management of human resources with emphasis on results of research into the motivation, development of potential, and full utilization of the human resources. Preq: MGT 307, 400.

MGT 422 Small Business Management 3(3,0) Study of management of the small independently owned and operated business. Emphasizes analyzing new business opportunities, planning and establishing a growing concern, and managing the contemporary small business. Field experience in consulting with small businesses enhances students' understanding of the unique opportunities and problems of small business organizations. Preq: MGT 301 or consent of instructor.

MGT 423 International Business Management 3(3,0) Survey of theoretical and institutional complexities of international business operations. Topics include exporting, importing, foreign investment, multinational corporations, and international payment system. Preq: Junior standing.

MGT 424 Global Supply Chain Management 3(3,0) Design, planning, control, and improvement of supply chains for competing effectively in the context of global operations. Topics include supply chain structure and configuration, approaches to intra-organizational and inter-firm integration, and complexities of material, information, and cash flows across international borders. Preq: MGT 390 or consent of instructor.

MGT 425 Compensation Management 3(3,0) Examination of compensation employees seek in exchange for their efforts and contributions. Topics include government and union influences; job content analysis, description, and evaluation; developing pay structures; measuring and paying for performance; employee benefits; administration of the compensation plan; executive, managerial, professional, and salaried. Preq: MGT 307, 400.

MGT 427 Managing Continuous Improvement 3(3,0) Examination of issues related to continuous improvement, including a systematic approach to selecting improvement areas, determining how to improve, plan, and manage the improvement process. Topics include selecting performance measurements, using teams to achieve breakthrough change, identifying root causes of problems, and developing and implementing solutions to problems. Preq: MGT 390 or consent of instructor.

MGT 430 Senior Seminar in Management 3(3,0) In-depth study of current business topics; allows senior Management students to relate their academic studies to real-world problems. Senior paper is required. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Senior standing.

MGT 431 Employee Diversity, Rights, and Responsibilities 3(3,0) Focuses on employee and organizational rights and responsibilities. Topics include various types of discrimination (race, sex, religious, national origin, age, and disability status); drug and alcohol testing; AIDS in the workplace; employee discipline and termination issues; privacy and safety concerns; and union organizing campaigns. Preq: MGT 307, 400.

MGT 435 Personnel Interviewing 3(3,0) Helps students understand current interviewing theory, conduct an employment interview, and advise their future employers how to improve interviewing programs. Topics include job analysis, legal issues, types of interviews, and evaluating applicants. Preq: MGT 307, 400.

MGT 436 White-Collar Crime 3(3,0) White-collar crime and corruption are examined from a managerial perspective. Topics include financial crimes, crimes against consumers, environmental crimes, acts of institutional corruption, the impact of organized crime on legitimate businesses, and computer crime. Preq: Senior standing; Coreq: FIN 306.

MGT (I E) 444 International Perspectives in Industrial Management 1-6(1-6,0) Provides an international perspective to industrial management via organized plant visits to businesses in a foreign country and lectures by and discussions with senior operations managers. Cultural visits and lectures are also organized to provide a holistic perspective toward cultural and economic environment of the host country. Students are responsible for travel costs. May be repeated for a maximum of six credits. Preq: Consent of instructor.

MGT 452 Systems Analysis and Design 3(3,0) Follows the traditional systems development life cycle (SDLC), although alternative methodologies are also discussed. Focuses on earlier phases of the SDLC, from IS planning through specification of structured requirements and on the methods, techniques, and tools used to determine information requirements and their unambiguous documentation. Preq: Junior standing.

MGT 454 Systems Implementation 3(3,0) Builds upon skills of programming, database, and systems analysis and design by involving students with the later phases of the systems development life cycle (SDLC). Students design and develop a system using various platforms. Focus is on the logical and physical system design. Preq: CP SC 462 or equivalent, MGT 452.

MGT 455 Emerging Information Technology Trends in Business 3(3,0) In-depth study, through case studies, readings, and hands-on experience of emerging information technologies in and across business organizations. Focuses on understanding, effective deployment, and impact of these technologies on business outcomes. Preq: Junior standing.

MGT 456 Decision Support Systems 3(3,0) In-depth study, through case studies, readings, and hands-on experience, of decision support systems and related knowledge-based technologies. Focus is on organizational decision making and its data, information, and knowledge-based support systems. Preq: Junior standing.

MGT 490 Selected Topics in Industrial Management 3(3,0) In-depth examination of advanced topics in Industrial Management. Topics may vary in keeping with developments in the management profession and interests of faculty. Emphasizes the application of these topics to the production and operations management environment. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: MGT 402 or 404 or 408.
MGT 497, H497 Creative Inquiry—Management 1-3(1-3,0) Students plan, develop, execute, and direct a research project related to the field of management and present their findings. The project includes lectures about research design, conduct, and data analysis. May be repeated for a maximum of six credits.

MARKETING

MKT 298 Creative Inquiry—Marketing 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits.

MKT 301, H301 Principles of Marketing 3(3,0) Principles and concepts involved in planning, pricing, promoting, and distributing of goods and services. Preq: ECON 200 or 211 or 212; sophomore standing.

MKT 302 Consumer Behavior 3(3,0) Examination of selected individual and group behavioral science concepts and their application to the understanding of consumer decision making. Preq: MKT 301.

MKT (E L E) 314 New Venture Creation I 3(3,0) First in a two-part series which continues with MKT (E L E) 315 assessing entrepreneurial opportunities. Focuses on creativity, idea generation, market opportunity analysis, strategy, and methods of entry. Opportunity analysis may be developed into a full new venture plan in MKT (E L E) 315. Preq: Junior standing.

MKT 321 Sports Marketing 3(3,0) Exploration of the essentials of effective sports marketing. Topics include application of marketing principles in the sports area, licensing issues, sponsorships and endorsements, stadium and arena marketing, broadcasting and media considerations, public policy and sports, and unique marketing opportunities. Focuses on creativity, idea generation, market opportunity analysis, strategy, and methods of entry. Opportunity analysis may be developed into a full new venture plan in MKT (E L E) 315. Preq: Junior standing.

MKT H390 Junior Honors Research 1(1,0) Students select and complete a research project approved by a faculty advisor, in conjunction with an approved three-credit marketing course (other than MKT 301, H301, or 431). Students are expected to display a command of marketing theory and an ability to apply theory to their research. Preq: MKT 301 or H301, membership in Calhoun Honors College, consent of faculty member supervising research.

MKT 398 Creative Inquiry—Marketing 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits.

MKT 399 Marketing Internship 3(0,9) Pre-planned, preapproved, faculty-supervised marketing internships. Credit will only be given for internships of at least ten full-time, consecutive weeks with the same internship provider. Restricted to students with a major in Marketing. To be taken Pass/Fail only. Preq: MKT 301 and consent of instructor.

MKT 420 Professional Selling 3(3,0) Current theories about the selling of goods and services to organizational buyers in the context of long-term relationships. Role playing, video-taped presentations, and other techniques are generally employed to enhance interpersonal communication skills. Preq: Junior standing, MKT 301.

MKT 423, 623 Promotional Strategy 3(3,0) Emphasizes promotion as the communicative function of marketing. Attention is given to communication theory and promotion's role to mass and interpersonal communication. Factors affecting promotional decision-making processes are explored, and promotion as a competitive tool is examined. Preq: MKT 301 or consent of instructor.

MKT 424 Sales Management 3(3,0) Comprehensive examination of the planning, implementation, and control of sales organizations. Preq: MKT 301 or consent of instructor.

MKT 425 Retail Management 3(3,0) Retailing is studied from a decision-making approach. Topics include the factors of market analysis, location analysis, merchandising, human resources, pricing and promotion. Preq: MKT 301 or consent of instructor.

MKT 426 Business-to-Business Marketing 3(3,0) Study and analysis of the unique aspects of marketing goods and services to organizational buyers rather than household consumers. Emphasis is on developing strategic responses to market opportunities given competitive behavior. Preq: MKT 301 or consent of instructor.

MKT 427, 627 International Marketing 3(3,0) Study of marketing from the international point of view. Emphasis is on the necessary modification of marketing thinking and practice for foreign markets due to individual environmental differences. Preq: MKT 301.

MKT 428, 628 Services Marketing 3(3,0) Exploration and study of the nature of service organizations and the principles which guide the marketing of their products. Emphasis is on a marketing mix that is fundamentally different than that found in traditional goods marketing. Preq: MKT 301 or consent of instructor.

MKT 429, 629 Public and Nonprofit Marketing 3(3,0) Examines the roles and application of marketing in public and nonprofit settings. Focuses on a conceptual understanding of the marketing discipline and marketing processes and how basic concepts and principles of marketing are applicable to public and nonprofit organizations. Preq: MKT 301 or consent of instructor.

MKT 430, 630 Marketing Product Management 3(3,0) Management of the firm's product or service offerings. Topics include new product screening, evaluation, and development; product line and mix analysis, abandonment decisions, brand manager's role, new product development department, and others. Emphasis is on decision making. Preq: MKT 310, MKT 301; or consent of instructor.

MKT 431 Marketing Research 3(3,0) Research used in marketing decision making. Emphasizes methods and techniques used in planning, collection, processing, and utilizing information. Topics include research design, sources of information, questionnaire design, sampling, data collection, and data analysis. Preq: Marketing major; MKT 310, MKT 301, MTHSC 301 or 309.

MKT 433 Sport Marketing Strategy 3(3,0) Provides students with basic knowledge about brand management as it applies to sport. Addresses basic principles and guiding precepts of how sport-based organizations build strong brands. Preq: MKT 321 or consent of instructor.

MKT 434 Sport Promotion 3(3,0) Emphasizes the promotional function of sport. Topics include event sponsorship, developing media relationships with media, endorsements, promotion strategy, and the tools and methods necessary to utilize the tools of promotion within a sport context. Integrated Marketing Communication provides the theoretical and managerial framework for how these factors are utilized optimally. Preq: MKT 321, 423.

MKT 443 Advertising Strategy 3(3,0) Advertising strategy emphasizing knowledge of target audiences and expectations and the messages to communicate effectively with them. Foundations include knowledge, motivation, and changing behavior of target audiences. Issues include models for decisions, tools for promotion, and integrated advertising plans. Preq: MKT 301.

MKT 445 Macromarketing 3(3,0) Examines the relationship between marketing and society focusing on the social impact of marketing practices. Topics include technology, ethics, materialism, globalization, environmental sustainability, and the political and economic philosophy underlying marketing. Course is multidisciplinary and uses a variety of readings to cover each of the topic areas. Preq: MKT 301 and junior standing, or consent of instructor.

MKT 450 Strategic Marketing Management 3(3,0) Application of marketing constructs in the analysis and solution of marketing problems. Emphasizes information systems, data analysis, and critical-thinking skills in solving marketing problems in a wide range of managerial decision areas including, but not limited to, new product development, pricing, advertising, personal selling, channels, and international marketing. Preq: Marketing major, MKT 301, six credits of 400-level marketing courses.

MKT H490 Senior Honors Thesis Research 3(3,0) Students, in consultation with a Marketing faculty member, choose a topic for the honors thesis and produce a research proposal which involves an imaginative approach to the subject, a sufficient literature review, a comprehensive introduction to the research topic, and a detailed research plan. Preq: MKT H390.
MKT 491 Senior Honors Thesis Writing and Presentation 3(3,0) Students implement their research plans, write up their reports, and present and defend their Senior Honors Theses to an audience of Marketing faculty, Honors students, and invited others. Preq: MKT 490.

MKT 495, 695 Selected Topics 3(3,0) In-depth examination of timely topics in marketing. May be repeated for credit, but only if different topics are covered. Preq: MKT 301 or consent of instructor.

MKT 498 Creative Inquiry—Marketing 1-4(1-4) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of six credits.

MKT 499 Independent Study 1-3(1-3,0) Directed readings or independent research in selected marketing areas. Topics must be selected and proposed by student. Proposals must be approved by instructor. May be repeated for a maximum of three credits. Preq: MKT 301 and consent of instructor.

MATERIALS SCIENCE AND ENGINEERING

MS&E 101 Materials Technology in Everyday Life 3(3,0) Introduces principles of materials science benefiting citizens. Students learn how to make intelligent choices about everyday materials and devices and present their informed opinions through class discussions and group projects involving controversial topics such as recycling, green manufacturing, and nanotechnology.

MS&E 251 Materials Science and Engineering Portfolio I 1(1,0) Introduces students to the concept of self-paced, professional development throughout their plans of study. Each student is assigned a faculty mentor to act as mentor and advisor. Preq: Consent of instructor.

MS&E 324 Statistics for Materials Science and Engineering 3(3,0) Introduction to statistics with particular application to the material industry. Covers measures of central value and variation, probability, the normal curve, tests of hypotheses, elementary correlation, and regression. Preq: Sophomore standing or consent of instructor.

MS&E 450 Materials Science and Engineering Portfolio 2(2,0) Students working in groups present and discuss practical, ethical, safety, and business topics in the polymer and textile industries. Students are required to complete their electronic portfolios. To be taken Pass/Fail only.

MS&E 451 Materials Science and Engineering Portfolio II 1(1,0) Continuation of the student's self-paced, professional development throughout the rest of his/her plan of study by working with the faculty mentor who has been assigned to act as mentor and advisor. Preq: MS&E 251 and consent of instructor.

MS&E 491 Undergraduate Research 1-3(0,2-6) Investigation of a typical materials science and engineering problem under the direct supervision of a faculty member. After completing the research, students prepare a formal written and oral report. Preq: Consent of instructor.

MATH SCIENTIFIC COMPUTER SCIENCE

MATH 101 Applied Basic Mathematics 3(3,0) Topics include logic and set theory, counting and probability, rectangular coordinates, equations of degree one and two, inequalities, functions, and graphs are studied. Not open to students who have received credit for any other mathematics courses. To be taken Pass/Fail only.

MATH 108, H108 Calculus of One Variable I 4(4,0) Topics include analytic geometry, introduction to derivatives, computation and application of derivatives, integrals, exponential and logarithmic functions. Preq: MATHSC 103 or 105 or satisfactory score on the Clemson Mathematics Placement Test or consent of department.

MATH 109 Co-Calculus I 1(0,2) Recitation course to accompany MATHSC 109. Reinforces precalculus and calculus topics covered in MATHSC 108 and provides additional instruction and practice for students. Required of students identified by the Clemson Mathematics Placement Test as being conditionally qualified for placement in calculus with supplemental instructional support. To be taken Pass/Fail only. Preq: Concurrent enrollment in MATHSC 109.

MATH 115 Contemporary Mathematics for Elementary School Teachers I 3(3,0) Cooperative learning groups, manipulatives, and concrete models are used to demonstrate logical reasoning, problem-solving strategies, sets and their operations, numeration systems, properties and operations of whole numbers, number theory, prime and composite numbers, divisibility, common factors and multiples. Open to Elementary, Early Childhood, and Special Education majors only. Preq: MATHSC 104 or satisfactory score on the Clemson Mathematics Placement Test.

MATH 116 Contemporary Mathematics for Elementary School Teachers II 3(3,0) Continuation of MATHSC 115. Manipulatives and concrete models are used for properties, operations, and problem solving for integers, elementary fractions, rational numbers, and real numbers. Selected topics in statistics and probability are introduced with a hands-on approach to learning. Restricted to Elementary, Early Childhood, and Special Education majors. Preq: MATHSC 115 or consent of instructor.
MTHSC 117 Mathematics for Elementary School Teachers I 3(2,2) Problem-solving strategies, logic, algebraic thinking, sets, relations, functions, numeration systems, whole numbers, integers, number theory, fractions, decimals, applications of percent, real numbers with their computational algorithms and properties are explored. Content, according to state standards, is taught with appropriate methodology for teaching K–6. Preg: MTHSC 101.

MTHSC 118 Mathematics for Elementary School Teachers II 3(2,2) Simple probability and descriptive statistics are reviewed. Two- and three-dimensional geometry including polygons, polyhedra and their properties; congruence, similarity, and constructions; coordinate system; standard measurement, area, surface area, volume; and motion geometry are explored. Content, according to State standards, is taught with appropriate methodology for teaching K–6. Preg: MTHSC 101.

MTHSC 119 Introduction to Discrete Methods 3(3,0) Topics normally include elementary logic and methods of proof; sets, functions, and relations; graphs and trees; combinatorial circuits and Boolean Algebra. Preg: Satisfactory score on the Clemson Mathematics Placement Test or consent of department.

MTHSC 129 Problem Solving in Discrete Mathematics 3(2,2) Problem-solving approach to learning mathematics is applied to topics in modern discrete mathematics. Typical selection of topics includes logic and proof, sets, relations, functions, mathematical induction, graphs and trees, counting techniques, recurrence equations. For Bachelor of Science and Bachelor of Arts majors in Mathematical Sciences only. Credit may not be received for both MTHSC 119 and 129. Preg: MTHSC 106.

MTHSC 199 Problem Solving in Mathematics 3(2,2) Functions and graphs, mathematical modeling, and applications. Applications from management and life and social sciences are presented. Specific topics include linear, quadratic, polynomial, exponential, and logarithmic functions with emphasis on problem solving. Students who have received credit for any other mathematical sciences course will not be allowed to enroll in or receive credit for MTHSC 199. To be taken Pass/Fail only.

MTHSC 203 Elementary Statistical Inference 3(3,0) Data-based course in statistical methodology covering data collection and summarizing data, the normal distribution, one and two sample inference on means and proportions, simple linear regression, analysis of categorical data. May not be taken for credit by students who have passed MTHSC 301, 302, 309, or EX ST 301. Preg: Satisfactory score on the Clemson Mathematics Placement Test or MTHSC 101 or consent of department.

MTHSC 206, H206 Calculus of Several Variables 4(4,0) Topics include real valued functions of several variables, multiple integration, differential calculus of functions of several variables, vector field theory. Preg: MTHSC 108.

MTHSC 207 Multivariable Calculus 3(3,0) Introduction to the calculus of several variables, differential calculus and optimization of several variables, multiple integrals. Topics from the management sciences are used to illustrate the above concepts. May not be taken by students who have passed MTHSC 206. Preg: MTHSC 102, or 106 with consent of instructor.

MTHSC 208, H208 Introduction to Ordinary Differential Equations 4(4,0) Introduction to the study of differential equations and their application to physical problems. Topics include exact, series, and numerical solutions; solutions by means of Laplace transforms; and solutions of systems of differential equations. Preg: MTHSC 206.

MTHSC 210 Applied Matrix Algebra 3(3,0) Introduction to the basic principles of matrix algebra with applications to the behavioral and managerial sciences. Major areas of application include linear programming, directed graphs, and game theory. Preg: MTHSC 101 and 102 or 106.

MTHSC 216 Geometry for Elementary School Teachers 3(3,0) Informal treatment of the basic concepts of geometry. Open to Elementary, Early Childhood, and Special Education majors only. Preg: MTHSC 116 or consent of instructor.

MTHSC 231 Mathematics of Life Insurance 3(3,0) Introduction to basic mathematics of finance and life insurance. Topics include compound interest, annuities certain, mortgagable tables, life annuities, net premiums, net level reserves, modified reserves, nonforfeiture values, and dividends.

MTHSC 232 Introduction to Mathematical Sciences 1(1,0) Introduction to areas of study, degree options, career choices, and professional development in mathematical sciences. Includes formal and requirements for portfolio development and an introduction to ethical issues.

MTHSC 239 Creative Inquiry—Mathematical Sciences 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of three credits.

MTHSC 301, H301 Statistical Methods I 3(3,0) Principal topics include collecting and summarizing data, probability distributions, inferences about central values and variance, analysis of categorical data, simple linear regression, basic experimental designs, and the analysis of variance. Credit toward a degree will be given for only one of MTHSC 301, 302, 309, EX ST 301. Preg: MTHSC 106 or 207 or 210.

MTHSC 302 Statistics for Science and Engineering 3(3,0) Methodology for collecting, organizing, and interpreting data. Topics include understanding variability, graphical and numerical summarization of data, introductory probability, normal and related distributions, statistical inference, experimental design, simple linear regression. Statistical microcomputer software is used. Credit toward a degree will be given for only one of EX ST 301, MTHSC 301, 302, 309. Preg: MTHSC 206.

MTHSC 308 College Geometry 3(3,0) Theorems and concepts more advanced than those of high school geometry. Treatment of the various properties of the triangle, including the notable points, lines, and circles associated with it. Preg: MTHSC 106.

MTHSC 309 Introductory Business Statistics 3(3,0) Introductory probability and statistics for business students, particularly those who will take MGT 310. Topics include descriptive statistics, probability, expectations, binomial, normal, sampling distributions, one and two sample estimation and testing. Credit toward a degree will be given for only one of EX ST 301, MTHSC 301, 302, 309. Preg: MTHSC 106 or 207 or 210.

MTHSC 311, H311 Linear Algebra 3(3,0) Introduction to the algebra of matrices, vector spaces, polynomials, and linear transformations. Preg: MTHSC 108 or consent of instructor.

MTHSC 360 Intermediate Mathematical Computing 3(3,0) Intermediate-level introduction in using computers to solve problems in the mathematical sciences. Fundamental concepts of algorithmic programming including flow control, modular construction, primitive data structures, recursion, and graphics are applied to problems in applied mathematics, probability, statistics, discrete mathematics, and operations research. Preg: MTHSC 108.

MTHSC H382 Honors Seminar 1(1,0) Weekly seminar to prepare students in Departmental Honors Program for independent senior research. At the end of the second semester, each student must have identified a research topic and a faculty advisor. May be repeated for a maximum of two credits. Preg: Junior standing in departmental honors program.

MTHSC 399 Creative Inquiry—Mathematical Sciences 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of three credits.

MTHSC 400, H400, 600 Theory of Probability 3(3,0) Principal topics include combinatorial theory, probability axioms, random variables, expected values; special discrete and continuous distributions, jointly distributed random variables, correlation, conditional expectation, law of large numbers, central limit theorem. Preg: MTHSC 206 or consent of instructor.

MTHSC 403, H403, 603 Introduction to Statistical Theory 3(3,0) Principal topics include sampling distributions, point and interval estimation, maximum likelihood estimators, method of moments, least squares estimators, tests of hypotheses, likelihood ratio methods, regression and correlation analysis, introduction to analysis of variance. Preg: MTHSC 400 or equivalent.
MTHSC 405, 605 Statistical Theory and Methods II 3(3,0) Principal topics include simple linear regression, multiple regression and correlation analysis, one-way analysis of variance, multiple comparison, multifactor analysis of variance, experimental design. Computation and interpretation of results are facilitated through use of statistical computer packages. Preq: MTHSC 301.

MTHSC 406, 606 Sampling Theory and Methods 3(3,0) Probability-based treatment of sampling methodology. Theory and application of estimation techniques are treated using simple and stratified random sampling, cluster sampling, and systematic sampling. Preq: MTHSC 302 and 400, or consent of instructor.

MTHSC 407, 607 Regression and Time-Series Analysis 3(3,0) Theory and application of the regression and time series. Approaches to empirical model building and data analysis are treated. Computation and interpretation of results are facilitated through the use of interactive statistical packages. Preq: MTHSC 302, 311, 400; or consent of instructor.

MTHSC 408, 608 Topics in Geometry 3(3,0) Introduction to topics in special geometries which include non-Euclidean space concepts such as projective geometry, finite geometries, and intuitive elementary topology. Brief introduction to vector geometry. Preq: MTHSC 206.

MTHSC 410 Number Theory 3(3,0) Introduction to theory of integers and related number systems. Topics include historical development, principles of mathematical induction, divisibility, primes, congruences, number-theoretic functions, primitive roots, quadratic residues, and diophantine equations. Preq: MTHSC 108 or consent of instructor.

MTHSC 412, H412, 612 Introduction to Modern Algebra 3(3,0) Introduction to the concepts of algebra. Topics include the number system and the elementary theory of groups, rings, and fields. Preq: MTHSC 311.

MTHSC 419, H419, 619 Discrete Mathematical Structures I 3(3,0) Applies theoretical concepts of sets, functions, binary relations, graphs, Boolean algebras, propositional logic, semigroups, groups, homomorphisms, and permutation groups to computer characteristics and design, words over a finite alphabet and concatenation, binary group codes, and other communication or computer problems. Preq: MTHSC 108.

MTHSC 430 Actuarial Science Seminar I 1(1,0) Problem-solving seminar to prepare students for the examination on the Society of Actuaries’ and Casualty Actuarial Society’s Course 2 (Interest Theory, Economics and Finance). Preq: ECON 211, 212, FIN 306 or 311, MTHSC 431, or consent of instructor.

MTHSC 434, 634 Advanced Engineering Mathematics 3(3,0) Fourier series, Laplace and Fourier transform, and numerical methods for solving initial value and boundary-value problems in partial differential equations are developed. Applications to diffusion wave and Dirichlet problems are given. Matrix methods and special functions are utilized. Preq: MTHSC 208.

MTHSC 435, H435, 635 Complex Variables 3(3,0) Elementary functions; differentiation and integration of analytic functions; Taylor and Laurent series; contour integration and residue theorem; conformal mapping; Schwarz-Christoffel transformation. Preq: MTHSC 206.

MTHSC 440, H440, 640 Linear Programming 3(3,0) Introduction to linear programming covering the simplex algorithm, duality, sensitivity analysis, network models, formulation of models, and the use of simplex codes to solve, interpret, and analyze problems. Preq: MTHSC 206, 311; or consent of instructor.

MTHSC 441, H441, 641 Introduction to Stochastic Models 3(3,0) Introductory treatment to stochastic processes, finite-state Markov chains, queuing, dynamic programming, Markov decision processes, credibility decision analysis, and simulation. Both theory and applications are stressed. Preq: MTHSC 430.

MTHSC 450 Introduction to Mathematical Models 3(3,0) Includes a study of the modeling process and examples of existing models chosen from physical, mathematical, social, and management sciences depending on the instructor. Written and oral report is required for at least one of the models studied. May be repeated for a maximum of six credits. Preq: MTHSC 302, 360, 440, or consent of instructor.

MTHSC 453, H453, 653 Advanced Calculus I 3(3,0) Limits, continuity, and differentiation of functions of one and several variables, the Riemann integral, and vector analysis. Preq: MTHSC 206.

MTHSC 454, H454, 654 Advanced Calculus II 3(3,0) Continuation of MTHSC 453. Transformations, multiple integrals, line and surface integrals, infinite sequences and series, and improper integrals. Preq: MTHSC 453.

MTHSC 460, 660 Introduction to Numerical Analysis I 3(3,0) Introduction to the problems of numerical analysis emphasizing computational procedures and application. Topics include sources of error and conditioning, matrix methods, systems of linear equations, nonlinear equations, interpolation and approximation by splines, polynomials, and trigonometric functions. Preq: MTHSC 206 or 207 and 360 or equivalent.

MTHSC 463, H463, 663 Mathematical Analysis I 3(3,0) Basic properties of the real number system, sequences and limits; continuous functions, uniform continuity and convergence. Integration, differentiation, functions of several real variables, implicit function theory. Preq: MTHSC 206.

MTHSC 481 Seminar in Mathematics 1-3(1-3,0) Attention is focused on mathematical areas in which nonroutine problems can be posed with comparative ease. Emphasis is on independent study and student use of previous mathematical skills. Open to students by invitation only for a maximum of three credits.

MTHSC 482, H482 Undergraduate Research 3(3,0) Independent research conducted under the supervision and guidance of a faculty member. May be repeated for a maximum of six credits.

MTHSC 491 Independent Study 3(3,0) Independent study or internship in mathematical sciences under faculty supervision. A written report and oral poster presentation of the results of the independent study or internship are required. May be repeated for a maximum of six credits. Preq: Mathematical Sciences major.

MTHSC 492 Professional Development 1(1,0) Issues in professional development in the Mathematical Sciences. Individual portfolios are evaluated and critiqued for continued career use. To be taken Pass/Fail only.

MTHSC 499 Creative Inquiry—Mathematical Sciences 1-3(1-3,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of three credits.

MECHANICAL ENGINEERING

M E 202 Foundations of Mechanical Systems 3(3,0) Introduction to basic physical elements of mechanical engineering systems. Problem solving, design, and resourceful application of mathematics and general principles from students’ science courses are emphasized throughout. Preq: M E 201 and 222 (or concurrent enrollment).

M E 222 Mechanical Engineering Laboratory I 2(0,6) Discovery of mechanical engineering principles and phenomena. Introduction to laboratory safety practices, instrumentation, calibration techniques, data analysis, and report writing. Introduction to basic manufacturing processes. Preq: PHYS 122 and 124.

M E H300 Junior Honors Seminar 0 Acquaints students enrolled in Departmental Honors Program with current research activities in the Department of Mechanical Engineering. Faculty provide seminars in which research interests are summarized. These seminars are planned to prepare students in choosing a research topic for the senior thesis. Preq: Junior standing in departmental honors program.

M E 302, H302 Mechanics of Materials 3(3,0) Relationships between external loads on solid bodies or members and the resulting internal effects and dimension changes, including the derivation of rational formulas for stresses and deformations and the identification and use of important mechanical properties of engineering materials. Preq: C M E 210, M E 201, MTHSC 206. Coreq: MTHSC 208.

M E 303 Thermodynamics 3(3,0) Study of the second law and entropy. Includes applications to fixed mass systems and control volumes; vapor and gas power cycles; mixtures of gases; vapor psychrometrics; combustion and the third law. Thermochemical equilibrium. Preq: M E 203.

M E 305 Modeling and Analysis of Dynamic Systems 3(3,0) Presents techniques for developing and analyzing physical and mathematical models of mechanical and electromechanical systems. Transient and frequency response are determined using analytical and numerical methods. Basic feedback systems are introduced. Preq: E C E 307, MTHSC 208, 360. Coreq: M E 202.

M E 306 Fundamentals of Machine Design 3(3,0) Introduction to failure theory, fatigue analysis, and energy methods for deflection analysis. Integration of these topics with selected portions of mechanics of materials and application of them to the design and analysis of machine elements. Preq: M E 202, 302.

M E 308, H308 Fluid Mechanics 3(3,0) Behavior of fluids at rest or in motion, including the study of fluid properties. Emphasizes a rational, analytical approach from which are developed basic principles of broad applicability to all fields of engineering. Preq: M E 201, 203, MTHSC 208 (or concurrent enrollment).

M E 310 Thermodynamics and Heat Transfer 3(3,0) Introduction to thermodynamics and heat transfer for nonmajors: properties of liquids and gases, first and second law analysis, introduction to cycles for power and refrigeration, heat flow by conduction and radiation, and convective heat flow and heat exchangers. Preq: Junior standing in an engineering curriculum.

M E 312 Manufacturing Processes and Their Application 3(3,0) Fundamental principles associated with production processes and their application to the manufacture of products from metals, polymers, ceramics, and composites. Emphasizes the physical and quantitative aspects of processing, the selection of processes to create products, and the identification of processes used to manufacture existing products. Preq: M E 303, 304, 305, 306, 444.

M E 405 Kinematics and Dynamics of Machinery I 3(3,0) Graphical, analytical, and numerical techniques are used in the dynamic analysis and synthesis of machines. Emphasis is on the application of these analysis techniques to planar linkages. Preq: E M 202, 304.

M E 407, 607 Applied Heat Transfer 3(3,0) Application oriented extension of M E 304, considering topics in transient conduction, flow of fluids, energy exchange by radiation, and mass transfer. Applications in heat-exchanger design with emphasis on economics and variation of operating conditions from the design point. Preq: M E 304, consent of instructor.

M E 415, H415 Undergraduate Research 1-3 Individual research projects conducted under the direct supervision and guidance of a faculty member. May be repeated for a maximum of six credits. Preq: Consent of instructor.

M E 416, 616 Control of Mechanical Systems 3(3,0) Physical modeling and feedback principles are presented for control of mechanical systems. Transient response, root locus, and frequency response principles are applied to the control of basic mechanical systems such as electric motors, fluid tanks, or thermal processes. PID control laws are emphasized. Preq: M E 305.

M E 417, 617 Mechatronics System Design 3(2,3) Mechatronics integrates control, sensors, actuators, and computers to create a variety of electromechanical products. Includes concepts of design, appropriate dynamic system modeling, analysis, sensors, actuating devices, and real time microprocessor interfacing and control. Laboratory experiments, simulation, and design projects are used to exemplify the course concepts. Preq: M E 305 or consent of instructor.

M E 418 Finite Element Analysis in Mechanical Engineering Design 3(2,3) Introduction to the finite element method and solid modeling, finite element modeling and analysis using commercial codes; analysis strategies using finite elements; applications to heat transfer, fluid flow, and structures. Preq: M E 302, 304, 308, or consent of instructor.

M E 420, 620 Energy Sources and Their Utilization 3(3,0) Covers availability and use of energy sources such as fossil fuels, solar (direct and indirect), and nuclear; addresses energy density and constraints to use (technical and economic) for each source. Preq: M E 303, 304.

M E 421, 621 Introduction to Compressible Flow 3(3,0) Introductory concepts to compressible flow; methods of treating one-dimensional gas dynamics including flow in nozzles and diffusers, normal shocks, moving and oblique shocks, Prandtl-Meyer Flow, Fanno Flow, Rayleigh Flow, and reaction propulsion systems. Preq: M E 303, 308.
M E 422, 622 Design of Gas Turbines 3(3,0)
Guiding principles in gas turbine cycles are reviewed. Turbine and compressor design procedures and performance predictions for both axial and radial flow machines are presented. Methods of design of rotary heat-exchangers and retrofitt- ing gas turbine for regenerative operation are presented. Design projects are used to illustrate the procedures. Prereq: M E 308.

M E 423, 623 Introduction to Aerodynamics 3(3,0) Basic theories of aerodynamics are presented for the purpose of accurately predicting the aerodynamic forces and moments which act on a vehicle in flight. Prereq: M E 308.

M E 424 Mechanical Engineering Laboratory IV 1(0,3) Continuation of M E 444. Mechanical engineering principles and phenomena are reinforced through open-ended, student designed and conducted experiments. Utilization of mature skills in measurement techniques, data analysis, and report writing. Prereq: M E 303, 304, 305, 306, 404 (or concurrent enrollment), 444.

M E 429, 629 Thermal Environmental Control 3(3,0) Mechanical vapor compression refrigeration cycles, refrigerants, thermoelectrical cooling systems, cryogenics, thermodynamic properties of air, psychometric charts, heating and cooling coils, solar radiation, heating and cooling loads, insulation systems. Prereq: M E 303, 308.

M E 431 Applied Fluids Engineering 3(3,0) Applications-oriented course in industrial fluids engineering, primarily directed toward the analysis and design of piping systems and components for liquid and gas flow. Topics include friction factors, head loss, flow capacities, piping networks, flow measurement, pumps, control valves, and hydraulic and pneumatic components. Prereq: M E 308, 333.

M E 432, 632 Advanced Strength of Materials 3(3,0) Topics in strength of materials not covered in M E 302. Three-dimensional stress and strain transformations, theories of failure, shear center, unsymmetrical bending, curved beams, and energy methods. Other topics such as stress concentrations and fatigue concepts are treated as time permits. Prereq: M E 302.

M E 440 Materials for Aggressive Environments 3(3,0) Emphasizes the engineering aspects of selecting materials for applications in aggressive environments. Various types of materials degradation are discussed as are methods for wastage prevention, including especially engineering design and materials selection approaches. Structural metallic alloys are emphasized; however, techni- cally important ceramics and polymers are also discussed. Prereq: M E 306.

M E 444 Mechanical Engineering Laboratory III 2(1,3) Continuation of M E 333. Mechanical engineering principles and phenomena are reinforced through student-conducted experiments. Presentation of fundamentals of instrumentation, calibration techniques, data analysis, and report writing in the context of laboratory experiments. Prereq: M E 306 (or concurrent enrollment), 333, MTHSC 302 or EX ST 411.

M E 450, 650 Mechanical Vibrations 3(3,0) Mathematical analysis of physical problems in the vibration of mechanical systems. Topics include linear-free vibrations, forced vibrations, and damping in single degree of freedom systems, transient vibrations, critical speeds and whirl of rotating shafts, dynamic balancing, and multi-degree of freedom systems with lumped parameters. Prereq: E M 202, M E 302, MTHSC 208.

M E 453, 653 Dynamic Performance of Vehicles 3(3,0) Introduces techniques for analyzing the dynamic behavior of vehicles. Types of vehicles to be considered are chosen from aircraft, surface ships, automobiles and trucks, railway vehicles, and magnetically levitated vehicles. Prereq: M E 205, 305, or consent of instructor.

M E 454, 654 Design of Machine Elements 3(3,0) Design of common machine elements including clutches, brakes, bearings, springs, and gears. Optimization techniques and numerical methods are employed as appropriate. Prereq: M E 404 or consent of instructor.

M E 455, 655 Design for Computer-Automated Manufacturing 3(3,0) Concepts of product and process design for automated manufacturing are considered. Topics include product design for automated manufacturing, computer simulation and assembly, using automation, industrial robots, knowledge-based systems and concepts of flexible product manufacture. Prereq: M E 306, 404 (or concurrent enrollment), or consent of instructor.

M E (E C E) 456, 656 Fundamentals of Robotics 3(3,0) Introduction to the fundamental mechanics and control of robots, including their application to advanced automation. Topics include robot geometry, kinematics, dynamics, and control. Planar machine structures are emphasized, including methods using computer analysis. Application considerations include the design and operation of robot systems for manufacturing and telerobotics. Prereq: M E 305, 416 (or concurrent enrollment), or consent of instructor.

M E 471, 671 Computer-Aided Engineering Analysis and Design 3(2,3) Students are exposed to geometric and solid modeling, finite elements, optimization, and rapid-prototyping. Students design an artifact, represent it on the computer, analyze it using FEA, then optimize before prototyping it. Emphasizes the use of computer-based tools for engineering design. Prereq: ENGR 141, M E 202, or consent of instructor.

M E 493, 693 Selected Topics in Mechanical Engineering 1-6(1-6,0) Study of topics not found in other courses. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Consent of instructor.

MICRO 410, H410, 610 Soil Microbiology 3(2,3) Role of microorganisms in the decomposition of organic substances, transformation of nitrogen and mineral substances in the soil; interrelationships between higher plants and microorganisms; importance of microorganisms in soil fertility. Prq: MICRO 305.

MICRO 412, H412, 612 Bacterial Physiology 4(3,3) Consideration of the cytolgy, physiology, metabolism, and genetics of bacteria. Includes studies of growth and death, reproduction and mutation, nutrition and metabolic pathways, regulatory mechanisms, and effects of environment. Prq: CH 224, MICRO 305, one semester of biochemistry, or consent of instructor.

MICRO 413, H413, 613 Industrial Microbiology 3(2,3) Microbial aspects of large-scale processes for the production of foods, antibiotics, enzymes, fine chemicals, and beverages. Topics include strain selection, culture maintenance, biosynthetic pathways, continuous cultivation and production of single cell protein. Prq: MICRO 305.

MICRO (AVS, BIOSC) 414, H414, 614 Basic Immunology 4(3,3) Consideration of the nature, production, and function of basic immune responses in animals. Procedures and mechanisms of antigen-antibody and other immune reactions. Prq: MICRO 305, organic chemistry.

MICRO 415, H415, 615 Microbial Genetics 4(3,3) Cytological basis of bacterial, fungal and viral genetics; molecular aspects; mutations; mechanisms of genetic transfers; episomes and plasmids; and population changes. Prq: BIOC 301, MICRO 305, 412.

MICRO 416, H416, 616 Introductory Virology 3(3,0) Introduction to the field of virology, including animal, bacterial, and plant viruses. Topics include nomenclature and classification, biochemical and biophysical characteristics, mechanisms of replication, chemotherapy, and techniques for isolation, assay, and purification. Prq: BIOC 301, MICRO 305, or consent of instructor.

MICRO 417, H417, 617 Molecular Mechanisms of Carcinogenesis and Aging 3(3,0) Changes which occur at the cellular and subcellular levels during transformation and aging. Accumulated damage and "intrinsic clock" theories of aging; genetic and epigenetic theories of carcinogenesis; epidemiology of cancer; viral, radiation-induced, and chemical carcinogenesis; the immune system and cancer. Prq: BIOC 301, MICRO 305, or consent of instructor.

MICRO (BIOSC, GEN) 418, 618 Biotechnology I: Nucleic Acids Techniques 4(2,4) See GEN 418.

MICRO 419, 619 Selected Topics in Molecular Medicine 3(3,0) Introduction to various areas of molecular medicine. Examines the latest research and developments in molecular medicine. Designed for students interested in medicine and biomedical research. Graduate students may repeat for a maximum of six credits. Prq: BIOC 301, MICRO 305, or consent of instructor.

MICRO 491, H491 Undergraduate Research in Microbiology 1-4(0,3-12) Individually mentored research problems in various areas of microbiology that introduce undergraduate students to the planning and execution of research experimentation and the presentation of research findings. May be repeated for a maximum of eight credits with consent of instructor. Honors students must take at least six hours under a single research advisor over two semesters. Honors thesis is required. Prq: Consent of instructor.

MICRO 492 Internship in Microbiology 1-4(0,3-12) Preplanned internship at an advisor-approved facility to give students learning opportunities beyond their classroom experiences. Students submit a Student Internship Contract and a two-page study plan before the internship and a comprehensive report within one week of the end of the internship. May be repeated for a maximum of six credits. To be taken Pass/Fail only. Prq: Consent of advisor.

MICRO 493 Senior Seminar 2(2,0) Capstone course engaging students in analysis and discussion of articles from the technical and nontechnical literatures in microbial sciences and from current topics in biology appearing in other areas. Students complete their undergraduate on-line digital portfolios. Emphasis is placed on ethical issues that arise as a result of biological research. Prq: Senior standing; COMM 150 or ESLG 110; or consent of instructor.

MICRO (BIOSC) 494 Selected Topics in Creative Inquiry II 2-3(1,3-6) See BIOSC 494.

MICRO 495 Service Learning in Biology 2-4(1-2,3-9) Combines service and academic learning while helping pre-college or college students learn about the fundamental aspects of science. Provides lecture and laboratory experiences as students learn to prepare and participate in supervised laboratory teaching for pre-college or college students. May be repeated for a maximum of six credits. Prq: Consent of instructor.

MILITARY LEADERSHIP

M L 101 Leadership Fundamentals I 2(2,1) Study of leadership focused at the individual level. Students learn effective communicating skills, ethical decision making, small group management, and mental and physical conditioning. Skills are applied in a variety of challenging training events during laboratory, including rappelling, water survival, land navigation, and team athletics.

M L 102 Leadership Fundamentals II 2(2,1) Continued study of leadership focused at the individual and team levels. Topics include problem solving, critical thinking, leadership styles, and group cohesion. Leadership laboratory training includes small tactics and weapons firing.

M L 103 Becoming a Leader 3(3,0) Study of basic leadership, covering leadership theory and skills, organizational systems to support leaders, problem solving, values and ethics, and communication skills. Includes lecture, practical exercises, and guest speakers.

M L 201 Leadership Development I 2(2,1) Study of leadership focused at the team level. Students develop leadership skills through public speaking, managing small groups, and mentoring first-year students. Skills are applied in a variety of challenging training events during leadership laboratory, including rappelling, water survival, land navigation, and team-building exercises.

M L 202 Leadership Development II 2(2,1) Continued study of leadership at the team and small group levels. Focuses on moral leadership, mentorship, and the Army as a profession. Leadership laboratory training includes small unit tactics, airmobile operations, and weapons firing. Students lead teams throughout the semester.

M L 210 Leaders’ Training Course 4(2,6) Five-week leadership camp conducted on an Army post. Students’ pay and expenses are provided by the U.S. Army. Environment is rigorous and focused on leadership development. No military obligation is incurred. Completion of this course qualifies students for entry into the Army ROTC Advanced Course.

M L 211 Cadet Field Leadership Training 1-6 Eight-week program of instruction conducted by the U.S. Military Academy to develop leadership skills of sophomore students. Seven weeks of the course are held at West Point with one week at Fort Knox, KY, for Mounted Maneuver Training. To be taken Pass/Fail only. Prq: M L 202.

M L 301 Advanced Leadership I 3(2,2) Study of leadership focused on decision making, planning, communicating, and executing. Addresses motivational techniques, the role of a leader, and performance assessment. Provides students with leadership management tools and methodology. Students are responsible for training, developing, and mentoring Basic Course students. Students apply learned techniques in leadership laboratory. Prq: M L 202 or 210.

M L 302 Advanced Leadership II 3(2,2) Continuation of leadership study focusing on collective skills training, tactics, and small group instruction. Synthesizes various components of training, leadership, and team-building learned during the Basic Course and M L 301. Final step in students’ progression prior to the Leader’s Development and Assessment Course. Prq: M L 301.
M L 401 Organizational Leadership I 3(2,2)  
Culmination of leadership study in preparation for commissioning as Army officers. Students continue exercising leadership and management skills as senior cadet leaders. Leadership instruction focuses on coordinating activities with staffs, communicating effectively, counseling and mentoring subordinates, training management and ethics. Preq: M L 302, Leader's Development and Assessment Course.

M L 402 Organizational Leadership II 3(2,2)  
Continuation of M L 401. Focuses on the continued study of moral, ethical, and legal issues faced by leaders. Includes instruction in administrative and logistical management. Requires students to apply their knowledge individually and collectively to solve problems and improve the organization. Preq: M L 401.

M L 451 Organizational Leadership III 3(2,3)  
Transitional leadership development and training for completion cadets and others designed to enhance practical experiences in managing organizational training programs, develop leadership skills by serving in cadet staff positions, develop small group decision making and conflict management skills, and reinforce physical fitness and lifestyle skills required of leaders. May be repeated for a maximum of six credits. Preq: M L 302.

MUSIC 101 Beginning Class Piano I 1(0,2)  
Thorough introduction to basic keyboard skills, including solo and ensemble repertoire, technique, applied keyboard theory, and performance applied music fee is assessed. Preq: Consent of instructor.

MUSIC 102 Beginning Class Piano II 1(0,2)  
Continued work on keyboard skills, applied keyboard theory, solo and ensemble repertoire, and performance. Applied music fee is assessed. Preq: MUSIC 101 or consent of instructor.

MUSIC 105 Music Fundamentals 3(3,0)  
Covers the rudiments of music theory and aural skills. Includes notation, scales, key signatures, intervals, and chord construction, as well as sight singing and ear training.

MUSIC 111 Beginning Class Guitar I 1(0,2)  
Introduction to basic guitar skills, including finger-style technique, strumming, and song accompaniment. Students develop skills and appreciation of the discipline through teacher-led drills, ensemble playing, and the exploration of guitar history, style, and the impact of various players and composers on the medium. Applied music fee is assessed. Preq: Consent of instructor.

MUSIC 112 Beginning Class Guitar II 1(0,2)  
Continued work on guitar skills, including finger-style, strumming, pick playing, ensemble playing, and soloing. Also includes music theory for guitarists such as keys, scales, and chord building, as well as discussions of the impact of various players and composers on the medium. Applied music fee is assessed. Preq: MUSIC 111 or consent of instructor.

MUSIC 121 Beginning Class Voice I 0(0,2)  
Introduction to basic vocal skills, including breathing, tone production, diction, intonation, and interpretation. Includes solo and ensemble repertoire. In-class group and individual performances are required. Applied music fee is assessed. Preq: Consent of instructor.

MUSIC 131 Beginning Instrumental Class I 0(2,0)  
Introduction to basic instrumental skills in a class setting, including proper playing position, tone production, intonation, and ensemble playing. Includes brief history and usage of the given instruments. Different instrumental groups are taught as separate course sections. May be repeated for a maximum of six credits, but only on other instruments. Applied music fee is assessed. Preq: Consent of instructor.

MUSIC 151 Applied Music 1(0,1)  
Individual study in performance medium (piano, voice, strings, woodwinds, brass, percussion, guitar, organ, or cello). One 30-minute lesson per week, for which a minimum of four hours practice is required. May be repeated for credit with departmental approval. Applied music fee is assessed. Preq: Consent of instructor.

MUSIC 152 Applied Music 1(0,1)  
Continuation of MUSIC 151. May be repeated for credit with departmental approval of differing performance media. Applied music fee is assessed. Preq: Consent of instructor.

MUSIC 153 Applied Music for Majors 1(0,1)  
Individual study in vocal or instrumental performance (voice, woodwinds, brass, strings, percussion or keyboards). One 45-minute lesson each week. Jury required. Applied music fee is assessed. Preq: Performing Arts major (Music Concentration) and consent of instructor, based upon qualifying audition.

MUSIC 154 Applied Music for Majors 1(0,1)  
Continuation of MUSIC 153. Jury and performance on a recital are required. May be repeated for credit with departmental approval of differing performance media. Applied music fee is assessed. Preq: Performing Arts major (Music Concentration) and consent of instructor, based upon qualifying audition.

MUSIC 157 Consent of instructor.

MUSIC 180 Introduction to Music Technology 3(2,3)  
Introduction to music notation, sequencing, digital audio, sound reinforcement, analog and digital recording, and other current music technologies. Preq: Performing Arts major or consent of instructor.

MUSIC 195 Creative Inquiry—Music 1-4(1-4,0)  
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

MUSIC 205 Music Theory I 3(3,0)  
Beginning analytical techniques in both the classical and popular genres, including aspects of harmony, melody, and rhythm. Preq: MUSIC 105, satisfactory score on departmental placement exam, or consent of instructor. Coreq: MUSIC 207.

MUSIC 206 Music Theory II 3(3,0)  
Continuation of MUSIC 205, with added emphasis on modulation and modal structures. Preq: MUSIC 205, Coreq: MUSIC 208.

MUSIC 207 Aural Skills I 1(0,2)  
Beginning studies in sight-singing and dictation (melodic, harmonic, and rhythmic). Coreq: MUSIC 205.

MUSIC 208 Aural Skills II 1(0,2)  
Continuation of MUSIC 207 with music of greater complexity and the use of C clefs. Coreq: MUSIC 206.

MUSIC 210, H210 Music Appreciation: Music of the Western World 3(3,0)  
Deepens students’ appreciation of their musical heritage through study of the elements of the musical language and its development in Western culture.

MUSIC 251 Applied Music 1(0,1)  
Continuation of MUSIC 152. Applied music fee is assessed. Preq: MUSIC 152, consent of instructor.

MUSIC 252 Applied Music 1(0,1)  
Continuation of MUSIC 251. May be repeated for credit with departmental approval of differing performance media. Applied music fee is assessed. Preq: MUSIC 251, consent of instructor.

MUSIC 253 Applied Music for Majors 1(0,1)  
Continuation of MUSIC 154. May be repeated for credit on other performance media with departmental approval. Jury is required. Applied music fee is assessed. Preq: MUSIC 154, consent of instructor.

MUSIC 254 Applied Music for Majors 1(0,1)  
Continuation of MUSIC 253. May be repeated on other performance media with departmental approval. Jury and performance on a recital are required. Applied music fee is assessed. Preq: MUSIC 253, consent of instructor.

MUSIC 279 Music Practicum 1(0,3)  
Practical work in music on productions designed for public presentation. Emphasizes sound support, amplification, and mixing. May be repeated for a maximum of four credits. Preq: Consent of instructor.

MUSIC 280 Sound Reinforcement 3(2,2)  
Theory and practice of using audio equipment for amplifying sound in venues ranging from conference rooms to concert halls and sports arenas. Preq: Performing Arts major or consent of instructor.

MUSIC 285 Acoustics of Music 3(3,0)  
Study of the relationship between the laws of physics and the production of music from an audio engineering perspective. Topics include mechanical and acoustical laws, harmonic analysis, musical scales, sound production in instruments, and the physiology of hearing. Preq: Performing Arts major.
MUSIC 295 Creative Inquiry—Music 1-4(1-4,0)
In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

MUSIC 308 Broadway Vocal Tradition I 3(3,0)
Introduction to Broadway musical repertoire from the Golden Age of Broadway: 1933-1964. Emphasizes the music with attention to production detail, historical perspective, and social milieu.

MUSIC 309 Broadway Vocal Tradition II 3(3,0)
Survey of Broadway musical repertoire from new and contemporary shows from 1965 to the present day. Emphasizes the music with attention to production detail, historical perspective, and social milieu.

MUSIC 310 Survey of Music History 3(3,0)
Comprehensive survey of the Western art music tradition from the Middle Ages to the present. Preq: MUSIC 206, Performing Arts major; or consent of instructor.

MUSIC 311 History of American Music 3(3,0)
Music in America from 1620 to the present. Indigenous and borrowed influences are examined. Preq: MUSIC 310.

MUSIC 312 History of Jazz 3(3,0)
Comprehensive survey of jazz elements and styles. A historical perspective from Dixieland to bebop to jazz/rock is included.

MUSIC 313 History of Rock and Roll 3(3,0)
Comprehensive survey of rock elements, styles, and artists. Emphasizes the evolution of rock and roll including a broad examination of musical influences. Course content examines rock and roll both reflected and influenced social issues.

MUSIC 314 World Music 3(3,0)
Introduction to ethnomusicology and music of the world's peoples. Emphasis is placed on music through culture.

MUSIC 317 History of Country Music 3(3,0)
Chronological study of country music: styles, artists. Emphasizes the evolution of country music from a cultural expression of the South to a commercial art form of worldwide appeal.

MUSIC 321 Principles of Piano Performance II 3(3,0)
In-depth study of the principles of piano performance focusing on how to interpret a musical score, develop technical skills and practice techniques, and use the body correctly at the keyboard. Preq: By audition.

MUSIC 322 Piano Accompanying I 1(0,3)
Group study in piano accompanying. Focuses on sight-reading and choral, vocal, and instrumental accompanying. Students take group lessons and accompany choral groups and/or applied music students. Preq: Consent of instructor.

MUSIC 325 CU Carillonneurs 1(0,2)
Group study in playing the 47-bell University carillon. One two-hour meeting each week for which a minimum of two hours of individual practice is required. Participation in a recital is required. Preq: Musical keyboard experience, consent of instructor.

MUSIC 330 Small Ensemble 1(0,3)
Ensembles devoted to the musical training of instrumental, vocal ensemble members through reading and rehearsal of appropriate music. Performance opportunities are given periodically in addition to the minimum rehearsal time. Consent of instructor.

MUSIC 331 Pep Band 1(0,3)
Ensembles devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given in addition to the minimum rehearsal time. Consent of instructor.

MUSIC 332 Woodwind Quintet 1(0,3)
Ensembles: advanced study of windwood chamber music media. One hour-one class meeting each week, for which a minimum of two hours of ensemble practice is required. Preq: By audition only; concurrent enrollment in MUSIC 332.

MUSIC 333 String Quartet 1(0,3)
Ensembles: advanced study of string quartet repertoire. Two-90-minute meetings each week for which a minimum of two hours of practice is required. Preq: By audition only. Coreq: MUSIC 331, Applied Music.

MUSIC 334 Flute Choir 1(0,3)
Ensembles: study of flute ensemble literature. One 60-minute meeting each week for which a minimum of two hours of practice is required. Preq: By audition only. Coreq: MUSIC 331.

MUSIC 336 Percussion Ensemble 1(0,2)
Ensembles: study and performance of percussion ensemble literature. One two-hour class meeting each week for which a minimum of two hours of individual practice is required. Consent of director.

MUSIC 341 Men's Breakout Ensemble 1(0,2)
Ensembles devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Consent of instructor.

MUSIC 342 Women's Breakout Ensemble 1(0,2)
Small ensembles: study of male a cappella/popular music on an advanced level. Coreq: MUSIC 370 or consent of instructor.

MUSIC 343 Men's Small Ensemble 1(0,2)
Small ensembles: study of male a cappella/popular, barbershop, and nostalgic music on an advanced level. Coreq: MUSIC 370 or consent of instructor.

MUSIC 344 Vocal Jazz Ensemble 1(0,3)
Ensembles: devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Coreq: MUSIC 370, 371, 372 or consent of instructor.

MUSIC 351 Applied Music 1(0,1)
Continuation of MUSIC 252. May be repeated for credit with departmental approval of differing performance media. Applied music fee is assessed. Preq: MUSIC 252, consent of instructor.

MUSIC 352 Applied Music 1(0,1)
Continuation of MUSIC 351. Students are required to perform an appropriate solo in a student recital. May be repeated for credit with departmental approval of differing performance media. Applied music fee is assessed. Preq: MUSIC 351, consent of instructor.

MUSIC 353 Applied Music for Majors 1(0,1)
Continuation of MUSIC 254. May be repeated for credit with departmental approval. Jury is required. Applied music fee is assessed. Preq: MUSIC 254, consent of instructor.

MUSIC 354 Applied Music for Majors 1(0,1)
Continuation of MUSIC 353. May be repeated for credit with departmental approval. Jury is required. Applied music fee is assessed. Preq: MUSIC 353, consent of instructor.

MUSIC 361 Marching Band 1(0,3)
Ensembles devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Preq: Consent of director.

MUSIC 363 Jazz Ensemble 1(0,3)
Ensembles devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Preq: Consent of director.

MUSIC 364 Concert Band 1(0,2)
Devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Preq: Consent of director.

MUSIC 369 Symphony Orchestra 1(0,3)
Mid-sized, college-community orchestra devoted to performing works from standard repertoire. Weekly evening rehearsals with one or more performances per semester. Preq: Consent of director.

MUSIC 370 Clemson University Singers 1(0,3)
Ensembles: devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Preq: Consent of director.

MUSIC 371 Women's Glee 1(0,3)
Ensembles: devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Preq: Consent of director.
COURSES OF INSTRUCTION

MUSIC 372 Men's Glee 1(0,3) Ensembles: devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given in addition to the minimum rehearsal time. Prereq: Consent of director.

MUSIC 373 University Chorus 1(0,3) Ensembles: devoted to the musical training of ensemble members through reading and rehearsal of appropriate music. Public performances are given periodically in addition to the minimum rehearsal time. Prereq: Consent of director.

MUSIC 380 Audio Engineering I 3(2,2) Intermediate-level course in music technology focusing on digital hard-disk recording and acoustical considerations in audio engineering. Prereq: MUSIC 180 or consent of instructor.

MUSIC 395 Creative Inquiry—Music 1(4-1,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

MUSIC 398 Special Topics in Music 3(3,0) Consideration of select areas of study in music not addressed by other music courses. May be repeated once for credit. Prereq: Consent of instructor.

MUSIC 400, 600 Music in the Elementary Classroom 3(3,0) Familiarizes teachers in the elementary classroom with traditional, Kodaly, Orff, and Kindermusik approaches in correlating music with language arts, mathematics, and social studies.

MUSIC 405 Instrumental and Vocal Arranging 3(2,3) Advanced study of the properties of instruments and voices and their combination in various small and large ensembles. Emphasis is placed on applying this knowledge to the creation of instrumental and vocal arrangements. Prereq: MUSIC 180, 205, or consent of instructor.

MUSIC 415 Music History to 1750 3(3,0) Development of Western music from antiquity to 1750, emphasizing representative literature from various styles and periods. Prereq: MUSIC 210, 310, or consent of instructor.

MUSIC 416 Music History Since 1750 3(3,0) Continuation of MUSIC 415. Music from 1750 to the present. Prereq: MUSIC 210, 310, or consent of instructor.

MUSIC 430 Conducting 3(3,0) Study of choral and instrumental conducting. Emphasis is on manual conducting techniques, attitudes, philosophies, and responsibilities necessary for the preparation, planning, and execution of artistic conducting. Prereq: MUSIC 205 or consent of instructor.

MUSIC 451 Applied Music 1(0,1) Continuation of MUSIC 352, guiding students in interpretation of advanced solo and ensemble literature. Students are required to perform an appropriate solo in a student recital. May be repeated for credit with departmental approval of differing performance media. Applied music fee is assessed. Prereq: MUSIC 352 and consent of instructor.

MUSIC 452 Applied Music 1(0,1) Continuation of MUSIC 451. Students are required to perform an appropriate solo in a student recital. Applied music fee is assessed. Prereq: MUSIC 451 and consent of instructor.

MUSIC 453 Applied Music for Majors 1(0,1) Continuation of MUSIC 354. May be repeated on other performance media with departmental approval. Jury is required. Applied music fee is assessed. Prereq: MUSIC 354, consent of instructor.

MUSIC 454 Applied Music for Majors 1(0,1) Continuation of MUSIC 453. May be repeated on other performance media with departmental approval. Jury full recital performance is required. Applied music fee is assessed. Prereq: MUSIC 453, consent of instructor.

MUSIC 480, 680 Audio Engineering II 3(2,2) Advanced course in music technology focused on music production integrating digital audio and virtual instruments. Prereq: MUSIC 380 or consent of instructor.

MUSIC 485 Production Workshop 3(2,2) Project-based course focused on music production. Students produce an audio CD that includes recorded audio tracks and/or newly created sequenced material with creative and appropriate packaging. Prereq: MUSIC 480.

MUSIC 495 Creative Inquiry—Music 1(4-1,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

MUSIC 599, 699 Independent Studies 1-3(1-3,0) Tutorial work for students with special interests in music not covered by the scope of existing courses. May be repeated for a maximum of six credits. Prereq: Consent of department chair.

NURSING

NURS 140 Computer Applications in Nursing 3(3,0) Introduces students to nursing and the application of computer technology in the delivery of health care. Covers existing computer health-care applications, emerging trends and forecast future needs. Social and ethical issues related to technology are discussed. Nursing majors will be given priority enrollment.

NURS 198 Creative Inquiry—Nursing 1(4-1,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

NURS 298 Creative Inquiry—Nursing 1(4-1,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

NURS 300 Seminar in Health Care Topics 1-4(1-4,0-9) Individualized in-depth study in a selected health care area; may have a clinical component and/or special projects. Open to non-Nursing majors. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

NURS 303 Nursing of Adults 7(3,12) Incorporates theoretical and empirical knowledge from physical and social sciences. Uses critical thinking to provide holistic, safe, individualized nursing care to adults, including health promotion, maintenance, restoration, and health teaching. Prereq: NURS 304, 310, 312, 340. Prereq or Coreq: NURS 320.

NURS 304 Pathophysiology for Health Care Professionals 3(3,0) Focuses on disease mechanisms and recognition of the manifestations of these mechanisms in body systems. Discussion also includes pharmacologic and mechanical interventions commonly associated with specific disease processes and application to patient-care situations. Prereq: BIOSC 223.

NURS 305 Psychosocial Nursing 3(3,0) Lifespan approach to examine psychosocial, developmental, family, and cultural factors that influence individuals from diverse populations and their families in the promotion, maintenance, and restoration of health. The use of the nursing process, critical thinking, therapeutic communication, and psychosocial nursing interventions is explored. Prereq: Junior standing in Nursing.
NURS 307 Family Nursing in the Community 4(3,2) Bridge course for registered nurse students which focuses on nursing care of families across the lifespan in the context of the community. Major emphasis is on practice activities to assist individuals in achieving or maintaining wellness in the family, home, and community environments. Prew: Admission to RN-BS program.

NURS 310 Health Assessment 3(2,3) Introduces concepts of health, wellness, and illness. Focuses on physical, psychosocial, and cultural assessment for the well adult client with variations across the lifespan. Includes interviewing techniques. Prew: All required non-nursing courses and electives.

NURS 311 Introduction to Community Nursing 2(2,0) Focuses on health promotion and illness prevention activities across the lifespan for individuals and families in the community. Major emphasis is on nursing's role in the acquisition and maintenance of health as well as the identification and modification of health risk factors. Prew: NURS 310, 312, 320. Prew or Coreq: NURS 304, 340.

NURS 312 Therapeutic Nursing Interventions 4(2,6) Focuses on therapeutic nursing interventions, including selected psychomotor skills, communication skills, and teaching/learning. Prew: All required non-nursing courses and electives.

NURS 313 Health Assessment Through the Lifespan 4(3,2) Expands on RNs' knowledge of health assessment. Focuses on physical and psychosocial assessment for the well client throughout the lifespan. Interviewing techniques are included. Prew: Admission to RN/BS program.

NURS 317 Development of the Nursing Profession 3(3,0) Explores the evolution of nursing as a profession, the social and technological factors and challenges, struggles, and accomplishments of past nursing leaders. Includes strategies for effecting change based on experiences of the past.

NURS 318 Multidisciplinary Approach to End-of-Life Care 3(3,0) Integrates principles of care to increase comfort at the end of life, presented within a framework which encompasses the physical, psychosocial, and spiritual dimensions of an individual. Coursework also includes ethical and legal issues related to advance directives, reimbursement, and regulatory topics. Prew: PSYCH 201, SOC 201, or consent of instructor.

NURS 320 Professionalism in Nursing 2(2,0) Application of critical thinking skills in the professional nursing roles in multidisciplinary approaches to health care. Analysis of the historical development of modern nursing. Examination of issues of nursing care to diverse populations within context of ethical and professional standards. Prew: All required non-nursing courses and electives or consent of instructor.

NURS 328 Honors Seminar I 1(1,0) Serves as the foundation for senior honors projects. Students identify a topic of interest, a faculty mentor, and team members for their honors project and begin to review the literature in their areas of interest. To be taken Pass/Fail only. Prew: Admission to Nursing Department Honors program.

NURS 330, H330 Research in Nursing 3(3,0) Introduction to conceptual frameworks, models, and theories related to nursing. Analysis of reported research in nursing and related disciplines. Ethical, moral, and legal issues are discussed in relation to nursing research. Prew: NURS 310, 312, 320 or admission to RN/BS program.

NURS 333 Health Care Genetics 3(3,0) Focuses on the new genetics and the implications for health care professionals. Discussion includes applications of the evolving genetics technology and services to changing life stages. Issues of ethics relevant to various genetic disorders is also addressed. Prew: BIOSC 223.

NURS 334 Integrative Healing Complementary/Alternative Healthcare 3(3,0) Introduction to healing practices that are complementary and alternative (C/A) for conventional Western medicine. Includes exploration of research principles, techniques, and methods of C/A used in health and healing.

NURS 340 Pharmacotherapeutic Nursing Interventions 3(3,0) Focuses on the integration of nursing process with pharmacotherapeutics, administration, monitoring, and related client education. Includes major drug classifications, indications for use, side effects, interactions, routes of administration, usual dosages and contraindications. Prew: All required non-nursing courses and electives.

NURS (PHIL) 350 Technology and Philosophy in Nursing 3(3,0) Analyzes influence of increasing application of scientific technology to health care delivery and concomitant ethical issues.

NURS 389 Creative Inquiry—Nursing 1(4-1,4) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

NURS 401 Mental Health Nursing 5(3,6) Application of theories and the nursing process to identify, implement, and evaluate nursing interventions for the care of clients with psychiatric disorders. Prew: All required 300-level nursing courses.

NURS 403 Complex Nursing of Adults 5(3,6) Focuses on the biological, psychological, philosophical, and sociocultural influences on complex health problems related to acute and traumatic conditions. Emphasizes the concepts of circulation, oxygenation, homeostasis, and compensation in acutely ill adults. Prew: NURS 401, 412, 414.

NURS 405 Leadership and Management in Nursing 3(2,2) Focuses on the role of the professional nurse in managing nursing care. Theories and research related to leadership, power, management, organizations, regulation, and ethics are discussed. Directed laboratory experiences are provided. Prew: NURS 401, 411, 412, or admission to RN/BS program.

NURS 406 Issues in Professionalism 3(3,0) Analysis of the development of professional nursing. Consideration of educational issues, legal and economic issues, health policy, leadership, cultural variations, and the influence of values in ethical decisions and nursing practice. Prew: Admission to RN/BS program.

NURS 408 Senior Nursing Practicum 3(1,4) Considers the impact of selected health issues and problems on the practice of nursing. Presents licensure preparation, maintaining currency in the field, and other relevant topics facing the professional nurse. Under preceptor supervision, students observe, organize, and implement entry level nursing practice. To be taken Pass/Fail only. Prew: NURS 401, 411, 412. Coreq: NURS 410, 415.

NURS 410 Leadership Management and Nursing Care Practicum 6(3,9) Focuses on the role of the professional nurse in practicing and managing nursing care. Theories and research related to clinical practice, leadership, power, management, organizations, regulation, ethics, and licensure preparation are discussed. Directed lab experiences are provided under preceptor supervision. Prew: NURS 403.

NURS 411 Nursing Care of Children 5(3,6) Focuses on child health problems and health maintenance. Emphasizes biological, pathophysiological, psychological, and sociocultural concepts related to nursing care of children with acute, critical, and chronic illnesses. Includes strategies for alleviation of illnesses, restoration of wellness, promotion and maintenance of health, growth, and development. Prew: All required 300-level Nursing courses.

NURS 412 Nursing Care of Women and Their Families 5(3,6) Emphasizes biological, psychological, and sociocultural concepts; identification of appropriate nursing strategies to enhance individual capacity to achieve or maintain wellness in the family, home, community, and hospital environment. Prew: All required 300-level Nursing courses.

NURS 415 Community Health Nursing 4(2,6) Consideration of health promotion activities for family and community groups with emphasis on community assessment, screening, and health teaching/counseling. Practice activities are related to health promotion in population groups and nursing care of homebound clients. Laboratory settings include homes, schools, industries, and other community organizations. Prew: NURS 401, 411, 412, or admission to RN/BS program.

NURS H420 Senior Honors I 2(2,0) Students develop a proposal for a major thesis, directed study project, or research project under the guidance of a faculty preceptor. Prew: Senior Honors standing, NURS H330.
NUTR 210 Nutrition and Physical Activity 3(3,0) Topics include role of carbohydrates, fats, and proteins on energy utilization during exercise; altering body composition and improving fitness with diet and physical activity; importance of fluid intake on performance; effectiveness of dietary supplements and ergogenic aids; and choosing a diet appropriate for individual physical activity levels. Preq: BIOL 120 and 121, 122, 123, or 124; or equivalent.

NUTR 401, H401, 601 Fundamentals of Nutrition 3(3,0) Biochemical and physiological fundamentals of nutrition applicable to man and domestic animals. Considers digestive processes and absorption and metabolism of carbohydrates, lipids, proteins, water, minerals, and vitamins. Discusses energy metabolism and comparative anatomy and physiology of digestive systems. Offered fall semester only. Preq: BIOC 305, CH 223, or consent of instructor.

NUTR 420 Selected Topics in Nutrition 1-3(1-3,0) Comprehensive study of special topics in nutrition not covered in detail or contained in other courses. Current developments in each area are stressed. May be repeated for a maximum of three credits, but only if different topics are covered. Preq: Senior standing or consent of instructor.

NUTR 421 Special Problems in Nutrition I 1-3(1-3,0) Independent research investigation in nutrition. Special emphasis is on development of research proposal, implementing the research, and reporting the findings. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Senior standing or consent of instructor.

NUTR 424, 624 Medical Nutrition Therapy I 4(3,3) Principles of nutritional assessment, education and counseling skills development of medical nutrition therapy for individuals with obesity and eating disorders, gastrointestinal disorders, metabolic, and renal disorders. Preq: BIOSC 223, NUTR 451, or consent of instructor.

NUTR 425, H425, 625 Medical Nutrition Therapy II 4(3,3) Development of medical nutrition therapy for individuals with various disease states including cardiovascular, hepatic, musculoskeletal, and neoplastic disorders. Also considers sociocultural and ethical aspects of food consumption and alternative nutrition therapies. Preq: BIOSC 223, NUTR 424, or consent of instructor.

NUTR 426, 626 Community Nutrition 3(3,0) Study of fundamentals of nutrition care delivery in community programs beginning with assessment and problem identification and continuing through the development, implementation, and evaluation of nutrition intervention programs. Preq: NUTR 451 or equivalent or consent of instructor.

NUTR 451, H451, 651 Human Nutrition 3(3,0) Essentials of nutrition and principle nutritional deficiency conditions. Factors affecting adequacy of dietary intake, methods of determining nutritional status, development of nutrition standards, and recent advances in human nutrition. Credit toward a degree will be given for only one of NUTR 203, 205, 451. Preq: BIOC 305/306 or equivalent or consent of instructor.

NUTR 455, 655 Nutrition and Metabolism 3(3,0) Concepts of metabolism fundamental to understanding normal and therapeutic nutrition are examined. Bioenergetics as well as metabolism of carbohydrates, lipids, amino acids, vitamins, and minerals as they relate to nutrition are discussed. Preq: NUTR 451 and BIOC 305 or 423 or 406 or consent of instructor.

PACKAGING SCIENCE

Professors: D. K. Cooksey, R. L. Thomas; Associate Professors: D. O. Darby, R. M. Kimmel, Chair; W. S. Whiteside; Assistant Professor: H. P. Batt; Lecturers: G. S. Batt, D. M. Kimmel, R. T. Moore; Adjunct Professors: R. C. Cooksey, H. J. Park; Adjunct Associate Professor: M. Dau

PKGSC 101 Packaging Orientation 1(1,0) Overview of the various principles and practices in packaging science, historical development, packaging as a career.

PKGSC 102 Introduction to Packaging Science 2(2,0) Considers functions of a package; materials and processes, and technology used in package development; and the relationship of packaging to the corporation, consumer, and society as a whole.

PKGSC 103 Packaging Science E-Portfolio 1(1,0) Packaging Science majors initiate professional electronic portfolios that showcase their skills and experiences and lead to career e-portfolios. Students demonstrate proficiency in using important software tools; are introduced to Packaging Science faculty, emphasis areas, and targeted library services; and discuss academic integrity.

PKGSC 201 Packaging Perishable Products 3(3,0) Covers fundamental characteristics and applications of various materials and systems used to package perishable products such as foods and pharmaceuticals. Discusses packaging issues regarding food, pharmaceutical, and medical packaging. Includes product/package interactions and packaging requirements to address basic theory in food and pharmaceutical protection.

PKGSC 202 Packaging Materials and Manufacturing 4(3,3) Detailed study of packaging materials including glass, metal, metal foils and sheets, wood, paper, paperboard, plastics, composites, adhesives, coatings, cushioning media; their functional properties in packaging application; laminating and combining of different packaging materials.

PKGSC 204 Container Systems (Rigid and Flexible) 3(3,0) Examination of all the packages and containers used to develop systems to distribute products. Compatibility of product and package, structural design, costs, and merchandising considerations are stressed.

PKGSC 206 Container Systems Laboratory 1(0,3) Laboratory practice in sample making, designing, and constructing various containers.
PKGSC 299 Creative Inquiry—Packaging Science 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits. To be taken Pass/Fail only.

PKGSC 320 Package Design Fundamentals 3(2,3) Study of specific package design concepts. Students understand how the design affects manufacturing processes, costs, and protective functions; begin skill development using hand-drawing and model packages; then move to software-based design and real packages. Preq: CTE 180, PKGSC 204, 206.

PKGSC 368, H368 Packaging and Society 3(3,0) Study of the role of packaging in society as it specifically relates to the responsibilities of the packaging scientist in protecting people and the environment. Includes study of packaging and environmental regulations and guidelines currently in place to achieve these goals. Ability to make informed decisions and ethical judgments is an encompassing goal.

PKGSC 399 Creative Inquiry—Packaging Science 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits. To be taken Pass/Fail only.

PKGSC 401, 601 Packaging Machinery 3(3,0) Systematic study of types of machinery used to form, fill, seal, and handle various packaging, products, and packaging materials. Emphasizes basic mechanical, electrical, pneumatic, and hydraulic components of packaging machinery along with packaging machinery terminology. Focuses on design, fabrication, and installation of packaging machinery components. Preq: MTHSC 110, PHYS 201, consent of instructor.

PKGSC 403 Packaging Career Preparation 1(1,0) Preparation for a successful career in Packaging Science by completing the professional e-portfolio, and finalizing a resume and career e-portfolio. Refines career skills through role playing. Topics include presentations, interviewing, effective collaboration, and communication, business and foreign travel etiquette. Coreq: PKGSC 420, second semester senior standing or consent of instructor.

PKGSC 404, H404, 604 Mechanical Properties of Packages and Principles of Protective Packaging 3(3,0) Study of the mechanical properties of products and packages and standard methods of determining these properties. Focuses on the functional properties of packages related to shock and vibration isolation and compression. Preq: MTHSC 106, PHYS 207, PKGSC 204, or consent of instructor.

PKGSC (FD SC) 409 Total Quality Management for the Food and Packaging Industries 3(3,0) See FD SC 409.

PKGSC 416, 616 Application of Polymers in Packaging 4(3,3) Detailed study of polymer science and engineering as applied to packaging science. Includes polymer morphology, rheology, physical properties, processing methods, and polymerization. Emphasizes relationships among processing, structure, and properties. Preq: PKGSC 204, 206; CH 201 or 223, PHYS 207; or consent of instructor.

PKGSC 420, 620 Package Design and Development 3(2,3) Study of the principles and methods practiced in designing and developing packages and packaging systems and of methods used to coordinate and analyze package development activities including interfacing with product development, manufacturing, marketing, purchasing, and accounting. Preq: Second semester senior standing; PKGSC 320, 368, 401, 404, 416, 430, 440, 464, or consent of instructor.

PKGSC 421 Special Problems in Packaging Science 1-4(0,3-12) Independent research investigations in packaging science related to packaging materials, machinery, design, and applications. Special emphasis is placed on organizing a research proposal, conducting research, and reporting results. May be repeated for a maximum of 15 credits. Preq: Consent of instructor.

PKGSC 422 Selected Topics in Packaging Science 1-3(1-3,0) Comprehensive study of selected topics in packaging science not covered in other courses contained in other programs. Contemporary developments in each area covered. May be repeated for a maximum of 3 credits, not only if different topics are covered. Preq: Consent of instructor.

PKGSC 430, 630 Converting for Flexible Packaging 3(3,0) Study of converting methods, processes, and equipment used in converting web materials to flexible packaging. Laboratory provides hands-on experience in running and operating pilot-scale converting equipment. Preq: PKGSC 204, 206; or consent of instructor.

PKGSC 440, 640 Packaging for Distribution 3(3,0) Packages are exposed to various shipping methods and numerous hazards during distribution. To ensure adequate product protection, packaging professionals need to understand the fundamental principles of distribution packaging design. Topics include ASTM and ISTA packaging test methods, packaging design guidelines for distribution, terminology, transport modes, distribution hazards, and protective packaging materials. Preq: PKGSC 430 or consent of instructor.

PKGSC 454, 654 Product and Package Evaluation Laboratory 1(0,3) Laboratory experiments to determine properties of packaging materials and to evaluate the response of packages and products to shock, vibration, and compression. Students operate standard testing equipment and become familiar with industry recognized test methods and standards. Preq: PKGSC 404 (or concurrent enrollment).

PKGSC 464, H464, 664 Food and Health Care Packaging Systems 4(3,3) Characteristics, engineering properties, and applications of various materials and systems used in the packaging of foods, pharmaceuticals, and medical devices. Packaging systems for specific food and medical applications are considered. Laboratory and field exercises on food and medical packaging operations and packaging materials are included. Emphasis is on evaluation methods. Preq: PKGSC 201, 204, 206, or consent of instructor.

PKGSC 499 Creative Inquiry—Packaging Science 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits. To be taken Pass/Fail only.

PAN AFRICAN STUDIES

Associate Professor: A. A. Bartley

P A S 301 Africa and the Atlantic World 3(3,0) Study of Africa and its impact on the culture and trade of peoples of the New World. Traces the impact Africans had on shaping the music, language, dress, art, religion, and culture of the Western world.

P A S 301 Introduction to Pan African Studies 3(3,0) Study of African American experience from an Afrocentric perspective from colonial America to the present.

P A S 400 Studies in Pan African Studies 3(3,0) Study of selected topics or themes in Pan African Studies. Allows for individualized study of specific topics related to Pan African Studies such as music, dance, religion, colonization, slavery, or economic development. May be repeated for a maximum of six credits, but only if different topics are covered.

P A S 410 Studies in Africana Experience 3(3,0) Looks at the impact of Africans or African Americans on U.S. society. Interdisciplinary course which allows for the study of Africans and their descendants from a variety of perspectives focusing primarily on the United States. May be repeated for a maximum of six credits, but only if different topics are covered.

P A S 471 Directed Studies on the Black Experience in Education 1-3(1-3,0) Students conduct research and produce scholarship on academic, social, and historical issues that impact the Black experience in educational settings. Students may also participate in service learning activities to broaden their understanding and apply their knowledge in the community. May be repeated for a maximum of nine credits.

P A S 498, 698 Seminar on Pan African Studies 3(3,0) Research/writing seminar on the African American experience. Selected topics and themes from 1900 to present. Preq: HIST 311, 312, or 339, P A S 301.
PARKS, RECREATION, AND TOURISM MANAGEMENT

PRTM 101 Concepts of Leisure 3(3,0) Introduces recreation professions and organizations; government, voluntary, and commercial; overviews professional preparation; outlines development of man’s uses of leisure and evolution of recreation, city parks, natural resources conservation, and preservation movements as philosophical forces affecting leisure services. Restricted to Parks, Recreation, and Tourism Management majors.

PRTM 195 PGM Seminar I 1(1,0) Covers career planning and professional development training needed in the golf industry with special emphasis on topics covered in the PGA/PGM Level I Training Program. Preq: PRTM 281, consent of instructor.

PRTM 198 Creative Inquiry—Parks, Recreation, and Tourism Management I 1-4(1-3,1-12) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

PRTM 200 The Profession and Practice in Parks, Recreation, and Tourism Management 1(1,0) Introduces students to the Parks, Recreation, and Tourism Management field. Covers the history and development of the PRTM profession, including professional organizations, current issues and trends, ethical principles and professionalism, and professional competencies and development. To be taken Pass/Fail only.

PRTM 201, H201 The Recreation/Leisure Environment 3(3,0) Discusses the development characteristics of built and natural environmental resource settings for recreation, tourism development, and community expression. Examines human/environment interactions during leisure, including the impact of the recreation environment on people and the impact of people on the recreation environment. Surveys public agencies and private interests in these settings.

PRTM 205 Program and Event Planning 3(2,2) Principles and methods of program development. Time and facility utilization for sports activities, social functions, arts and crafts, outdoor activities, hobbies or special-interest groups, and activities in the cultural and performing arts are pursued. Preq: PRTM 101.

PRTM 206 Practicum I 1(0,3) Students conduct a recreation program in a supervised setting. A minimum of 90 hours with a leisure agency approved by the University is required. To be taken Pass/Fail only. Preq: PRTM 205, Sophomore standing in Parks, Recreation, and Tourism Management.

PRTM 207 Practicum II 1(0,3) Continuation of PRTM 206. Experience in a leisure situation different from the PRTM 206 exposure. A minimum of 90 hours with a leisure agency approved by the University is required. To be taken Pass/Fail only. Preq: PRTM 205, Sophomore standing in Parks, Recreation, and Tourism Management.

PRTM 210 Serving Diverse Populations in Parks, Recreation, and Tourism 3(3,0) Introduces students to the leisure patterns and constraints of diverse constituents, including members of ethnic and racial minorities, people of diverse socioeconomic status, women, older adults, people with disabilities, and people with alternative lifestyles. Preq: PRTM 101.

PRTM 220 Conceptual Foundations of Parks, Recreation, and Tourism 2(2,0) Introduces students to the conceptual foundations of play, recreation, and leisure as they relate to contemporary society, the lifespan, and the natural environment. Preq: PRTM 101.

PRTM 221 Delivery Systems for Parks, Recreation, and Tourism 2(2,0) Introduces students to the various roles, interrelationships, and importance of leisure service delivery systems in designing and operating programs and facilities to serve diverse populations. Also includes discussion of the role and impact of leisure services and economic development. Preq: PRTM 200.

PRTM 222 Program and Event Planning in Parks, Recreation, and Tourism 3(2,1) Introduces concepts, principles, and skills necessary to plan, implement, and evaluate leisure and recreation programs and events. Topics include assessing needs, developing program objectives, selecting program events, and resources, marketing, venue management, evaluation, group dynamics and leadership techniques. Preq: PRTM 200.

PRTM 223 Administration/Management in Parks, Recreation, and Tourism 4(3,1) Covers the concepts, principles, and skills of administration/management as they relate to leisure and recreation services. Topics include the fundamental principles of research and data analysis, management, human resources management, supervisory leadership, budgeting and financial management, marketing, professional communication, technology, and facility planning and operations. Preq: PRTM 200.

PRTM 224 Legal Aspects of Parks, Recreation, and Tourism 2(2,0) Introduces legal foundations and legislative processes, contracts and tort law, regulatory agents and methods of compliance, safety, emergency, and risk management as they relate to recreation, park, leisure resources, and leisure services. Preq: PRTM 200.

PRTM 241 Introduction to Community Recreation, Sport, and Camp Management 3(3,0) Conceptual examination of community recreation, including the history and structure of public and private nonprofit recreation agencies with an emphasis on programs and services, career opportunities, funding mechanisms, the role of government, and current trends and issues impacting delivery of services. Preq: PRTM 101.

PRTM 254 Introduction to Sport Management 3(3,0) Development of a conceptual understanding of sport management, career opportunities in sport management, and the necessary competencies for the different career fields.

PRTM 270, H270 Introduction to Recreation Resources Management 3(3,0) Fundamentals of recreation resources management are presented to include the framework of management, management of specific resources, management of visitors, and management of services.

PRTM 281 Introduction to Golf Management 3(2,3) Development of a conceptual understanding of the golf industry, career opportunities in professional golf management, and specific introductory competencies utilized within the field. Preq: Professional Golf Management concentration and consent of instructor.

PRTM 282 Principles of Golf Development 3(3,0) Introduction to golf instruction. Provides knowledge and skills necessary to develop successful golf programs. Preq: PRTM 281 or consent of instructor.

PRTM 283 Advanced Methods of Teaching Golf 3(3,0) Provides students with the knowledge and skills necessary to succeed as golf instructors. Particular emphasis is on golf swing mechanics, learning styles and motivation theory, the business of teaching golf, and the use of advanced technology in golf instruction. Preq: PRTM 282.

PRTM 295 PGM Seminar II 1(1,0) Introduction to the golf industry, professionalism, and current issues of interest in the industry with special emphasis on topics covered in the PGA/PGM Training Program Level I. Preq: PRTM 195.

PRTM 298 Creative Inquiry—Parks, Recreation, and Tourism Management II 1-4(1-3,1-12) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

PRTM 301 Recreation and Society 3(3,0) Investigation of the role of recreation in a technological and work-oriented society. Particular emphasis is on recreation behavior, resources, and programming in public and private organizations which serve the public wants. Not open to Parks, Recreation, and Tourism Management majors; may not be substituted or otherwise used to meet Parks, Recreation, and Tourism Management area requirements. Preq: 2.0 cumulative grade-point ratio.

PRTM 304 Challenge Course Facilitation 3(2,2) Develops knowledge and skill in planning, directing, and evaluating group performance in an adventure challenge course environment; emphasis is placed on low and high ropes elements, processing, assessment, safety, and course management. Preq: 2.0 cumulative grade-point ratio.

Courses of Instruction
PRTM 305 Safety and Risk Management in Parks, Recreation, and Tourism Management 3(3,0) Provisions of safe services, facilities, and activities in the parks, recreation, and tourism domain are studied through the application of geriatric concepts from the areas of safety, risk management, and liability. Preq: PRTM 321, Junior standing, 2.0 cumulative grade-point ratio.

PRTM 307 Facility Planning and Operations 3(3,0) Introduction to recreation facility planning and operations processes. Design, planning, funding, construction, budgeting, personnel, operating policies and procedures, maintenance, and equipment considerations are covered. Preq: 2.0 cumulative grade-point ratio.

PRTM 308, H308 Leadership and Group Processes in Recreation 3(3,0) Leadership is analyzed through experience-based learning. Examines various styles of leadership and communication and their probable consequences. Considers techniques for planning large and small group meetings. Examines literature in the field of leadership and group processes. Preq: 2.0 cumulative grade-point ratio.

PRTM 309 Behavioral Concepts in Parks, Recreation, and Tourism 3(3,0) Studies social psychological concepts concerning leisure behavior in various park, recreation, and tourism settings. Students learn to apply those theories and behavioral concepts required to understand and manage leisure activities and environments. Preq: PRTM 101, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 311, H311 Therapeutic Recreation 3(3,0) Examination of the profession of therapeutic recreation by analyzing the history, philosophy, concepts, roles, and functions involved in the therapeutic recreation services. Preq: 2.0 cumulative grade-point ratio.

PRTM 317 Group Initiatives 3(2,2) Examination and development of initiative modalities used by therapeutic recreationists to teach teamwork, problem-solving communication, goal setting, leadership, and personal interaction to diverse populations in a variety of settings. Preq: 2.0 cumulative grade-point ratio.

PRTM 318 Leisure Lifestyle Management 3(3,0) Examines principles and techniques applicable to guiding disabled as well as nondisabled individuals in an exploration of leisure needs, barriers, consequences, and accessibility. Preq: 2.0 cumulative grade-point ratio.

PRTM 320, H320 Recreation Policymaking 3(3,0) Structures and processes for public park and/or recreation policy formation in the United States. Preq: 2.0 cumulative grade-point ratio.

PRTM 321, H321 Recreation Administration 3(3,0) Analysis of the internal organization of a recreation department dealing with finances and accounting, records and reports, publicity and public relations, state and federal legislation, staff organization, coordination of community resources. Preq: PRTM 308, Junior standing, 2.0 cumulative grade-point ratio.

PRTM 330, H330 Visitor Services and Interpretation 3(3,0) Introduces the philosophy and principles of the art of environmental interpretation. Comprehensive survey of interpretive theory as it applies to the recreation and parks practitioner and the varying settings within the profession. Preq: 2.0 cumulative grade-point ratio.

PRTM 342, H342 Introduction to Tourism 3(3,0) Survey of travel and tourism in the United States with focus on terminology, demographics, financial significance, and trends. Preq: 2.0 cumulative grade-point ratio.

PRTM 343 Spatial Aspects of Tourist Behavior 3(3,0) Spatial patterns of national and international leisure travel destinations are explored and analyzed regarding their tourism attractiveness. Preq: 2.0 cumulative grade-point ratio.

PRTM 344 Tourism Markets and Supply 3(3,0) Acquaints students with the principles of matching tourism markets and supply. Students examine the strategies used in developing markets. Preq: 2.0 cumulative grade-point ratio.

PRTM 349 Survey of Tourism Sites 10(0,1) On-site study of various exemplary components of the travel and tourism industry in the southeast. There are additional costs to students to cover travel. To be taken Pass/Fail only. Preq: PRTM 342, Junior standing in Parks, Recreation, and Tourism Management, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 352 Camp Organization and Administration 3(3,0) Surveys the development and trends of camping in America. Considers programming for the operations of agency and private camps. Enables students to master the techniques of group living, laboratory offers practical experience in camp craft, including trips and outdoor cooking. Preq: 2.0 cumulative grade-point ratio.

PRTM 356 Community Recreation in South Carolina 3(3,0) Students study indoor and outdoor recreation facilities, governmental jurisdiction, funding, programming, management, and staffing at community recreation agencies throughout South Carolina during a hands-on five-day field trip. Preq: PRTM 101, 2.0 cumulative grade-point ratio, or consent of instructor.

PRTM 359 Planning 3(3,0) Planning, programming, management, and staffing combine to form the basis for formulation of a relevant knowledge of planning. Preq: Senior standing, 2.0 cumulative grade-point ratio.

PRTM 360 Field Training I 1(1,0) Preparation for field training experience including topics such as résumé development, interviewing techniques, internship agency selections, and responsibilities of the student, department, and agency. To be taken Pass/Fail only. Preq: PRTM 206, 2.0 cumulative grade-point ratio, consent of instructor. Coreq: PRTM 207.

PRTM 365 Field Training II 6(0,18) Minimum ten weeks (400 hours) of uninterrupted, supervised work in a park, recreation, or tourism management agency. Under agency supervision, students observe, organize, and implement activities, events, and programs. To be taken Pass/Fail only. Preq: PRTM 206, 207, 404; Senior standing in Parks, Recreation, and Tourism Management; 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 370 Personne Administration in Parks, Recreation, and Tourism Management 3(3,0) Study of personnel administration practices in recreation agencies, including employee selection, training, motivation, rewards, evaluation, and legal issues related to personnel and supervision. Preq: PRTM 321, 2.0 cumulative grade-point ratio.
PRTM 408 Honors Internship 6(0,18) Minimum of 400 hours of uninterrupted, supervised work in a park, recreation, or tourism setting. Written report on observations, special project, or research is required in compliance with a contract between student and course instructor. Preq: PRTM H399, consent of instructor.

PRTM 409, H409 Methods of Recreation Research I 3(3,0) Analysis of the principal methods of recreation research, the application of descriptive statistics to recreation research, and the development of a research proposal. Preq: EX ST 301; Senior standing in Parks, Recreation, and Tourism Management; 2.0 cumulative grade-point ratio; or consent of instructor.

PRTM 410, H410 Methods of Recreation Research II 3(3,0) Continuation of PRTM 409; includes supervised execution and reporting of results of research proposal developed in PRTM 409 and the application of inferential statistics to research. Preq: PRTM 409, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 412, H412, 612 Therapeutic Recreation and Mental Health 3(3,0) Therapeutic recreation services in mental health clinics, institutions, and outdoor settings. Review of disorders and current modes of treatment as they relate to therapeutic recreation. Preq: PRTM 311, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 416 Leisure and Aging 3(3,0) Examines the role of leisure services in later life, the needs of community-based and institutionalized elderly, and the development of service-delivery systems to meet those needs. Preq: 2.0 cumulative grade-point ratio.

PRTM 417 Therapeutic Recreation Processes I 4(3,2) Examination of models, principles, and procedures applicable to comprehensive program planning, specific program plans, individualized care plans, activity analysis, documentation, and evaluation. Preq: PRTM 311 or consent of instructor, three credit hours of human anatomy and physiology, 2.0 cumulative grade-point ratio.

PRTM 418 Therapeutic Recreation Processes II 4(3,2) Examination of theories and concepts that guide therapeutic recreation interventions, including knowledge and use of communication skills, therapeutic relationships, counseling theories, and group processing techniques. Preq: PRTM 311 and 417 or consent of instructor, 2.0 cumulative grade-point ratio.

PRTM 419 Therapeutic Recreation and Aspects of Disability Across the Lifespan 3(3,0) Examination of characteristics and diagnoses of individuals with various disabilities (cognitive, affective, and/or psychomotor domains) across the lifespan. Application of theories and concepts that guide therapeutic recreation interventions as well as examination of disability theory and concepts. Preq: PRTM 311; BIO/SCC 222 and 223 or equivalent; or consent of instructor; 2.0 cumulative grade-point ratio.

PRTM 420 Therapeutic Recreation Trends and Issues 3(3,0) Advanced principles and practices of therapeutic recreation, including philosophy, ethics, professional development, standards of practice, certification, recreation inclusion, and marketing services. Preq: PRTM 416, 418 or consent of instructor, 2.0 cumulative grade-point ratio.

PRTM 423, 623 Methods of Environmental Interpretation 3(2,3) Practice and instruction in the use of equipment and methods available to the interpreter in public contact work. Coaching in presentation and evaluation of live programs and in design, execution, and evaluation of mediated programs is the major emphasis. Programs are delivered to public audiences in the Benson area. Preq: PRTM 320; Senior standing in Parks, Recreation, and Tourism Management; 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 441, 641 Commercial Recreation 3(3,0) Components of commercial services and products to the public by individuals, partnerships, and corporations for the purpose of making a profit. Preq: 2.0 cumulative grade-point ratio.

PRTM 442, 642 Resorts in National and International Tourism 3(3,0) A variety of resort types are studied with respect to their development, organization, visitor characteristics, and environmental consequences. A case-study approach is used. Preq: PRTM 441, 3.0 cumulative grade-point ratio.

PRTM 444, 644 Tour Planning and Operations 3(3,0) Provides the opportunity to understand the psychology of touring, with emphasis on packaged and group tours and how tours of different types and scale are planned, organized, marketed, and operated. Preq: PRTM 342, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 445, 645 Conference/Convention Planning and Management 3(3,0) Provides the opportunity to understand the problems and solutions to conference and convention planning and management from both the sponsoring organization's and facility manager's perspectives. Preq: 2.0 cumulative grade-point ratio.

PRTM 446, 646 Community Tourism Development 3(3,0) Provides a community-based perspective of organizational, planning, development, and operational needs for a successful tourism economy at the local level. Preq: PRTM 342, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 447, 647 Perspectives on International Travel 3(3,0) Using the United States as a destination, international travel patterns and major attractions are presented. Factors which restrain foreign travel to the United States are analyzed. Preq: 2.0 cumulative grade-point ratio.

PRTM 452, 652 Campus Recreation 3(3,0) Study of the basic components required for administration of successful college union and intramural-recreation sport programs. Preq: 2.0 cumulative grade-point ratio.

PRTM 453 Sports Information and Event Management 3(3,0) Introduction to basic techniques, tools, and procedures associated with sports information and event management activities. Focuses on the application of sports information and event management activities building upon knowledge from personal interviews, selected readings, event management brochures and field experience. Preq: PRTM 254, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 454 Trends in Sport Management 3(3,0) Examination of trends in the sport management field that allows PRTM majors to obtain an updated knowledge base of the field. Students are able to relate their academic studies to the current trends, problems, and management strategies confronting and being used within the sport management industry. Preq: PRTM 254, 2.0 cumulative grade-point ratio, consent of instructor.

PRTM 455 Advanced Program Planning 3(3,0) Advanced recreation program planning techniques with an emphasis on funding, outcome measurement, customer service, program development, marketing, specialized populations, and current trends and issues impacting the delivery of recreation programs. Preq: PRTM 205, 2.0 cumulative grade-point ratio, or consent of instructor.

PRTM 460 Leisure Across the Lifespan 3(3,0) Introduces students to ways in which leisure affects human development and human development affects leisure behavior. Preq: PRTM 205, 309, 2.0 cumulative grade-point ratio.

PRTM 474, H474 Advanced Recreation Resources Management 3(3,0) Advanced topics in recreation resource management focusing on management strategies and techniques for addressing common resource and social problems in recreation resource management. Case studies and problem analysis are emphasized. Preq: PRTM 270, Senior standing, 2.0 cumulative grade-point ratio.

PRTM 483 Golf Club Management and Operations 3(0,9) Focuses on activities related to merchandising, purchasing and selling, inventory management, vendor selection, pricing strategies, strategies for monitoring sales and inventory related to financial control and customer service. Students are exposed to the responsibilities of a golf professional at a full-service golf club facility. Preq: 2.0 cumulative grade-point ratio. Coreq: CO-OP 104 and 105.

PRTM 490 Senior Independent Study 1-3(1-3,0) In cooperation with and under supervision of a faculty member, students develop and execute a field study or community project. May be repeated for a maximum of six credits. Preq: Senior standing, 2.0 cumulative grade-point ratio, consent of instructor.
**PERFORMING ARTS**

P A 101 Introduction to Performing Arts 3(0,3) Overview of performing arts including performance, careers, technology, production, management, community outreach, safety, sales, and marketing. **Preq:** Performing Arts major. **Coreq:** P A 103.

P A 103 Portfolio I 1(0,3) Develops discipline-specific portfolios that display creative design and contain samples of work that demonstrate integrated learning. To be taken Pass/Fail only. **Coreq:** P A 101.

P A 195 Creative Inquiry—Performing Arts 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

P A 201 Performing Arts Seminar I 3(2,3) Study of selected performing arts topics. Includes seminars and masterclasses with faculty and visiting artists and concert and theatre attendance and evaluation. Emphasis is placed on written communication skills. **Preq:** P A 101, Sophomore standing.

P A 279 Performing Arts Practicum I 1(0,3) Practical work on performing arts presentations including backstage technical work, multimedia support, and arts management. **Preq:** P A 101.

P A 280 Performing Arts Practicum II 1(0,3) Continuation of practical work on performing arts presentations, with more specialized opportunities for backstage technical work, multimedia support, and arts management training. **Preq:** P A 279.

P A 295 Creative Inquiry—Performing Arts 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

P A 301 Performing Arts Seminar II 3(2,3) Continuation of P A 201 with added focus on critical and ethical analysis of performing arts. Emphasis is placed on oral communication skills. **Preq:** P A 201, Junior standing.

P A 395 Creative Inquiry—Performing Arts 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

P A 398 Special Topics in Performing Arts 1-3(1-3,0) Select areas of study in performing arts not addressed by other performing arts course offerings. May be repeated for a maximum of six credits, but only if different topics are covered. **Preq:** P A 101 and consent of instructor.

P A 399 Internship 1-3(0,3-9) Provides performing arts students an opportunity to apply technical, managerial, and aesthetic skills in a performing arts environment through preplanned, preapproved, faculty-supervised internships. Minimum of 45 hours of work per credit hour. May be repeated for a maximum of six credits. To be taken Pass/Fail only. **Preq:** P A 279 and consent of Internship Program Coordinator.

P A 401 Senior Project Research 1(0,3) Performing Arts students research a substantial project for the community. Interdisciplinary performing arts group generates a proposal for P A 402. May be repeated for a maximum of two credits. **Preq:** P A 301, Senior standing. **Coreq:** P A 403.

P A 402 Senior Project 3(0,9) Capstone course for Performing Arts majors. Preparation, execution, and assessment of a substantial group performing arts project for the community. Students, with faculty guidance, manage all aspects of the project. **Preq:** P A 401 with a B or better, Senior standing.

P A 403 Portfolio II 1(0,3) Students revise discipline-specific portfolios through use of current technologies. Further demonstration of integrated learning is provided with the incorporation of senior project research content from P A 401. To be taken Pass/Fail only. **Coreq:** P A 401.

P A H491 Performing Arts Honors Research 3(3,0) Research for the preparation of an honors project. **Preq:** P A 301 or consent of instructor.

P A H492 Performing Arts Honors Project 3(3,0) Preparation and presentation of an honors project. **Preq:** P A 491, consent of department chair and project advisor.

P A 495 Creative Inquiry—Performing Arts 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

**PHILOSOPHY**

- **Professors:** W. A. Maker, Chair; T. G. May, S. Silvers; Associate Professors: S. A. Sarris, K. C. Smith, D. E. Wueste; Assistant Professors: D. Perpich, C. B. Starkey, A. A. Thompson; Lecturers: J. Benson, D. L. Stegall

PHIL 101, H101 Introduction to Philosophical Problems 3(3,0) Discussion of representative philosophical questions which arise from human thought and action. Characteristic topics are values, knowledge, human nature, and society.

PHIL 102, H102 Introduction to Logic 3(3,0) Introduction to methods of evaluating arguments. Simple valid argument forms are given which can be joined together to produce the logical form of virtually any argument. Informal fallacies may also be considered.

PHIL 103, H103 Introduction to Ethics 3(3,0) Philosophical consideration of the nature of ethics, basic ethical issues, and problems and modes of ethical reasoning.

PHIL 105 Introductory Seminar in the Big Questions 3(3,0) Introductory seminar dealing with a single important philosophical question (“Who are we?” “What is the meaning of life?” “Are we free or determined?” etc.). Question is pursued throughout the semester with active student involvement. Questions may vary from semester to semester.

PHIL 124 Technology and Its Discontents 3(3,0) Philosophical introduction to issues arising from the development of technologies, their implementation, and their integration into society. Considers theoretical questions regarding the nature of technology and its evaluation, as well as issues related to specific technologies.

PHIL 201 Responsibilities in Leadership 3(3,0) Exploration of the responsibilities leaders have to those who are being led, to those on whose behalf they are leading, to those affected by leadership decisions and actions. Focuses on the relationship between responsibility and authority and the role of judgment in the exercise of leadership.

PHIL 225 Art and Logic of Scientific Reasoning 3(3,0) Examines applications and misapplications of inductive reasoning and causal inference in scientific explanation and everyday discourse. Topics include correlation and confirmation, natural laws, natural kinds, scientific explanation, causal inference, and experimental methods.
PHIL 303 Philosophy of Religion 3(3,0) Critical consideration of the meaning and justification of religious beliefs. Representative topics are the nature and existence of God, religious knowledge, religious language, the problem of evil.

PHIL 304 Moral Philosophy 3(3,0) Study of moral problems, their origin in conflicts between duty and desire, and alternative solutions proposed by classical and contemporary writers.

PHIL 305 Existentialism 3(3,0) Inquiry into the core themes of existentialism: freedom, meaningfulness or meaningfulness of life, the existence of God, etc. Representative thinkers from the existentialist tradition, such as Dostoyevsky, Nietzsche, Sartre, and de Beauvoir, are studied.

PHIL (CHIN) 312 Philosophy in Ancient China 3(3,0) Study of the history of Chinese philosophy from the 5th century BCE, including Confucianism, Daoism, Moism, legalism, Buddhism, Neo-Daoism, and Neo-Confucianism. Examination of Chinese philosophers' views and arguments on questions of life and death, history and society, education and personal cultivation. May not be used to satisfy general foreign language requirements.

PHIL (CHIN) 313 Philosophy in Modern China 3(3,0) Study of the history of Chinese philosophy from the 19th century to the present including Neo-Confucianism, Conservatism, Liberalism, Nationalism, and Chinese Marxism. Examination of the conflict and fate of traditional and modern values in China. All readings and discussions are in English. May not be used to satisfy general foreign language requirements.

PHIL 314 Comparative Topics in Eastern and Western Philosophy 3(3,0) Study of issues and areas of overlapping concern to Eastern and Western philosophical traditions (e.g., ontology, ethics) with emphasis on both contrasts and convergences in philosophical approaches. Topics may vary.

PHIL 315 Ancient Philosophy 3(3,0) Growth and development of rationality as found in the thought of selected philosophers such as Socrates, Plato, and Aristotle.

PHIL 316 Modern Philosophy 3(3,0) Development of the modern view as seen in major Western philosophers of the 16th, 17th, and 18th centuries. Thought of Berkeley, Descartes, Hume, Leibniz, Locke, and Spinoza may be considered to illustrate the development of rationalism and empiricism.

PHIL 317 Nineteenth-Century Philosophy 3(3,0) Development of 19th-century philosophy emphasizing selected works of philosophers such as Kant, Hegel, Marx, Nietzsche, and Kierkegaard.

PHIL 318 Twentieth-Century Philosophy 3(3,0) Historical overview of selected significant movements in 20th-century Western philosophy such as Continental and/or analytic philosophy.

PHIL 320 Social and Political Philosophy 3(3,0) Critical consideration of the views of some major philosophers on the nature of the individual's relation to society and the state in the context of their wider philosophical (logical, epistemological, metaphysical, and ethical) doctrines. Philosophers may include Plato, Aristotle, Augustine, Hobbes, Rousseau, Mill, Marx, Hegel, Rawls, and Nozick.

PHIL 321 Crime and Punishment 3(3,0) Investigates what sorts of conduct should be criminalized and what society should do with those who engage in criminal activity. Specific topics may include the enforcement of morals, euthanasia, hate crimes, deterrence, retribution, and restoration.

PHIL 323 Theory of Knowledge 3(3,0) Examination of concepts, criteria, and decision procedures underlying rational belief and the justification of knowledge claims. Representative answers to the problem of skepticism are considered, with special attention to some leading theories of knowledge.

PHIL 324 Philosophy of Technology 3(3,0) Examination of technology and representative philosophical assessments of it with a focus on understanding its impact on the human condition.

PHIL 325 Philosophy of Science 3(3,0) Philosophical study of problems generated by science, which are not themselves scientific, such as what comprises a scientific theory; how scientists formulate theories and acquire knowledge; what, if anything, differentiates science from other ways of knowing; what role concepts play in scientific knowledge; whether scientific progress is rational.

PHIL 326 Science and Values 3(3,0) Examination of several features of the relation between science and values. Topics may include ethical and social obligations of scientists, role of value-judgments in scientific practice, and influence of social and political values on science and scientists.

PHIL 327 Philosophy of Social Science 3(3,0) Inquiry into the philosophical foundations of social science, in particular questions of objectivity, explanatory structure, causality, agency, normativity and naturalism, and social determination of knowledge.

PHIL 328 Philosophy and Technology of the Body 3(3,0) Examines the interrelation of human bodies and emerging technologies in light of philosophical notions of human nature, personal identity, and the ethical dignity of the human. Emphasizes the influence of social values on scientific and technological developments and the reciprocal impact of these developments on understandings of the body.

PHIL 330 Contemporary Issues in Philosophy 3(3,0) Examination of a variety of issues of broad concern to philosophers today. Issues may vary. May be repeated once for credit with departmental consent.

PHIL 333 Metaphysics 3(3,0) Examination of issues and problems concerning the ultimate nature of reality. Topics may include the appearance-reality distinction, the nature of existence, freedom and determinism, personal identity, idealism, and realism.

PHIL 343 Philosophy of Law 3(3,0) Explanation of the nature of legal theory and the law through a critical examination of the basic concepts and principles of these fields.

PHIL 344 Business Ethics 3(3,0) Study of ethical issues created by business activities, relating them to fundamental questions of ethics generally. Representative topics may include hiring, firing, pro-motions, business and minorities, organizational influence in private lives, consumer interests, economic justice, and reindustrialization.

PHIL 345 Environmental Ethics 3(3,0) Study of ethical problems in our dealings with the rest of nature and of how they relate to ethics in general. Representative topics include the basis of ethics, nature and intrinsic value, duties to future generations, economics and the environment, rare species, animal rights, ethics and agriculture, energy doctrine.

PHIL 346 Medical Ethics 3(3,0) Examines ethical dilemmas facing modern medicine. Topics may include controversies surrounding death, reproductive technologies, abortion, allocation of resources, the concept of disease, the doctor-patient relationship, and medical research.

PHIL 347 Ethics in Architecture 3(3,0) Inter-disciplinary course focused on the architectural profession and the practices of design, building, and other processes in a social and business context. Consideration is given to both general moral principles and particular case studies.

PHIL 348 Philosophies of Art 3(3,0) Examines some of the predominant attempts to understand art in ancient and modern philosophy and also considers a variety of contemporary views and controversies about the nature, meaning, value, and nature of art.

PHIL (W S) 349 Theories of Gender and Sexual-ity 3(3,0) Examines the philosophical dimensions of contemporary debates about the relation of sex, gender, and sexuality.

PHIL (NURS) 350 Technology and Philosophy in Nursing 3(3,0) See NURS 350.

PHIL 351 Philosophy of Emotion 3(3,0) Considers a range of classic and contemporary readings on the nature and function of emotion. Topics include cognitive, physiological, and constructionist approaches to understanding emotion, emotion and reason, emotion and morality, and select individual emotions.

PHIL 355 Philosophy of Mind and Cognitive Science 3(3,0) Critical examination of philosophical and scientific theories of mental phenomena and of the relationship between mental and material phenomena. Theories of Mind-Body Dualism, Monism, Functionalism, Eliminative and Reduc-tive Materialism, Connectionism, and the status of folk psychology versus cognitive neuroscience are studied.

PHIL 360 Symbolic Logic 3(3,0) Introduction to the basic concepts of modern symbolic logic, including the symbolization of statements and arguments and the techniques of formal proof.

PHIL 370 Philosophy of War 3(3,0) Examines war from both ethical and strategic perspectives: the nature of a just war, the aims of war, and the kinds of general strategies appropriate for achieving those aims.

PHIL 375 Minds and Machines 3(3,0) Examines controversial questions in artificial intelligence and the Computational Theory of Mind. Topics may include "Can machines think?" "What's involved in being able to think?" "Can machines reason, understand, be conscious, be self-aware, learn, be creative, have emotions, and use natural language?" Focus is on manmade computers and the mind as computer.
PHIL (REL) 393 Science and Religion 3(3,0)
See REL 393.

PHIL 399 Philosophy Portfolio 2(2,0) Creation of a digital portfolio to demonstrate competence in reasoning, critical thinking, and problem solving skills as well as ethical judgment. Course also serves as a resource for academic and professional development. Prereq: Junior standing in Philosophy.

PHIL 401, 601 Studies in the History of Philosophy 3(3,0) In-depth study of a selected philosopher, philosophical school, or movement. Topics vary. With departmental consent, may be repeated once for credit. Current topics and course descriptions are available in the department's course offering brochure. Prereq: Consent of instructor.

PHIL 402, 602 Topics in Philosophy 3(3,0) Thorough examination of a particular philosophical topic, issue, or problem. Topics vary. May be repeated once for credit with departmental consent. Current topics and course descriptions are available in the department's course offering brochure. Prereq: Consent of instructor.

PHIL 406, 606 Continental Philosophy for Architects 3(3,0) Examines contemporary Continental philosophy over the course of the 20th century with the goal of offering the proper theoretical background to architecture students who use such theory in their studies and design work.

PHIL 422 Anarchism 3(3,0) Philosophical study of the roots of anarchist thought and its current articulations.

PHIL 425, 625 Philosophy of Psychology 3(3,0) Detailed examination of psychology as an autonomous science. Issues include explanation in psychology and cognitive neuroscience, psychology naturalized as a “special science” comparable to biology and geology, evolutionary psychology, philosophy and psychopathology, and moral issues in psychology. Prereq: Nine hours of psychology or consent of instructor.

PHIL (A A H) 433, 633 Issues in Contemporary Art and Philosophy 3(3,0) Examines the intersections between recent developments in art and those in philosophy and critical theory. Course content varies, for example, Postmodernism in Art and Philosophy, Themes of Resistance in Contemporary Culture.

PHIL 485, 685 Topics in Philosophy of Biology 3(3,0) Detailed analysis of a selected topic in philosophy of biology/theoretical biology. Topics may include the levels of selection debate, sociobiology, genetic explanation and genetic causation, the species question, and the history and sociology of biology. Prereq: Eight credit hours of biology or consent of instructor.

PHIL 492 Creative Inquiry—Philosophy 1-4(1-4,0) Small group work on particular issues with emphasis on involving students in research. Content varies. May be repeated for a maximum of nine credits. Prereq: Consent of instructor.

PHIL H497 Philosophy Honors Research 3(3,0) Students conduct research, clearly define the topic, and complete an annotated bibliography under the supervision of the thesis advisor. Prereq: Consent of department chair and thesis advisor.

PHIL H498 Philosophy Honors Thesis 3(3,0) In consultation with the thesis advisor and committee, students write, revise, defend, and complete the thesis. Prereq: PHIL H497 and consent of department chair and thesis advisor.

PHIL 499, 699 Independent Study 1-3(1-3,0) Course of study designed by the student in consultation with a faculty member who agrees to provide guidance, discussion, and evaluation of the project. Student must confer with the faculty member prior to registration. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

PHYSICAL SCIENCE

PH SC 107 Introduction to Earth Science 4(3,3) Survey of topics in geology, meteorology, astronomy, and oceanography emphasizing comprehension and practical application of earth science concepts to experiments and activities appropriate for the elementary school classroom. Enrollment priority will be given to Early Childhood and Elementary Education majors.

PH SC 108 Introduction to Physical Science 4(3,3) Survey of topics in chemistry and physics emphasizing comprehension and practical application of physical science concepts to experiments and activities appropriate for the elementary school classroom. Enrollment priority will be given to Early Childhood and Elementary Education majors.

PHYS 101 Current Topics in Modern Physics 4(3,3) Demonstrations and lectures serving as an introduction to different areas of physics and astronomy are presented by various members of the staff. May include such topics as astrophysics, energy, relativity, and weather, as well as visits to the planetarium.

PHYS 122, H122 Physics with Calculus I 3(3,0) First of three courses in a calculus-based physics sequence. Topics include vectors, laws of motion, conservation principles, rotational motion, oscillations, and gravitation. Credit for a degree will be given for only one of PHYS 122, 200, or 207. Coreq: MTHSC 106.

PHYS 124 Physics Laboratory I 1(0,3) Introduction to physical experimentation with emphasis on mechanical systems, including oscillatory motion and resonance. Computers are used in the experimental measurements and in the statistical treatment of data. Coreq: PHYS 122.

PHYS 199 Creative Inquiry—Physics and Astronomy 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

PHYS 200 Introductory Physics 4(3,2) Introduction to classical physics. Includes elements of mechanics, heat, electricity, and light. May not be substituted for PHYS 122 but may be substituted for PHYS 207, only with the approval of the Department of Physics and Astronomy. Credit for a degree will be given for only one of PHYS 122, 200, or 207. Coreq: MTHSC 105 or equivalent.

PHYS 207 General Physics I 3(3,0) Introductory course for students who are not majoring in physical science or engineering. Covers such topics as mechanics, waves, fluids, and thermal physics. Credit for a degree will be given for only one of PHYS 122, 200, or 207. Coreq: MTHSC 105 or equivalent.

PHYS 208 General Physics II 3(3,0) Continuation of PHYS 207. Covers such topics as electricity, magnetism, electromagnetic waves, optics, and modern physics. Credit for a degree will be given for only one of PHYS 208 or 221. Prereq: PHYS 207. Coreq: PHYS 210.

PHYS 209 General Physics I Laboratory 1(0,2) Introductory laboratory course for students who are not majoring in physical science or engineering. Covers such topics as mechanics, waves, fluids, and heat. Coreq: PHYS 207.

PHYS 210 General Physics II Laboratory 1(0,2) Covers such topics as electricity, magnetism, electromagnetic waves, optics, and modern physics. Prereq: PHYS 207, 209. Coreq: PHYS 208.

PHYS 221, H221 Physics with Calculus II 3(3,0) Continuation of PHYS 122. Topics include thermodynamics, kinetic theory of gases, electric and magnetic fields, electric currents and circuits, and motions of charged particles in fields. Credit for a degree will be given for only one of PHYS 208 or 221. Prereq: PHYS 122.

PHYS 222, H222 Physics with Calculus III 3(3,0) Continuation of PHYS 221. Topics include wave motion, electromagnetic waves, interference and diffraction, relativity, atomic particles, and atomic and nuclear structure. Prereq: PHYS 221.

PHYS 223 Physics Laboratory II 1(0,3) Experiments in heat and thermodynamics, electrostatics, circuits, and magnetism. Computers are used in statistical treatment of data. Coreq: PHYS 221.

PHYS 224 Physics Laboratory III 1(0,3) Experiments involve atomic, molecular, and nuclear systems. Wave particle duality of light and matter is emphasized. Calculators and computers are used in statistical treatment of data. Coreq: PHYS 221.

PHYS 240 Physics of the Weather 3(3,0) Descriptive introduction to meteorology. Includes atmospheric thermodynamics, solar radiation, heat budget, atmospheric circulation, force laws governing air motion, fronts, precipitation, synoptic prediction. Special topics of current interest such as the effect of environmental pollution on weather and the effect of weather on health are included.

PHYS 290 Physics Research 1-3(0,3-9) Individual research project in any area of experimental or theoretical physics or astronomy supervised by a physics or astronomy faculty member. Project need not be original but must add to students' ability to carry out research. May be repeated for a maximum of six credits. Prereq: Minimum grade-point ratio of 3.0; consent of instructor.
PHYS 299 Creative Inquiry—Physics and Astronomy 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

PHYS 300, H300 Introduction to Research 1(2,0) Acquaints students with current research in physics. Seminars are provided where research activities in various areas of physics and astronomy are summarized. Provides a basis for students to choose a suitable topic for a senior thesis. Prq: Junior standing in Physics.

PHYS 311 Introduction to the Methods of Theoretical Physics 3(3,0) Survey of methods and techniques of problem-solving in physics. Emphasizes the application of mathematical techniques to the solution of problems of vectors, fields, and waves in mechanics, electromagnetism, and quantum physics. Prq: PHYS 222 or consent of instructor.

PHYS 312 Methods of Theoretical Physics II 3(3,0) Continuation of PHYS 311 focused on introducing various mathematical notions widely used in upper level physics courses, such as differential equations, special functions and complex numbers, and complex functions. Prq: PHYS 311 or consent of instructor.

PHYS 321, H321, 621 Mechanics I 3(3,0) Statics, motions of particles and rigid bodies, vibratory motion, gravitation, properties of matter, flow of fluids. Prq: PHYS 221.

PHYS 322, H322, 622 Mechanics II 3(3,0) Dynamics of particles and rigid bodies, Lagrangian and Hamiltonian formulations, vibrations of strings, wave propagation. Prq: PHYS 321 or consent of instructor.

PHYS 325, H325 Experimental Physics I 3(1,4) Introduction to experimental modern physics, measurement of fundamental constants, repetition of crucial experiments of modern physics (Stern Gerlach, Zeeman effect, photoelectric effect, etc.). Coreq: PHYS 321 or consent of instructor.

PHYS 326, H326 Experimental Physics II 3(1,4) Continuation of PHYS 325.

PHYS 355, H355 Modern Physics 3(3,0) Study of the topics of modern physics, including relativity, atomic physics, quantum mechanics, condensed-matter physics, nuclear physics, and elementary particles. Prq: PHYS 222, MTHSC 206, or consent of instructor.

PHYS 356 Modern Physics Overview I 1(1,0) Overview of topics in modern physics, including a short description of the structure of solids, nuclear physics, and particle physics. Prq: PHYS 222 or consent of instructor.

PHYS 399 Creative Inquiry—Physics and Astronomy 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

PHYS 401, H401 Senior Thesis I 3-5(3-5,0) Senior level research project in consultation with a faculty member. Prq: Consent of instructor.

PHYS 417, H417, 617 Introduction to Biophysics I 3(3,0) Continuation of the application of physics to biological problems. Topics include review of elementary chemical and biological principles, physics of biological molecules, and fundamentals of radiation biophysics. Prq: MTHSC 206, PHYS 221, or consent of instructor.

PHYS 420, 620 Atmospheric Physics 3(3,0) Study of physical processes governing atmospheric phenomena. Topics include thermodynamics of dry and moist air, solar and terrestrial radiative processes, convection and cloud physics, precipitation processes, hydrodynamic equations of motion and large-scale motion of the atmosphere, numerical weather prediction, atmospheric electricity. Prq: MTHSC 108, PHYS 208 or 221.

PHYS 432, H432, 632 Optics 3(3,0) Covers a selection of topics, depending on the interests of the student. Topics may include the formation of images by lenses and mirrors, design of optical instruments, electromagnetic wave propagation, interference, diffraction, optical activity, lasers, and holography. Prq: PHYS 221.

PHYS 441, H441, 641 Electromagnetics I 3(3,0) Continuation of PHYS 441. Study of the foundations of electromagnetic theory, including electric fields, electric potentials, magnetic fields, and magnetostatics. Prq: PHYS 221 and MTHSC 220 or consent of instructor.

PHYS 442, H442, 642 Electromagnetics II 3(3,0) Continuation of PHYS 441. Study of foundations of electromagnetic theory. Topics include magnetic properties of matter, microscopic theory of magnetization, electromagnetic induction, magnetic energy, AC circuits, Maxwell’s equations, and propagation of electromagnetic waves. Other topics may include waves in bounded media, antennas, electromodynamics, special theory of relativity, and plasma physics. Prq: PHYS 441 or consent of instructor.

PHYS 445 Solid State Physics I 3(3,0) Topics include an overview of crystal structures, chemical and atomic bonding, and periodicity in relation to solid materials. Covers electronic, thermal, and magnetic properties of materials, electrical conduction in metals and semiconductors. Overview of the role of electrons and phonons and their interactions is presented. Prq: PHYS 455 or consent of instructor.

PHYS 446, H446, 646 Solid State Physics II 3(3,0) Continuation of PHYS 445, including selected topics in solid-state physics such as optical properties, superconductivity, non-crystalline solids, dielectrics, ferroelectrics, and nanomaterials. Plasmons, polarons, and excitons are discussed. Brief introduction into methods of solid-state synthesis and characterization tools is presented. Prq: PHYS 445 or consent of instructor.

PHYS 452, H452, 652 Nuclear and Particle Physics 3(3,0) Study of our present knowledge concerning subatomic matter. Experimental results are stressed. Topics include particle spectra, detection techniques, Regge pole analysis, quark models, proton structure, nuclear structure, scattering and reactions.

PHYS 455, H455, 655 Quantum Physics I 3(3,0) Discussion of solution of the Schroedinger equation for free particles, the hydrogen atom, and the harmonic oscillator. Prq: PHYS 322 and 441, or consent of instructor.

PHYS 456, H456, 656 Quantum Physics II 3(3,0) Continuation of PHYS 455. Application of principles of quantum mechanics as developed in PHYS 455 to atomic, molecular, solid state, and nuclear systems. Prq: PHYS 455.

PHYS 465, H465, 665 Thermodynamics and Statistical Mechanics 3(3,0) Study of the laws of thermodynamics and their application to thermodynamic systems. Introduction to low temperature physics is given. Prq: Six hours of physics beyond PHYS 222 or consent of instructor.

PHYS 475 Selected Topics 1-3(0,3-9) Comprehensive study of a topic of current interest in the field of physics. May be repeated for a maximum of six credits, but only if different topics are covered. Prq: Consent of instructor.

PHYS 481 Physics of Surfaces 3(3,0) Introduction for advanced undergraduates to the physics and chemical physics of solid surfaces and to the interaction of atoms and molecules with those surfaces. Prq: PHYS 312, 322, 325, 326, 441, or consent of instructor.

PHYS 482 Surface Experiments 3(2,3) Introduction for advanced undergraduates to experimental methods of surface physics. Includes on-hand experience in an advanced laboratory. Prq: PHYS 312, 322, 325, 326, 441, or consent of instructor.

PHYS 499 Creative Inquiry—Physics and Astronomy 1-4(1-4,0) In consultation with and under the direction of a faculty member, students pursue scholarly activities individually or in teams. These creative inquiry projects may be interdisciplinary. Arrangements with mentors must be established prior to registration. May be repeated for a maximum of eight credits.

PLANT PATHOLOGY

Professors: S. B. Martin, M. B. Riley, S. W. Scott; Assistant Professors: P. Agudelo, J. Kerrigan

PL PA 302, H302 Plant Pathology Research 1-3(0,3-9) Research experience in a plant pathology project for undergraduates who understand basic concepts of research. Students develop research objectives, procedures, and collect data. A written report includes interpretation of results. To be taken Pass/Fail only. Prq: Consent of instructor.

PL PA 310 Plant Diseases and People 3(2,3) Introduction to diseases caused by biotic and abiotic agents, symptom development, diagnosis, economics, control, and relationship of plant diseases to human welfare including the uses of genetic engineering to develop disease resistant crops. Prq: BIOL 104/106 or equivalent.
Courses of Instruction

PL PA (ENT) 406, 606 Diseases and Insects of Turfgrasses 2(2,0) Host-parasite relationships, symptomatology, diagnosis, economics, and control of infectious diseases of turfgrasses and life histories, diagnosis, and control of important insect pests of turfgrasses. Preq: ENT 301, PL PA 310, or equivalent; or consent of instructor.

PL PA (ENT) 408, 608 Diseases and Insects of Turfgrasses Laboratory 1(0,3) Laboratory to complement PL PA (ENT) 406 to learn symptomatology, diagnosis, and control of infectious diseases of turfgrasses and diagnosis of damage caused by important insect pests of turfgrasses. Preq: PL PA (ENT) 406.

PL PA 411, 611 Plant Disease Diagnosis 1 2(1,2) Methods and procedures used in the diagnosis of plant diseases, especially late spring and early summer diseases. Basic techniques of pure culture and identification of plant pathogens and Koch's postulates are taught. Diagnosis of a wide variety of diseases of cultivated and wild plants is carried out. Offered summer session only. Preq: PL PA 310 or equivalent.

PL PA (BIOSC) 425, 625 Introductory Mycology 3(3,0) See BIOSC 425.

PL PA (BIOSC) 426, 626 Mycology Practicum 2(1,3) See BIOSC 426.

PL PA 459, 659 Plant Nematology 3(2,3) Introduction to nematodes emphasizing plant parasitic nematodes. Introduces morphology of nematodes as it relates to their taxonomic position and ability to cause diseases. Includes diagnosis and control of nematode diseases, along with use of nematodes in studies of molecular interaction and genetics involvement in developing resistance. Preq: PL PA 310 or consent of instructor.

PL PA 470, 670 Molecular Plant Pathogen Interactions 3(3,0) Study of the interactions of plants and pathogens at the molecular level. Investigates the molecular and genetic components of plant disease and how these can be used for investigation and understanding of how disease occurs and how these can be used for possible disease management. Preq: PL PA 310.

PLANT PHYSIOLOGY
Lecturer: K. C. Hall

PL PH (BIOSC) 340 Plant Medicine and Magic 3(3,0) Study of use of compounds of plant and fungal origin as poisons, hallucinogens, and pharmaceuticals. Preq: BIOL 104/106, CH 102, or consent of instructor.

POLITICAL SCIENCE

Professors: D. L. Bodde, J.P. Cross, X. Hu, W. Lasser, M. A. Morris, L. R. Olson, B. W. Ransom, J. E. Stewart, Jr., Chair; C.B. Thompson, J. D. Woodard; Associate Professor: R. W. Smith; Assistant Professors: M. D. Crosson, J. A. Fine, Z. Taydas, A. L. Warber; Lecturer: V. Matic

PO SC 101, H101 American National Government 3(3,0) Introduction to American national government and politics examining topics such as the Constitution, federalism, political institutions, political behavior, and political participation.

PO SC 102, H102 Introduction to International Relations 3(3,0) Overview of both theory and practice in contemporary global politics. Topics include the structure of and primary actors in the international system; reasons conflict occurs; and roles of international institutions, law, and policy.

PO SC 104, H104 Introduction to Comparative Politics 3(3,0) Introduction to the study of comparative politics in the post-Cold War era, with emphasis on theories and applications. Topics include democratic and nondemocratic systems; ideology; political culture; party systems; and legislative, executive, and judicial structures.

PO SC 199 Introduction to Political Science 1(1,0) Introduction to political science as a discipline. Topics include an overview of the subfields within political science, core research methodologies and source materials, and ethical issues related to the study of political science. To be taken Pass/Fail only. Preq: Political Science major.

PO SC 302 State and Local Government 3(3,0) Introduction to American state and local governments, including examination of nature and scope of non-national governments and their interaction with the U.S. federal system. Emphasis is on structural features, functions, and policies of non-national governments.

PO SC 305 Creativity Inquiry—Political Science 1-3(1-3,3) Engages students in research projects selected by the Political Science Department faculty. Research projects vary depending on faculty and student interest. May be repeated for a maximum of six credits. Political Science majors may apply a maximum of three credits toward degree requirements. Preq: Consent of instructor.

PO SC 310 Political Science Internship 1-3(1-3,2) Offers internship for at least one semester of identical credit. May be repeated for a maximum of three credits. No more than three hours credit from PO SC 310, 311, 312, 409, 410 may be applied toward a Political Science major or minor or a Global Politics minor.

PO SC 311 Model United Nations 1(0,1) Participating in United Nations simulation exercises in competition with other colleges and universities. May be repeated for a maximum of six credits; however, no more than three hours credit from PO SC 310, 311, 312, 409, 410 may be applied toward a Political Science major or minor or a Global Politics minor. No more than six hours credit from PO SC 310, 311, 312 may be applied toward any other degree. Preq: PO SC 101 and consent of instructor.

PO SC 311 Model United Nations 1(0,1) Participating in United Nations simulation exercises in competition with other colleges and universities. May be repeated for a maximum of six credits; however, no more than three hours credit from PO SC 310, 311, 312, 409, 410 may be applied toward a Political Science major or minor or a Global Politics minor. No more than six hours credit from PO SC 310, 311, 312 may be applied toward any other degree. Preq: Consent of instructor.

PO SC 312 State Student Legislature 1(0,1) Participation in state student legislature simulation exercises in competition with other colleges and universities in the State. May be repeated for a maximum of six credits; however, no more than three hours credit from PO SC 310, 311, 312, 409, 410 may be applied toward a Political Science major or minor or a Global Politics minor. No more than six hours credit from PO SC 310, 311, 312 may be applied toward any other degree. Preq: Consent of instructor.

PO SC 321 Public Administration 3(3,0) Introduction to public administration including the elements of organization, personnel and financial management, administrative law, and administrative responsibility. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC 341 Quantitative Methods in Political Science 3(1,0) Introduction to quantitative research methods in political science. Topics include research design, measurement, data collection, sampling procedures, and applications of statistical techniques to research problems in political science. Also stresses computer use for elementary data analysis.

PO SC 343 The Mass Media in American Politics 3(3,0) Role and impact of the mass media in the American political system, emphasizing the media's role in shaping public opinion and in influencing government and public policy. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC (LANG) 350 Seminar in International News 3(3,0) See LANG 350.

PO SC, MEL E, PSYCH, SOC 356 Social Science of Entrepreneurship 3(3,0) See SOC 356.

PO SC 361, H361 International Politics in Crisis 3(3,0) Factors contributing to the prevalence of tension and conflict in the contemporary global arena are identified and analyzed, with particular emphasis on political, economic, and military elements. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 362 International Organizations 3(3,0) Examines normative and institutional foundations of civil society. Explains the formal institutions, decision-making processes, and multilateral capacities of international governmental and nongovernmental organizations. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 363 United States Foreign Policy 3(3,0) American foreign policy in historical perspective, with particular emphasis on decision-making processes, contemporary American capabilities and challenges, and analysis of key issues. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 367 Political Risk Assessment 3(3,0) Risks associated with conducting business and other activities in different countries, especially in the frequently unstable setting of the developing world. Major commercial providers of country risk assessment are identified and critiqued. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 371 European Politics 3(3,0) Major emphasis on European governments and issues of importance in the European context. Current methods of comparison are studied and applied to the formal and informal functioning of European governments. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 372 Political Culture of East Asia 3(3,0) Introduction to political culture that commonly characterizes East Asian countries, with emphasis on political subcultures of different nations, and on the analysis of the mutual influence between politics and culture. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.
Courses of Instruction

PO SC 375, H375 European Integration 3(3,0)
Survey course analyzing increasing institutional cooperation between European countries with a focus on the European Union. Prq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 381 African American Politics 3(3,0)
Examination of African American political thought, interests and agenda setting, and dynamics of African Americans' participation in political and governmental decision making. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC (SPAN) 382 Spanish-Language News 1(1,0)
Weekly discussions of Spanish-language news articles in the foreign press with an emphasis on politics and on the connections among political, economic, social, and cultural trends. Emphasizes Spanish vocabulary as well as cross-cultural contrasts with the United States. May be repeated for a maximum of three credits. Prq: SPAN 202 or equivalent or consent of instructor.

PO SC (FR) 383 French-Language News 1(1,0)
Weekly discussions of French-language news articles in the foreign press with an emphasis on politics and the connections among political, social, economic, and cultural trends. Emphasizes French vocabulary as well as cross-cultural contrasts with the United States. May be repeated for a maximum of three credits. Prq: FR 202 or equivalent or consent of instructor.

PO SC 389 Selected Topics 1-3(1-3,0)
Study of a selected area of political science. May be repeated for a maximum of six credits, but only if different topics are covered. Prq: Consent of instructor.

PO SC H395 Junior Honors Research Seminar 1(1,0)
Readings and discussion to prepare for the Junior Research Paper and the Senior Thesis. Prq: Junior standing, membership in Calhoun Honors College, consent of instructor.

PO SC H396 Junior Honors Research 1(1,0)
Readings and research in conjunction with an approved political science course at the 300 or 400 level. Prq: Junior standing, membership in Calhoun Honors College, and consent of instructor.

PO SC 403 United States Congress 3(3,0)
Examination of the evolution of Congress, congressional elections, the organization of the legislative branch, congressional rules and procedures, decision making, styles of representation, and policymaking. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 405 The American Presidency 3(3,0)
Examines the evolution of the presidency, the powers of the chief executive, the public presidency, executive branch organization and staffing, decision making, and political relations with Congress and the federal judiciary. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 407 Religion and American Politics 3(3,0)
Examination of the impact of religion on American politics, including an analysis of the role of religion in politics, political behavior of major religious groups, constitutional issues and voting behavior. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 409, 609 Directed Study in American Politics 1-3(1-3,0)
Supervised reading and/or research in selected areas of American government. May be repeated for a maximum of six credits; however, no more than three hours credit from PO SC 310, 311, 312, 409, 410 may be applied toward a Political Science major or minor or a Global Politics minor. Prq: Consent of instructor.

PO SC 410 Directed Study in International Politics 1-3(1-3,0)
Supervised readings and/or research in selected areas of international and comparative politics. No more than three hours credit from PO SC 310, 311, 312, 409, 410 may be applied toward a Political Science major or minor or a Global Politics minor. Prq: Consent of instructor.

PO SC 416, 616 Interest Groups and Social Movements 3(3,0)
Empirical and normative examination of the origins, roles, and influence of interest groups and social movements in the United States and of the relationships among interest groups, social movements, and democratic theory. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 421, 621 Public Policy 3(3,0)
Introduction to the major approaches to public policy making in American government. Topics include theories and models of policy making, the identification of policy problems, agenda setting, the formulation and adoption of policy, implementation, and program evaluation. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 423, 623 Urban Politics 3(3,0)
Examines the nature and scope of politics in urban communities and focuses on analysis of urban governance, especially in the interplay of public authority and private institutions in metropolitan areas. Emphasis is on the structure, processes, and problems challenging governments in urban America. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 424, 624 Federalism and Intergovernmental Relations 3(3,0)
Introduction to the historical, theoretical, legal, and fiscal aspects of constitutionally divided government. Federal, state, and local division of responsibility for public services is emphasized along with the emerging devolution of those responsibilities from the federal government to states and localities. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 427, 627 Public Management 3(3,0)
Examination of emerging management problems and issues facing federal, state, and local government and the application of management principles, practices, and techniques of public administration. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 428, 628 National Security Policy 3(3,0)
National security threats and policy decision making. Issues covered include weapons of mass destruction, terrorism, organized crime, narcotics, arms control, intelligence, and homeland security. Students deliberate and assess threat priorities and crisis management. Prq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 429, 629 Global Issues 3(3,0)
Analysis, assessment, and management of the principal threats facing global security today. Topics include rogue nations, regional superpowers, alliances, organized crime, illegal weapons proliferation, and corruption. Emphasis is on the strategies available to the international community for dealing with these threats. Prq: PO SC 102 or 104; Junior standing; or consent of instructor.

PO SC 430 Public Policy Evaluation 3(3,0)
Discussion of the role of policy analysis in government. Applications of analytical and computer tools to substantive policy areas such as transportation, economic/community development, education, poverty, and health. Students focus on assessing a policy from a set of options based on analytic criteria as well as developing policy alternatives. Prq: MT HSC 301 or PO SC 341 or equivalent.

PO SC 436 Law, Courts, and Politics 3(3,0)
Introduces the principal features of the American legal system. Analyzes how and why legal actors and institutions operate as they do. Explores how the law functions as both a tool and an institution of government, as well as how the court system affects the formation and implementation of public policies. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 437, 637 American Constitutional Law: Rights and Liberties 3(3,0)
Examination and analysis of Supreme Court decisions and other legal materials in the areas of civil rights and civil liberties, with an emphasis on freedom of speech, freedom of religion, equal protection of the laws, and privacy rights. Prq: Junior standing or consent of instructor.

PO SC 438, 638 American Constitutional Law: Structures of Government 3(3,0)
Examination and analysis of Supreme Court decisions and other legal materials in the areas of national power, federalism, the separation of powers, and the role of the judiciary. Prq: Junior standing or consent of instructor.

PO SC 442, 642 Political Parties and Elections 3(3,0)
Study of the distinctive features of the American two-party system with emphasis on presidential elections. Parties are examined as formal organizations, coalitions of voters and interest groups, coordinators of nomination and election processes, and managers of policy-making institutions. Prq: PO SC 101, Junior standing, or consent of instructor.

PO SC 449 Political Theory of Capitalism 3(3,0)
Examines the ethical foundations of capitalism. Focuses primarily on the major ethical theories that have supported or criticized capitalism throughout history. Topics include justification of private property, role of corporations, the profit motive, and the source of wealth creation. Prq: PO SC 101, Junior standing, or consent of instructor.
PO SC 450 Political Theory 3(3,0) Moral concepts central to political life, including equality, freedom, community, and individualism. Emphasis is placed on the ideologies that express these concepts, including democracy, liberalism, conservatism, socialism, and fascism. Philosophers covered range from Plato to Foucault. Preq: PO SC 101 or 102, or Junior standing, or consent of instructor.

PO SC 453 American Political Thought 3(3,0) American political philosophy from the 17th century to the present with emphasis on political and social developments since the 1770s. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC 454, 654 Southern Politics 3(3,0) Examination of the unique political environment of the American South, with emphasis on the events and social forces which have shaped politics in the region since World War II. Course material is approached from a variety of perspectives, including history, literature, social themes, and political culture. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC 455 Political Thought of the American Founding 3(3,0) Intensive seminar on the principles and practices of America's founders (e.g., Washington, Adams, Jefferson, Madison, and Hamilton). Examines how American revolutionaries struggled between 1765 and 1788 to develop new ideas about rights, liberty, equality, constitutions, republicanism, separation of powers, representation, federalism, etc. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC 456 Diplomacy: The Art of Negotiation 3(3,0) Examines the conduct of foreign policy in the historical and contemporary context. Explores theories and key concepts of international negotiation, offering a comparative look at the behavior and practice of major powers. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 457, 657 Political Terrorism 3(3,0) Examination and analysis of the international phenomenon of terrorism in terms of origins, operations, philosophy, and objectives. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 458, 658 Political Leadership 3(3,0) Comparative examination of political leaders, focusing particularly on types, methods, and consequences of leadership and on the relationship between leaders and followers. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC 459 Ethnic Violence 3(3,0) Examination of both theories and case studies of ethnic violence in today's world, with emphasis on understanding potential strategies of conflict resolution. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 461, 661 American Diplomacy and Politics 3(3,0) A course of making and implementing strategies to protect and promote American national interests. Focuses on the role of government agencies and executive-legislative relations, as well as the participation and influence of interest groups and the media. Includes a five-day seminar in Washington, DC. Preq: PO SC 363 or consent of instructor.

PO SC 466 African Politics 3(3,0) Comprehensive survey of major regional blocks as well as analysis of individual states and thematic concepts. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 471 Russian Politics 3(3,0) Comprehensive examination of the Russian Federation since the fall of the Soviet Union. The successes and failures of democratic transition are analyzed, with topics covering political participation, organized crime and corruption, center-periphery conflict, and ethnic/religious unrest. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 472 Japanese Politics 3(3,0) Concepts and operation of contemporary Japan's political system. Emphasis is on institutional building and political economy after World War II. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 473 Eurasian Politics 3(3,0) Examination of the areas of the Caucasus and Central Asia, covering themes including democratization, globalization, terrorism, and stability. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 476 Middle East Politics 3(3,0) Comprehensive thematic and empirical analysis of the Middle East region. Issues covered include democratization, political and religious freedom, and the role of women, and terrorism. States analyzed include Syria, Jordan, Iran, Iraq, Saudi Arabia, Turkey, and the Gulf States. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 477 Chinese Politics 3(3,0) Concepts and operation of contemporary China's political system; emphasis on institutions, innovation and political economy in recent reforms. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 478 Latin American Politics 3(3,0) Survey of prominent trends of Latin American politics, with a focus on major countries in the region and major issues affecting the region. Relations between Latin America and the United States and the prominent countries are also considered. Preq: PO SC 102 or 104, Junior standing, or consent of instructor.

PO SC 480, 680 Gender and Politics 3(3,0) Examination of the role of gender in politics in the United States and in other countries. Particular emphasis on the role of women in electoral politics, issues of gender, women's rights as human rights, and feminist theory. Preq: PO SC 101, 102, or 104, Junior standing, or consent of instructor.

PO SC 482 The Political Novel and Film 3(3,0) Examination of political novels and films. Emphasizes the development of these media as art forms; the relationship between political novels and films in the role of these media in shaping public opinion. Preq: PO SC 101, Junior standing, or consent of instructor.

PO SC (LANG) 485, 685 Global Affairs and Governments 3(3,0) Designed for teachers and education students who wish to learn how to incorporate global affairs more fully into high school curricula. Overview of major topics involving foreign policies and world politics is provided.

PO SC 489, 689 Selected Topics 1-3(1-3,0) Intensive examination of a selected area of political science. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

PO SC H490 Senior Honors Thesis Research 3(3,0) Reading and research related to the senior honors thesis. Preq: Senior standing, membership in Calhoun Honors College, and consent of instructor.

PO SC H491 Senior Honors Thesis 3(3,0) Research and writing of the senior honors thesis. Preq: Senior standing, membership in Calhoun Honors College, and consent of instructor.

PO SC 499 Professional Development in Political Science 1(1,0) Allows students to reflect on their experience as political science majors. Topics include understanding of cross-disciplinary issues, current research in political science, career options, and ethical issues related to the study of political science. To be taken Pass/Fail only. Preq: Senior standing in Political Science.

POLYMER AND FIBER CHEMISTRY

PFC 303 Textile Chemistry 3(3,0) Study of the properties and reactions of aliphatic and aromatic organic compounds. Emphasizes mechanistic interpretations and the development of synthetic schemes leading to multifunctional compounds of the types encountered in the textile industry. Preq: CH 102. Coreq: MTHSC 206 or 207.

PFC 304 Textile Chemistry 3(3,0) Fundamental principles of physical chemistry with emphasis on areas frequently encountered in the textile industry including thermodynamics, kinetics, and solution properties. These concepts are applied to the study of organic compounds and organic reaction mechanisms. Preq: PFC 303.

PFC 305 Textile Chemistry Laboratory 1(0,3) Introduction to techniques used in synthesis and characterization of organic compounds. Coreq: PFC 303.

PFC 306 Textile Chemistry Laboratory 1(0,3) Techniques used in the measurement of the physiochemical properties of polymers and textile chemicals. Coreq: PFC 304.

PFC 405 Principles of Textile Printing 3(2,3) Development of modern textile printing systems is studied. Also examines colloidal requirements of colorants, thicker compositions, rheology of printing pastes, and various physical requirements necessary for a successful printing system in a modern plant. Preq: Consent of instructor.

PFC 406 Textile Finishing—Theory and Practice 3(2,3) Study of the application of chemicals to textile substrates and how they affect the substrate's physical and chemical properties. Emphasizes the theories of chemical modification of textiles as well as the technology of finishing.
PORT 201 Intermediate Portuguese 3(3,0) Intermediate course with more emphasis on communication skills and structure. Reading and writing practice in and outside the classroom, with special attention to idiomatic usage. Introduction to perspectives through readings and cultural activities. Preq: PORT 102 or consent of instructor.

PORT 202 Intermediate Portuguese 3(3,0) Continuation of PORT 201. Preq: PORT 201 or consent of instructor.

PSYCHOLOGY

PSYCH 201, H201 Introduction to Psychology 3(3,0) Introduction to the study of behavior. Analysis of the biological bases of behavior, learning, thinking, motivation, perception, human development, social behavior, and the application of basic principles to more complex phenomena such as education, personal adjustment, and interpersonal relations.

PSYCH 202 Introduction to Psychology Laboratory 1(0,2) Major phenomena and methods of psychology are illustrated and investigated in a series of laboratory modules. Students also explore career options in the behavioral sciences.

PSYCH 250 Pursuing Happiness 3(3,0) Introduces psychological theories and principles used to study human behavior (methods, cognition, motivation, etc.). The concept of happiness is investigated as a psychological construct across cultures. Offered summer session only.

PSYCH 272 Applied Psychology and Transportation 3(3,0) Introduces psychological principles used to study human behavior (methodological, cognitive, perceptual, etc.). These psychological principles, in addition to ethical, legal, and societal perspectives, are applied to transportation issues.

PSYCH 306 Human Sexual Behavior 3(3,0) The subject of sexual behavior is approached from the psychophysiological, behavioral, and cultural points of view. Evolutionary, historical, and cross-cultural perspectives are considered.

PSYCH 309 Introductory Experimental Psychology 4(3,2) Introduction to the analysis of data from experimental and correlational research in psychology. Emphasizes the applications and logical nature of statistical reasoning. Laboratory periods stress the techniques of data analysis using microcomputers. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 310 Advanced Experimental Psychology 4(3,2) Continuation of PSYCH 309. Focus is on techniques of empirical research (experiments, quasi-experiments, survey research, etc.) that are widely used in psychology. Students design and carry out their own empirical research projects. Extensive practice in the writing of reports is included. Preq: PSYCH 201 with a C or better, PSYCH 309, or consent of instructor.

PSYCH 320 Principles of Behavior 3(3,0) Study of basic learning principles including classical conditioning, operant conditioning, and modeling. Initial emphasis is on animal studies followed by human applications and techniques. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 324 Physiological Psychology 3(3,0) Study of human neuroanatomy with emphasis on the function of the nervous and endocrine systems. Discusses the biological basis of behavior in its normal and abnormal dimensions. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 325 Physiological Psychology Laboratory 1(0,2) Demonstrations and techniques of selected physiological procedures are presented to explain the principles discussed in PSYCH 324. Coreq: PSYCH 324.

PSYCH 330 Motivation 3(3,0) Various aspects of motivation are considered by studying physiological, emotional, and environmental influences on behavior. Orientation is empirical rather than theoretical with emphasis on pertinent research, applications, and measurement of motives. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 333 Cognitive Psychology 3(3,0) Study of higher-order mental processing in humans. Topics include memory, learning of concepts, problem solving, and the psychology of language. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 334 Laboratory in Cognitive Psychology 1(0,2) Selected experiments and demonstrations are conducted to reveal phenomena related to human perception, memory, reasoning, problem solving, and high-level mental processes. Preq: PSYCH 201 with a C or better and PSYCH 309, or consent of instructor. Coreq: PSYCH 333.

PSYCH 340, H340 Lifespan Developmental Psychology 3(3,0) Survey of current theory and research concerned with the psychological aspects of human growth and development across the entire lifespan. Major topics include developmental methods, physical maturation, cognition, socialization, personality, psycholinguistics, intelligence, learning, behavior problems, and exceptionality. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 344 Psychology of Adolescence 3(3,0) Study of the psychosocial processes of adolescence. Major emphasis is on personality development, growth of thinking, social and sexual maturation, and variations in adolescence. Preq: PSYCH 201 with a C or better or consent of instructor.
PSYCH 345 Adulthood and Aging 3(3,0) Special consideration of the major psychological processes of aging as they relate to individual behavior and adaptation. Includes the influences of aging on the body, learning and psychomotor skills, thinking and intelligence, employment and productivity, personality, and psychopathology. Opportunity for contact with institutionalized and noninstitutionalized elderly persons is provided. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 352, H352 Social Psychology 3(3,0) Survey course analyzing human social behavior from the perspective of the individual as a participant in social relationships. Major emphasis is on the study of such contemporary social processes as attitude formation and change, interpersonal relations, conformity, conflict resolution, aggression and violence, social communication, and group phenomena. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 355 Environmental Psychology 3(3,0) Considers the influences of the physical environment on human behavior. Topics include perception of and adaptation to the environment, effects of physical design on behavior, and individual reactions to environmental stressors. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH (E L E, PO SC, SOC) 356 Social Science 3(3,0) Covers topics such as personality development and the variety of ways in which psychosocial has been explained, portrayed, and treated over time. Interdisciplinary approach to examining representations of “madness” that shape a culture’s understanding of mental illness and its treatment, including popular culture, art, and literature. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH H385 The Social Construction of Madness 3(3,0) Study of the construct of mental illness and the variety of ways in which psychosocial has been explained, portrayed, and treated over time. Interdisciplinary approach to examining representations of “madness” that shape a culture’s understanding of mental illness and its treatment, including popular culture, art, and literature. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 368 Organizational Psychology 3(3,0) Analysis of individual behavior for the purpose of investigating problems in organizations and increasing organization effectiveness. Topics include psychological factors affecting communication, decision making, conflict, leadership, work stress, power, and organizational change. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 369 Leadership in Organizational Settings 3(3,0) Broad survey of theory and research on leadership in formal organizations. A detailed explanation and critical evaluation of major theories (including participative and charismatic leadership) are bridged with helpful remedies and prescriptions for effective leadership in organizations. Preq: PSYCH 201.

PSYCH 370 Personality 3(3,0) Historical and contemporary views of individual differences in behavior, affect, health, coping, and motivation. Covers topics such as personality development and structure, personality assessment, cross-cultural issues, and applications of personality psychology. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 375 Psychology of Substance Abuse 3(3,0) Study of the psychological approaches to treatment of substance abuse. Topics include behavioral, social learning, and family-systems theories as applied to treating substance abuse. Emphasis is on empirical approaches to evaluating methods of treatment and matching clients to treatments. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH H390 Honors Seminar in Psychology 3(3,0) Variable topic seminar for Honors students from all majors. Topics are announced prior to registration for each semester. May be repeated once for credit, but only if different topics are covered. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 408 Women and Psychology 3(3,0) Explores the wide variety of psychological issues that concern women. Emphasizes empirical research on topics such as motherhood, sex differentiation, motivation, and psychological disorders. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 415 Systems and Theories of Psychology 3(3,0) Study of the development of psychology particularly during the last 100 years. Emphasis is on giving students a better perspective of present-day psychology. Focus is on various approaches taken by influential psychologists and the conflicts among those approaches. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 422 H422 Sensation and Perception 3(3,0) Study of psychophysical techniques of measurement and sensory and perceptual processes related to vision, hearing, and the other senses. Preq: PSYCH 201 with a C or better or consent of instructor.

PSYCH 423 Sensation and Perception Laboratory 1(0,2) Selected experiments are conducted to demonstrate the phenomena involved in sensation and perception. Preq: PSYCH 309 or consent of instructor.

PSYCH 426, 626 Advanced Physiological Psychology 3(3,0) Advanced studies of the biological basis of behavior with emphasis on functional neuroanatomy and endocrinology. Topics may vary. May not be repeated for credit. Preq: PSYCH 324 or consent of instructor.

PSYCH 435 Human Factors Psychology 3(3,0) Analyses of theoretical issues and research methods related to the interaction between people and machines and human performance. Topics include information processing theory, human control systems and displays, task simulation, perceptual and motor factors limiting human performance. Preq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH 443 Infant and Child Development 3(3,0) Cognitive, emotional, and social development from conception through childhood (up to age 12). Major theories and research findings are covered. Preq: PSYCH 201 with a C or better and PSYCH 340, or consent of instructor.

PSYCH 447 Moral Development 3(3,0) Explores the development of moral reasoning, judgment, and character from a descriptive psychological point of view. Examines the theoretical and empirical work of Jean Piaget, Lawrence Kohlberg, and Elliott Turiel as well as prosocial, eudaemonistic, and cross-cultural alternatives to these ideas. Preq: PSYCH 201 with a C or better; PSYCH 340, 344, or 345; or consent of instructor.

PSYCH 454 Psychology of Human Relationships 3(3,0) Research, theory, and their practical applications regarding the development, maintenance, and dissolution of human relationships; understanding successful and unsuccessful relationships. Emphasis is on improving the individual’s ability to relate to other persons both interpersonally and professionally. Preq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH 456 Applied Psychophysiology 3(3,0) Explores the various measures used in psychophysiology to study mind-body interactions. Exposes students to the practice of psychophysiology through an integrated hands-on laboratory experience in which students learn about psychophysiological measures by applying them. Preq: PSYCH 201 or consent of instructor.

PSYCH 459 Group Dynamics 3(3,0) Review of current theory and research on small-group processes with special emphasis given to group formation and development, group structure, the dynamic forces within a group, leadership, and group problem solving and decision making. Preq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH 462, 662 Psychology and Culture 3(3,0) Seminar examining the cultural context in which psychological theories and research are generated and psychological perspectives on human diversity. Topics include the philosophical positions influencing psychological theory and research; methodological issues in the study of diversity, historical and contemporary perspectives; and cross-cultural psychological research in selected content areas. Preq: PSYCH 310 or consent of instructor.

PSYCH 471 Psychological Testing 3(3,0) Introduction to the theory of psychological testing, emphasizing the principles of measurement and psychometric characteristics of a good psychological test. Issues in test development, administration, and interpretation are reviewed. Educational, industrial, and clinical uses of tests are examined. Preq: PSYCH 201 and 309, or consent of instructor.
PSYCH 480, 680 Health Psychology 3(3,0)
Study of the role of health-related behaviors in the prevention, development and/or exacerbation of health problems. Emphasis on the biopsychosocial model and its application in the assessment, treatment, and prevention of health problems. Prereq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH 482 Positive Psychology 3(3,0) Examines the research, theories, and applications of the psychology of human strengths and well-being. Fundamental research into the cultural, emotional, personality, cognitive/motivational, and developmental correlates of strengths and well-being is examined, as well as application of these principles to a variety of organizational settings. Prereq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH 483, H483, 683 Abnormal Psychology 3(3,0) Introduction to the diagnosis and treatment of mental illnesses. Uses current diagnostic standards for mental disorders as a framework for understanding the symptoms, causes, and treatments of the most commonly observed maladaptive behaviors. Prereq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH 488 Theories of Psychotherapy 3(3,0)
Survey of alternative theories of psychological treatment for behavioral and emotional disorders. Various theoretical assumptions, techniques, and applications of each approach are examined and compared, and case examples are considered. Prereq: PSYCH 370 or 483 or consent of instructor.

PSYCH 489, 689 Selected Topics 3(3,0) Seminar in current topics in psychology. Topics change from semester to semester and are announced prior to each semester's registration. May be repeated once for credit, but only if different topics are covered. Prereq: PSYCH 201 with a C or better and one 300-level PSYCH course, or consent of instructor.

PSYCH H490 Senior Division Honors Research 12-4(2-4,0) Preparation and defense of a research proposal. Project should be empirical, historical, or theoretical in nature. Prereq: Junior standing, consent of department chair.

PSYCH H491 Senior Division Honors Research II 2-4(2-4,0) Completion of the proposed research project resulting in a written thesis. Prereq: PSYCH H490.

PSYCH 492 Senior Laboratory in Psychology 10(0,2) Students complete an integrative review of topics in psychology in the context of producing a reflective portfolio. Prereq: Senior standing in Psychology.

PSYCH 493 Practicum in Clinical Psychology 3(1,5) Students apply classroom theory in solving individual and community problems through interaction with community agencies and other professional groups in the mental health area. Students have limited but well-controlled contact with actual clinical problems as they occur in the community environment. Prereq: PSYCH 483 and consent of instructor.

PSYCH 495 Practicum in Applied Psychology 3(1,5) Students are provided practical experience in the area of applied psychology. Students usually are involved in a project designed to help solve an industrial problem through a direct application of industrial or social psychology. Prereq: PSYCH 352 or 364 or 454; consent of instructor.

PSYCH 496 Laboratory in Psychology 1-3(0,2-6) Laboratory in a variety of topics in psychology such as human factors psychology and psychological testing. May be repeated for a maximum of three credits. Prereq: PSYCH 201 with a C or better, PSYCH 309, 310; or consent of instructor.

PSYCH 497, H497 Directed Studies in Psychology 1-4(0,2-8) Study under the direction of a faculty member of a particular topic agreed upon by the student and faculty member. May be repeated for a maximum of 12 credits. Prereq: Six credits in psychology, a course in research methods, and consent of the instructor.

PSYCH 498, H498 Team-Based Research 1-4(1-4) Students conduct psychological research and learn about phases of the research process with a team of their peers under the direction of a faculty member. The collaborative nature of psychological research is emphasized. May be repeated for a maximum of 18 credits. Prereq: Consent of instructor.

READING
Professors: L. B. Gambrell, V. G. Gillis; Associate Professors: P. J. Dostall, S. L. Biller; Assistant Professor: J. C. McBrade; Instructor: M. A. McBride

READ 103 Learning Strategies 2(3,0) Students learn strategies of active learning and critical thinking skills which become an integral part of their mental thinking processes. Students learn how to generalize and apply newly acquired strategies to a variety of settings and situations.

READ 458 Early Literacy: From Birth to Kindergarten 3(3,0) Provides Early Childhood Education majors with knowledge of theory and research-based, developmentally appropriate instructional practices related to children's literacy development within the home and school from birth to kindergarten. Factors related to assessment and communication within and between the family, school, and teacher are addressed. Prereq: Admission to the professional level.

READ 459, H459 Teaching Reading in the Early Grades: K–3 3(3,0) Provides early childhood and Elementary Education majors an understanding of teaching reading in the elementary school setting in kindergarten through third grade. Students investigate general principles of language and literacy development and learn methods for teaching and assessing children's literacy. Prereq: ED EC 336, ED F 301, 302; admission to the professional level. Coreq: ED EC 400 for Early Childhood majors.

READ 460, H460 Teaching Reading in the Elementary Grades: 2–6 3(3,0) Provides preservice teachers with an understanding of teaching reading in the elementary setting in grades 2–6. Students investigate general principles of language and literacy development and learn methods for teaching and assessing children's literacy. Prereq: ED F 301, 302, 334; admission to the professional level.

READ 461 Content Area Reading: Grades 2–6 3(2,3) Provides preservice teachers with an understanding of teaching content area literacy in grades 2–6. Students learn methods and strategies for teaching children to learn with and make use of expository texts. Emphasis on the role of expository texts, and vocabulary learning in content areas are presented. Prereq: READ 460, admission to the professional level. Coreq: ED EL 451, 487, 488 (for Elementary Education majors).

READ 498, H498 Secondary Content Area Reading 3(2,2) Designed for preservice teachers who are involved with field experiences prior to student teaching full time. Prepares content area teachers to teach the reading skills necessary for effective teaching of content area material. Prereq: Admission to professional level.

RELIGION
Professors: S. E. Grosby, N. A. Hardesty; Lecturer: C. Shasko-Robinson

REL 101 Introduction to Religion 3(3,0) Study of the variety of religious experience and expression in human life.

REL 102, H102 World Religions 3(3,0) Survey of major religious traditions of the world.

REL 301 The Old Testament 3(3,0) Survey of the books of the Old Testament with special consideration given to the development of the concepts, institutions, and theology of the ancient Hebrews.

REL 302 Survey of New Testament Literature 3(3,0) Study of the books of the New Testament from the standpoint of their occasion, content, literary form, and basic theology.

REL 306 Judaism 3(3,0) Examines the development of Judaism from Biblical to modern times.

REL 307 The Christian Tradition 3(3,0) Examination of the development of Christianity in Western civilization from the post-New Testament period to the present, stressing institutional growth and changes, theological currents, and interaction of Christianity with culture.

REL 308 Religions of the Ancient World 3(3,0) Selected religious movements in ancient Mesopotamia, Egypt, Canaan, and the Greco-Roman world with emphasis on movements outside the Judeo-Christian tradition.

REL 310 Religion in the United States 3(3,0) Development of religion in the U.S. from the Colonial period to the 20th century. Attention is devoted to analyzing broad currents in religious movements and religious thought which have given shape to the American pluralistic experience.
REL 311 African American Religion 3(3,0)
Study of the religious milieu in the U.S. rooted in our African heritage. Background on African tribal religion is included, along with Christian denominations and new religions such as Nation of Islam, Rastafarianism, Voudun, Santeria, and Candomble.

REL 314 Buddhism in China 3(3,0)
Study of Buddhism in Chinese history since the second century. Examination of the translation and interpretation of the texts, major Chinese Buddhist schools, monastic life, and the comprehensive influence of Buddhism on Chinese culture and society. All readings and discussions are in English.

REL 330 Contemporary Issues in Religion 3(3,0)
Examination of a variety of issues of broad concern to scholars of religion today. Issues may vary. May be repeated for a maximum of six credits with departmental consent.

REL (PHIL) 393 Science and Religion 3(3,0)
Exploration and analysis of the conceptual and historical relationship between science and religion. Examination and evaluation of the theoretical claims of science and the metaphysical claims of religion.

REL 401, 601 Studies in Biblical Literature and Religion 3(3,0)
Critical examination of a selected topic in biblical studies. Topics vary from year to year. May be repeated once for credit. Preq: Consent of instructor.

REL 402, 602 Studies in Religion 3(3,0)
Thorough examination of a selected topic in one or more of the religious traditions of the world or of religious life in a particular region. Topics vary from year to year. May be repeated once for credit. Preq: Consent of instructor.

REL 404, 604 History of Early Christianity 3(3,0)
Study of the history, social and doctrinal, of early Christianity up to 600 A.D. Preq: Consent of instructor.

REL 435, 635 Religious Institutions in Community Life 3(3,0)
Explores the particular significance of religious organizations as core institutions in American communities and examines their involvement with community political and social structures.

REL H497 Religion Honors Research 3(3,0)
Students conduct research, clearly define the topic, and complete an annotated bibliography under the supervision of a thesis advisor. Preq: Consent of department chair and thesis advisor.

REL H498 Religion Honors Thesis 3(3,0)
In consultation with a thesis advisor and departmental thesis committee, students write, revise, defend, and complete their theses. Preq: REL H497 and consent of department chair and thesis advisor.

REL 499 Independent Study 1-3(1-3,0)
Study of selected problems, issues, or movements in religion under the direction of a faculty member chosen by the student. Student and faculty member develop an individualized course of study approved by the department chair prior to registration. May be repeated for a maximum of six credits. Preq: Consent of instructor.

RUSS 305 Russian Conversation and Composition 3(3,0)
Practice in spoken Russian emphasizing vocabulary building, pronunciation, and comprehension. Written exercises promote accuracy. Preq: RUSS 202 or consent of department chair.

RUSS 307 Russian Civilization 3(3,0)
Introduction to significant elements of Russian civilization. Emphasis is on social, geographical, political, and artistic aspects of modern Russia. Taught in Russian. Preq: RUSS 202 or consent of department chair.

RUSS 340 Russian Culture of the Nineteenth Century 3(3,0)
Study of achievements in art, science, music, and literature in Russia during the 19th century. Taught in Russian.

RUSS 360 Russian Literature to 1910 3(3,0)
Study of key texts in the modern literary tradition in Imperial Russia from Pushkin to Chekhov. Readings and lectures are in Russian.

RUSS 361 Russian Literature Since 1910 3(3,0)
Study of key texts in modern Russian and Soviet literature with particular focus on Russian modernist movements and Socialist Realism. Readings and lectures are in Russian.

RUSS 397 Creative Inquiry—Russian 1-4(1-4,0)
Students focus on a special research area under the guidance of a faculty member. After acquiring the requisite background, students formulate hypotheses for a group project, develop a critical framework, and initiate research on a specific topic.

RUSS 398 Directed Reading 1-3(1-3,0)
Directed study of selected works in Russian. May be repeated for a total of six credits. Preq: RUSS 202 or equivalent and consent of department chair.

RUSS 460 Tolstoy and Dostoevsky 3(3,0)
Examines a selection of major works by Leo Tolstoy and Fyodor Dostoevsky with particular focus on their literary, political, and philosophical aspects as well as their importance within the modern European literary tradition. Readings and lectures are in English. Preq: Junior standing or consent of instructor.

RUSS 497 Creative Inquiry—Russian 1-4(1-4,0)
Continuation of research initiated in RUSS 397. Students complete their project and disseminate their research results. Preq: RUSS 397 or consent of instructor.

SCIENCE AND TECHNOLOGY IN SOCIETY

S T S 101 Survey of Science and Technology in Society 3(3,0)
Surveys historical, philosophical, and social studies of science; introduces the basic requisites for scientific and technological literacy; and considers the problems of responsible participation in a scientifically and technologically advanced society.

S T S 102 Ideas, Machinery, and Society 3(3,0)
Interdisciplinary discussion course introducing the fundamental themes of STS: the influence of social groups on the development of science and technology and the effects of science and technology on society.
ST S 171 Scientific Skepticism 3(3,0) Investigation of unusual phenomena using scientific methodology. Explores the interplay of science, pseudoscience, and society through development of critical thinking skills. Discussion-oriented course that focuses on case studies of extraordinary claims.

ST S 216 Critical Analysis of a Current STS Issue 3(3,0) Critical analysis of a current science and technology issue with significant controversial and societal consequences (e.g., global warming, methods of energy production). Students retrieve, analyze, evaluate, present, and discuss relevant information to develop basic competence in science and mathematics and in the evaluation of scientific and technological issues. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Sophomore standing.

ST S 301 Science in Context 3(3,0) Develops an understanding of the social character of scientific activity. Through the study of current work by leading historians, sociologists, and philosophers of science, students develop a comprehensive grasp of the social foundations of modern scientific inquiry.

ST S 498, H498 Creative Inquiry 1-3(1-3,0) Students conduct research into Science and Technology in Society with a team of their peers under the direction of a faculty member. The collaborative character of research in science and technology in society is emphasized. Prereq: May be repeated for a maximum 12 credits.

ST S 499 Independent Study 1-3(1-3,0) Study of selected topics under direction of a faculty member selected by the student. Prereq: Student and faculty member develop a course of study designed for the individual student and approved by the ST S program coordinator prior to registration. May be repeated for a maximum of six credits. Prereq: General Education Science and Technology in Society Requirement, consent of instructor.

SECONDARY EDUCATION

EDSEC 324 Practicum in Secondary English 3(1,3) Pre-service secondary English teachers gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service high English teachers.

EDSEC 326 Practicum in Secondary Mathematics 3(1,3) Pre-service secondary mathematics teachers gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service high school mathematics teachers.

EDSEC 327 Practicum in Secondary Science 3(1,3) Pre-service secondary science teachers gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service high school science teachers.

EDSEC 328 Practicum in Secondary Social Studies 3(1,3) Pre-service secondary social studies teachers gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service high school social studies teachers.

EDSEC 412 Directed Student Teaching in Secondary School 12(1,33) Program of supervised observation and teaching in cooperation with selected public schools. Opportunities are provided for prospective teachers to observe and participate in daily classroom practice. May be repeated for a maximum of 12 credits. To be taken Pass/Fail only. Prereq: ED F 301, 302, 335, READ 498, and one of the following: EDSEC 424, 425, 426, 427. Application approved by the School of Education.

EDSEC 424, H424 Teaching Secondary English 3(2,2) Development of instructional practices and materials appropriate for secondary English. Students gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service English teachers. Prereq: Sophomore standing, admission to the professional level, ED F 301, 302, 335, at least 18 hours of English coursework, concurrent enrollment in READ 498, minimum grade-point ratio of 2.5.

EDSEC 425 Teaching Secondary Modern Languages 3(2,2) Development of instructional practices and materials appropriate for secondary modern languages. Students gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service modern language teachers. Prereq: Sophomore standing, admission to the professional level, ED F 301, 302, 335, at least 18 hours of modern language coursework, concurrent enrollment in READ 498, minimum grade-point ratio of 2.5.

EDSEC 426, H426 Teaching Secondary Mathematics 3(2,2) Development of instructional practices and materials appropriate for secondary mathematics. Students gain both content and pedagogical knowledge by observing and reflecting upon the classroom practices of selected in-service mathematics teachers. Prereq: Sophomore standing, admission to the professional level, ED F 301, 302, 335, at least 18 hours of mathematics coursework, concurrent enrollment in READ 498, minimum grade-point ratio of 2.5.

EDSEC 427, H427 Teaching Secondary Science 3(2,2) Development of instructional practices and materials for teaching secondary school science (biological, earth, and physical sciences); familiarization with secondary science curriculum materials; includes field experiences in local schools. Prereq: Sophomore standing admission to the professional level, ED F 301, 302, 335, at least 18 hours of science coursework, concurrent enrollment in READ 498, minimum grade-point ratio of 2.5.

EDSEC 428, H428 Teaching Secondary Social Studies 3(2,2) Development of instructional practices and materials appropriate for secondary social studies; familiarization with curriculum materials; includes field experiences in local schools in preparation for student teaching. Taught fall semester only. Prereq: Second semester Junior standing, admission to the professional level, ED F 301, 302, 335, at least 18 credits of social studies coursework, passing score on South Carolina social studies content knowledge exam, concurrent enrollment in READ 498.

EDSEC 437, 637 Technology in Secondary Mathematics 3(3,0) Students learn how to integrate calculators, data collectors, and computers in the secondary mathematics curriculum. They solve problems from middle school, Algebra I, Geometry, and Algebra II courses. Prereq: Second semester Junior standing, admission to the professional level.

EDSEC 444 Teaching Internship in Secondary English 9(0,27) Interns design, implement, and critically reflect upon instructional units and teaching practices in supervised secondary English classes. Interns must provide evidence of performance that meets national and state teaching standards for secondary English. Taught spring semester only. Prereq: EDSEC 424. Coreq: EDSEC 454.

EDSEC 454 Secondary English Capstone Seminar 3(2,3) Seminar in conjunction with EDSEC 444. Interns reflect upon and solve problems regarding teaching events, share effective teaching practices, and devise ways to document dimensions of effective teaching. Taught spring semester only. Prereq: EDSEC 424. Coreq: EDSEC 444.

Alfred, Sherri Terese, Lecturer, English. BA, University of North Carolina-Charlotte, 1991; MA, Clemson University, 2007
Alspach, Arlyse E., Lecturer, Communication Studies. BA, Winthrop University, 2003; MAPC, Clemson University, 2006
Amerson, Roxanne, Lecturer, School of Nursing. BS, Regents College, 1995; MSN, Clarkson College, 1999
Amirkhianian, Serji N., Mays Professor of Transportation, Civil Engineering, BS, 1979, MS, 1981, Tennessee Technological University; PhD, Clemson University, 1987
An, Yanning, Associate Professor, Languages: Associate Professor, Philosophy and Religion. BA, 1982, MA, 1985, Fudan University of Shanghai (China); PhD, University of Michigan, 1997
An, Yuehui, Adjunct Associate Professor, Bioengineering. MD, Harbin Medical University (China), 1983; MM, Beijing Medical University (China), 1986
Andersen, Charles B., Adjunct Associate Professor, School of the Environment. BS, Texas A&M University, 1979; MS, Miami University, 1988; PhD, Syracuse University, 1990
Andersen, Daniel Morgan, Lecturer, Parks, Recreation, and Tourism Management. BS, Western Illinois University, 1997
Andersen, David P., Adjunct Professor, Chemical and Bio-molecular Engineering. BA, Clemson University, 1973; MS, 1977, PhD, 1981, University of Massachusetts
Andersen, Denise Marie, Assistant Professor, Parks, Recreation, and Tourism Management. BA, Wesleyan University, 1992; MA, Eastern Illinois University, 1993; PhD, University of Illinois-Champaign, 2000
Andersen, Paul Christopher, Associate Professor, History. BA, University of North Carolina, 1990; MA, 1994, PhD, 1998, University of Minnesota
Andrei, John J., Assistant Professor, Entomology, Soils, Plant Sciences; Assistant Professor, Animal and Veterinary Sciences. BA, Texas A&M University, 1993; MS, Oklahoma State University, 1995; PhD, University of Idaho, 1999
Andrews, John R., Jr., Associate Professor, History, BA, University of North Carolina, 1987; MA, Clemson University, 1993; PhD, University of Georgia, 1997
Andreas, Ronald D., Associate Professor, Civil Engineering. BS, 1983, MS, 1986, Brigham Young University; PhD, University of Texas, 1994
Angstadt, David C., Assistant Professor, Mechanical Engineering. BS, 1987, MS, 2001, PhD, 2004, Lehigh University
Appling, Jeffrey R., Associate Dean for Curriculum, Undergraduate Studies; Associate Professor, Chemistry. BS, 1980, PhD, 1985, Georgia Institute of Technology
Araujo, Yuji, Assistant Professor, Entomology, Soils, and Plant Sciences. BA, University of California-Davis, 1996; PhD, University of Delaware, 2002
Arthur-Banning, Skye Gerald, Assistant Professor, Parks, Recreation, and Tourism Management. BS, Brock University (Canada), 1997; MS, Oregon State University, 1999; PhD, University of Utah, 2003
Arya, Dev Priya, Associate Professor, Chemistry. BS, University of Delhi (India); 1996; PhD, Northeastern University, 1996
Ashon, Susanna M., Assistant Professor, English. BA, Vassar College, 1989; MA, 1993, PhD, 1998, University of Iowa
Askew, George R., Director, Belle W. Baruch Institute of Coastal Ecology and Forest Science; Professor, Forestry and Natural Resources. BS, 1976, MS, 1978, PhD, 1981, Clemson University
Athans, Andreas J., Visiting Assistant Professor, Chemistry. BS, 2001, PhD, 2007, University of New Hampshire
Aue, Alexander, Assistant Professor, Mathematical Sciences. BS, Universität Marburg (Germany), 2000; PhD, Universität zu Köln (Germany), 2004
Austin, Eric M., Senior Lecturer, Mechanical Engineering. BS, 1980, MS, 1982, University of Illinois-Urbana-Champaign; PhD, Virginia Polytechnic Institute and State University, 1998
Ayaw, Beshawri, Assistant Professor, Mechanical Engineering. BS, Addis Ababa University (Ethiopia), 1997; MS, 2000, PhD, 2005, Pennsylvania State University
Aziz, Nadim M., Department Chair and Professor, Civil Engineering. BSCE, 1978, MS, 1980, PhD, 1984, University of Mississippi
Backman, Kenneth E., Associate Professor, Parks, Recreation, and Tourism Management. BS, Acadia University (Canada), 1980; MUP, 1985, PhD, 1989, Texas A&M University
Backman, Sheila J., Professor, Parks, Recreation, and Tourism Management. BSC, 1977, MR, 1979, Acadia University (Canada); PhD, Texas A&M University, 1988
Bazwell, Christopher E., Adjunct Assistant Professor, School of the Environment. BS, 1995, PhD, 2001, University of South Carolina
Belytschky, Natalia F., Adjunct Assistant Professor, Bioengineering. BS, Politechnica University of Bucharest (Romania), 1997; PhD, Clemson University, 1996
Bair, Scott L., Associate Professor, Economics. BS, 1988, MA, 1991, Bowling Green State University; PhD, Michigan State University, 1996
Bailey, Beatrice Naft, Professor, Teacher Education. BA, Longwood College, 1978; MA, Bethany Theological Seminary, 1981; EdD, Virginia Polytechnic Institute and State University, 1987
Bain, Lisa J., Associate Professor, Biological Sciences. BS, University of Georgia, 1992; PhD, North Carolina State University, 1997
Baird, William V., Alumni Distinguished Professor, Horticulture. BS, Oregon State University, 1976; MA, Miami University, 1979; PhD, University of Virginia, 1983
Baker, Thomas L., Associate Professor, Marketing. BBA, 1984, MPA, 1986, University of Kentucky; PhD, Florida State University, 1992
Balakrishnan, Nagaraj, Department Chair and Professor, Management. BE, University of Madras (India), 1981; MS, University of Kentucky, 1983; PhD, Purdue University, 1987
Baldwin, Anna Oakley, Lecturer, Teacher Education. BA, Winthrop University, 1987; MEd, Clemson University, 1989
Baldwin, Elizabeth Dennis, Assistant Professor, Parks, Recreation, and Tourism Management. BA, Hollins College, 1989; MEn, Miami University, 1992; PhD, University of Maine, 2006
Baldwin, William S., Associate Professor, Biological Sciences. BS, Central Michigan University, 1989; PhD, North Carolina State University, 1995
Ballard, Robert E., Professor, Biological Sciences. BS, 1966, MA, 1968, Miami University; PhD, University of Iowa, 1975
Ballato, John M., Professor, Materials Science and Engineering. BS, 1993, MS, 1995, PhD, 1997, Rutgers University, 1992
Banks, Scott A., Adjunct Assistant Professor, Bioengineering. BS, 1985, MS, 1988, Case Western Reserve University; PhD, Massachusetts Institute of Technology, 1992
Bao, Hua, Adjunct Professor, Materials Science and Engineering. BS, 1984, MS, 1989, Tianjin University (China); PhD, East China University of Science and Technology (China), 1995
Faculty

Barnholdt, Hanna, Assistant Professor, Planning and Landscape Architecture. B.L.A., 1991, MLA, 1996, Technical University of Berlin (Germany)

Boswell, William W. IV, Associate Professor, Forestry and Natural Resources. B.A., Western Michigan University, 1985; M.A., Northern Michigan University, 1991; Ph.D., Michigan State University, 1993

Bowers, Peggy J., Assistant Professor, Communication Studies. B.S., 1984, M.A., 1989, Wichita State University; Ph.D., Stanford University, 1998

Bowman, David R., Lecturer, Engineering and Science Education. B.S., 2004, M.S., 2006, Clemson University

Bowman, Larry S., Adjunct Professor, Bioengineering. B.A., Western Virginia University, 1969; M.S., Clemson University, 1971; M.D., Medical University of South Carolina, 1974

Boyd, Karen Denise, Lecturer, Leadership, Counselor Education, Human and Organizational Development. B.A.S., University of North Carolina, 1983; M.A., Appalachian State University, 1990

Bradley, Daniel J., Assistant Professor, Finance. B.A., 1996, MBA, 1997, University of Central Florida; Ph.D., University of Kentucky, 2001

Bradshaw, Amy D., Adjunct Assistant Professor, Bioengineering. B.A., University of California-San Diego, 1986; Ph.D., University of California-Santa Barbara, 1995

Brame, Scott E., Research Assistant Professor, School of the Environment. B.S., New Mexico Institute of Mining and Technology, 1983; M.S., Clemson University, 1993

Brandon, Steven C., Lecturer, Engineering and Science Education. B.S., 1983, M.S., 1989, Ph.D., 2005, Clemson University

Brannan, James R., Professor, Mathematical Sciences. B.S., 1973, M.S., 1976, Utah State University; Ph.D., Rensselaer Polytechnic Institute, 1979

Breden, Gregory, Assistant Professor, Public Health Sciences. B.A., Emory University, 1989; M.P.H., University of Washington-Seattle, 1998; Ph.D., Johns Hopkins University, 2005

Breden, James, Adjunct Assistant Professor, College of Architecture, Arts, and Humanities. Ph.D., Tulane University, 1967

Bregger, Louis D., Adjunct Instructor, Biological Sciences. M.A., University of Wisconsin-Madison, 1970

Brekke, Philip J., Lecturer, Parks, Recreation, and Tourism Management. B.S., University of Texas, 2004; M.S., Clemson University, 2007

Brigmon, Robin L., Adjunct Associate Professor, School of the Environment. B.S., 1979, M.S., 1987, Ph.D., 1992, University of Florida

Britt, Thomas W., Jr., Professor, Psychology, B.A., College of William and Mary, 1988; M.A., Wake Forest University, 1990; Ph.D., University of Florida, 1994

Brittain, Sean D., Assistant Professor, Physics and Astronomy. B.S., Le Tourneau University, 1997; M.S., 2002, Ph.D., 2004, University of Notre Dame

Britz, Margaret T., Associate Professor, Sociology. B.S., Jacksonville State University, 1989; M.S., 1992, Ph.D., 1994, Michigan State University

Britzke, Eric Robert, Adjunct Assistant Professor, Forestry and Natural Resources. B.S., 1994, M.S., Southwest Missouri State University; Ph.D., Tennessee Technological University, 2003

Broderick, John Scott, Adjunct Assistant Professor, Bioengineering. B.S., Furman University, 1988; M.D., Vanderbilt University, 1992

Bronikowski, Michael G., Adjunct Assistant Professor, School of the Environment. B.S., Marquette University, 1984; Ph.D., Purdue University, 1994

Brooks, James Reed, Adjunct Professor, Animal and Veterinary Sciences. B.S., Ohio State University, 1981, M.S., 1984, Clemson University

Brooks, Richard R., Associate Professor, Electrical and Computer Engineering. B.A., Johns Hopkins University, 1979; Ph.D., Louisiana State University and Agricultural and Mechanical College, 1989

Broosn, Denis A., Adjunct Professor, Center: Professor, Materials Science and Engineering. B.S., 1967, M.S., 1968, Clemson University; Ph.D., Iowa State University, 1972

Brothers, Thomas E., Adjunct Professor, Bioengineering. B.S., Kennesaw College, 1979; M.D., University of Michigan, 1980

Browdy, Gerie L., Adjunct Professor, Biological Sciences. B.A., 1980, B.S., 1981, University of Maryland; Ph.D., University of Denver, 1994

Brown, Brice Lyrl, Assistant Professor, Forestry and Natural Resources. B.S., University of North Carolina, 1992; M.S., Appalachian State University, 1999; Ph.D., Dartmouth College, 2004

Brown, Jason Stratford, Visiting Lecturer, Physics and Astronomy. B.S., University of Illinois-Urbana-Champaign, 1993; M.S., 1996, Ph.D., 1999, Clemson University

Brown, Philip J., Assistant Professor, Materials Science and Engineering. B.S., 1987, Ph.D., 1991, University of Arkansas (Little Rock), 1999

Brown-Faust, James E., Assistant Professor, Horticulture. B.S., Murray State College, 1986; M.S., 1992, Ph.D., 1994, Michigan State University

Bruce, David A., Associate Professor, Chemical and Bio molecular Engineering. B.S., 1991, M.S., 1992, Ph.D., 1994, Georgia Institute of Technology

Bruhn, Robert A., Lecturer, School of Architecture. B.S., Clemson University, 1985; M.Arch, Georgia Institute of Technology, 1988

Brunaghim, Julia, Assistant Professor, Chemistry. A.B., Harvard University, 1994; Ph.D., University of Illinois-Urbana-Champaign, 1999

Brun, David E., Charles C. Newman Endowed Chair of Natural Resources and Professor, Agricultural and Biological Engineering. B.S., 1974, M.S., 1975, Ph.D., 1978, University of Missouri

Bruner, Richard H., Adjunct Professor, Animal and Veterinary Sciences. B.S., Clemson University, 1974; D.V.M., University of Georgia, 1967

Bryant, Anthony Paul, Assistant Professor, Aerospace Studies; Captain, U.S. Air Force. B.S., University of Maryland, 2003; M.S., Troy State University, 2005

Burfitt, Dennis E., Adjunct Professor, Agricultural and Biological Engineering. B.S., 1966, M.S., 1967, Pennsylvania State University; Ph.D., University of Minnesota-Twin Cities, 1971

Bundrick, Alfred E., Adjunct Associate Professor, Applied Economics and Statistics. B.S., 1985, M.S., 1988, Clemson University

Burati, James L., Jr., Professor, Civil Engineering. B.S., Virginia Polytechnic Institute and State University, 1974; M.S., Ohio State University, 1975; Ph.D., Pennsylvania State University, 1984

Burg, Karen J., Professor, Environmental Engineering. B.S., 1990, M.S., 1992, North Carolina State University; Ph.D., Clemson University, 1996

Burg, Timothy C., Assistant Professor, Electrical and Computer Engineering. B.S., University of Cincinnati, 1988; MS, 1990, Ph.D., 1996, Clemson University

Burgett, Frederick J., Lecturer, Mathematical Sciences. B.S., 1969, B.S., 1979, Eastern Illinois University; M.Ed., Clemson University, 1995

Burnett, Karen G., Adjunct Assistant Professor, Biological Sciences. B.S., University of California-San Diego, 1978

Burns, Alan C., Associate Librarian, University Libraries. B.A., Weber State University, 1994; MLS, Indiana University-Bloomington, 1996; MA, Indiana University-Purdue University-Indianapolis, 1996

Burns, James W., Adjunct Assistant Professor, Bioengineering. B.S., Purdue University, 1977; M.S., 1981, Ph.D., 1984, University of Illinois

Burns, Sarah B., Adjunct Professor, Agricultural and Biological Engineering. B.S., 1980, M.Ed., 1994, Clemson University

Burroughs, Jill K., Director, Small Business Development Center; Lecturer, Economics. B.S./B.A., Winthrop-University, 1981; M.SIM, Clemson University

Burton, O’Neil B., III, Associate Director, Cooperative Education Program; Lecturer, Leadership, Counselor Education, Human and Organizational Development. B.S., University of South Carolina, 1989; M.A., 1991, Ph.D., 2000, Clemson University

Bushnell, Cameron Fae, Assistant Professor, English. B.S., Montana State University-Bozeman, 1975; MA, 1992, MA, 2001, University of Maryland

Butler, Chalmers M., Alumni Distinguished Professor, Electrical and Computer Engineering. B.S., 1957, MS, 1959, Clemson University; Ph.D., University of Wisconsin, 1962

Buser, Paul L., Associate Professor, Performing Arts; Director of Percussion; Director of Music. B.S., Ball State University, 1992; MM, 1994, DMA, 1999, University of Arizona

Byrne, Leonard R., Adjunct Lecturer, Packaging Science. B.S., Providence College, 1966; MBA, Saint John’s University, 1969

Cahal, Joseph, Adjunct Professor, School of Architecture; Professor, Planning and Landscape Architecture. B.Arch, Clemson University, 1967; M.C.D., University of Liverpool (England), 1971; AIA, APA

Cable-Dunlap, Paula, Adjunct Professor, Chemistry. B.S., Western Carolina University, 1988; Ph.D., Clemson University, 1995
Collins, Edward R., Jr., Associate Professor, Electrical and Computer Engineering. BS, North Carolina State University, 1994; PhD, Georgia Institute of Technology, 1998.

Collins, Jennifer Lauren, Lecturer, English. BA, Shenandoah University, 2003; MA, Clemson University, 2006.

Collins, Julianne S., Adjunct Assistant Professor, Genet- ics and Biochemistry. BS, California State Polytechnic University-Pomona, 1992; MS, Texas A&M University, 1994; PhD, University of Alabama-Birmingham, 2000.

Colthorpe, Christopher A., Associate Librarian, University Libraries. BA, 1973, MA, 1974, York University (Canada); MA, Western Carolina University, 1976; MLS, University of South Carolina, 1999.

Condrasky, Margaret D., Assistant Professor, Food Science and Human Nutrition. BS, Pennsylvania State University, 1977; MS, Indiana University of Pennsylvania, 1983; EdD, Clemson University, 1993.

Connell, John W., Adjunct Assistant Professor, Chem- istry. BS, 1982, PhD, 1986, Virginia Commonwealth University.

Costello, Gerald E., Associate Professor, Public Health Sciences. BS, Wake Forest University, 1967; MAEd, East Carolina University, 1968; EdD, Temple Uni- versity, 1974.

Costello, Judith Elaine, Lecturer, Mathematical Sciences. BS, Northeast Louisiana University, 1987; MS, 1989, PhD, 1993, Clemson University.

Courir, Nicole Gisele, Research Associate, Mechanical Engineering. DSc, pier et Marie Curie University (France), 1980.

Cowden, Ashley S., Lecturer, English. BS, 2000, MA, 2003, Clemson University.

Cox, Christopher L., Professor, Mathematical Sciences. BS, Grove City College, 1978; MS, 1980, PhD, 1984, Carnegie Mellon University.

Cox, Kern T., Lecturer, Graphic Communications. BS, 1997, MinEd, 1999, Clemson University.

Cox, Silas K., Jr., Adjunct Assistant Professor, Forestry and Natural Resources. BS, 1977, MF, 1985, Clemson University.

Craig, Janet B., Assistant Professor, School of Nursing. BS, 1964, MSN, 1966, Duke University; MBA, Georgia State University, 1997; DHA, Medical University of South Carolina, 2002.

Craig, Lynn G., Professor, School of Architecture. BS, Clemson University, 1967; MArch, Washington University, 1969; AIA, RIBA, APA.

Craig, Starlett R., Director, Outreach and Enrichment, Lecturer, Sociology. BA, Spelman College, 1969; MEd, Bryn Mawr College, 1971.

Crandall, Lee Alden, Department Chair and Professor, Public Health Sciences. BA, Bashar University-New York, 1969; BS, 1973, PhD, 1976, Purdue University.

Creager, Karen A., Lecturer in Chemistry. BSE, University of Michigan, 1983; PhD, University of North Carolina, 1989.

Creager, Stephen E., Department Chair and Professor, Chemistry. BS, Rensselaer Polytechnic Institute, 1982; PhD, University of North Carolina, 1987.

Creager, James D., Librarian, University Libraries. BA, Cleve- land State University, 1979; MA, MLS, Case Western Reserve University, 1982.

Creasy, James Philip, Vice Provost for International Affairs. BS, University of Vermont, 1981; PhD, Graduate Institute for International Studies (Switzerland), 1988.

Crosson, Matthew D., Assistant Professor, Political Science. BS, Colgate University, 1993; MA, University of London (England), 1994; PhD, Brown University, 2003.

Csernak, Stephen F., Lecturer, Civil Engineering. BS, 1974, MS, 1976, Clemson University.

Cuberes, David, Assistant Professor, Economics. BA, Universitat Pompeu Fabra (Spain), 1998; MA, CEMFI (Spain), 2000; MA, 2001, PhD, 2005, University of Chicago.

Culkin, Joseph D., Department Chair and Professor, Environ- ment, Soil, and Plant Sciences. BA, Eastern College, 1975; MS, University of Delaware, 1977; PhD, University of Kentucky, 1981.

Cummings, John R., Senior Lecturer, Biological Sciences. BS, 1983, MS, 1988, Bowling Green State University.

Davis, Alexis Zachary, Lecturer, Communication Studies. BA, Clemson University, 2002; MA, Auburn University, 2005.

Davis, Betsy K., Adjunct Associate Professor, Bioengineering. BS, Wofford College, 1983; DMD, Medical University of South Carolina, 1987; MS, University of Iowa, 1989.

Davis, Cynthia Anne, Lecturer, Mathematical Sciences. BS, University of South Carolina, 1992; MS, Clemson University, 1996.

Davis, James R., Adjunct Assistant Professor, Forestry and Natural Resources. BS, University of Georgia, 1977; MS, 1984, PhD, 1992, Clemson University.

Davis, Jeanine M., Adjunct Associate Professor, Horticult- ure. BS, Delaware Valley College, 1980; MS, Washing- ton State University, 1983; PhD, North Carolina State University, 1987.

Davis, Roy B., Adjunct Professor, Bioengineering. BS, 1977, MS, 1979, PhD, 1983, Virginia Polytechnic Institute and State University.

Davis, Stephanie Clark, Assistant Professor, School of Nursing. BS, Armstrong Atlantic State University, 1998; MS, Georgia Southern University, 2001; PhD, University of South Carolina, 2005.

Davis, Timothy A., Associate Professor, Computer Sci- ence. BS, College of William and Mary, 1987; MCS, University of Virginia, 1989; PhD, North Carolina State University, 1998.

Davis, Todd D., Associate Professor, Applied Economics and Statistics. BS, Iowa State University, 1994; MS, 1997, PhD, 2001, Purdue University.

Davis, W. Jeffrey, Adjunct Associate Professor, Civil Engineering. BS, University of Alabama, 1981; MS, Auburn University, 1987; PhD, Georgia Institute of Technology, 1997.

Dawson, Darren M., Department Chair and McQueen Quantum Professor, Electrical and Computer Engi- neering, BSEE, 1984, PhD, 1990, Georgia Institute of Technology.
Faculty
Fishman, Teresa Anne, Assistant Professor, English. BS,
Auburn University, 1992; MA, 1995, MA, 1996, Clemson University; PhD, Purdue University, 2002
Fisk, William R., Department Chair and Professor, Teacher
Education. BS, 1973, MS, 1976, PhD, 1979, Florida
State University
Fjeld, Robert A., Jerry E. and Harriet Calvert Dempsey
Professor of Waste Management, School of the Environment.
BS, North Carolina State University, 1970; MS, 1973,
PhD, 1976, Pennsylvania State University; PE
Flanigan, Jackson L., Professor, Leadership, Counselor
Education, Human and Organizational Development. BA,
Salem College, 1959; MA, West Virginia University,
1964; EdD, Virginia Polytechnic Institute and State
University, 1986
Fleming, David S., Assistant Professor, Eugene T. Moore
PhD, University of South Carolina, 1998
Flower, Phillip J., Associate Professor, Physics and Astronomy. BS, University of Toledo, 1970; PhD, University
of Washington, 1976
Flowers, Lamont Akwette, Distinguished Professor of
Educational Leadership; Executive Director, Charles H.
Houston Center for the Study of the Black Experience in
Education. BS, Virginia Commonwealth University,
1996; MS, 1998, PhD, 2000, University of Iowa
Foltz, Jeffrey W., Professor, Forestry and Natural Resources.
BS, Ohio State University, 1972; MS, University of
Wisconsin, 1974; PhD, University of Colorado, 1978
Ford, Chelcy R., Adjunct Assistant Professor, Horticulture. BS, Georgia Institute of Technology, 1997; MS,
University of South Florida, 1999; PhD, University of
Georgia, 2004
Fortney, Patrick Joseph, Assistant Professor, Civil Engineering. BS, 2002, PhD, 2005, University of Cincinnati
Fortnum, Bruce A., Professor, Entomology, Soils, and Plant
Sciences, Pee Dee Research and Education Center. BA, La
Salle University, 1973; MS, University of Delaware,
1975; PhD, Clemson University, 1978
Fotheringham, Ulrich G., Adjunct Professor, Materials
Science and Engineering. BS, 1987, PhD, 1990, JohannesGutenberg-Universität
Foulger, Stephen H., Professor, Materials Science and Engineering. BS, University of California-Santa Barbara, 1990; PhD,
Massachusetts Institute of Technology, 1996
Foulk, John A., Adjunct Assistant Professor, Agricultural
and Biological Engineering. BS, 1992, MS, 1994, PhD,
1998, Clemson University
Foy, Paul R., Research Assistant Professor, Materials Science and Engineering. BS, 1982, MS, 1990, PhD, 2005,
Rutgers University
Fraedrich, Bruce Robert, Adjunct Associate Professor,
Forestry and Natural Resources. BA, Newberry College, 1974; MF, Duke University, 1976; PhD, Clemson
University, 1979
Fravel, Philip M., Assistant Professor, Agricultural and
Biological Engineering, Agricultural Education Program.
Institute and State University
Frazier, Kimberly N., Assistant Professor, Leadership,
Counselor Education, Human and Organizational Development. BS, 1998, MA, 2000, Xavier University of
Louisiana; PhD, University of New Orleans, 2003
Fredendall, Lawrence D., Associate Professor, Management.
BS, Central Michigan University, 1972; MBA, 1986,
PhD, 1991, Michigan State University
Frederick, James R., Professor, Entomology, Soils, and Plant
Sciences, Pee Dee Research and Education Center. BS,
1981, MS, 1983, Pennsylvania State University; PhD,
University of Illinois, 1987
Freedman, David L., Professor, School of the Environment.
BS, University of Wisconsin, 1978; MS, University of
Cincinnati, 1985; PhD, Cornell University, 1990

Fadel, Georges M., Professor, Mechanical Engineering.
Diploma, Swiss Federal Institute of Technology (Switzerland), 1976; MSc, 1978, PhD, 1988, Georgia Institute
of Technology
Fain, Jillian L., Instructor, Animal and Veterinary Sciences.
BSAg, University of Georgia, 2003; MS, University of
Georgia, 2005
Fairbairn, Donald M., Visiting Associate Professor, Mathematical Sciences. BS, 1963, MA, 1968, PhD, 1975,
Vanderbilt University
Falta, Deborah Alma, Assistant Professor, Public Health
Sciences. BA, Franklin and Marshall College, 1987; MS,
University of California-Berkeley, 1991; PhD, Clemson
University, 2006
Falta, Ronald W., Jr., Professor, School of the Environment. BS, 1982, MS, 1984, Auburn University; PhD,
University of California-Berkeley, 1990
Farnham, Mark William, Adjunct Professor, Horticulture. BS,
Ohio State University, 1977; MS, North Carolina State
University, 1984; PhD, University of Minnesota, 1988
Farnsworth, Edward G., Adjunct Professor, Entomology,
Soils, and Plant Sciences. BS, State University of New
York-Stony Brook, 1962; MS, 1968, PhD, 1973, University of Florida
Farris, John T., Associate Professor, Planning and Landscape Architecture. BA, Saint Louis University, 1972;
MUP, 1974, PhD, 1996, Michigan State University;
AICP, CRE
Federico, Lienne C., Associate Professor, Teacher Education.
BA, Hamilton College, 1981; MA, University of North
Carolina, 1982; PhD, East Carolina University, 1996
Feeser, Andrea V., Associate Professor, Art. BA, Williams
College, 1984; MPhil, 1992, PhD, 1996, City University
of New York
Feger, Christopher R., Adjunct Assistant Professor, Chemistry. BS, Massachusetts Institute of Technology, 1991;
PhD, Ohio State University, 1996
Felder, Frankie O., Associate Dean, Graduate School;
Associate Professor, Teacher Education. BS, Virginia
Commonwealth University, 1972; MEd, University
University
Feltus, Frank Alexander, Assistant Professor, Genetics
and Biochemistry. BS, Auburn University, 1992; PhD,
Vanderbilt University, 2000
Ferrell, J. Lee, BMW Lecturer, Languages. BS, University
of South Carolina/Upstate-Spartanburg, 1986; MA,
University of South Carolina, 2000
Ferrell, William G., Jr., Professor, Industrial Engineering. BA, Wake Forest University, 1977; MS, Virginia
Polytechnic Institute and State University, 1979; PhD,
North Carolina State University, 1989; PE
Fesen, Cassandra G., Research Professor, Physics and Astronomy. BS, Villanova University, 1973; BS, University
of Hawaii-Honolulu, 1973; MS, 1977, MS, 1978, PhD,
1981, University of Michigan-Ann Arbor
Field, Jonathan Beecher, Assistant Professor, English. BA,
Washington University, 1991; MA, 1993, PhD, 2004,
University of Chicago
Figliola, Richard S., Professor, Mechanical Engineering.
BS, 1974, MS, 1976, PhD, 1979, University of Notre
Dame; PE
Fine, Jeffrey Allen, Assistant Professor, Political Science.
BA, Vanderbilt University, 2001; MA, 2004, PhD, 2006,
University of Kentucky
First, Patricia Flanagan, Distinguished Professor, Leadership,
Counselor Education, Human and Organizational Development. BS, University of Massachusetts-Amherst, 1965;
MS, 1976, JD, University of Dayton, 2001; EdD, 1976,
Illinois State University
Fish, Robin Edwards, Lecturer, Teacher Education. BA,
1995, MEd, 2000, Clemson University

20

08

Edlein, Rebecca Suzanne, Lecturer, Graphic Communications. BS, Clemson University, 1991
Edlein, Saul, Adjunct Professor, Graphic Communications.
BS, City College of New York, 1956; MS, City University of New York-Brooklyn College, 1964
Edwards, Christopher Steven, Lecturer, Languages. BA, Auburn University, 2004; MA, New York University, 2005
Edwards, Frances L., Associate Professor, School of Accountancy and Legal Studies. BA, Graceland University,
1972; JD, University of Kansas, 1980
Eggert, Julia A., Associate Professor, School of Nursing.
BSN, University of Kansas, 1972; MN, Wichita State
University, 1981; PhD, Clemson University, 1997
Eidson, Gene W., Professor, Center for Applied Ecology. BS,
University of South Carolina, 1972; MS, 1975, PhD,
1990, Clemson University
Eisenberg, Carol A., Adjunct Associate Professor, Bioengineering. BA, 1981, BS, 1981, Cabrini College; MS,
Villanova University, 1983; PhD, Medical University
of South Carolina, 1993
Ellenberger, Suzanne R., Lecturer, Chemistry. BS, San
Jose State University, 1979; PhD, Oregon Health and
Science University, 1986
Ellis, Clifford Donald, Associate Professor, Planning and
Landscape Architecture. BA, Colorado College, 1973;
MPCD, University of Colorado-Denver, 1982; PhD,
University of California-Berkeley, 1990
Ellis, Jane P., Adjunct Associate Professor, Entomology,
Soils, and Plant Sciences. BA, Erskine College, 1969; MA,
Appalachian State University, 1972; PhD, Clemson
University, 1994
Ellis, Scott Christopher, Assistant Professor, Management.
BS, GMI Engineering and Management Institute, 1993;
MS, Kettering University, 1999; PhD, State University
of New York-Buffalo, 2007
Ellis, Steven E., Associate Professor, Animal and Veterinary
Sciences. BSc, University of Connecticut, 1992; MSc,
1994, PhD, 1998, Virginia Polytechnic Institute and
State University
Ellison, Michael S., Professor, Materials Science and Engineering. BS, 1971, MA, 1973, PhD, 1983, University
of California-Davis
Elzerman, Alan W., Director and Professor, School of the
Environment. BA, Williams College, 1971; PhD, University of Wisconsin, 1976
Emert, Randall A., Senior Lecturer, Engineering and Science Education. BS, 1989, MS, 1993, Western Illinois
University
English, William Rockford, Associate Professor, Forestry
and Natural Resources. BS, Oregon State University,
1980; MS, University of Missouri-Columbia, 1983; PhD,
Clemson University, 1991
Erdman, Jori A., Associate Professor, School of Architecture.
BS, University of Virginia, 1989; MArch, Columbia
University, 1995
Ervin, Vincent J., Professor, Mathematical Sciences. BSc,
Royal Melbourne Institute of Technology (Australia),
1978; MS, 1981, MS, 1983, PhD, 1984, Georgia Institute of Technology
BA, California State University-Sacramento, 1987; MS,
University of Nevada-Reno, 1998
Espey, Molly, Professor, Applied Economics and Statistics.
BS, 1988, MS, 1989, PhD, 1994, University of California-Davis
Evanoff, David D., Research Assistant Professor, Materials
Science and Engineering. BS, Westminster College, 2001;
PhD, Clemson University, 2005
Everman, David B., Adjunct Assistant Professor, Genetics
and Biochemistry. BS, Wake Forest University, 1989;
MD, Emory University, 1993
Ewing, Nancy Ellen Rankin, Lecturer, School of Nursing.
BS, 1991, MS, 2003, Clemson University

234


Greenstein, Joel S., Associate Professor, Industrial Engineering, BS, University of Illinois, 1973; MS, Stanford University, 1974; PhD, University of Illinois, 1979

Gresham, Charles A., Associate Professor, Forestry and Natural Resources, B.A. Barnum Institute of Coastal Ecology and Forest Science, BS, University of Georgia, 1970; MS, 1972, PhD, 1975, Duke University

Griffin, Sarah E., Assistant Professor, Public Health Sciences, BS, Winthrop University, 1988; MPH, 1993, PhD, 2001, University of South Carolina

Grigsby, David W., Intern Senior Vice Provost for Academic Affairs; Professor, Management. BBA, Baylor University, 1968; MBA, The Citadel, 1975; PhD, University of North Carolina, 1983

Grisinger, Joanna L., Assistant Professor, History, BA, Columbia University, 1994; JD, 1998, MA, 2001, PhD, 2005, University of Chicago

Groff, Jennifer Lynn, Assistant Librarian, University Libraries, BS, Pennsylvania State University, 1997; MS, University of Michigan, 2002

Grosby, Steven E., Professor, Philosophy and Religion. BA, Brandeis University, 1983; PhD, University of Chicago, 1989

Grossman, Harold C., Associate Professor, Computer Science. BS, University of Cincinnati, 1968; MS, New Mexico State University, 1971; PhD, Michigan State University, 1978

Grove, Stephen J., Professor, Marketing. BA, 1972, MA, 1975, Texas Christian University; PhD, Oklahoma State University, 1979

Grover, Varun, William S. Lee Distinguished Professor of Information Systems, Management. BTech, Indian Institute of Technology Delhi (India), 1982; MBA, Southern Illinois University, 1985; PhD, University of Pittsburgh, 1990

Grubb, C. Alan, Associate Professor, History, BA, Washington and Lee University, 1963; MA, 1964, PhD, 1969, Columbia University

Grubb, Teryl G., Adjunct Associate Professor, Forestry and Natural Resources. BS, Colorado State University, 1982; MS, University of Washington-Seattle, 1977

Grujicic, Mica, Wilfred P. and Helen S. Tiencken Professor, Assistant Professor, Electrical and Computer Engineering, MS, Vienna University of Technology (Austria), 1998; MS, 2000, PhD, 2001, University of Wisconsin-Madison; PhD, Vienna University of Technology (Austria), 2003

Guillem, Cynthia Lynn Murray, Adjunct Assistant Professor, Forestry and Natural Resources; Adjunct Assistant Professor, School of the Environment. BS, Texas A&M University, 1993; MS, University of Houston-Clear Lake, 1997; PhD, Clemson University, 2002

Gunderson, Donna Jean, Visiting Lecturer, Mathematical Sciences. BS, Eastern Illinois University, 1973

Guss, Nathan C., Assistant Professor, Languages. BA, Duke University, 1999; MA, 2002, PhD, 2004, Cornell University

Guynn, David C., Jr., Professor, Forestry and Natural Resources. BS, 1968, MS, 1973, PhD, 1975, Virginia Polytechnic Institute and State University

Haefner, Dieter, Associate Assistant Professor, Bioengineering. MS, Vienna University of Technology (Austria), 1998; MS, 2000, PhD, 2001, University of Wisconsin-Madison; PhD, Vienna University of Technology (Austria), 2003

Hains, John Jenkins, Jr., Associate Professor, Biological Sciences. BS, North Carolina State University, 1971; MS, 1981, PhD, 1987, Clemson University

Haley-Zilvin, Vivian J., Associate Professor, Food Science and Human Nutrition. BS, University of Kentucky, 1972; PhD, University of Tennessee, 1991

Halil Rauf Gowey, Robert G., University Ombudsman; Alumni Distinguished Professor, Horticulture. BS, 1963, MS, 1965, Clemson University; PhD, Virginia Polytechnic Institute and State University, 1968; MLA, North Carolina State University, 1973

Haliena, Rita M., Senior Lecturer, Food Science and Human Nutrition. BS, Ohio State University, 1974; MS, Ball State University, 1978

Hall, Karen Carlson, Lecturer, Forest and Natural Resources. BS, Western Carolina University, 1996; MS, Clemson University, 1999

Hall, Michelle A., Associate Professor, Animal and Veterinary Sciences. BS, 1975, 1977, MS, 1981, PhD, 1982, University of Wisconsin

Haller, William J., Assistant Professor, Sociology, BA, Hamilton University, 1966; MA, 1994, PhD, 1999, University of Washington-Seattle

Hall, Jennifer Christine, Assistant Professor, Parks, Recreation, and Tourism Management. BS, Florida State University, 1988; MS, Johns Hopkins University, 2001; PhD, University of Vermont, 2007

Hallsmeier, Jason O., Associate Professor, Computer Science. BS, 1998, MA, 1999, Miami University; MS, 2003, PhD, 2008, Ohio State University

Hamblin, Jacob D., Assistant Professor, History, BA, 1995, MA, 1998, PhD, 2001, University of California-Santa Barbara

Hamming, Michael D., Professor, Applied Economics and Statistics. BA, University of Kansas, 1967; PhD, Washington State University, 1978

Han, Young J., Professor, Agricultural and Biological Engineering. BS, 1979, MS, 1981, Seoul National University (Korea); PhD, University of Illinois, 1986; PE

Hanks, Timothy W., Adjunct Associate Professor, Chemosys. BS, South Dakota School of Mines and Technology, 1982; PhD, Montana State University, 1986

Hann, Hugh Grady, Adjunct Associate Professor, Forestry and Natural Resources. BS, 1972, MS, 1975, Auburn University; PhD, Oregon State University, 1980, State University of New York, 1983

Hanna, Marion L., Jr., Lecturer, Mathematical Sciences. BS, 1994, MS, 1996, Clemson University

Haque, Imita, UI, Department Chair and Professor, Mechanical Engineering. BS, University of Engineering and Technology (Pakistan), 1971; MS, 1977, PhD, 1982, Clemson University

Haque, Mary B. Taylor, Alumni Distinguished Professor, Horticulture. BA, Sweet Briar College, 1973; MLA, North Carolina State University, 1978

Harcum, Sarah W., Associate Professor, Bioengineering; Adjunct Associate Professor, Genetics and Biochemistry. BS, University of Michigan-Ann Arbor, 1986; MS, Colorado State University, 1988; PhD, University of Maryland, 1993

Hardesty, Nancy A., Professor, Philosophy and Religion. BA, Wheaton College, 1963; MSJ, Northwestern University, 1964; PhD, University of Chicago, 1976

Hargreaves, David, Adjunct Associate Professor, Forestry and Natural Resources; Adjunct Associate Professor, School of the Environment. BS, 1976, MS, 1979, North Carolina State University; PhD, University of Wisconsin-Madison, 1983

Harmon, Corinne Crockett, Assistant Professor, School of Nursing. BS, Virginia Commonwealth University, 1969; MS, Clemson University, 1979; EdD, University of Georgia, 1992

Harrell, William R., Associate Professor, Electrical and Computer Engineering. BS, 1981, MS, 1983, University of Kentucky; PhD, University of Maryland, 1994

Harrington, Alexander Gervis, Assistant Professor, Performing Arts. BA, Columbia University-New York City, 1991; MFA, Louisiana State University and Agricultural and Mechanical College, 2002

Harrington, Joseph M., Adjunct Assistant Professor, Industrial Engineering. BA, Gustavus Adolphus College, 1992; MS, University of Oxford (England), 1996; PhD, Clemson University, 1999

Harrington, John M., Jr., Associate Professor, Finance. BS, 1973, MBA, 1975, PhD, 1980, University of South Carolina

Harris, Robert A., Associate Research Professor, Snorm Thornburg Institute. BS, 1971, MS, 1973, Clemson University; PhD, Virginia Polytechnic Institute and State University, 1977

Harris, Scott K., Lecturer, Languages. BA, 1980, MAT, 1985, University of South Carolina

Harrison, Graham M., Associate Professor, Chemical and Biomolecular Engineering. BS, Stanford University, 1991; PhD, University of California-Santa Barbara, 1997

Harrison, Henry L. III, Lecturer, Teacher Education. BS, Clemson University, 2002; MEd, North Carolina State University, 2003

Harrison, Howard F., Adjunct Professor, Horticulture. BS, University of Georgia, 1974; MS, Clemson University, 1976; PhD, University of Illinois, 1980

Harritos, Harry C., Associate Professor, School of Architecture. BArch, 1969, MArch, 1979, Clemson University; AIA

Hartmann, David J., Professor, Performing Arts. BFA, University of Wisconsin-Whitewater, 1982; MFA, University of Minnesota-Twin Cities, 1986

Hartmann, Dieter H., Professor, Physics and Astronomy. BA, 1982, MA, 1982, University of Göttingen (Germany); PhD, University of California-Santa Cruz, 1989

Hartsough, Langdon A., Adjunct Associate Professor, Bioengineering; Associate Professor and Chair, Orthopedic Surgery, Medical University of South Carolina. BA, Davidson College, 1983; MD, Duke University, 1987

Hashima, Patricia Y., Research Assistant Professor, Institute on Family and Neighborhood Life. BA, Mills College, 1983; MA, University of California-Davis, 1987; PhD, University of Nebraska-Lincoln, 1996

Havice, Pamela A., Associate Professor, Leadership, Counselor Education, Human and Organizational Development. BS, 1980, MS, 1984, Fort Hays State University; PhD, Clemson University, 1999

Havice, William L., Associate Dean, College of Health, Education, and Human Development; Professor, Leadership, Counselor Education, Human and Economic Development. BS, 1977, MS, 1979, Fort Hays State University; EdD, Pittsburg State University, 1984; PhD, Kansas State University, 1994

Li, Yunhui, Associate Professor, Physics and Astronomy, BS, 1996, MS, 1999, PhD, 2004, Shanghai University
Morse, John C., Professor, Entomology, Soils, and Plant Sciences. BS, Davidson College, 1968; MS, Clemson University, 1970; PhD, University of Georgia, 1974

Mortonson, Christopher John, Assistant Professor, Animal and Veterinary Sciences. BS, University of Florida; MS, College of Charleston, 1991; PhD, Clemson University, 1999

Moss, Dorothy A., Lecturer, Mathematical Sciences. BS, Bob Jones University, 1971; MEd, Clemson University, 1978

Moss, William F., Alumni Distinguished Professor, Mathematical Sciences. BS, Massachusetts Institute of Technology, 1966; PhD, University of Delaware, 1974

Mount, Andrew S., Research Assistant Professor, Biological Sciences. BS, University of Minnesota, 1980; MS, College of Charleston, 1991; PhD, Clemson University, 1999

Mousseau, Timothy, Adjunct Professor, Entomology, Soils, and Plant Sciences. BS, University of Ottawa (Canada), 1980; MS, University of Toronto (Canada), 1983; PhD, McGill University (Canada), 1988

Mowrey, Megan E., Assistant Professor, School of Accountancy and Legal Studies. BA, 1985, JD, 1988, PhD, 1998, University of Iowa

Morse, Stephen Michael, Assistant Professor, School of the Environment. BSc, University of Alberta (Canada), 1996; MS, University of Arizona, 1999; PhD, Stanford University, 2005

Mroz, Thomas Alvin, Professor, Economics. AB, Dartmouth College, 1976; PhD, Stanford University, 1984

Mueller, John D., Intern Director, Edu Resource and Education Center; Professor, Entomology, Soils and Plant Sciences. BS, University of Missouri, 1974; MS, 1980; PhD, 1983, University of North Carolina

Munson, Friscilla Gabrielle, University Libraries. BA, Indiana University, 1971; MA, Indiana University of South Carolina, 1988

Murdoch, Ernest E., Dean of Undergraduate Studies; Professor, Psychology. BA, 1962, 1968; Wake Forest University, PhD, University of Chicago, 1985

Murphy, Lawrence A., Associate Professor, School of the Environment. BS, Pennsylvania State University, 1980; MS, 1993, PhD, 1997, University of Cincinnati

Murray, Peter M., Adjunct Associate Professor, Bioengineering and Biomedical Engineering. BS, University of Florida; MD, West Virginia University, 1981; MD, West Virginia School of Medicine, 1985

Nadenicek, Daniel J., Department Chair and Professor, Planning and Landscape Architecture. BS, 1973, MS, 1976, Mankato State University; BLA, 1991, MLA, 1991, University of Minnesota

Nagatomi, Jiro, Assistant Professor, Bioengineering. BS, 1994, PhD, 2002, Rensselaer Polytechnic Institute

Nakama, Konstancio K., Department Chair and Professor, Languages. BA, University of Ghana (Ghana), 1982; MA, University of Paris (France), 1984; PhD, Sorbonne Nouvelle-Université de Paris (France), 1990; MBA, Saint Mary's University (Canada), 1991

Nasar, Hala Fouad, Assistant Professor, Planning and Landscape Architecture. BS, 1988, MS, 1993, PhD, 1998, Ain Shams University (Egypt); MAg, Pennsylvania State University, 2000

Nault, Eleanor W., Director, Assessment; Lecturer, Leadership, Counselor Education, Human and Organizational Development. BS, 1969, MCRP, 1982, MEd, 1994, PhD, 1996, Clemson University

Neal, Jerome M., Visiting Assistant Professor, Leadership, Counselor Education, Human and Organizational Development. BS, Savannah State University, 1965; MEd, 1971, Indiana University

Neal, Mary Darlin, Lecturer, English. BA, 1987, MA, 1990, New Mexico State University; MFA, University of Arizona, 1993; PhD, University of Southern Mississippi, 2001

Nelson, Eric A., Adjunct Professor, Forestry and Natural Resources. BA, Occidental College, 1971; MS, 1974, PhD, 1978, Oregon State University

Nelson, Steven Mark, Assistant Professor, Sociology. BA, University of Chicago, 1991; JD, Ohio State University, 1995; MA, 2002, PhD, 2007, University of Arizona

Nettles, William C., Jr., Adjunct Professor, Entomology, Soils, and Plant Sciences. BS, 1955, MS, 1959, Clemson University; PhD, Rutgers University, 1962

Newby, Meredith Ilm, Assistant Professor, Physics and Astronomy. BS, Virginia Polytechnic Institute and State University, 1996; PhD, Florida State University, 2002

Newkirk, Gary L., Senior Lecturer, Management. BS, United States Naval Academy, 1966; MBA, University of Virginia, 1976; EdD, Clemson University, 1992

Newton, Jennifer Ray, Lecturer, Mathematical Sciences. BA, Erskine College, 1991; MS, Clemson University, 1993

Nguyen, Nhu Phu, Adjunct Professor, Agricultural and Biological Engineering. BS, 1975, MS, 1977, University of New South Wales (Australia); PhD, Louisiana State University and Agricultural and Mechanical College, 1982

Nicolle, Bryant G., Assistant Professor, Civil Engineering. BS, 1998, MS, 2000, Utah State University; PhD, Georgia Institute of Technology, 2005

Nitz, P. Marie, Assistant Director, College of Business and Behavioral Science Undergraduate Advising Center; Lecturer, Psychology. BA, University of North Carolina, 1990; MS, 1996, PhD, 2002, University of Georgia

Nocks, Barry C., Associate Dean for Research and Outreach, College of Architecture, Arts, and Humanities; Professor, City and Regional Planning. BS, Cornell University, 1969; MRP, 1972, PhD, 1978, University of North Carolina; AICP

Oneaker, Daniel L., Associate Professor, Electrical and Computer Engineering. BS, Auburn University, 1977; MS, Emory University, 1979; MS, Georgia Institute of Technology, 1984; PhD, University of Illinois, 1993

Norfolk, Christopher W., Adjunct Assistant Professor, Chemical and Biomolecular Engineering. BS, Clemson University, 2000; MS, 2003, PhD, 2005, University of Notre Dame

Norman, Richard B., Professor, School of Architecture. BS, Lawrence University, 1955; BA, University of Illinois-Urbana-Champaign, 1958; MA, University of Michigan, 1961; AIA

Norman, William C., Associate Professor, Parks, Recreation, and Tourism Management. BS, University of Minnesota, 1980; MS, Michigan State University, 1987; PhD, University of Minnesota, 1995

Norsworthy, Jason K., Adjunct Associate Professor, Entomology, Soils, and Plant Sciences. BS, Louisiana Tech University, 1995; MS, 1997, PhD, 2000, University of Arkansas

Nortcliff, Stephen, Adjunct Professor, Entomology, Soils, and Plant Sciences. BA, University of Bristol (England), 1969; PhD, University of East Anglia (England), 1974

Novak, David R., Assistant Professor, Communication Studies. BS, 1999, MS, 2002, Illinois State University; PhD, 2006, Ohio University

Novick, Beth A., Visiting Assistant Professor, Mathematical Sciences. BS, Barnard College, 1972; MS, University of Colorado, 1984; MS, 1987, PhD, 1990, Carnegie Mellon University

Nowack, Robert E., Alumni Professor of Civil Engineering and Engineering Mechanics. Civil Engineering. BS, Carnegie Mellon University, 1948; MS, University of Pittsburgh, 1952; LL.D, Clemson University, 1999
Nyankori, James C. O., Professor, Applied Economics and Statistics. BS, Makerere University Kampala (Uganda), 1966; MS, Ohio State University, 1970; PhD, University of Illinois, 1973

Nycepir, Andrew P., Adjunct Professor, Entomology, Soils, and Plant Sciences. BSA, University of Georgia, 1974; MS, 1976, PhD, 1980, Clemson University

Obeng, Yaw Samuel, Adjunct Professor, Materials Science and Engineering. BSc, University of Science and Technology-Kumasi (Ghana), 1982; PhD, University of Miami, 1988; MBA, Rollins College, 1996

O’Callaghan, Depla G., Adjunct Professor, Forestry and Natural Resources. BS, 1973, PhD, 1977, University of Dublin (Ireland)

Ochterbeck, Ray M., Professor, Mechanical Engineering. BS, 1987, MS, 1990, PhD, 1993, Texas A&M University

O’Connor, Sean, Lecturer, Chemistry. BS, Washington and Lee University, 1969; MS, University of South Carolina, 1978; PhD, Clemson University, 1990

Ogle, Amod A., Professor, Chemical and Biomolecular Engineering. BT, Indian Institute of Technology (India), 1982; PhD, University of Delaware, 1986

Ogg, Neil, Associate Vice President, Public Service and Agriculture; Director, Regulatory and Public Services Programs. BS, East Tennessee State University, 1974; MS, University of Tennessee, 1975; EdD, Clemson University, 1992

Ogle, Jennifer H., Assistant Professor, Civil Engineering. BS, 1994, MS, 1996, University of Tennessee; PhD, Georgia Institute of Technology, 2005

Oh, Chi-Ok, Assistant Professor, Parks, Recreation, and Tourism Management. BA, Chungnam National University (Korea), 1999; MS, University of Massachusetts-Amherst, 2001; PhD, Texas A&M University, 2005

O’Hara, Liam Henry, Assistant Professor, Graphic Communication. BA, University of Georgia, 1986; MAT, University of South Carolina, 1989; MEd, 1997, EdD, 2005, Clemson University

Okafor, Nduka, Adjunct Assistant Professor, Biological Sciences. BSc, University College (Nigeria), 1960; PhD, University of Cambridge (England), 1964

Olson, Larry W., Associate Professor, Animal and Veterinary Sciences. Edwards Research and Education Center. BS, Oklahoma State University, 1971; MS, 1974, 1976, University of Nebraska

Olson, Laura R., Professor, Political Science. BA, Northwestern University, 1990; MA, 1991, PhD, 1996, University of Wisconsin-Madison

Omar, Mohammad Atit, Assistant Professor, Mechanical Engineering. BSc, University of Jordan (Jordan), 2001; PhD, University of Kentucky, 2005

Osborne, Kristen K., Lecturer, Graphic Communications. BA, 1994, MEd, 1996, Clemson University

Overcamp, Thomas J., Professor, School of the Environment. BS, Michigan State University, 1968; MS, 1970, PhD, 1973, Massachusetts Institute of Technology; PE

Owens-Jackson, Lisa A., Assistant Professor, School of Accountancy and Legal Studies. BS, North Carolina Agricultural and Technical State University, 1990; MA, Ohio State University, 1996; PhD, Oklahoma State University, 2001

Owino, Tom O., Associate Professor, Agricultural and Biological Engineering. BS, University of Nairobi (Kenya), 1985; MS, University of Alberta (Canada), 1993; PhD, Pennsylvania State University, 1999

Pace, Thomas B., Adjunct Assistant Professor, Bioengineering. BS, Mississippi State University, 1978; MD, University of Mississippi, 1982

Padilla, Michael James, Associate Dean, Eugene T. Moore School of Education. BS, University of Detroit Mercy, 1967; ME, Wayne State University, 1972; PhD, Michigan State University, 1975

Paganino, Christopher C., Professor, Psychology. BA, 1987, PhD, 1993, University of Connecticut

Paige, William D., Professor, Teacher Education. BS, 1968, MS, 1972, State University of New York-Oneonta; PhD, Ohio State University, 1978

Pak, Chong Hyon, Assistant Professor, Psychology. BS, 1997, MS, 2001, PhD, 2005, Georgia Institute of Technology

Palmer, William J., Jr., Professor, Biochemistry. BS, 1976, University of Kentucky; MS, 1979, PhD, 1981, University of Nebraska-Lincoln

Palmer, R. Barton, Adjunct Professor, Forestry and Natural Resources. BS, 1973, MS, 1976, PhD, 1980, University of Florida

Parr, Gary B., Director, Livestock and Poultry Health/Animal and Veterinary Sciences. BS, University of Wisconsin, 1983; DVM, 1987, PhD, 1992, University of Georgia

Parr, Mark Holland, Director, Livestock and Poultry Health/Animal and Veterinary Sciences. BS, University of Wisconsin, 1983; DVM, 1987, PhD, 1992, University of Georgia

Parr, Patrick, Director, Livestock and Poultry Health/Animal and Veterinary Sciences. BS, University of Wisconsin, 1983; DVM, 1987, PhD, 1992, University of Georgia

Parsons, Caroline S., Lecturer, Communication Studies. BA, University of Alabama, 1994; MA, Ball State University, 1995

Patterson, James W., Professor, Management. BS, 1970, MA, 1971, PhD, 1977, University of Arkansas

Paul, Paul, Associate Professor, English. BS, University of North Carolina, 1993; MA, 1995, PhD, 1998, University of Michigan

Paul, Kimberly S., Assistant Professor, Biological Sciences. BA, Northwestern University, 1991; PhD, Princeton University, 1998

Pavlasek, Stephen J., Lecturer, Applied Economics and Statistics. BS, Clemson University, 1967

Pearl, Gary G., Adjunct Professor, Animal and Veterinary Sciences. Adjunct Assistant Professor, Food Science and Human Nutrition. BS, 1959, DVM, 1963, Purdue University

Pearson, L. Wilson, Samuel R., Rhodes Professor, Electrical and Computer Engineering; Director, University’s Center for Research in Wireless Communications. BSEE, 1968, MS, 1973, University of Mississippi; PhD, University of Illinois, 1976

Pecaut, Michael J., Adjunct Assistant Professor, Bioengineering. BS, 1994, MS, 1996, PhD, 1999, University of Colorado-Boulder

Peebles, Kelly Digby, Lecturer, Languages. BA, Randolph-Macon Woman’s College, 1999; MA, University of South Carolina, 2001

Peeler, David K., Adjunct Assistant Professor, Materials Science and Engineering. BS, Clemson University, 1987; MS, Alfred University, 1989; PhD, Clemson University, 1993

Peng, Xiang, Adjunct Professor, Bioengineering. BS, 1982, MS, 1984, PhD, 1989, Tianjin University (China)

Penna, Anthony M., Assistant Professor, Performing Arts. BA, Hanover College, 1993; MFA, Boston University, 2000

Pennington, William T., Jr., Professor, Chemistry. BA, Hendrix College, 1977; PhD, University of Arkansas, 1983

Pereira, Dvora, Associate Professor, Chemistry. BSc, Hebrew University of Jerusalem (Israel), 1981; MSc, 1984, PhD, 1990, Weizmann Institute of Science (Israel)

Perdue, Richard R., Adjunct Instructor, Food Science and Human Nutrition. BS, University of Georgia, 1954

Perez, Silvia Dinorah, Lecturer, Languages. BSc sc, Universidad Centroamericana Jose Simeon Canas (El Salvador), 1988; MS, University of Idaho, 1995; MA, University of Warwick (England), 2001

Perls, Diane, Assistant Professor, Philosophy and Religion. BA, John Moxley College, 1984; MA, 1987, PhD, 1997, University of Chicago

Perry, Travis William, Adjunct Assistant Professor, Forestry and Natural Resources. BS, Furman University, 1992; PhD, University of New Mexico-Albuquerque, 2001

Peters, Charles L., Adjunct Professor, Teacher Education. BA, 1978, MEd, 1983, Clemson University; EdD, University of Georgia, 1988

Peterson, James K., Associate Professor, Mathematical Sciences. BA, Indiana University, 1975; MS, 1977, PhD, 1982, Colorado State University

Petit, Laetitia, Research Assistant Professor, Materials Science and Engineering. BS, 1996, MS, 1997, University of Paris (France); PhD, University of Bordeaux (France), 2002

Petitgrew, Charles A., Jr., Adjunct Professor, Biological Sciences. BS, Erskine College, 1981; MS, Clemson University, 1984; PhD, University of Tennessee, 1988

Petty, Jeffrey T., Adjunct Associate Professor, Chemistry. BS, Furman University, 1986; PhD, University of California-Berkeley, 1991

Pfahl, Lester J., Adjunct Instructor, Food Science and Human Nutrition. BA, California State University-Long Beach, 1983; MS, California State University-Fresno, 1986

Pickett, Gregory M., Department Chair and Professor, Marketing. BS, 1979, MBA, 1983, PhD, 1985, Oklahoma State University

Pilcher, June J., Professor, Psychology. BA, University of Southern Mississippi, 1984; MA, 1989, PhD, 1989, University of Chicago

Pinkerton, Bruce W., Associate Dean, Agriculture and Natural Resources; Professor, Entomology, Soil, and Plant Sciences. BA, Southeast Texas State University, 1971; MS, 1976, PhD, 1982, Texas A&M University

Piper, Christine A., Associate Professor, Construction Science and Management. BS, 1986, MCM, 1988, Clemson University; PhD, University of South Australia (Australia), 2007

Piskin, Serghei, Adjunct Professor, Materials Science and Engineering. PhD, University of Moldova, 1967; DSc, Moscow State University (Russia), 1978

Pisula, Pierluigi, Assistant Professor, Mechanical Engineering, MS, University of Genoa (Italy), 1996; PhD, Ohio State University-Columbus, 2002

Placene, Dennis L., Professor, Economics. BA, 1970, MA, 1972, PhD, 1982, University of Pittsburgh
Schnabel, Guido, Associate Professor, Entomology, Soils, and Plant Sciences; Associate Professor, Genetics and Biochemistry. BA, 1990; MS, 1993, Justus-Liebig Universität (Germany); PhD, Universität Hohenheim (Germany), 1997

Schneider, Raymond K., Interim Chair and Associate Professor, Construction Science and Management. B.A., Texas A&M University, 1964; MS, Texas A&M University, 1966; PhD, University of Arizona, 1976

Scholz, Sarah A., Assistant Professor, Environmental Science. BS, 1984, University of California-Berkeley; MS, 1986, University of California-Berkeley; PhD, University of California-Los Angeles, 1991

Schott, Elizabeth M., Associate Professor, Sociology. BA, 1990, University of California-Irvine; MA, 1995, PhD, 2000, University of California-Los Angeles, 1997

Schott, Harold D., Adjunct Associate Professor, Bioengineering. BS, 1969, MS, 1971, PhD, 1975, Louisiana State University, 1973

Schott, Karen G., Adjunct Instructor, Food Science and Human Nutrition. BS, Western Carolina University, 1981; MS, Winthrop University, 1983

Schottler, Thomas E., Associate Dean, College of Agriculture, Forestry, and Life Sciences; Professor, Biological Sciences. BS, University of Michigan, 1975; MS, Michigan Technological University, 1977; PhD, Auburn University, 1980

Schweitzer, Sara H., Adjunct Associate Professor, Forestry and Natural Resources. BS, University of North Carolina, 1985; MS, Texas Tech University, 1988; PhD, Oklahoma State University, 1994

Scott, David A., Assistant Professor, Leadership and Human Development. BS, University of North Carolina-Wilmington, 1971; MS, Western Carolina University, 1994; PhD, North Carolina State University, 2004

Scott, Kristin L. Damato, Assistant Professor, Management. BS, Villanova University, 1994; MHR, University of South Carolina, 1996; PhD, University of Kentucky, 2007

Scott, Mark C., Adjunct Assistant Professor, Forestry and Natural Resources. BS, Wofford College, 1987; MS, Virginia Polytechnic Institute and State University, 1994; PhD, University of Georgia, 2001

Scott, Simon W., Professor, Entomology, Soils, and Plant Sciences. BSc, Hartfield Polytechnic (England), 1971; PhD, University of Wales (England), 1974

Scott, Thomas R., Professor, Animal and Veterinary Sciences. BS, 1976, MS, 1979, Louisiana State University; PhD, University of Georgia, 1983

Scuras, Sean E., Adjunct Assistant Professor, School of the Environment. BS, Southern Illinois University-Carbondale, 1983; MS, University of Colorado-Denver, 1992; PhD, Clemson University, 2004

Seaver, Laurie H., Adjunct Assistant Professor, Genetics and Biochemistry. BS, 1983, MD, 1987, University of Arizona

Sehorn, Michael Glenn, Assistant Professor, Genetics and Biochemistry. BS, New Mexico Institute of Mining and Technology, 1995; PhD, Louisiana State University Health Sciences Center-Shreveport, 2002

Senter, Herman F., Associate Professor, Mathematical Sciences. BS, North Carolina State University, 1965; MS, University of Virginia, 1967; PhD, North Carolina State University, 1973

Serkiz, Steven M., Adjunct Associate Professor, School of the Environment. BS, Furman University, 1985; PhD, Georgia Institute of Technology, 1991

Seydum, Zeynep Banu, Adjunct Assistant Professor, Animal and Veterinary Sciences. BS, 1991, MS, 1994, Ankara University (Turkey); MS, 1996, PhD, 2001, Clemson University

Shalaby, Shalaby W., Adjunct Professor, Bioengineering. BSc, Ain Shams University (Egypt), 1958; MS, 1963, PhD, 1966, 1974, 1981, Qatar University, 1986

Shapiro, Martin, Adjunct Professor, Entomology, Soils, and Plant Sciences. BA, City University of New York-Brooklyn College, 1958; MS, Cornell University, 1961; PhD, University of California-Berkeley, 1966

Shappell, Scott A., Professor, Industrial Engineering. BS, Wright State University, 1983; PhD, University of Texas Medical Branch-Galveston, 1990

Sharp, Julia Lynn, Assistant Professor, Applied Economics and Statistics. BS, Davidson College, 1995; MS, 2001, PhD, 2007, Montana State University-Bozeman

Shellburne, Victor B., Professor, Forestry and Natural Resources. BS, 1973, ME, 1975, Duke University; PhD, Clemson University, 1988

Sherrill, Windsor Westbrook, Associate Professor, Public Health Sciences. BS, Wake Forest University, 1967; MHA, MBA, University of Alabama-Birmingham, 1989; PhD, Brandeis University, 1999

Shick, Laura Jane, Lecturer, Mathematical Sciences. BS, 1972, MS, 1981, University of Delaware

Shier, Donna R., Professor, Agricultural Economics, BA, Harvard University, 1967; MSc, 1967, London School of Economics and Political Science (England), 1973

Ship, Ester, Professor, Entomology, Soils, and Plant Sciences. BS, University of Tennessee, 1969; MS, Western Kentucky University, 1970; PhD, Virginia Polytechnic Institute and State University, 1978

Sikarskie, James G., Adjunct Associate Professor, Animal and Veterinary Sciences. BA, 1990, MS, 1993, Justus-Liebig Universität (Germany); PhD, Universität Hohenheim (Germany), 1997; MS, 1997, PhD, 1997, Louisiana State University

Simionescu, Anton, Adjunct Professor, History. BA, 1976, University of Bucharest, 1983

Simmons, Alvin M., Adjunct Professor, Entomology, Soils, and Plant Sciences. BS, East Carolina University, 1980; MS, 1983, PhD, 1987, University of Kentucky

Simmons, James Bryan, Associate Professor, Graphic Communications. BS, Western Kentucky University, 1986; MS, Murray State College, 1988; EdD, University of Kentucky, 1994

Simms, Donna M., Lecturer, Mathematical Sciences. BS, Bob Jones University, 1990; MS, Clemson University, 1993

Simons, Curtis J., Associate Professor, Economics. BA, College of William and Mary, 1981; MA, 1983, PhD, 1985, State University of New York-Binghamton

Simpson, Roger K., Lecturer, Languages. BA, 1976, MEd, 1977, Clemson University

Singh, Rajendra D., Houser Banks Professor, Electrical and Computer Engineering. BS, Agra University (India), 1965; MS, Meerut University (India), 1968; MS, Dalhousie University (Canada), 1974; PhD, McMaster University (Canada), 1979

Sitaraman, Murali, Professor, Computer Science. BE, University of Madras (India), 1983; ME, Indian Institute of Science (India), 1984; PhD, Ohio State University, 1990

Skaa, Eric C., Associate Professor, Materials Science and Engineering. BS, Alfred University, 1970; PhD, Massachusetts Institute of Technology, 1975; PE

Skewes, Peter A., Professor, Animal and Veterinary Sciences. BS, University of New Haven, 1979; MS, University of Florida, 1982; PhD, Virginia Polytechnic Institute and State University, 1985

Skinner, Martha L., Assistant Professor, School of Architecture. BA, University of Florida, 1990; BArch, Cooper Union, 1995

Skopp, Charles O., Adjunct Assistant Professor, Civil Engineering. BSEE, The Citadel, 1971; MS, University of South Carolina, 1972; PhD, Clemson University, 2004

Small, Mark A., Professor, Institute on Family and Neighborhood Life. BA, 1983, MA, 1985, University of Nevada-Las Vegas; JD, 1989, PhD, 1990, University of Nebraska-Lincoln

Smart, Patricia T., Professor, School of Nursing. BSN, Clemson University, 1979; MN, University of South Carolina, 1981; PhD, University of Georgia, 1994

Smathers, Diane G., Director and Professor, Emeritus College. BS, 1973, MS, 1974, University of Kentucky; EdD, University of Georgia, 1980

Smiley, E. Thomas, Adjunct Professor, Forestry and Natural Resources. BS, University of Wisconsin, 1977; MS, Colorado State University, 1979; PhD, University of Michigan State University, 1985

Smink, Jay, Director, National Dropout Prevention Center; Professor, Leadership, Counselor Education, Human and Organizational Development. BS, Millersville State College, 1959; MED, 1961, EdD, 1966, Pennsylvania State University

Smith, Alton D., Associate Professor, Biological Sciences. BS, Mississippi College, 1972; MS, East Texas State University, 1977

Smith, Christa A., Associate Professor, History. BA, 1987, MA, 1990, Marshall University; PhD, University of Tennessee, 2000

Smith, Daniel J., Assistant Professor, Languages. BA, Bob Jones University, 1979; MED, University of Georgia, 1985; PhD, University of Texas-Austin, 2002

Smith, Deborah A., Associate Professor, Teacher Education. BS, Madison College, 1977; MS, 1985, EdD, 1989, University of Tennessee

Smith, Dennis W., Jr., Professor, Chemistry. BS, 1988, PhD, 1992, University of Florida

Smith, Eddie R., Lecturer, Communication Studies. BA, 1979, MA, 1981, Bob Jones University

Smith, John R., Visiting Assistant Professor. English. BA, Furman University, 1990; MA, 1992, PhD, 1999, Boston University
Smith, Kelly C., Associate Professor, Philosophy and Religion. BA, Georgia State University, 1986; MS, 1991, PhD, 1994, Duke University.

Smith, Kelly Jordan, Lecturer, School of Nursing. BS, 1992; MS, 2000, Clemson University.

Smith, Kerry S., Associate Professor, Genetics and Biochemistry. BS, Georgia Institute of Technology, 1986; PhD, University of Pennsylvania, 1993.

Smith, Melissa Crawley, Assistant Professor, Electrical and Computer Engineering. BS, 1993, MS, 1994, Florida State University; PhD, University of Tennessee, 2003.

Smith, Rhett C., Assistant Professor, Chemistry. BS, University of Toledo, 2000; PhD, Case Western Reserve University, 2005.

Smith, Robert W., Associate Professor, Political Science. BA, College of Saint Rose, 1982; MPA, 1984, PhD, 1998, State University of New-Albany.

Smith, Theodore I. J., Adjunct Assistant Professor, Forestry and Natural Resources. BS, Cornell University, 1966; MS, CW Post College, 1968; PhD, University of Miami, 1973.

Smotherman, Mark K., Associate Professor, Computer Science. BS, Middle Tennessee State University, 1977; Ph.D, University of North Carolina, 1984.

Snyder, Joyce Marlene, Research Assistant Professor. Institute of Family and Neighborhood Life. BS, 1971, MA, 1990, PhD, 1995, University of Nebraska-Lincoln.

Song, Bo, Associate Professor, Forestry and Natural Resources. BS, 1985, PhD, 1988, Georgia Institute of Technology (Korea); PhD, Kyoto University (Japan), 1992.

Sosolik, Chad E., Assistant Professor, Physics and Astronomy. BS, Texas A&M University, 1995; MS, 1998, PhD, 2001, Cornell University.

Sparace, Kathryn Francine, Adjunct Professor, Genetics and Biochemistry. BA, 1978, MS, 1981, University of Wyoming; PhD, University of California-Berkeley, 1990.

Sparace, Salvatore A., Associate Professor, Biological Sciences. BS, Cornell University, 1975; PhD, University of Wyoming, 1982.

Sparks, Elisa K., Associate Professor, English. BA, Bryn Mawr College, 1973; MA, 1977, PhD, 1978, Indiana University.

Sparks, Peter R., Professor, Civil Engineering. BSc, University of Bristol (England), 1968; PhD, University of London (England), 1974.

Spearman, Timothy P., Professor, Biological Sciences. BA, 1975, MA, 1978, California State University; PhD, University of California, 1983.

Spiro, Arthur M., Adjunct Professor, Arthur M. Spiro Center for Entrepreneurial Studies. MS, Massachusetts Institute of Technology, 1947.

Spitzer, Hugh D., Associate Professor, Public Health Sciences. BA, 1972, MA, 1974, University of South Florida; PhD, 1985, MPH, 1996, Emory University.

Spivey, Michael E., Wachowicz Professor, Finance. BA, North Carolina State University, 1973; MBA, East Carolina University, 1978; PhD, University of Tennessee, 1987.

Sproull, Brian M., Lecturer, Performing Arts. BMUS, University of Georgia, 1997; MM, University of Utah, 2002; DMA, University of Alabama, 2006.

Sridharan, V., Professor, Management. BE, Madurai-Kamaraj University (India), 1975; PhD, University of Iowa, 1987.

St. John, Caron H., Professor, Management. BS, Georgia Institute of Technology, 1976; MBA, 1984, PhD, 1988, Georgia State University.

Standley, Melissa J., Lecturer, English. BS, University of South Florida, 1988; MA, 1993, PhD, 1999, Florida State University.

Stanley, Jonathan D., Assistant Professor, School of Accounting and Legal Studies. BSBA, 1999, MPA, 2004, PhD, 2007, University of Houston.

Stansell, Elizabeth Anderson, Lecturer, English. BA, Bryn Mawr College, 2002; MA, 2004, PhD, 2007, University of Texas.

Stanley, Kate, Lecturer, English. BA, 2002, MS, 2003, PhD, 2006, University of Houston.

Starkey, Charles, Assistant Professor, Philosophy and Religion. BA, Claremont McKenna College, 1987; MA, 1991, University of Wisconsin-Madison.

Stauthausen, Werner Benjamin, Lecturer, Mathematical Sciences. BS, Baldwin-Wallace College, 1999; MS, Clemson University, 2001.

Stecker, Pamela M., Professor, Teacher Education. BS, 1967, MEd, 1988, PhD, 1993, Vanderbilt University.

Stephens, Benjamin R., Professor, Psychology. BS, University of Georgia, 1979; PhD, University of Texas, 1985.

Sterling, Patrick D., Lecturer, Computer Science. BS, University of Louisiana-Lafayette, 1971; MS, Clemson University, 1977.

Stevens, Dennis E., Associate Professor, Computer Science. BA, Eastern Michigan University, 1965; MS, Rutgers University, 1975; PhD, Clemson University, 1983.

Stevenson, John E., Professor, Animal and Veterinary Sciences. BS, University of Wisconsin-River Falls, 1985.

Stevenson, John E., Adjunct Professor, Genetics and Biochemistry. BS, Furman University, 1962; MD, Wake Forest University, 1966.

Stewart, Joseph Earl, Jr., Department Chair and Professor, Political Science. BA, University of Georgia, 1970; MA, Florida State University, 1971; PhD, University of Houston, 1977.

Stewart, Wayne H., Jr., Associate Professor, Management. BS/BA, 1984, MBA, 1988, Western Carolina University; PhD, University of North Texas, 1995.

Still, Hugh R., Adjunct Assistant Professor, Forestry and Natural Resources. BS, University of Georgia, 1978; MS, Clemson University, 1980.

Stocks, Stephanie Dawn, Lecturer, Biological Sciences. BS, Texas A&M University, 1994; BS, University of Tennessee, 1997; MS, Western Carolina University, 2000.

Stoddard, Allison K., Lecturer, Mathematical Sciences. BA, 1985, MS, 1990, Clemson University.

Stone, Kenneth C., Adjunct Associate Professor, Agricultural and Biological Engineering. BS, 1981, MS, 1985, PhD, 1987, University of Florida.

Straka, Thomas J., Professor, Forestry and Natural Resources. BS, 1972, MS, 1973, University of Wisconsin; MBA, University of South Carolina, 1978; PhD, Virginia Polytechnic Institute and State University, 1981.

Strang, William C., Associate Professor, Entomology, Soils, and Plant Sciences. BS, 1968, MS, 1972, University of Georgia; PhD, Virginia Polytechnic Institute and State University, 1979.

Sturkie, Douglas K., Department Chair and Professor, Sociology. BA, Newberry College, 1970; MSW, University of South Carolina, 1973; PhD, University of Southern California, 1979.

Summers, Joshua D., Assistant Professor, Mechanical Engineering. BSME, 1996, MSME, 1998, University of Missouri; PhD, Arizona State University, 2002.

Sun, Shuyu, Assistant Professor, Mathematical Sciences. BS, 1991, MEng, 1994, DEng, 1997, Tianjin University (China); MS, 2002, PhD, 2003, University of Texas-Austin.

Sun, Xiaogian, Assistant Professor, Mathematical Sciences. BS, Nanjing Normal University (China), 1987; MS, 1993, DSc, 1999, East China Normal University (China); PhD, University of Missouri-Columbia, 2006.

Sun, Ya-ting, Frank Henry Leslie Professor of Materials/Organic Chemistry, BS, Zhengzhou Institute of Technology (China), 1982; MS, Zhejiang University (China), 1985; PhD, Florida State University, 1989.

Surver, William M., Professor, Biological Sciences. BS, Saint Francis College, 1966; PhD, University of Notre Dame, 1974.

Sutton, Zachary W., Lecturer, Sociology. BA, 2002, MS, 2005, Clemson University.

Swanson, Elizabeth O., Lecturer, School of Nursing. BS, Baylor University, 1975; MN, Emory University, 1990; MPhil, Emory University, 1990.

Swanyngham, Thomas, Adjunct Assistant Professor, Forestry and Natural Resources. BS, 1984, MS, 1988, Clemson University.

Sweeney, John R., Interim Associate Dean, College of Agriculture, Forestry, and Life Sciences; Professor, Forestry and Natural Resources. BS, 1967, MS, 1971, University of Georgia; PhD, Colorado State University, 1975.

Switzer, Deborah M., Professor, Teacher Education. BA, University of Texas, 1976; MEd, 1987, PhD, 1993, University of Illinois.
Walker, Terry H., Assistant Professor, Agricultural and Biological Engineering, BS, 1989, MS, 1992, PhD, 1997, University of Tennessee
Walker, Neil G., Professor, Finance, BS, 1975, MA, 1978, University of Florida; PhD, University of Texas; 1986; MAI
Wan, Peter, Adjunct Assistant Professor, Food Science and Human Nutrition, BSE, Cheng-Kung University (China); MSc, Illinois Institute of Technology, 1970; PhD, Texas A&M University, 1973
Wang, Gaofeng G., Associate Professor, Forestry and Natural Resources, BSc, 1983, MSc, 1986, Nanjing Forestry University (China); PhD, University of British Columbia (Canada), 1993
Wang, Kuang-Ching, Assistant Professor, Electrical and Computer Engineering, BS, 1997, MS, 1999, National Taiwan University (Taiwan); 2001, PhD, 2003, University of Wisconsin-Madison
Wang, Liang Jiang, Assistant Professor, Genetics and Biochemistry, BS, Zhejiang University (China), 1986; MS, Mississippi State University, 2001; PhD, University of Georgia, 1999
Wang, Pingxian, Assistant Professor, Electrical and Computer Engineering, BS, University of Wisconsin-Madison; PhD, Tsinghua University (China), 2000; PhD, Cornell University, 2004
Wang, Xi, Adjunct Assistant Professor, Genetics and Biochemistry, BS, 1991, MS, 1994, WuXi AppTec Industry (China); PhD, Louisiana State University; Agricultural and Mechanical College, 1999
Wang, Zijun, Assistant Professor, Computing Science, BS, 1990; MS, 1993, University of Science and Technology (China); PhD, University of Central Florida, 2001
Warber, Adam L., Assistant Professor, Physical Science, BA, Hope College, 1994; MA, Michigan State University, 1996; PhD, Texas A&M University, 2002
Weid Vaught, Virginia A., Senior Lecturer, School of Animal and Legal Studies, BA, University of Hawaii, 1982; MA, George Washington University, 1987; MPAcc, Clemson University, 1995
Weiner, Barbara Jean Gulesserian, Associate Professor, English; Adjunct Professor, Parks, Recreation, and Tourism Management; Adjunct Professor, Forestry and Natural Resources; Lecturer, Mathematical Sciences
Weiner, Frederick George, Lecturer, Languages, BM, University of Rochester; 1964; PhD, University of Pennsylvania, 1964
Weis, Christina E., Associate Professor, Horticulture, BS, Temple University, 1994; PhD, Pennsylvania State University, 1998
Welch, Garb, Professor, Physics and Astronomy, BS, University of Pennsylvania, 1962; MS, Massachusetts Institute of Technology, 1962; PhD, University of Pennsylvania, 1972
Welch, David O., Adjunct Professor, Physics and Astronomy, BS, University of Tennessee, 1969; MS, Massachusetts Institute of Technology, 1973; PhD, University of Wisconsin, 1988
Wells, Mary S., Assistant Professor, Parks, Recreation, and Tourism Management; Adjunct Professor, Forestry and Natural Resources; Lecturer, School of Nursing
Wells, Mary S., Assistant Professor, Parks, Recreation, and Tourism Management; Adjunct Professor, Forestry and Natural Resources; Lecturer, School of Nursing
Wells,Politics, directory, School of Accounting and Legal Studies, BA, University of Hawai'i, 1982; MS, Colorado State University, 1984; PhD, George Washington University
Wells, Sarah Stoll, Lecturer, Languages; BA, Miami University, 2001; MA, University of Kentucky, 2007
Wayne, Millicent H., Lecturer, Graphic Communications; BS, 2000, MA, 2001, Appalachian State University
Weatherford, Carol G., Associate Professor, Teacher Education; BS, 1972, MS, 1973, EDS, 1975, University of Georgia; EdD, North Carolina State University, 1984
Weatherford, David E., Jr., Professor, Family Outreach. BS, 1972, MEd, 1978, University of Georgia; EdD, North Carolina State University, 1981
Weaver, Kenneth Allen, Lecturer, Computer Science. BS, 1966, MA, 1976, Florida State University; PhD, Clemson University, 2004
Webb, Charles K., Assistant Professor, Bioengineering. BS, Clemson University, 1992; PhD, University of Utah, 1999
Webster, Sheri Smith, Lecturer, School of Nursing, BS, Clemson University, 1980; MS, Mercer University, 2006
Wei, Yan Zhang, Associate Professor, Biological Sciences. BS, Shenyang Normal College (China); MS, Institute of Hydrobiology of the Chinese Academy of Sciences (China), 1985; PhD, Ohio University, 1996
Weinbrenner, Donna Ruth, Lecturer, Biological Sciences. BS, 1994, MS, 1996, Clemson University
Weisenberger, Eric, Associate Professor, Computer Engineering. BA, 1993, MT, 1995, Georgia Southern University; PhD, Virginia Polytechnic Institute and State University, 1999
Weiss, Frederick George, Lecturer, Languages, BM, University of Rochester; 1964; PhD, University of Pennsylvania, 1964
Welsh, Ralph Stewart, Lecturer, Public Health Sciences. BS, University of Wisconsin, 1991; MS, University of South Carolina, 1998
Welton, Ralph E., Jr., Director and Professor, School of Accountancy and Legal Studies. BA, Anderson University, 1976; MS, 1978, PhD, 1982, Louisiana State University
Wen, Xuejun, Assistant Professor, Bioengineering, MD, Henan Medical University (China); MS, Zhejiang University (China); MS, 1997, University of Cincinnati, 1999; PhD, University of Utah, 2003
Wentworth, William M., Professor, Sociology, BA, Indiana University, 1972; MA, University of Maryland, 1974; PhD, University of Virginia, 1978
Wesley, Kathryn M., Associate Librarian, University Libraries. BA, Northeast Louisiana University, 1977; MLIS, University of Southern Mississippi, 1987
Westall, James M., Jr., Professor, Computer Science. BS, Davidson College, 1968; PhD, 1973, MS, 1978, University of North Carolina
Wetsel, Margaret A., Associate Professor, School of Nursing. BSN, Indiana University, 1978; MS, Ohio State University, 1979; PhD, University of Texas-Austin, 1988
Wheeler, Alfred G., Jr., Adjunct Professor, Entomology, Soils, and Plant Sciences. BA, Grinnell College, 1966; PhD, Cornell University, 1971
Wheeler, Alfred P., Department Chair and Professor, Biological Sciences. BS, Butler University, 1969; PhD, Duke University, 1975
Whetstone, Jack M., Associate Professor, Forestry and Natural Resources, Belle W. Baruch Institute of Coastal Ecology and Forest Science. BS, 1975; MS, 1978, Clemson University.

Whidler, Bruce Allen, Assistant Professor, Perfoming Arts; Director of Audio Engineering. BS, 1982, MM, 1992, DMA, 2002, Ball State University.

White, Curtis D., Sr., Professor, Agricultural and Biological Engineering, Agricultural Education Program. BS, Clemson University, 1980; MS, 1985, PhD, 1988, University of Missouri.

Whiteside, William S., Associate Professor, Packaging Science. BS, 1984, MS, 1986, PhD, 1999, Clemson University.

Whitwell, Ted, Department Chair and Professor, Horticulture. BS, University of Tennessee-Martin, 1972; MS, 1974, PhD, 1977, Oklahoma State University.

Wiatrak, Pawel, Assistant Professor, Entomology, Soils, and Plant Sciences. Edisto Research and Education Center. MS, 1992, PhD, 1997, Agricultural University (Poland).

Wicker, David L., Adjunct Professor, Animal and Veterinary Sciences. BS, 1969, PhD, 1973, Clemson University.

Wicks, Bruce E., Adjunct Associate Professor, Parks, Recreation, and Tourism Management. BS, 1970, MA, 1979, State University of New York-Brockport, PhD, Texas A&M University, 1986.

Wieck, Margaret Maria, Professor, Mathematical Sciences. MS, 1979, PhD, 1984, University of Mining and Metallurgy (Poland).

Wiege rt, Elaine Mumbauer, Assistant Professor, Teacher Education. BA, 1985, MED, 1991, Clemson University; PhD, Clemson University, 2002.

Wiesman, Daryl W., Associate Professor, Packaging Science. BS, 1984, MS, 1986, PhD, 1999, Clemson University; PhD, Clemson University, 2001.

Wills, William, Adjunct Assistant Professor, Entomology, Soils, and Plant Sciences. BS, Fresno State College-Bakersfield Center, 1959; MS, Pennsylvania State University, 1965.

Willoughby, Deborah E., Professor, School of Nursing. BS, 1976, MS, 1986, Clemson University; PhD, Georgia State University, 1995.

Williams, Frank D., Adjunct Professor, Entomology, Soils, and Plant Sciences. BS, Southern Arkansas University, 1973; MS, Southern Arkansas University, 1980.

Williams, Margaret Maria, Associate Professor, Horticulture. MS, 1979, PhD, 1984, University of Mining and Metallurgy (Poland).

Williams, Thomas M., Professor, Forestry and Natural Resources, Belle W. Baruch Institute of Coastal Ecology and Forest Science. BS, 1969, MS, 1971, PhD, 1976, University of Minnesota.

Wills, William, Adjunct Assistant Professor, Entomology, Soils, and Plant Sciences. BS, Fresno State College-Bakersfield Center, 1959; MS, Pennsylvania State University, 1965.

Wilson, Paul Wayne, Professor, Economics. BA, Rice University, 1980; AM, 1982, PhD, 1986, Brown University.

Wilson, Mark R., Professor, English. BA, 1971, MA, 1973, West Virginia University; PhD, Vanderbilt University, 1978; CPA.

Winslow-Bowe, Sarah Evelyn, Assistant Professor, Sociology. BA, 2000, BA, 2000, Skidmore College; PhD, 2006, University of Pennsylvania.

Winter, Mark, Assistant Professor, Communication. BS, 1966, MBA, 1970, North Carolina State University; PhD, Texas Technical University, 1984.

Wintz, Joseph A., Assistant Professor, Consumer Behavior and Management. BS, University of Virginia, 1970; MS, George Washington University, 1974; JD, George Mason University, 1985.

Witte, James C., Professor, Agriculture, Soils, and Plant Sciences. BS, 1976, Florida State University; PhD, Texas Christian University, 1983.

Winslow-Bowe, Sarah Evelyn, Assistant Professor, Sociology. BA, 2000, BA, 2000, Skidmore College; PhD, 2006, University of Pennsylvania.

Wolak, Francis J., Chief, Computing Officer, Extension, Plant and Natural Resources. BS, 1976, MSc, 1977, University of Wisconsin; PhD, 2001, Harvard University.

Wolfgang, Hubertus, Professor, Finance. BS, University of Vienna, 1970; PhD, University of Wisconsin, 1973.

Wolf, Jack D., Adjunct Professor, Finance. BA, University of Virginia, 1961; MBA, Wake Forest University, 1993; PhD, 2006, University of Utah, 2000.

Wolf, John D., Adjunct Professor, Communication Studies. BS, 2001, MS, 2003, State University of New York; PhD, University of Georgia, 2006.

Wolf, Robert John, Adjunct Professor, Entomology, Soils, and Plant Sciences.BS, Hope College, 1974; MS, Western Michigan University, 1976; PhD, University of Wisconsin-Milwaukee, 1985.

Woodard, Damon L., Assistant Professor, Computer Science. BS, Tulane University, 1997; ME, Pennsylvania State University, 1999; PhD, University of Notre Dame, 2004.

Woodard, James D., Named Professor, Political Science. BS, Abilene Christian University, 1970; MA, American University, 1973; PhD, Vanderbilt University, 1978.

Woodward-Detrich, Denise C., Director, Rudolph E. Lee College, 1976; Professor, School of Architecture and Landscape Architecture. BS, University of Virginia, 1976; MS, University of Virginia, 1982; PhD, University of Miami, 1984.

Woodruff, Duane N., Lecturer, Graphic Communications. BS, California State University-Chico, 1983.

Woodruff, Nona L., Assistant Professor, Graphic Communications. BA, California State University-Chico, 1983; MS, Central Missouri State University, 1986; EdD, Clemson University, 1995.

Woodward-Detrich, Denise C., Director, Rudolph E. Lee College, 1976; Professor, School of Architecture and Landscape Architecture. BS, University of Virginia, 1976; MS, University of Virginia, 1982; PhD, University of Miami, 1984.

Woodruff, Duane N., Lecturer, Graphic Communications. BS, California State University-Chico, 1983.

Woodruff, Nona L., Assistant Professor, Graphic Communications. BA, California State University-Chico, 1983; MS, Central Missouri State University, 1986; EdD, Clemson University, 1995.

Wyatt, Douglas E., Adjunct Assistant Professor, School of the Environment. BA, University of Tennessee, 1980; MS, Vanderbilt University, 1985; PhD, University of South Carolina, 1995.

Wyffels, Jennifer T., Adjunct Assistant Professor, Biological Sciences. Adjunct Assistant Professor, Animal and Veterinary Sciences. BS, Bradley University, 1991; PhD, Illinois State University, 2001.

Xiao, Xiaodong, Professor, Electrical and Computer Engineering. BS, Tsinghua University (China), 1968; PhD, University of Mississippi, 1985.

Xue, Xianchun, Assistant Professor, Mechanical Engineering. BS, University of Science and Technology (China), 1995; PhD, Chinese Academy of Sciences (China), 2000; PhD, University of Toronto (Canada), 2006.

Yadav, Anand K., Adjunct Professor, Horticulture. BSc, 1965, MSc, 1967, G. B. Pant University of Agriculture and Technology (India); PhD, University of Illinois-Urbana-Champaign, 1972.

Yang, Tianxia, Assistant Professor, Finance. BA, University of International Business and Economics (China), 1996; MSA, 1999, MS, 1999, University of Miami; PhD, University of Georgia, 2005.

Yang, Yanzhu, Assistant Professor, School of the Environment. BS, 1992, MS, 1993, PhD, 1996, Tsinghua University (China).

Yao, Hai, Assistant Professor, Bioengineering. BS, 1991, PhD, 1996, Xi’an Jiaotong University (China); PhD, University of Miami, 2004.

Yarrow, Greg K., Professor, Forestry and Natural Resources. BS, University of Southern Mississippi, 1977; MS, Mississippi State University, 1979; DF, Stephen F. Austin State University, 1987.

Yasmin, Nighat, Professor, Engineering and Science Education. BSc, University of Peshawar (Pakistan), 1981; BSc, N-WEP University of Engineering and Technology (Pakistan), 1986; MSc, University of Alberta (Canada), 1993; MS, University of Mississippi, 1990.

Yiannakis, Andrew, Professor, Parks, Recreation, and Tourism Management. BS, University of Keele (England), 1967; MA, University of North Carolina, 1969; PhD, University of New Mexico, 1973.

Yilmaz, Umit, Associate Professor, Planning and Landscape Architecture. BA, 1979, MA, 1981, PhD, 1988, Istanbul Technical University (Turkey).

Yoder, Sara Elizabeth, Senior Lecturer, Management. BS, Furman University, 1995; MS, Clemson University, 1997.

Yoon, Jeong-Rock, Assistant Professor, Mathematical Sciences. BS, Seoul National University (Korea), 1993; MS, 1995, PhD, 2001, Korea Advanced Institute of Science and Technology (Korea).

Yoon, Jeong-Rock, Assistant Professor, Mathematical Sciences. BS, Seoul National University (Korea), 1993; MS, 1995, PhD, 2001, Korea Advanced Institute of Science and Technology (Korea).

Yoon, Jeong-Rock, Assistant Professor, Mathematical Sciences. BS, Seoul National University (Korea), 1993; MS, 1995, PhD, 2001, Korea Advanced Institute of Science and Technology (Korea).
Yoon, Tae-hee, Adjunct Professor, Applied Economics and Statistics. LLB, Dong Guk University (Korea), 1995; MPA, Seoul National University (Korea), 1964; PhD, University of Connecticut, 1967
Young, Arthur P., Campbell Chair and Professor, English and Engineering. BA, University of Maryland, 1966; MA, 1968, PhD, 1971, Miami University
Young, Lance S., Professor, Aerospace Studies; Colonel, U.S. Air Force. BS, Newbury College, 1976; MA, University of Phoenix, 1993
Young, Shawn P., Adjunct Assistant Professor, Biological Sciences. BS, Northland College, 1996; MS, 2001, PhD, 2005, Clemson University
Yu, Xianzhong, Associate Professor. Biological Sciences. BS, Laiyang Agricultural College (China), 1985; MS, Changchung University (China), 1988; PhD, Ohio University, 1998
Yuan, Xiaocong, Assistant Professor, Bioengineering. BEngr, 1985, MEngr, 1988, Tianjan University (China); PhD, University of London (England), 1994
Zaczek, Barbara M., Professor, Languages. BA, University of Krakow (Poland), 1972; MA, 1988, PhD, 1992, University of Oregon
Zagenczyk, Thomas Joseph, Jr., Assistant Professor, Management. BS, 2001, PhD, 2006, University of Pittsburgh
Zamora, Maureen, Lecturer, Languages. BA, International University of the Americas, 1994; MBA, Interamerican University of Costa Rica, 1998
Zehnder, Geoffrey W., Coordinator. Integrated Pest Management and Sustainable Agriculture; Professor, Entomology, Soils, and Plant Sciences. BS, University of California-Davis, 1976; MS, 1980; PhD, 1984, University of California-Riverside
Zhang, Lei, Assistant Professor, Economics. BA, 1994, MA, 1997, Beijing University (China); PhD, Stanford University, 2004
Zhang, Ning, Assistant Professor, Bioengineering. BS, Nanjing University of Chemical Engineering (China), 1994; MS, University of Cincinnati, 2000; PhD, University of Utah, 2003
Zhang, Yanhua, Associate Professor, Languages. BA, Beijing Normal University (China), 1983; MA, Chinese Academy of Social Sciences (China), 1986; MA, 1993, PhD, 1999, University of Hawaii
Zheng, Yanfeng, Assistant Professor, Management. BS, Jilin University (China), 1997; MS, Northeastern University, 2000; PhD, University of Wisconsin-Madison, 2006
Ziegert, John Charles, Timken Chair in Automotive Design and Development and Professor, Mechanical Engineering. BS, Purdue University, 1969; MS, Northwestern University, 1977; PhD, University of Rhode Island, 1989
Zile, Michael R., Adjunct Professor, Bioengineering. BA, Knox College, 1974; MD, Rush University, 1977
Zillante, George, Adjunct Professor, Construction Science and Management. BArch, South Australian Institute of Technology, 1975; MS, University of South Australia (Australia), 1997
Zomer, Paul S., Adjunct Assistant Professor, Genetics and Biochemistry. BS, Lewis and Clark College, 1976; PhD, Colorado State University, 1980
Zombrunnen, David A., Warren H. Owen-Dake Energy Professor, Mechanical Engineering. BME, University of Minnesota, 1977; MSME, 1984, PhD, 1988, Purdue University; PE
Zungoli, Patricia A., Professor, Entomology, Soils, and Plant Sciences. BS, 1974, MS, 1979, University of Maryland; PhD, Virginia Polytechnic Institute and State University, 1982

FACULTY EMERTI

Abramovitch, Rudolph A., PhD, Professor Emeritus of Chemistry
Acker, Thomas Waring, BS, County Extension Agent Emeritus
Ackerman, Carl Willis, MS, Professor Emeritus of Animal Science
Acorn, John Thomson, MFA, Chair and Professor Emeritus of Art
Acton, James C., PhD, Sterling Professor Emeritus of Food Science and Human Nutrition
Adair, Joseph Henry, MEd, Professor Emeritus of Education
Adams, Jesse III, MAEd, Regional Director Emeritus
Aitken, James Bruce, PhD, Professor Emeritus of Horticulture
Alam, Khursheed, PhD, Professor Emeritus of Mathematical Sciences
Albert, Harold Edward, PhD, Professor Emeritus of Political Science
Albrecht, John E., PhD, Professor Emeritus of Animal and Veterinary Sciences
Allen, Joe Frank, PhD, Professor Emeritus of Chemistry
Allen, Leonard Ray, PhD, Professor Emeritus of Agronomy and Soils
Alley, Forrest Christopher, PhD, Professor Emeritus of Chemical Engineering
Alphin, John Gilbert, PhD, Professor Emeritus of Agricultural and Biological Engineering
Alston, Rowland Poole, Jr., County Extension Agent Emeritus
Altersson, David Roy, PhD, Professor Emeritus of Entomology, Soils, and Plant Science
Anand, Sitikala C., PhD, Professor Emeritus of Civil Engineering
Anand, Vara Barata, MS, Professor Emerita of Engineering Graphics
Anderson, Lutie Perdel, PhD, Dean Emeritus, College of Agricultural Sciences; Professor Emeritus of Agronomy and Soils
Appena, Joseph L., PhD, Professor Emeritus of History
Armstrong, Lyra Ann, MA, Professor Emerita of Libraries
Arnold, Edwin Pratt, MA, Professor Emeritus of German
Asley, Kathy Littlefield, MS, County Extension Agent Emerita
Aspland, J. Richard, PhD, Professor Emeritus of Materials Science and Engineering
Aucoin, Clayton Verl, PhD, Professor Emeritus of Mathematical Sciences
Bagby, Sara Averis, PhD, Professor Emerita of Home Economics
Baird, Betty Evans, MS, County Extension Agent Emerita
Barlage, William Berdell, Jr., PhD, Associate Dean Emeritus, College of Engineering; Professor Emeritus of Chemical Engineering
Barnett, Bobby Dale, PhD, Professor Emeritus of Poultry Science
Barnhill, James Wallace, MA, Professor Emeritus of History
Baron, William, PhD, Professor Emeritus of Civil Engineering
Barron, Charles Henson, DSc, Professor Emeritus of Chemical Engineering
Barth, Clyde Lewis, PhD, Professor Emeritus of Agricultural and Biological Engineering
Bass, Samuel David, County Extension Agent Emeritus
Bauer, Larry L., PhD, Professor Emeritus of Applied Economics
Bauld, Nelson Robert, Jr., PhD, Professor Emeritus of Mechanical Engineering and Engineering Mechanics
Baumgardner, Reginald Andrew, PhD, Professor Emeritus of Horticulture
Baxa, Earnest Granville, Jr., PhD, Professor Emeritus of Electrical and Computer Engineering
Beard, John Nelson, Jr., PhD, Professor Emeritus of Chemical Engineering
Beckwith, William Frederick, PhD, Professor Emeritus of Chemical Engineering
Bednar, John C., PhD, Professor Emeritus of Languages
Behery, Hassan Mohamed, PhD, Professor Emeritus of Textiles
Belcher, Cynthia A., MSN, Assistant Professor Emerita of Nursing
Bennett, Archie Wayne, PhD, Senior Vice Provost and Dean Emeritus of Graduate School; Professor Emeritus of Electrical and Computer Engineering
Bennett, John Everett, PhD, Professor Emeritus of Electrical and Computer Engineering
Berger, Leonard, PhD, Professor Emeritus of Psychology
Beyerlein, Adolph Louis, PhD, Chair and Professor Emeritus of Chemistry
Biehl, Thomas Michael, MS, County Extension Agent Emeritus
Bishop, Carl Barnes, PhD, Professor Emeritus of Chemistry
Bishop, Eugene Harlan, PhD, Alumni Professor Emeritus of Mechanical Engineering
Bishop, Muriel Boyd, PhD, Professor Emeritus of Chemistry
Black, John Olan, MS, Professor Emeritus of Agronomy and Soils
Black, Jonathan, PhD, Professor Emeritus of Bioengineering
Blackston, William Edward, BS, County Extension Agent Emeritus
Blair, Dudley W., PhD, Director of MBA Program; Professor Emeritus of Economics
Blanton, Lloyd Houston, PhD, Acting Head and Professor Emeritus of Agricultural Education
Bleser, Carol, PhD, Calhoun Lemon Professor Emerita of History
Bodine, Ashley B. II, PhD, Professor Emeritus of Animal and Veterinary Sciences
Book, Norman Loyd, PhD, Professor Emeritus of Construction Science and Management
Bookmyer, Beverly Brandon, PhD, Professor Emerita of Physics and Astronomy
Boone, James Edward, BS, County Extension Agent Emeritus
Bosdell, Francis Alvin, MEd, Professor Emeritus of Industrial Education
Bose, Anil Kumar, PhD, Professor Emeritus of Mathematical Sciences
Boxwell, John Smith, Jr., County Extension Agent Emeritus
Box, Benton Holcombe, DF, Dean Emeritus of College of Forest and Recreation Resources; Professor Emeritus of Forestry Resources
Boykin, Joseph F., Jr., MS, Dean of Libraries and Librarian Emeritus
Bradbury, Douglas Wilson, MSE, Alumni Professor Emeritus of Mechanical Engineering
Bradford, Garnett Lowell, PhD, Professor Emeritus of Agricultural and Applied Economics
Bradow, David W., Professor Emeritus, Horticulture
Brantley, Herbert, PhD, Head and Professor Emeritus of Parks, Recreation, and Tourism Management
Brawley, Joel V., Jr., PhD, Alumni Distinguished Professor Emeritus of Mathematical Sciences
Briscoe, Ida Carolyn, EdD, Professor Emerita of Curriculum and Instruction
Brittain, Jere Alonzo, PhD, Professor Emeritus of Horticulture and Integrated Pest Management
Brook, Julia Ashley, County Extension Director Emerita
Brooks, Afton Dewayne, EdD, Professor Emeritus of Curriculum and Instruction
Brown, Bennie Mae Porter, MEd, County Extension Agent Emerita
Brown, Carolyn Scarry, PhD, Professor Emerita of Biochemistry
Brown, Farrell Blenn, PhD, Interim Dean Emeritus of Graduate School; Professor Emeritus of Chemistry
Brown, Russell H., PhD, Professor Emeritus of Civil Engineering
Brown, Thomas M., PhD, Professor Emeritus of Entomology
Brown, William Glynn, Jr., PhD, Professor Emeritus of Animal, Dairy, and Veterinary Sciences
Bryan, Edward Lewis, DBA, Professor Emeritus of Accounting
Bryan, Jones Woodrow, DVM, Director of Livestock Poultry Health Emeritus
Bryant, Hallman Bell, PhD, Professor Emeritus of English
Buckner, Sam Levi, EdD, Professor Emeritus of Curriculum and Instruction
Buist, Elizabeth Rhodes, BS, Extension Associate Emerita
Bunn, Joe Millard, PhD, Chair and Professor Emeritus of Agricultural and Biological Engineering
Burch, Elmer Earl, Jr., PhD, Professor Emeritus of Business Administration and Mathematical Sciences
Burkett, Byron Verner, Jr., PhD, Professor Emeritus of Technology and Human Resource Development
Burnett, G. Wesley, PhD, Professor Emeritus of Parks, Recreation, and Tourism Management
Bussey, Marie Martin, County Extension Agent Emerita
Butler, John Harrison, EdD, Head and Professor Emeritus of Music
Butler, John Kenrick, Jr., DBA, Professor Emeritus of Management
Byars, Edward Ford, PhD, Executive Assistant Emeritus to the President; Professor Emeritus of Mechanical Engineering and Engineering Mechanics
Caley, Paul Cochran, PhD, Professor Emeritus of Agricultural Education
Calvez, Daniel J., PhD, Professor Emeritus of Languages
Campbell, Alice Young, MS, County Extension Agent Emerita
Camper, N. Dwight, PhD, Professor Emeritus of Entomology, Soils, and Plant Sciences
Card, Edith Bynson, PhD, Professor Emerita of Music
Carner, Gerald R., PhD, Professor Emeritus of Entomology, Soils, and Plant Sciences
Carpenter, Earl Thomas, EdD, Head and Professor Emeritus of Agricultural Education
Carroll, June Langley, BS, District Extension Director Emerita
Carther, George E., Jr., PhD, Associate Dean of Undergraduate Academic Services and Professor Emeritus of Plant Pathology and Physiology
Caskey, Claire Oman, MA, Professor Emeritus of English
Castro, Walter Ernest, PhD, Professor Emeritus of Mechanical Engineering and Engineering Mechanics
Cely, Joseph Eugene, MS, County Extension Agent Emeritus
Chapman, Stephen R., PhD, Professor Emeritus of Agronomy and Soils
Cheatham, Samuel Augustus, MAg, County Extension Agent Emeritus
Chisman, James Allen, PhD, Professor Emeritus of Industrial Engineering
Cholewinski, Frank Michael, PhD, Professor Emeritus of Mathematical Sciences
Christenbury, Gerald Davis, PhD, Professor Emeritus of Agricultural and Biological Engineering
Christenbury, Joyce Hvrd, MEd, Professor Emerita of Family and Youth Development
Christoph, Laverne McKay, MA, Professor Emeritus of English
Claise, Alison L., PhD, Professor Emerita of Accounting
Clark, James Edwin, PhD, Professor Emeritus of Civil Engineering
Clarke, Richard L., PhD, Professor Emeritus of Management
Clements, Stanley Gordon, Jr., Distinguished Area County Agent Emeritus
Clinckescales, William Cherry, EdD, Assistant Director of Extension Emeritus
Colburn, Frances Louise, MLS, Head and Librarian Emerita of Circulation Unit
Cole, Spurgeon Northren, PhD, Professor Emeritus of Psychology
Collier, John A., PhD, Professor Emeritus of Agricultural and Biological Engineering
Collins, Donald Lynn, MS, Professor Emeritus of Planning and Landscape Architecture
Collins, Joyce Smith, County Extension Agent Emerita
Collins, Thomas Frank, MS, Professor Emeritus of Genetics and Astronomy
Conover, Richard Allan, Jr., PhD, Professor Emeritus of Parks, Recreation, and Tourism Management
Cook, Bruce Farrell, PhD, Director Emeritus of the Boyd Center; Professor Emeritus of Music
Cook, Wilton Pierce, PhD, Professor Emeritus of Horticulture
Cooledge, Harold Normand, Jr., PhD, Professor Emeritus of Architectural History
Cover, Perry H., MLS, Librarian Emerita
Cox, Henley Morris, PhD, Dean Emeritus, College of Liberal Arts; Professor Emeritus of English
Cradock, Ornett Roy, PhD, Professor Emeritus of Agronomy and Soils
Crader, Kelly Wayne, PhD, Professor Emeritus of Sociology
Crofton, Mauichiel, PhD, Professor Emerita of French
Crino, Mechthild, PhD, Alumni Distinguished Professor Emeritus of Management
Crosby, Birdie Raymond, Jr., MPA, County Extension Agent Emeritus
Crosby, Margaret Seawright, EdD, Professor Emerita of Curriculum and Instruction
Cross, Dee Lewis, PhD, Professor Emeritus of Animal and Veterinary Sciences
Crouch, James Page, EdD, Alumni Distinguished Professor Emeritus of Graphic Communications
Culbertson, Carroll Preston, BS, Extension Regional Director Emeritus
Culler-Hair, Margaret Ann, MS, County Extension Agent Emeritus
Cunningham, Bennie Lee, MS, Professor Emeritus of Agricultural Education
Dalla Mura, Richard Anthony, BS, County Extension Agent Emeritus
Davis, James Richard, PhD, Professor Emeritus of Accounting
Davis, Rose Jones, EdD, Professor Emerita of Family and Youth Development
Davis, Ruby Sellers, MA, Professor Emerita of History
Day, Frank Louis, MA, Professor Emeritus of English
Day, Mary Sue, BS, County Extension Agent Emerita
Deal, Elywn Ernest, PhD, Assistant Director Emeritus for Extension and Research
Dean, Jordan Arthur, MA, Professor Emeritus of Modern Languages
Dickerson, Ottie Joseph, PhD, Head and Professor Emeritus of Plant Pathology and Physiology; State Plant Pathologist
Dickey, Joseph Freeman, PhD, Alumni Professor Emeritus of Animal, Dairy, and Veterinary Sciences
Diefendief, Russell Judd, PhD, McAlister Professor Emeritus of Ceramic Engineering
Diehl, John R., PhD, Professor Emeritus of Animal and Veterinary Sciences
Dillman, Buddy Leroy, PhD, Professor Emeritus of Agricultural and Applied Economics
Dillon, Charles Ronald, PhD, Professor Emeritus of Botany
Dillon, Howard, Jr., BS, County Extension Agent Emeritus
Dimond, Thomas W., MFA, Professor Emeritus of Art
Dinger, Dennis Russell, PhD, Professor Emeritus of Ceramic and Materials Engineering
Dixon, Marvin Warren, PhD, Alumni Distinguished Professor Emeritus of Mechanical Engineering
Doost, Roger K., PhD, Professor Emeritus of Accountancy
Douglas, Teamon Kaya, DEng, Professor Emeritus of Landscape Architecture
Douglas, William L., PhD, Professor Emeritus of Electrical and Computer Engineering
Draper, Michael J., PhD, Professor Emeritus of Materials Science and Engineering
Duke, Albert Link, PhD, Professor Emeritus of Electrical and Computer Engineering
Dukes, Geraldine Dorman, MEd, Extension Regional Director Emerita
Dunn, B. Allen, PhD, Director of Environmental Toxicology; Professor Emeritus of Forestry and Natural Resources
Dunn, Charles Wyrte, PhD, Professor Emeritus of Political Science
DuRant, John Alexander III, PhD, Professor Emeritus of Entomology
Durham, Bill Gravely, MEd, Professor Emeritus of Spanish
Dyck, Lawrence A., PhD, Professor Emeritus of Biological Sciences
Eaddy, Elvie Estew, County Extension Agent Emerita
Eaddy, Susan Tomlinson, BS, Distinguished County Agent Emerita
Eagle, Jesse Claude, MS, Extension Regional Director Emeritus
Edie, Danny D., PhD, Professor Emeritus of Chemical Engineering
Edwards, James Leon, MS, Assistant Dean Emeritus, College of Engineering; Professor Emeritus of Mechanical Engineering
Edwards, Jane Snipes, County Extension Agent Emerita
Edwards, Robert Lee, PhD, Professor Emeritus of Animal Science
Eifand, Thomas Daniel, MS, Associate Dean and Director Emeritus of Research, College of Commerce and Industry; Professor Emeritus of Textiles
Eilin, Robert Dean, MArch, Professor Emeritus of Architecture
Egan, Clifton Scott Miller, MFA, Alumni Distinguished Professor Emeritus of Theatre
Egan, Martin David, MS, Professor Emeritus of Construction Science and Management
Elliot, Ralph D., PhD, Vice Provost, Off-Campus Distance and Continuing Education; Professor Emeritus of Economics
Elrod, Alvon Creighton, PhD, Professor Emeritus of Mechanical Engineering
Ensor, Janet Elizabeth, BS, County Extension Agent Emerita

Epps, Philip Olin, Area County Extension Agent Emeritus

Estew, Elias Benton, MS, Professor Emeritus of Agronomy and Soils

Eubanks, Isaac Dwaine, PhD, Professor Emeritus of Forestry and Natural Resources

Everson, Avernold George, PhD, Professor Emeritus of Forestry and Natural Resources

Evell, Dan Odell, PhD, Associate Director of Extension Emeritus

Fair, Charles Clifford, PhD, Professor Emeritus of Ceramic Engineering

Fairey, John Edward III, PhD, Professor Emeritus of Ceramic Engineering

Falk, Edward Lockwood, DPA, Professor Emeritus of Planning Studies

Fallaw, Jeraly Kirkley, County Extension Agent Emerita

Fanning, James Collier, PhD, Professor Emeritus of Chemistry

Faris, Jesse Edwin, PhD, Director Emeritus, International Programs of Agricultural and Natural Resources; Head and Professor Emeritus of Agricultural Economics and Rural Sociology

Fendley, Timothy Thomas, PhD, Professor Emeritus of Aquaculture, Fisheries, and Wildlife Sciences

Fennell, Robert E., PhD, Professor Emeritus of Mathematical and Natural Sciences

Fernandez, Elena Gonzales, BA, Professor Emerita of Spanish

Fernandez, Gaston Juan, PhD, Professor Emeritus of Spanish

Fitch, Lewis Thomas, PhD, Alumni Professor Emeritus of Electrical and Computer Engineering

Fitzsimons, Frank Lockwood III, MS, County Extension Agent Emeritus

Foley, Charles William, PhD, Professor Emeritus of Animal and Veterinary Sciences

Fones, Shelley White, PhD, Professor Emerita of Elementary and Early Childhood Education

Foster, Carolyn Ecel, MA, Professor Emerita of English

Foster, Ida Marie Sloan, MLS, Librarian Emerita

Fox, Richard Charles, PhD, Professor Emeritus of Entomology

Franklin, Joyce Byrd, MS, County Extension Agent Emerita

Franklin, Ralph E., PhD, Professor Emeritus of Crop and Soil Environmental Science

Frederick, John Arthur, MS, County Extension Agent Emeritus

Freeman, Edwin Armstead, PhD, Professor Emeritus of Music

Friedlob, George Thomas, PhD, Professor Emeritus of Accountancy

Fuhr, Donald Lee, EdD, Professor Emeritus of Counseling and Educational Leadership

Fulmer, John Patrick, MS, Professor Emeritus of Horticulture

Gable, Paul Kistler, Jr., BA, Assistant Director of Extension Emeritus

Gaddis, Joseph Leo, PhD, Professor Emeritus of Mechanical Engineering

Gadson, Byron, BS, County Extension Agent Emeritus

Gahan, Lawrence Willard, PhD, Alumni Distinguished Professor of Parks, Recreation, and Tourism Management

Galluscio, Eugene Hugo, PhD, Professor Emeritus of Psychology

Garner, Peggy, PhD, Professor Emerita of Mathematical Sciences

Garner, Thomas Harold, PhD, Professor Emeritus of Agricultural and Biological Engineering

Garratt, Thomas R., ME, Instructor Emeritus of Agricultural and Biological Engineering

Garrison, Olen Branford, PhD, Director Emeritus of Agricultural Experiment Station and Research in Agriculture; Professor Emeritus of Horticulture

Gaskins, Judith Collins, MS, County Extension Agent Emerita

Gauthreaux, Sidney A., PhD, Professor Emeritus of Biological Sciences

Geldard, John Francis, PhD, Professor Emeritus of Chemistry

Gettys, William Edward, PhD, Professor Emeritus of Physics

Gilchrist, Ralph Wayne, PhD, Professor Emeritus of Electrical and Computer Engineering

Gilliland, Bobby Eugene, PhD, Special Assistant Emeritus to the President; Professor Emeritus of Electrical and Computer Engineering

Gillreath, John Atkins, MS, Professor Emeritus of Physics

Gimenez, Tomas, Professor Emeritus, Animal and Veterinary Sciences

Glick, Bruce, PhD, Head and Professor Emeritus of Plant Science

Glover, Judith Lyles, BA, County Extension Agent Emerita

Goree, James Gleason, PhD, Centennial Professor Emeritus; Professor Emeritus of Mechanical Engineering and Mechanics

Gorsuch, Glyde S., PhD, Professor Emeritus of Entomology

Gossett, Billy Joe, PhD, Professor Emeritus of Crop and Soil Environmental Science

Goswami, Bhuvendra, PhD, Professor Emeritus of Materials Science and Engineering

Goswami, Dixie Scope, MA, Professor Emerita of English

Graben, Henry Willingham, PhD, Professor Emeritus of English

Grady, C.R. Ledingham, PhD, R. A. Bowen Professor Emeritus of Environmental Engineering and Science

Graham, W. Dayce, Jr., PhD, Professor Emeritus of Crop and Soil Environmental Science

Gray, Charles Harmon, BA, County Extension Agent Emeritus

Gray, Turman Ray, MS, Associate Professor Emeritus of Accounting

Gray, Gordon Walter, EdD, Dean Emeritus, College of Education

Gray, Hugh Brunson, BS, County Extension Agent Emeritus

Gregory, Kay Rish, County Extension Agent Emerita

Griffin, Barbara, PhD, Professor Emerita of Leadership, Technology, and Counseling Education

Griffin, Barbara Jean, MA, Professor Emerita of Agricultural and Biological Engineering

Griffin, Deuel Norton, MAT, Professor Emeritus of English

Griffin, Randall Parrish, MS, Professor Emeritus of Entomology

Griffin, Villard Stuart, Jr., PhD, Professor Emeritus of Geology

Grimes, Lawrence W., PhD, Professor Emeritus of Applied Economics and Statistics

Grove, Harold Jesse, MS, Associate Professor Emeritus of Parks, Recreation, and Tourism Management

Haefling, Gene Henry, PhD, Bishop-Distinguished Professor Emeritus of Ceramic Engineering

Hall, Basil Edwin, MEd, Professor Emeritus of Art

Ham, Donald L., PhD, Professor Emeritus of Forest and Natural Resources

Hamby, John Vernon, PhD, Professor Emeritus of Education

Hamilton, Max Greene, PhD, Professor Emeritus of Horticulture, Edisto Research and Education Center

Hammit, William E., Professor Emeritus, Parks, Recreation, and Tourism Management

Hammond, Alexander Francis, MS, Professor Emeritus of Engineering Technology

Hammond, Joseph Langhorne, PhD, Professor Emeritus of Electrical and Computer Engineering

Handlin, Dale Lee, MS, Professor Emeritus of Animal Science

Harder, Lillian U., MM, Professor Emerita of Music

Hare, Eleanor O., PhD, Associate Professor Emerita of Computer Science

Hare, William R., Jr., PhD, Professor Emeritus of Mathematical Sciences

Harris, Carolyn Martin, MS, County Extension Agent Emerita

Harris, Harold M., Jr., PhD, Professor Emeritus of Applied Economics and Statistics

Harris, Maureen, MLS, Professor Emerita of Libraries

Harrison, James William, Jr., PhD, Professor Emeritus of Electrical and Computer Engineering

Hart, Julian Blake, PhD, Professor Emerita of Curriculum Instruction

Harvey, Lawrence Harmon, PhD, Professor Emeritus of Agronomy and Soils

Harwell, Richard Lynn, PhD, Professor Emeritus of Agricultural and Applied Economics

Haselton, George Montgomery, PhD, Professor Emeritus of Geology

Hash, John Alex, EdD, Professor Emeritus of Agricultural Education

Hau, Joseph Rhodes, PhD, Professor Emeritus of Horticulture

Haymond, Jacqueline Landis, PhD, Professor Emerita of Forest Resources

Hays, Ruth Laniher, PhD, Professor Emerita of Biological Sciences

Hays, Sidney Brooks, PhD, Head and Professor Emeritus of Entomology

Hegg, Richard Olaf, PhD, Professor Emeritus of Agricultural and Biological Engineering

Helms, Carl Wilbert, PhD, Professor Emeritus of Zoology

Hendrix, William Herlie, Ph.D, Head and Professor Emeritus of Management

Henricks, Donald Maurice, PhD, Chair and Professor Emeritus of Animal and Veterinary Sciences

Henry, Louis Lee, PhD, Professor Emeritus of English

Hill, James Riley, Jr., PhD, Professor Emeritus of Animal, Dairy, and Veterinary Sciences

Hilller, Howard Hughes, MS, County Extension Agent Emeritus

Hillman, Dannahla Valentine, County Extension Agent Emerita

Hiotto, Floyd Berry, Jr., BS, County Extension Agent Emeritus

Hipp, Opal Shepard, EdD, Professor Emerita, School of Nursing

Hite, James Cleveland, PhD, Alumni Professor Emeritus of Agricultural and Applied Economics

Hobson, James Harvey, PhD, Alumni Professor Emeritus of Chemistry

Hochheimer, Laura, PhD, Professor Emerita of Music

Hodges, Barbara Latimer, MED, County Extension Agent Emerita

Holahan, Ursula Ann, MS, Professor Emerita of Home Economics
Holder, Barbara J., PhD, Professor Emerita of Nursing
Holmes, Paul Thayer, PhD, Professor Emeritus of Mathematical Sciences
Holt, Albert Hamilton, PhD, Professor Emeritus of English
Hon, David N.-S., PhD, Professor Emeritus of Forest Resources
Hood, Clarence Elam, Jr., PhD, Professor Emeritus of Agricultural and Biological Engineering
Hook, Donal Delose, PhD, Professor Emeritus of Forestry
Horton, Paul Mackey, PhD, Professor and Associate Director of Extension Education
House, Verne Wadsen, PhD, Professor Emeritus of Agricultural and Applied Economics
Howard, Gordon Edward, PhD, Professor Emeritus of Parks, Recreation, and Tourism Management
Howell, Nelda Kay, MEd, Professor Emeritus of Home Economics
Hoyle, Elizabeth H., Professor Emerita, Packaging Science
Hubbard, John William, PhD, Professor Emeritus of Agricultural Economics and Rural Sociology
Hubbard, Julius Clifford, Jr., MS, Alumni Professor Emeritus of Textiles
Hudson, Larry Wilson, PhD, Professor Emeritus of Animal and Veterinary Sciences
Hudson, Mark Richards, MFA, Professor Emeritus of Art
Hudson, William Garraux, MS, Professor Emeritus of Mechanical Engineering
Huey, Cecil O., Jr., PhD, Professor Emeritus of Mechanical Engineering
Huffman, John W., PhD, Professor Emeritus of Chemistry
Hughes, Buddy Lee, PhD, Professor Emeritus of Animal and Veterinary Sciences
Hughes, Robbie Blankenship, EdD, Professor Emerita, School of Nursing
Hunter, Janis Gerrard, Distinguished County Agent Emerita
Hunter, Orren Franklin, Sr., MS, Professor Emeritus of Textiles, Fiber, and Polymer Science
Hunter, Robert Howard, MFA, Professor Emeritus of Visual Arts
Hurst, Victor, PhD, Vice President Emeritus of Student Affairs and Dean of the University; Dean Emeritus of the Graduate School; Alumni Professor Emeritus of Dairy Science
Hutton, Dale Jovan, MArch, Professor Emeritus of Architecture
Idol, John Lane, Jr., PhD, Alumni Professor Emeritus of English
Irwin, John Waltrip, MagEd, Extension Animal Scientist Emeritus
Isbell, Clinton H., EdD, Professor Emeritus of Leadership, Technology, and Counselor Education
Jackson, Herman Brown, Jr., PhD, Department Chair and Head of Plant Industries Emeritus
Jacques, John David, MPH, Professor Emeritus of Architecture
James, Ann E., PhD, Professor Emerita of Parks, Recreation, and Tourism Management
James, Willie Romando, PhD, Professor Emeritus of Family and Youth Development
James, Zoe Seabrook, MagEd, Distinguished County Extension Agent Emeritus
Janzen, Jacob John, PhD, Professor Emeritus of Dairy Science
Jenkins, Gloria, MS, County Extension Agent Emerita
Jensen, Arthur Kenneth, PhD, Professor Emeritus of Vocational-Technical Education
Johnson, Albert W., PhD, Professor Emeritus of Entomology, Soils, and Plant Sciences
Johnson, Ruby Carolyn, MS, County Extension Agent Emerita
Jones, Champ McMillian, PhD, Professor Emeritus of Agronomy and Soils
Jones, Emory Valentine, MS, County Extension Director Emeritus
Jones, Jack Edenfield, PhD, Professor Emeritus of Poultry Science
Jones, Joe Kenneth, BS, State Leader Emeritus of 4-H and Youth Development Programs; Professor Emeritus of Animal Science
Jones, W. A., Jr., MA, County Extension Director Emeritus
Jordan, Johnny Wayne, PhD, Professor Emeritus of Agricultural and Applied Economics
Josey, James Larry, PhD, Professor Emeritus of Civil Engineering
Kahl, Kandice H., PhD, Professor Emerita of Agricultural and Applied Economics
Kanet, John Joseph, PhD, Professor Emeritus of Management
Keener, John Leroy, Jr., County Extension Agent Emeritus
Keese, Lee Shirley, BS, County Extension Agent Emeritus
Kennath, Thomas M., PhD, Dean, College of Engineering and Science and Professor Emeritus of Environmental Engineering
Keller, Deloris Olivia, Distinguished County Agent Emerita
Keller, Don F., PhD, Professor Emeritus of Leadership, Technology, and Counseling Education
Keller, Frederick Jacob, PhD, Professor Emeritus of Physics
Kelly, Mary Ann, PhD, Professor Emerita of Nursing Science
Kenelly, John William, EdD, Alumni Professor Emeritus of Mathematical Sciences
Kennedy, John M., Professor Emeritus, Mechanical Engineering
Kennedy, William Joseph, PhD, Professor Emeritus of Mechanical Engineering
Kessler, George John, PhD, Professor Emeritus of Forest and Natural Resources
Kender, Andrew Jackson, BA, County Extension Agent Emeritus
King, Grayd Ansel, Jr., PhD, Professor Emeritus of Horticulture
King, Samuel C., PhD, Professor Emeritus of Languages
Kingman, Alta Randall, PhD, Professor Emeritus of Horticulture
Kingsland, Graydon Chapman, Sr., PhD, Professor Emeritus of Plant Pathology and Physiology
Kirkwood, Charles Edward, Jr., MS, Professor Emeritus of Mathematical Sciences
Kissam, John Benjamin, PhD, Professor Emeritus of Entomology
Klein, Richard Harold, PhD, Professor Emeritus of Finance
Kline, Ellis Lee, PhD, Professor Emeritus of Microbiology and Molecular Medicine
Kline, Judith Spiers, MS, Professor Emerita of Family and Youth Development
Kline, Priscilla Mackenzie, EdD, Professor Emerita of Nursing Science
Knapp, Ronald James, PhD, Alumni Professor Emeritus of Sociology
Knox, Sarah Stewart, BS, Associate District Extension Leader Emerita; Professor Emerita of Home Economics
Komo, John, PhD, Professor Emeritus of Electrical and Computer Engineering
Kopeczyk, Ronald James, MSEE, Professor Emeritus of Engineering
Kocma, Ernest Joseph, EdD, Professor Emeritus of Education
Labecki, Geraldine, EdD, Dean Emerita, College of Nursing; Professor Emerita of Nursing
LaFleur, Kermit, PhD, Professor Emeritus of Agronomy and Soils
Lambert, Barbara Sherrill, BS, County Extension Agent Emeritus
Lambert, Jerry Roy, PhD, Professor Emeritus of Agricultural and Biological Engineering
Lambert, Robert Stansbury, PhD, Professor Emeritus of History
Lander, Ernest McPherson, Jr., PhD, Alumni Professor Emeritus of History
Lane, Carl Leaton, PhD, Professor Emeritus of Forestry
Lane, Samuel, County Extension Agent Emeritus
Laskar, Renu C., PhD, Professor Emerita of Mathematical Sciences
Lathrop, Jay Wallace, PhD, Professor Emeritus of Computer Engineering
LaTorre, Donald Rutledge, PhD, Professor Emeritus of Mathematical Sciences
LaTorre, Jeuel Gilliam, MA, Professor Emeritus of Mathematical Sciences
Law, R. T. Harry, PhD, Professor Emeritus of Mechanical Engineering
Leach, John W., PhD, Professor Emeritus of Biological Sciences
Leathrum, James Frederick, PhD, Professor Emeritus of Electrical and Computer Engineering
Lee, Daniel Dixon, Jr., PhD, Professor Emeritus of Animal and Veterinary Sciences
Lee, Evelyn J., Professor Emerita of Nursing
Lee, Peter Roald, MArch, Alumni Distinguished Professor Emeritus of Architecture
Lefort, Henry Gerard, PhD, Professor Emeritus of Ceramic Engineering
Leigh, Herbert D. III, PhD, Professor Emeritus of Materials Science and Engineering
Leonard, Michael S., PhD, Professor Emeritus of Industrial Engineering
Leonard, William H., PhD, Professor Emeritus of Teacher Education
Lester, Clarence Martin, BS, County Extension Agent Emeritus
Leuschner, William Albert, PhD, Professor Emeritus of Forest Resources
Lewis, Gordon, PhD, Professor Emeritus of Ceramic and Materials Engineering
Lewis, Stephen A., PhD, Professor Emeritus of Entomology, Soils, and Plant Sciences
Ligon, James Teddie, PhD, Professor Emeritus of Entomology, Soils, and Plant Sciences
Lok, James Teddie, PhD, Professor Emeritus of Agricultural and Biological Engineering
Ling, Robert Francis, PhD, Professor Emeritus of Mathematical Sciences
Linville, Dale Edward, PhD, Professor Emeritus of Agricultural and Bioengineering
Locke, Ernest Lyle, County Extension Agent Emeritus
Logan, Barbara N., Professor Emerita of Nursing
Loudemark, Joseph Girard, PhD, Professor Emeritus of Accounting
Lovedahl, Gerald Grey, PhD, Professor Emeritus of Technology and Human Resource Development
Loyd, Max Ira, PhD, Professor Emeritus of Agricultural and Applied Economics
Lukawcki, Stanley Michael, PhD, Professor Emeritus of Mathematical Sciences
Lumpkin, Oliver Reese, PhD, Professor Emeritus of Education
Macy, Jacques Berr, MAT, Professor Emeritus of French
Manley, Donald G., Professor Emeritus, Entomology
Marbut, Samuel Alexander, BS, Professor Emeritus of Forestry
Marsinko, Allan, Professor Emeritus, Forestry and Natural Resources
Martin, John Campbell, PhD, Professor Emeritus of Electrical and Computer Engineering
Martin, Mary Virginia, MA, Extension Associate Emerita
Martini, Joseph Albert, PhD, Professor Emeritus of Agronomy and Soils
Marullo, Nicasio Philip, PhD, Professor Emeritus of Chemistry
Marvin, John Henry, Jr., MS, Professor Emeritus of Textiles
Mathews, Andrew Clark, PhD, Professor Emeritus of Botany
Mathis, Lee Terrell, Jr., Distinguished County Agent Emeritus
Matthews, James Edward, EdD, Dean Emeritus, College of Education; Professor Emeritus of Education
Matthewson, Charles, PhD, Chair and Professor Emeritus of Construction Science and Management
Maurer, Donald Edwin, EdD, Professor Emeritus of Industrial Education
Macur, Anthony Robert, PhD, Professor Emeritus of Crop and Soil Environmental Sciences
McClain, Eugene Frederick, PhD, Professor Emeritus of Agronomy and Soils
McCollough, Joe Lawrence, PhD, Professor Emeritus of Philosophy
McConnell, James Calvin, Jr., PhD, Professor Emeritus of Animal and Veterinary Sciences
McCorkle, Linda Harris, BS, County Extension Agent Emerita
McCormac, Jack Clark, LLd, Alumni Professor Emeritus of Civil Engineering
McCutcheon, Gloria S., PhD, Professor Emerita of Entomology, Soils, and Plant Sciences
McDaniel, Martha Huggins, Area County Extension Agent Emerita
McDowell, Helen Camp, BA, County Extension Agent Emerita
McGee, Charles McKay, Jr., MA, Professor Emeritus of French and Latin
McGregor, Rob Roy, Jr., PhD, Professor Emeritus of English and French
McGregor, William Henry Davis, PhD, Dean Emeritus, College of Forest and Recreation Resources; Professor Emeritus of Forestry
McInnis, Thomas McLeod, Jr., PhD, Professor Emeritus of Biological Sciences
McLaughlin, John Joseph, PhD, Professor Emeritus of English
McLean, Edward Lee, PhD, Professor Emeritus of Agricultural and Applied Economics
McLellan, Margaret K., PhD, Associate Professor Emerita of Parks, Recreation, and Tourism Management
McLellan, Robert Wesley, PhD, Chair and Professor Emeritus of Parks, Recreation, and Tourism Management
McNatt, Jo Ann, PhD, Professor Emerita of French
Melsheimer, Stephen S., PhD, Professor Emeritus of Chemical Engineering
Melton, Judith M., PhD, Associate Dean and Professor Emerita of Languages
Menke, Warren Wells, PhD, Professor Emeritus of Management
Mercer, Robert Jack, EdD, Professor Emeritus of Agricultural Education
Miller, Ansel Eldon, PhD, Professor Emeritus of Forest Resources
Miller, Donald Piguet, PhD, Professor Emeritus of Physics
Miller, James Cleo, Jr., PhD, State Extension Leader Emeritus
Miller, Landon Carl, PhD, Professor Emeritus of Horticulture
Miller, Robert Walker, Jr., PhD, Professor Emeritus of Plant Pathology and Physiology
Miller, Stephen E., Professor Emeritus, Applied Economics and Statistics
Miller, Yvonne Holliday, MS, Staff Development Specialist Emerita
Mixon, Robert Floyd, MA, Professor Emeritus of Spanish
Molz, Fred J. III, Distinguished Scientist and Professor Emeritus, School of the Environment
Montanucci, Richard R., PhD, Associate Professor Emeritus of Biological Sciences
Moran, Ronald Wesson, PhD, Associate Dean Emeritus, College of Agriculture, Arts, and Humanities; Professor Emeritus of English
Morr, Charles Vernon, PhD, Sterling Professor Emeritus of Food Science
Moyle, David D., PhD, Associate Professor Emeritus of Bioengineering and Physics
Mullins, Joseph Chester, PhD, Professor Emeritus of Chemical Engineering
Murr, Kenneth R., Librarian Emeritus
Murrow, Elizabeth Jean, PhD, Professor Emerita of Nursing
Nance, John William, Jr., County Extension Agent Emeritus
Newton, Alfred Franklin, EdD, Head and Professor Emeritus of Industrial Education
Nicholas, David M., Jr., PhD, Kathryn and Calhoun Lemon Professor Emeritus of History
Nicholson, James Harvey, MA, Professor Emeritus of Mathematics
Nix, Larry Edward, Professor Emeritus, Forestry and Natural Resources
Noble, G. E., PhD, Professor Emerita of Biological Sciences
Nolan, Clifford Newell, PhD, Professor Emeritus of Agronomy and Soils
Nunery, Henry Grady III, MAg, County Extension Agent Emeritus
Odom, Stephen, Jr., MS, County Extension Director Emeritus
Ogle, Wayne Leroy, PhD, Professor Emeritus of Horticulture
Oglesby, Frances Madelynn, PhD, Professor Emerita of Nursing
Okafor, Chinyelu B., Assistant Professor Emeritus, Public Health Sciences
Olive, Edward Fleming, EdD, Professor Emeritus of Education
Owens, Emma M., PhD, Professor Emeritus of Curriculum and Instruction
Owens, Rameth Richard, PhD, Professor Emerita of History
Owens, Walton Harrison, Jr., PhD, Professor Emeritus of Political Science
Owings, Marvin Alpheus, PhD, Head and Professor Emeritus of English
Oxendine, Laval, MS, County Extension Agent Emeritus
Padgett, Adrian Lewis, MS, Professor Emeritus of Agricultural Economics and Rural Sociology, Pee Dee Research and Education Center
Page, Edward W. III, PhD, Professor Emeritus of Computer Science
Page, Norwood Rufus, PhD, Head Emeritus, Agricultural Chemical Services Department; Professor Emeritus of Agronomy and Soils
Palmer, James Howell, PhD, Professor Emeritus of Agronomy and Soils
Pardue, Fred Eugene, PhD, Professor Emeritus of Animal, Dairy, and Veterinary Sciences
Pardue, John Cecil, Jr., BS, Area County Extension Agent Emeritus
Park, Laurentia Irene, PhD, Professor Emerita of Psychology
Parker, David Andrew, MS, County Extension Agent Emeritus
Parks, Clyde Leonard, PhD, Professor Emeritus of Agronomy and Soils
Parks, Thomas Ilon, PhD, Professor Emeritus of Educational Leadership
Pate, Dove Henry, Jr., EdD, Professor Emeritus of Technology and Human Resource Development
Patterson, Gordon W., MS, Professor Emeritus of Architecture
Paul, Frank Waters, PhD, McQueen Quantaluum Professor Emeritus of Mechanical Engineering
Payton, Malcolm J. B., PhD, Professor Emeritus of Biological Sciences
Peck, John Charles, PhD, Professor Emeritus of Computer Science
Pease, William Walter, EdD, Professor Emeritus of Education
Peppers, Larry G., PhD, Professor Emeritus of Sociology
Perry, Philip Rodney, MAg, County Extension Agent Emeritus
Perry, Robert Lindsay, MME, Professor Emeritus of Engineering Technology
Petruzz, Alton Joseph, Jr., PhD, Professor Emeritus of Horticulture
Pipkins, Toni Scott, BS, Extension Associate Emerita
Pitzer, John Bruce, PhD, Resident Director Emeritus, Pee Dee Research and Education Center; Professor Emeritus of Agronomy and Soils
Pivorunas, Edward B., PhD, Professor Emeritus of Biological Sciences
Platts, Rebecca Gaines, BA, County Extension Director Emerita
Polk, George Merritt, Jr., MArch, Professor Emeritus of Architecture
Porter, John Jefferson, PhD, Professor Emeritus of Textiles, Fiber, and Polymer Science
Potts, Thomas D., PhD, Professor Emeritus of Parks, Recreation, and Tourism Management
Powell, Gary L., PhD, Professor Emeritus of Genetics and Biochemistry
Price, Dawn Louisa, BS, County Extension Agent Emerita
Privette, Charles Victor, Jr., MS, Professor Emeritus of Agricultural and Biological Engineering
Proctor, Thomas Gilmer, PhD, Professor Emeritus of Mathematical Sciences
Ransom, Rosa Mitchell, MS, County Extension Agent Emerita
Rathwell, P. James, PhD, Professor Emeritus of Applied Economics and Statistics
Ray, John Robert, PhD, Professor Emeritus of Physics and Astronomy
Reamer, Larry Donald, MS, Professor Emeritus of Forestry
Redmann, Linda Louise, PhD, Professor Emerita of Family and Youth Development
Reel, Jerome V., Jr., PhD, Senior Vice Provost, University Historian and Professor Emeritus of History
Reese, Richard M., PhD, Professor Emeritus of Marketing

Wynn, Eddie Dowell, MCRP, Professor Emeritus of Agricultural and Applied Economics
Wynn, Mable Hill, MS, Professor Emerita of Parks, Recreation and Tourism Management
Yandle, Thomas Bruce, Jr., PhD, Dean Emeritus, College of Business and Behavioral Science; Alumni Distinguished Professor Emeritus of Economics
Yang, Tah-Teh, PhD, Professor Emeritus of Mechanical Engineering
Yardley, Darrell Gene, PhD, Professor Emeritus of Zoology
Yates, William Pierce, MS, Extension Program Coordinator Emeritus
Zahn, Robert, PhD, Professor Emeritus of Forestry
Zehr, Eldon Irvin, PhD, Professor Emeritus of Plant Pathology and Physiology
Zielinski, Paul Bernard, PhD, Director Emeritus, Water Resources Research Institute; Professor Emeritus of Civil Engineering
Zimmerman, James Kenneth, PhD, Professor Emeritus of Biochemistry
APPENDIX

ENGLISH FLUENCY
Clemson University has established a policy to assure that all instructional activities are conducted by individuals possessing appropriate proficiency in written and oral use of the English language. Instructional activities include lectures, recitation or discussion sessions, and laboratories. The individuals to be certified include full-time and part-time faculty, graduate teachers of record, graduate teaching assistants, and graduate laboratory assistants for whom English is not the first language.

A student who experiences difficulty with an instructor's written or oral English and who wishes to seek relief must do so prior to the seventh meeting of a 50-minute class and prior to the fifth meeting of a 90-minute class in regular semesters. In the five-week summer sessions, relief must be sought prior to the third class meeting.

The procedure is summarized as follows:

a. The student must quickly bring the problem to the attention of the instructor's department chair either directly or through a faculty member such as the student's advisor. That department chair will assess the complaint and, if deemed valid, offer an appropriate remedy within two days.

b. A student who is not satisfied with the department chair's decision or the relief suggested may appeal within two days to a five-member hearing panel comprised of three faculty members and two students appointed by the Senior Vice Provost and Dean of Undergraduate Studies.

Students with questions should contact the Associate Dean of Undergraduate Studies, E-103 Martin Hall.

EQUAL OPPORTUNITY AFFIRMATIVE ACTION
Clemson University, in compliance with Titles VI and VII of the Civil Rights Act of 1964, as amended, Title IX of the Education Amendments of 1972, and Sections 503 and 504 of the Rehabilitation Act of 1973, does not discriminate on the basis of race, color, national origin, religion, sex, or disability in any of its policies, procedures, or practices; nor does the University, in compliance with the Age Discrimination in Employment Act of 1967, as amended, and Section 402 of the Vietnam Era Veterans Readjustment Act of 1974, discriminate against any employees or applicants for employment on the basis of their age or because they are disabled veterans or veterans of the Vietnam era.

Clemson University conducts its programs and activities involving admission, access, treatment, employment, teaching, research, and public service in a nondiscriminatory manner as prescribed by Federal laws and regulations.

In conformance with University policy and pursuant to Executive Order 11246, as amended, Section 503 of the Rehabilitation Act of 1973, and Section 402 of the Vietnam Era Veterans Readjustment Act of 1974, Clemson University is an Affirmative Action/Equal Opportunity Employer.

Inquiries concerning the above may be addressed to the following:

Executive Secretary
Clemson University Board of Trustees

Director, Office for Civil Rights
Department of Education
Washington, DC 20201

FAMILY PRIVACY PROTECTION ACT

The South Carolina Family Privacy Protection Act (SC Code 30-2-10 et. seq.) defines personal information as "information that identifies or describes an individual including, but not limited to, an individual's photograph or digital image, physical or biometric characteristics, social security number, date of birth, driver's identification number, name, home address, home telephone number, medical or disability information, education level, financial status, bank account(s), number(s), account or identification number(s), account or identification number(s) issued by and/or used by any state or state agency or private financial institution, employment history, height, weight, race, or physical details, signature, biometric identifiers, and any credit records or reports.

Some of the information in documents which students provide to Clemson University may be personal information as defined above. Pursuant to Section 408-28.4(A)(4), students are advised that this information may be subject to public scrutiny or release. The state also advised that personally-identifiable information contained in these educational records cannot be released under the Family Educational Rights and Privacy Act of 1974, as amended (FERPA). If students elect to opt out of the release of directory information under FERPA, the University will not release any personal information except as otherwise required or authorized by law.

HARASSMENT

In general, harassment is unwelcome verbal or physical contact, based upon race, color, religion, sexual orientation, gender, national origin, age, disability, status as a military veteran, or protected activity (i.e., opposition to prohibited discrimination or participation in the statutory complaint process), that unreasonably interferes with the person's work or educational performance or creates an intimidating or hostile work or educational environment. Examples may include, but are not limited to, epithets, slurs, jokes, or other verbal, graphic, or physical contact.

The entire text of the University's policy on harassment can be obtained from the Office of Access and Equity, 207 Holtzendork, (864) 656-3181 or at www.clemson.edu/access/policies.html.

INFORMATION RESOURCES FOR STUDENTS

Clemson University computing resources are the property of Clemson University, to be used for university-related business. Students have no expectation of privacy when utilizing university computing resources, even if the use is for personal purposes. The university reserves the right to inspect, without notice, the contents of computer files regardless of medium, the contents of electronic mailboxes and computer conferencing systems, systems output such as printouts, and to monitor network communication when:

1. It is considered reasonably necessary to maintain or protect the integrity, security or functionality of university or other computer resources or to protect the university from liability;

2. There is reasonable cause to believe that the users have violated this policy or otherwise misused computing resources;

3. An account appears to be engaged in unusual or unusually excessive activity;

4. It is otherwise required or permitted by law.

Any suspected violations of this policy or any other misuse of computer resources by students normally should be referred to the Office of Student Conduct. That office will investigate the allegations and take appropriate disciplinary action. Violations of law related to misuse of computing resources may be referred to the appropriate law enforcement agency.

Notwithstanding the above, Clemson Computing and Information Technology may temporarily suspend, block or restrict access to an account, independent of university disciplinary procedures, when it appears reasonably necessary to do so in order to protect the integrity, security or functionality of university or other computer resources, to protect the university from liability, or where the emotional or physical well-being of any person is immediately threatened. When CCIT unilaterally takes such action, it will immediately notify the account holder of its actions and the reason for them in writing. The account holder may appeal the action taken by CCIT in writing to the Chief Information Officer.

Access will be restored to the account holder whenever the appropriate investigatory unit of the university determines that the protection of the integrity, security or functionality of university or other computing resources has been restored and the safety and well being of all individuals can reasonably be assured, unless access is to remain suspended as a result of formal disciplinary action imposed through the Office of Student Conduct or as a result of legal action.

Use of University computing resources, including network facilities, account numbers, data storage media, printers, plotters, microcomputer systems, and software for computing activities other than those authorized by the University is strictly prohibited. Unauthorized use of such resources is regarded as a criminal act in the nature of theft, and violators
are subject to suspension, expulsion, and civil and criminal prosecution.

Use of university computing resources, including network facilities, account numbers, data storage media, printers, plotters, microcomputer systems, and software for computing activities other than those authorized by the university is strictly prohibited. Unauthorized use of such resources is regarded as a criminal act in the nature of theft and violators are subject to suspension, expulsion, and civil and criminal prosecution.

The following are examples of misuse of computing resources:

1. Unauthorized duplication, distribution or alteration of any licensed software. This includes software licensed by the university and licensed software accessed using the computing networks.

2. Attempting to gain unauthorized access to any computing resource or data, or attempting to disrupt the normal operation of any computing resource or network -- at Clemson or anywhere on the Internet.

3. Attempting to use another student's or employee's computer account or data, without their permission.

4. Using the university electronic mail system to attack other computer systems, falsify the identity of the source of electronic mail messages. Sending harassing, obscene or other threatening electronic mail. Attempting to read, delete, copy or modify the electronic mail of others without their authorization. Sending, without official university authorization, “for-profit” messages, chain letters or other unsolicited “junk” mail.

5. Knowingly infecting any computing resource with a software virus.

6. Tampering with the university computer network or building wiring or installing any type of electronic equipment or software that could be used to capture or change information intended for someone else.

7. Participating in a “denial of service” attack on any other computer, whether on or off campus.

8. Using university computing or network resources for personal gain or illegal activities such as theft, fraud, copyright infringement, piracy (e.g., sound or video recording), or distribution of child pornography or obscenities.

PATENTS AND COPYRIGHTS

All students enrolling in Clemson University do so with full understanding that

1. The University has full ownership rights in any inventions, discoveries, developments and/or improvements, whether or not patentable (inventions), which are conceived, developed, or reduced to practice or caused to be conceived, developed, or reduced to practice by undergraduate students during the course of their academic activities conducted as part of any undergraduate curriculum. Any such invention will be handled by the University in the same manner as set forth in the Faculty Manual of Clemson University, the pertinent provision for which appears as Part IXB entitled “Patent Policy.”

2. Copyright ownership of any research work will be determined by University policy and by policies of organizations responsible for publishing or distributing copyrighted material.

Copies of the policies on patents and copyrights are available in the individual departments and colleges and in the Special Projects Office.
