NOTIFICATION OF RIGHTS UNDER THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.

A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

(2) The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

Note: The challenge of a student under this paragraph is limited to information which relates directly to the student and which the student asserts is inaccurate or misleading. With regard to a student’s grade, this right does not permit the student to contest a grade on the grounds that a higher grade is deserved, but only to show that the grade has been inaccurately recorded.

(3) The right to provide written consent before the University discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); contractors, consultants, volunteers and other outside parties to whom the institution has outsourced institutional services or functions instead of using University employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.

Upon request, the University also discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

(4) The right to refuse to permit the designation of any or all of the following categories of personally-identifiable information as directory information, which is not subject to the above restrictions on disclosure: student’s full name, permanent address and telephone number, local address and telephone number, e-mail address, Clemson identification number (the number that begins with a C on the student ID card and is also referred to as a student’s XID), username, state of residence, date and place of birth, marital status, academic class, class schedule and class roster, name of advisor, major field of study, including the college, division, department or program in which the student is enrolled, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance and graduation, degrees and honors and awards received including selection to a dean’s list or honorary organization and the grade point average of students selected, and the most previous educational institution attended. Photographic, video, or electronic images of students taken and maintained by the University are also considered directory information.

Directory information may be disclosed by the University for any purpose, at its discretion. Any student wishing to exercise his/her right to refuse to permit the designation of any or all of the above categories as directory information must give written notification to the Registration Services Office (E-206 Martin Hall) by the last day to register for the enrollment period concerned as published in the Clemson University calendar.

(5) The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-5901.
DISCLOSURE OF EDUCATION RECORDS IN HEALTH AND SAFETY EMERGENCIES

If the University determines that there is an articulable and significant threat to the health or safety of a student or other individuals, FERPA allows disclosure of information from education records to appropriate parties whose knowledge of the information is necessary to protect the health and safety of the student or other individuals. ¹

• “Articulable and significant threat” means that if a school official can explain why, based on all the information then available, he or she reasonably believes that a student poses a significant threat, such as a threat of substantial bodily harm, to any person, including the student, the University may disclose education records to any person whose knowledge of information from those records will assist in protecting a person from that threat.
• “Appropriate parties” include parents of the student; parents may be notified when there is a health or safety emergency involving their son or daughter.

In making a determination to disclose information, the University may take into account the totality of the circumstances pertaining to a threat to the safety or health of the student or other individuals. An emergency can be related to the threat of an actual, impending, or imminent emergency, such as a terrorist attack, a natural disaster, a campus shooting, or the outbreak of an epidemic such as e-coli. An emergency can also be a situation in which a student gives sufficient, cumulative warning signs that lead the school official to believe the student may harm himself at any moment.

The FERPA recordkeeping requirements require the University to record 1) the articulable and significant threat that formed the basis for the disclosure and 2) the parties to whom the information was disclosed. This record will demonstrate what circumstances led to the determination that a health or safety emergency existed and how the disclosure was justified. The record must be made within a reasonable period of time after the disclosure was made. The record must be maintained with the education records of the student for as long as the student’s education records are maintained. After disclosing information under the FERPA health and safety exception, employee(s) must document the following information and forward the records to the dean of students.

• Student’s name
• Name(s) of person(s) to whom the student posed a significant health or safety threat
• Description of the significant threat to health or safety
• Description of the circumstances and the information available (including relevant dates)
• Description of all the information that was disclosed
• Name(s) of person(s) to whom the information was disclosed (person(s) whose knowledge of the information would have assisted in protecting a person or persons from the threat; or student's parents)
• Date(s) disclosure was made
• Name(s) of CU employee(s) who determined a health and safety emergency existed
• Name(s) of CU employee(s) who disclosed the information
• Date the record of disclosure was made

¹Note: The FERPA health and safety requirements do not apply to disclosures to a Clemson University employee with a legitimate educational interest in the information. Information from education records may be disclosed to University employee if the information is necessary for that employee to perform work appropriate to his or her position.
GRADUATE SCHOOL

POLICY STUDIES
Doctor of Philosophy
Certificate
Clemson University offers graduate studies leading to a PhD degree and a Certificate in Policy Studies. Graduate work in policy studies enables a student to attain a high degree of specialized competence in policy analysis and to secure a mastery of policy research, emphasizing quantitative and economic skills. Government, industry, public policy "think tanks," and other policy research organizations, nonprofit organizations, and universities offer challenging opportunities in policy analysis, issue development, education, and related areas for persons with advanced training.

The program emphasizes quantitative, economic, and political organization, as well as other social science skills in the analysis and development of policy. Fundamental and rigorous quantitative and analytical skills for effective policy analysis are developed through core courses in political economy for public policy, ethics, statistical methods for policy research, demographic projections and spatial analysis, policy analysis and political choice, organizational theory and management, applied economics, and a policy analysis workshop. PhD students also select a concentration in Agricultural Policy, Environmental and Natural Resource Policy, Rural and Economic Development Policy, or Science and Technology. Flexibility is also achieved through enrichment, electives, leadership development courses, and the selection of a PhD dissertation topic. The program consists of a minimum of 63 credit hours beyond the bachelor’s degree, of which up to 24 credits may be drawn from master’s degree and other postgraduate work. There is no foreign language requirement for the PhD degree in Policy Studies.

The graduate program in Policy Studies also offers students enrolled in related master’s and doctoral programs the opportunity to gain competence in and understanding of policy analysis. Depending on students’ backgrounds and academic preparation, they may supplement their primary master’s coursework with a Certificate in Policy Studies. The Certificate in Policy Studies is designed to equip students with a set of explicit public policy research and analytical skills to augment their preparation in a traditional master’s program. The certificate program involves 12 credit hours of coursework.

The faculty in Policy Studies encourages applications for the PhD program from recipients of a master’s degree who wish to acquire policy research and analytical skills in economic development, agriculture, natural resource allocation, rural development, small town and community development, tourism development, environmental issues, land use, infrastructure, public finance, growth management, and science and technology. Master’s level students with similar interests are encouraged to enhance their graduate studies with a Certificate in Policy Studies.
The mission of the College of Agriculture, Forestry and Life Sciences is to provide teaching, research and service in agriculture, forestry and life sciences that will benefit the citizens of South Carolina and the nation. The College of Agriculture, Forestry and Life Sciences serves more than 3,800 graduate and undergraduate students.

The ability to understand and manipulate the molecular structure of biological systems, while at the same time understanding their practical management, offers immense potential to improve our world, whether it is to improve foods, building products, the environment, or our health. The College of Agriculture, Forestry and Life Sciences is using the same expertise to produce more food on less available land, grow better foods that will help prevent heart disease and fight breast cancer, package environmentally sound products, increase dairy production, and develop businesses and promote a “green” society.

The College of Agriculture, Forestry and Life Sciences offers Masters and Doctoral degree programs in disciplines in agriculture, forestry and life sciences, from the fundamental to the applied. The Master of Agricultural Education and Master of Forest Resources professional degrees are awarded to those individuals whose interests lie outside a research-oriented program. Combined BS/MS programs are available for Food Science, Biological Science/Bioengineering, Packaging Science and Wildlife and Fisheries Biology.

Cooperative programs with state, federal and private agencies allow students to extend their research off campus to the Greenwood Genetics Center, research and education centers spanning South Carolina, and state and national forests of the Savannah River Basin. Proximity to the Blue Ridge Mountains provides access to one of the most biologically diverse regions of the world.

**Agricultural Education**

**Master of Agricultural Education**

The Master of Agricultural Education is a professional degree designed to enhance the human resource skills in agriculture and education. The flexible program provides a core of planning, delivery, evaluation and administrative strategies while encouraging specialization in teacher education, adult and extension education, agricultural communications, youth development, or technology transfer. Graduates hold positions as agriculture teachers, extension agents, agricultural and environmental agency employees, as well as human resource development specialists in the agricultural industry.

Candidates for the degree are required to plan a program of study in consultation with the major advisor and graduate committee and complete a minimum of three credit hours in adult education, three hours in research methods and three hours in statistics; a minimum of 12 credit hours in the major field; and a minimum of six credit hours in an area of concentration outside the major field.

A minimum of 30 credit hours is required for the professional degree. At least one-half of these credit hours must be selected from courses numbered 700 or above. The student’s program of study must be approved by the advisory committee.

**Admission Requirements**

Students must complete all University applications, submit undergraduate overall grade averages and GRE scores, participate in an interview with a department graduate committee, and submit a writing sample on a topic assigned by the interview committee. Most admitted applicants have a GPA of at least 3.0 and GRE scores of at least 150 verbal, 141 quantitative and 3.0 writing. Acceptance will be based on an evaluation involving all of the above as well as appropriate recommendations. Additional undergraduate coursework may be required for marginally qualified students. Students without undergraduate Agricultural Education degrees, and those seeking teacher certification, are available for Food Science, Biological Science/Bioengineering, Packaging Science and Wildlife and Fisheries Biology.

**Applied Economics and Statistics**

**Master of Science**

The Master of Science program in Applied Economics and Statistics is jointly administered in cooperation with the College of Business and Behavioral Science. Graduate work in Applied Economics and Statistics enables students to add to their understanding of economic analysis, econometric methods, and statistical techniques. Our faculty place special emphasis on the economics of agricultural production and marketing, issues in agribusiness, economic development and analysis of government programs and policies. Both thesis and non-thesis options are available. The curriculum for both options includes recommended courses in applied economics and experimental statistics. Flexibility is achieved through choice of elective courses and, for the thesis option, in the selection of a master’s thesis topic. There is no foreign language requirement.

The school encourages applications from students with baccalaureate degrees in Agricultural or Applied Economics, Economics, Statistics, Mathematics, in natural resource areas such as Forestry or Wildlife Biology, and other majors. For more information, see the program description under Economics, College of Business and Behavioral Science.

**Biochemistry and Molecular Biology**

**Doctor of Philosophy**

Enrollment in the Biochemistry and Molecular Biology program is open to students with appropriate degrees in agricultural, biological, or physical sciences or engineering. Entering students must have satisfactory academic records in mathematical, physical and biological sciences. Research activities include bioinformatics, functional genomics, microbial and plant biochemistry, molecular biology, proteins and signal transduction.

**Degree Requirements**

The PhD program requires GEN 8140 and BCHM 8140 during a student’s first semester; and BCHM 8090 and 8900 during a student’s second semester. In addition, PhD students are required to attend BCHM 8250 every semester they are enrolled. Students beyond their first year are required to do one oral presentation every year in BCHM 8250.

A student’s dissertation committee will determine whether the student should take courses in addition to the required courses.

A dissertation, consisting of 18 credits of doctoral research (BCHM 9910), exclusive of any research credits earned at the master’s level, is required of PhD students. Successful completion of written and oral comprehensive examinations will admit doctoral students to candidacy for the PhD degree. A total of 30 credit hours beyond the master’s degree (or 60 hours beyond the bachelor’s degree) is required for the doctoral degree.
BIOLOGICAL SCIENCES

Master of Science

Doctor of Philosophy

The MS and PhD degree programs in Biological Sciences encompass a wide variety of disciplines in both plant and animal biology with three major emphasis areas: Ecology and Evolutionary Biology, Cell and Developmental Biology, and Comparative Organismal Biology.

Applicants to the graduate degree programs in Biological Sciences must have a bachelor’s or master’s degree and a background in training in biology. All students are expected to have completed inorganic and organic chemistry, physics, calculus, biology, plant and animal diversity, genetics, and evolutionary biology. Deficiencies (less than 18 hours total) may be remedied through appropriate coursework completed during the graduate program. Graduate credit is not normally awarded for remedial coursework. Students with more than 18 hours of deficiencies, including those with degrees outside of biology, are encouraged to contact the Department of Biological Sciences to discuss options for fulfilling coursework requirements in preparation for application to the MS and PhD programs.

Candidates for the MS degree must complete 30 hours of graduate credit, including 24 credits of coursework, six credits of thesis research, an acceptable thesis based on original research and satisfactory performance in a final oral examination.

Candidates for the PhD degree must complete 36 hours of graduate credit, including 24 credits of dissertation research, an acceptable dissertation based on original research and satisfactory performance in a final oral examination. Although there is no required coursework for the doctorate beyond the 18 credits of dissertation research, some graduate coursework emphasizing breadth and depth of knowledge in the life sciences is expected of each candidate. A total of 30 credit hours beyond the master’s degree (or 60 hours beyond the bachelor’s degree) is required for the doctoral degree.

Non-Thesis Option

The non-thesis option of the MS is designed specifically for K-12 teachers and others interested in biological sciences education. Candidates must complete a total of 30 semester hours of graduate coursework. At least 18 of the 30 hours must be at the 8000-level. All courses are offered online. A research proposal and project whose results are presented in written format is also a requirement. The scope of the research project is not as extensive as the thesis required in the traditional MS program; however, it is expected that students will conduct original scientific research and write a document of the caliber of a manuscript suitable for submission to a peer-reviewed journal. The student and the student’s graduate committee will determine the subject of the research project.

Admission to the non-thesis option of the MS program requires a suitable undergraduate education, two letters of recommendation, a resume, and a suitable GRE score. (GRE scores are not required for teachers with one or more years of teaching experience.) Students do not need an undergraduate degree in biology to be considered for admission.

ENTOMOLOGY

Master of Science

Doctor of Philosophy

The Entomology graduate programs of the School of Agricultural, Forest and Environmental Sciences are dedicated to providing leadership in environmental entomology. Research programs fall into three emphasis areas: arthropod biodiversity, agricultural entomology, and urban entomology. Facilities of the South Carolina Experiment Station on campus and at four research and education centers located in various regions of the state are available for graduate student research. In addition to teaching and research laboratories, specialized facilities within the department include the Clemson University Arthropod Collection; laboratories for molecular genetics, tissue culture and analytical chemistry/toxicology; wet laboratories; controlled and ambient temperature insect-rearing facilities; a free-flight butterfly facility; and greenhouses. Candidates for the MS degree must complete a minimum of 30 hours of graduate credit, including six hours of research and write a thesis. Candidates for the PhD degree must complete a minimum of 60 hours of graduate credit beyond the BS/BA degree and 30 beyond the MS degree, including 18 hours of dissertation research and write a dissertation. Candidates for both degrees must satisfy a set of core requirements, some of which may have been satisfied in a previous degree program.

ENVIRONMENTAL TOXICOLOGY

Master of Science

Doctor of Philosophy

The graduate program in Environmental Toxicology is an interdisciplinary program preparing students for careers in academia, private businesses or government agencies involved in environmental issues. Candidates applying in the M.S. and Ph.D. programs must meet all requirements for admission to the Graduate School and have an adequate background in the natural sciences, including organic chemistry, physics, calculus, biology, ecology, biochemistry, and physiology.

Candidates for the MS degree must complete 30 hours of graduate credit, including 24 credits of coursework, six credits of thesis research, an acceptable thesis based on original research and satisfactory performance in a final oral examination. A core of required courses consists of EES 8430 or EES 8450, ETOX 6300, ETOX 6370, ETOX 8610 a graduate-level statistics course. At least one-half of the total coursework must be at 8000-level.

Candidates for the PhD degree must complete 36 hours of graduate credit, including 24 credits of dissertation research, an acceptable dissertation based on original research and satisfactory performance in a final oral examination. In addition, a core of required courses, consisting of EES 8430 or EES 8450, ETOX 6300, ETOX 6370, ETOX 8610, a graduate-level statistics course, and 9 credit hours of appropriate graduate-level course work are required.

FOOD, NUTRITION AND CULINARY SCIENCES

Master of Science

Doctor of Philosophy

The graduate degree programs in Food, Nutrition, and Culinary Sciences are designed to prepare students for careers in academia, private businesses or government agencies involved in environmental issues. Candidates applying in the M.S. and Ph.D. programs must meet all requirements for admission to the Graduate School and have an adequate background in the natural sciences, including organic chemistry, physics, calculus, biology, ecology, biochemistry, and physiology.

Candidates for the MS degree must complete 36 hours of graduate credit, including 24 credits of coursework, six credits of thesis research, an acceptable thesis based on original research and satisfactory performance in a final oral examination. Although there is no required coursework for the doctorate beyond the 18 credits of dissertation research, some graduate coursework emphasizing breadth and depth of knowledge in the life sciences is expected of each candidate. A total of 30 credit hours beyond the master’s degree (or 60 hours beyond the bachelor’s degree) is required for the doctoral degree.

Non-Thesis Option

The non-thesis option of the MS is designed specifically for K-12 teachers and others interested in biological sciences education. Candidates must complete a total of 30 semester hours of graduate coursework. At least 18 of the 30 hours must be at the 8000-level. All courses are offered online. A research proposal and project whose results are presented in written format is also a requirement. The scope of the research project is not as extensive as the thesis required in the traditional MS program; however, it is expected that students will conduct original scientific research and write a document of the caliber of a manuscript suitable for submission to a peer-reviewed journal. The student and the student’s graduate committee will determine the subject of the research project.

Admission to the non-thesis option of the MS program requires a suitable undergraduate education, two letters of recommendation, a resume, and a suitable GRE score. (GRE scores are not required for teachers with one or more years of teaching experience.) Students do not need an undergraduate degree in biology to be considered for admission.

Transfer of Credits

With pre-approval, up to eight graduate credits may be transferred into the MS program. A grade of B or better is required in each course transferred.

Course Requirements—Thesis Option

A minimum of 24 credit hours of coursework and six credit hours of thesis research (FDSC 8910) is required for the MS degree. Only 6000-level courses and higher may be used for graduate credit and at least one-half of the 24 hours of coursework must be at the 8000 level or higher.
The following courses are required: EXST 8010 or equivalent, FDSC 8510 (one-credit hour seminar each year), FDSC 8100, NUTR 8030, 10 credit hours of advanced-level courses (may include courses in food science or in areas such as chemistry, nutrition, biochemistry, animal and veterinary sciences, microbiology, statistics, or cell biology, as required by the student’s Graduate Advisory Committee), and six credit hours of thesis research (FDSC 8910).

Course Requirements—Non-Thesis Option
A minimum of 30 hours of coursework as outlined below and a comprehensive, two-day final examination is required for the MS degree. The final examination consists of one day of core material and one day of content selected from departmental courses. Details may be found in the graduate handbook.

The following core courses are required: EXST 8010 or EDF 7780; FDSC 8100; and NUTR 8030.

Students select three out of the six following courses: FDSC 8110, 8120, 8150, NUTR 8040, 8050, 8070. Students select eight to ten additional credit hours from 6000-level or higher courses with approval of the student’s graduate committee.

In addition, for both the thesis and non-thesis options, a minimum grade-point average of 3.0 is required to maintain good academic standing and for graduation.

**Combined BS in Food Science/MS in Food, Nutrition and Culinary Sciences**

Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Enrollment guidelines and procedures can be found in the Undergraduate Announcements. Consult the Department of Food, Nutrition and Packaging Sciences for details.

**FOOD TECHNOLOGY**

**Doctor of Philosophy**

Students admitted to the PhD program in Food Technology must meet the following criteria.

1. The Aptitude Test of the Graduate Record Examination (GRE General Test) must be taken by all applicants. Most successful students have a minimum GRE score of 300 (combined and quantitative) and 4.0 on the written section.
2. A strong background in food science; human nutrition; physical, chemical, or biological sciences; or engineering is highly desirable.
3. Proficiency in food science must be demonstrated by satisfactory completion of coursework in the following areas: food chemistry, food microbiology, food processing, and biochemistry. Background course requirements will normally be satisfied with completion of a BS degree in Food Science from an accredited institution. Students deficient in any of these areas will be required to complete coursework to fulfill these background course requirements.
4. Acceptance is based upon academic transcripts with a minimum undergraduate grade point average of 3.0, three letters of recommendation, a statement of objectives and professional experience.
5. International students must have a minimum Test of English as a Foreign Language (TOEFL) score of 80. IELTS can be taken in lieu of TOEFL. Minimum score accepted on the IELTS is 6.5. International students must also submit documentation of adequate financial support for their studies.
6. An additional requirement for admission is identification of a research advisor prepared to accept the applicant as an advisee.

A limited number of research assistantships are available from grant funds, with the student assisting in the research supported under the grant. This research often may be applicable to the thesis or dissertation. Interested applicants should contact individual faculty for research assistantships. Applicants whose files are completed prior to February 15, will be given preferential consideration for research assistantships offered beginning fall semester.

There are no set course requirements for the doctorate in Food Technology. Candidates for the PhD degree must complete a minimum of 30 hours beyond the master’s degree, including at least 18 hours of dissertation research, in addition to writing a dissertation. It is expected that each PhD graduate will have a comprehensive understanding of the principles of food science with an expanded knowledge covering their focused research area. The PhD candidate’s advisory committee will have final approval on all coursework. PhD candidates must pass a comprehensive examination comprised of written and oral portions, given by the PhD candidate’s advisory committee. The successful student may also write and defend a dissertation to the satisfaction of the advisory committee. Dissertations usually contain a review of the literature and a detailed description of research in a scientific publication format. PhD students should expect to publish a minimum of two refereed research manuscripts from their dissertations.

**FOREST RESOURCES**

**Master of Forest Resources**

**Doctor of Philosophy**

Enrollment in the Master of Forest Resources and Master of Science programs is open to students who have earned a baccalaureate degree in forestry, forest products, or a related field. A master’s degree, preferably in a forestry discipline, is required for enrollment in the Doctor of Philosophy program. The candidate may be required to satisfy undergraduate deficiencies before being admitted to full status.

The Master of Forest Resources, a non-thesis degree, requires a minimum of 36 credit hours of graduate coursework with at least 18 of the required hours selected from courses numbered 7000 and above. A formal thesis is required for the MS and PhD degrees. The MS degree requires a minimum of 24 credit hours of coursework and six hours of research. The PhD degree requires a minimum of 16 credit hours of coursework and 18 hours of research beyond the student’s master’s degree coursework. For both degrees, one-half of the semester hours must be selected from courses numbered 8000 and above.

**GENETICS**

**Doctor of Philosophy**

The PhD degree in Genetics is administered by the Department of Genetics and Biochemistry. Research activities include biochemical, biometrical, molecular and population genetics, as well as bioinformatics, cytogenetics, and structural and functional genomics through arrangements with other participating disciplines and with the Greenwood Genetics Center.

**Degree Requirements**

The PhD program requires GEN 8140 and BCHM 8140 during a student’s first semester; and GEN 8050 and 8900 during a student’s second semester. In addition, PhD students are required to attend GEN 8250 every semester they are enrolled. Students beyond their first year are required to do one oral presentation every year in GEN 8250.

A student’s dissertation committee will determine whether the student should take courses in addition to the required courses.

A dissertation, consisting of 18 credits of doctoral research (GEN 9910) exclusive of any research credits earned at the master’s level, is required of PhD students. Successful completion of written and oral comprehensive examinations will admit the doctoral students to candidacy for the PhD degree.

**MICROBIOLOGY**

**Master of Science**

**Doctor of Philosophy**

The Department of Biological Sciences administers the MS and PhD degree programs in Microbiology. The Microbiology graduate programs includes a wide variety of disciplines with three major emphasis areas: Cellular and Physiological Microbiology, Microbial Genetics and Molecular Microbiology, and Environmental Microbiology.

Applicants to the graduate degree programs in Microbiology must have a bachelor’s or master’s degree and a background in training in biology (botany, microbiology, or zoology), chemistry, or in one of the agricultural sciences. Undergraduate work in bacteriology or microbiology is desirable but not necessary. All students are expected to have completed inorganic and organic chemistry, physics, calculus, general biology and genetics. Deficiencies (less than 18 hours total) may be remedied through appropriate coursework completed during the graduate program. Graduate credit is not normally awarded for remedial coursework. Students with more than 18 hours of deficiencies including those with degrees outside of biology, chemistry, or agricultural sciences are encouraged to contact the Department of Biological Sciences to discuss options for fulfilling coursework requirements in preparation for application to the MS and PhD programs.

Candidates for the MS degree must complete 30 hours of graduate credit, including 24 credits of coursework, six credits of thesis research, an acceptable thesis based on original research, and satisfactory performance in a final oral examination. The 30 credits of graduate coursework will include courses from each of the following areas: cellular
and physiological microbiology, microbial genetics and molecular microbiology, and environmental microbiology.

Candidates for the PhD program must complete written and oral comprehensive examinations, 18 credits of dissertation research, an acceptable dissertation based on original research, and satisfactory performance in a final oral examination. Although there is no required number of credits of coursework for the dissertation, a core of graduate coursework including courses from each of the following areas is expected of each candidate: cellular and physiological microbiology, microbial genetics and molecular microbiology, and environmental microbiology.

PACKAGING SCIENCE
Master of Science
The MS degree program in Packaging Science prepares graduates to work independently in the research, development and application of new packaging materials and processes. Students may be accepted with backgrounds relating to chemistry, physics, mathematics, biology, or engineering. Students with backgrounds in business or graphic communications or other disciplines may also be accepted after completing courses equivalent to the basic science and mathematics courses in the department's undergraduate curriculum. Each degree program is designed individually to augment the student's background to provide a broad understanding of packaging science and specialized knowledge in the area of the student's research.

The MS degree in Packaging Science requires 30 hours of coursework, six of which are thesis research, and the completion of an acceptable MS thesis. In addition to PKSC 8910, students register for at least one credit of PKSC 8510.

Competency in distribution, transportation, and engineering technology; food and health care packaging; materials; and packaging design and graphics is expected.

Combined Bachelor of Science/ Master of Science Degree Program
The Department of Food, Nutrition, and Packaging Sciences also offers an accelerated five-year combined bachelor's/master's program that allows students to count up to 12 hours of graduate credit toward both the BS degree in Packaging Science and the MS degree in Packaging Science. Details are available from the Department of Food, Nutrition, and Packaging Sciences or at www.clemson.edu/fhps.

PLANT AND ENVIRONMENTAL SCIENCES
Master of Science
Doctor of Philosophy
The degree programs in Plant and Environmental Sciences are offered through an interdepartmental program comprised of faculty from disciplines including biological sciences, botany, crop science, entomology, genetics, environmental horticulture, plant pathology, plant physiology and soil science.

Candidates for the program in Plant and Environmental Sciences should have a strong undergraduate background in the biological, agricultural and/or physical sciences as appropriate to their focus areas. Undergraduate curricula that may provide this background are botany, biology, chemistry, or one of the agricultural plant and soil environmental sciences such as agronomy, forest resources, or horticulture. Students with nontraditional backgrounds may need to complete some relevant undergraduate courses to supplement the graduate program.

Each student's degree program is tailored to his/her professional goals and is guided by an advisor and graduate committee with expertise appropriate to the student's area of specialization. All graduate students must select an advisor before admission.

Candidates for the MS degree must complete 24 credit hours of coursework and six hours of research, and they must present and defend a thesis based on original research. MS students who plan nonresearch-related careers in public gardening, landscape design, extension, consulting, or agribusiness may complete 30 credit hours of coursework and undertake a professional development/public service project option in lieu of thesis-related research. Interdisciplinary studies in plant health and integrated pest management are also available under this option.

A dissertation based on original research is required for the PhD degree. The doctoral degree requires at least 30 credit hours beyond the master's degree and 60 hours beyond the bachelor's degree.

Individual plans of study include courses from the following areas: biochemistry, biological sciences, botany, crop and soil environmental science, entomology, genetics, horticulture and plant pathology as well as plant and environmental sciences.

WILDLIFE AND FISHERIES BIOLOGY
Master of Science
Doctor of Philosophy
Those who are interested in pursuing a graduate degree in Wildlife and Fisheries Biology should have sound undergraduate training in the biological or related sciences. Initially, applicants should contact the faculty members whose research interests are closest to their own. Programs of study are designed to emphasize relationships between wild animals and their changing environments and production of aquatic organisms.

Admission to either the master's program or the doctoral program requires acceptance by the University and the Graduate Student Admission Committee of Wildlife and Fisheries Biology. This committee will base its acceptance recommendation to the Graduate Admissions Office on previous coursework, GRE scores, letters of recommendation, undergraduate background and current research interests. Students are required to have completed a bachelor's degree, preferably in a natural science, with a minimum of 30 credit hours in natural sciences. In addition, an MS in Natural Resource Biology or related area usually is preferred, but not required, for acceptance into the doctoral program. Students accepted without the appropriate course background will be required to make up these deficiencies as outlined by the Graduate Student Admission Committee and consistent with University admission policies.

Students seeking the MS degree in Wildlife and Fisheries Biology may select a thesis or a non-thesis option. Requirements for the thesis option include a minimum of 24 credit hours of coursework, six hours of thesis research (WFB 8910), an acceptable thesis based on original research, and satisfactory performance on a final oral examination/thesis defense. Additional coursework usually includes subjects such as experimental statistics, biological sciences and forestry. Thesis research areas include conservation biology, wildlife management, endangered species, freshwater fisheries science and wildlife toxicology.

The non-thesis option is designed primarily for students with substantial experience in natural resources who wish to enhance their professional degree skills. Students in the non-thesis option are not allowed to transfer to the thesis option without approval by the faculty of the Department of Forestry and Natural Resources. Candidates must complete a minimum of 30 credit hours of approved courses, including three to six hours of WFB 8630, which result in a broad, well informed and integrated exposure to natural resources management and environmental issues. The non-thesis project must be substantial in nature and result in an extended report addressing a major problem or issue relevant to the field of wildlife management, fisheries management, natural resources or environmental studies. The scope of the project should be consistent with the credit hours awarded for the project. A maximum of three credit hours from independent studies (WFB 8610 or similar courses) may be applied toward the coursework requirement.

The graduate advisory committee ensures appropriate elective course selection and may require a student to complete more than 24 credits if deficiencies in the student's background exist or if additional courses are required for professional certification. Students are also required to pass a final oral examination.

The PhD degree program requires a minimum of 30 credit hours beyond the student's master's degree coursework or 60 credit hours beyond the student's bachelor's degree coursework. While the PhD program has no specific credit hour requirement beyond that, the student's advisory committee will insist on a rigorous and appropriate program of study and research. Students are required to take, or have taken, at least two semesters of graduate statistics and two semesters of 8000-level seminars in fisheries and wildlife science or related areas. Students must also have at least one semester of professional experience, which will be evaluated by the advisory committee. Examples of appropriate professional experience are teaching assistantships, internships or cooperative study program participation, or natural resource agency employment. Other course requirements will be identified by the student's advisory committee and will include specific courses according to the elected emphasis area: fisheries biology, wildlife biology, or conservation biology.
Research opportunities are enhanced by cooperative programs with the S.C. Department of Natural Resources, U.S. Geological Survey Cooperative Research Unit at Clemson, Savannah River Ecology Laboratory, Webb Wildlife Research Center, and Waddell Mariculture Center. The department also is associated with the National Council for Air and Stream Improvement Eastern Wildlife Program. The graduate program is accredited by the Southeastern Section of the Wildlife Society.

Combined BS/MS in Wildlife and Fisheries Biology
Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Students should obtain specific requirements for the dual degree from the School of Agricultural, Forest and Environmental Sciences as early as possible in their undergraduate program to ensure that all prerequisites are met. Enrollment guidelines and procedures can be found in the Undergraduate Announcements.
COLLEGE OF ARCHITECTURE, ARTS AND HUMANITIES

The College of Architecture, Arts and Humanities offers graduate programs in three schools: the School of Design and Building, the School of the Arts, and the School of Humanities. Advanced degrees are offered in Architecture; City and Regional Planning; Communication, Technology and Society; Construction Science and Management; Digital Production Arts; English; Historic Preservation; History; Landscape Architecture; Planning, Design and the Built Environment; Professional Communication; Real Estate Development; Rhetorics, Communication and Information Design; and Visual Arts.

Courses are offered in art and architectural history, communication studies, geography, languages, literature, performing arts, philosophy, religion and women’s studies to provide electives for students in other areas.

Graduate students in the School of Design and Building and the School of the Arts have the opportunity to study at the Charles E. Daniel Center for Building Research and Urban Studies in Genoa, Italy, or at the Clemson Architectural Center in Charleston, SC. The Genoa and Charleston programs offer opportunities for international and/or urban study to augment on-campus work. Lee Hall, the on-campus home of the School of Design and Building, as well as the Department of Art, are designed to promote collaboration between the various professional programs within Lee Hall, allow students to interact with faculty and students from related disciplines addressing contemporary issues of design, planning, development and construction. Issues of sustainability and green building are among the areas of particular interest. Faculty research activities are currently funded by the National Science Foundation, National Institutes of Health, National Oceanic and Atmospheric Administration, USEPA, Department of Transportation and Department of Defense.

The School of Humanities houses programs leading to the Master of Arts in Communication, Technology and Society; English; History; and Professional Communication; and the Doctor of Philosophy in Rhetorics, Communication and Information Design. The school also offers a certificate program in Health Communication. Faculty have been recipients of grants from agencies and foundations, such as the National Endowment for the Arts, the National Endowment for the Humanities, the John Simon Guggenheim Memorial Foundation, and the Bingham Trust. They have also held Fulbright Senior Lectureships and Research Awards in many countries.

ARCHITECTURE

Master of Architecture

Master of Science

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture (B. Arch.), the Master of Architecture (M. Arch.), and the Doctor of Architecture (D. Arch.). A program may be granted a 6-year, 3-year or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Clemson University, College of Architecture, Arts and Humanities, School of Architecture, offers the following NAAB-accredited degree programs:

Three-Year Master of Architecture degree tracks:
- M. Arch. I (non-architecture Bachelor or Master degree + 90 credit hours)
- M. Arch. I+ Health Concentration (non-architecture Bachelor or Master degree + 96 credit hours)

Two-Year Master of Architecture degree tracks:
- M. Arch. II (pre-professional architecture degree + 60 credit hours)
- M. Arch. II+ Health Concentration (pre-professional architecture degree + 66 credit hours)

Admission to the M. Arch. program, and any advanced placement, is based on an estimation of the applicant's ability to respond effectively to the intellectual vigor and creative challenge integral to graduate architecture study by an admissions committee of graduate faculty. The applicant's potential is measured in part by demonstrated proficiency in academic work, Graduate Record Examination (GRE) test scores, a portfolio of design work (required of all applicants), and other application requirements. More detailed information is available on the School of Architecture website.

The Master of Architecture program develops proficiency in responding to contemporary architectural issues through a range of practical and theoretical knowledge, while providing opportunities for creative challenging the limits of the profession. Emphasis is on design, accompanied by complementary coursework of a professional focus, as well as elective subjects. Complex studio design projects stress social awareness and contextual fit and are responsive to all aspects of the architectural process.

The Master of Architecture degree requires a minimum of two academic years. Degree candidates may elect a concentration of study in architecture or architecture and health. The graduate faculty reviews each student each semester of the first year to determine if his/her performance is acceptable to continue in the program.

Architecture + Health Concentration

Within the framework of the Master of Architecture degree, the Architecture + Health Concentration includes seminar courses and studio work appropriate for both a general professional degree and a concentration in Architecture + Health. The intent is to develop the generalist-specialist—graduates who can creatively work in both modes. This concentration includes both the study of health facility design and the study of relationships between architectural settings and their impact on human health and well-being. The primary purpose of the concentration is to study how architectural environments impact health and how to create architectural settings that support health and well-being of individuals and larger populations.

Studio design projects and courses examine these relationships for architectural settings and conditions ranging from entire communities and health care systems to specific projects and individual interior or exterior spaces. The studio emphasizes design excellence within the framework of rigorous and complex demands found in the practice of health care architecture. Student work is expected to stand up critically and be a level of architectural consideration.

The Architecture + Health Concentration is demanding in the scope of its professional studies, with most of the coursework designated for specific areas of learning. Students may take advantage of the same off-campus programs available to students in the Architecture Concentration during their first semester of study. Given the number of required courses, students may opt for a five-semester plan of study beginning in the spring semester. The thesis or project, developed during the final year, normally deals with particular architectural topics as they relate to health and/or health facility design.

Certificate Programs

The School of Architecture offers two certificate programs to enrolled M. Arch. and M.S. in Architecture students. The certificate in Digital Ecologies (also open to PDBE PhD students) cultivates design research and design practices responsive to an increasingly digital society. The certificate in Architecture + CommunityBUILD addresses issues of social justice and community sustainability through community engagement and appropriate design solutions. More information is available on the School of Architecture website.

Off-Campus Study

M. Arch. I and M. Arch. II students are encouraged to study at one of our off-campus centers for one or two semesters. More information is available on the School of Architecture website.

Master of Science Program

The Master of Science degree in Architecture is a post-professional degree program that offers the opportunity to achieve advanced learning within the discipline of architecture and to undertake research responsive to increasingly complex challenges attendant to the built environment. This is accomplished through a foundation of coursework, accompanied by directed studies within a selected area, and followed by the critical examination of a singular aspect of architecture in a research thesis.
Admission to the MS program is available to students who have a first professional degree in architecture and who possess the intellectual mettle and dedication necessary to respond successfully to the rigor of advanced study and independent research. This is measured by academic proficiency in prior work, a well-reasoned plan of advanced study and GRE general test scores. Information concerning application procedures and requirements is available from the School of Architecture.

The coursework and directed studies required of the Master of Science program may be completed in one academic year, after which a variable period of time is dedicated to the research thesis. Degree candidates work within one of the following areas: architecture and health care facilities, environmental issues in architecture, architecture and human perception, or theory and philosophy of architecture. A plan of study is determined in consultation with the major advisor who, along with the advisory committee, periodically reviews the student’s work and evaluates the research thesis. Requirements for the MS degree consist of 24 credit hours of combined coursework and directed studies with a minimum grade-point average of 3.0 and the acceptance of a six-hour research thesis.

CITY AND REGIONAL PLANNING

Master of City and Regional Planning

The two-year Master of City and Regional Planning program is a professional degree emphasizing applied study in preparing tomorrow’s leaders for planning and developing the nation’s towns, cities, and regions. The curriculum emphasizes applied study preparing for the challenge of planning vibrant and sustainable communities. Graduates are well-equipped for careers in private sector planning and development, as well as public sector planning and administration. The nationally accredited program began in 1968 and has more than 500 graduates.

The program emphasizes sustainable land development, applying appropriate technology and recognizing the balance of physical, economic, financial, social and policy dimensions of planning. The program has a professional application focus, mainly concerned with providing a solid planning education to qualified students, primarily to meet the needs of South Carolina, the southeastern region and the nation, but also with a strong awareness of global and international planning issues. The generalist approach is employed with the flexibility for specialization in four areas: development planning, transportation, environmental land use planning and geographic information systems. A substantive core emphasizes the general framework, theories, methods and applications of the planning process. Strong ties with the professional community reinforce the professional application focus.

Students come from a variety of undergraduate majors and professional backgrounds—primarily liberal arts, the social sciences, environmental science, business, management and design—and from many states and several countries. The MCRP program typically has annual classes of approximately 20 students, providing the opportunity for extensive faculty involvement in teaching, research and public service.

While the curriculum covers theory and policy issues, the principal focus emphasizes the applied skills students need to enter the job market as professional planners and to evolve as leaders in the field. Classes use real-world situations for analysis and for the application of planning skills in dealing with land use planning, development and issues of the built and natural environment.

Planning students are equipped to meet opportunities facing communities in many creative ways. Many first-year students work two days per week as department assistants for professors or in planning related entities. Students typically work full time as interns in planning or development organizations during the summer. During their second year, most students work two days a week with a public, private or nonprofit entity as student public service assistants (PSA). This allows them to gain additional professional experience.

Assistantships provide significant tuition reduction. Students are actively involved in Clemson’s Planning Student Organization of the American Planning Association (APA) and the South Carolina APA (SCAPA).

Clemson’s graduates have been successful in the public, private and nonprofit sectors, obtaining key positions in traditional planning agencies, development groups, nonprofit organizations and private consulting firms. This practical, applied program is recognized throughout the region for its outstanding graduates. Most alumni of the program serve as agency directors, department heads and staff planners at the local, regional and state levels. Some graduates work as generalists while others are specialists in GIS, housing, and community development, environmental and coastal planning, historic preservation, transportation planning, or economic development. A growing number are employed in the private sector as planning, urban design consultants, developers, and market research or environmental analysts.

Admission Requirements

1. A bachelor’s degree from an accredited college or university
2. A satisfactory academic record, particularly in the last two years of undergraduate work
3. An on-campus interview (highly recommended)
4. Three letters of recommendation with at least two from current or former professors
5. Completion of the Graduate Record Examination
6. International applicants must submit TOEFL scores.
7. A personal statement of objectives, briefly describing (in one or two pages) the applicant’s interest in planning in general and Clemson’s program in particular

Courses in statistics and economics are highly recommended.

Requirements for Degree Candidacy

The two-year Master of City and Regional Planning degree requires a minimum of 54 credit hours. The program contains a 28-credit core curriculum, a three-credit summer internship, 15–18 credit hours of approved concentration/elective courses, and 6–9 hours of research and terminal project or thesis. The core courses include planning and substantive theory, analytical methods, implementation techniques and applications. The concentration area allows the student to develop further expertise in a particular area, if desired. A summer internship between the first and second years requires ten weeks of supervised professional employment for another three credits. If approved, students may take additional coursework in lieu of the internship. An oral examination is required to present and defend the results of the terminal project or thesis.

Requirements for Awarding of a Degree

Thesis Option

1. A minimum of 54 hours of coursework with a B average in the student’s prescribed professional curriculum, including the thesis, is required.
2. A nine-credit-hour planning thesis must be completed satisfactorily. Only those students who have been approved by the Planning faculty are permitted this option.
3. The final oral examination requires satisfactory answers to questions concerning the student’s thesis and concentration area.

Non-thesis Option

1. A minimum of 54 hours of coursework with a B average in the student’s prescribed professional curriculum is required.
2. An approved six-credit-hour terminal project sequence must be completed satisfactorily.
3. The final oral examination requires satisfactory answers to questions concerning the student’s terminal project and concentration area.

COMMUNICATION, TECHNOLOGY AND SOCIETY

Master of Arts

The Master of Arts in Communication, Technology and Society examines how people use technology to pursue long-term communication goals, including interpersonal, group, identity, and community relations, decision-making, virtual organizing, and health, political, and social movement campaigns. The program emphasizes the impacts and interconnections of communication technologies in society and culture from the full range of theoretical and methodological approaches. Graduates are prepared to enter teaching, business, politics, or social organizing as communication practitioners with expertise in a variety of fields, directly impacting economic development in the region and across the nation, or to continue their education through the doctoral level at major research universities.

Departmental faculty are committed to providing students with opportunities for academic and professional development and believe that individuals continue to develop their expertise throughout their careers. The MA program provides a variety of opportunities to engage in scholarly and professional development activities outside the classroom, including participation in colloquia offered by
communication scholars, professional workshops, internships, applied projects, and study abroad. Students are encouraged to become active members of international, national, regional, and state academic and professional associations, and to participate in as many of these development activities as possible while at Clemson in order to build network contacts in the communication discipline before graduation.

Certification/Employment
Most full-time graduate students are awarded assistantships. Students are automatically considered for an assistantship when applying to the program unless they request otherwise. For example, students may not wish to be considered for an assistantship if they plan to pursue the degree part-time while continuing to work full-time.

Funding opportunities are available to approximately eight new graduate students per year in the form of teaching and research assistantships. Assistantships provide a generous tuition waiver as well as a stipend, and are awarded competitively by the graduate committee. A variety of opportunities are available for students to grow as teachers, scholars, and emerging professionals in the discipline. Graduate students typically assist with the delivery of basic undergraduate courses and assist faculty members with research.

Admission Requirements and Application Process
The Department of Communication Studies welcomes applications from students and professionals who want to further their knowledge and skills in communication studies. Priority for admission and assistantship funding is given to applicants who apply by February 1 for the fall semester. However, applications may be reviewed after the deadline until all spaces are full. Students begin the program in the fall semester. Spring admission is only for part-time, full-pay students. Application deadline is September 1.

The following credentials are preferred, though the entire application is considered holistically: bachelor’s degree from an accredited college or university; GPA of 3.0 or better on a 4.0 scale; scores of 153/144/4.0 or better on the GRE (verbal/quantitative/writing); TOEFL scores of 600 or better for the paper exam or 267 or better for the online exam for non-native English language speakers only; strong writing skills as demonstrated through a writing sample and curriculum vitae; and focused reasons for pursuing a master’s degree in communication, technology, and society as demonstrated in curriculum vitae and statement of purpose.

Applicants should complete Clemson University’s online Application for graduate admission and submit the following documents to the Office of Graduate Admissions: official GRE scores fromETS, official TOEFL/IELTS scores (international students); official college or university transcripts; and three letters of recommendation from teachers or supervisors addressing the applicant’s preparation for graduate school. Applicants should email the following documents to Director of Graduate Studies, ds cott36@clemson.edu: Personal statement of interest in and suitability for the program, resume/CV, and a sample of scholarly writing.

Financial Aid
A number of graduate assistantships are offered to students each year based on merit in the form of stipends and the additional benefit of tuition remission. Students must be enrolled in a minimum of nine credit hours per semester to qualify for a graduate assistantship and must work 10 hours a week as a teaching or research assistant or perform other tasks assigned by the school.

Degree Requirements
Students may select the thesis option or the comprehensive exam option. In either case, students must complete a minimum of 30 credit hours, including COMM 8010, 8020, 8030, 8100 and 8110; a minimum of 18 credits in COMM courses at the 8000 level; and a minimum of six credits in COMM or a relevant field other than COMM selected in consultation with the student’s advisor. Up to nine credit hours of thesis work may be applied to the coursework requirements. The number of elective courses selected in a specialty area depends on which option a student selects. After students complete all required coursework, they begin work on a thesis or preparing for the comprehensive exams.

Students selecting the thesis option complete and publicly defend a project representing significant contribution to the body of knowledge regarding the communication phenomenon that is the focus of the thesis project. A thesis committee is selected in consultation between the student and her/his advisor and is comprised of faculty from the Department of Communication Studies. The committee may also include faculty representing associated disciplines on the Clemson campus.

Students selecting the comprehensive exam option are assessed in the knowledge in several areas, such as the history and distinguishing characteristics of the communication discipline, relevant communication theory, the range of research methods used in communication research, communication ethics as they apply to communication mediated by technology, how communication mediated by technology may be used to pursue long-term goals in communication (e.g., social movements, health, community, interpersonal, small group, organizational), the relations between communication technologies and social and cultural identities and institutions, and material representative of the student’s identified area of emphasis. The exam committee is selected in consultation between the student and his/her advisor and is comprised of faculty from the Department of Communication Studies, but may also include faculty representing associated disciplines on the Clemson campus.

Additional information about the MS in Communication, Technology and Society is available at http://www.clemson.edu/caah/communication/graduates/index.html.

Health Communication Certificate
An interdisciplinary Certificate in Health Communication is also available to students in the MAPC degree program and to practicing health professionals who already have graduate degrees or are pursuing graduate degrees in Nursing, Health Sciences and many other fields. This 18-credit-hour certificate program offers students the ability to develop careers in writing for the pharmaceutical, scientific, medical and/or health industries. It especially targets jobs in hospital systems, HMOs, clinics, CDC and other local, national and international health organizations. The certificate program is available through two tracks:

1. MAPC students who specialize in this field by taking ENGL (COMM) 8040, 8060, and (COMM) 8070 to fulfill their MAPC program cognate requirements
2. Health professionals who need to update their communication skills to better meet the challenges of today’s highly technological health settings

Unlike other programs in health communication, this program is geared toward the technological skills more applicable to today’s health industry. In addition, the program can be customized to individual student needs, whether they be centered on technological skills available through the MAPC/HCC program or targeted for those who already have technical skills in health content and/or medical humanities. This program is interdisciplinary and includes both arts and sciences approaches to health messaging. Additional information is available at www.clemson.edu/caah/healthcomm/.

CONSTRUCTION SCIENCE AND MANAGEMENT
Master of Construction Science and Management
Certificate
The Master of Construction Science and Management thesis-optional program provides students with a high level of skills and knowledge in the technical areas of construction project administration and control. Substantial emphasis is placed on advanced study in the field of business, in new and emerging techniques for construction project delivery systems, and in the administration of the construction firm.

The number of credit hours required for the MCSM degree varies according to each student’s undergraduate degree. For those who have the required undergraduate skills and knowledge, the program consists of 36 credit hours. In cases where the candidate does not have the necessary prerequisite skills and knowledge, additional coursework beyond the 36 credit hours is required. Each application is evaluated as to the needed additional coursework. Up to 12 credits of approved recent graduate courses can be transferred into the program from another accredited institution.

This program is also available to off-campus students through the Office of Off-Campus, Distance and Continuing Education. Call 1-888-CLEMSON (1-888-253-6766) for more information.
Admission Requirements
1. A bachelor’s degree in construction science, construction management, building construction, or related area is required. Applicants from other disciplines may be admitted but may be required to remediate any deficiencies in coursework to provide the prerequisite skills and knowledge for the program.

2. Acceptance must be granted by the Graduate School and the Department of Construction Science and Management. University acceptance is based on performance in previous undergraduate studies and a satisfactory score on the GRE. International students must also achieve a satisfactory score on the TOEFL/IELTS. In addition, acceptance by the department is based on performance in undergraduate studies, three letters of recommendation and acceptance by the department Graduate Admissions Committee.

3. Each applicant is required to have one year of construction experience prior to being admitted to the program. Applicants must submit a detailed résumé of construction experience.

Requirements for Degree Candidacy
The Master of Construction Science and Management degree requires a minimum of 36 credit hours as detailed above. In cases where the candidate does not have the necessary undergraduate prerequisite skills and knowledge, additional coursework beyond the 36 semester hours may be required as noted above.

Requirements for Awarding a Degree
Thesis Option
1. A minimum of 36 semester credit hours of which the following courses are required: CSM 8520 (three credits); CSM 8910 (nine credits) and 12 additional credits selected from CSM 8600, 8610, 8620, 8630, 8640 or 865. The remaining credits should be selected from the program’s core and other master’s degree courses (CSM 6650, 8810 and 8900), any approved graduate course offered by another department and/or CSM Chair approved graduate courses transferred in from an accredited university. Up to 12 credits may be transferred from other Clemson University approved institutions.

2. A thesis on a construction-related topic must be completed satisfactorily. Up to nine semester hours of thesis credit may be taken. Thesis credit is included as part of the department’s core. Approval must be received from the student’s advisor prior to selecting the thesis option.

3. Performance on a final oral examination relating to the student’s thesis and program of study must be satisfactory.

Non-thesis Option
1. A minimum of 36 credit hours of which 12 must be from the department core (CSM 8600, 8610, 8620, 8630, 8640 and 8650) and CSM 8520 and 8860. The remaining credits should be selected from the program’s core and other master’s degree courses (CSM 6650, 8810 and 8900), any approved graduate course offered by another department and/or CSM Chair approved graduate course transferred in from another university. Up to 12 credits may be transferred from another Clemson University approved institution.

2. Performance on a written comprehensive examination covering the student’s program of study must be satisfactory.

3. Performance on a final oral examination relating to the student’s program of study must be satisfactory if the student has not performed satisfactorily on the written comprehensive exam.

Certificate of Construction Science
Clemson University’s Certificate Program in Construction Science and Management provides qualified students the opportunity to take a selection of advanced construction management courses without having to commit time and resources toward the pursuit of a master’s degree. Students receive three hours of college credit for each course taken and a certificate upon completion of all six courses.

Certificate of Construction Management
Prospective students apply in the same manner as current graduate students. A bachelor’s degree in construction science, construction management, building construction, or related area is required. There is no requirement to take the GRE or TOEFL/IELTS.

A student enrolled in the certificate program who wishes to be admitted into the MCM graduate program must meet all admission and degree requirements in effect at the time of application. The student may transfer up to 12 credit hours from the certificate program to the Master of Science in Construction Science and Management degree. Therefore, the decision must be made by the time the student has completed four courses (12 credit hours).

Admission Requirements
1. A bachelor’s degree in construction science, construction management, building construction, or related area is required. Applicants from other disciplines may be admitted but may be required to remediate any deficiencies in coursework to provide the applicant with the needed prerequisite skills and knowledge for the Construction Science and Management certificate program.

2. Acceptance must be granted by the Department of Construction Science and Management. Acceptance is based on performance in previous undergraduate studies, three letters of recommendation and acceptance by the department graduate admissions committee.

3. Each applicant is required to have a minimum of one year of construction experience prior to being admitted to the program. Applicants must submit a detailed résumé of construction experience.

Requirements for Awarding a Certificate
Completion of the following courses with a B or better is required: CSM 8600, 8610, 8620, 8630, 8640, 8650.

ENGLISH
Master of Arts
The Master of Arts in English (MAE) offers a comprehensive approach to literary studies, incorporating exploration of literary texts and theory, examination of textuality and modes of publication, and a foundation in methods of research and scholarship. Through coursework, close interactions with faculty, and individual research projects, students infuse their broad understanding of the field of English studies with their own particular literary interests and concerns. The curriculum offers courses in theory, literary periods and genres, film, new media, creative writing, cultural studies, and rhetoric. The MAE program serves three types of students: those who plan to pursue graduate studies at the doctoral or terminal level; those aiming to teach in high schools, community colleges, and technical colleges; and those who want to enrich their background in English studies, develop research and writing skills, and continue their intellectual experience beyond the baccalaureate.

Prospective applicants are required to complete 31 credit hours of approved graduate courses, which may include up to six credits at the 6000 level. MAE students write a semester-long, potentially publishable thesis paper of 25-30 pages, developed from a seminar paper and presented in a public defense. All students must demonstrate a reading knowledge of an approved foreign language.

At the core of the MAE program is a 16-hour requirement, including ENGL 8000, 8100, 8910, and one course from each of the following groups:

- Literature before 1800: ENGL 8050, 8080, 8110, 8200, or an appropriate course selected from 8020, 8300, 8310, or 8350
- Literature after 1800: ENGL 8140, 8230, or an appropriate course selected from 8020, 8300, 8310, or 8350

In preparation for the thesis, students must take multiple courses (at least two) in their area(s) of interest.

Students applying for second-year graduate teaching assistantships must take ENGL 8850.

Students interested in pursuing an MEd in Teaching and Learning with a concentration in English should consult the School of Education.

HISTORIC PRESERVATION
Master of Science
The Master of Science in Historic Preservation degree is a professional degree program designed for students who will specialize in working with historic buildings, landscapes and the decorative arts. It is a dual degree program with the College of Charleston and is administered through Clemson’s Department of Planning and Landscape Architecture. The program uses Charleston and the historic environs of South Carolina as a living laboratory. The size of the program is restricted to ensure focused research with the faculty. Coursework emphasizes studies,
labs and field seminars incorporating Charleston’s rich community of preservation specialists as well as distinguished visiting faculty and researchers.

Students are admitted into the program from a variety of undergraduate disciplines relating to the built environment. A portfolio with samples of work related to the built environment is encouraged. Students of the humanities and sciences are also encouraged to apply.

Program Requirements
The 54-credit program is structured in sequential layers, beginning with an initial core semester devoted to the analysis and documentation of historic sites, followed by a more advanced studio-focused semester organized around the development of a preservation project. The second year focuses on advanced analysis and conservation studies, followed by a final semester of preservation administration done in conjunction with the student’s final project/thesis focus.

Thesis proposals are defended in the third semester of the program. Thesis projects are original research and incorporate each student’s specific focus in the discipline of historic preservation. Projects using the historic resources of Charleston and its environs, or other suitable historic sites, are encouraged.

Summer professional internships are available through a variety of Charleston preservation initiatives, the national network of preservation specialists, as well as opportunities with national organizations such as the Historic American Building Survey and the National Trust for Historic Preservation.

Certificate in Historic Preservation
The Certificate in Historic Preservation is designed to enhance a variety of other degree programs at Clemson through advanced studies in historic preservation.

The 12-credit semester meets NCPE-mandated curriculum requirements. Prerequisites and further course requirements are determined by the student’s degree program of study.

HISTORY
Master of Arts
Admission Requirements
Students are admitted to the graduate program by the Dean of the Graduate School upon recommendation of the department’s graduate program coordinator and department chair. All applicants to the MA program in History must submit the following to the Graduate Admissions Office:

1. Final transcript(s) for the BA sent by the applicant’s undergraduate school(s), showing a minimum grade-point average of 3.0 in history courses; and 2.5 in all courses during the last two undergraduate years
2. Three letters of reference, preferably from undergraduate professors
3. A sample term paper
4. A personal statement addressing the applicant’s background in history, intended areas of specialization and reasons for applying
5. A completed University application form

Additionally, if the applicant has (1) a grade-point average less than 3.0 in the History major for the BA degree and/or (2) a BA degree, including the major and minor, in subject(s) other than history, he/she will be required to take a minimum of four upper-level undergraduate history courses at Clemson or at another accredited university or college and receive a grade of B or better in each course before admission to the program. The only exception to this course requirement shall be persons who demonstrate that, as a part of their BA degrees, they completed a minimum of four upper-level undergraduate history courses with a grade of B or better. Any exceptions to these regulations require the consent of the department’s Graduate Committee.

Application Deadline
Applications for fall semester must be submitted no later than the previous February 20, and for spring semester no later than the previous November 1. Please note that consideration for assistantships begins in January and continues until all available slots are filled.

Requirements for Awarding of a Degree
The MA in History requires 30 credit hours in courses numbered 6000 or above divided as follows:
1. HIST 8810
2. HIST 8200 or 8720 and HIST 8900
3. A minimum of nine additional credit hours in courses numbered between 6000 and 8940, excluding HIST 8850, 8900, and 8910
4. A minimum of six elective credits in graduate courses selected with the approval of the director of the graduate program
5. A minimum of six credits in HIST 8910 (Master’s Thesis Research), three of which should be taken in the second semester if enrolled full-time or within the first 18 credits in the program. Additionally, the student must write a thesis acceptable to the department and/or demonstrate reading knowledge of a foreign language. A final examination, which may be written, oral, or a combination of the two forms, is required of all candidates.

Students holding an assistantship in the Department of History who receive a grade lower than B in any graduate course may have their assistantships terminated.

LANDSCAPE ARCHITECTURE
Master of Landscape Architecture
The landscape architecture profession is broad and interdisciplinary. Practicing landscape architects work on a wide range of project types including, but not limited to, urban and community design, historic preservation, ecological restoration, parks and park systems, institutional landscapes, memorials, cemeteries, industrial site reclamation, golf courses, wilderness areas and trails, residential landscapes and gardens. The profession is both an art and a science. Successful landscape architects are creative professionals who hold an environmental imperative and a social conscience. They are also excellent facilitators, able to bring numerous disciplines and professions together to work on complex projects in the landscape.

Like other universities in the United States, Clemson offers two Master of Landscape Architecture (MLA) tracks—a first professional degree and a second professional degree. Research and study in those important topics of national and international consequence further ensure the marketability of Clemson’s MLA graduates. Students come from a range of disciplines such as planning, history, English, biology, geology, geography, environmental science, various social or natural sciences, art, or other disciplines. Application requirements are available at www.clemson.edu/caah/landscapearchitecture/

First Professional MLA
The three-year first professional degree is designed to provide students with a professional education and also an opportunity for research and/or in-depth project work. Because students hold bachelor’s degrees from an array of backgrounds, it is necessary for them to gain landscape architectural skills. Those proficiency courses are also required for professional accreditation. In the first years of the program, students focus on co-requisite proficiency requirements by only taking a few important graduate-level courses. Most graduate-level work, project-oriented research coupled to a team project and/or thesis project are emphasized during the final year. Study abroad and summer off-campus experiences are optional. Curriculum requirements are available at www.clemson.edu/caah/landscapearchitecture/

Second Professional MLA
The second professional degree in Landscape Architecture is a two-year program limited to students who hold an accredited five-year professional BLA degree. In the final semester students choose between a six-credit collaborative studio or six credits of thesis work. Study abroad and summer off-campus experiences are optional. Curriculum requirements are available at www.clemson.edu/caah/landscapearchitecture/

PLANNING, DESIGN AND THE BUILT ENVIRONMENT
Doctor of Philosophy
The PhD Program in Planning, Design and the Built Environment is a transdisciplinary, three-year post-master’s degree program consisting of 76 hours. In most cases, students enter the program with a master’s degree in architecture or landscape architecture, city and regional planning, real estate development, or construction science. Because of the program’s transdisciplinary orientation, students may be drawn from other disciplines including engineering, business, the social sciences, and humanities. Students from those program areas may be required to take prerequisite coursework. Students with advanced preparation may take slightly less than three years.

The curriculum is divided into five content areas as indicated below. Those content areas include core courses, concentration courses, elective courses, comprehensive examination and dissertation research. Students select a field from the traditional disciplines of architecture, landscape architecture, planning, real estate development, or construction to build disciplinary as well as a transdisciplinary area of concentration. Areas of concentration are developed subject to faculty expertise and student interest. Areas of concentration may be drawn from the program
This degree is designed for students with strong writing skills from all academic disciplines. The program accommodates students with undergraduate majors in technical and scientific fields, as well as those with humanities and business degrees.

The Multimedia Authoring Teaching and Research Facility and the Class of 1941 Studio for Student Communication give MAPC students access to corporate-style presentation and collaboration space as well as the newest computing hardware and software, enabling multimedia and Web design and production, digital video and audio editing, desktop publishing, and graphic design. Clemson’s award-winning undergraduate writing programs and faculty with expertise in the teaching of writing allow MAPC students to work at the forefront of innovative writing pedagogy. The Campbell Chair in Technical Communication, the Pearce Center for Professional Communication, and the Effective Technical Communication Program in Engineering constitute a network of professors enabling students to work in professional communication in a variety of academic disciplines. The Usability Testing Facility allows students to conduct state-of-the-art usability research on interface designs, on-line documentation, and other publications. MAPC students wishing to pursue careers in the growing field of health communication also have the option of combining the Master’s degree with the Health Communication Certificate program described below.

Additional information about the MAPC program is available at www.clemson.edu/mapc/.

Admission Requirements
Applicants must hold a degree in any field from an accredited college or university with a 3.0 grade-point average on a 4.0 scale; submit a satisfactory score on the TOEFL general test at least two letters of recommendation from individuals familiar with the candidate’s academic work and/or work experience; and submit a brief résumé, a one-page statement of purpose discussing why the candidate wishes to pursue the MAPC degree and ten pages of workplace or academic writing.

Requirements for Awarding of a Degree
The MA in Professional Communication requires 30 credit hours beyond the BA or BS degree, distributed as follows:

1. Four core courses—ENGL 8520, 8530; and ENGL 8560 or COMM 6640.
2. Five electives in a specialty area chosen to meet professional goals. Possible electives include professional communication courses in writing, teaching, digital publishing and corporate communication, as well as courses in related disciplines.
3. ENGL 8920—In this three-credit course, students complete a portfolio, the main component of which is a semesterlong, potentially publishable paper; or a client project accepted by the client and approved by the student’s Portfolio Committee, which is comprised of three MAPC faculty. This requirement includes (a) the article or client project; (b) a multimodal introduction offering a defense of the paper or project; and (c) a formal presentation to the Portfolio Committee.
Course Requirements
The Master of Real Estate Development Program requires a minimum of 57 credit hours (60 credits for students with no previous degree background and previous coursework in the field). Additional electives are based on class exemptions dependent on prior coursework.

Following is the required curriculum for students with no undergraduate background in the field:

First Year
First Semester
3 - CRP 8000 Human Settlement
3 - CRP 8200 Site Planning and Infrastructure
3 - RED 8890 Selected Topics—Accounting and Finance (for non-business degree majors)
3 - MBA (FIN) 8360 Real Estate Principles
3 - RED 8000 Real Estate Development Process
Second Semester
3 - ARCH 8200 Building Design and Construction Principles
3 - LAW 8480 Law for Real Estate Professionals
3 - MBA 8410 Real Estate Finance
3 - RED 8010 Real Estate Market Analysis
1 - RED 8100 Real Estate Seminar Roundtable
2 - RED 8120 Real Estate Technology

Summer Sessions
3 - RED 8020 Real Estate Dev. Field Tour Seminar
3 - RED 8110 Summer Internship in Real Estate Development
6

Second Year
First Semester
3 - CSM 8660 Contractor Role in Development
3 - MBA 8330 Real Estate Investments
3 - MBA 8420 Real Estate Valuation
3 - RED 8030 Public-Private Partnership Dev.
12
Second Semester
3 - RED 8040 Practicum in Residential Development
3 - RED 8050 Practicum in Commercial Dev.
3 - RED 8130 Real Estate Develop. Strategic Planning
3 - Elective
12

RHETORICS, COMMUNICATION AND INFORMATION DESIGN

Doctor of Philosophy
The PhD program in Rhetorics, Communication and Information Design features an interdisciplinary curriculum developed by faculty from Art, Communication Studies and English. The curriculum provides a solid foundation in theory in addition to extensive training in research and practice.

Admission Requirements
1. Acceptable GRE scores are required. For non-native speakers of English, acceptable TOEFL or IELTS scores must also be submitted.
2. Master’s degree in Communication Studies, English, Art, Professional Communication, or other related field. A student with a master’s degree in another field of study may apply to the program with the understanding that he/she may be required to complete prerequisite, master-level courses in professional communication prior to full admission to the PhD program.
3. Minimum grade-point average of 3.5 in previous graduate work. The student must submit all transcripts of previous graduate and undergraduate work.
4. International students seeking graduate teaching assistantships, whose native language is not English and whose secondary education (and beyond) was not taught fully in English, must pass the SPOAK test of proficiency in spoken English. Prospective international teaching assistants will also undergo an interview during which their proficiency in spoken English will be evaluated by faculty members in the RCID program.

In addition, the student must submit the following:
1. Portfolio of previous graduate work, including a writing sample, preferably a sole-authored paper submitted in a graduate class.
2. Personal statement addressing the student’s interest and intent in pursuing the PhD in Rhetorics, Communication and Information Design
3. Minimum of three letters of reference from academic sources
4. Completed application for admission

Program Requirements
Candidates for the PhD degree must complete 36 hours of graduate credit, including five required core courses (RCID 8800, 8820, 8030, 8040, 8050), five elective courses in specialization and six credit hours of studio research or applied project work (RCID 8820). Candidates must also pass a comprehensive exam and write a dissertation.

VISUAL ARTS
Master of Fine Arts
The Master of Fine Arts degree is the terminal degree in the visual arts. Clemson University’s program offers concentrations in the studio areas of drawing, painting, printmaking, ceramics, photography and sculpture. Interdisciplinary and collaborative projects are encouraged within the department. The primary goal of the program is to provide students opportunities to develop a high degree of professional competence in their chosen area of concentration.

Admission Requirements
The Master of Fine Arts degree program in Visual Arts admits a limited number of talented and creative candidates on a competitive basis upon review of the following materials:
1. Bachelor’s degree from an accredited college or university with a major in Visual Arts. Especially well-qualified persons from other disciplines or degree backgrounds with exceptionally strong portfolios may be accepted.
2. Minimum grade-point average of 3.0 on the last 60 major credit hours of undergraduate work.
3. Portfolio documentation of the applicant’s creative work. The portfolio should include 15 to 20 works, the majority of which represent the applicant’s chosen field of study. The portfolio should consist of 20 images and an accompanying list identifying each image and indicating the size of the work and the media used. CDs with images in JPEG or PDF format are preferred. PowerPoint documents are not accepted. The portfolio is reviewed by the Admissions Committee, composed of members of the faculty of the Department of Art. Applicants are also encouraged to arrange for a campus interview before or during the application process.
4. Three letters of recommendation from major professors, producing artists, or professional acquaintances who are familiar with the applicant’s work and development in the visual arts.
5. A one to two-page artist statement that provides insight into the development of the work completed to date. The statement should address ideas relative to form and content.
6. Statement of intent regarding applicant’s interest in pursuing the graduate degree
7. No GRE is required.

Requirements for Degree Candidacy
The prospective candidate must have a review of his/her work at the end of each semester. It will be determined at this time if the student should continue or whether additional study is required at either the undergraduate or graduate level. Upon completion of 30 hours, the candidate must pass an oral review to determine readiness for thesis work. A Graduate Thesis Committee will be assigned at this time to assist the thesis development and concluding thesis exhibition.

The candidate must complete 30 hours and a full-time residency during the second year of study.

Requirements for Awarding of a Degree
1. A minimum of 45 credit hours with a B average or better in the student’s professional curriculum, including 36 hours of ART 6000- and 8000-level studio courses and nine hours of AAH 6000- and 8000-level Art History courses.
2. A 15-credit-hour thesis culminating in satisfactory completion of a written documentary of the “thesis exhibition” and an oral examination by the graduate faculty.
The mission of the College of Business and Behavioral Science is to develop leaders through education and research focused on human behavior and business practices in organizations, economies and societies.

Courses are also offered in entrepreneurship, finance, law, marketing and political science to provide program requirements and electives for students in other areas.

The graduate programs in the College of Business and Behavioral Science provide a wide range of opportunities for academic careers and for professional careers in business, industry, government and nongovernment public sector organizations. Degrees offered in the business disciplines are fully accredited by the Association to Advance Collegiate Schools of Business (AACSB). In the MA, MS and PhD programs, extensive research programs involve graduate students in both theoretical and applied research and provide excellent opportunities for thesis and dissertation research. The professional master’s degree programs feature assistantships and internships that provide opportunities for practical experience in the student’s field. Financial aid, in the form of fellowships and teaching and research assistantships, is available for full-time participants in most graduate programs.

In addition to a full range of graduate programs offered on the main campus, the following degree programs are offered at satellite locations in Greenville, SC: business administration, accounting, management, marketing and real estate development.

Additional information is available at cbbs.clemson.edu.

ACCOUNTING

Master of Professional Accountancy

The Master of Professional Accountancy (MPAcc) degree program prepares students to begin careers in public accounting or further graduate study. The program requires 30 credit hours and ACCT 8560, 8570, 8580, and 8590 and is open to students with appropriate backgrounds. The program accommodates full- and part-time students. Full-time students are able to complete the program in one year.

The MPAcc program recognizes the evolution of the theory and practice of financial reporting, auditing and taxation, technological advances in managing data and increases in the volume and scope of authoritative pronouncements from the FASB, IASB, SEC and IRS. Two specializations are available: Assurance Services and Taxation. The program is accredited by AACSB, International.

Applicants should hold a bachelor’s degree from an institution whose scholastic rating is acceptable to the Graduate Admissions Committee of the School of Accountancy and Finance. Admission to the program is based on academic record and score on the Graduate Management Admission Test (GMAT). Letters of recommendation and relevant work experience also may be considered. Applicants should have completed a business core of at least 30 credit hours, as well as the following accounting prerequisites: intermediate accounting (at least six credit hours), cost accounting (three credit hours), individual income tax (three credit hours), auditing (three credit hours), and accounting information systems (three credit hours). Current information is available at business.clemson.edu/departments/acct/acct_grad.htm.

APPLIED SOCIOLOGY

Master of Science

The Department of Sociology and Anthropology offers the MS degree in Applied Sociology emphasizing practical and theoretical knowledge in the areas of industrial and organizational sociology and focusing on the acquisition of social research skills, theory application and practical field experience. Students are prepared for employment in federal, state and local government agencies; in industry and related businesses; and to pursue a doctorate.

Applicants must hold a bachelor’s degree from an accredited degree program; must have completed a minimum of 15 undergraduate credit hours in social science or another social science discipline that includes at least one course each in statistics, research methods and sociological theory; must submit satisfactory GRE scores on the verbal, quantitative and written sections (will normally include a minimum of 154 on the verbal section, 144 on the quantitative section and a 4.0 on the written section); must submit three letters of recommendation, at least two of which are from faculty members of the applicant’s previously attended college or university; and must submit a 500-word essay on career aspirations and goals, explaining how completion of this program in Applied Sociology will assist in achieving these goals.

Students selecting the thesis option are required to complete a minimum of 38 credit hours of coursework, including SOC 8030, 8050, 8070, 8010, 8300, 8950, four credit hours of SOC 8970, and either ANTH 6030 or SOC (RS) 6710. In addition, students choosing the non-thesis option are required to complete six hours of thesis credit (SOC 8910) and successfully defend a formal thesis. Students choosing the non-thesis option must complete 44 hours of coursework, including SOC 8030, 8050, 8070, 8010, 8300, 8950, four credit hours of SOC 8970, and either ANTH 6030 or SOC (RS) 6710. In addition, students selecting the non-thesis option must pass a departmentally administered comprehensive examination. Students must demonstrate competence in basic statistics by passing a departmentally administered competency examination or by earning a B in EXST 8010. A six-hour internship in an applied setting is required of all students. The field placement is coordinated by the student, the graduate director and the on-site supervisor. Typically, the internship is completed in the summer between the first and second years of the program, but only after completing a minimum of 12 credit hours of 8000-level coursework. In exceptional circumstances, the graduate coordinator may approve the substitution of six hours of appropriate coursework for the field placement when the student has had work experience comparable to the placement.

BUSINESS ADMINISTRATION

Master of Business Administration

The Master of Business Administration (MBA) program provides an in-depth approach to business education, with opportunities to engage in real-world projects, interact with the business community, and participate in an extensive network of professional development activities. As is typical of MBA programs, the Clemson MBA is designed for students with a minimum of two years of post-undergraduate professional work experience. Some exceptions to the work experience standard are made for outstanding students with non-business undergraduate degrees, particularly those pursuing another graduate or “dual” degree at Clemson.

The MBA program provides a flexible, high quality experience designed to prepare graduates for successful management careers in business. The academic program is a maximum of 55 credit hours (roughly 21 courses) for those with little work experience and no prior business education; and a minimum of 36 credit hours (about 14 courses) for those with significant work experience and prior education in business. Students may pursue the MBA full-time (roughly 12 credit hours per semester) or part-time (three–six credit hours per semester) in the evenings. The MBA program is offered in Greenville.

The MBA program includes foundation, core, elective and internship courses. The foundation and core courses provide in-depth coverage for the basic business functions, as well as communications, ethics and leadership. Additionally students are required to complete nine hours of approved graduate electives. Full-time students are encouraged to participate in internships or in one of many international study-abroad options during the summer.

Admission is based on standardized test scores (GMAT, TOEFL for applicants whose native language is not English), two letters of recommendation, academic background (transcripts), work experiences (resume) and an interview. For more information about the admissions process or program specifics, including dual degree opportunities, please visit www.clemson.edu/mba.
Entrepreneurship and Innovation Concentration
The Master of Business Administration Entrepreneurship and Innovation Concentration complements the existing MBA degree program and is aimed at individuals seeking business training directed toward new business creation. This concentration area is designed for working professionals seeking to realize their emerging business dreams; existing owners of start-up companies seeking to expand their entrepreneurial knowledge; and recent graduates of universities who have decided not to pursue initial careers in corporate settings.

The Entrepreneurship and Innovation Concentration within the MBA program includes 36 hours of coursework. The coursework covers topics such as Entrepreneurial Mindset, Building Business Insights, Advanced Business Learning as well as a business seed competition for all students enrolled in the program. During the course of the program students receive help from experienced entrepreneurial mentors, create a business plan, register and/or incorporate a business and create and launch a company Web site and social media presence.

Admission is based on students’ academic background, standardized test scores (GMAT, TOEFL for applicants whose native language is not English), business idea presentation, work experience (résumé), and letters of recommendation. For more information regarding the admissions process or program specifics, please visit www.clemson.edu/mba.

ECONOMICS
Master of Arts
Master of Science
Doctor of Philosophy
The Department of Economics offers PhD degrees in Economics and Applied Economics, a Master of Arts in Economics, and a Master of Science in Applied Economics and Statistics. In addition, excellent undergraduate students can enroll in the BA/MA program in Economics, in which up to twelve hours of graduate courses can be applied to both the undergraduate and MA degrees in Economics.

Detailed program information is available at http://economics.clemson.edu/graduate-program.

Master of Arts
Applicants to the MA degree program must have completed at least 12 credit hours of undergraduate economics, including a course in intermediate microeconomic (price) theory. A background in mathematics, including at least one course each in multivariate calculus and statistics, is also required. When necessary, the economic theory, mathematics, and statistics courses may be taken at Clemson University.

The graduate program includes at least one course in econometrics and a minimum of two courses in economic theory. Program concentrations in financial economics, labor economics, monetary economics, environmental economics, industrial organization, and public sector economics are offered.

Students pursuing a terminal MA degree must complete 24 credit hours of coursework, six credit hours of thesis research, and submit an approved thesis. PhD students continuing beyond the first year may receive an MA degree upon the completion of the PhD core courses with at least a B average. With the permission of the graduate coordinator, a maximum of six hours of course credit may be earned for graduate courses taken at Clemson outside the Department of Economics. All remaining courses must be taken within the Department.

Combined BA/MA in Economics
The BA/MA program allows students to count up to 12 hours of graduate credit toward both the bachelor’s and master’s degrees. Students participating in this program must major in either the BA or BS in Economics, have a minimum cumulative grade-point average of 3.4, and be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the Department of Economics. Application details are available in the Undergraduate Announcements.

Master of Science
The MS in Applied Economics and Statistics is jointly administered with the College of Agriculture, Forestry and Life Sciences. The program provides training in applied economics, econometrics, and statistical methods. Students have the opportunity to develop skills in applied economic analysis, econometric model, policy analysis, and the design and of experiments and surveys. These methods are applied to a variety of concentrations supported within the Department of Economics, and within the School of Agriculture, Forest and Environmental Sciences, including agribusiness, agricultural economics, economic development, and environmental and natural resource economics.

The MS curriculum has a thesis option and a non-thesis option. The thesis option is designed for individuals who plan to pursue a Ph.D. degree or a career that requires a high level of research competence. The thesis option requires 24 semester hours of coursework and six credit hours of thesis research. The non-thesis option is designed for individuals who want technical skills for their professional careers in business or government. The non-thesis option requires 30 semester hours of coursework.

Doctor of Philosophy
The PhD program in Economics develops students who are well-trained in economic theory and its empirical application to research in a variety of fields.

Applicants to the program should have a strong background in economic theory and statistics. The PhD in Economics requires 60 hours of coursework, including 18 dissertation hours. Demonstration of competence by passing core course sequences in the initial year of study and subsequent qualifying exams in economic theory and econometrics is required. Students choose two concentrations from among the fields of economic growth and development, environmental economics, financial economics, industrial organization, labor economics, monetary economics, public economics, and others supported by departments across the University. Coursework in these fields is generally undertaken in the second and third years of study, with the goal of developing a significant research program leading to successful completion of the dissertation within four or five years.

Faculty in the department are also responsible for the PhD program in Applied Economics in collaboration with faculty in the College of Agriculture, Forestry and Life Sciences. Fields in agricultural economics and environmental and natural resource economics are offered in this program.

GRAPHIC COMMUNICATIONS
Master of Science
The Master of Science in Graphic Communications degree program prepares students for technical, creative, or professional careers in graphic communications, the third largest manufacturing industry in the United States. The program serves the needs of graphic communications, graphic arts, printing management, or graphic design graduates from other institutions, as well as undergraduates with degrees in engineering, manufacturing, computer science, communications, technology and various business fields who want to transition into graphic communications fields.

The MS program is enhanced by Clemson’s undergraduate program of more than 400 students and works closely with Clemson’s nationally recognized Packaging Science program. Industry supports well-equipped GC laboratories. Graduates are placed in positions in a variety of printing, packaging, publishing, imaging and related industries in management, marketing, sales, customer service, creative, technical, scientific and academic positions. Placement rates are consistently high.

Program entrance is available fall, spring and first or second summer terms. Requirements for the program include 33 credit hours of graduate courses for a non-thesis option or 30 hours with a thesis. Within the total requirements, at least 17 hours will be in GC technical/managerial courses; seven will be research related; six credits will be from outside the Graphic Communications Department; and at least one-half will be at or above the 8000 level. Based upon applicant’s undergraduate coursework and work experience, prerequisite courses may be required in specific areas. Students without relevant work experience will also complete an industrial internship.

In addition to the standard Application for Admission, the Graphic Communications Department admissions committee requests a narrative of approximately two pages in length, to include related and nonrelated work history, educational background, current position and an explanation of how Clemson’s MS in Graphic Communications program relates to the applicant’s professional goals. A separate résumé should accompany the narrative.
MANAGEMENT
Master of Science
Doctor of Philosophy

Master of Science
The Master of Science in Management (MSM) program prepares professionals to be effective leaders in supply chain, innovation, and information technology management. Graduates will have the advanced technical, entrepreneurial, and leadership skills necessary to succeed as mid- or upper-level managers in manufacturing, service, and consulting organizations. The MSM program also prepares qualified students for further doctoral study in the fields of supply chain and operations management, as well as information systems management. MSM students benefit immensely from the focused curriculum, close coordination of courses with the Master of Business Administration (MBA) program, and small class sizes.

The program requires a business discipline undergraduate or graduate degree. The MSM curriculum requires 30 credit hours, which include seven core management discipline courses, consisting of Information Systems, Managerial Decision Modeling, Operations Management, Organizational Behavior/Human Resources Management, Project Management, Statistical Analysis of Business Operations, and Strategic Management. A thesis or comprehensive final examination is required once all coursework has been completed. Core and elective courses cover a broad range of topics in supply chain and information technology management and in entrepreneurship and innovation management. The Graduate Programs Committee will approve the final program for each student based on his/her area of interest. Students may complete the program in ten months; however, there are a limited number of graduate courses offered by the Department of Management during summer sessions. Students may elect to take an independent study or directed reading course within their area of interest.

MSM courses are offered in Greenville, although students may also take courses offered on the main Clemson campus. All MSM students have high-speed access to the Internet and campus-wide networks containing the latest business applications. The Department of Management has a dedicated Enterprise Management Laboratory that provides access to industrial manufacturing resource planning software. The mission of the laboratory is to promote operations management by attracting them for career challenges in the profession. This is accomplished through active learning involving modern principles of manufacturing management, leading-edge enterprise resource planning software, teamwork, and leadership.

Dual master’s degree opportunities (pursuing MSM and MBA degrees simultaneously) are available to interested and qualified students. To earn a dual degree, students must be admitted into both programs. Up to one-sixth of the total number of credit hours taken may be counted toward both degrees. If a student takes classes full-time, typically both degrees can be earned in approximately two and a half years.

Combined BS/MS in Management
Undergraduate Management majors at Clemson University may begin a Master of Science (MS) degree in Management while completing their Bachelor of Science (BS) degree requirements. The BS in Management degree allows up to 12 credits of mutually acceptable graduate course credits to satisfy requirements for both degrees. Students participating in this program must have a minimum undergraduate grade-point average of 3.4, have completed at least 90 credits, and be admitted to the Graduate School prior to registering for graduate courses. Students in the combined degree program are conditionally accepted to the graduate program until completion of the BS degree requirements.

Doctor of Philosophy
The PhD program in Management is designed to provide advanced education for students of outstanding ability who desire to pursue careers in academic research institutions. The coursework for the PhD in Management includes a rigorous set of intellectually stimulating and challenging scholarly methods and foundation, and advanced courses and seminars. In addition, the program requires successful passage of a comprehensive examination and successful completion of the doctoral dissertation. A variety of learning experiences are incorporated into the curriculum, including the development of conceptual frameworks and theories, qualitative case and empirical studies, field projects, and in-depth research. Before graduating, each student will (1) have presented, or had accepted for presentation, a paper before a professional or scientific society, or (2) have had an article published, or accepted for publication, in a refereed journal. In addition, each student will have classroom teaching experience.

Within the Department of Management, PhD students have tremendous opportunities to conduct cross-disciplinary research between supply chain and operations management and information systems or with high-impact faculty in entrepreneurship and strategic management, as well as organizational behavior and human resources management. The goal is to position graduates for scholarly academic careers at colleges and universities throughout the United States and the world.

The PhD program in Management is designed for full-time students who remain on-campus during the entire duration of their study. Students may enter the program in the fall semester only (starting mid-August). Students with bachelor’s or master’s degrees in a business discipline can typically complete the program in four calendar years. Students with non-business degrees will need to complete background courses that may lengthen the program duration. Students entering the program must have completed undergraduate and/or graduate coursework in calculus and linear algebra.

MARKETING
Master of Science

The Master of Science in Marketing degree program advances students’ knowledge and expertise in marketing theory and practice and prepares them for careers in marketing analysis, research, management and scholarship. A coordinated curriculum of quantitative and analytical skills development, research methods, consumer analysis and strategic marketing analysis provides students with the necessary background to pursue careers in marketing research, analysis and policy and/or as a platform for further education to prepare students for careers in academia. This is accomplished through rigorous coursework and seminars and a major research project. This one-year master’s degree is designed to enhance the skills and training of students with prior academic and work experience in business. Applicants should have an undergraduate degree in business from an accredited college or university. In addition, it is preferred that incoming students have some professional work experience. Students applying to the MS in Marketing program who are not graduates of an AACSB-accredited college or school of business administration will be required to demonstrate completion of three credit hours of collegiate microeconomics, six hours of calculus and a junior-level course in marketing, or equivalent, to be considered for the program.

The Master of Science in Marketing degree requires completion of 30 credit hours of graduate marketing and related coursework. Core courses include EX ST 8100, MKT 8600, 8610, 8620, 8630, 8650, 8700. In addition, three credit hours in approved graduate coursework and three hours in advanced topics in marketing are required. MS in Marketing courses are typically offered in Greenville, although students may also take courses on the main Clemson campus.

MBA
See Business Administration heading.

PSYCHOLOGY

The Department of Psychology offers PhD degrees in Industrial/Organizational Psychology and in Human Factors (Engineering) Psychology and an MS degree in Applied Psychology with concentrations in Industrial/Organizational Psychology and Human Factors Psychology. These programs are designed to provide the student with the requisite theoretical foundations, skills in quantitative techniques and research design and practical problem-solving skills to address human problems related to work. The Human Factors Concentration is fully accredited by the Human Factors and Ergonomics Society.

APPLIED PSYCHOLOGY
Master of Science

APPLIED PSYCHOLOGY
Master of Science
HUMAN FACTORS PSYCHOLOGY
Doctor of Philosophy

INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Doctor of Philosophy

Information regarding Psychology Degrees
A formal thesis and supervised field internship are required for the MS degree. MS students complete 45 credit hours, including six hours of thesis credit and six hours of credit for the internship. Typically, the internship is completed in the summer between the first and second years of the program. In some cases, six credit hours of approved electives may be substituted for the field internship.

Students in the doctoral programs are expected to satisfy the master’s program requirements plus an additional 45 credit hours prior to receiving the doctorate. In addition to the required courses, a doctoral program must include 18 hours of dissertation research and an oral dissertation defense. Students are admitted to candidacy for the PhD degree upon successful completion of a comprehensive examination.

Applicants should have an undergraduate degree with a major in psychology or a related field from an accredited college or university. All applicants must submit scores from the general portion of the GRE. Applicants must also submit three letters of reference and a statement describing their interests and accomplishments and the faculty members they want to work with. The application deadline is January 15. Program information and application requirements are available at www.clemson.edu/psych/.

REAL ESTATE DEVELOPMENT
Master of Real Estate Development
The Master of Real Estate Development Program, jointly administered by the School of Accountancy and Finance and the Department of Planning and Landscape Architecture in the College of Architecture, Arts and Humanities, creates the educational opportunity for encouraging future development entrepreneurs to produce exciting, quality projects respecting environmental sustainability, social consciousness, design excellence and financial feasibility within the risk-reward framework. See complete program description under the College of Architecture, Arts and Humanities.

TECHNOLOGY ENTREPRENEURSHIP Certificate
The Certificate in Technology Entrepreneurship is available to graduate students in engineering and science disciplines across campus. The certificate is intended to serve those students who envision an entrepreneurial career as their long-range career goal, who want to be involved in new product and new business activities within a corporate setting, or who seek a better understanding of the process of commercializing inventions.

For more information, please visit www.clemson.edu/mba.

Courses are offered in astronomy, engineering graphics, and environmental science and policy to provide electives for students in other areas.

Degrees offered are the Master of Engineering, Master of Science and Doctor of Philosophy. The MS and PhD programs serve primarily full-time graduate students. Industrial residency programs leading to the Master of Science degree are available in certain engineering departments. Financial aid, in the form of full and partial fellowships and teaching and research assistantships, is available. Other financial aid packages are available to outstanding applicants. A broad and vigorous research program provides excellent opportunities for thesis and dissertation research.

The Master of Engineering program is open to individuals who are interested in professionally oriented advanced study. Requirements for the program are a baccalaureate degree from an ABET-accredited engineering program or equivalent, academic and professional records which indicate motivation for and the ability to complete additional professional study, and acceptance by the chair of the department in which the individual plans to major and by the Dean of the College of Engineering and Science.

Graduate engineering education opportunities for practicing engineers are available in two disciplines. The Department of Electrical and Computer Engineering offers off-campus graduate courses leading to the Master of Engineering degree through satellite broadcasts, Internet and DVD. The Department of Mechanical Engineering offers selected off-campus graduate courses at the University Center of Greenville. Furthermore, graduate courses in both disciplines are offered on-campus during the late afternoon/early evening once a week.

AUTOMOTIVE ENGINEERING

Master of Science

Doctor of Philosophy

The Master of Science and Doctor of Philosophy degrees in Automotive Engineering prepare a new generation of engineers to deal with the complex technological, environmental and globalization issues facing the automobile industry. The big challenge facing the industry is the integration of diverse technologies in the automobile and its cost effective and environmentally responsible manufacture, all being done in a global network with people of different backgrounds and cultures. The Automotive Engineering programs equip students with the basis, depth and domain knowledge needed for master's and doctoral-level expertise in systems integration and vehicle systems engineering and the ability to work globally. Graduates of the program are able to lead teams of culturally diverse individuals to produce an integrated automobile platform or to work in research laboratories involved with the design of new products in the automotive field. While the program is geared toward the automobile industry, it produces strong linkages with the aerospace and other industries within the state, region and nation as some of the challenges faced by the automotive industry are also faced in other sectors.

Master of Science

Admission to the MS program occurs in the fall semester only. Students are required to hold a BS degree from a recognized relevant engineering or science discipline with preference of two years of postbaccalaureate fulltime work experience in industry. Students have the opportunity to tailor the program either in the functional aspects or systems aspects of automotive engineering through appropriate course choices.

The program is divided into four content areas, consisting of 36 credit hours of coursework and six hours of project work, as follows:

Core Courses—AU E 8330, 8350, 8800, 8810, 8820, 8830

Automotive Engineering Track—48 credit hours in up to three track areas with nine hours in automotive engineering courses and nine hours based on the student's interests and specialization.

Business or Related Field—a minimum of six hours in a concentration area or minor approved by the advisory committee

Internship—a six-credit-hour internship of six months duration in an industrial setting

Doctor of Philosophy

Students are admitted into the PhD program in the fall, spring and summer terms. Minimum admission requirements include a bachelor's or master's degree in a recognized relevant engineering or science discipline. Students entering the program directly with a BS degree must meet the entrance requirements for the MS degree and have a grade-point average of 3.5 or higher in their undergraduate programs. Program requirements are as follows:

Core Courses—AU E 8330, 8350, 8800, 8810, 8820

Automotive Engineering Track—minimum of six hours (two AU E courses from two track areas)

Discipline-Specific Courses—no minimum requirements, typically five additional courses

Business or Related Field—minimum of three hours in a directed, nontechnical field

Technical Courses—minimum of nine hours in a concentration area outside the discipline or a technical minor dissertation—18 credit hours

Foreign Residency—six-month residency at a foreign research laboratory or university is encouraged

BIOENGINEERING

Master of Science

Doctor of Philosophy

Bioengineering is the application of engineering and scientific principles to understand and solve medical problems. As medical technology has rapidly developed over the past four decades, the demand for qualified bioengineers has dramatically increased. Career opportunities for bioengineers range from teaching and conducting basic research in academia to research and development work in the growing medical product industry. Employment opportunities are also available in independent research laboratories, hospitals and federal agencies such as the Food and Drug Administration or the National Institutes of Health.

Applicants to the Bioengineering programs typically hold a Bachelor of Science degree in engineering or related science. Students with nongrading undergraduate backgrounds are required to take remedial courses in engineering (e.g. materials science, statics and mechanics, and calculus through differential equations) in addition to their regular bioengineering curriculum, which may be taken either before or after enrollment.

The Department offers a Master of Science and a Doctor of Philosophy degree. The curriculum for the MS degree consists of a core of recommended bioengineering courses supplemented by elective courses that provide the student greater depth in a specific area of interest. Two degree options are offered at the master's degree level: a thesis and a non-thesis option. The thesis option requires a total of 30 credit hours (six of which must be research credits) and the submission and defense of a master's thesis. The non-thesis option requires a minimum of 33 credit hours followed by the submission and oral presentation of a publishable-quality report on an approved topic. The minimum time necessary to complete the master's degree is normally 16 months, out of which at least one academic semester must be undertaken in residence as a full-time student at Clemson University. Students interested in obtaining a doctoral degree are encouraged to apply directly to the PhD program from their BS degree program, with the PhD program typically requiring about five years to complete following the BS degree or about four years following the MS degree. The selection of courses for the doctoral degree is flexible and depends on the background and objectives of each candidate. A typical program includes 12 or more credit hours of graduate-level courses beyond the MS degree requirements and a total of 60 hours beyond the bachelor's degree. Candidates for the PhD degree must provide evidence of their potential success in advanced graduate study. This is demonstrated by passing the candidacy exam. The PhD program culminates with the presentation and successful defense of a doctoral dissertation, which is scheduled following the completion of the student's approved research plan. More detailed information is available in the website: http://www.clemson.edu/ces/bioc/
Combined BS/MS Plans
The Department of Bioengineering offers a combined BS/MS plan. Under the plan, Clemson students may reduce the time necessary to earn both a BS degree in Bioengineering or Biological Sciences and an MS in Bioengineering by applying graduate credits to both undergraduate and graduate program requirements.

Students are encouraged to obtain the specific requirements for the dual degree from the undergraduate department or the Department of Bioengineering as early as possible in their undergraduate programs to ensure that all prerequisite and other program requirements are met. Enrollment guidelines and procedures can be found in the website: http://www.clemson.edu/ces/bioe/

BIOSYSTEMS ENGINEERING
Master of Science
Doctor of Philosophy
The biosystems engineering graduate program within the Department of Environmental Engineering and Earth Sciences is designed to prepare graduates for leadership, creative accomplishment and continued professional learning, and to prepare graduates to effectively conduct independent scientific research related to sustainable biological systems design.

Students from all engineering disciplines are encouraged to apply. Applicants from non-engineering disciplines are welcome, but may be required to take additional undergraduate courses. Each degree program is planned individually to augment the student's previous engineering and science background with adequate breadth in engineering and specialization in an area of biosystems engineering including bioprocessing and ecological engineering. In addition to biosystems engineering, course work includes mathematics, physics, chemistry, statistics, and biological and engineering sciences.

Graduates from the BE program find employment in biofuels, biopharmaceutical and bioprocessing plants or biorefineries, engineering and environmental consulting firms, sustainable land and water resource management, state and federal government agencies and academia.

For admission to the M.S. or Ph.D. program, an applicant should have a grade point average (GPA) of at least 3.0 out of 4.0. Ranges of scores for students admitted to the BE program on the Graduate Record Exam (GRE) are typically greater than 155 (700) Q, 150 (450) V, 3.5 A and 90 TOEFL. Students with a baccalaureate or masters degree in a related science or engineering field may apply directly to the PhD program. Students with exceptional records and experience in research will be considered for the PhD program. Exceptional records and experience in research will be considered for the PhD degree without a master’s degree, while most students admitted to the PhD program will have previously received a masters degree.

Combined BS/MS in Biosystems Engineering
Under this plan, Clemson students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Biosystems Engineering as early as possible in their undergraduate program. Enrollment guidelines and procedures can be found in the Undergraduate Announcements.

CHEMICAL ENGINEERING
Master of Science
Doctor of Philosophy
The Department of Chemical and Biomolecular Engineering offers programs leading to the Doctor of Philosophy and the Master of Science degrees. Graduate programs at Clemson prepare students to apply science and engineering principles to complex problems associated with the chemical, biomolecular and associated industries. Students develop a rigorous fundamental science base coupled with insight into engineering applications. Graduates can become involved in the research, manufacture and use of chemicals, polymers, pharmaceuticals, electronic components, consumer products and petroleum products, to name a few. The department has strong research programs in advanced materials, biotechnology, energy, and chemical and biochemical processing.

Although most graduate students have a BS in Chemical Engineering, students with backgrounds in chemistry, physics, or other branches of engineering are encouraged to apply and will be considered fully for admission. To facilitate a transition from BS degrees other than Chemical Engineering, special programs are available. Students can enter the PhD program in Chemical Engineering directly after completion of a BS degree.

The MS degree program consists of 30 credit hours, including six credit hours of research. Coursework includes CHE 8030, 8040, and 8050. In addition, six hours of approved chemical engineering electives and nine hours of approved technical electives are required. At least six of these 15 elective hours must be selected from courses numbered 8000 or above. MS degree candidates must complete a thesis.

The PhD program consists of 30 credit hours of approved graduate courses beyond the BS degree, including six credit hours of approved graduate courses at Clemson. Admission to candidacy for the PhD degree requires completion of written qualifying and oral comprehensive examinations. Doctoral students must satisfy the MS course requirements through courses taken at Clemson University or elsewhere. In addition, each student is required to complete 30 credit hours of graduate research, including 24 doctoral dissertation research credit hours (CHE 9910) taken at Clemson University. The PhD program concludes with the completion and defense of a dissertation.

Minors for doctoral students may be taken in chemistry, physics, mathematics, life sciences, or other branches of engineering.

CHEMISTRY
Master of Science
Doctor of Philosophy
Degree concentrations are offered in analytical, inorganic, organic and physical chemistry. Research areas also include bio-organic chemistry, polymer chemistry, materials chemistry, chemical physics and other areas.

MS degree candidates must complete 24 hours of coursework and six hours of research culminating in a satisfactory thesis.

The primary requirement for the PhD degree is the performance of original research leading to a dissertation. PhD degree candidates must qualify to pursue the degree by completing a flexible curriculum of coursework designed to demonstrate broad chemical awareness, a distribution requirement and a focus area requirement. Some coursework requirements may also be satisfied by examination. Students must complete 18 graduate credits in their first year of study and must have a GPR of 2.90 or better by the end of their third semester.

Admission to candidacy for the PhD degree requires completion of a comprehensive examination in the area of concentration. This exam takes the form of a written cumulative exam, followed by an oral presentation before a faculty committee.

CIVIL ENGINEERING
Master of Science
Doctor of Philosophy
The Department of Civil Engineering offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. Within these degrees, there are six primary emphasis areas: Applied Fluid Mechanics, Construction Materials, Geotechnical Engineering, Project Management, Structural Engineering and Transportation Systems.

Master of Science
The Master of Science degree program is open to all individuals who have a four-year baccalaureate degree. A degree in engineering is not required for admission, but most entering students have an undergraduate Civil Engineering degree.

There are two options available for students pursuing a Master of Science degree. The student may prepare a research thesis or may take additional courses in lieu of completing a thesis.

The thesis option requires the preparation of a research thesis that is a part of the total credit hours required for the degree. Students intending to pursue a doctoral degree usually choose the thesis option. Completion of a research thesis is excellent preparation for the research necessary for a doctorate if a student is inclined to pursue that degree in the future.

The non-thesis option does not require the preparation of a research thesis but does require completion of additional coursework. This degree option provides the student with additional directed study through coursework. Normally students pursuing the non-thesis option will not pursue a doctorate.
Except for the core courses required by different disciplines, there are no formal course requirements for students pursuing a Master of Science degree. The program normally contains some engineering design and a minimum of ten credits of engineering science, advanced mathematics and basic science. In addition, each student in the thesis option must complete an advanced research project. The final program of study must contain at least 30 hours of graduate credit including the core curriculum requirements. Of these 30 credits, no more than six hours may be thesis research (CE 8910) for those students pursuing the thesis option. At least half of the remaining hours must be from courses numbered 8000 or above.

The final examination for the MS non-thesis option is an oral or written exam (or a combination of the two) consisting of questions related to fundamental knowledge in a student’s chosen area of concentration (i.e., applied fluid mechanics, construction materials, geotechnical engineering, project management, structural engineering, or transportation systems).

The final examination for the MS thesis option is an oral exam consisting of a student’s MS thesis defense and questions related to fundamental knowledge in a student’s chosen area of concentration (i.e., applied fluid mechanics, construction materials, geotechnical engineering, project management, structural engineering, or transportation systems).

Doctor of Philosophy

The Doctor of Philosophy degree program is open to all individuals who have a baccalaureate degree and preferably a Master’s degree in engineering. Except for the core courses required by different disciplines, there are no formal course requirements for students pursuing a PhD degree; however, each student must complete 18 hours of dissertation research (CE 9910).

The purpose of the PhD research dissertation is to afford the student the opportunity to participate in independent specialized engineering research that can advance the state of the art. The research is conducted under the direction of a member of the faculty who will normally serve as chair of the student’s academic advisory committee. The research should be sufficiently demanding technically so as to demonstrate the student’s ability to assimilate knowledge from several subject areas for the advancement of engineering knowledge.

Student Evaluation—During the first two semesters in residence, a PhD student must select a faculty advisor. The faculty advisor may assign the student specific duties outside normal coursework requirements that include, but are not necessarily limited to, preparing research proposals and literature surveys, conducting classroom lectures, formulating computer models and executing data collection and analysis. The advisor may, at any time, withdraw as the student’s faculty advisor if these assigned duties are not performed consistent with the expectations of the faculty advisor. During this initial two-semester period, an advisor should make a determination as to whether a student is capable of completing the requirements for the PhD degree.

Comprehensive Examination—The PhD comprehensive examination is generally scheduled after all coursework has been completed and the dissertation proposal is ready for approval by the student’s graduate committee. The examination, therefore, consists of two parts: (1) a written and/or oral examination by the advisory committee on the student’s preparation to complete the proposed research and (2) presentation of the proposed research. The PhD comprehensive examination should be completed within two years of entering the PhD program. The written and/or oral examination may include consideration of graduate coursework, preliminary research and/or other demonstration of the ability to conduct the proposed research. After passing this examination, the student is officially admitted to candidacy for the PhD degree.

Dissertation Defense—As required by the Graduate School, the candidate for the Doctor of Philosophy degree must pass a final oral examination (dissertation defense). The examination consists of a presentation of the student’s doctoral research and an assessment by the committee of the research approach, the significance of the findings and the contribution to the advancement of civil engineering.

More information about the Department of Civil Engineering is available at www.ce.clemson.edu or by phone at (864) 656-3000.

Combined BS/MS in Civil Engineering

Civil Engineering undergraduates at Clemson may begin a Master of Science degree program while completing the Bachelor of Science degree and use a limited number of courses provided by the requirements of both their undergraduate and graduate degrees. The following requirements apply:

1. Undergraduate students must have a minimum cumulative grade point average of 3.4 and must have completed the junior year prior to taking graduate courses. Students are required to maintain this minimum grade point average to continue enrollment in the combined degree program.

2. Graduate Record Examination (GRE) scores are not required to be submitted as part of their Graduate School application; however, applicants are encouraged to submit GRE scores to receive full consideration for graduate fellowships and assistantships upon completion of the BS degree.

3. Up to six semester hours from any 6000- or 8000-level civil engineering courses may be used to satisfy the requirements of the BS degree. These courses may be counted as technical requirements or electives. Undergraduate students are required to have selected one of their technical requirements from the area of transportation systems, geotechnical engineering, or environmental engineering.

4. Since approval of the graduate program of study is required by the student’s graduate advisory committee, students should consult with their academic advisors before selecting courses to be included in the graduate program.

5. Students in a combined degree program are conditionally accepted to the graduate program until completion of the BS degree requirements. Students are not eligible for graduate assistantships until full acceptance is granted.

Students interested in this combined degree program should consult the Civil Engineering Graduate Program Coordinator, the undergraduate advisor and the Civil Engineering Honors Coordinator (if applicable). Students pursuing an optional emphasis area in their undergraduate degree program may substitute 6000-level courses for any 4000-level counterpart taken to meet the requirements of an emphasis area. Application for this program should be made by the end of the junior year, but no later than one semester prior to expected BS graduation.

Application details are available in the Undergraduate Announcements.

Design of Low-Rise Structures Graduate Certificate

The low-rise structures certificate program consists of a set of courses which are relevant to the structural designer who deals with structures that are one to five stories in height. To enter this certificate program, one must possess a bachelor’s degree in Civil Engineering, must be in their senior year with a GPA of 3.0 or greater within a civil engineering program and be able to demonstrate that they have sufficient background to be able to be successful in the program. This background includes a basic knowledge of structural analysis, geotechnical mechanics and civil engineering materials. To receive the certificate the participant must complete any three classes from the following list of courses at a graduate level. A grade of C- or better is required for all courses that are part of the certificate program. Classes taken as part of this program may be eligible for applying towards an MS degree in Civil Engineering. Contact the Civil Engineering Department for further details.

CE 6040 Masonry Structural Design 3(3)—online or on campus–Introduction to design of structural elements for masonry buildings. Lintels, walls, shear walls, columns, pilasters and retaining walls are included. Reinforced and unreinforced elements of concrete or clay masonry are designed by allowable stress and strength design methods. Introduction to construction techniques, materials and terminology used in masonry. Preq: CE 3010 or consent of instructor.

CE 6070 Wood Design 3(3)—online or on campus–Introduction to wood design and engineering; properties of wood and wood-based materials; design of beams, columns, walls, roofs, panel systems and connections. Preq: CE 3010 or consent of instructor.

CE 6080 Structural Loads and Systems 3(3)—online or on campus–In-depth discussion of minimum design loads and load combinations. Includes overview of various steel and concrete systems. Discusses practical selection and design issues and design of proprietary building materials and components such as steel joists and diaphragms, etc. Preq: CE 3010 or consent of instructor.

CE 6210 Geotechnical Engineering Design 3(3)—online or on campus–Relationship of local geology to soil formations, groundwater, planning of site investigation, sampling procedures, determination of design parameters, foundation design and settlement analysis. Preq: CE 3210 or consent of instructor.
CE 804 Prestressed Concrete (3)–online or on campus—Introduction to the analysis, behavior and design of prestressed concrete members and structures. Covers allowable stress design and strength design of P/C members, shear design, loss of prestress force, design of continuous structures. Preq: CE 4020 or consent of instructor.

COMPUTER ENGINEERING

Master of Science

Doctor of Philosophy

The Computer Engineering program is a combination of computer software, hardware, systems and applications. Areas of specialization include computer systems architecture, communication networks, digital signal processing and intelligent systems. Enrollment is open to graduates in any branch of engineering, computer science, or applied mathematics who have an appropriate engineering and/or science background.

For the MS program, students may write a thesis or follow a non-thesis option. The thesis option requires a total of 30 credit hours including six hours of thesis research. For the non-thesis option, 33 credit hours of coursework must be completed.

The PhD degree requires at least 24 credit hours of graduate coursework beyond the master’s degree and 18 research credit hours. Specially qualified candidates with a BS degree may apply for direct entry to the PhD program in any of the above areas. The program of study and hours required beyond the baccalaureate degree are specified by the focus area but must be at least 60 hours including coursework and research credit.

Detailed information is available at www.clemson.edu/ces/cee.

COMPUTER SCIENCE

Master of Science

Doctor of Philosophy

To receive full admission to graduate study in computer science, a student must have taken intermediate level undergraduate computer science, including computer organization, data structures, operating systems, either algorithms or theory of computation, and either compilers or survey of programming languages; and basic mathematics including discrete mathematics. An applicant with minimal deficiencies may be admitted with prerequisites, while one with several deficiencies may be required to satisfactorily complete prerequisite work as a non-degree student prior to admission as a graduate student.

A candidate for the MS degree must satisfactorily complete an approved program of at least 30 graduate hours. Students may elect one of two options to satisfy the degree requirements: a coursework-only option or a thesis option. The thesis option requires six hours of research credit as part of the 30-hour requirement. Students may take up to six hours of approved courses in areas outside the department.

Although formal course requirements for the PhD degree are minimal, a typical program requires two to four years of study beyond the MS degree. Each candidate is required to pass a comprehensive examination, a dissertation proposal and a defense of the dissertation.

Combined BS/MS in Computer Science

Clemson Computer Science students may begin a Master of Science degree program while completing the Bachelor of Science degree and use a limited number of courses to satisfy the requirements of both their undergraduate and graduate degrees. The following requirements apply:

1. Undergraduate students must have a minimum cumulative grade-point average of 3.4 and must have completed the junior year prior to taking graduate courses. Students are required to maintain this minimum grade-point average to continue enrollment in a combined degree program.

2. Graduate Record Examination (GRE) scores are not required to be submitted as part of the Graduate School application; however, applicants are encouraged to submit GRE scores to receive full consideration for graduate fellowships and assistantships upon completion of the BS degree.

3. Students in a combined degree program are conditionally accepted to the graduate program until completion of the BS requirements. Students with this conditional acceptance are not eligible for a graduate assistantship until the conditional acceptance is removed.

4. Up to nine semester hours from any 6000- or 8000-level computer science courses may be used to satisfy the requirements of the BS degree.

5. Graduate courses taken as an undergraduate may be included in the graduate program of study; however, any 6000-level course that has a corresponding required 8000-level counterpart in the BS or BA in Computer Science or the BS in Computer Information Systems may not be counted toward the MS degree. After approval of the graduate program of study is required by the student’s graduate advisory committee, students should consult their academic advisors before selecting courses to be included in the graduate program.

Students interested in this combined degree program should discuss it with the Computer Science graduate program coordinator and undergraduate program advisor. Students pursuing Senior Departmental Honors should also meet with the Computer Science Honors Coordinator. Application to this program should be made by the end of the junior year but may be made at any time from the junior year until one semester prior to the expected BS graduation. Application details are available in the Undergraduate Announcements.

The Computer Science faculty envision students enrolled in this combined degree program will typically complete nine hours of graduate credit while completing their BS degree requirements and complete the remaining requirements for the MS degree in one calendar year or less of graduate study.

DIGITAL PRODUCTION ARTS

Master of Fine Arts

The Digital Production Arts program at Clemson University is a professional degree program aimed at producing graduates who will be sought by the growing electronic arts industry, particularly by those companies engaged in special effects production within the entertainment, film and gaming industries. Because the MFA is a terminal degree in fine arts, students will also be prepared to accept university faculty positions. The program is offered within the Division of Visual Computing in the School of Computing, with significant collaboration with the departments of Art and Performing Arts. It offers a unique blend of instruction, with coursework ranging from the artistic to the technical, all with a strong emphasis on advanced studio methods for visual problem solving.

The Master of Fine Arts in Digital Production Arts is administered by a supervisory board, chaired by the program director, and consisting of five additional faculty members—two from the Division of Visual Computing, two from the Department of Art, and one from the Department of Performing Arts.

Admission and Financial Aid

Applicants are required to submit GRE general test results, a portfolio of artistic work that may include slides or electronic media, and evidence of technical preparation that may include software code samples or appropriate coursework. Some assistantships may be available to especially well-qualified applicants. For full consideration for admission and financial aid, applications should be received by January 10.

Requirements for Awarding of a Degree

The degree requires 60 hours, 12 of which are devoted to team-based studio work, six to individual studio work, and six to thesis preparation. This ensures that students have participated in the development of several complete digital production projects, providing material for a professional quality demonstration reel. Of the remaining 36 credit hours, 06 will come from foundation courses, 15 from core courses, three from aesthetic electives, and 12-18 from general electives, aesthetic electives, or core courses. Any required foundation courses are determined at the time of admission. These courses provide students with post baccalaureate work in the fundamentals of computing or the visual arts. A maximum of six hours of foundation courses may be counted towards the degree. For students with strong preparation, the course of study requires two calendar years.

Foundation Courses—Selected from DPA 6000, 6010 (technical), 6020, 6030 (artistic)

Core courses—Selected from ART 8210, CPSC 6040, 8070, 8090, 8150, THEA 6870

Electives—Selected from ART 6050, 6070, 6090, 6110, 6130, 6170, CPSC 6030, 6110, 6140, 8030, 8080, 8170, 8190, 8360, ECE 8470, GC 8510, MUSC 6800, PSTC 8230, THEA 6720, 6970.

Studies—DPA 8600, 8880, 8910
ELECTRICAL ENGINEERING

Master of Engineering

Doctor of Philosophy

Students in Electrical Engineering may direct their programs toward the fields of communication systems and networks, digital signal processing, intelligent systems, applied electromagnetics, electronics, or power systems.

For the MS program, students may write a thesis or follow a non-thesis option. The thesis option requires a total of 30 credit hours, including six hours of thesis research. For the non-thesis option, 33 credit hours of coursework must be completed.

The Master of Engineering is a special degree offered for off-campus students through the University telecampus program. Degree requirements include 24 credit hours of coursework and six hours of credit for an engineering report. Additional information is available from the Office of Off-Campus, Distance and Continuing Education.

The PhD program requires at least 24 credit hours of graduate coursework beyond the master’s degree and 18 research credit hours. Specially qualified candidates with a BS degree may apply for direct entry to the PhD program in any of the above areas. The program of study and hours required beyond the baccalaureate degree are specified by the focus area, but must be at least 60, including coursework and research credit.

Details information on program requirements and application procedures is available at www.clemson.edu/ces/eece.

ENGINEERING AND SCIENCE EDUCATION

Doctor of Philosophy

The PhD program in Engineering and Science Education is a nationally unique graduate program in science, technology, engineering, and mathematics (STEM) education research. The Department of Engineering and Science Education (ESE) in the College of Engineering and Science is the only department in the country that includes both engineering education and science education in a college of science and engineering. As such, it includes faculty who are experts in several areas of science education and engineering education, and who have active research programs in these fields. Students in this program are exposed to a wide breadth of STEM education research under current investigation and are prepared to interface between the development of new theory in STEM education and the implementation of new research findings in practice. This discipline-based education research (DBER) combines knowledge of teaching and learning with deep knowledge of discipline-specific science content. It describes the discipline-specific difficulties learners face and the specialized intellectual and instructional resources that can facilitate student understanding.

The objectives of the ESE PhD program are to prepare students for academic careers in STEM education, science education policy in higher education or informal education institutions, or a range of other careers that require a deep disciplinary knowledge coupled with understanding of the factors that affect student learning, retention, and inclusion in STEM. Students who enroll in this program are expected to be content experts in a STEM discipline with at least a Master’s degree in their content area of expertise. Graduates from this program are prepared to become faculty in traditional departments of engineering or science, as well as STEM education departments. They are prepared to lead curricular and pedagogical reform at the post-secondary level as well as conduct research in the burgeoning fields of STEM education research.

Engineering and Science Education Certificate

The Certificate in Engineering and Science Education is designed for graduate students who want to prepare for an academic career, who wish to further their understanding of the education process in engineering and science, or who are interested in engineering and science education research. The program includes a range of courses in three main areas: Pedagogy, Professional Preparation, and Research Methods, as well as a practicum and seminar at a seminar series, for a total of 11 credits as outlined below. Additional information is available at www.clemson.edu/ces/eece.

Pedagogy—Three credits: CES 8300 or 8210 or ED 9550

Professional Preparation—Three credits: CES 8250, 8750, or 8850

Elective—Three credits: CES 8710, EDF 8080 or 8780, EEN 8020, PSTC 8110 or 8330

Practicum—One credit: CES 8610

Seminar—One credit: CES 8000

ENVIRONMENTAL ENGINEERING AND SCIENCE

Master of Science

Doctor of Philosophy

Environmental engineering and science is concerned with the characterization and control of environmental pollution. Emphasis is placed on applying the fundamental principles of the basic and engineering sciences through research and design to the solution of environmental problems in natural and engineered systems.

The MS program builds on a student’s previous engineering or science background. Students with a baccalaureate degree in any branch of engineering, as well as chemistry, physics, geology, biology, or related majors with a strong mathematical background may be admitted to the program.

Students may specialize in one of six areas: environmental health physics; environmental process engineering; nuclear environmental engineering and science; sustainable systems and environmental assessment; subsurface and surface processes; or environmental chemistry. Research master’s degree candidates must complete 24 hours of coursework and six hours of research culminating in the presentation of a satisfactory thesis for MS candidates. The MS non-thesis option, which requires 30 hours of coursework including three hours of independent study, is available. The coursework for all master’s students must include EES 8020, 8430, and 8510. A final examination is required of all master’s candidates.

The PhD program provides the student with a comprehensive background in the fundamental aspects of environmental engineering and science. The major field of study is generally interdisciplinary in nature, consisting of at least 30 hours of coursework beyond the MS degree in several areas of engineering and the basic sciences. Each student’s curriculum and research program is tailored to suit his/her personal and professional goals. Qualifying, comprehensive and final examinations are required. No foreign language is required.

Combined BS in Biosystems Engineering/MS in Environmental Engineering and Science

Undergraduate Biosystems Engineering majors who have earned a grade-point average of 3.4 or above and completed 90 credit hours can begin work toward a Masters of Science in Environmental Engineering and Science while completing a Bachelor of Science degree. The undergraduate curriculum allows up to nine credits of mutually acceptable graduate course credits to satisfy requirements of both degrees. Details are available in the Biosystems Engineering Undergraduate Handbook, which can be found at www.clemson.edu/ces/ees.

Combined BS in Chemical Engineering/MS in Environmental Engineering and Science

Clemson undergraduate Chemical Engineering majors who have earned a grade-point average of 3.4 or above and completed 90 credit hours can begin work toward a Master of Science in Environmental Engineering and Science while completing a Bachelor of Science degree. The undergraduate curriculum allows up to nine credits of mutually acceptable graduate course credits to satisfy requirements of both degrees. Details are available in the ChBE Undergraduate Handbook, which can be found at www.clemson.edu/ces/chbe.

Combined BS in Environmental Engineering/MS in Environmental Engineering and Science

Clemson undergraduate Environmental Engineering majors who have earned a grade-point average of 3.4 or above and completed 90 credit hours can begin work toward a Master of Science in Environmental Engineering and Science while completing a Bachelor of Science degree. The undergraduate curriculum allows up to nine credits of mutually acceptable graduate course credits to satisfy requirements of both degrees. Details are available in the Undergraduate Handbook, which can be found at www.clemson.edu/ces/ees.
HUMAN CENTERED COMPUTING

Doctor of Philosophy
To receive full admission to graduate study in human centered computing (HCC), a student must have completed an undergraduate degree and have taken computer programming courses through data structures. An applicant with minimal deficiencies may be admitted with prerequisites, while one with several deficiencies may be required to satisfactorily complete prerequisite work as a non-degree student prior to admission as a graduate student. Although formal course requirements for the PhD degree are minimal, a typical program requires two to four years of study beyond the MS degree. Each candidate is required to pass a comprehensive examination, a dissertation proposal and a defense of the dissertation.

Admission and Financial Aid
Applicants are required to submit GRE general test results. Applicants are accepted for both fall and spring semesters. Assistantships are available for especially well qualified applicants.

Requirements for Awarding of a Degree are:
1. 60 credit hours beyond the Bachelors degree
2. A portfolio (a combined version of the PhD qualifying and comprehensive exams)
3. Competency in four topic areas, typically demonstrated by coursework: Computing, People, Research Methods and Design, Cognate Area
4. Ability to pursue research, typically demonstrated by producing a research publication, which may be co-authored with the student’s advisor
5. Proposing, completing and defending a dissertation.

Students are required to have a strong computing or computation core with training in areas that emphasize people or the human condition and research methods for studying people, technology, policy and/or information. Each student is required to take a first course in the fundamentals of HCC for three hours. Students are required to take 12 hours in computing or computer science track from 6000- or 8000-level computer science courses, six hours from a people or human condition track consisting of courses from psychology, human factors, policy, etc., and six hours of research methods. Students are required to take a series of at least nine hours in a cognate or specialty domain under the advisement of their dissertation research advisor with the approval of the HCC graduate program committee. Students are also required to take six hours of pre-dissertation (pre-portfolio) research, CPSC 8880 Directed Projects in Computing. Students also take 18 hours of dissertation research (CPSC 9910).

HYDROGEOLOGY

Master of Science
The Master of Science in Hydrogeology is an interdisciplinary program that focuses on groundwater geology and subsurface remediation and draws on the expertise of faculty in the Department of Environmental Engineering and Earth Sciences. The curriculum is structured to impart a strong background in field experimentation complemented by laboratory studies and computer modeling.

Candidates for the Master of Science degree in Hydrogeology should have a baccalaureate degree in the geosciences; however, students having strong undergraduate backgrounds in other fields of science or related engineering disciplines may be admitted but will be required to correct deficiencies in their geological education during the first year. Specifically, GEOL 1010/1030, 2050, 3020, 3130, and 3160 (or an equivalent) are required. Students entering this program should also have a strong mathematics background; normally, two semesters of calculus are required and a third semester is recommended.

The degree requires 24 hours of coursework and six hours of thesis research. Candidates must write a thesis based on original research and defend it in an oral examination. Students may pursue a variety of research projects in hydrogeology and related areas such as environmental geochemistry, geophysics, sedimentology/stratigraphy and multiphase flow modeling. A non-thesis option is available for students who meet requirements specified in the department handbook and who are approved by department faculty; it requires 30 hours of coursework and a comprehensive examination.

All candidates must take at least six core courses from a department-approved list, including a modeling course (GEOL (EES) 8080 is recommended), a field course (GEOL 8750 is recommended) and a minimum of three other 8000-level geology courses.

INDUSTRIAL ENGINEERING

Master of Engineering
Master of Science

Doctor of Philosophy
Industrial engineers design, develop and improve integrated systems that include people, materials, information, equipment and energy. In addition to these issues, graduates learn to address communications throughout the organization while completing their specialized education. Work at the doctoral level includes independent research, dissemination of findings and preparation for research and teaching careers.

Students with baccalaureate degrees in engineering, the physical sciences, mathematics, or related majors with a strong mathematical background may be admitted into the program. Entering graduate students are assumed to have competence in calculus, probability and statistics, calculus-based physics, and computing. Students admitted without this background will be required to complete successfully additional courses, some of which may not carry graduate credit.

The Master of Engineering program is an interdisciplinary program that focuses on capital projects supply chain engineering directed to working professionals. It is offered in collaboration with the Department of Management and the Department of Civil Engineering. The program is available fully in a distance learning format and courses are delivered asynchronously. Courses required in the program are IE 8500, 8510, 8520, 8530, 8540, 8550, 8560, 8570, 8580, and 8590, for a total of 30 hours of graduate coursework.

Master of Science students may select a thesis or non-thesis option. Students in the thesis option must complete a minimum of 30 hours of graduate coursework, including six credits of thesis research. Students in the non-thesis option must complete a minimum of 33 hours of graduate coursework.

The PhD program provides the student with a comprehensive knowledge of the field of industrial engineering and a mastery of the methods of research. Additional information is available at www.ces.clemson.edu/ie/

Undergraduates Involved in Graduate Programs
Undergraduate students majoring in Industrial Engineering at Clemson may take courses for graduate credit in two ways:
1. Seniors with a minimum cumulative grade-point average of 3.0 may apply to take graduate courses while continuing to pursue their bachelor’s degrees. If successfully completed, these courses may be eligible to be counted towards a master’s degree. Students selecting this option will not be allowed to count these courses towards the bachelor’s degree. (See Graduate School form GS-6 for details.)
2. Students with a minimum cumulative grade-point average of 3.4 may apply to take up to 12 semester hours of courses and have them count toward both the bachelor’s and master’s degrees in Industrial Engineering. To take advantage of this opportunity, students must have a minimum cumulative grade-point average of 3.4, must have completed the junior year and must have been admitted to the graduate program prior to enrolling in courses. Courses eligible for this program include IE 6520, 6560, 6600, 6850, 6870, 6900, 6910, 8000, 8020, 8030, 8040, 8090, 8110, 8120, 8130, 8600, 8650, 8710, 8800, 8860, 8880, and 8930. The Undergraduate Curriculum Committee has preapproved these classes as acceptable technical and free electives in a student’s BS program. Determination of whether the classes count towards the master’s degree will be made by the student’s advisory committee after he/she becomes a full-status graduate student. Students should notify the Graduate Coordinator in writing that they wish to be considered for this program. Enrollment guidelines and procedures can be found in the Undergraduate Announcements.

In both programs, the decision whether courses count towards the bachelor’s degree is determined by the undergraduate committee and whether they count towards the master’s degree is determined by the advisory committee that is formed after the student becomes a full-status graduate student.
Students should consult with their undergraduate advisor, the Graduate Coordinator and/or the Honors Coordinator before enrolling in graduate courses.

**MATERIALS SCIENCE AND ENGINEERING**

**Master of Science**

**Doctor of Philosophy**

Materials science and engineering is concerned with the production, properties and microstructure of the solid materials that are often the primary limitation to the advancement of modern technology. Emphasis is placed on applying the fundamental principles that govern the structure of the solid state to produce optimum mechanical, electrical, optical and other physical properties.

The curriculum provides for specialization in metallicurgy, glasses and ceramics, and polymeric materials, including electronic materials, biomaterials, polymer and fiber science, textile science, polymer and textile chemistry, and fiber and composite materials.

The Materials Science and Engineering program prepares graduate students to apply science and engineering principles to solve problems related to the scientific understanding, characterization and development of new technology necessary for the processing and manufacturing of different materials and related products.

Students with a baccalaureate degree in any branch of engineering, as well as chemistry, physics and biology majors with strong mathematical backgrounds, may be admitted to the program. The program is designed to produce engineers and scientists whose degrees represent specialization coupled with a broad foundation in all materials.

Master’s degree candidates must complete 24 credit hours of coursework and six credits of research. Of these 24 credit hours, a maximum of 12 credits may be taken from 6000-level courses. Each master’s degree student must take MSE 8260 and 8270.

The Doctor of Philosophy degree provides students with a comprehensive foundation in materials science and engineering. The major field of study is generally interdisciplinary in nature, consisting of coursework in several areas of engineering and science. Comprehensive and final examinations are required. No foreign language is required, but proficiency in one is recommended.

Students should consult their advisors for course requirements. All MS and PhD students must enroll in MSE 8000 every semester.

**MATHEMATICAL SCIENCES**

**Master of Science**

**Doctor of Philosophy**

Entering students are expected to have courses in linear algebra, differential equations, a computer language and statistics.

For the master’s program, both thesis and non-thesis options are available. The curriculum for both options includes foundation courses (advanced calculus, modern algebra, probability and discrete computing–courses often taken prior to entering the master’s program); a breadth requirement (a course from each of algebra, analysis, computing, operations research and statistics, plus one additional course in operations research or statistics); and a concentration area (six courses selected to define an identifiable specialty area). Every student’s program is required to include at least one course, possibly chosen from outside the Department of Mathematical Sciences, that emphasizes mathematical modeling. A minimum of 36 graduate credit hours is required for the master’s degree. In addition, students in the non-thesis option are required to complete a one-credit-hour project course.

Graduate students in the Department of Mathematical Sciences have at least three opportunities to participate in international cooperative programs. The first is an exchange program with the Department of Mathematics at Kaiserslautern University in Germany. Students can obtain two MS degrees, one from their home university and one from the host university. The second program is a two-year one-half month summer program, for Clemson math sciences students who have completed their first year of graduate study, in the Center for Industrial Mathematics at the University of Bremen in Germany. Students earn a certificate of participation from Bremen University. The third exchange program is with the Institute of Machine Sciences of the Russian Academy of Sciences (IMASH) in Moscow, Russia. Clemson University graduate students who have completed two semesters of study are eligible to participate in the program at IMASH for either a full semester or for a shorter, summer program. Academic work passed at IMASH will normally be accepted for credit towards the MS or PhD degree at Clemson. More information about each of these programs is available in the mathematical sciences graduate student handbook at: http://www.math.clemson.edu/ces/math/graduate/index.html.

Students in the doctoral program are expected to satisfy the master’s program requirements prior to receiving their doctorate. Including master’s study, a doctoral program must have two courses from each of the major areas of the mathematical sciences (algebra, analysis, computing, operations research and probability/statistics) and generally consists of 60 credit hours of graduate coursework. Students are admitted to candidacy for the PhD degree upon successful completion of a preliminary examination and the comprehensive examination. The preliminary examination consists of tests in three areas chosen from algebra, analysis, computing, operations research, statistics and stochastic processes. The comprehensive exam assesses the student’s readiness to perform independent research and competence in advanced graduate material. The PhD program must include both a concentration area and a supporting area. Additional information is available at www.math.clemson.edu/

Mathematical sciences courses at the 7000-level are applicable to master’s degree programs in the School of Education only.

**MECHANICAL ENGINEERING**

**Master of Science**

**Doctor of Philosophy**

Enrollment in the MS and PhD programs is open to students with degrees in physics, applied mathematics, or any branch of engineering.

Students in the MS degree program may choose the thesis or non-thesis option. Students in the thesis program must complete 30 credit hours of coursework, including six hours of thesis research and write a thesis. Students in the non-thesis program must complete 33 credit hours of coursework and pass an exit examination. Students in the PhD program must pass a qualifying exam, complete 18 hours of dissertation research and defend a dissertation.

Programs may be selected with concentrations in mechanical and manufacturing systems design (design, dynamics, vibrations, and control, materials and manufacturing), thermal/fluid sciences (computational fluid dynamics, fluid mechanics, heat transfer, thermodynamics and energy systems), or engineering mechanics (solid mechanics, composite materials, numerical computation methods and experimental methods).

**PHOTONIC SCIENCE AND TECHNOLOGY**

**Master of Science**

**Doctor of Philosophy**

The Photonic Science and Technology program, jointly administered by the Center of Optical Material Science and Engineering Technologies (COMSET), the College of Engineering and Science, and the Graduate School, offers interdisciplinary graduate degrees involving science, engineering, communications, entrepreneurship, business, and leadership. The program prepares individuals with the fundamentals of the science and engineering of light and specific interactions targeted for relevance to the research areas of their home academic department(s) and collaborative co-advised graduate committees.

Students with backgrounds in any relevant science or engineering discipline who have earned an undergraduate degree from an accredited college or university may be accepted. Undergraduate prerequisite or corequisite courses may be required for applicants with undergraduate degrees in nonengineering or nonscience disciplines.

Acceptance is recommended to the Graduate School by COMSET faculty review based on records of academic achievements, including grades from previous programs and GRE scores, and other appropriate professional accomplishments.

Each degree program is planned individually to augment the student’s previous engineering and science background with adequate breadth in science or engineering and specialization in an area of photonic science or engineering. Coursework includes photonic science and technology and related engineering and sciences currently offered in the member departments and schools of COMSET.
Candidates for the MS degree are required to complete a minimum of 30 credit hours, including 12 credit hours of core courses, three credit hours of PST seminar, nine credit hours of elective courses, and an additional six credit hours of thesis research, and complete an acceptable thesis.

Candidates for the PhD degree are required to complete a minimum of 30 credit hours, including nine credit hours of core courses, three credit hours of PST seminar, nine credit hours of elective courses, and an additional 15 credit hours of dissertation research, and complete an acceptable dissertation.

PHYSICS

Master of Science

Doctor of Philosophy

Graduate studies in physics and astronomy may be pursued by well-prepared students in the physical and mathematical sciences or engineering. As the basic physical science, physics offers unique intellectual opportunities. Theoretical, experimental, or computer-simulated studies of the physical universe, ranging from cosmology to quantum physics, and from atmospheric phenomena to biomolecular interactions, are available.

Normally, students are directly accepted into the PhD program. The ultimate goal is to carry out and publish independent scientific work in a chosen research field. Coursework required for the PhD includes the graduate core curriculum consisting of PHYS 8110, (ME) 8150, 8210, 8410, 9510, 9520 (or their equivalents at Clemson University or elsewhere as approved by the department faculty), and 12 credit hours of elective 8000–9000-level physics, astronomy or other graduate level courses (excluding PHYS 8910/9910), which must be approved by the student's advisory committee. PHYS/ASTR 8750 courses may be used to satisfy this elective requirement with approval by the faculty. The purpose of these electives is to provide a well-rounded physics education and additional coursework necessary for the student's research area.

Unless they receive a deferral from the Department faculty, students must take the written PhD qualifying examination on topics from the core curriculum no later than their third semester. Students are offered two opportunities to pass the exam, which is typically offered twice annually. After passing the written PhD qualifying examination, students shall have selected a research area and faculty advisor and prepare for the oral PhD qualifying examination in which they present and defend their planned dissertation topic and research program. This oral examination must be completed within 12 months after passing the written examination. At least three weeks prior to the graduation at which the candidate expects to receive the PhD degree, a final oral examination on the dissertation must be successfully completed.

Students not passing the written PhD qualifying examination after two attempts may, with the approval of the Department faculty, complete an MS degree. Such students, and those accepted directly into the MS program, and those seeking an en-route M.S. degree usually choose to prepare a research thesis, although a non-thesis option is available. For the thesis option, 30 credit hours, including six credit hours of PHYS 8910, and a final oral examination on the general area of study and thesis defense are required. In the non-thesis option, 36 credit hours are required, including six credit hours of PHYS 8900. A written report must be submitted on the directed studies. A final oral examination on the general area and directed activities completes the requirements for the non-thesis option.
COLLEGE OF HEALTH, EDUCATION AND HUMAN DEVELOPMENT

The College of Health, Education and Human Development offers advanced degrees in Administration and Supervision; Counselor Education; Curriculum and Instruction; Educational Leadership; Healthcare Genetics; Human Resource Development; Literacy; Middle Level Education; Nursing; Parks, Recreation and Tourism Management; Secondary Education; Special Education; and Youth Development Leadership.

The PhD degree is offered in Curriculum and Instruction; Educational Leadership; Healthcare Genetics; and Parks, Recreation and Tourism Management. The MS degree is offered in Nursing; Recreation and Tourism Management; and Youth Development Leadership. The College also offers professional degree programs leading to the Master of Arts in Teaching; Master of Education; Master of Human Resource Development; and Specialist in Education degrees. The College of Health, Education and Human Development and the College of Agriculture, Forestry and Life Sciences cooperate to offer a Master of Agricultural Education program.

The graduate programs focus on preparing students for leadership positions in educational, healthcare, governmental and business organizations. Clinical and field experiences are common in many graduate programs. Often programs join with local, state and federal agencies to provide real-world experiences and research projects for faculty and students. Some programs and courses are offered off campus and in the evening to accommodate the schedules of public schools, higher education, healthcare institutions, businesses and other organizations.

The College of Health, Education and Human Development offers graduate courses in education and nursing at various off-campus locations across the state. Off-campus course schedules for fall, spring and summer offerings for school personnel, school districts and other South Carolina agencies are published by the Office of Off-Campus, Distance and Continuing Education. In addition, courses are taught by contract with local school districts in the Clemson University service region. Courses are offered in athletic leadership and health to provide electives for students in other areas.

Programs offered in the Eugene T. Moore School of Education are accredited by the Council for the Accreditation of Educator Preparation (CAEP) and the State of South Carolina. In addition, school educator programs are nationally recognized by specialized professional associations. Counselor education programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

ADMINISTRATION AND SUPERVISION

Master of Education

Specialist in Education

Master of Education

The Master of Education degree in Administration and Supervision prepares individuals as elementary or secondary school administrators or supervisors. The program provides both a theoretical and field-based foundation in educational leadership with a focus on leading instructional improvement for the benefit of all P–12 students.

Admission Requirements

For admission, individuals must have a baccalaureate degree from a regionally-accredited institution and a minimum of one year of teaching experience. A complete application package should include (1) online application, (2) transcripts from previous institutions (cumulative minimum undergraduate grade-point average of 2.70 on the last 60 hours), (3) two recommendations—one from immediate prior supervisor, (4) current résumé, (5) copy of teaching and/or administration certificate and (6) GRE score report of verbal, quantitative and writing assessments. (Acceptable GRE scores are considered holistically with the student’s background and potential success in graduate school.)

Applicants whose native language is not English must also submit TOEFL or IELTS scores.

If requested by the program coordinator, an interview may be required prior to an admission decision. Prospective students are encouraged to apply two months prior to the beginning of the term in which they wish to enroll.

Program Requirements

Students who wish to receive district level (principal) certification must complete the program offered in the Master of Education, with the exception of EDL 7050 and EDL 8390. Students who have not taken an introductory research course, are required to take EDL 8390. Students who wish to receive district level (superintendent) certification must complete the following courses: EDL 8050, 8100 or 9500, 8150, 8200, 8300, 8400, 8500, 8510, 8850, and 9250.

COUNSELOR EDUCATION

Master of Education

Specialist in Education

The Master in Education in Counselor Education prepares students in one of the following specialty areas: clinical mental health counseling (CACREP-accredited), school counseling (CACREP-accredited), or student affairs. Graduate education in the Counselor Education program helps students realize their potential as practicing counselors and/or administrators; engage in professional relationships; and develop a set of meaningful professional values. To this end, the program reflects current knowledge from lay and professional groups concerning current and projected counseling and human development needs of a pluralistic society. Cultural considerations are emphasized so the experiences provided will be rewarding and useful in today’s ever-changing society.

The faculty of the Counselor Education program model the values of acceptance and human uniqueness to all students so they incorporate these values into their practice. To recruit, train and retain competent counseling and other helping practitioners, faculty members attempt to develop the following in each graduate: respect for the dignity and worth of the individual; commitment to the fulfillment of human potential; an understanding of educational and counseling processes; knowledge in a particular field of counseling, ethical competencies; commitment to inquiry; self-awareness; advocacy dispositions.

A complete application package should include (1) online application, (2) undergraduate and graduate transcripts (cumulative minimum grade-point average of 3.25 on graduate work), (3) two recommendations—one from immediate prior supervisor, (4) current résumé, (5) copy of teaching and/or administration certificate and (6) GRE score report of verbal, quantitative and writing assessments. (Acceptable GRE scores are considered holistically with the student’s background and potential success in graduate school.)

Applicants whose native language is not English must also submit TOEFL or IELTS scores.

If requested by the program coordinator, an interview may be required prior to an admission decision. Prospective students are encouraged to apply two months prior to the beginning of the term in which they wish to enroll.

Program Requirements

Students who wish to receive district level (principal) certification must complete the program offered in the Master of Education, with the exception of EDL 7050 and EDL 8390. Students who have not taken an introductory research course, are required to take EDL 8390. Students who wish to receive district level (superintendent) certification must complete the following courses: EDL 8050, 8100 or 9500, 8150, 8200, 8300, 8400, 8500, 8510, 8850, and 9250.

Admission Requirements

Applicants must have an undergraduate grade-point average of at least 3.0 and must submit the following:

- A completed online application,
- Official undergraduate and graduate transcripts,
- Three letters of recommendation, and
- A personal statement.

Testing

Students must pass the Praxis II Subject Assessment test in Professional School Counseling with a minimum score of 132 on the Developmental Psychology and Social Behavior section, 135 on the English Language Arts and Reading section, and 140 on the Educational Contexts and Professional Issues section. The Praxis II Subject Assessment test must be completed before the application is submitted.

Field Experiences

The School Counseling program requires 60 credit hours arranged as follows:

- School Counseling Core—24 credit hours: EDC 8100, 8110, 8120, 8130, 8140, 8160, EDL 7650, 8550
- Specialization Courses—21 credits: EDC 8010, 8070, 8120, 8130, 8140, 8150, EDF 8010, EDL 8390
- Elective Hours—nine credit hours: EDC 8340, 8440

Certification

Students who successfully complete the program and meet all the state of South Carolina's requirements will be eligible for certification. Additional information is available at: www.clemson.edu/hehd/departments/education/academics/graduate/MEd-SA/index.html.

Specialist in Education

The Education Specialist (EdS) degree in Counselor Education is designed for professionals who already possess a master's degree in counseling and who seek to further their knowledge and skills. The program is designed to prepare students for a variety of roles, including counselor educators, program directors, and school counseling specialists. In addition to the core courses, students must choose electives that align with their professional goals.

Testing

In addition to the certification requirements, students must pass the Praxis II Subject Assessment test in Professional School Counseling with a minimum score of 132 on the Developmental Psychology and Social Behavior section, 135 on the English Language Arts and Reading section, and 140 on the Educational Contexts and Professional Issues section. The Praxis II Subject Assessment test must be completed before the application is submitted.
per semester, including summers. All students must complete the program in six years. Courses are taught in the evenings, Monday through Thursday, at 4:30 or later at either the University Center in Greenville or on Clemson’s main campus.

Admissions Requirements
A complete application package includes (1) online application including essay questions, (2) two letters of recommendation, (3) undergraduate transcripts, (4) Competitive GRE scores within 5 years, and (5) Official TOEFL/IELTS scores for International Students. The deadline for applications to the program is February 1. Only complete application packets are considered for admission.

Applications are reviewed immediately after the submission deadline on February 1 and interviews are conducted toward the end of month with initial admission decisions usually communicated by the middle of March.

School Counseling Emphasis Requirements
Individuals choosing this emphasis typically are interested in completing requirements for school counseling certification or in advancing their knowledge and skills in school counseling to be eligible for salaries at the master’s +30/EdS pay rate. Students in this emphasis must complete a minimum of 30 credits, choosing courses as follows:

1. Complete any of the courses currently required for school counselor certification not previously completed
2. Complete elective courses approved by the advisor and based on the student’s professional goals
3. Individuals seeking initial school counselor certification must successfully complete a written final exam and receive a passing score on the Praxis II Exam in Professional School Counseling during their final year in the program.

School Counseling Certification Requirements
Courses - EDC 8010, 8070, 8100, 8110, 8120, 8130, 8140, 8150, 8180, 8510, 8300, 8410, EDP 8300, EDL 8390, EDSP 8530.

Counselor Education Elective Courses - EDC 8070, 8160, 8170, 8210, 8220, 8230, 8240, 8400, 8850, 9150, 9210.

Mental Health Counseling Emphasis
Individuals choosing this emphasis typically are interested in completing requirements for counselor licensure (i.e., LPC) or advancing their knowledge and skills in mental health counseling. Students in this emphasis must complete 30 credits, choosing courses as follows:

1. Complete any of the courses currently required for the master’s degree in clinical mental health counseling that have not previously been completed
2. Complete elective courses approved by the advisor and based on the student’s professional goals.

Clinical Mental Health Counseling Courses - EDC 8050, 8100, 8110, 8120, 8130, 8140, 8150, 8160, 8180, 8210, 8220, 8230, 8360, 8460, EDF 8010, 8390.

Counselor Education Elective Courses - EDC 8070, 8160, 8170, 8210, 8220, 8230, 8240, 8400, 8850, 9150, 9210.

CURRICULUM AND INSTRUCTION
Doctor of Philosophy
The Doctor of Philosophy degree in Curriculum and Instruction is a research degree that prepares students to become scholars who can discover, integrate and apply knowledge, as well as communicate and disseminate it. The intent of the program is to prepare students to make significant original contributions to knowledge in specialized fields. The program prepares students in one of the following specialty concentrations: elementary education, English education, mathematics education, science education, social studies education, reading education, or special education. These areas provide a general structure of coursework selections and research emphases; however, students are encouraged to work with faculty to design programs uniquely fitted to their areas of interest. The program of study for the degree is determined by the student’s advisory committee.

Every doctoral student must satisfy all requirements of the Graduate School, as well as requirements in coursework, internships, the comprehensive examination, the dissertation proposal and oral defense of the dissertation as directed by the student’s advisory committee. Students must maintain a B average in all graduate work. The degree usually requires a minimum of 65 credit hours beyond the master’s degree, selected from the areas prescribed by the requirements of the PhD in Curriculum and Instruction. Listed below are the guidelines or normal expectations for a student pursuing the PhD degree; however, the final determination of the course of study is made by the advisory committee.

Graduate courses designated for professional development are not eligible to be used toward a graduate degree.

A minimum of three to six hours of internship is required as part of each specialty area. An internship of sufficient time and quality of experience to warrant three to six semester hours of graduate credit must be planned and executed to the satisfaction of the student’s advisory committee.

Specialty areas require 6–18 credits in courses outside the School of Education. This approved coursework is intended to provide a concentration within the specialty area and/or expose to disciplines outside the School of Education.

Admission Requirements
A complete application package should include proof of a master’s degree, undergraduate and graduate transcripts, GRE scores, a résumé showing relevant professional experiences and a personal statement of professional history, goals and aspirations. Candidates passing initial committee review are invited for an interview. Students whose native language is not English must take the Test of English as a Foreign Language (TOEFL or IELTS). The deadlines for admission consideration are October 15 and March 15 for the subsequent academic terms.

Core Requirement Goals
The student will be able to critically analyze social, historical, psychological, personal and policy factors in the development and current practices of curriculum and instruction; acquire an understanding of the research processes including practical design, analysis and reporting; understand how to use historical, correlational, descriptive and experimental methods within research; be able to analyze critically and evaluate research reports; and be able to prepare scholarly, research-based reports and presentations.

Course Requirements
The Curriculum and Instruction Program requirements are as follows:

Doctoral Seminar—Two credit hours.
Core—21 credit hours of core coursework represented by the following areas: Curriculum, Instruction and Assessment. Students successfully complete at least four courses representative of both quantitative and qualitative research methods and procedures.

Area of Specialization—24 credit hours of specific courses and minimum requirements determined by the student’s doctoral committee that must include:
2. Courses and/or equivalent experiences to demonstrate competency in teaching and research practice (for example, ED 8940 and 9880).
2. 18 hours of specialized focus.
Dissertation—18 hours of ED (EDF, EDSP) 9910

Elementary Education Emphasis
Students with an emphasis in Elementary Education will demonstrate (1) in depth knowledge of one or more of the academic areas taught in the elementary school with an understanding of how the different areas relate to the learning and instructional needs of all students, in particular, design, implementation and evaluation of curriculum; effective instructional methods; and current issues and trends affecting teaching and/ or learning; and (2) competence in research and evaluation. Students will be expected to apply their research skills to problems and topics related to elementary school curriculum, instruction, and ancillary programs.

The Elementary Education Emphasis Area requires ED (EDF, EDSP) 9800, EDEL 9370, 9380, plus 21 additional credit hours approved by the doctoral committee. A three-hour internship is required.

Reading Education Emphasis
Students with an emphasis in Reading will demonstrate (1) in depth knowledge in the field of reading with an understanding of the learning and instructional needs of all students, in particular design, implementation and evaluation of curriculum; effective instructional methods; and current issues and trends affecting teaching and/ or learning; and (2) competence in basic and applied research and evaluation Students will be expected to apply their research skills in the field of reading.

The Reading Education Emphasis Area requires PSYC 8330, EDLT 9390, 9440, plus 12 additional credit hours selected from EDLT 8840, 8850, 8860, 8870, 9370, 9380, 9400, 9410, 9420, 9430, 9450. A six-hour internship is also required.
Teaching and Learning Emphasis
The PhD program in Curriculum and Instruction with an emphasis in English Language, Mathematics, Natural Sciences, or Social Studies has five possible professional market niches. The student’s program for each niche will contain appropriate study in both that subject area and that niche to provide the necessary skills to be a productive professional. These five niches are (1) an English language, mathematics, science, or social studies teacher educator in higher education; (2) a subject-specific curriculum coordinator or curriculum supervisor in a medium to large school district, state department of education, or federal government agency; (3) a teacher of English language, mathematics, science, or social studies in a small four-year or community/technical college; (4) a curriculum developer of secondary English, mathematics, science, or social studies or; (5) an educator of programs in English language, mathematics, science, or social studies in commerce and industry.

English Education Goals—Students completing an emphasis in English Education will demonstrate a research knowledge base that includes the areas of teaching composition, literary response, language development, developments in English language, and multimedia applications for the English classroom.

Mathematics Education Goals—Students completing an emphasis in Mathematics Education will develop a knowledge base in current mathematics education issues, research, and classroom applications and be able to select and pursue appropriate research topics in mathematics education.

Science Education Goals—Students completing an emphasis in Science Education will demonstrate an understanding of how science process and content is most effectively learned, the components of state-of-the art curriculum models, and the utilization of the most effective research methodologies designed to expand the theory base.

Social Studies Education Goals—Students with an emphasis in Social Studies Education will develop a knowledge base in current social studies issues, research and classroom applications and an ability to select and pursue appropriate research topics in social studies.

The Teaching and Learning Emphasis requires 30 credit hours arranged as follows:

Concentration—18 credit hours of advanced coursework in a discipline or related area
Internship—three to six credit hours
Advanced studies in the teaching of English, mathematics, science, or social studies—three hours from the appropriate area: EDSC 8410, 8420, 8430, or 8440
Current Literature in Education—three hours from the appropriate area: EDSC 8460, 8470, 8480, or 8490

Special Education Emphasis
Students with an emphasis in Special Education will demonstrate: (1) In depth knowledge of disabilities and at-risk characteristics integrated with an understanding of how these characteristics relate to the learning and instructional needs of individuals in the (a) delivery of effective curricular and instructional, functional interventions, (b) philosophical and social contexts of special and general education, and (c) legal and organizational context of special and general education; and (2) competence in basic and applied research and evaluation, emphasizing special methodological concerns and evaluation of services with individuals with disabilities and at-risk characteristics.

The Special Education Emphasis requires ED (EDF, EDSP) 9800, EDSP 8530, 9300, 9340, 9350, and 12 credit hours of elective coursework that may include ED 9010, 9380, EDSP 9360, 9370.

EDUCATIONAL LEADERSHIP
Doctor of Philosophy
The PhD program in Educational Leadership provides students with a strong background in five domains: leadership, research, policy, ethics and diversity. As the highest academic degree granted by Clemson University, the PhD prepares students to become scholars who can discover, integrate and apply knowledge as leaders in schools and post-secondary and community educational institutions and agencies. This is accomplished through close association with and apprenticeship to faculty members experienced in research, teaching and administration.

Admission Requirements
A complete application package should include competitive GRE scores, bachelor’s and master’s degree transcripts, three letters of recommendation, current curriculum vita, and a cover letter. The cover letter must be not to three pages in length, and should discuss (1) the candidate’s reasons for pursuing the PhD degree in educational leadership, particularly as they relate to career and professional goals (elementary and secondary education or higher education); (2) one more issues on which the candidate might like to do research; and (3) distinguishing characteristics that demonstrate the candidate’s potential for success in the program. This letter will be evaluated as a writing sample.

Program Requirements
A student admitted to the Educational Leadership program must begin coursework within one year from the semester of acceptance or reapply for admission. Two concentrations—P12 and Higher Education—are offered for candidates pursuing the PhD in Educational Leadership. All candidates must take a minimum of 58 credit hours of graduate-level courses beyond the master’s degree and complete an 18-hour dissertation project. The program core consists of a minimum of nine credits completed within the first two years of enrollment culminating in the Preliminary Exam. Upon successful completion of the Preliminary Exam, students consult with their doctoral advisory committees establishing their program of studies, including courses in concentration, research, internships and cognates. Internships are supervised by a practicing educational leader and by a faculty member. The internship experience is designed to acquaint the student with the practical applications of education theory in a planned, extensive and closely monitored opportunity for the student to work in a setting that reflects the student’s long-range goals and the requirements for rigorous applied research. Cognates are courses from academic fields supporting the student’s research agenda. Upon completion of the coursework, students qualify as doctoral candidates by successfully completing a comprehensive exam. The culminating requirement for the program is successful completion of the dissertation as guided by the major advisor and the doctoral advising committee.

Course Requirements
Preliminary Core Courses—The following credits are required before taking the preliminary exam: EDF 9000, 9050, 9100, plus a research course.
Concentration—A minimum of 18 credit hours, selected with the advice of the doctoral advisory committee, is required.
Research—Students must complete a qualitative research course (e.g., EDF 8790), an intermediate and advanced research course (e.g., EDF 8780, EXST 8010), and a series of directed research core courses (EDL 9880, 9890, and 9900).
Cognates—Cognates include courses from another area of study. As a part of the program of study, each student must complete six graduate credit hours beyond the field of Educational Leadership. All six hours must be from the same discipline and approved by the student’s doctoral advisory committee.
Dissertation—A minimum of 18 credit hours (EDL 9910) is required for the dissertation.
Internship—All students are required to complete three hours of field research internship credit (EDL 9860).

HUMAN RESOURCE DEVELOPMENT
Master of Human Resource Development
The human resource field is a specialized blend of education, systems design, consulting, psychology, management and sociology. The Master of Human Resource Development (MHRD) degree prepares professionals to work as trainers/instructional designers, human performance improvement (HPI) specialists and consultants within business, industry, non-profit and government organizations.

HRD/HPI professionals commonly provide diagnostic and intervention strategies related to the areas of technical and interpersonal skills, management and organizational performance and motivation. The MHRD program involves and enhances human performance in the workplace. The program is designed for professionals with three or more years of experience and is delivered in an interactive on-line format. The curriculum consists of 12 courses delivered over a two-year period in a cohort setting. Graduates of the program are capable of utilizing contemporary instructional and human performance technologies and methodologies. Program participants gain valuable skills and knowledge that accelerate their careers.

Admission Requirements
Applicants to the MHRD program follow general admission procedures as prescribed by the Graduate School. Note: The deadline to apply to the MHRD program is July 1. Every required item in support of the application must be on file by that date. The
complete application package should include the following: baccalaureate degree with a preferred minimum grade-point average of 3.0, transcript, résumé, letter describing professional goals, two letters of reference and GRE scores. Applicants must possess three years of relevant full-time work experience and complete the on-line Keirsey“Temperament Sorter” II and Campbell”Interest and Skill Survey”. These assessments are available at www.keirseycampbell.com/. (Click on Purchase Here. Use the promotion code CLEMSON23 to have scores for both assessments sent to the MHRD admissions committee. A nominal fee is charged for these assessments.)

Program Requirements
All courses are delivered through distance education technologies. Students need access to e-mail and the Internet and the ability to read a CD-ROM or DVD. Students also need current versions of operating systems, word processing, spreadsheet and presentation software. Since the required courses involve sending and receiving large files of information, students will need a computer equipped with a Web cam, microphone and DSL or high-speed internet connection.

The MHRD program consists of 36 credit hours of coursework arranged as follows:

First Year
Fall Semester
3 - HRD 8200 Human Performance Improvement
3 - HRD 8300 Concepts of Human Resource Dev.
6
Spring Semester
3 - HRD 8470 Instructional Syst. Design
3 - HRD 8800 Research Concepts and Skills
6
Summer
3 - HRD 8700 Consulting for Education and Industry
3 - HRD 8900 Instrumentation for Human Performance Improvement
6
Second Year
Fall Semester
3 - HRD 8450 Needs Assessment for Education and Industry
3 - HRD 8600 Instructional Materials Development
6
Spring Semester
3 - HRD 8490 Evaluation of Training and Development/HRD Programs
3 - HRD 8970 Appl. Research and Development
6
Summer
3 - HRD 8250 Organizational Performance Improvement
3 - HRD 8820 Knowledge Management for Improved Performance
6
36 Total Semester Hours

Students must satisfy requirements for the Graduate School, complete the approved program of study for the degree, maintain a B average in all graduate coursework and pass a comprehensive exam.

ATHLETIC LEADERSHIP CONCENTRATION

First Year
Fall Semester
3 - HRD 8200 Human Performance Improvement
3 - HRD 8300 Concepts of Human Resource Dev.
6
Spring Semester
3 - HRD (CTE) 8470 Instructional Syst. Design
3 - HRD 8800 Research Concepts and Skills
6
Summer
3 - AL 8620 Psychological Issues and Collegiate Athletics
3 - HRD 8900 Instrumentation for Human Performance Improvement
6
Second Year
Fall Semester
3 - AL 8490 Athletic Leadership Development
3 - HRD (CTE) 8600 Instructional Materials Development
6
Spring Semester
3 - AL 8640 Ethical Issues in Collegiate Athletic Administration
3 - HRD 8970 Appl. Research and Development
6
Summer
3 - AL 8610 Athletic Leadership for Intercollegiate Athletics Administration
3 - HRD 8820 Knowledge Management for Improved Performance
6
36 Total Semester Hours

Students must satisfy requirements for the Graduate School, complete the approved program of study for the degree, maintain a B average in all graduate coursework and pass a final exam.

LITERACY

Master of Education
The purpose of the MEd degree in Literacy is to educate reading professionals who have an in-depth knowledge of reading theories, processes, strategies, curriculum and research, and who can use that knowledge to plan appropriate reading programs and curricula for a variety of contexts and communicate information to a wide variety of audiences.

Objectives
Graduates with the MEd in Literacy will demonstrate (1) an understanding of reading as the process of constructing meaning through the interaction of the reader’s existing knowledge, the information suggested by the written language and the context of the reading situation; (2) knowledge of the influence of cultural, ethnic and linguistic backgrounds on the reading process and how to use what the reader brings to the reading experience; (3) an understanding of relationships among the language processes of reading, writing, listening and speaking; (4) support for students in acquiring the ability to monitor comprehension and reading processes and apply appropriate strategies for a variety of purposes; knowledge of assessments that involve multiple indicators of learner progress; (5) development of an environment that motivates students to pursue and respond to reading and writing for personal growth and development; (6) understanding of English language learners’ literacy and language development and expertise in supporting their literacy learning through strategic teaching; (7) classroom-based research in reading; and (8) expertise in sharing knowledge of reading research and instructional practices with peers.

Admission Requirements
Complete application package should include a completed application, statement of purpose (professional goals and philosophy of teaching), a valid teaching certificate, two letters of recommendation, an undergraduate transcript with a grade-point average of 3.0 on a 4.0 scale (last 60 hours), and competitive GRE scores.

Program Requirements
The program requires 36 credit hours of coursework and a satisfactory score on the final exam. The following courses are required of all students: EDF 8020, 8080, EDLT 8600 (prerequisite for ESOL Emphasis), 8610, 8620, 8630, 8640, 8650, 8660.

The MEd in Literacy offers two plans for completion of program requirements:

Literacy Teacher certification: K-12 – In addition to the required courses above, students must take nine additional literacy/language arts courses from the following list: EDLT 8670, 8680, 8690, EDSP 8200.

ESOL Teacher certification: K-12 and ESOL emphasis – In addition to the required courses above, students must complete the following courses: EDLT 8730, 8740, ED 8670, 8390.

MIDDLE LEVEL EDUCATION

Master of Arts in Teaching
The Master of Arts in Teaching degree is designed for mid-career professionals who are seeking to change fields and for students with backgrounds in content areas who are not currently certified to teach. The program in Middle Level Education possesses several intrinsic advantages over other initial certification programs. Most importantly, it places well-prepared candidates in the classroom in a timely manner. An individual possessing a bachelor’s degree in a content or closely related field is given an intensive one-year, field-based experience. He/she can then expect to start in the classroom as a first year teacher after a full academic year (including summer sessions).
The objectives of the Master of Arts in Teaching in Middle Level Education are to promote the entrance of content-ready individuals into the South Carolina classroom in a timely manner and to provide a rigorous yet plausible route for individuals seeking to change careers and enter teaching.

Admission Requirements
Acceptance is based on a combination of test scores, interviews and academic record. Applicants are expected to take the Praxis II exams in the content areas in which they plan to receive certification. Students are required to have passed a Praxis II test before they begin the practicum experience.

Program Requirements
The MAT program, offered at the University Center of Greenville, is composed of three elements: core pedagogical coursework, content coursework and an intensive field-based component. This includes six hours of Methods Practicum, three in each area of content certification. These six credit hours meet the State’s requirements for student teaching. The remaining 12 credit hours are taken individually in the content areas.

Students in the MAT block begin during the fall semester when public schools begin.

In the spring, students begin the semester with two weeks of intensive classroom work in the three remaining core courses. These courses are considered “bookend” classes that bracket the student teaching experience. The methods practicum/student teaching includes a portfolio assignment.

The MAT in Middle Level Education program requires 36 credit hours, 24 in core education classes and 12 in the content areas. Core classes include: EDML 8020, EDML 8030, EDML 8080, EDML 8410, EDLT 8670, EDSP 8230, and two methods classes from among EDML 8110 and 8210 for language arts, EDML 8120 and 8220 for social studies, EDML 8130 and 8230 for math, and EDML 8140 and 8240 for science. Content classes are arranged with the content area advisor.

Admission Requirements
The optimal entry point into the MAT Program is during the Summer I term with a projected graduation the following summer. The program application deadline is April 1.

To be considered for admission, individuals must:
• Complete the online application to the Clemson University Graduate School. To ensure full consideration, applications must be received by the April 1 deadline. On the application, select Program Code 385 (Secondary Education) and indicate either science or mathematics within the application.
• Submit transcripts from all prior institutions from which a degree was awarded or from which transfer credit is desired. A Bachelor’s degree or higher is required from an accredited institution. Prior coursework should show completion of at least 30 semester credits with a C or better in the certification area or closely related discipline. Note: Additional coursework may be required to address deficiencies.
• Provide evidence of content mastery in desired field. Students are strongly encouraged to submit a passing score on the 0030 or 0070 Praxis II exam for science or the 0061 Praxis II exam for mathematics as evidence with their application. A passing score must be on file at Clemson prior to student teaching.
• Complete a departmental interview (can be scheduled before or after all application materials have been submitted).
• Include two recommendation forms (Note: Recommendations forms may be sent to recommenders electronically from the online application, or PDF recommendation forms can be sent for recommenders to complete and return to the Graduate School.)
• Submit TOEFL or IELTS scores, if English is not the student’s first language.
• Submit a resume and indicate relevant professional work experience.

Curriculum
The MAT program is composed of three elements:
1. Core pedagogical coursework (15 hours),
2. Content coursework (9 hours), and
3. Practicum and internship components (15 hours)

The discipline-specific methods courses, practicum and content literacy courses, taken in the fall semester, require students to complete a field experience in a local public high school, during which they spend two days per week in the assigned placement. During the spring semester, students complete a 15-week directed internship (student teaching) and a Capstone Seminar.

Sample Course of Study
Summer Session I (6 credits)
• Content Course
• Advanced Educational Psychology
Summer Session II (6 credits)
• Content Course
• Teaching Students with Individual Differences and Exceptionalities

Fall Semester (12 credits)
• Classroom Assessment Methods
• Content Area Literacy
• Tests and Measures
• Classroom Management

MAT Spring Semester Session I (12 credits)
• Directed Internship (student teaching)
• Internship and Research Seminar
Summer Session I (3 credits)
• Content Course

Note 1: Content area courses must be approved by the program advisor.
Total Hours: 39

Program Requirements
Completion of the MAT for Secondary Science or Mathematics degree program is dependent upon:
• Completion of all required prerequisites
• A record of all state-required Praxis II exams on file at Clemson University, prior to student teaching. This includes a passing score on the 0030 or 0070 for science students or the 0061 and 0063 for math students. Note: Passing scores on the following tests are required for certification.

Science: 0030 or 0070: 0624
Math: 0061, 0063, and 0624

Additional information can be found at http://www.ets.org/praxis/sc/requirements
Completion of all coursework with a grade of C or better
Successful completion of student teaching experience

SPECIAL EDUCATION
Master of Education
The Master of Education degree in Special Education ensures that students are knowledgeable in the field of special education. The program in Special Education prepares students in one of the following areas: emotional/behavioral disorders, learning disabilities, or mental retardation. The program is approved by the Council for Exceptional Children (CEC) and follows guidelines prescribed by CEC. The prescribed program of study enables students to identify important legal and policy issues in special education, demonstrate knowledge of the research processes within the field of special education, demonstrate knowledge of specific characteristics of individuals with mild disabilities and implement research-validated interventions for students with disabilities in a variety of settings. Successful graduates will evaluate critically the literature in the field, recognize and evaluate current issues and problems in special education and identify potential solutions for these problems.

Graduate students must satisfy requirements of the Graduate School, complete the approved program of study for the degree, maintain a B average in all graduate work and pass a final exam. The degree requires 36 credit hours. In addition to successfully completing all required coursework and comprehensive exams, candidates must have on record scores for all Praxis II exams required by South Carolina for certification in their area of specialization (Learning Disabilities, Intellectual and Developmental Disabilities, or Emotional/Behavioral Disorders) prior to graduation.

Admission Requirements
A complete application package should include a bachelor’s degree, a valid teaching certificate, two letters of recommendation, an undergraduate transcript with a grade-point average of 3.0 on a 4.0 scale (last 60 hours), and competitive GRE scores.
Program Requirements
Required Courses—EDF 7780, EDSP 8200, 8210, 8220, 8230, 8410, 8530, 8540
Area of Emphasis—9-12 credit hours
Students choose from one of the emphasis areas below. Courses in each area partially fulfill requirements for South Carolina certification in that area.

Emotional/Behavioral Disabilities Disorders—EDSP 8130, 8140, 8150, and 8151
Learning Disabilities—EDSP 8100, 8110*, 8120, and 8121
Mental Retardation—EDSP 8160, 8170, 8180, and 8181
Electives—Three credit hours are required. EDLT 8650 is recommended for those intending to work in elementary settings. EDSP 8400 is recommended for those intending to work in secondary settings.

EDSP 8110 is required for South Carolina certification in Emotional/Behavioral Disabilities and should be included in the program of study in lieu of elective hours unless it has been taken previously.

TEACHING AND LEARNING
Master of Education
The Master of Education in Teaching and Learning includes coursework in research methods and action research, educational tests and measurement, curriculum theory and development, educational psychology, and schooling context. Students may elect to specialize in one of the following emphasis areas: Early Childhood Education, Elementary Education, English Education, Mathematics Education, Science Education, or Social Studies Education. The program is intended to strengthen and enhance teaching skills, promote research and reflection on innovative teaching strategies, and expand content knowledge.

Admission Requirements
A complete application package should include a bachelor’s degree, a valid teaching certificate, two letters of recommendation, an undergraduate transcript with a grade point average of 3.0 on a 4.0 scale (last 60 hours), and competitive GRE scores. Before enrolling in any graduate course, the student should arrange a conference with the major advisor. Courses taken prior to this conference may not be acceptable for the degree. Professional development courses will not count toward the degree. Exceptions to the program of study must be approved by the student’s advisory committee, which consists of the major advisor and two faculty members from the department in which the student has taken coursework.

Degree Requirements
Graduate students must satisfy requirements for the Graduate School, complete the approved program of study for the degree, maintain a B average in all graduate work and pass a final exam. The degree maintains 30 credit hours (33 for those who have not successfully completed an undergraduate content reading course).

When the student has successfully completed 24 hours toward the degree, he/she may take the final written examination. The examination is arranged at a specified time each semester.

Core Courses—18 credit hours
EDEL 7600, EDF 8000, 8020, 8770, ED 8600, 8080
Specialty Courses—12 credit hours
Specialty courses must be chosen in conjunction with the major advisor. Specialty coursework should be related to one of the following emphasis areas: Early Childhood Education, Elementary Education, English Education, Mathematics Education, Science Education, or Social Studies Education.

YOUTH DEVELOPMENT LEADERSHIP
Master of Science
The Master of Science degree program in Youth Development Leadership equips students with the competencies, knowledge and skills to help young people develop into healthy, competent, coping and contributing citizens. This program prepares students to address issues facing youth in the context of family and community with an emphasis on positive outcomes through a dynamic learning environment.

The MS in Youth Development Leadership program is an interdisciplinary degree primarily involving departments and units in the College of Health, Education and Human Development but also including academic areas from other colleges and units at the University. This program is designed to meet the needs of students who are also working professionals. All courses are offered in an accelerated format and are delivered through a variety of synchronous and asynchronous e-learning technologies. Minimum technology requirements for this program include access to email and the Internet with the ability to read CD-ROMs and DVDs.

This program has a strong relationship with youth-related agencies/organizations and engages them in learning and experiential opportunities for students.

The Youth Development Leadership program is designed to empower students to focus on strengths and assets within the context of family and community that will promote positive youth development; identify and examine physical, emotional, environmental and social issues related to being a young person in today’s society; prepare professional educators and leaders at all program and management levels for careers in schools, agencies, institutions and community groups that serve youth; train new and current professionals to be well prepared with increased knowledge and enhanced skills in the youth development area; prepare leaders who will have an immediate impact on youth development in South Carolina and around the nation; link formal and non-formal prevention and intervention youth programs to enhance the learning experience for students and enhance youth serving agencies and organizations by supplying professionals who are competent in child and adolescent growth and development.

The Master of Science in Youth Development Leadership program is designed to provide students with the skills, knowledge, and leadership skills needed to become effective leaders in the field of youth development. The degree program is designed to meet the needs of students who are also working professionals. All courses are offered in an accelerated format and are delivered through a variety of synchronous and asynchronous e-learning technologies. Minimum technology requirements for this program include access to email and the Internet with the ability to read CD-ROMs and DVDs.

When the student has successfully completed 24 hours toward the degree, he/she may take the final written examination. The examination is arranged at a specified time each semester.

Admission Requirements
A complete application package should include proof of a baccalaureate degree with a minimum grade-point average of 3.0 on a 4.0 scale, an acceptable score on the Graduate Record Examination (GRE), a letter of intent and two letters of reference. Experience in the field of youth development is preferred.

HEALTHCARE GENETICS
Doctor of Philosophy
The interdisciplinary Doctor of Philosophy degree program in Healthcare Genetics, provided through the School of Nursing, offers individuals from multiple health-related disciplines the opportunity to achieve a terminal degree in Healthcare Genetics. The curriculum builds partnerships with more than six disciplines focusing on genetics, health policy and ethics, theory development and quantitative and qualitative research methods. Three specialty research tracks promote advanced study in Translational Genetics (Bench Research), Applied Population Genetics as an Interventionist, or Genetics in Public Health Policy.

The PhD program in Healthcare Genetics prepares interdisciplinary scientists to extend the knowledge base relevant to healthcare genomics, translate research to advance the application of genomics in healthcare and collaborate in interdisciplinary research and practice.

Objectives of the program are as follows:
1. Collaborate with other disciplines to generate knowledge and develop theories that focus on the genetic aspects of actual and potential health problems of diverse individuals, families, groups and communities while addressing health disparities.
2. Formulate health promotion, disease prevention, and treatment strategies that translate and integrate genomic knowledge from a variety of disciplines.
3. Demonstrate leadership that facilitates interdisciplinary development and application of ethical guidelines and health policy in genetics.
4. Disseminate research findings to expand knowledge of genomics into models of practice.

Coursework includes a variety of on-line, Web-enhanced and traditional classroom settings. Core courses are available on the Clemson University campus, as well as a variety of other institutions.

Admission Requirements
Students applying for the Healthcare Genetics program will have at least a bachelor’s degree in a related health science discipline from an accredited institution. Other requirements include the following:
1. Competitive GRE scores (most successful applicants will have at least a 153 on the verbal section, a 144 on the quant section and a 4.0 for the writing section)
2. Master’s (MS/MA) thesis or publications. (BS applicants entering without a data-based research experience will be required to complete satisfactorily a research project utilizing the six hours of cognate electives prior to beginning the core courses in the doctoral program.)
3. Submission of a curriculum vita
4. Written statement of career goals
5. Graduate School application with three letters of recommendation from professionals that address research and scholarly potential
6. Interviews with two faculty members (may be conducted in person, Polycom, or telephone depending on individual circumstances)
7. Cumulative grade-point average of 3.4 or higher in the undergraduate (and/or graduate programs if applicable)

The curriculum is composed of 12 core courses and three cognate specialties/tracks. The core curriculum provides 34 hours of coursework in the areas of genetics, health policy and ethics, theory development and quantitative and qualitative research methods. In the specialty cognates, students pursue advanced study in Basic Genetics (Bench Research), Applied Population Genetics as an Interventionist, or Genetics in Ethics/Health Policy. Seminars and electives bring the cognate hours to 18. With 18 hours of dissertation (requirements met as manuscripts submitted for preparation), the total credit hours required is 70. This can be accomplished full-time over a four-year period, including two summers of study.

Comprehensive exams and 18 hours of dissertation research are required (to be developed as three manuscripts for publication).

The coordinator of the PhD program in Healthcare Genetics, in concert with individual faculty advisors, will work with each student to determine the requirements for their program of study. The plan of study for a student entering with a bachelor's degree will be developed that reflects prior coursework, required prerequisites and data-based research experiences. Students without previous biochemistry courses will be developed that reflects prior coursework, required pre-requisites for their program of study. The plan of study will work with each student to determine the required coursework, health policy and ethics, theory development and transformative, humanitarian assistance, and responsive human services. The important role and features of effective informal mutual assistance mechanisms in community life and their meaning for children and families are also explored.

To provide a richer understanding of human development and family life and to build skills for work in diverse cultures, international study is emphasized. Students are encouraged to become proficient in studies of world regions and in communication in a language other than their own. Building on the Institute's relationships with universities in developing and transitional countries, students often spend time at an affiliated center outside North America, where they engage in supervised research and/or public service.

Admission Requirements
Applicants must hold a bachelor’s or a master’s degree from an accredited degree program. In addition to strong academic performance, experience as a volunteer and/or professional public service is desirable. Students must submit GRE and/or Miller's Analogy Test scores, three letters of recommendation from professionals familiar with the applicants' academic work and/or community service, and a 500-word essay on the applicant's career aspirations and goals and their relation to this graduate program. Students for whom English is not the first language are also required to submit TOEFL or IELTS scores. Both U.S. and international students are welcome, as are both new graduates and experienced professionals.

Program Requirements
The degree requires 66 credit hours of postbaccalaureate work. A minimum of 30 hours is required of postmaster's degree students. The normal course of study requires four years for postbaccalaureate students.

The program requires FCS 8100, 8110, 8200, 8210, 8220, 8300, 8310, 8320, 8330, 8350, 8400, 8900, 8920, 8930.

NURSING
Master of Science
The Master of Science degree program in a major in Nursing builds upon the first professional degree. The student acquires knowledge and skills in advanced nursing: clinical nurse specialist (CNS), nurse practitioner (NP), nurse administration, or nursing education. The student may select one of the following study options: child/adolescent nursing (CN), adult/gerontological nursing (CN), adult/gerontological nurse practitioner (A/GNP), family nurse practitioner (FNP), nurse administration, or nursing education. All graduate options articulate with the baccalaureate program in the continued acquisition of advanced nursing knowledge and skills. This specialization builds toward advanced nursing knowledge in selected practice and role areas. Theory, research and role development are emphasized to enable graduates to participate in the development of nursing knowledge and contribute to the advancement of the nursing profession.

The objectives of the Master of Science degree program in Nursing are to provide graduates with the ability to integrate advanced knowledge from nursing and related disciplines into a specialized area of nursing practice; demonstrate competence in a selected functional role (clinical specialist, nurse practitioner, nurse administrator, or nurse educator); evaluate and apply research findings from nursing and related disciplines to advanced nursing practice; participate in the development of nursing knowledge by identifying researchable nursing problems, conducting research and selectively integrating research findings in advanced nursing practice; utilize leadership, management, teaching knowledge and competence to influence nursing practice; participate as a leader to influence health policy and improve the health care delivery system; and contribute to the advancement of the nursing profession.

All graduate courses are based at the University Center of Greenville.

Admission Requirements
In addition to meeting University admission requirements, applicants should be graduates of nationally-accredited baccalaureate nursing programs; must have had an undergraduate statistics course, computer course, or equivalent; and must demonstrate evidence of current basic client assessment skills. In addition, students must document recent significant nursing practice which is defined as 600 hours during the 12 months prior to acceptance into the program. Nursing Administration majors must complete an undergraduate accounting course.
PARKS, RECREATION AND TOURISM MANAGEMENT

Master of Science

Doctor of Philosophy

The Department of Parks, Recreation and Tourism Management offers a Master of Science degree (MS thesis and non-thesis) and a Doctor of Philosophy degree (Ph.D). Flexibility permits individual development in professional interest areas such as therapeutic recreation; travel and tourism management; park and conservation area management; and community recreation, sport and camp management. Each student’s program is tailored to suit his/her personal and professional goals. Applicants from nonrecreation disciplines are required to develop background knowledge of recreation through undergraduate coursework. Applicants for the MS (thesis) and Ph.D must submit GRE scores.

The Master of Science (thesis) degree is designed for individuals planning to undertake doctoral study or seek employment in a research-related position. The Master of Science (non-thesis) degree is designed for practitioners desiring an advanced degree or those looking for a career change but unable or not interested in earning a degree in residence. Candidates who select the thesis option must complete a minimum of 30 hours of coursework and six hours of research culminating in a thesis. Students who select the non-thesis program must complete 27 hours of coursework and a three-hour culminating project. The non-thesis option is delivered entirely online.

The Doctor of Philosophy is an advanced research degree requiring performance of original research leading to a dissertation. Comprehensive and final examinations and 18 hours of dissertation research are required. Coursework is determined by each student’s doctoral committee.

PUBLIC ADMINISTRATION

Master of Public Administration

The Master of Public Administration degree program requires 39-42 credit hours, depending on the student’s background. All MPA students must complete seven core courses (PADM 7020, 8210, 8220, 8270, 8290, 8410, 8620). In addition, one level of government course (PADM 8670, 8680) and five electives must be completed. Finally, all students must demonstrate a proficient knowledge of the field of public administration by passing a comprehensive examination. Students may request to take PADM 8800 in lieu of the comprehensive examination.

Certificate in Public Administration

Admission Requirements

Admission will be based on an assessment of the applicant’s educational needs and career objectives. Each applicant must also furnish a letter of recommendation, an application (available from the Clemson graduate school), transcripts, personal statement, and a résumé.

Students from any department or discipline may elect to complete the certificate program. Students who are already enrolled in a graduate degree program must obtain written approval from their graduate programs/advisors and the MPA Director. No prerequisites are required of these students.

In addition to the conditions above, international applicants are required to demonstrate that they satisfy the University’s minimum English language proficiency requirements or equivalent.

Students currently pursuing MPA coursework in a non-degree status may apply for the Graduate Certificate in Public Management. The hours earned in a non-degree status may be applied to the certificate program requirements (within four years of completion of the courses).

Course Requirements

Courses are determined by the student’s educational needs and career objectives and must be reviewed and approved by the MPA coordinator. Other graduate courses may be substituted in the elective sequence with the approval of the MPA director. Program participants must maintain an overall minimum grade-point average of 3.0 in the certificate program. Certificate courses must be completed within a span of four years.

A graduate certificate will be awarded upon completion of 15 credit hours of study, as outlined below, and submission of a Certificate Portfolio, which will consist of a compilation of the cumulative coursework accomplished in the program.

The certificate requires at least one core course and four additional courses of the student’s choosing. They can be from the core course listing or any set of specialization courses offered in the MPA program.

The following coursework is required:

Core Sequence: at least one core course selected from PADM 8210, 8220, 8270, 8290, 8620

Credit earned for a certificate may be applied toward the Master of Public Administration degree with the advice and approval of the MPA Director.

The Master of Public Administration degree and the Certificate in Public Administration are offered online programs.
This list includes for each course the catalog number, title, credit hours, class and laboratory hours per week, description and prerequisites.

A secondary listing in parentheses indicates that this course is cross-listed with another program.

Graduate credit may be earned only for courses numbered 6000 or above. Each 6000-level course carries a 4000-level undergraduate counterpart. Students who receive graduate credit in such courses must do extra work of an appropriate nature as determined by the department and are graded according to graduate standards. Students who receive credit for the 4000-level course may not receive credit later for the same course at the 6000 level.

Courses at the 7000 level are designed primarily for the degrees that emphasize professional practice rather than research.

**ART AND ARCHITECTURAL HISTORY**

AAH 6110 Directed Research in Art History II
3 (3) Comprehensive studies and research of special
topics not covered in other courses. Emphasis is
on field studies, research activities, and current
developments in art history.

AAH 6120 Directed Research in Art History II
3 (3) Continuation of AAH 4110.

AAH 6230 Studies in the Art and Architecture
of the Renaissance I
3 (3) Consideration of the visual arts and architectural monuments of the Renaissance (Western Europe from the 15th-18th
centuries), with a study in depth of selected examples from the period. Preq: AAH 2040 or AAH 2060 or consent of instructor.

AAH 6300 Twentieth Century Art I
3 (3) Acquaints students with the major artists’ monuments and issues
of the Modern period in art. Through lecture/
discussions and the reading of primary sources,
course places the major modern movements in the
context of the period (1860s-1945). Preq: Consent of instructor.

AAH 6320 Twentieth Century Art II
3 (3) Overview of trends in art and architecture since World War II. Specific artists, artworks, and movements are
presented in a socio/historic context with specific emphasis on the transition from a late-modernist
to a post-modernist perspective. Preq: Consent of instructor.

AAH 8150 Art and Architectural History Seminar I
3 (3) Particular aspect of period of art/architectural
history. Preq: Consent of instructor.

AAH 8160 Art and Architectural History Seminar II
3 (3) Continuation of AAH 8150.

AAH 8400 Selected Topics
3 (3) Independent/directed study; tutorial work in linguistics, professional communication, or American, British or
European literature not offered in other courses.
Preq: Consent of director of MA in English or MA in
Professional Communication program.

**ACCOUNTING**

ACCT 6040 Individual Taxation
3 (3) Interpretation of Federal income tax laws, regulations, and court
decisions with practice in application of these laws
to the returns of individuals, partnerships, and
corporations. Preq: ACCT 3110 with a C or better.
ACCT 6100 Budgeting and Executive Control 3 (3)
Study and application of selected techniques used in the planning and control functions of business organizations. Preq: ACCT 3030 with a C or better.

ACCT 8210 Controllership 3 (3) Advanced internal accounting emphasizing accounting implications for management decision making. Preq: ACCT 3030.

ACCT 8510 Tax Research 3 (3) Tax research methodology as applied to the solution of routine and complex tax problems emphasizing the methodology of solution rather than a specific tax area. Preq: ACCT 4040.

ACCT 8520 Financial Accounting Theory and Research 3 (3) Evolution of financial accounting theory and its application to contemporary reporting. Emphasis is on learning to research, document and present a rationale for a recommended alternative. Research problems are derived from actual audit disputes concerning financial presentation. Preq: ACCT 3130.

ACCT 8530 Advanced Accounting Problems 3 (3) Study of specialized aspects of financial reporting, including business combinations, fund accounting and emerging practices and developments in financial accounting. Preq: ACCT 3130.

ACCT 8540 Ethical, Professional and Societal Responsibilities 3 (3) Study of ethical and societal responsibilities and constraints that define and affect the practice of accountancy. Includes selected readings and cases. Preq: ACCT 4040 and ACCT 4150.

ACCT 8550 Governmental and Nonprofit Accounting 3 (3) Provides an in-depth understanding of the unique environment, concepts and procedures of accounting, financial reporting, auditing and budgeting of governmental and not-for-profit organizations. Preq: ACCT 3130.

ACCT 8560 CPA Exam Review-A 0 (0) Preparation for the auditing and attestation section of the Certified Public Accountant exam. Must be completed prior to receiving MPAcc degree. Does not contribute hours toward degree completion. To be taken Pass/No Pass only. Preq: Enrollment in MPAcc program.

ACCT 8570 CPA Exam Review-B 0 (0) Preparation for the business environment and concepts section of the Certified Public Accountant exam. Must be completed prior to receiving MPAcc degree. Does not contribute hours toward degree completion. To be taken Pass/No Pass only. Preq: Enrollment in MPAcc program.

ACCT 8580 CPA Exam Review-F 0 (0) Preparation for the financial accounting and reporting section of the Certified Public Accountant exam. Must be completed prior to receiving MPAcc degree. Does not contribute hours toward degree completion. To be taken Pass/No Pass only. Preq: Enrollment in MPAcc program.

ACCT 8590 CPA Exam Review-R 0 (0) Preparation for the regulation section of the Certified Public Accountant exam. Must be completed prior to receiving MPAcc degree. Does not contribute hours toward degree completion. To be taken Pass/No Pass only. Preq: Enrollment in MPAcc program.

ACCT 8610 Operational Auditing 3 (3) Provides in-depth understanding of concepts underlying operational auditing and experience in planning, conducting and reporting in operational auditing using a risk-based, process and controls focused approach. Preq: ACCT 4150.

ACCT 8620 Financial Auditing 3 (3) Advanced course in financial auditing to provide a framework for thinking about contemporary auditing and assurance issues and evaluating alternative rationales regarding the value and purpose of an audit as well as conducting financial audit research. Preq: ACCT 4150.

ACCT 8630 Forensics and Analysis 3 (3) Study of financial statement analysis with quality assessments and forensic analysis. Includes forecasting, asset and business valuation approaches and other special topics. Preq: ACCT 3130.

ACCT 8640 Accounting Information Systems 3 (3) Accounting systems including database concepts, systems design and evaluation, systems controls and systems implementation. Preq: ACCT 3220 and ACCT 4150.

ACCT 8720 Taxation of Flowthrough Entities 3 (3) Covers federal income taxation of entities treated as partnerships, corporations, estates and trusts. Preq: ACCT 4040.

ACCT 8730 International and Special Topics in Taxation 3 (3) Seminar on international and special topics that impact practicing tax professionals. Preq: ACCT 4040.

ACCT 8750 State, Local and Advanced Topics in Taxation 3 (3) Explores state and local income taxation issues and planning, retirement plans, deferred compensation plans, IRS practice and procedures and current sophisticated developments in taxation. Preq: ACCT 4040.

AGRICULTURAL EDUCATION

AGED 6010 Instructional Methods in Agricultural Education 3 (2) Appropriate methods of teaching vocational agriculture in high schools. Includes procedures for organizing teaching programs, teaching high school students, and directing FFA activities. Coreq: AGED 6011.

AGED 6011 Instructional Methods in Agricultural Education Laboratory 0 (3) Non-credit laboratory to accompany AGED 6010. Coreq: AGED 6010.

AGED 6030 Principles of Adult/Extension Education 3 (3) Overview of adult/extension education and adult learning. Selection of adult education providers is reviewed with emphasis on extension. Preq: Junior standing.

AGED 6130 Leadership of Volunteers 3 (3) Provides an overview of volunteer management. Examines the knowledge, skills, and abilities required of professional managers to involve volunteers effectively in the work of organizations.

AGED 6160 Ethics and Issues in Agriculture and the Food and Fiber System 3 (3) Explores ethical theories, concepts of critical thinking, and major ethical issues in American agriculture. The major social, political, economic, and ethical issues that arise in connection to the food and fiber system are examined and potential solutions considered.

AGED 6230 Curriculum 3 (3) Curriculum goals and related planning for career and continuing education programs.

AGED 6250 Teaching Agricultural Mechanics 2 (1) Instruction in organizing course content, conducting and managing an agricultural mechanics laboratory, shop safety, microteaching demonstrations of psychomotor skills, and methods of teaching manipulative abilities. Coreq: AGED 6251.

AGED 6251 Teaching Agricultural Mechanics Laboratory 0 (3) Non-credit laboratory to accompany AGED 6250. Coreq: AGED 6250.

AGED 6280 Special Studies in Agricultural Education 1-3 (1-3) Students study, individually or collectively, selected topics and/or problems in agricultural education to meet the particular needs of the clientele enrolled. May be repeated for a maximum of six credits.

AGED 6400 Program Development in Adult/Extension Education 3 (3) Principles, theory, and practice in planning and conducting educational programs in adult/extension settings. Preq: Junior standing.

AGED 6500 Modern Topics and Issues 3 (3) Students select a major area of concern to teachers of agriculture and county agents for intensive study at least one semester prior to offering the course. When feasible, team teaching with faculty from other departments in the College of Agriculture, Forestry and Life Sciences is utilized.

AGED 6800 Foundations of Digital Media and Learning 3 (2) Critical use of digital media for leadership and learning within societal and educational contexts. Course focuses on learner impact while exploring, developing, and evaluating technology-enhanced applications. Further develops competencies with new media literacies and addresses societal, cultural, ethical, and participatory issues and uses of digital media. Coreq: AGED 6801.

AGED 6801 Foundations of Digital Media and Learning Laboratory 0 (2) Non-credit laboratory to accompany AGED 6800. Coreq: AGED 6800.

AGED 6820 Advanced Educational Applications of Microcomputers 3 (2) Provides students with the knowledge and skills needed to apply microcomputer technology to the utilization and generation of educational software in accordance with sound educational principles. Preq: AGED 4800 or EDF 4800. Coreq: AGED 6821.

AGED 6821 Advanced Educational Applications of Microcomputers Laboratory 0 (2) Non-credit laboratory to accompany AGED 6820. Coreq: AGED 6820.
AGED 7360 Internship Teaching 3 (1) Increases professional competency and program development through classroom and practical experiences in planning, conducting and evaluating educational programs. Offered spring semester only. Coreq: AGED 7361.

AGED 7361 Internship Teaching Laboratory 0 (6) Non-credit laboratory to accompany AGED 7360. Coreq: AGED 7360.

AGED 7370 Internship in Agribusiness Firms 3 (1) Provides classroom and practical experiences in selected agricultural businesses and industries. Students identify and practice entry-level competencies required in selected agribusiness and natural resource management enterprises. Offered summer session only. Coreq: AGED 7371.

AGED 7371 Internship in Agribusiness Firms Laboratory 0 (6) Non-credit laboratory to accompany AGED 7370. Coreq: AGED 7370.

AGED 7500 Special Institute Course: Selected Topics in Agricultural Education 1-3 (1-3) Subject areas organized according to institute needs. Topics vary from course to course. May be repeated for a maximum of nine credits. Preq: Consent of instructor.

AGED 8010 Systems for Technology Transfer 3 (3) Development of a philosophical foundation and utilization of cooperative learning strategies and techniques to disseminate effectively technological change for expanding clientele and diverse socioeconomic environments.

AGED 8040 Special Problems 3 (2) Planning, conducting and reporting a special problem in educational and vocational education appropriate to students' needs. Coreq: AGED 8041.

AGED 8041 Special Problems Laboratory 0 (3) Non-credit laboratory to accompany AGED 8040. Coreq: AGED 8040.

AGED 8100 Clinical Research in Agricultural Education 1-6 (1-6) Individual work on an assigned research topic in agricultural education. May be repeated for a maximum of nine credits. Preq: EXT 8010; and AGED 8890 or ED 8890.

AGED 8120 Development of Supervised Agricultural Experience Programs 3 (3) Provides secondary agriculture teachers with strategies for supervising and guiding students' supervised agricultural experiences (SAE).

AGED 8150 Teaching Agricultural and Power Mechanics 3 (2) Methods of determining course content, organizing teaching modules in logical sequence, equipping shop, teaching agricultural and power mechanics to farm and agribusiness clientele, providing individualized instruction and developing off-farm experience programs. Offered summer session of odd-numbered years only.

AGED 8151 Teaching Agricultural and Power Mechanics Laboratory 0 (3) Non-credit laboratory to accompany AGED 8150. Coreq: AGED 8150.

AGED 8210 Theories and Practices of Adult Education 3 (3) Study of recent research on adult learning. Includes a comparison of the assumptions supporting pedagogy and andragogy and teaching adults through formal classes and community organizations. Offered spring semester only. Preq: ED 3020 or PSYC 2100.

AGED 8690 Seminar 1-3 (1-3) Students and faculty review current topics in agricultural education.

AGED 8890 Research in Education 3 (3) Includes problem selection. Investigates types of educational research and techniques employed. Includes the use of ERIC system and computer program packages. Requires interpretation of research findings.

AGRICULTURAL MECHANIZATION AND BUSINESS

AGM 6020 Landscape Drainage and Irrigation 3 (2) Uses basic soil-water-plant relationships to determine the need for and methods of irrigation and drainage. Topics include irrigation methods, drainage needs and drainage methods. Preq or concurrent enrollment: AGM 3010. Coreq: AGM 6021.

AGM 6021 Landscape Drainage and Irrigation Laboratory 0 (3) Non-credit laboratory to accompany AGM 6020. Coreq: AGM 6020.

AGM 6050 Environmental Control in Animal Structures 3 (2) Design of environmental control systems for animal production facilities. Topics include effects of the thermal and chemical environment on animals, ventilation system design, thermal design of structural elements, design of heating, cooling, and lighting systems. Emphasis is on practical, energy-efficient applications to modern animal production facilities. Coreq: AGM 3020 or AVS 3010. Coreq: AGM 6051.

AGM 6051 Environmental Control in Animal Structures Laboratory 0 (3) Non-credit laboratory to accompany AGM 6050. Coreq: AGM 6050.

AGM 6060 Mechanical and Hydraulic Systems 3 (2) Study of power transmission systems for agricultural production emphasizing mobile equipment. Characteristics, requirements, and design of both V-belt drive and roller-chain drives are presented. Emphasis on hydraulic power transmission systems, including pumps, actuators, control devices, and hydraulic circuitry. Preq: AGM 2060; and PHYS 2000 or PHYS 2070. Coreq: AGM 6061.

AGM 6061 Mechanical and Hydraulic Systems Laboratory 0 (3) Non-credit laboratory to accompany AGM 6060. Coreq: AGM 6060.

AGM 6100 Precision Agriculture Technology 3 (2) Includes principles and hands-on application of technologies supporting precision agriculture. Topics include global positioning system (GPS), geographic information system software, variable rate technologies, collection of spatial data, automated guidance of equipment, spatial data mapping and analysis, remote sensing, and economic considerations. Preq: Junior standing. Coreq: AGM 6101.

AGM 6101 Precision Agriculture Technology Laboratory 0 (3) Non-credit laboratory to accompany AGM 6100. Coreq: AGM 6100.

AGM 6520 Mobile Power 3 (2) Study of tractors, emphasizing internal combustion engines and support systems necessary for their proper functioning. Also considers application of power, maintenance, adjustment, and general repair. Preq: PHYS 2000 or PHYS 2070. Coreq: AGM 6521.

AGM 6521 Mobile Power Laboratory 0 (3) Non-credit laboratory to accompany AGM 6520. Coreq: AGM 6520.

AGM 6600 Electrical Systems 3 (2) Students in agriculture and related curricula study electric and other utilities on the farm and in the home. Emphasizes selection, installation, and maintenance of wiring systems, lighting systems, motors, controls, water systems, and waste disposal systems. Preq: Junior standing. Coreq: AGM 6601.

AGM 6601 Electrical Systems Laboratory 0 (3) Non-credit laboratory to accompany AGM 6600. Coreq: AGM 6600.

AGM 7710 Selected Topics in Agricultural Mechanization and Business 1-3 (1-3) Selected topics not covered in other courses. Performance is measured by oral or written reports or examinations. May be repeated for a maximum of six credits.

AGM 7810 Special Problems in Agricultural Mechanization and Business 1-3 (1-3) Independent analysis through literature review and laboratory or field research. Requires written documentation. May be repeated for a maximum of six credits.

ATHLETIC LEADERSHIP

AL 6530 Athletic Injuries Prevention, Assessment and Rehabilitation 3 (3) Gives students an understanding of prevention, treatment, and rehabilitation procedures of injured athletes. Preq: AL 3490.

AL 8490 Athletic Leadership Development 3 (3) Investigation of leadership principles and theories as they relate to collegiate athletic coaching and the effect they have on the performance of the collegiate academic athlete. Collegiate coaching responsibilities and requirements for various levels of appointment are examined. Preq: Consent of instructor.

AL 8610 Athletic Leadership for Intercollegiate Administration 3 (3) Investigates effective leadership principles and theories relative to the supervision and administrative responsibilities of intercollegiate athletics. Preq: Consent of instructor.

AL 8620 Psychological Issues in Collegiate Athletics 3 (3) Investigation and intervention of psychological issues that athletes, coaches and administrators face at the collegiate level. Preq: Consent of instructor.

AL 8640 Ethical Issues in Collegiate Athletic Administration 3 (3) Investigation of current ethical issues and the promotion of positive character development in collegiate athletic programs. Preq: Consent of instructor.

ANTHROPOLOGY

ANTH 6030 Qualitative Methods 3 (3) Methods and techniques of qualitative field research, including participant observation, ethnographic interviewing, data analysis, and report writing. Preq: ANTH 2010.
ANTH 6230 Women in the Developing World 3 (3) Comparative anthropological study of women and their status in developing countries around the world. A survey of women’s daily lives in a global context, emphasizing education, economics, and the environment. Case studies include microfinance, literacy, reproductive rights and practices, and the impact of religious fundamentalism on women. Preq: Sophomore standing.

ANTH 6660 Evolution of Human Behavior 3 (3) Familiarizes students with the evolutionary basis of human behavior. Examines topics such as altruism, cooperation, mating systems, parental investment, and social systems using diverse examples, from hunter-gatherer to technological societies. Preq: ANTH 3510 or BIOL 3350 or BIOL 4700 or BIOL 6700 or PSYC 2010.

ANTH 6740 Primatology 4 (3) Biology of nonhuman primates, including their evolution, taxonomy, physiology, life history, behavioral ecology and conservation. Three field trips are required, during which students conduct behavioral observations and later analyze their data and present it in report form. Preq: ANTH 3510; and either BIOL 1110 or both BIOL 1040 and BIOL 1060. Coreq: ANTH 6741.

ANTH 6741 Primatology Laboratory 0 (3) Non-credit laboratory to accompany ANTH 6740. Coreq: ANTH 6740.

APPLIED ECONOMICS

APEC 6020 Production Economics 3 (3) Economic analysis of agricultural production involving the concept of the farm as a firm; principles for decision making; the quantitative nature and use of production and cost functions and the interrelations and applications of these principles to resource allocation in farms and among areas. Preq: APEC 3080; and ECON 3060 or ECON 3140.

APEC 6090 Commodity Futures Markets 3 (3) Introduction to the economic theory, organization, and operating principles of agricultural commodity futures markets in the United States. Emphasizes speculating, hedging, and investing in agricultural commodity futures contracts from the standpoint of the agricultural entrepreneur. Preq: APEC 2020 or ECON 2110.

APEC 6110 Regional Impact Analysis 3 (3) Techniques for analysis of the growth and decline of regions, including economic-base theory, shift share, regional input-output, regional econometric models, and fixed impact models. Preq: APEC 2020; or both ECON 2110 and ECON 2120.

APEC 6130 Advanced Real Estate Appraisal 3 (3) Topics include highest and best use analysis, data collection, and analyses. Stresses advanced appraisal procedures for income, cost, and comparable sales approach to real estate valuation. Covers eminent domain, the appraisal of property in transition, and specialized property. Preq: APEC 3130 or FIN 3070.

APEC 6120 Globalization 3 (3) Utilizes basic principles of international economics (comparative advantage, free trade versus protectionism, exchange rate determination, etc.) to analyze the contemporary problems and issues of the world economy. Emphasizes application of economic principles to current globalization trends. Preq: APEC 2020 or ECON 2000 or ECON 2110.

APEC 6260 Cropping Systems Analysis 3 (2) Application of agronomic and economic principles in solving problems related to the production and marketing of agronomic crops. Major part of the course is a case study in which detailed analysis of a farm, agribusiness, or environmental situation is made with students making formal written and oral presentations of results. Preq: AGR 1040; and Junior standing; and APEC 2020 or ECON 2000 or ECON 2110. Coreq: APEC 6261.

APEC 6261 Cropping Systems Analysis Laboratory 0 (2) Non-credit laboratory to accompany APEC 6260. Coreq: APEC 6260.

APEC 6520 Agricultural Policy 3 (3) Review of public agricultural policy programs in the United States and a critical examination of current and proposed government policies and programs affecting the agricultural sector of the economy. Includes economic considerations as related to past and current farm price and income programs. Preq: APEC 2020 or ECON 2000 or ECON 2110.

APEC 6560 Cropping Systems Analysis Laboratory 0 (2) Non-credit laboratory to accompany APEC 6560. Coreq: APEC 6560.

APEC 6570 Natural Resource Use, Technology, and Policy 3 (3) Focuses on economic analyses of natural, efficient, and sustainable uses of natural resources, impacts of technologies that affect these uses, and policies that affect development and use of such technologies. Resource-technology-policy combinations may vary, but an example is crude oil, hybrid automotive engines, and fuel economy standards. May also be offered as ECON 4050, and ECON 3600 or ECON 3140.

APEC 6570 Natural Resource Use, Technology, and Policy 3 (3) Focuses on economic analyses of natural, efficient, and sustainable uses of natural resources, impacts of technologies that affect these uses, and policies that affect development and use of such technologies. Resource-technology-policy combinations may vary, but an example is crude oil, hybrid automotive engines, and fuel economy standards. May also be offered as ECON 4050, and ECON 3600 or ECON 3140.

APEC 6600 Agricultural Finance 3 (3) Study of the principles and technique of financing in the agricultural sector. Topics include the capital situation in agriculture, concepts of farm financial management, use of credit, capital markets, lending agencies, and estate planning. Preq: ACCT 2010; and APEC 2020 or ECON 2000 or ECON 2110.

APEC 6750 Economics of Wildlife Management and Policy 3 (3) Integrated approach to the study of the economics of wildlife. Topics include determination of market and nonmarket value, single and multiple species management, enterprise cost and returns, marketing wildlife, leasing methods, complementsarity and competitiveness with agricultural and forestry enterprises, and timber and crop damage cost estimates and control. Preq: APEC 2020 or ECON 2000 or ECON 2110 or FOR 3040 or WFB.

APEC 8000 History of Economic Thought 3 (3) Development of economic thought from early Greek to Keynesian economics. Readings by major economists such as Smith, Ricardo, Marx, Marshall and Keynes; development of major economic theories.

APEC 8010 Microeconomic Theory 3 (3) Microeconomic theory and its use to analyze and predict the behavior of industries, firms and consumers under various market conditions. Offered fall semester only.

APEC 8020 Advanced Economic Concepts and Applications 3 (3) Rigorous development of price theory under alternative product and resource market structures. Preq: Consent of instructor.

APEC 8040 Applied Mathematical Economics 3 (3) Discusses mathematical tools needed in economic analysis: matrix algebra, differentiation, unconstrained and constrained optimization, integration and linear programming.

APEC 8060 Econometrics I 3 (3) Application of econometric techniques and stochastic models to economic problems. Considers distribution theory, simple and multiple regression modeling, hypothesis testing and other issues in regression analysis.

APEC 8080 Econometrics III 3 (3) Continuation of ECON 8070. Covers current economic models and estimation procedures. Offered spring semester only. Preq: ECON 8070.

APEC 8090 Advanced Natural Resource Economics 3 (3) Applications of economic theory to problems of natural resource management, epistemological considerations, rent theory, public and private investment criteria, benefit-cost analysis and general equilibrium management models. May also be offered as ECON 8090. Offered spring semester only. Preq: ECON 3140.

APEC 8100 Natural Resources Management and Policy 3 (3) Economic, institutional and legal aspects of control and management of natural resources; concepts of economic science applied to public policy questions related to land and water resources. Specialized background in economics is not necessary. May also be offered as ECON 8100. Offered fall semester only. Preq: ECON 3140.

APEC 8110 Economics of Environmental Quality 3 (3) Pricing and distribution emphasizing effects upon economic welfare; goods allocated by government purchase for joint consumption and those distributed by rationing; alternate plans for allocating public goods. Offered fall semester of even-numbered years only. Preq: ECON 3140.

APEC 8130 Water Resource Economics 3 (3) Discusses benefit-cost analysis of public water development programs, economic analysis of selected water allocation issues, groundwater management, pollution abatement, efficient pricing and valuation, multiple use management, reservoir management, wetland protection, minimum stream flows for endangered species and environmental and developmental tradeoffs. Preq: ECON 3140.

APEC 8160 Labor Economics 3 (3) Wage and employment theory; labor markets; labor history; current problems in labor and manpower economics.
APEC 8170 Advanced Production Economics 3 (3) Discusses production economics theory in a quantitative framework; technical and economic factor-product, factor-share, and product-product relationships in single- and multi-product firms under conditions of perfect and imperfect competition in both factor and product markets. May also be offered as ECON 8170. Offered spring semester only. Preq: APEC 4020; and APEC 3080 or ECON 4050.

APEC 8190 Futures and Options Markets 3 (3) Introduction to the economic theory and operation of futures and options markets in the United States. Includes determination of prices and price differences, speculation and the use of these markets for forward pricing and price risk management. Preq: APEC 4020 or APEC 6090.

APEC 8200 Public Finance 3 (3) Impact of government on resource allocation, income distribution and stability; role of regulation; principles of taxation.

APEC 8220 Public Policy Economics 3 (3) Covers contemporary public policy, including price and resource policy, affecting rural areas. Discusses public participation, or the lack thereof, related to programs designed to implement public policy. May also be offered as ECON 8220. Offered spring semester only. Preq: ECON 3140.

APEC 8240 Organization of Industry 3 (3) The structure of markets and firms; forces that determine the size of firms and the boundaries of markets; the behavior of firms, both singly and in concert, to exploit market positions.

APEC 8260 Economic Theory of Government Regulation 3 (3) The scope of governmental regulation in the economy of the United States, its evolution and development; the application of the tools of economic analysis to the issues of regulated enterprise. Preq: ECON 3140.

APEC 8270 Economics of Property Rights 3 (3) Analyzes the evolution and impact of property rights institutions on individuals' choices and the subsequent use of resources. Particular attention is paid to the importance of property rights structures in the organization of business and in managerial decision making. Preq: ECON 8010.

APEC 8280 Applied Demand Analysis 3 (3) Analysis of demand by individual households and consumers in aggregate. Modern approaches to estimation of demand systems and valuation methods may also be offered as ECON 8280. Preq: ECON 3140; and APEC 3080 or ECON 4050.

APEC 8310 Economic Development 3 (3) Economic analysis of development of urban areas within the system of cities; central place theory and general equilibrium models of interregional economic activity emphasizing central place systems, spatial interaction and stochastic processes; internal development of the city focusing on housing and land use patterns, transportation and urban form.

APEC 8320 Community and Regional Economics 3 (3) Covers economic theory and research methods needed to understand happenings in the regional and community economy and how local and non-local decisions influence local economic change. May also be offered as ECON 8320. Offered fall semester only. Preq: APEC 4120 or APEC 6120 or CRD 4120 or CRD 6120.

APEC 8360 Dynamic Optimization with Economic Applications 3 (3) Dynamic optimization entails the use of optimal control to solve minimization or maximization problems in which choice variables affect how state variables change over time. Differential or difference equations describe the temporal changes. Economic applications pertain to actual use and efficient management over time of financial, human, physical and natural capital. Preq: APEC 8040 or ECON 8040 or MTHS 2060 or MTHS 2070.

APEC 8400 International Trade Theory 3 (3) Theory of free trade from Ricardo to the present; theory and application of optimal and second-best tariffs; recent empirical testing of trade and tariff theory. Preq: ECON 3140; and either APEC 8020 or ECON 8020; or consent of instructor.

APEC 8410 International Finance 3 (3) Financial economics of decision making in a multinational environment featuring autonomous governments and multiple currencies. Typical topics include the macroeconomic problems of unemployment and inflation in an international economy, management of exchange rate risk, credit risk, political risk and taxation. Preq: ECON 3150.

APEC 8550 Financial Economics 3 (3) Study of modern theory of corporate finance, including basic theories of efficient markets, portfolio selection, capital asset pricing, option pricing and agency costs. Preq: APEC 8010 or ECON 8010; or consent of instructor.

APEC 8810 Internship in Community and Resource Development 1-6 (1-6) Directed investigations related to the art and architectural history of Europe. May be repeated for a maximum of six credits. Preq: Junior standing or consent of instructor.

ARCH 1050 American Architectural Styles 1650-1950 3 (3) Survey of American architectural styles and of the architects responsible for them, from the Colonial period to our recent past. Considerable emphasis is placed on identifying those architectural elements which serve as clues in determining a building’s architectural style.

ARCH 6120 Architectural History Research 3 (3) Directed investigations related to the art and architectural history of Europe. May be repeated for a maximum of six credits. Preq: Junior standing or consent of instructor.

ARCH 6140 Design Seminar 3 (3) Exploration of topical issues in architecture, art, construction, and planning. May be repeated for a maximum of six credits. Preq: Junior standing or consent of instructor.

ARCH 6160 Field Studies in Architecture and Related Arts 3 (3) Documentation and analysis of architectural structures observed during European travels in graphic and written form. May be repeated for a maximum of six credits. Preq: Junior standing or consent of instructor.

ARCH 6240 Product Design 3 (9) Furniture and product system design with emphasis on ergonomics and the relationship of form and materials. Preq: Senior standing and consent of instructor.

ARCH 6250 Energy in Architecture 3 (3) Climate design methodology and its influence on building energy patterns and architectural form. Preq: Senior standing and consent of instructor.

ARCH 6260 Architectural Color Graphics 3 (3) Architectural color graphics by computer. Theories of color classification and interaction; application of color theories to art and architecture. Preq: Consent of instructor.

ARCH 6270 Advanced Color Graphics 3 (3) Theories of color classification and interaction; three-dimensional color modeling by computer; advanced application of color theories to art and architecture. Preq: ARCH 4260 or consent of instructor.
ARCH 6280 Computer-Aided Design 3 (2) Introduction to the concepts, skills, and applications of computer-aided design as they relate to the practice of architecture. Prq: Senior standing or consent of instructor. Coreq: ARCH 6281.

ARCH 6281 Computer-Aided Design Laboratory 0 (3) Non-credit laboratory to accompany ARCH 6280. Coreq: ARCH 6280.

ARCH 6290 Architectural Graphics 3 (3) Provides students with an understanding of the concepts, skills, techniques, and strategies of visual presentation/graphics as they relate to the design professions—architects/landscape architects. Prq: Junior standing or consent of instructor.

ARCH 6300 Theories and Philosophies of Technology and Architecture 3 (3) Theoretical and practical examination of technology and architecture from pre-modern and modern viewpoints to study its nonneutral role in shaping and reflecting knowledge, beliefs, and actions within a cultural context.

ARCH 6400 New York Field Study 3 (3) Study of architecture, art, planning, and urban design of New York. Two weeks of residence are required with scheduled field trips to relevant sites in all five boroughs, with counseling to determine research interests. Guidance is provided to resources in the city. A final report is required. Offered in the summer only.

ARCH 6770 Introduction of Craft 1-3 (1-3) Architectural craft lab offered under different material specializations, all of which introduce students to design as informed by craft through a hands-on lab. Basic craft operations and material properties are introduced for the subject material (wood, steel, etc.). May be repeated for a maximum of six credits. Prq: Consent of instructor.

ARCH 6850 History and Theory of Architecture + Health 3 (3) Introduces fundamental design issues between health and architectural settings for health. Examines connections between cultural context, medical thought, healthcare delivery, and health-related design within different time periods. Introduces contemporary theories on the relationships between human beings, their health and wellbeing, and the design of the physical environment. Prq: Consent of instructor.

ARCH 6880 Architectural Programming and Predesign 3 (3) Introduces the theory, mechanics, and practice of architectural programming and post-occupancy evaluation. Presents programming as a means to create architectural settings sensitive to the needs of their inhabitants. Emphasizes collaborative methodologies that involve identifying relevant goals, facts, issues, needs, and concepts. Students develop an architectural program. Prq: Consent of instructor.

ARCH 6990 Selected Topics in Architecture 1-3 (1-3) Study of selected topics in architecture. May be repeated for a maximum of nine credits, but only if different topics are covered. Prq: Junior standing or consent of instructor.

ARCH 8010 Architecture Seminar 3 (3) Contemporary issues in the architectural profession.

ARCH 8030 Theories of Architecture 3 (3) Evolution of architectural theories from Vitruvius to the present. Emphasis on the writings of leading architects and theorists and the impact of these theories on architectural solutions.

ARCH 8040 Seminar in Modern Masters 3 (3) In-depth examination of one or more related groups of architects from the 20th century (Kahn, Scarpa, Barragán, Wright, Corbusier, etc.). Content varies from semester to semester. Prq: ARCH 8610.

ARCH 8100 Visualization and Representation 1 3 (3) Develops students' capacity for graphic representation of architectural form and space. Intended as a corollary to ARCH 8400; provides the tools necessary to analyze and translate concepts into two-dimensional constructions through the utilization of manual and digital drawing techniques. Coreq: ARCH 8400.

ARCH 8110 Visualization and Representation II 3 (3) Develops and improves student's capacity for the digital and graphic representation of three-dimensional architectural form and space. Introduces and explores the latest technologies—from advanced digital modeling tools to equipment for computer-controlled fabrication. Prq: ARCH 8100 or consent of instructor.

ARCH 8120 Computational Design Methods 3 (3) Examines computing in architecture, particularly through the use of parametric and generative systems. Students learn how to structure and process information to communicate and enhance the design process. Prq: ARCH 8110 or consent of instructor.

ARCH 8190 Selected Topics in Visualization and Representation 1 5 (1-5) Critical consideration of a special topic in architectural visualization and representation in which students construct their own informed and researched essays about what this topic means for their own developing architectural practices. May be repeated for a maximum of six credits. Prq: ARCH 8100 or consent of instructor.

ARCH 8200 Building Design and Construction Principles 3 (3) Essential principles for quality design and construction. Emphasis is on design, programming and sustainability issues for different types of buildings. Nature and characteristics of construction materials, equipment and systems used in modern buildings are presented as well as how they affect function and feasibility. Prq: Consent of instructor.

ARCH 8210 Research Methods 3 (3) Covers foundations and procedures of architectural research. Explores alternate research methodologies and their philosophical and epistemological limits.

ARCH 8320 Community 1 1 3 (3) Engages full-scale design projects and initiatives that are community-based and offer opportunities in field research, studio design-centric problems and documentation. Projects focus on sustainable and serious public space and how design and planning can improve the interface between the built and natural environment while enhancing the human experience. Prq: ARCH 8520 or consent of instructor.

ARCH 8400 Design Studio 6 (12) Studio for students entering the Master of Architecture program with undergraduate degrees in subjects other than Architecture or Environmental Design. Considered aspects of visualization and representation of architecture, the history and theory of architecture, architectural technology and strategies of design. Coreq: ARCH 8100.

ARCH 8410 Architecture Studio 1 6 (12) Studio course focused on increasingly complex works of architecture at various scales for different physical site conditions. Prq: ARCH 8100.

ARCH 8420 Architecture Studio II 1 6 (12) Studio course focused on architectural materials and assembly. Course is comprised of architectural design explorations of increasing complexity. Students develop a detailed sectional model of their design proposal. Prq: ARCH 8410.

ARCH 8500 Architecture Studio 6 (18) Architectural design studies in the context of the Genoa urban setting. May substitute for ARCH 8530 or 8540 and for ARCH 8570 with consent of advisor.

ARCH 8510 Design Studio III 6 (12) Design studio for projects of relative complexity, with varied scales and programs, focusing on investigative skills, fundamental design skills, sustainability, and technical documentation. Emphasizes the relationship between architecture, sit and context in preparation for more advanced design projects and off-campus study. Prq: ARCH 8410 and ARCH 8420.

ARCH 8520 Design Studio IV 6 (12) Design studio for projects of relative complexity, with varied scales and programs, with an emphasis on pre-design, sustainability, site design, and collaborative processes. Emphasizes the relationship between architecture, site, and context. May be located in Clemon, Charleston, Barcelona, or Genoa. Prq: ARCH 8510.

ARCH 8550 Studio South 6 (12) Addresses architectural problems with varied scales and programs in the context of the South. Emphasizes the relationship between architecture, community and context. Projects involve collaboration with other disciplines in the studio to result in a critical examination of technology and architecture, the history and theory of architecture, art, planning, and urban design of New York. Two weeks of residence are required with scheduled field trips to relevant sites in all five boroughs, with counseling to determine research interests. Guidance is provided to resources in the city. A final report is required. Offered in the summer only.

ARCH 8570 Design Studio V 6 (18) Design studio for increasingly comprehensive design projects, with varied scales and programs, with an emphasis on pre-design, site design, sustainability, and collaborative processes. Emphasizes the relationship between architecture, site and context. May be located in Clemon, Charleston, Barcelona or Genoa. Prq: ARCH 8520.

ARCH 8590 Thesis Manuscript 1 3 (1-3) Architectural pre-design synthesis of research for the thesis project. Prq: ARCH 8580.

ARCH 8600 Architectural History and Theory 1 3 (3) Overview of architecture and urbanism from the Renaissance to the Industrial Revolution, emphasizing the trajectory of western modernity, historical transformations of architectural practices, and the theoretical, philosophical and cultural foundations of changing design approaches. Close readings of primary and secondary sources are complemented by analytical studies of noteworthy precedents.
ARCH 8610 Architectural History and Theory II 3 (3) Study of architecture and urbanism from 1850 to 1950 through thematic investigations, historical narratives and social critiques in order to reveal past theorists’ and practitioners’ responses to those cultural and technological changes that remain similar today. Close readings of primary and secondary sources complement analytical studies of noteworthy precedents. Preq: ARCH 8600.

ARCH 8620 Architectural History and Theory III 3 (3) Study of architecture and urbanism from 1950, emphasizing challenges to early twentieth century modernism, the emergence of new urban, suburban, ecological, cultural and technological sensibilities, and the roots of contemporary architecture. Close readings of primary and secondary sources complement analytical studies of noteworthy precedents. Preq: ARCH 8610.

ARCH 8630 History and Theory of Landscape and Urbanism 3 (3) Cultivates different ways of seeing, representing and understanding the landscape and the city. Both landscape and city are viewed as dynamic, living systems evolving from Roman, Medieval, Baroque, Industrial, Idealized and non-Western roots and shaped by political, economic, social, cultural and physical intentions and incidents.

ARCH 8640 Architectural History and Theory IV 3 (3) Investigation of emerging architectural trends and urban phenomena prepares students for advanced history/theory electives, independent research and architectural practice in the decades ahead through the study of such topics as globalization and non-Western architecture, megacities, sprawl and urbanization, energy and infrastructure, landscape and urban design, science and sustainability. Preq: ARCH 8620.

ARCH 8660 Architectural Robotics 3 (3) Focuses on understanding, developing and testing robotic systems for the built environment. Collaborative teams of students from Electrical and Computer Engineering and Architecture and their allied disciplines study and develop working robotic prototypes responsive to challenges and opportunities of living in today’s built and natural environments. Preq: Consent of instructor.

ARCH 8690 Selected Topics in History, Theory and Criticism I 1-5 (1-5) Critical consideration of special topics in architectural history, theory and criticism from which students construct their own informed and reasoned ideas about what the topic means for their own developing architectural practices. May be repeated for a maximum of six credits. Preq: ARCH 8600 and ARCH 8610.

ARCH 8700 Structures I 3 (3) Forces and their applications to statically determinant structural components and systems such as shear, moment and other stress strain patterns are explored in multiple structural materials. Preq: PHYS 2080 and PHYS 2100.

ARCH 8710 Structures II 3 (3) Addresses advanced topics in structures, exterior envelopes and contemporary production technologies. Continues the exploration of structural elements and systems, expanding to include more complex determinant, indeterminate, long-span and high-rise systems. Preq: ARCH 8700.

ARCH 8720 Productions and Assemblies 3 (3) Overview of traditional and contemporary materials and methods of construction. Combines lectures with hands-on lab experience to examine traditional and contemporary modes of construction, their selection, impact and reuse. Coreq: ARCH 8721.

ARCH 8721 Productions and Assemblies Laboratory 0 (2) Non-credit laboratory to accompany ARCH 8720. Coreq: ARCH 8720.

ARCH 8730 Environmental Systems 3 (3) Examines in detail the relationship between human comfort and the design of building envelopes and environmental systems. Covers the evolution of contemporary environmental systems and their appropriate application and integration with other design issues. Coreq: ARCH 8731.

ARCH 8731 Environmental Systems Laboratory 0 (2) Non-credit laboratory to accompany ARCH 8730. Coreq: ARCH 8730.

ARCH 8740 Building Processes Technical Resolution 3 (1) Develops the designer’s ability to assess, select and conceptually integrate structural systems, building envelope systems, environmental systems, life-safety systems and building service systems in a sustainable building design. Coreq: ARCH 8741.

ARCH 8741 Building Processes Technical Resolution Laboratory 0 (3) Non-credit laboratory to accompany ARCH 8740. Coreq: ARCH 8740.

ARCH 8750 Construction and Building Systems 3 (3) Sets a standard level of building technology preparation for entering graduate Architecture students who have an undergraduate architectural degree that included courses in architectural technology. Main focus is on analyzing how construction and building systems contribute to architectural design.

ARCH 8760 Smart Materials and Kinetic Structures 3 (3) Study of adaptive and kinetic systems and structures in architecture using smart and emergent materials. This course explores the materials, methods and means for buildings to transform and adapt to different functions or climatic conditions and allow various performances. Preq: Consent of instructor.

ARCH 8780 Lighting for Architecture 3 (3) Studies interrelationships among the fields that constitute lighting and impact on building form, materials and spatial use. Also considers contributions of daylight and electric light to human response and performance. Preq: Consent of instructor.

ARCH 8790 Selected Topics in Architectural Technology I 1-5 (1-5) Critical consideration of special topics in architectural technology from which students construct their own informed and reasoned ideas about what the topic means for their own developing architectural practices. May be repeated for a maximum of six credits.

ARCH 8810 Professional Practice Survey 3 (3) Provides an understanding of the basic principles and legal aspects of architectural practice organization: financial management; risk mitigation and arbitration; business planning; time, project and personnel management; client, owner and user needs; selecting consultants; project delivery methods; internship, licensure and registration; professional leadership; ethical standards; and expanding practice settings.

ARCH 8820 Building Economics, Costs and Legal Issues 3 (3) Explores economic factors determining materials, building components and methods of construction. Legal aspects of design are discussed in the context of building cost. Preq: ARCH 8810 or consent of instructor.

ARCH 8860 Health Facilities Planning and Design 3 (3) Current planning and design considerations for healthcare facilities. Conducted as a series of professional seminars examining overall infrastructural planning and design considerations and detailed considerations for specific areas in hospitals. Topics are covered by Architecture + Health faculty and nationally recognized practitioners. Coreq: ARCH 8870.

ARCH 8890 Mentorship 14-16 (1-6) Mentorship in professional practice. Paid work/study in a variety of related disciplines provides students with hands-on experience in design and fabrication fields relevant to the environmental design professions. Consists of two parts: a professional component, managed by an approved sponsor and an academic component, taught by the instructor. May be repeated for a maximum of 18 credits. Preq: Consent of instructor and acceptance by sponsor.

ARCH 8900 Directed Studies 1-5 (1-5) Special topics in architecture undertaken on an individual basis with faculty guidance. Preq: Consent of advisor.

ARCH 8910 Thesis Project 3-9 (3-9) Complex architectural project emphasizing design exploration and independent work. To be taken Pass/No Pass only. Preq: ARCH 8570 and ARCH 8580.

ARCH 8920 Comprehensive Studio 6 (18) Architectural design studies addressing comprehensive building projects. Topics include site design, programming, building systems design and materials selection. Final product is a complete building design with detailed drawings and models. Preq: ARCH 8570.

ARCH 8930 Synthesis Studio 6 (12) Studio themes and programs, defined by individual critics, carry an educational objective and present an opportunity for the critic to develop with his/her students a specific area of work or research. Culminates in a comprehensive proposal. Students are expected to have completed their second-year studio before enrolling in this course.

ARCH 8940 Research Studio 6 (12) Themes and programs, defined by individual critics, carry an educational objective and present an opportunity for the critic to develop with his/her students a specific area of work or research. Preq: ARCH 8930.

ARCH 8950 Architecture + Health Studio Selected Projects 3-6 (3-6) Studio for students in Architecture + Health Concentration offering selected projects engaging a variety of health-related topics from health community design, sustainable/green architecture, long-term care and community health care projects associated with health and wellbeing. Projects executed are similar to professional practice, combining teamwork with individual design alternatives. May be repeated for a maximum of 12 credits. Preq: Consent of instructor.
ART 6050 Advanced Drawing 3 (6) Advanced level studies of drawing which explore the synthesis of refined drawing skills and philosophies of art. Students’ understanding of drawing as a form of art is developed through studio practice augmented by critiques, demonstrations, lectures, field trips, and independent research. Prereg: ART 3070 or consent of instructor.

ART 6070 Advanced Painting 3 (6) Advanced studio course in painting. Students select painting media and develop a strong direction based on prior painting experience. Includes study of contemporary painters and directions. Prereg: ART 3070 or consent of instructor.

ART 6090 Advanced Sculpture 3 (6) Intensive independent studio concentration to further develop personal direction and content. Emphasizes continued investigation of sculptural context, materials and processes, and relative historical research. Prereg: ART 3090 or consent of instructor.

ART 6110 Advanced Printmaking 3 (6) Gelatination of process, techniques, and individual development. Students are expected to have mastered process and technique for the benefit of the image produced. Creativity and self-expression are highly emphasized as students select a process for concentrated study. Prereg: ART 3110 or consent of instructor.

ART 6130 Advanced Photography 3 (6) Continuation of ART 3130. Advanced problems in photography. Prereg: ART 3130 or consent of instructor.

ART 6170 Advanced Ceramic Arts 3 (6) Students are directed toward further development of ideas and skills. Glaze calculation and firing processes are incorporated to allow for a dynamic integration of form and ideas. Prereg: ART 3170 or consent of instructor.

ART 6200 Selected Topics in Art 1-3 (1-3) Intense course in studio art. May be repeated for a maximum of six credits, but only if different topics are covered. Prereg: Senior standing or consent of instructor.

ART 6200 Directed Studies 1-5 (1-5) Study of areas in the visual arts not included in other courses or additional advanced work. Must be arranged with a specific instructor prior to registration. May be repeated for a maximum of 18 credits. Prereg: Consent of instructor.

ART 6300 Fundamentals of Visual Art 3 (6) Intensive introduction of visual art and design fundamentals. Includes two- and three-dimensional studio work with emphasis on time-based media and design.

ART 8050 Visual Arts Seminar on Theories and Practice I 3 (3) Issues related to the practice of the artist, emphasizing theories and criticism of contemporary art.

ART 8060 Visual Arts Seminar on Theories and Practice II 3 (3) Continuation of ART 8050.

ART 8130 Photo-Based Imaging Theories and Techniques 3 (6) Offers in-depth examination of photographic imaging processes for artistic expression, utilizing both traditional and digital tools and concepts. Prereg: Master of Fine Arts student or consent of instructor.

ART 8210 Visual Narrative 3 (3) Students develop visual communication skills throughout a narrative of cinema, and express concepts and ideas in sequential narrative design. Prereg: Consent of instructor.

ART 8400 Visual Arts Studio 3-6 (3-6) Studio work in visual arts with adjunct lectures and gallery tours. May be substituted for ART 500-level visual arts studio.

ART 8500 Visual Arts Studio 3 (6) Concentrated and advanced work in ceramics, drawing, painting, printmaking, sculpture, photography, graphic design, or multimedia. Prereg: Consent of department chair or instructor.

ART 8510 Visual Arts Studio 3-6 (3-6) Continuation of ART 8500. May be repeated for maximum of six credits. Prereg: Consent of department chair or instructor.

ART 8520 Visual Arts Studio 6 (16) Advanced theory; directed research in art criticism; applied work in ceramic arts, drawing, painting, sculpture, photography, graphic design, or multimedia. Prereg: Consent of department chair or instructor.

ART 8710 Visual Arts Studio 3-6 (3-6) Continuation of ART 8700. May be repeated for maximum of six credits. Prereg: Consent of department chair or instructor.

ASTR 8030 Galactic Structure 3 (3) Kinematics, dynamics and content of the Milky Way galaxy; galactic rotation, galactic distance scale, stellar populations, spiral structure, the galactic center and the evolution of the Milky Way and other galaxies. Prereg: Consent of instructor.

ASTR 8100 Astrophysics I: Radiation Processes and Measurements 3 (3) Physical principles governing radiative processes and measuring radiation from astrophysical environments. Coverage includes approaches to radiative transfer, fundamental theory of radiation fields, emission and absorption processes, plasma effects, telescope optics and image formation, astronomical instrument design, photon detector and function. Prereg: Consent of instructor.

ASTR 8200 Astrophysics II: Stellar Astrophysics 3 (3) Physical and observational parameterization of stars, statistical mechanics and equations of state applied to stellar interiors, stellar energy transport mechanisms, nuclear reactions in astrophysics, construction of stellar models, adiabatic stellar pulsations, stellar evolution and nucleosynthesis, degenerate stars, and supernovae. Prereg: Consent of instructor.

ASTR 8300 Astrophysics III: Galactic Astrophysics 3 (3) Physical processes in the interstellar medium, physics of dust grains, physical models of and observational constraints on star formation and protostellar evolution and protoplanetary disks, (thermo) dynamics of stellar systems, models of galaxy formation, the Milky Way as a galaxy, stellar populations, galactic dynamics and chemical evolution. Prereg: Consent of instructor.

ASTR 8400 Astrophysics IV: Cosmology 3 (3) Course covers galaxies and cosmology. Topics include observed cosmological properties of the universe, physics and observed properties of active galactic nuclei and quasars and their use as cosmological probes, cosmological models, galaxy formation and evolution, large-scale structure in the universe, and primordial nucleosynthesis. Prereg: Consent of instructor.

ASTR 8750 Selected Topics 1-3 (1-3) Study of one or more advanced topics in contemporary astrophysics. May be repeated for credit, but only if different topics are covered. Prereg: Consent of instructor.

AUDIO TECHNOLOGY

AUD 6800 Audio Engineering II 3 (2) Advanced course in music technology focused on music production integrating digital audio and virtual instruments. Prereg: AUD 2850; and AUD 3800; and PHYS 2080 or PHYS 2210; each with a C or better. Coreq: AUD 6801

AUD 6801 Audio Engineering II Laboratory 0 (2) Noncredit laboratory to accompany AUD 6800. Coreq: AUD 6801.

AUD 6900 Independent Study in Audio Technology 1-3 (1-3) Tutorial work for students with special interests in audio study outside the scope of existing courses. May be repeated for a maximum of six credits. Prereg: Consent of department chair.
AUTOMOTIVE ENGINEERING

AUE 8050 Ground Vehicle Aerodynamics 3 (3)
Basic and applied aspects of aerodynamics relevant for internal and external design for performance, including drag, handling, noise and ventilation. Wind tunnel and track testing methods and computational modeling approaches are utilized.

AUE 8160 Engine Combustion and Emissions 3 (2)
Spark and compression ignition engines are investigated in terms of design, performance and emissions. Includes exergy models. Integrates theory of fuel air cycles with laboratory breakdown and dynamometer testing to correlate prevalent mathemetic models with test results. Coreq: AUE 8161.

AUE 8161 Engine Combustion and Emissions Laboratory 0 (3) Non-credit laboratory to accompany AUE 8160. Coreq: AUE 8160.

AUE 8170 Alternative Energy Sources 3 (3) Demand for petroleum alternative propulsion sources has focused attention on hybrid vehicles with fuel cells, electric motors and battery packs and internal combustion engines burning hydrogen and reformulated fuels. Comparison of performance, emissions, fuel efficiency, operational requirements and vehicle configurations is studied.

AUE 8250 Automotive Sensors and Actuators 3 (3) Study of automotive sensor and actuator requirements, design and selections as well as future needs. Sensor and actuator networks, noise and interference issues, wired and wireless systems are examined as well as integrated smart sensors and actuators with applications to traditional and intelligent vehicle systems.

AUE 8260 On-Board Vehicle Diagnostics and Reliability 3 (3) Discussion of legislated state, federal and international requirements. On-board automotive sensors to monitor vehicle operation and typical diagnostic algorithms are studied. Includes analytical methods for designing fault-tolerant systems and assessing vehicle reliability, including safety-critical systems and "limp-home" modes, as well as use of handheld scanners and specialized diagnostic equipment to classify faults.

AUE 8270 Automotive Control Systems Design 3 (3) Investigation into derivation of models and design of control strategies for powertrain and chassis control modules and integration into automotive platforms. Also presents software design, sensor selection, system architecture, diagnostics and reliability issues. Application is made to engine management, transmission and chassis systems with a consideration of vehicle performance, safety and information provision. Prq: ME 4160.

AUE 8280 Fundamentals of Vehicle Drivelines and Powertrain Integration 3 (3) Study of vehicle powertrain arrangement, manual and automatic transmissions, automotive axles, four-wheel and two-wheel drives and design and manufacturing of gearing systems. Other topics, such as powertrain control to address dynamics in shifting, engine balancing and fuel economy, are addressed. Modeling and computer simulation are used extensively to analyze dynamic performance of various transmissions. Prq: ME 4050 and ME 4160; or consent of instructor.

AUE 8290 Tire Behavior and Its Influence on Vehicle Performance 3 (3) In-depth analysis of the tire and its influence on vehicle performance including design, construction, structural response, rolling resistance, force and moment generation and behavior under dry/wet conditions. Tire models, their limitations and governing equations, tire characteristics on vehicle handling and safety and advanced control concepts in vehicle stability/braking are investigated. Prq: ME 4530.

AUE 8320 Vehicle Development and Integration Processes, Methods and Tools 3 (3) Overview of the vehicle development processes and the tools used in it, including voice of the customer, concept creation, packaging, product specification and target setting, including cost structures, lifecycle product management, prototype development and the role of the supplier. Prq: AUE 8810.

AUE 8330 Automotive Manufacturing Process Development, Methods and Tools 3 (3) Overview of automotive manufacturing systems. Issues such as supplier integration, flexible manufacturing, aggregate planning, quality engineering and their applications to manufacturing systems are presented. Emphasizes opportunities and challenges presented with automotive manufacturing in a global environment, integrated processes, product development and automotive supply chain management.

AUE 8340 Automotive Production Preparation, Management and Launch 3 (3) Effective leadership and management during product development and launch process. Includes responsibility and role definition, process management tools and software systems, detailed management of the supply chain, performance metrics and cost models and factors affecting launch success. Case studies of historic launch data and improvements are utilized.

AUE 8350 Automotive Electronics Integration 3 (3) Addresses the integration of electronic components and systems in automotive designs. Provides an overview of the major electronic systems in automobiles and describes how automotive manufacturers specify, integrate and evaluate these systems.

AUE 8470 Vehicle Suspension Systems Design and Analysis 3 (3) Study of concepts, theory, design and application of automotive suspension systems. Discusses suspension structure, configuration, geometry, kinematics, motion, static and dynamic load conditions as well as active, semi-active and passive systems. Suspension design factors and their effects are presented. Computer-aided engineering tools and other analytical techniques are demonstrated. Prq: ME 4530.

AUE 8480 Vehicle Braking Systems 3 (3) Study of vehicle braking performance; development of system specifications; regulatory, customer and manufacturing requirements; brake balance and effects on stability and stopping distance; ABS systems; and computer simulation for system performance. Prq: ME 4530.

AUE 8490 Automotive Chassis Design 3 (3) Integrative systems approach to the design and manufacture of automotive chassis and body components. Considers influence of design and manufacture on overall structural performance of the automobile, ride comfort, safety, durability, weight and cost. Prq: AUE 8550 and AUE 8810.

AUE 8500 Automotive Stability and Safety Systems 3 (3) Discussion of passive/active systems and design philosophies. Investigates stability issues associated with vehicle performance and use of sensors and control system strategies for stability enhancement. Implementation and application to intelligent cruise control, lane departure warning systems, ABS, traction control, active steering systems and vehicle dynamic control systems are also discussed. Prq: ME 4530.

AUE 8530 Crash Analysis Methods and Crashworthiness 3 (3) Consideration of crash legislation and testing; design constraints for crash: computational methods to analyze the mechanical response of automotive structure, systems and components to dynamic impact loading such as in crash situations; crush characteristics, structural collapse and their influence on safety; large-scale finite element analysis for large-scale deformation. Prq: AUE 8520 or AUE 8550.

AUE 8550 Structural/Thermal Analysis Methods for Automotive Structure, Systems and Components 3 (3) Methods to analyze the response of automotive structure, systems and components to static, dynamic and thermal loading. Includes coverage of critical loading conditions and system response objectives. Analysis methods focus on finite element approaches supplemented by simple computational methods when appropriate.

AUE 8660 Advanced Materials for Automotive Applications 3 (3) In-depth study of the broad range of engineering materials used in the construction of motor vehicles. Considers interrelations between materials microstructure, components manufacturing process and components service behavior. Prq: Consent of instructor.

AUE 8670 Vehicle Manufacturing Processes I 3 (3) In-depth analysis of main component and subsystem prototyping, fabrication assembly and integration processes used during production of automotive vehicles. Also discusses design for manufacturing, computer-aided manufacturing and rapid tooling technologies. Prq: Consent of instructor.

AUE 8680 Vehicle Manufacturing Processes II 3 (3) Continuation of AUE 8670 with more emphasis placed on opportunities and challenges presented by automotive manufacturing in a global environment, integrated processes and product development and flexible and agile manufacturing. Prq: AUE 8670.

AUE 8690 Quality Assurance for Automotive Manufacturing Systems 3 (3) Overview of manufacturing process control, including evolution of the quality movement, Lean Six Sigma framework, and quality system standards for the automotive industry. In addition to metrology and measurement systems, tools covered include Measurement Systems Analysis, Statistical Quality Control, Advanced Product Quality Planning, and Design of Experiments for manufacturing improvement.
AUE 8750 Vehicle Development and Realization 3 (3) In-depth analysis of component and subsys-
tems design, representation, data management and
analysis for vehicles. Voice of the customer, customer-driven design, product design specifi-
cations, life cycle product management, CAD/
CAE representations, domestic and international
standards, prototyping, design review and supplier
relationships are considered using case studies.
AUE 8760 Mass Customization Design for Vehicles
3 (3) Consideration of concepts of platforms and
product families, identification of common
functions and translation of functions into forms taking commonality into consideration.
Also investigates designing product families and
their role in vehicle design, the tie between market
needs and appropriate manufacturing paradigm
and specific applications to vehicle systems: design,
chassis, wiring harnesses, engines.
AUE 8770 Light-Weight Vehicle Systems Design
3 (3) Methodological approaches to weight trade-
off during design of vehicle systems, accounting
for other functions, cost, safety, materials charac-
teristics and manufacturing constraints. Includes
topology optimization, multimaterial approaches
and identification of the function optimal materials
and material combinations using multi-objective
formulations.
AUE 8800 Vehicle Design/Manufacture Project
Management 3 (3) Development of management,
leadership, sociocultural and technical skills
training for the successful management of an
automotive development or research team. Includes
problem identification, team dynamics, decision
making, ethics, strategy setting, project planning,
scope management and implementation, target
costing, marketing, design methods and design
for X-concepts.
AUE 8810 Automotive Systems: An Integrated
Overview 3 (3) Promotes understanding of the
vehicle as a complex system and interaction of
its subsystems in terms of performance. Topics
include propulsion systems, suspension and steer-
ing systems, tire-road interface, structural behavior
and crashworthiness, materials and manufacturing
driver/occupant-vehicle interactions and onboard
electronics. Modeling and simulation are used.
AUE 8820 Systems Integration Concepts and
Methods 3 (3) Study of methods and tools to handle
functional, geometric, production and IT integration. Includes instruction in managing
performance trade-offs from the combination of
systems designed for individual functions. Topics
also include optimization methods, complexity, vali-
dation, signal and IT design and testing methods,
r robustness, architecture and quality.
AUE 8830 Applied Systems Integration 3 (2)
Application of integration methods to practical
and complex vehicle design and manufacturing
systems. Includes prototyping, measurements,
tolerancing and validation, as well as diagnosis and
sensitivities, methods to diagnose sporadic software
errors with hardware in the loop, design reviews,
FMEA on function signal, geometry, production.
Also includes Fault Tree analysis, innovation and change management, risk analysis and value
analysis. Prereq: ME 8820 and consent of instructor.
Coreq: AUE 8831.
AUE 8831 Applied Systems Integration Laboratory
0 (3) Non-credit laboratory to accompany AUE
8830. Coreq: AUE 8830.
AUE 8840 Styling Design 3 (3) Considers funda-
mentals of styling design for the outer body and
the interior cockpit. Utilizes concept sketching,
drawing and prototyping, including virtual and
physical, layered and clay based. Includes 2-D and
3-D representations, brand identifications, textures,
motors, lighting, colors, and their use in automotive
industrial design.
AUE 8850 Vehicle Layout Engineering and
Ergonomic Design 3 (2) Study of vehicle layout
specifications and considerations related to exterior
and interior design. Ergonomics methods and tools
as related to occupant accommodation and driver
function are presented. Issues of assembly and
manufacturing ergonomics are also covered. Case
studies are utilized. Coreq: AUE 8851.
AUE 8851 Vehicle Layout Engineering and Ergo-
monic Design Laboratory 0 (3) Non-credit labora-
tory to accompany AUE 8850. Coreq: AUE 8850.
AUE 8860 Vehicle Noise, Vibration and Harshness
3 (3) Application of engineering tools and specifica-
tions for noise, vibrations and harshness. Sources,
mitigation methods, complexity and influences
on other vehicle functions are considered. Utilizes
design, simulation and validation methods. Prereq:
ME 8450.
AUE 8870 Methods for Vehicle Testing 3 (2) In-
vestigates test planning for various performance
regimes, data acquisition and analysis, uncertainty
analysis, sensor selection, noise filtering, data
reduction methods and track testing methods. Project
includes actual vehicle tests. Coreq: AUE 8871.
AUE 8871 Methods for Vehicle Testing Laboratory
0 (3) Non-credit laboratory to accompany AUE
8870. Coreq: AUE 8870.
AUE 8890 Automotive Engineering Project 1-3
(1-3) Industrial project work culminating in writing
engineering reports. Projects cover comprehensive
anatomical and/or experimental treatment of phe-
nomena of current interest in automotive engineer-
ing emphasizing modern technological problems.
May be repeated for a maximum of nine credits.
AUE 8920 Sustainable Vehicle Systems Seminar
1 (1) Sustainable vehicle systems seminar.
AUE 8930 Selected Topics in Automotive Engineer-
ing 3 (3) Advanced concepts in multiphysics systems
dynamics including kinematics and kinetics of
multiphysics systems, various methods for equation
formulation and their limitations, numerical solu-
tions methods, and applications to automotive
systems and subsystems.
AUE 9910 Doctoral Dissertation Research 1-12
(1-12) Doctoral Dissertation Research

ANIMAL AND VETERINARY SCIENCES

AVS 6100 Domestic Animal Behavior 3 (3) Provides
knowledge and understanding of behavior related
to perception, learning, sociality, reproduction,
feeding, and health for application in production,
training, and design of environments for optimum
health and welfare of domestic animals. Prereq: AVS
1500 and AVS 1510; and Junior standing.
AVS 6110 Animal Growth and Development 3 (3)
Integration of the nutritional, physiological, and
 genetic basis for animal growth and development with
application to livestock and poultry production.
Includes the cellular and molecular mechanisms
controlling these processes and emphasizes the
genes that regulate animal products (meat, eggs,
wool, and milk). Prereq: AVS 3010.
AVS 6120 Advanced Equine Management 4 (3)
Further discussion of special considerations of
the equine regarding housing, manure manage-
ment, nutrition, reproduction, transportation, and
behavior. Students gain insight into how horses
differ from other livestock species and their unique
requirements for the above systems. Prereq: AVS 3700.
Coreq: AVS 6121.
AVS 6121 Advanced Equine Management Labora-
tory 0 (2) Non-credit laboratory to accompany AVS
6120. Coreq: AVS 6120.
AVS 6130 Animal Products 3 (2) Introduction to the
safe and humane production of red meat, poultry,
and dairy products. Includes HACCP principles
and production of value-added animal products.
Coreq: AVS 6131.
AVS 6131 Animal Products Laboratory 0 (3)
Non-credit laboratory to accompany AVS 6130.
Coreq: AVS 6130.
AVS 6140 Basic Immunology 3 (3) Introduction to the
immune system of vertebrate animals, with an
emphasis on structure, function, regulation, and
cellular and molecular mechanisms of immune
responses. Prereq: BIOL 4610 and MICR 3050.
AVS 6150 Contemporary Issues in Animal Science
3 (3) Provides knowledge, understanding, and
critical analytical skills on current issues in animal
agriculture in diverse regional, national, and global
social-cultural and political environments as they
impact animals and man. Prereq: Junior standing in
Animal and Veterinary Sciences.
AVS 6160 Equine Exercise Physiology 3 (3) Integra-
tion of muscle, bone, cartilage, cardiovascular, and
respiratory systems as related to the equine athlete.
Encompasses biomechanics, kinetics, and kinesiol-
ogy related concepts specific to the horse. Further
discussion of diseases related to specific systems is
covered. Prereq: AVS 3010, Coreq: AVS 6610.
AVS 6610 Equine Exercise Physiology Laboratory
0 (2) Non-credit laboratory to accompany AVS
6160. Coreq: AVS 6610.
AVS 6710 Animal Agribusiness Development 2 (1)
Team-based development of a business relating to
the animal industries. Students develop the
business from the initial idea through operations.
Focuses on the development of the business plan,
including financials, personnel management, and
resources needed. Prereq: ACCT 2010; and ECON
2110 or ECON 2120. Coreq: AVS 6710.
AVS 6711 Animal Agribusiness Development Labora-
tory 0 (2) Non-credit laboratory to accompany AVS
6710. Coreq: AVS 6710.
AVS 6800 Poultry Science On-line 3 (3) On-line course
covering the physiology, nutrition, health,
reproduction, genetics, breeding, housing, and
management of commercial poultry species, in-
cluding the processing of meat and egg products.
AVS 6430 AVS International Experience 1-3 (1-3) Preplanned and approved international educa-
tion/cultural experience supervised by an Animal and Veterinary Sciences faculty member. Periodic reports or record keeping are required. Final report and oral presentation are required at the end of the experience. May be repeated for a maximum of four credits. To be taken Pass/No Pass only. Preq: Consent of instructor.

AVS 6530 Animal Reproduction 3 (2) Reproductive physiology and endocrinology of mammals with emphasis on farm animals and frequent reference to reproduction in laboratory animals and humans. Preq: AVS 1500 and AVS 3010. Coreq: AVS 6531.

AVS 6531 Animal Reproduction Laboratory 0 (2) Non-credit laboratory to accompany AVS 6530. Coreq: AVS 6530.

AVS 6550 Animal Reproductive Management 2 (0) Physiology and endocrinology of pregnant and non-

pregnant cows are discussed. Emphasizes methods of artificial insemination, pregnancy detection, and computer record keeping to achieve a high level of reproductive efficiency in cattle. Preq: AVS 1500 and AVS 3010. Preq or concurrent enrollment: AVS 4530. Coreq: AVS 6551.

AVS 6551 Animal Reproductive Management Laboratory 0 (3) Non-credit laboratory to accompany AVS 6550. Coreq: AVS 6550.

AVS 6650 Animal Physiology 13 (3) Advanced study of the physiological systems of domestic animals as these systems relate to the integrated functions of the body. Examines topics related to advanced physiological concepts and current literature perspectives on a variety of body systems and processes. Students are expected to have completed introductory coursework in physiology and biochemistry.

AVS 6670 Animal Physiology II 3 (3) Advanced course extending coverage of major and current topics in animal physiology across species not previously covered in AVS 4650. Major topics include digestive physiology in ruminants and ruminant species, reproductive physiology, musculo-

physiology, and general aspects of avian physiology. Students are expected to have completed introductory coursework in physiology and biochemistry.

AVS 6700 Animal Genetics 3 (3) Fundamental prin-
ciples relating to the breeding and improvement of livestock, including variation, heredity, selection, linebreeding, inbreeding, crossbreeding, and other related subjects. Preq: AVS 1500.

AVS 6800 Vertebrate Endocrinology 3 (3) Introduc-
tion to the basic principles of neuro-endocrine integration and homeostatic maintenance in verte-
brates. Comparative morphology and physiology of various endocrine tissues and hormone chemistry and modes of action are considered. Preq: BIOL 3030. Students who have not completed BIOL 3030, but who have completed coursework in organic chemistry, may request an override from the instructor.

AVS 8010 Selected Topics 1-3 (1-3) Current topics of special interest in animal, dairy, or veterinary sci-

cences not covered in other courses. May be repeated for credit. Preq: Consent of coordinating instructor.

AVS 8030 Physiology of Reproduction and Milk Secretion 3 (3) Advanced concepts of steroidogen-

esis, gametogenesis, fertilization, placenta-

tion, embryogenesis, embryonic-endometrial relationships, parturition and lactation and the influence of hormones on these processes. Students evaluate the most recent scientific literature in these areas for information, experimental methods and validity of authors’ conclusions and select a problem, review related literature and write a research proposal for solving the problem. Preq: AVS 4530 and AVS 4610; or consent of instructor.

AVS 8050 Monogastric Nutrition 3 (3) Basic concepts and current research related to nutrient require-

ment and metabolism of poultry, swine and other monogastric species. Preq: NUTR 4010 or NUTR 4510.

AVS 8090 Ruminant Nutrition 3 (3) Microbio-

logical, biochemical and physiological processes involved in the synthesis of amino acids, proteins and B-vitamins; relation of these processes to utilization of proteins, lipids, and fibrous and non-

fibrous feed ingredients; properties and functions of nutrients, nonprotein nitrogen compounds and growth-promoting substances for dairy, beef, cattle and sheep. Preq: NUTR 4010 or consent of instructor.

AVS 8200 Animal and Veterinary Sciences Gradu-

ate Seminar 1 (1) Ongoing research, evaluation of research needs, research techniques, critical reviews and discussions of published research in all areas of the animal, dairy, and veterinary sciences.

AVS 8210 Nutritional Bioenergetics 2 (2) Quantita-
tive approach to the losses of dietary energy during digestion and metabolism; factors governing the energetic efficiency of different biological functions in animals and in regulation of energy balance; body temperature regulation; techniques of calorimetry. Preq: BCHM 6230; and either NUTR 6010 or NUTR 6150; or consent of instructor.

AVS 8220 Special Problems 1-3 (1-3) Laboratory, lecture, oral study of problems related to animal, dairy and veterinary sciences emphasizing development and testing of hypotheses and reporting of results. May be repeated for a maximum of four credits. Preq: Consent of instructor supervising study.

AVS 8250 Immunobiology 3 (3) Conceptual ap-
p proach to immunobiology emphasizing the molecular and cellular aspects. Classical and current literature is the major source for the discussion/lecture format. Offered spring semester only. Preq: Consent of instructor.

AVS 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

AVS 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

BIOCHEMISTRY

BCHM 6060 Physiological Chemistry 3 (3) Studies chemical basis of the mammalian physiological processes of muscle contraction, nerve function, respiration, kidney function, and blood homeosta-
sis. Discusses composition of specialized tissue such as muscle, nerve, blood, and bone and regulation of water, electrolytes, and acid-base balance. Preq: Consent of instructor.

BCHM 6130 Principles of Biochemistry 3 (3) Study of the chemistry of amino acids, monosaccharides, fatty acids, purines, pyrimidines, and associated compounds leads to an understanding of their functions and the relationship between structure and function that makes them important in bio-

logical processes. The use of modern techniques is stressed. Preq: Consent of instructor.

BCHM 6510 Physical Approach to Biochemistry 3 (3) Study of chemical and physical properties of amino acids, lipids, nucleic acids, sugars, and their biopolymers. Physical and mathematical analyses are correlated with biological structure and func-
tion. Preq: Consent of instructor.

BCHM 6520 Biochemistry of Metabolism 3 (3) Study of the central pathway of carbohydrate, lipid, and nucleotide metabolism. Emphasizes bioenergetics, limiting reactions, and the regulation and integration of the metabolic pathways. Preq: Consent of instructor.

BCHM 6530 General Biochemistry Laboratory I 2 (4) Experiments to illustrate current methods used in biochemical research. Preq: Consent of instructor.

BCHM 65340 General Biochemistry Laboratory II 2 (4) Continuation of BCHM 6530. Preq: Consent of instructor.

BCHM 6536 Molecular Biology: Genes to Proteins 3 (3) Examines how nucleic acids and proteins are synthesized in prokaryotic and eukaryotic cells. Designed for students interested in biochemistry, cell biology, molecular biology, and cell physiology. Preq: Consent of instructor.

BCHM 6540 Bioinformatics 3 (3) Theory and ap-
plication of computational technology to analysis of the genome, transcriptome, and proteome. Preq: Consent of instructor.

BCHM 6540 Molecular Basis of Disease 3 (3) Topics in heritable human metabolic disorders, including clinical features and newborn screening, genetic testing, the biochemical basis, and treatment. Preq: Consent of instructor.

BCHM 8050 Issues in Research 3 (3) Scientific writing, oral presentations and critical evaluation of them; legal and ethical issues associated with modern biochemical research. Science job hunting, time management and creativity for professional scientists are treated. Preq: Enrollment in Biochem-

istry and Molecular Biology program.

BCHM 8100 Principles of Molecular Biology 3 (3) Introduction to the principles and techniques used to analyze prokaryotic and eukaryotic gene and genome structure, regulation of transcription initiation, regulation of protein synthesis and protein function. Preq: Enrollment in Biochemistry and Molecular Biology program.

BCHM 8140 Advanced Biochemistry 3 (3) Contem-
porary topics of functional and cellular aspects in biochemistry with particular focus on new observa-
tions, emerging ideas and important techniques. Preq: Consent of instructor.

BCHM 8150 Lipids and Biomembranes 3 (3) Dis-
cusses isolation, chemical and physical properties, and metabolism of lipids; purification, structure, function and biosynthesis of biomembranes. Preq: BCHM 6320 or consent of instructor.
BCHM 8160 Signal Transduction 3 (3) Characteristics and components of signal transduction processes in model species of plants, animals and microbes. Preq: BCHM (GEN) 8100 and GEN (BCHM) 8200, or consent of instructor.

BCHM 8180 Cellular Metabolism 3 (3) Evolution, regulation, characterization and manipulation of metabolic pathways. Preq: BCHM 8140 and GEN (BCHM) 8200, or consent of instructor.

BCHM 8200 Genomics and Proteomics 3 (3) Genomes, transcriptomes and proteomes of a variety of organisms are studied along with the technology used to obtain them. Bioinformatics tools and access to this information are developed, and the significance of this information for the life sciences is made clear. Preq: BCHM 8140 or GEN 8140.

BCHM 8210 Proteins 3 (3) Isolation, composition, structure and properties of proteins; methods of isolation, analysis and characterization; properties of "unusual" protein systems. Preq: BCHM 6230 or 6310 or consent of instructor.

BCHM 8220 Enzymes 3 (3) Kinetics, mechanisms of action, inhibitions and general properties of enzymes. Preq: BCHM 6230 or 6310.

BCHM 8250 Seminar 1 1 (1) Special topics and original research in genetics reviewed by students, faculty and invited lecturers. May be repeated for credit. Preq: Enrollment in Biochemistry and Molecular Biology program.

BCHM 8280 Supramolecular Structure 3 (3) Cellular structures such as viruses, ribosomes and various membrane systems, including rafts and some organelles, are described using modern methods of structural characterization. The methods and the theory of the methods are discussed along with the structures and their functions. Preq: BCHM 8140 or consent of instructor.

BCHM 8320 Structure and Function of Nucleic Acids 3 (3) Physical, chemical and biochemical properties of nucleotides, oligonucleotides, RNA and DNA; antismm oligonucleotides and other unusual structures of RNA and DNA; nucleic acids-protein interactions; nucleic acid-metal interactions; small RNAs and RNA interference; catalytic nucleic acids; nucleic acids repair. Preq: BCHM 8140 or GEN 8140 or consent of instructor.

BCHM 8410 Biochemical Genetics 3 (3) Principles for designing environmentally acceptable land application systems using municipal and industrial wastewater and sludges are presented. Topics include land-limiting constituent analysis; soil-plant interactions; system equipment and design; system operation and management; public acceptance, social, and regulatory issues. Case studies and field trips are planned. Preq: Senior standing.

BE 6100 Biological Kinetics and Reactor Modeling 3 (2) Fundamentals of microbial and biochemical kinetics used in analysis and design of biological systems. Topics include mathematical and computer modeling of biological kinetics and systems, estimating model coefficients, and development of microbial kinetic models as basis for batch and continuous reactor design. Coreq: BE 6101.

BE 6101 Biological Kinetics and Reactor Modeling Laboratory 0 (3) Non-credit laboratory to accompany BE 6100. Coreq: BE 6100.

BE 6120 Heat and Mass Transport in Biosytems Engineering 3 (2) Fundamentals of heat and mass transport used in engineering designs and analysis of biological systems; principles of steady state and transient energy and mass balances, including chemical and biological generation terms. Coreq: BE 6141.

BE 6140 Biosystems Engineering Unit Operations 3 (2) Applies the basic principles of kinetics, dynamics, and thermodynamics to design of mechanical and electrical systems supporting biological operations and processes. Coreq: BE 6141.

BE 6141 Biosystems Engineering Unit Operations Laboratory 0 (3) Non-credit laboratory to accompany BE 6140. Coreq: BE 6140.

BE 6150 Instrumentation and Control for Biosystems Engineers 4 (3) Overview of modern instrumentation techniques and digital electronic components and subsystems to integrate them into digital data acquisition and control systems for biosystems. Laboratory use of equipment is emphasized. Topics include characteristics of instruments, signal conditioning, transducer theory and applications, programmable logic controllers, and digital data acquisition and control. Coreq: BE 6151.

BE 6151 Instrumentation and Control for Biosystems Engineers Laboratory 0 (3) Non-credit laboratory to accompany BE 6150. Coreq: BE 6150.

BE 6170 Applied Instrumentation and Control for Biosystems 2 (1) Hardware and software implementation of digital data acquisition and control systems for application to agriculture, aquaculture, biotechnology, and other biosystems. Topics include digital electronic circuits and components, microcomputer architecture, interfacing, and programming. Preq: BE 4150 or consent of instructor.

BE 6171 Applied Instrumentation and Control for Biosystems Laboratory 0 (3) Non-credit laboratory to accompany BE 6170. Coreq: BE 6170.

BE 6220 Hydrologic Modeling of Small Watersheds 3 (3) Design of structures and development of best management practices for runoff, flood, and sediment control from rural and urban areas, including natural and disturbed watersheds. Topics include modeling of prismatic and non-prismatic channels, culverts, and detention/retention ponds.

BE 6280 Biochemical Engineering 3 (3) Use of microorganisms and enzymes for the production of chemical feedstocks, single-cell protein, antibiotics, and other fermentation products. Topics include kinetics and energetics of microbial metabolism, design and analysis of reactors for microbial growth and enzyme-catalyzed reactions, and considerations of scale-up, mass transfer, and sterilization during reactor design.

BE 6350 Applications in Biotechnology Engineering 3 (2) Bioengineering principles applied to the expanding fields of agricultural biotechnology, ecotechnology, and biomedical technology. Specific applications include waste treatment and ecological engineering, bioreactor propagation of plant and animal cells and tissues, applied genomics and synthetic seed production, biosensors and biomonitoring, biological implants and materials biocompatibility. Coreq: BE 6351.

BE 6351 Applications in Biotechnology Engineering Laboratory 0 (3) Non-credit laboratory to accompany BE 6350. Coreq: BE 6350.

BE 6380 Bioprocess Engineering Design 3 (2) Design and analysis of systems for processing biological materials. Topics include biotechnology, thermodynamics, transport processes, and biological properties related to bioprocess design and computational simulation. Unit operations include basic bioreactor operation, bioseparations, and preservation techniques.

BE 6381 Bioprocess Engineering Design Laboratory 0 (2) Non-credit laboratory to accompany BE 6380. Coreq: BE 6380.

BE 6400 Sustainable Energy Engineering 3 (2) Investigation into merging renewable energy resources, including detailed study of solar, wind, and bioenergy alternatives. Also includes principles, technologies, and performance evaluation of components for these technologies and an introduction to tidal, hydro, geothermal, and other energy; energy conservation; cogeneration; financial, economical, and other issues related to alternative energy sources. Coreq: BE 6401.

BE 6401 Sustainable Energy Engineering Laboratory 0 (2) Non-credit laboratory to accompany BE 6400. Coreq: BE 6400.

BE 6510 Newman Seminar and Lecture Series in Natural Resources Engineering 1 (2) Topics dealing with development and protection of land, air, water, and related resources are covered by seminar with instructor and invited lecturers. Current environmental and/or resource conservation issues are addressed.

BE 6640 Non-Point Source Management in Engineered Ecosystems 3 (2) Fundamentals of non-point source pollution, including quantification of environmental impact and ecosystem management related to contaminants and nutrients and to planning and design of ecological systems. Coreq: BE 6641.

BE 6641 Non-Point Source Management in Engineered Ecosystems Laboratory 0 (3) Non-credit laboratory to accompany BE 6640. Coreq: BE 6640.
BE 6840 Municipal Solid Waste Management 3 [3] Introduction to the problems, regulations, collection, handling, recycling, and disposal of municipal solid wastes in the urban and rural sectors. Emphasizes an integrated waste-management system with resource recovery, composting, incineration, landfill disposals, and their costs.

BE 7810 Special Problems 1-3 [1-3] Students select subjects and conduct library, laboratory and/or field research. A technical report documenting the study is required. May be repeated for a maximum of six credits.

BE 8350 Industrial Biotechnology Techniques 4 [3] Introduces industrial biotechnology techniques with emphasis on bioproduction, pilot bioprocessing equipment operation, biopharmaceutical storage, process simulation and economics, project management, good laboratory practice (GLP), and current good manufacturing practice (cGMP) geared toward the biotechnology industry. Coreq: BE 8351.

BE 8380 Advanced Bioprocess Engineering 3 [3] Advanced bioprocessing techniques with emphasis on processing and modeling aspects of eukaryotic systems and associated bioproducts. Modules include thermal processing, supercritical fluid extraction, and advanced biological thermodynamics, chromatography and spectroscopy.

BE 8650 Advanced Biological/Transport Processes 3 [3] Study of transient transport processes in biological materials and systems. Incorporates mathematics describing active and passive cellular transport. Emphasizes numerical solution techniques for coupled transport relationships in nonideal, heterogeneous systems, including biological kinetic and thermodynamic considerations. Prq: BCHM 3050 and CHE 6010 and MTHS 6340; or consent of instructor.

BE 8710 Selected Topics in Biosystems Engineering 1-3 [1-3] Supervised, in-depth study of an area related to biosystems engineering not covered in other courses. May be repeated for a maximum of six credits.

BE 8910 Master’s Thesis Research 1-12 [1-12] Master’s Thesis Research

BE 9010 Special Problems in Agricultural Engineering 3 [3] Library and/or laboratory research on one of the following subjects, depending on student’s field of study or interests: power and machinery, soil and water resources, farm structures, electric power and processing, food engineering, forest engineering or waste management. A technical report is required.

BIOENGINEERING

BIOE 6120 Orthopaedic Engineering and Pathology 3 [3] Interdisciplinary study of clinical orthopaedic cases (bone growth, bone remodeling, osteoarthritis, implant fixation and joint replacements); biomechanical, biomaterials, tribology and clinical diagnosis of failed implants (total joint replacements, fracture fixation and spinal instrumentation); basic concepts of orthopaedic pathology for engineers. Prq: BIOE 3200 and BIOE 3200 and BIOL 3150; or consent of instructor.

BIOE 6150 Research Principles and Concepts 1 [1] Introduces seniors and graduate students to principles and practices of scientific research. Topics include developing scientific concepts, developing projects, pursuing research, collaborating in multidisciplinary teams, patenting and publishing technical and scientific information, and reviewing professional and ethical standards.

BIOE 6230 Cardiovascular Engineering and Pathology 3 [3] Medical and bioengineering aspects of artificial cardiovascular and vascular devices; physiology and pathological aspects of patients with need for such devices; diagnostic techniques and surgical management of diseases and pathologies; design aspects of current devices and selection state of the art in experiments and human clinical trials. Prq: BIOE 3200 and BIOE 3210 and BIOL 3150; or consent of instructor.

BIOE 6310 Medical Imaging 3 [2] Introduction to the history, physics, and basis of medical imaging devices; including X-ray, Computed Tomography, Magnetic Resonance Imaging, and Ultrasound. Students will understand imaging from both an engineering and clinical prospective. Students will have the opportunity to work with real medical images, to understand the trade-offs between modalities. Prq: MTHS 2080; and one of ECE 2020 or BIOE 2020 and consent of instructor.

BIOE 6311 Medical Imaging Laboratory 0 [2] Non-credit laboratory to accompany BIOE 6310. Coreq: BIOE 6310.

BIOE 6350 Computer Modeling of Multiphysics Problems 3 [3] This course will introduce students to a holistic way to deal with complicated engineering problems using a computer modeling approach. For example, a real-world problem governed by combined mechanical, electrical, thermal, electrochemical and mass-transport phenomena will be dealt with in an integrated and multidisciplinary way rather than the conventional piece-wise single-discipline way. Prq: MTHS 2080.

BIOE 6400 Biotechnology for Bioengineers 3 [3] Explores the principles necessary to use microorganisms, tissue culture, and enzymes in bioengineering applications, including molecular techniques, fermentation, process scale-up, purification processes, and FDA regulations. Emphasizes production of biopharmaceuticals derived from recombinant systems, including uses in medical systems. Prq: BCHM 3050 or consent of instructor.

BIOE 6710 Biophotonics 3 [3] Biophotonics is an interdisciplinary subject of applying photonics to study biological samples from individual cells to the entire body. Introduces fundamental and frontier topics in optical imaging aspects of biophotonics for senior-level undergraduates and graduate students to gain the ability to solve bioimaging-related biomedical problems. Prq: MTHS 2080; and PHYS 2210; and either ECE 3070 or ECE 3200; or consent of instructor.

BIOE 6820 Biomaterial Implantology 3 [2] Provides training in the planning and conduct of experimental surgery, including laws and regulations; institutional requirements; selection of animal models; ethical considerations of animal research; preparation of animals for surgery; general and special surgical techniques; aseptic surgical techniques; and basic and applied instrumentation. Prq: Junior standing in Bioengineering. Coreq: BIOE 6821.

BIOE 8000 Seminar in Bioengineering Research 1-3 [1-3] Original research in bioengineering; weekly one-hour seminar associated with weekly recitation covering seminar preparation, presentation, professional writing, bioengineering ethics and related topics. To be taken Pass/No Pass only.

BIOE 8010 Biomaterials 3 [3] Structure and properties of the main classes of materials used in artificial organs and surgical implants; metals, ceramics, polymers, composites and materials of biological origin; mechanical properties, corrosion and design. Prq: Consent of instructor.

BIOE 8020 Compatibility of Biomaterials 3 [1] Determining compatibility of biomaterials with the physiological environment; optical microscopy, microangiography and ultraviolet fluorescence; normal histology of tissues, basic pathological reactions and tissue reactions to materials. Coreq: BIOE 8021.

BIOE 8021 Compatibility of Biomaterials Laboratory 0 [6] Non-credit laboratory to accompany BIOE 8020. Coreq: BIOE 8020.

BIOE 8030 Polymeric Biomaterials 3 [3] Interplay of physicochemical properties of polymeric materials and the design of biomedical devices and their in vitro and in vivo performance; critical manufacturing aspects of selected augmentation and prosthetic devices for soft and hard tissues; analysis of case studies and reports on recent research findings. Prq: Consent of instructor.

BIOE 8070 Nanotechnology and Biomaterials 3 [3] The emerging field of nanotechnology and its relation to solving bioengineering and health-related problems is treated. Also considers the promise of nanotechnology in the creation and utilization of materials and devices at the level of atoms and molecules. New scientific approaches, research tools, clinical tools, and devices are presented.
BIOE 8110 Sterilization and Cleaning Engineering for Medical Devices 3 (2) Detailed overview of sterilization, cleaning and packaging requirements for reprocessing medical devices. Emphasizes evaluation methods for materials analysis, biocompatibility, and sterilization/cleaning methods in manufacturing and healthcare sectors. Compliance with industry and government regulations are addressed, including packaging processes, container types, and equipment design and processing for sterilization and cleaning. Preq: BIOE 8010 or consent of instructor. Coreq: BIOE 8111.

BIOE 8111 Sterilization and Cleaning Engineering for Medical Devices Laboratory 0 (3) Non-credit laboratory to accompany BIOE 8110. Coreq: BIOE 8111.

BIOE 8130 Industrial Bioengineering 3 (3) A broad-based understanding of industry-related functions; knowledge base to allow a bioengineering graduate to quickly adapt to an industrial career in medical device research and development, and understand the additional roles and interplay between quality, sales, product development methodology, and regulatory. Preq: Bioengineering student and consent of instructor.

BIOE 8140 Medical Device Commercialization 3 (3) Overview of design control and regulations for medical device reprocessing and their practical application in the scope of project management and commercialization. Introduction to a cross-disciplinary approach for launching and marketing a new device, including device lifecycle management and intellectual property laws relative to the medical device reprocessing industry. Preq: Consent of instructor.

BIOE 8150 Design, Manufacturing and Validation Methods for Reusable Medical Devices 3 (3) Overview of design theories, methods and best practices governing the medical device reprocessing industry. Materials, fabrication processes and manufacturing techniques with an emphasis on remanufacturing, reprocessing and sustainability. Knowledge and skills needed to comply with process verification and validation requirements for Quality System Regulations with emphasis on a reprocessing approach. Preq: BIOE 8110 or consent of instructor.

BIOE 8200 Structural Biomechanics 3 (3) Mechanical functions of the human body treated as an engineering structure and the devices used to assist and supplement these functions; movement of the musculoskeletal system; locomotion; gait;prehension; lifting; function of artificial limbs; orthopedic prostheses and braces; effect of vibration and impact on the body; mathematical and other models of the body. Preq: Consent of instructor.

BIOE 8240 Cellular and Molecular Analysis in Tissue Engineering 4 (3) Describes the molecular basis for cell regulation by extracellular stimuli including growth factors, matrix and force. Also describes theoretical and laboratory instruction in research methods used to analyze cellular signaling and functional response in the design and evaluation of tissue engineering constructs. Preq: BIOE 8490 or consent of instructor. Coreq: BIOE 8241.

BIOE 8241 Cellular and Molecular Analysis in Tissue Engineering Laboratory 0 (3) Non-credit laboratory to accompany BIOE 8240. Coreq: BIOE 8240.

BIOE 8250 Cardiac Pathophysiology and Pharmacology 3 (3) Advanced structural and functional aspects of the cardiovascular system, including cardiac physiology and cellular electromechanical physiology, pathological processes and congenital defects of the cardiovascular system as depicted in an invasive cardiovascular laboratory. Standard cardiovascular pharmacologic agents are discussed as they relate to the electrophysiology patient. Preq: BIOE 3700 and BIOE 3150 and consent of instructor.

BIOE 8260 Cardiac Electrophysiology Laboratory 3 (9) Introduction to procedure room preparation, aseptic technique, regulatory compliance, patient identification and procedural consent; medical record and laboratory results review; and appropriate conduct with patients and staff. Instruction on identification and use of standard surgical instruments, cardiac catheter placement and potential complications. Calibration and assessment of intracardiac and intra-arterial pressure waveforms. Preq or concurrent enrollment: BIOE 8250; or consent of instructor.

BIOE 8265 Cardiac Electrophysiology and Arrhythmias 3 (3) Recording and interpreting electrocardiograms (ECC). Identification and measurement of ECG waveforms, parameters, recording errors and artifacts. Use of standard ECGs, Holter and event monitors, implantable loop recorders, stress test, signal averaged ECGs, TWave alternans testing. Mechanisms of arrhythmias, formation and methods of pharmacologic and interventional treatments. Preq or concurrent enrollment: BIOE 8260; or consent of instructor.

BIOE 8266 Implantable Cardiac Devices Laboratory 0 (6) Non-credit laboratory to accompany BIOE 8260. Coreq: BIOE 8260.

BIOE 8290 Interventional Electrophysiology Procedures 3 (1) Interventional electrophysiology procedures, including baseline interval measurements, pulse stimulator control for diagnostic information, conduction system and refractory periods assessment. Supraventricular and ventricular tachyarrhythmias assessment, post-pacing and pacing protocols; radiofrequency ablation and complications; radiofrequency generator and irrigated tip ablation systems and transeptal punctures. Preq: BIOE 8260 and BIOE 8270, or consent of instructor. Coreq: BIOE 8291.

BIOE 8291 Interventional Electrophysiology Procedures Laboratory 0 (6) Non-credit laboratory to accompany BIOE 8290. Coreq: BIOE 8290.

BIOE 8300 Interventional Electrophysiology Imaging 2 (6) Methods of imaging utilized during electrophysiologic procedures. Three-dimensional CT images of the heart eating; echocardiographic planar images for three-dimensional cardiac chambers; standard radiographic imaging techniques, including rotational angiography; 3D electroanatomic maps for arrhythmia assessment and ablation treatment. Preq or concurrent enrollment: BIOE 8290; or consent of instructor.

BIOE 8310 Advanced Electrophysiology Procedures 2 (6) Electrophysiologic procedures and methods to treat atrial fibrillation and ventricular tachycardia; recording, imaging, mapping and ablative methods; and setup and maintenance of robotic mapping and ablation. Preq: BIOE 8280 and BIOE 8290; or consent of instructor.

BIOE 8320 Advanced Electrophysiology Problem Solving 2 (6) Trouble shooting of electrical noise, grounding problems, fractured cables, insulation breaks, computer and imaging errors. Covers treatment of complications from procedures such as respiratory failure, cardiac tamponade, cardiac source, stroke, loss of pacing capture, use of transcatheter pacing, external defibrillation, inappropriate shocks, placement of pericardial drains, chest tubes, and hemoptysis expansion. Preq or concurrent enrollment: BIOE 8310; or consent of instructor.

BIOE 8460 Biomedical Basis for Engineered Replacement 3 (3) Form and function of human organs, major systems and examples of engineering repair and replacement methods are presented in light of pathological or traumatic organ malfunction. Core course for all Bioengineering graduate students, taken preferably during their first fall semester.

BIOE 8470 Transport Processes in Bioengineering 4 (4) Mathematical modeling of blood flow through capillaries and solute transfer from capillaries to tissues by diffusion and convection, pharmacokinetic analysis of drug adsorption, transport and elimination routes in body, and analysis of the design and performance of extracorporeal devices for organ replacement, including hemodialysis, blood oxygenation and immobilized enzyme reactors. Preq: MTHS 2080.

BIOE 8480 Cellular Interactions with Biomaterials 4 (2) Cell biological concepts and issues relevant to cell-biomaterial interactions; methods for studying cell structure and function including basic cell culture techniques and in vitro biocompatibility analyses; biomaterial physio-chemical properties which influence cellular interactions; interactions between implant materials and host tissues at the cellular and molecular level; overview of tissue engineering. Coreq: BIOE 8481.

BIOE 8481 Cellular Interactions with Biomaterials Laboratory 0 (2) Non-credit laboratory to accompany BIOE 8480. Coreq: BIOE 8480.

BIOE 8490 Tissue Engineering 3 (3) Principles and practices of bioartificial organ and tissue development; cellular/material interaction and translation of information from two-dimensional surfaces to three-dimensional scaffolds; selection and processing of biomaterials to form tissue scaffolds; analysis of tissue engineered devices, standards and regulations. Preq: BIOE 8010 and BIOE 8460.
BIOE 8500 Selected Topics in Biomedical Engineering 1-4 (1-4) Advanced topics in bioengineering intended to develop in-depth areas of particular student interest. Credit may be earned for more than one semester. Prereq: Consent of instructor.

BIOE 8700 Bioinstrumentation 3 (2) Concepts and techniques of instrumentation in bioengineering emphasizing effects of instrumentation on the biological system under investigation; transducers and couplers; data conversion; conditioning and transmission; experimental problems in acute and chronic procedures with static and dynamic subjects. Coreq: BIOE 8701.

BIOE 8701 Bioinstrumentation Laboratory 0 (2) Non-credit laboratory to accompany BIOE 8700. Coreq: BIOE 8700.

BIOE 8820 Biomaterials Implantology 4 (2) All phases of experimental surgery including selection of animal models, preparation of animals for surgery, general and special surgical techniques, and basic and applied instrumentation. Prereq: BIOL 4590. Coreq: BIOE 8821.

BIOE 8821 Biomaterials Implantology Laboratory 0 (6) Non-credit laboratory to accompany BIOE 8820. Coreq: BIOE 8820.

BIOE 8900 Internship 1.5-1.5 (1-5) Observation and assignment in a medical college, dental college, hospital, veterinary clinic, dental clinic, health service, or industrial department. Prereq: Consent of department chair.

BIOE 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

BIOE 8920 Non-thesis Independent Study in Bioengineering 1-6 (1-6) Independent study in bioengineering for work necessary to complete requirements for the Master of Science degree in Bioengineering, non-thesis option. May be repeated for additional credit. To be taken Pass/No Pass only.

BIOE 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

### BIOLOGY

BIOI 6000 Insect Morphology 4 (3) Study of insect structure in relation to function and of the variation of form in insects. Students are expected to have completed coursework in insect biology before enrolling in this course. Coreq: BIOL 6001.

BIOI 6001 Insect Morphology Laboratory 0 (3) Non-credit laboratory to accompany BIOI 6000. Coreq: BIOI 6000.

BIOI 6010 Plant Physiology 3 (3) Relations and processes pertaining to maintenance, growth, and reproduction of plants, including absorption of matter and energy, water relations of the plant, utilization of reserve products and liberation of energy. Coreq: BIOI 6010.

BIOI 6200 Plant Physiology Laboratory 1 (3) Laboratory exercises and experiments designed to indicate the relations and processes which pertain to maintenance, growth, and reproduction of plants, including absorption of matter and energy, water relations of the plant, utilization of reserve products, and liberation of energy. Prereq or concurrence: BIOI 6010.

BIOI 6501 Insect Taxonomy 3 (1) Identification of the principal families of the major orders of adult insects. Laboratory work consists of intensive practice of such identification. Lecture material deals with theoretical discussion of taxonomic features observed in the laboratory. Students are expected to have completed coursework in insect biology before enrolling in this course. Coreq: BIOI 6510.

BIOI 6510 Marine Biology 3 (3) Survey of the organisms that live in the sea and their adaptations to the marine environment. Emphasizes characteristics of marine habitats, organisms, and the ecosystems.

BIOI 6511 Limnological Analyses 2 (1) Examine a broad range of topics covered with both standing and running freshwater. About one-third of the laboratory exercises address the major physical components of lakes and streams. The remainder provides rationale and methods for quantitative analyses of them, as well as some integrated analyses of whole ecosystems. Prereq or concurrence: BIOI 6100. Coreq: BIOL 6111.

BIOI 6512 Limnological Analyses Laboratory 0 (2) Non-credit laboratory to accompany BIOI 6110. Coreq: BIOI 6140.

BIOI 6540 Basic Immunology 3 (3) Introduction to the immune system of vertebrate animals, with an emphasis on structure, function, regulation, and cellular and molecular mechanisms of immune responses. Students are expected to have completed coursework in cell biology and introductory microbiology before enrolling in this course.

BIOI 6550 Insect Taxonomy 3 (1) Identification of the principal families of the major orders of adult insects. Laboratory work consists of intensive practice of such identification. Lecture material deals with theoretical discussion of taxonomic features observed in the laboratory. Students are expected to have completed coursework in insect biology before enrolling in this course. Coreq: BIOI 6510.

BIOI 6560 Insect Behavior 3 (2) Fundamentals of insect behavior in an evolutionary and ecological perspective. Laboratory emphasizes generation and testing of hypotheses and observation, description, and quantification of insect behavior. Students are expected to have completed coursework in insect biology before enrolling in this course. Coreq: BIOI 6561.

BIOI 6690 Comparative Vertebrate Morphology 3 (3) Phylogeny and diversity of vertebrates and study of their comparative morphology, leading to an understanding of the relationships and functioning of living organisms. Coreq: BIOL 6090.

BIOI 6700 Introductory Plant Taxonomy 3 (1) Introduction to the basic principles and concepts of plant systematics with emphasis on the plants of South Carolina. Coreq: BIOL 6070.

BIOI 6701 Plant Taxonomy Laboratory 1 (3) Field identification of plants and plants in the field. Prereq or concurrent enrollment: BIOI 6060.

BIOI 6702 Plant Taxonomy Laboratory 0 (2) Non-credit laboratory to accompany BIOL 6150.

BIOI 6703 Plant Systematics Laboratory 0 (3) Study the relationships and functioning of plants in the laboratory. Students are expected to have completed coursework in plant systematics with emphasis on the plants of South Carolina. Prereq or concurrence: BIOI 6060.

BIOI 6704 Plant Systematics Laboratory 1 (3) Study the relationships and functioning of plants in the laboratory. Students are expected to have completed coursework in plant systematics with emphasis on the plants of South Carolina. Prereq or concurrent enrollment: BIOI 6060.

BIOI 6705 Plant Systematics Laboratory 2 (1) Study the relationships and functioning of plants in the laboratory. Students are expected to have completed coursework in plant systematics with emphasis on the plants of South Carolina. Prereq or concurrent enrollment: BIOI 6060.

BIOI 6706 Plant Systematics Laboratory 3 (3) Study the relationships and functioning of plants in the laboratory. Students are expected to have completed coursework in plant systematics with emphasis on the plants of South Carolina. Prereq or concurrent enrollment: BIOI 6060.

BIOI 6707 Plant Systematics Laboratory 4 (3) Study the relationships and functioning of plants in the laboratory. Students are expected to have completed coursework in plant systematics with emphasis on the plants of South Carolina. Prereq or concurrent enrollment: BIOI 6060.
BIOL 6400 Developmental Animal Biology 3 (3)
Events and mechanisms responsible for the development of multicellular animals. Gametogenesis, fertilization, embryonic development, cellular differentiation, morphogenesis, larval forms and metamorphosis, asexual reproduction, regeneration, malignancy, and aging are analyzed in terms of fundamental concepts and control processes. Students are expected to have completed coursework in biochemistry before enrolling in this course.

BIOL 6410 Ecology 3 (3)
Study of basic ecological principles underlying the relationships between organisms and their biotic and abiotic environments. Includes physiological, population, and community ecology, with applications of each to human ecological concerns.

BIOL 6420 Biogeography 3 (3)
Study of patterns of distribution of plants and animals in space and time.

BIOL 6430 Freshwater Ecology 3 (3)
Study of basic ecological principles and concepts as they apply to freshwater environments: rivers and streams, wetlands, lakes and ponds, and reservoirs.

BIOL 6440 Freshwater Ecology Laboratory (Lecture Portion) 2 (1)
Laboratory-based course providing a synthesis of major components of freshwater ecosystems. Activities are hypothesis driven and relate to each other to form an overall synthesis of the field. Hands-on experience allows engagement in creative inquiry. Prq or concurrent enrollment: BIOL 6430. Coreq: BIOL 6441.

BIOL 6441 Freshwater Ecology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6440. Coreq: BIOL 6440.

BIOL 6450 Ecology Laboratory (Lecture Portion) 2 (1)
Modern and classical approaches to the study of ecological problems discussed in BIOL 6410. Students are introduced to field, laboratory and computer-based analyses of plant and animal populations and communities. Prq or concurrent enrollment: BIOL 6410. Coreq: BIOL 6451.

BIOL 6451 Ecology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6450. Coreq: BIOL 6450.

BIOL 6460 Plant Ecology 3 (3)
Ecology of plants in relation to their biotic and abiotic environments. Individual organisms, populations, and communities are considered with an emphasis on seed plants in terrestrial environments.

BIOL 6470 Plant Ecology Laboratory (Lecture Portion) 2 (1)
Experimental and observational approach to addressing principles discussed in BIOL 6460. Students are introduced to field and laboratory methods involving individual organisms, populations, and communities. Prq or concurrent enrollment: BIOL 6460. Coreq: BIOL 6471.

BIOL 6471 Plant Ecology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6470. Coreq: BIOL 6470.

BIOL 6500 Developmental Biology Laboratory (Lecture Portion) 2 (1)
Examines a broad range of topics concerned with the development of multicellular animals such as gametogenesis, fertilization, embryonic development, cell differentiation, morphogenesis, larval metamorphosis, and regeneration. Laboratory exercises provide the rationale and methods for the descriptive and experimental analysis of development in representative invertebrates and vertebrates. Prq or concurrent enrollment: BIOL 6400. Coreq: BIOL 6501.

BIOL 6501 Developmental Biology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6500. Coreq: BIOL 6500.

BIOL 6540 Plant Virology 4 (3)
Study of plant viruses: their morphology, biochemistry, purification, and transmission; symptoms resulting from virus infection; virus-vector relationships. Serological and nucleic acid hybridization procedures. Diagnosis of viral diseases and the identification of causal agents. Replication of plant viruses, the interaction between viral host and plant genome. Control of plant viral diseases. Students are expected to have completed coursework in biochemistry or introductory microbiology before enrolling in this course. Coreq: BIOL 6541.

BIOL 6541 Plant Virology Laboratory 0 (3)
Non-credit laboratory to accompany BIOL 6540. Coreq: BIOL 6540.

BIOL 6560 Medical and Veterinary Parasitology 3 (3)
Introduction to parasitism in the animal kingdom. Emphasizes basic and applied principles related to economically and medically important diseases. Classical and experimental approaches to the study of parasitism are examined in reference to protozoa, nematodes, and arthropods.

BIOL 6561 Medical and Veterinary Parasitology Laboratory (Lecture Portion) 2 (1)
Laboratory to reinforce material presented in BIOL 6560. Introduces students to both live and preserved human/animal parasites. Also introduces techniques used in collection, preservation, and examination of animal parasites. Prq or concurrent enrollment: BIOL 6560. Coreq: BIOL 6561.

BIOL 6567 Medical and Veterinary Parasitology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6560. Coreq: BIOL 6560.

BIOL 6580 Cell Physiology 3 (3)
Study of the chemical and physical principles of cell function emphasizing bioenergetics and membrane phenomena. Students are expected to have completed coursework in biochemistry before enrolling in this course.

BIOL 6590 Systems Physiology 3 (3)
Physiological systems of vertebrates and their homeostatic controls. Describes the function of the major physiological systems in terms of anatomical structure and chemical and physical principles. Students are expected to have completed coursework in physics before enrolling in this course.

BIOL 6600 Systems Physiology Laboratory (Lecture Portion) 2 (1)
Modern and classical experimental methods are used to demonstrate fundamental physiological principles discussed in BIOL 6590. Students are introduced to computersided data acquisition and computer simulations of physiological function. Prq or concurrent enrollment: BIOL 6590. Coreq: BIOL 6601.

BIOL 6601 Systems Physiology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6600. Coreq: BIOL 6600.

BIOL 6610 Cell Biology 3 (3)
In-depth analysis of how and where intracellular and extracellular molecules control general and specific cellular functions such as gene expression, secretion, motility, signaling, cell-cycle control and differentiation. Taught and graded at a level where students are expected to infer from and integrate cellular events. Students are expected to have completed coursework in biochemistry before enrolling in this course.

BIOL 6620 Cell Biology Laboratory (Lecture Portion) 2 (1)
Laboratory to accompany BIOL 6610. Focuses on molecular and microscopic analysis of eukaryotic cells. Prq or concurrent enrollment: BIOL 6610. Coreq: BIOL 6621.

BIOL 6640 Freshwater Ecology 3 (3)
Study of basic ecological principles and concepts as they apply to freshwater environments: rivers and streams, wetlands, lakes and ponds, and reservoirs.

BIOL 6641 Freshwater Ecology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6640. Coreq: BIOL 6640.

BIOL 6642 Freshwater Ecology Laboratory 0 (2)
Non-credit laboratory to accompany BIOL 6642. Coreq: BIOL 6642.

BIOL 6660 Evolution of Human Behavior 3 (3)
Familiarizes students with the evolutionary basis of human behavior. Examines topics such as altruism, cooperation, mating systems, parental investment, and social systems using diverse examples, from hunter-gatherer to technological societies. Students are expected to have completed coursework in anthropology, evolutionary biology, or behavioral ecology before enrolling in this course.

BIOL 6680 Herpetology 4 (3)
Physiology, functional morphology, ecology, evolution, biomechanics and current literature of amphibians and reptiles. Laboratory study examines morphology and identification of world families and United States genera, as well as southeastern species. Field trips are required. Coreq: BIOL 6681.

BIOL 6681 Herpetology Laboratory 0 (3)
Non-credit laboratory to accompany BIOL 6680. Coreq: BIOL 6680.

BIOL 6690 Aquatic Insects 3 (3)
Identification, life history, habitats, and interrelationships of aquatic insects; techniques of qualitative field collecting; important literature and research workers. Students are expected to have completed coursework in insect biology before enrolling in this course. Coreq: BIOL 6691.

BIOL 6691 Aquatic Insects Laboratory 0 (6)
Non-credit laboratory to accompany BIOL 6690. Coreq: BIOL 6690.

BIOL 6700 Behavioral Ecology 3 (3)
Historical and modern developments in animal behavior emphasizing the evolutionary and ecological determinants of behavior. A synthesis of ethology and comparative psychology.
Courses of Instruction

BIOL 6710 Behavioral Ecology Laboratory (Lecture Portion) 2 (1) Laboratory exercises that explore the behavior of animals. Emphasizes behavioral observation and analysis and presentation of findings in a report format. Includes a semester-long independent research project. Preq or concurrent enrollment: BIOL 6700. Coreq: BIOL 6711.

BIOL 6711 Behavioral Ecology Laboratory 0 (2) Non-credit laboratory to accompany BIOL 6710. Coreq: BIOL 6710.

BIOL 6720 Ornithology 4 (3) Biology of birds: their origin and diversification, adaptations, phylogeny, classification, structure and function, behavior, ecology, and biogeography. Field identification is emphasized, and field trips are required. Coreq: BIOL 6721.

BIOL 6721 Ornithology Laboratory 0 (3) Non-credit laboratory to accompany BIOL 6720. Coreq: BIOL 6720.

BIOL 6730 History of Modern Biology 3 (3) Examines the intellectual and social factors defining the study of life from the scientific revolution of the 1600s to the modern biological sciences. Investigates the historical origins of biological disciplines and explores the differing cultures, methodologies, and philosophical commitments of these communities.

BIOL 6740 Primatology 4 (3) Biology of nonhuman primates, including their evolution, taxonomy, physiology, life history, behavioral ecology and conservation. Three field trips are required, during which students conduct behavioral observations and later analyze their data and present it in report format. Coreq: BIOL 6741.

BIOL 6741 Primatology Laboratory 0 (3) Non-credit laboratory to accompany BIOL 6740. Coreq: BIOL 6740.

BIOL 6750 Comparative Physiology 3 (3) Physiological systems of invertebrates and vertebrates emphasizing environmental adaptation. Physiological principles as they relate to metabolism, thermoregulation, osmoregulation, respiration, and neural and integrative physiology.

BIOL 6760 Comparative Physiology Laboratory (Lecture Portion) 2 (1) Modern classical experimental methods are used to demonstrate fundamental physiological principles discussed in BIOL 6750. Introduces students to computer-aided data acquisition and manipulation as well as computer simulations of physiological function. Preq or concurrent enrollment: BIOL 6750. Coreq: BIOL 6761.

BIOL 6761 Comparative Physiology Laboratory 0 (2) Non-credit laboratory to accompany BIOL 6760. Coreq: BIOL 6760.

BIOL 6770 Ichthyology 3 (2) Systematics, life history, distribution, ecology, and current literature of fish. Laboratory study of morphology and identification of U.S. genera, as well as all southeastern species. Field trips are required. Coreq: BIOL 6771.

BIOL 6771 Ichthyology Laboratory 0 (3) Non-credit laboratory to accompany BIOL 6770. Coreq: BIOL 6770.

BIOL 6780 Vertebrate Endocrinology 3 (3) Introduction to the basic principles of neuro-endocrine integration and homeostatic maintenance in vertebrates. Comparative morphology and physiology of various endocrine tissues and hormone chemistry and modes of action are considered. Students are expected to have completed coursework in biochemistry before enrolling in this course.

BIOL 6780 Laboratory Techniques for Teaching Embryology 0 (2) Focuses on the embryology of amphibians. Students learn and practice interpretation, presentation, and theoretical aspects of developmental biology at the cellular level. Laboratory research project in which various behaviors are shown; empirical data sets and population genetics analyses programs are used. Prerequisite: BIOL 6780. Coreq: BIOL 6781.

BIOL 6781 Laboratory Techniques for Teaching Embryology 0 (2) Non-credit laboratory to accompany BIOL 6780. Coreq: BIOL 6780.

BIOL 6790 Vertebrate Endocrinology 3 (3) Focuses on the embryology of amphibians. Students learn and practice interpretation, presentation, and theoretical aspects of developmental biology at the cellular level. Laboratory research project in which various behaviors are shown; empirical data sets and population genetics analyses programs are used. Prerequisite: BIOL 6780. Coreq: BIOL 6781.

BIOL 6800 Vertebrate Endocrinology 3 (3) Introduction to the basic principles of neuro-endocrine integration and homeostatic maintenance in vertebrates. Comparative morphology and physiology of various endocrine tissues and hormone chemistry and modes of action are considered. Students are expected to have completed coursework in biochemistry before enrolling in this course.

BIOL 6810 Web Design for the Life Sciences and Agriculture 3 (2) Addresses basic principles and theories of Web design and site construction, including usability and accessibility considerations. Web and graphics design software are used to develop sites suitable for life science and agricultural organizations. Service-learning is used with student projects. Coreq: BIOL 6811.

BIOL 6811 Web Design for the Life Sciences and Agriculture 0 (2) Non-credit laboratory to accompany BIOL 6810. Coreq: BIOL 6810.

BIOL 6820 Laboratory Techniques for Teaching Ecology 3 (1) Focuses on the technical skills used to plan, prepare, and conduct inquiry-based laboratories and to familiarize preservice teachers with a variety of scientific equipment and their methodologies. Topics include ways to integrate technology into the classroom, lab safety and the development of inquiry-based classroom activities. Coreq: BIOL 6821.

BIOL 6821 Laboratory Techniques for Teaching Ecology 0 (2) Non-credit laboratory to accompany BIOL 6820. Coreq: BIOL 6820.

BIOL 6830 Stem Cell Biology 3 (3) Stem cells are the focus of intense interest because of their utility for treating human diseases. This course provides a broad treatment of the biology of stem cells and assesses their current therapeutic capacity in clinical medicine. Students are expected to have completed coursework in cell biology before enrolling in this course.

BIOL 6840 Human and Comparative Vertebrate Embryology 3 (3) Study of human and comparative embryology with an introduction to related clinical correlations. Students develop an understanding of normal and abnormal human and comparative vertebrate embryonic development.

BIOL 6850 Human and Comparative Vertebrate Embryology 0 (2) Non-credit laboratory to accompany BIOL 6840. Coreq: BIOL 6850.

BIOL 6860 Electron and Optical Microscopy Theory 3 (2) Offers a theoretical and practical introduction to light and electron microscopy. Topics include Koehler illumination, polarization, interference, phase contrast, DIC epifluorescence, laser scanning light microscopy, SEM, TEM, EDS, ultramicrotomy, tomography, and digital imaging. Preq or concurrent enrollment: BIOL 6870. Coreq: BIOL 6871.

BIOL 6870 Electron and Optical Microscopy Laboratory 0 (2) Non-credit laboratory to accompany BIOL 6860. Coreq: BIOL 6860.

BIOL 7300 SC Life: Topics for Teachers 3 (2) Topics relating to the SC Life curriculum. Lectures, laboratories and extensive field studies focus on the natural history and biodiversity of South Carolina. Restricted to elementary and secondary school teachers. May be repeated for credit, but only if different topics are covered. Preq: Consent of instructor. Coreq: BIOL 7301.

BIOL 7301 SC Life: Topics for Teachers Laboratory 0 (2) Non-credit laboratory to accompany BIOL 7300. Coreq: BIOL 7300.
BIOL 8110 Immunotoxicology 3 (3) Study of how environmental contaminants, drugs and natural biotoxins affect the immune system of man and animals; cellular and molecular mechanisms of action by immunotoxic agents. Students are expected to have completed coursework in immunology before enrolling in this course. Prereq: BIOL 8240, Coreq: BIOL 8420.

BIOL 8120 Seminar 1 (1) Presentation of current topics in biological sciences. May be repeated for a maximum of four credits. To be taken Pass/No Pass only. Prereq: Enroll in a graduate Biological Sciences or Microbiology program.

BIOL 8130 Graduate Teaching Assistant Colloquium 1 (1) Designed for graduate teaching assistants (GTAs) during their first year of laboratory instruction. Covers a variety of topics designed to prepare GTAs for departmental instructional duties, as well as information concerning safety and professional ethics in the laboratory classroom. To be taken Pass/No Pass only. Prereq: Graduate teaching assistant in Biological Sciences.

BIOL 8160 Advanced Ecosystem Analysis 4 (3) Description and analysis of ecological systems; biogeochemical, physicochemical and ecological principles emphasizing fundamental unity of ecosystems and their abiotic environment. Laboratory focuses on application of theory to actual field and laboratory research problems. Students are expected to have completed coursework in ecosystem ecology before enrolling in this course.

BIOL 8161 Advanced Ecosystem Analysis Laboratory 0 (3) Non-credit laboratory to accompany BIOL 8160. Coreq: BIOL 8160.

BIOL 8200 Community Ecology 3 (3) Examines species interactions in plant and animal communities and uses experimental, observational and theoretical approaches to study competition, predation, facilitation, habitat selection and succession. Emphasizes how species diversity is maintained and the consequences of diversification at local and regional scales. Students are expected to have completed coursework in ecology before enrolling in this course.

BIOL 8210 Inorganic Plant Metabolism 3 (3) Study of plant, soil, water and nutrient relations. Topics include permeability, uptake and translocation, transpiration and mineral nutrition. Students are expected to have completed coursework in plant physiology before enrolling in this course.

BIOL 8220 Organic Plant Metabolism 3 (3) Discusses respiration and photosynthesis; synthesis, translocation, storage, transformation and degradation of organic materials, fats, carbohydrates, proteins, pigments and nucleic acids. Students are expected to have completed coursework in plant physiology and biochemistry before enrolling in this course.

BIOL 8240 4 (3) Study of the physiology and biochemistry of both natural and synthetic growth regulators, hormones, growth retardants, herbicides and other inhibitors. Considers methodology and mechanism of action. Students are expected to have completed coursework in plant physiology and biochemistry before enrolling in this course. Coreq: BIOL 8241.

BIOL 8241 Mode of Action of Growth Substances Laboratory 0 (3) Non-credit laboratory to accompany BIOL 8240. Coreq: BIOL 8240.

BIOL 8250 Comparative and Veterinary Immunology 3 (3) Survey of the evolutionary relationships, the physiology and the cellular/molecular biology of the immune systems of animals; demonstrations that focus on those animals having high economic input, biomedical importance, or a key ecological position; current research with a historical perspective. Students are expected to have completed coursework in immunology before enrolling in this course.

BIOL 8260 Epigenetics in Eukaryotes 3 (3) Focuses on epigenetics in eukaryotes and discusses how epigenetic changes modulate gene expression and post-translational modification. Topics include specific decorations of the DNA, the proteins that help compact DNA, and the importance of chromatin structure in maintaining characteristics of cell or organism, such as immortalization or aging. Students are expected to have completed coursework in cell biology or genetics before enrolling in this course.

BIOL 8300 Mechanistic Toxicology 3 (3) Detailed biochemical toxicology; control, regulation and activity of metabolic enzymes; molecular and cellular mechanisms of toxic action; proposed mechanisms for initiation and development of cancer; mode of action and kinetics of cholinesterase inhibitors; structure/activity relationships of ion channel blockers; biochemical and molecular biomarkers. Coreq: BIOL 8310 and BIOL 8310.

BIOL 8310 Biomarkers in Toxicology 3 (1) Methodology used in biomarker identification and evaluation of the effects of toxic substances on living systems using biomarkers in sentinel organisms and surrogate biomarkers. Students are expected to have completed coursework in organic chemistry and coursework in laboratory in biochemistry before enrolling in this course. Coreq: BIOL 8300 and BIOL 8300.

BIOL 8311 Biomarkers in Toxicology Laboratory 0 (6) Non-credit laboratory to accompany BIOL 8310. Coreq: BIOL 8310.

BIOL 8400 Understanding Biological Inquiry 3 (3) Online course for teachers and others who want to apply inquiry methods to biological problems. Provides a broad background into the scientific methods utilized in the biological sciences and the application of inquiry-based teaching methods in the classroom. Coreq: BIOL 8410.

BIOL 8410 Understanding Ecology and Ecosystems 3 (3) Online course for teachers and others who want to understand ecological interactions and systems. Provides a broad background in ecology that includes populations, habitats, communities, trophic interactions and ecosystems; and provides a foundation for understanding interactions between organisms and their environments. Coreq: Consent of instructor.

BIOL 8420 Understanding Cellular Processes 3 (3) In-depth analysis of essential cell biology topics. Students study how and where intracellular and extracellular molecules control cellular functions such as gene expression, secretion, motility, signaling, cell-cycle control and differentiation. Coreq: Consent of instructor.

BIOL 8430 Understanding Genetics and Evolutionary Biology 3 (3) Online course for teachers who want to increase their content knowledge in genetics and evolution. Topics include Mendelian genetics, molecular genetics, gene expression and regulation, population genetics, forces of evolutionary change, and the role of evolutionary change in the origin of new species. Coreq: Consent of instructor.

BIOL 8440 Understanding the Human Body 3 (3) Online course for teachers and others who want to increase their content knowledge about the anatomy and physiology of the human body. Studies include food processing and nutrient allocation, circulation and respiration, excretion, communication via hormones and nervous transmission, reproduction, behavior, locomotion and support. Coreq: Consent of instructor.

BIOL 8450 Understanding Vertebrate Biology 3 (3) Online course for teachers and others who want to increase their content knowledge about plants. Study of plants from bryophytes to angiosperms, including growth, photosynthesis, nutrition, reproduction, ecology and evolution. Coreq: Consent of instructor.

BIOL 8460 Understanding Plant Biology 3 (3) Online course for teachers and others who want to increase their content knowledge about plants. Study of plants from bryophytes to angiosperms, including growth, photosynthesis, nutrition, reproduction, ecology and evolution. Coreq: Consent of instructor.

BIOL 8470 Understanding Microbiology 3 (3) Online course for teachers and others who want to increase their knowledge of microorganisms. Topics include prokaryotic cell structure and function, microbial growth and growth control, food microbiology, bacterial genetics, immunology, virology, microbial diseases, and epidemiology. Laboratory concepts are emphasized. Coreq: Consent of instructor.

BIOL 8480 Understanding Scientific Research 3 (3) Research problems in selected areas of biological sciences to provide an introduction to research planning and techniques. Teachers undertake an instructor-approved, individual research project or a group research project involving their classroom during the academic year. Both are assisted by and under the supervision of the instructor. Coreq: Consent of instructor.

BIOL 8490 Understanding Scientific Communication 3 (3) Online course to help teachers develop their ability to write grant proposals, scientific manuscripts, and conference presentations on biological topics, and to communicate about biological issues with public audiences. Coreq: Consent of instructor.

BIOL 8500 Plant Tissue and Cell Culture 3 (2) Methods and principles of plant tissue and cell culture: cloning, embryogenesis, protoplast fusion, plant regeneration, potential of plant genetic engineering. Students are expected to have completed coursework in plant physiology before enrolling in this course. Coreq: BIOL 8501.

BIOL 8501 Plant Tissue and Cell Culture Laboratory 0 (3) Non-credit laboratory to accompany BIOL 8500. Coreq: BIOL 8500.
BIOL 8540 Aquatic Toxicology 3 (3) Combines concepts of solution chemistry with toxicology to establish stressor-response relationships for aquatic organisms at various trophic levels. Bioavailability is a unifying concept and concepts of contaminant exposure and organism response are set in an ecological risk assessment framework. Preq: ETOX 4300 or ETOX 6300.

BIOL 8600 Plant Anatomy and Cell Biology 4 (3) Covers the subcellular structure and the comparative organization and function of plant cell types, tissues and organs. Emphasizes the interplay between the environment and the plant body and among genomes, membrane compartments and the cytoplasm as these relate to the highly orchestrated stages in development. Coreq: BIOL 8601.

BIOL 8601 Plant Anatomy and Cell Biology Laboratory 0 (3) Non-credit laboratory to accompany BIOL 8600. Coreq: BIOL 8600.

BIOL 8630 Special Problems 1-4 (1-4) Research not related to thesis. Preq: Consent of instructor.

BIOL 8710 Selected Topics 1-4 (1-4) Cellular and developmental biology, ecology, behavior, evolutionary biology, molecular biology, physiology, systemsatics and other topics of interest to graduate students in the biological sciences. May be repeated for credit, but only if different topics are covered. Preq: Consent of instructor.

BIOL 8720 Selected Topics Laboratory 1-4 (2-8) Specialized laboratory experiences in cellular and developmental biology, ecology, behavior, evolutionary biology, molecular biology, physiology, systemsatics and other topics of interest to graduate students in the biological sciences. May be repeated for credit, but only if different topics are covered. Preq: Consent of instructor.

BIOL 8880 Electron and Light Microscopy Practicum 3 (1) Continuation of BIOL 6870, offering graduate students practical training on light and electron microscopes. Proficient students become approved end users by performing approved, independent imaging projects. Preq: BIOL 6870 and consent of instructor. Coreq: 8881.

BIOL 8881 Electron and Light Microscopy Practicum Laboratory 0 (5) Non-credit laboratory to accompany BIOL 8880. Coreq: BIOL 8880.

BIOL 8910 Master’s Thesis Research 1-12 (1-12)

BIOL 9910 Doctoral Dissertation Research 1-12

BMOL 6250 Biomolecular Engineering 3 (3) Introduction to basic principles of biomolecular engineering: the purposeful manipulation of biological molecules and processes applied to problems and issues in the life sciences, biotechnology, and medicine. Topics include carbohydrates, proteins, nucleic acids, and lipids with emphasis on their structure-property-function relations; molecular recognition; biochemical pathway engineering; and cell growth. Preq: CHE 2300 and CHE 3190.

BMOL 6260 Biosensors and Bioelectronic Devices 3 (3) Development of methodologies used to design, fabricate, and apply biosensors and bioelectronic devices for the environmental, medical, and chemicals industries. Application of the fundamentals of measurement science to optical, electrochemical, mass, and thermal means of signal transduction. Use of the fundamentals of surface science to interpret bio- immobilization and biomolecule-surface interactions. Preq: CHE 3300; and BCHM 3010 or BCHM 3050.

BMOL 6270 Membranes for Biotechnology and Biomedicine 3 (3) Students learn principles of membrane science and technology and study membrane applications in the biotechnology and biomedical industries. Advanced topics include surface modification of membranes, synthesis of porous membranes for biomedical applications such as tissue engineering, environmentally responsive membranes, and membrane-based biochemical devices. Preq: CHE 3300; and consent of instructor.

BMOL 8100 Biosensors and Bioelectronic Devices 3 (3) Study of methodology for design, fabrication and application of biosensors and bioelectronic devices for monitoring the environment, medical and chemical industries. Includes measurement science fundamentals applied to optical, electrochemical, mass, and thermal means of signal transduction. Also considers surface science fundamentals to interpret bioimmobilization, biofueling and non-specific interactions of enzymes, antibodies and DNA to surfaces. Preq: Consent of instructor.

CIVIL ENGINEERING

CE 6010 Matrix Structural Analysis 3 (3) Analysis of determinate and indeterminate structures using the matrix formulation of the direct stiffness method. Consideration is given to commonly faced computer modeling issues and the nonlinear analysis of structures. Preq: CE 3010 or consent of instructor.

CE 6040 Masonry Structural Design 3 (3) Introduction to design of structural elements for masonry buildings, including lintels, walls, shear walls, columns, pilasters, and retaining walls. Reinforced and unreinforced elements of cast or clay masonry are designed by allowable stress and strength design methods. Introduces construction techniques, materials, and terminology used in masonry. Preq: CE 3010 or consent of instructor.

CE 6070 Wood Design 3 (3) Introduction to wood design and engineering: properties of wood and wood-based materials; design of beams, columns, walls, roofs, panel systems, and connections. Preq: CE 3010 or consent of instructor.

CE 6080 Structural Loads and Systems 3 (3) In-depth discussion of minimum design loads and load combinations. Includes overview of various steel and concrete systems. Discusses practical selection and design issues and design of proprietary building materials and components such as steel joists, diaphragms, engineered wood products, etc. Preq: CE 3010 or consent of instructor.

CE 6100 Traffic Engineering: Operations 3 (3) Basic characteristics of motor-vehicle traffic, highway capacity, applications of traffic control devices, traffic design of parking facilities, engineering studies, traffic safety, traffic laws and ordinances, and public relations. Preq: CE 3110 or consent of instructor.

CE 6110 Roadway Geometric Design 3 (2) Geometric design of roadways, at-grade intersections, and interchanges in accordance with conditions imposed by driver ability, vehicle performance, safety, and economics. Preq: CE 3110 or consent of instructor.

CE 6111 Roadway Geometric Design Laboratory 0 (3) Non-credit laboratory to accompany CE 6110. Coreq: CE 6110.

CE 6120 Urban Transportation Planning 3 (3) Consideration of urban travel characteristics, characteristics of transportation systems, transportation and land-use studies, trip distribution and trip assignment models, city patterns and subdivision layout. Preq: CE 3110 or consent of instructor.

CE 6210 Geotechnical Engineering Design 3 (3) Study of the relationship of local geology to soil formations, groundwater, planning of soil investigation, sampling procedures, determination of design parameters, foundation design, and settlement analysis. Preq: CE 3210 or consent of instructor.

CE 6240 Earth Slopes and Retaining Structures 3 (3) Considers the principles of geology, groundwater and seepage, soil strength, slope stability, and lateral earth pressure and their application to the design of excavations, earth fills, dams, and earth-retaining structures. Preq: CE 3210 or consent of instructor.

CE 6330 Construction Planning and Scheduling 3 (3) Study of principles and applications of the Critical Path Method (CPM) and Project Evaluation and Review Techniques (PERT). Includes project breakdown and network graphics; identification of the critical path and resulting floats; definition and allocation of materials, equipment, and manpower resources; resource leveling, compression, and other network adjustments; and computer applications using packaged routines. Preq: CE 3310 or consent of instructor.

CE 6340 Construction Estimating and Project Control 3 (3) Instruction in specifications, contracts, and bidding strategies; purchasing and subcontracting policies; accounting for materials, supplies, subcontracts, and labor; procedural details for estimating earthwork, reinforced concrete, steel, and masonry. Also considers overhead and profit items. Preq: CE 3310 or consent of instructor.
Courses of Instruction

CE 6350 Infrastructure Project Planning 3 (3) Covers concepts related to planning, cost estimating, financing and executing public works projects from the agency owner perspective. Advanced concepts of engineering economic analysis, risk analysis and database management systems are addressed. Traditionally and innovative project contracting strategies, including incentive contracts and public-private partnerships, are discussed. Prereq: CE 3520.

CE 6360 Sustainable Construction 3 (3) Presents the why, what and how for sustainable construction projects. Students gain a working understanding of how to minimize the negative impacts of buildings and other large construction projects. Prereq: CE 3310 or consent of instructor.

CE 6370 Sustainable Energy Project Design and Analysis 3 (3) Students develop their technical and creative ability to plan and design for a sustainable future. Students perform quantitative analyses of the environmental and economic impacts of engineering alternatives. Students work in small groups and learn techniques for the collaborative, multidisciplinary approach required for sustainable solutions. Prereq: CE 3310 or consent of instructor.

CE 6380 Construction Support Operations 3 (3) Describes activities necessary for the completion of a construction job although not specifically recognized as direct construction activities: general conditions, safety, security, quality assurance, value engineering; organizational support features and typical implementation procedures. Prereq: CE 3310 and EXST 3010.

CE 6390 Construction Equipment Selection and Maintenance 3 (3) Methodology of selecting the right equipment of the right size for each task of the construction job on the basis of power-train characteristics, crew size, terrain conditions, and job requirements. Cycle time, cost, specifications, maintenance, replacement policy, monitoring. Prereq: CE 3310.

CE 6400 Sustainable Energy Engineering 3 (3) Investigation into merging renewable energy resources, including detailed study of solar, wind, and bioenergy alternatives. Also includes principles, technologies, and performance evaluation of components for these technologies and an introduction to tidal, hydro, geothermal, and other energy; energy conservation; cogeneration; financial, economical, and other issues related to alternative energy sources. Coreq: CE 6401.

CE 6401 Sustainable Energy Engineering Laboratory 0 (2) Non-credit laboratory to accompany CE 6400. Coreq: CE 6400.

CE 6430 Water Resources Engineering 3 (3) Extention of the concepts of fluid mechanics to applications in water supply, water resource assessment, water transmission, water distribution networks, pump and pipe selection, pipe networks, and analysis of open channel appurtenances. Prereq: CE 3410.

CE 6460 Flood Hazards and Protective Design 3 (3) Study of flood hazards and methods of protective design of the built environment; floodplain mapping and delineation; methods for determining base flood elevations. Discusses flood-resistant construction, flood proofing, and governmental regulations. Includes case studies and design projects. Prereq or concurrent enrollment: CE 3420.

CE 6470 Stormwater Management 3 (3) Evaluation of peak discharges for urban and rural basins, design of highway drainage structures such as inlets and culverts; stormwater and receiving water quality; best management practices, detention and retention ponds, and erosion and sediment control. Prereq: CE 3420. Prereq or concurrent enrollment: EES 4010.

CE 6560 Pavement Design and Construction 3 (3) Introduction to design methods, construction practices, maintenance strategies, and decision making process related to pavements. Other topics, such as environmental considerations and special pavement types and materials, are also covered. Prereq: CE 3110 and CE 3510. Prereq or concurrent enrollment: CE 3210.

CE 6570 Materials Testing and Inspection 3 (3) Introduction to the role of testing and inspection professionals in civil engineering projects. Uses a practical approach to applying concepts to real-world situations through the completion of several team projects such as material characterization, construction QC/QA, forensic evaluation, and proposal development. Prereq: CE 3200 and CE 3510.

CE 6620 Coastal Engineering 13 (3) Introduction to coastal and oceanographic engineering principles, including wave mechanics, wave-structure interaction, coastal water-level fluctuations, coastal zone processes, and design considerations for coastal structures and beach nourishment projects. Prereq: CE 3410 or consent of instructor.

CE 6820 Groundwater and Contaminant Transport 3 (3) Basic principles of groundwater hydrology and transport of contaminants in groundwater systems; groundwater system characteristics; steady and transient flow; well hydraulics; design, testing, contaminant sources, movement and transformation. May also be offered as GEOL 6820. Prereq: CE 3410. Prereq or concurrent enrollment: EES 4010.

CE 6910 Selected Topics in Civil Engineering 1-6 (1-6) Structured study of civil engineering topics not found in other courses. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Consent of instructor.

CE 6910 Selective Topics in Civil Engineering L-6 (L-6) Selected topics in civil engineering topics not found in other courses. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Consent of instructor.

CE 6960 Advanced Reinforced Concrete Design 3 (3) Second course in design of reinforced concrete structures; advanced concepts in analysis and design of beams, columns, shear walls and slabs; introduction to the seismic design of concrete structures. Prereq: CE 4020 or consent of instructor.

CE 8020 Advanced Reinforced Concrete Design 3 (3) Advanced design of structural steel structures emphasizing the relationship between design and response of the structural system. Includes theoretical basis of design code provisions, limit state design, beam-columns, plate girders and composite sections and connections. Also includes the seismic design of steel structures. Prereq: CE 4060 or consent of instructor.

CE 8040 Prestressed Concrete 3 (3) Introduction to the design, behavior and design of precast prestressed concrete members and structures. Covers allowable stress design and strength design of P/C members, shear design, loss of prestress force, design of continuous structures. Prereq: CE 4010 and 4020, or consent of instructor.

CE 8050 Advanced Structural Mechanics 3 (3) Development and utilization of mechanics principles in solution of structural problems; unsymmetrical bending and curved beams; beams on elastic foundations; plastic structure analysis of beams and frames; eigenvalue problems; plastic stress-strain relations; strain energy; and introduction to finite element analysis. Prereq: CE 3010 or consent of instructor.

CE 8060 Dynamic Analysis of Structures 3 (3) Analysis of structures subjected to dynamic loading; response of lumped and distributed parameter systems of one or many degrees of freedom; and introduction to earthquake analysis, including modal and time history analysis. Prereq or concurrent enrollment: CE 4010.

CE 8070 Wind Engineering 3 (2) Effects of wind on buildings, bridges and other structures; meteorological aspects of wind generation; types and characteristics of various wind events; aerodynamics of flow around structures; wind-induced loads; structural responses; design basis safety and serviceability criteria. Coreq: CE 8071.

CE 8071 Wind Engineering Laboratory 0 (2) Non-credit laboratory to accompany CE 8070. Coreq: CE 8070.

CE 8080 Earthquake Engineering 3 (3) Effects of earthquake-induced forces on buildings, bridges and other structures; development of design codes and their application to the design of structures to resist seismic forces; fundamental structural dynamics and analysis techniques used to compute the response of structures or obtain design forces. Includes an introduction to performance-based seismic design concepts and displacement-based design methods. Prereq: CE 8060 or consent of instructor.

CE 8130 Highway and Airport Pavement Design 3 (3) Structural design of rigid and flexible pavements; design of bases and subbases; theory of stresses and application of plate bearing, triaxial and California Bearing Ratio design methods to flexible pavements; Westergaard analysis for rigid pavements; pavement evaluation methods. Prereq: CE 3110 and CE 3210 and CE 3510; or consent of instructor.

CE 8140 Intelligent Transportation Systems 3 (3) Students learn concepts of Intelligent Transportation Systems (ITS), including traffic flow principles, advanced traffic sensor and communications technologies and real-time management strategies, to increase the safety and efficiency of the surface transportation system. Covers the process of planning, design and operations of ITS. Prereq: Consent of instructor.

CE 8150 Transportation Safety Engineering 3 (3) Methodology for conducting transportation accident studies; accident characteristics as related to operator, facility and mode; statistical applications to accident data; current trends and problems in transportation safety. Prereq: CE 3110 or consent of instructor.
CE 8200 Geotechnical Site Characterization 3 (3) Study of advanced methods of subsurface investigation for design of civil structures in soil and rock. Includes field reconnaissance, interpretation of geologic maps and cross sections, drilling, in situ testing, sampling, characterization of soil and rock formations and selection of engineering properties. Preq: CE 3210.

CE 8210 Advanced Soil Mechanics 3 (3) Study of stresses in soils, stress-strain and shear strength properties of soil, plastic equilibrium of soil masses, failure conditions, earth pressures, with applications to geotechnical engineering design. Preq: CE 3210 or consent of instructor.

CE 8220 Foundation Engineering 3 (3) Requirements for satisfactory foundations; theory and design of shallow foundations; pressure distribution beneath rigid and flexible shallow foundations; bearing capacity and settlement of deep foundations; foundation failures. Preq: CE 3210 or consent of instructor.

CE 8230 Asphalt Concrete Properties 3 (3) Includes identification of quality of aggregates for construction. Covers characteristics and properties of bituminous materials and materials behavior; construction and design problems. Requires use of microcomputers and the mainframe. Preq: CE 3350 or consent of instructor.

CE 8250 Soil Dynamics and Geotechnical Earthquake Engineering 3 (3) Fundamentals of soil dynamics, plate tectonics and earthquakes; application of the concepts to seismic ground response, design ground motions, soil liquefaction, seismic slope stability, dynamic lateral earth pressures, and soil improvement. Preq: CE 3210 or consent of instructor.

CE 8260 Properties of Portland Cement Concrete 3 (3) Material science and engineering of Portland cement concrete. Topics include physical and chemical properties of cements; mixture proportioning; mixing; placement; curing technology; specifications, tests and evaluation of fresh and hardened concrete; durability issues; and considerations in specialized applications. Preq: CE 3350 or consent of instructor.

CE 8270 Special Cements and Concrete 3 (3) Study of material science and engineering aspects of specialty concretes that are used in unique civil engineering applications, including high-strength concrete, high performance concrete, highly flowable concrete, underwater concrete, shotcrete and others. Exposes students to properties and applications of specialty cements and admixtures that are often used in these special applications. Preq: CE 8260.

CE 8280 Repair and Rehabilitation of Concrete Structures 3 (3) Provides students with a knowledge of different types of failures in concrete associated with material durability, construction and design (load) related failures. Also provides knowledge to identify, assess and remediate damage in concrete pavements and structures. Introduces the concepts and tools related to structural health monitoring. Preq: CE 8260.

CE 8290 Geosynthetics 3 (3) Study of geosynthetics including geotextiles, geogrids, geomembranes, geonets, geosynthetic clay liners, geopipe and geocomposites which are used in many aspects of civil engineering for soil structures, retaining walls, pavement construction and rehabilitation, drainage, filtration and containment facilities. Covers production of geosynthetics, material properties, design aspects and field installation. Preq: CE 3210 and CE 3510.

CE 8320 Capital Project Management Fundamentals 3 (3) Fundamental concepts of designing and constructing capital projects: what they are, why they are done, who is involved and how to best design and build them; phases of a capital project; and variations of organizational and contractual structures used for capital projects. Preq: Consent of instructor.

CE 8330 Capital Project Controls 3 (3) Principles and best practices of project controls for capital construction projects, including conceptual and detail estimating, scheduling and earned value management (EVM); development of project baseline incorporating scope, schedule and budget; use of baseline to monitor and manage cost and schedule performance; and shortcomings of EVM. Preq: CE 8320 and consent of instructor.

CE 8340 Key Topics in Capital Project Management 3 (3) Investigates key topics associated with planning and managing capital construction projects, how these topics are integrated into a capital construction project management plan that achieves business and project objectives: how the project team uses the project management plan to successfully complete the construction project. Preq: CE 8320 and consent of instructor.

CE 8350 Construction Project Modeling 3 (3) Mathematical and computer models are used to simulate construction operations. Covers linear models and optimization applications to construction materials, scheduling and equipment allocation; typical computer models used in construction using simple modeling examples. Preq: CE 3310 or consent of instructor.

CE 8360 Civil Engineering Quality Management 3 (3) Principles of total quality management (TQM) and their applications in the engineering and construction industry; TQM implementation techniques emphasizing the construction environment; concepts of quality assurance (QA) and quality control (QC) in construction.

CE 8370 Construction Specifications and Contracts 3 (3) Elements of specifications delineating responsibilities of all involved parties and identifying courses of action during abnormal circumstances; necessary parts of a contract dealing with governmental regulations and institutional preferences, licenses, bonds, insurance and taxes. Preq: CE 3310 or consent of instructor.

CE 8380 Materials Management 3 (3) Functions of construction materials management including design interface, purchasing, expediting, transportation, field control and warehousing; design and application of integrated materials management computer systems; new technology that impacts materials management including bar coding, electronic data interchange and voice recognition. Preq: Consent of instructor.

CE 8390 Sustainable Infrastructure Systems 3 (3) Covers sustainable infrastructure systems with emphasis on science-based tools to design and analyze these systems. Examines theoretical background and specific cases for topics including life-cycle assessment, systems analysis and economic valuation for sustainability. Preq: CE 4360 or consent of instructor.

CE 8400 Project Management Applications 3 (3) Quantitative tools for effective management and control of engineered projects from design through construction; cost coding and control, advanced schedule management techniques and quality management principles; extensive hands-on use of the microcomputer. Preq: CE 4330 and CE 4340; or consent of instructor.

CE 8460 Flow in Open Channels 3 (3) Free surface flow problems; applications of digital computer; concepts of boundary layer theory; uniform and varied flow; hydraulic jump; design criteria for prismatic channels and transitions; applications of unsteady flow. Preq: CE 3420 or consent of instructor.

CE 8520 Reliability 3 (3) Elements of probabilistic methods; classical theory of structural reliability and reliability-based design methods. Term project required on reliability design in a relevant field of civil engineering.

CE 8530 Applications in Traffic Engineering 3 (2) Highway capacity analysis; design of unsignalized intersections; intelligent transportation systems; parking; traffic signal coordination; microscopic and macroscopic traffic simulation. Preq: CE 4100 or consent of instructor. Coreq: CE 8531.

CE 8531 Applications in Traffic Engineering Laboratory 0 (3) Non-credit laboratory to accompany CE 8530. Coreq: CE 8530.

CE 8540 Travel Demand Forecasting 3 (2) In-depth coverage of travel-demand forecasting theory and the four-step process; site impact analysis; disaggregate demand models. Students work in groups to develop a computer-based travel forecasting model for a small city. Preq: CE 4120 or consent of instructor. Coreq: CE 8541.

CE 8541 Travel Demand Forecasting Laboratory 0 (3) Non-credit laboratory to accompany CE 8540. Coreq: CE 8540.

CE 8550 Transportation Seminar 1 (1) Practical discussion of the transportation profession featuring faculty and off-campus experts. Course is highlighted by a retreat where students present their transportation research.

CE 8600 Advanced Fluid Mechanics 3 (3) Laminar and turbulent flows; boundary layer and free shear flows (jets, wakes, etc.); descriptions of velocity, shear stress and pressure measurements, and aerodynamic drag.

CE 8610 Mechanics of Sediment Transport 3 (3) Characterization of sediments; physical principles governing fluvial, estuarial and coastal transport of cohesionless and cohesive sediments, including incipient motion, stable channel design, bedforms, and bedload and suspended transport. Preq: CE 3420 or consent of instructor.
Courses of Instruction

CHE 8680 Environmental Fluid Mechanics and Hydraulics 3 (3) Study of turbulence and basic flow equations as they impact the environment. Includes slender flows including circular and plane turbulent jets, jets in crossflows, wall, surface jets and plumes; near-field and far-field analysis of discharge in rivers including continuous momentum discharges, nonbouyant plumes and passive slug; mixing in lakes and reservoirs; and stratified flows.

CE 8750 Numerical Models in Hydraulics 3 (3) Students learn applications of numerical modeling, finite difference, finite volume and finite element, as tools for solving complex problems in the areas of hydraulics/liquid mechanics. Students learn techniques of developing and analyzing computational models for parabolic, elliptic and hyperbolic equations used in the area of hydraulics. Preq: CE 3420 or consent of instructor.

CE 8890 Special Problems I 1-3 (1-3) Research design problems from field of structures, construction, soil mechanics, transportation, ocean and coastal engineering, or materials engineering. Subject matter varies with interest and experience of student and instructor.

CE 8900 Special Problems II 1-3 (1-3) Research design problems from field of structures, construction, soil mechanics, transportation, ocean and coastal engineering, or materials engineering. Subject matter varies with interest and experience of student and instructor.

CE 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

CE 8930 Selected Topics in Civil Engineering 1-6 (1-6) Topics not covered in other courses. May be repeated for credit.

CE 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

COLLEGE OF ENGINEERING AND SCIENCE

CES 6030 Career Success in Research and Development 1 (1) Assists students in making personal and professional transition into industrial research careers. Introduces and demonstrates practical advice and techniques to help students avoid early career land mines. Preq: Junior standing in engineering or science discipline.

CHEMISTRY

CH 6010 Organometallic Chemistry 3 (3) Organometallic compounds are useful in applications ranging from large-scale industrial reactions to antibiotics, and this versatility arises from the chemically unique metalcarbon bond. Course begins with fundamental coordination chemistry, then progresses through ligand substitution, oxidative addition/ reductive elimination, catalytic transformations and polymerization reactions. Includes honors sections. Preq: Consent of instructor.

CH 6020 Inorganic Chemistry 3 (3) Basic principles of inorganic chemistry are discussed with special emphasis on atomic structure, chemical bonding, solid state, coordination chemistry, organometallic chemistry, and acid-base theories. The chemistry of certain selected elements is treated. Preq: CH 3310 and CH 3320.

CH 6040 Bioinorganic Chemistry 3 (3) Covers fundamentals of bioinorganic chemistry with review of necessary inorganic and biochemical concepts. Topics include metal uptake, transport, and storage in biological systems; functions of metals in proteins; metal ion interactions with nucleic acids; physical methods used in bioinorganic chemistry; heavy element toxicity, radiopharmaceuticals and other metallodrugs. Preq: BCHM 3010 or CH 2050.

CH 6110 Instrumental Analysis 3 (3) Principles of operation and application of modern chemical instrumentation in the field of analytical chemistry. Topics include basic electronics, statistics, optical, mass, magnetic resonance, electron and x-ray spectroscopy, radiochemistry, and separation science. Preq: CH 3310 and CH 3320.

CH 6140 Bioanalytical Chemistry 3 (3) Survey of selected areas of importance in bioanalytical chemistry. Fundamental principles, advanced topics, and applications of analytical measurements of biomolecules, bioassays, immunosassays, separations, mass spectrometry, method validation, macromolecular crystallography, microscopy, and imaging. Preq: CH 3310 and 4110; or consent of instructor.

CH 6250 Medicinal Chemistry 3 (3) Survey of the pharmaceutical drug discovery process. Covers discovery of candidate compounds, biosynthetic methods, and associated regulatory and commercial issues. Case studies are selected from the current literature. Preq: CH 2240 or consent of instructor.

CH 6270 Organic Spectroscopy 3 (2) Survey of modern spectrosocpic techniques used in the determination of molecular structure. Emphasizes the interpretation of spectra: nuclear magnetic resonance, ultraviolet, infrared, mass spectrometry, optical activity, dispersion, and circular dichroism. Students are expected to have completed one year of organic chemistry and physical chemistry. Coreq: CH 6271.

CH 6271 Organic Spectroscopy Laboratory 0 (3) Non-credit laboratory to accompany CH 6270. Coreq: CH 6270.

CH 6350 Atomic and Molecular Structure 3 (3) Introduction to quantum theory and its application to atomic and molecular systems. Topics include harmonic oscillator, hydrogen atom, atomic and molecular orbital methods, vector model of the atom, atomic spectroscopy, and molecular spectroscopy. Preq: CH 3320 or consent of instructor.

CH 6510 Frontiers in Polymer Chemistry 3 (3) Survey of selected areas of current research in polymer science with particular emphasis on polymer synthesis. Although a text is required for review and reference, course is primarily literature based and focused on areas of high impact to multidisciplinary technology. Preq: CH 2230 and CH 2240 and MSE 4150 or consent of instructor.

CH 6710 Teaching Chemistry 3 (3) Study of topics in chemistry addressed in the context of constructivist methodologies. Also considers laboratory work and management, laboratory safety, and the use of technology in the chemistry classroom. Preq: 3000-level chemistry course or high school teaching experience or consent of instructor.

CH 7040 Selected Topics for Chemistry Teachers 1-6 (1-6) Directed individual study in designing experiments and teaching materials or an in-depth study of one or more advanced topics. For graduate students in Elementary and Secondary Education. May be repeated, but only if different topics are covered. Offered spring semester of odd-numbered years only. Coreq: CH 7041.

CH 7041 Selected Topics for Chemistry Teachers Laboratory 0 (99) Non-credit laboratory to accompany CH 7040. Coreq: CH 7040.

CH 8000 Professional Development Issues in Chemistry 1 (1) Covers development of professional behavior for graduate students in chemistry, including communication skills, teaching techniques, research ethics, career management, “grantsmanship,” and intellectual property issues in science. Preq: Graduate standing in Chemistry.

CH 8050 Theoretical Inorganic Chemistry 3 (3) Application of group theory to structure and properties of inorganic molecules. Offered spring semester of odd-numbered years only. Preq: CH 4350; or consent of instructor.

CH 8070 Chemistry of the Transition Elements 3 (3) Structure, spectroscopy and reactivity of transition metals and their compounds. Offered fall semester only. Preq: Consent of instructor.

CH 8090 Chemical Applications of X-Ray Crystallography 3 (2) Physical description of the crystalline state, symmetry in crystals, X-ray diffraction, modern methods of structure determination, and chemical interpretation of structural results. Offered spring semester of odd-numbered years only. Preq: CH 3310 and CH 3320; or consent of instructor. Coreq: CH 8091.

CH 8091 Chemical Applications of X-Ray Crystallography Laboratory 0 (2) Non-credit laboratory to accompany CH 8090. Coreq: CH 8090.

CH 8120 Chemical Spectroscopic Methods 3 (2) Emission and absorption spectroscopy, chemical microscopy, X-ray diffraction, and fluorescence techniques in analytical chemistry; theory and operation of instruments. Coreq: CH 8121.

CH 8121 Chemical Spectroscopic Methods Laboratory 0 (3) Non-credit laboratory to accompany CH 8120. Coreq: CH 8120.

CH 8130 Electrochemical Science 3 (3) Theory and experimental study of electrochemical thermodynamics, electrified interfaces, interfacial charge transfer, electrolyte solutions, electrode processes, and membrane electrochemistry; amperometric, voltammetric, electrolytic and potentiometric methods; practical applications of electrochemistry in analysis, materials synthesis and energy technology. Preq: Graduate standing in Chemistry or Chemical Engineering or consent of instructor.
CH 8140 Analytical Imaging 3 (3) Covers fundamental principles and application of major imaging techniques, including light, electron and scanning probe microscopy, magnetic resonance imaging, and computer tomography. Students are expected to have completed coursework in physics, physical chemistry or the equivalent or to receive consent of instructor.

CH 8150 Mass Spectrometry 3 (3) The fundamental and practical aspects of mass spectrometry are presented. Topics include vacuum technology, ion optics, mass analyzers, ionization techniques, and hyphenated methods. Prereq: Undergraduate students may receive consent of instructor to enroll in this course.

CH 8160 Separation Science 3 (3) Fundamental thermodynamic and kinetic concepts of separation and practical aspects of current separation techniques used in analytical chemistry. Offered spring semester of odd-numbered years only.

CH 8180 Surface and Thin Film Analysis 3 (2) Fundamental principles underlying the most commonly employed techniques for surface and thin films analysis. Representative techniques include atomic force microscopy, scanning electron microscopy, Auger electron spectroscopy and Rutherford backscattering. Laboratory exercises give insights into analytical methods. Coreq: CH 8181.

CH 8181 Surface and Thin Film Analysis Laboratory 0 (2) Non-credit laboratory to accompany CH 8180. Coreq: CH 8180.

CH 8210 Organic Chemistry 1 3 (3) Theoretical concepts of organic chemistry, stereochemistry and mechanisms of organic reactions. Offered fall semester only. Prereq: CH 4210 or satisfactory performance on the organic chemistry placement examination.

CH 8220 Organic Chemistry II 3 (3) Continuation of CH 8210; mechanisms of organic reactions including photochemistry and Woodward-Hoffman rules; modern synthetic organic chemistry. Offered spring semester only. Prereq: CH 8210 or consent of instructor.

CH 8300 Fundamentals of Physical Chemistry 3 (3) Principles of classical thermodynamics, chemical kinetics and quantum chemistry. Offered fall semester only. Prereq: CH 3310.

CH 8310 Chemical Thermodynamics 3 (3) Classical thermodynamics emphasizing theory and significance of energetics and systems of variable composition. Offered fall semester of odd-numbered years only. Prereq: CH 3310.

CH 8340 Statistical Thermodynamics 3 (3) Study of statistical thermodynamics including ensemble method, ideal gases, internal degrees of freedom, solid state, imperfect gases, distribution function method in fluids, and time-dependent fluctuations. Prereq: CH 8310.

CH 8350 Chemical Kinetics 3 (3) Rate processes and reaction mechanisms; order of reaction; theory of rate processes; relation of reaction rates to mechanism; homogeneous and heterogeneous catalysis; experimental methods; chain reactions; diffusion; effects of solvent, temperature and pressure on reaction rates and mechanisms. Lectures are supplemented by assigned problems, paper and oral examination of topic of special interest to the student. Offered spring semester of odd-numbered years only.

CH 8370 Quantum Chemistry 3 (3) Mathematical and conceptual formulation of quantum theory of electronic structure of atoms and molecules; eigenvalue solution of one-dimensional Schrödinger equation and application of this method to chemical problems. Offered fall semester of odd-numbered years only.

CH 8380 Computational Chemistry 3 (3) Theoretical methods and software used in computational chemistry; quantum chemical methods including molecular orbital methods and density functional theory; classical simulation techniques including potential energy functions, molecular mechanics, molecular dynamics and Monte Carlo. Advanced topics vary with interests of students. Prereq: CH 3310 and CH 3320.

CH 8400 Techniques of Experimental Chemistry 3 (1) Theory and practice in major experimental techniques used in chemical research; chromatography; NMR, IR, visible, UV, ORD/CD spectrophotometry, glassblowing and high vacuum techniques; mass spectrometry; ESR; Mössbauer spectrometry and tracer analysis. Coreq: CH 8401.

CH 8401 Techniques of Experimental Chemistry Laboratory 0 (6) Non-credit laboratory to accompany CH 8400.

CH 8410 Chemical Applications of NMR Spectroscopy 3 (3) Basic concepts of NMR spectroscopy with application to organic, inorganic, physical and analytical chemistry; design of spectroscopic experiments and interpretation of spectra; modern techniques including multipulse, multinuclear and twodimensional methods. Offered fall semester only. Prereq: CH 3310 and CH 3320; or consent of instructor. Coreq: CH 8411.

CH 8411 Chemical Applications of NMR Spectroscopy Laboratory 0 (2) Non-credit laboratory to accompany CH 8410. Coreq: CH 8410.

CH 8420 Actinide Chemistry 3 (3) Chemical and physical aspects of actinide metals and compounds (including properties, structure and bonding, reactions, kinetics, thermodynamics), coordination and solution chemistry, behavior and speciation in the environment, separation and purification, chemistry of the nuclear fuel cycle and waste treatment and related topics; fundamental concepts, history and recent developments. Prereq: Consent of instructor.

CH 8510 Graduate Student Seminar 1-2 (1-2) Students and faculty review current topics in chemistry. May be taken more than one semester.

CH 8520 Departmental Seminar 1-2 (1-2) Off-campus speakers are invited to present aspects of their research to the chemistry faculty and graduate students every week during the academic year. Some of these talks may form the basis for cumulative examination questions. Attendance is mandatory. May be taken more than one semester. Students are expected to have earned a bachelor’s degree in an approved major before enrolling in this course.

CH 8600 Chemical Biology 3 (3) Covers fundamentals of chemical biology by examining the structure, function, bonding and reactivity of nucleic acids, proteins, carbohydrates and lipids. Topics are covered from the perspective of organic, inorganic, analytic and physical chemistry. Credit will be given for only one of CH 8600 or BCHM 6310. Students are expected to have completed undergraduate coursework in organic, inorganic, physical and analytic chemistry; or to have obtained consent of instructor before enrolling in this course.

CH 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

CH 9000 Selected Topics in Inorganic Chemistry 1-4 (1-4) Metal-metal bonding; homogeneous catalysis; photochemistry; bioinorganic chemistry; solid state chemistry. Topics vary with interests of students. May be repeated for credit, but only if different topics are covered.

CH 9100 Selected Topics in Analytical Chemistry 1-4 (1-4) New techniques and their applications in analytical chemistry; laser methods; data acquisition processing; electronics, instrument/computer interfacing; field methods of sampling and analysis. Topics vary with interests of students. May be repeated for credit, but only if different topics are covered.

CH 9200 Selected Topics in Organic Chemistry 1-4 (1-4) Heterocyclic compounds; stereochemistry; natural products; organometallic chemistry; photophysics. Topics vary with interests of students. May be repeated for credit, but only if different topics are covered.

CH 9300 Selected Topics in Physical Chemistry 1-4 (1-4) Special problems in molecular spectroscopy, molecular orbital treatments, applications of group theory to chemical structure, irreversible thermodynamics and special topics in statistical mechanics. Topics vary with interests of students. May be repeated for credit, but only if different topics are covered.

CH 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

CHEMICAL ENGINEERING

CHE 6010 Transport Phenomena 3 (3) Mathematical analysis of single and multidimensional steady-state and transient problems in momentum, energy, and mass transfer. Both the similarities and differences in these mechanisms are stressed. Prereq: CHE 3300 and MTHS 2080.

CHE 6120 Polymer Engineering 3 (3) Design-oriented course in synthetic polymers. Topics include reactor design used in polymer production, effect of step versus addition kinetics on reactor design, epoxy curing reactions, polymer solubility, influence of polymerization and processing conditions on polymer crystallinity. Prereq: CH 2240 and CH 3320.
CHE 6450 Selected Topics in Chemical Engineering 3 (3) Topics not covered in other courses, emphasizing current literature, research and practice of chemical engineering. Topics vary from year to year. May be repeated, but only if different topics are covered. Prereq: Consent of instructor.

CHE 6500 Chemical Reaction Engineering 3 (3) Review of kinetics of chemical reactions and an introduction to the analysis and design of chemical reactors. Topics include homogeneous and heterogeneous reactions, batch and continuous flow reaction systems, catalysis, and design of industrial reactors. Prereq: CHE 3210 and CHE 3300 and CH 3320.

CHE 8030 Advanced Transport Phenomena 3 (3) Analysis of heat, mass and momentum transfer; derivation and application of the governing equations; solution of steady and unsteady-state multidimensional problems in fluid flow, heat transfer and mass transfer.

CHE 8040 Chemical Engineering Thermodynamics 3 (3) Study of equilibria of physical and chemical systems and generalized properties of hydrocarbons. Includes application of thermodynamic methods in equipment design.

CHE 8050 Chemical Engineering Kinetics 3 (3) Kinetics of chemical reactions, particularly in design and operation of chemical reactors.

CHE 8140 Applied Numerical Methods in Process Simulation 3 (3) Numerical solution techniques as applied to chemical process systems; finite difference techniques for partial differential equations stressing applied numerical methods rather than theoretical numerical analysis. Standard methods for ordinary differential equations are reviewed. Prereq: Consent of instructor.

CHE 8180 Polymer Processing 3 (3) Processing of polymeric materials; polymer flow characterization; extrusion; mixing; filtration; injection molding; fiber and film formation; physical science principles such as fluid flow, heat transfer, crystallization, and thermodynamics applied to polymer processing operations.

CHE 8230 Mass Transfer and Stagewise Contact Operations 3 (3) Stagewise contact operations emphasizing distillation; vapor-liquid equilibria; integral and differential distillation; binary and multicomponent rectification; analytical methods; batch rectification; azeotropic and extractive distillation.

CHE 8340 Advanced Chemical Engineering Thermodynamics 3 (3) Classical and statistical thermodynamics applied to problems in chemical engineering emphasizing modern methods of predicting thermophysical properties of gases and liquids. Students’ and instructor’s interests influence course content but usually include fundamentals of applied statistical mechanics, molecular theory of dense fluids, descriptions of intermolecular forces, gas-liquid and liquid-liquid critical phenomena, theories of interfacial phenomena and adsorption, statistical mechanics of polymeric systems, statistical mechanics of polymer melts, computer simulation of fluids by Monte Carlo, molecular dynamics and stochastic dynamics methods. Prereq: CHE 8040.

CHE 8450 Selected Topics in Chemical Engineering 3 (3) Topics not covered in other courses emphasizing current literature and results of current research. Topics vary from year to year to keep pace with developments. May be repeated for credit.

CHE 8900 Special Projects 1-6 (1-6) Comprehensive analytical and/or experimental treatment of phenomena of current interest in chemical engineering emphasizing modern technological problems. May be repeated for maximum of six credits. To be taken Pass/No Pass only. Prereq: Consent of instructor and department chair.

CHE 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

CHE 8950 Chemical Engineering Graduate Seminar 1 (1) Series of weekly, one-hour seminars given by students, faculty and guests on topics of current interest. Credits earned in this course do not apply to or alter the required minimum of six research hours for the MS degree or the required 30 research credit hours for the PhD degree. To be taken Pass/No Pass only.

CHE 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

COMMUNICATION STUDIES

COMM 6510 Film Theory and Criticism I 3 (3) Advanced study into the theory of film/video making emphasizing understanding a variety of critical methods through close reading films that explore the history of film theory and film/roots of many schools of film criticism including realism, formalism, feminism, semiotics, Marxism, and expressionism. Prereq: ENGL 3570 or consent of instructor. Coreq: COMM 6510.

COMM 6511 Film Theory and Criticism Laboratory 0 (3) Non-credit laboratory to accompany COMM 6510. Coreq: COMM 6510.

COMM 6600 Advanced Organizational Communication 3 (3) Application of communication theory and research to the analysis of particular organizational communication processes. Students study significant issues and/or methods of intervention that facilitate communication in organizational communication. Prereq: COMM 3640 or consent of instructor.

COMM 6700 Communication and Health 3 (3) Considers institutional and health care communication issues as well as the relationship between social issues, communication, and health. Prereq: COMM 2100 or a C or better or consent of instructor.

COMM 6910 Classical Rhetoric 3 (3) Traces the development of rhetoric from Protagoras through Plutarch, Plato, Aristotle, Cicero and Quintillian and considers questions essential to understanding persuasive theory and practice. Prereq: ENGL 3100 or consent of instructor.

COMM 6920 Modern Rhetoric 3 (3) Examines the new rhetoric of the 20th century, which are grounded in classical rhetoric but include findings from biology, psychology, linguistics and anthropology, among other disciplines. Prereq: ENGL 3100 or consent of instructor.

COMM 8000 Communication Pedagogy 1 (1) Students develop teaching skills within the field of communication studies, focusing on the teaching of general education courses. Course explores the facilitation of a positive classroom environment, addressing student needs, and evaluation of student work. Discusses teaching philosophy and pedagogy.

COMM 8010 Communication Theory I 3 (3) Explores the history, development and current state of scientific theories related to the study of human communication. Covers social scientific traditions of theory. Students gain an understanding of metatheory and its relationship to historical and contemporary forms of theorizing about human communication.

COMM 8020 Communication Theory II 3 (3) Surveys theories and analytic concepts used in the pluralistic field of communication studies. Draws on qualitative, rhetorical, critical, aesthetic, and humanistic traditions. May include, but is not limited to, social theory, interpretive criticism, feminism, sound studies, aesthetics, queer theory, cultural studies and philosophy. Emphasis is on applications to social media studies.

COMM 8030 Survey of Communication Technology Studies 3 (3) Surveys the approaches to researching uses, meanings and effects of contemporary communication technologies in the pluralistic field of communication studies (e.g., interpersonal, small groups, policy, globalization, organizations, history, sustainability, infrastructure, children and media, cultural studies, networks), drawing on social scientific and humanistic traditions.

COMM 8040 Fundamentals of Health Communication 3 (3) Fundamentals of health communication and the Health Communication Certificate; two theoretical bases underlying this interdisciplinary program in health communication, one based on social science theory and one based on humanities, i.e. rhetorical theory; history of both theoretical bases. Prereq: Undergraduate students may request consent of Health Communication Coordinator to enroll in this course.

COMM 8050 Communication and Social Movements 3 (3) Examines arguments, tactics and structures of social movements from discursive, rhetorical, social perspectives in the field of communication studies. Using case studies, questions of history, external and internal rhetoric, control and adaptation are considered. Movements as diverse as feminism, environmentalism, alternative globalization and various rights-oriented movements may be considered.

COMM 8070 Health Communication Campaign Planning and Evaluation 3 (3) Application of theories, practices and tools developed in ENGL 8040 and 8060 to planning, implementing and evaluating a public health campaign that targets a particular health practice. Prereq: ENGL 8040 and ENGL 8060 or consent of Health Communication Certificate Coordinator.

COMM 8080 Representation and Popular Culture 3 (3) Seminar explores how popular culture artifacts represent various groups of people based on such characteristics as race, class, gender, sexuality, nationality, etc. A range of theoretical perspectives are incorporated, including but not limited to race theory, feminist theory, queer theory, postcolonialism and hegemonic masculinity theory.
**COMM 8100 Communication Research Methods I**
- Explores the methodology and research design in communication studies. May be repeated for a maximum of six credits, but only if different topics are covered.

**COMM 8270 Sports Media 3 (3)**
- Explores the role of media in sports, focusing on contemporary issues and trends in the field.

**COMM 8400 Selected Topics 3 (3)**
- Offers a variety of special topics in communication research.

**COMM 8500 Research Methods in Professional Communication 3 (3)**
- Focuses on research methodologies in professional communication, including quantitative and qualitative methods.

**COMM 8560 Trends in Public Relations Theory and Practice 3 (3)**
- Examines recent trends and developments in public relations theory and practice.

**COMM 8640 Communication and Organizing 3 (3)**
- Covers techniques and strategies for effective communication and organizational leadership.

**COMM 8690 Political Communication 3 (3)**
- Explores the role of communication in political campaigns and decision-making processes.

**COMM 8800 Political Communication 3 (3)**
- Focuses on political communication theory and practice.

**COMM 8900 Communication Studies Graduate Internship 1-3 (1-3)**
- Provides students with practical experience through an internship in a communication-related field.

**COMM 8990 Independent Study 1-3 (1-3)**
- Offers students the opportunity to conduct independent research or projects.

**CPSC 6110 Virtual Reality Systems 3 (3)**
- Covers the design and implementation of virtual reality systems.

**CPSC 6120 Eye Tracking Methodology and Application 3 (3)**
- Focuses on the methodology and application of eye tracking technology in research.

**CPSC 6140 Human and Computer Interaction 3 (3)**
- Examines the interaction between humans and computer systems.

**CPSC 6170 Database Systems 3 (3)**
- Covers the design and implementation of database systems.

**CPSC 6210 Advanced Databases 3 (3)**
- Explores advanced topics in database systems.

**CPSC 6240 System Administration and Security 3 (3)**
- Focuses on the administration and security of computer systems.

**CPSC 6280 Computer Design and Implementation 3 (3)**
- Covers the design and implementation of computer systems.

**CPSC 6290 Operating Systems Concepts 3 (3)**
- Focuses on the concepts and principles of operating systems.

**CPSC 6300 Computer Security Principles 3 (3)**
- Examines the principles of computer security.

**CPSC 6320 Cryptography and Security 3 (3)**
- Focuses on the principles and application of cryptography.

**CPSC 6360 Compiler Construction 3 (3)**
- Covers the construction of compilers.

**CPSC 6400 Human and Computer Interaction 3 (3)**
- Examines the interaction between humans and computer systems.

**CPSC 6500 Computer Graphics 3 (3)**
- Covers the principles and application of computer graphics.

**CPSC 6610 Computer Networks 3 (3)**
- Focuses on the design and implementation of computer networks.

**CPSC 6620 Game Engine Development 3 (3)**
- Covers the development of game engines.

**CPSC 6640 Data Structures and Algorithms 3 (3)**
- Focuses on the design and implementation of data structures and algorithms.

**CPSC 6650 Advanced Data Structures 3 (3)**
- Explores advanced topics in data structures.

**CPSC 6660 Advanced Algorithms 3 (3)**
- Focuses on advanced algorithms and problem-solving techniques.

**CPSC 6700 Advanced Systems Programming 3 (3)**
- Covers advanced topics in systems programming.

**CPSC 6720 Advanced Operating Systems 3 (3)**
- Focuses on advanced topics in operating systems.

**CPSC 6800 Advanced Networking 3 (3)**
- Explores advanced topics in networking.

**CPSC 6820 Advanced Computer Architecture 3 (3)**
- Focuses on advanced topics in computer architecture.

**CPSC 6900 Master’s Thesis 1 (1)**
- Provides students with the opportunity to conduct a Master’s thesis.

**CPSC 9999 Computer Science Seminar 3 (3)**
- Offers a seminar on current topics in computer science.

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPSC 6620</td>
<td>Database Management Systems 3 (3)</td>
<td></td>
<td>Introduction to database/data communications concepts as related to the design of online information systems. Problems involving structuring, creating, maintaining, and accessing multiple-user databases are presented and solutions developed. Comparison of several commercially available teleprocessing monitor and database management systems is made. Students are expected to have completed coursework in data structures.</td>
</tr>
<tr>
<td>CPSC 6630</td>
<td>Online Systems 3 (3)</td>
<td></td>
<td>In-depth study of the design and implementation of transaction processing systems and an introduction to basic communications concepts. A survey of commercially available software and a project using one of the systems are included. Preq: CPSC 6620.</td>
</tr>
<tr>
<td>CPSC 6640</td>
<td>Advanced Topics in Computer Networks 2 (2)</td>
<td></td>
<td>Non-credit laboratory to accompany CPSC 6620 or CPSC 6630.</td>
</tr>
<tr>
<td>CPSC 7040</td>
<td>Operating System Design and Implementation 4 (4)</td>
<td></td>
<td>Advanced study of the design and implementation of modern computer operating systems. Students are expected to have completed coursework in operating systems.</td>
</tr>
<tr>
<td>CPSC 7300</td>
<td>Compiler Construction 4 (4)</td>
<td></td>
<td>Study of compiler construction with emphasis on practical aspects. Students are expected to have completed coursework in Computer Organization and Operating System Design and Implementation.</td>
</tr>
<tr>
<td>CPSC 7310</td>
<td>Advanced Compiler Construction 3 (3)</td>
<td></td>
<td>Laboratory course in Compiler Construction. Students are expected to have completed coursework in Compiler Construction.</td>
</tr>
<tr>
<td>CPSC 7320</td>
<td>Computer Organization 3 (3)</td>
<td></td>
<td>Study of computer organization and design of computer components. Students are expected to have completed coursework in Operating System Design and Implementation.</td>
</tr>
<tr>
<td>CPSC 7330</td>
<td>Advanced Computer Organization 3 (3)</td>
<td></td>
<td>Laboratory course in Computer Organization. Students are expected to have completed coursework in Computer Organization.</td>
</tr>
<tr>
<td>CPSC 7340</td>
<td>Data Structures 3 (3)</td>
<td></td>
<td>Study of data structures. Students are expected to have completed coursework in Computer Organization.</td>
</tr>
<tr>
<td>CPSC 7350</td>
<td>Operating System Theory 3 (3)</td>
<td></td>
<td>Study of operating system theory. Students are expected to have completed coursework in Operating System Design and Implementation.</td>
</tr>
<tr>
<td>CPSC 8070</td>
<td>3D Modeling and Animation 3 (3)</td>
<td></td>
<td>The art and science of lighting and shading for effective computer graphic imagery, including the mathematical, physical and perceptual elements contributing to the simulation of a desired visual look. Shading languages, advanced rendering tools, global illumination effects, production of photoreal and non-photoreal imagery. Preq: CPSC 8070.</td>
</tr>
<tr>
<td>CPSC 8090</td>
<td>Rendering and Shading 3 (3)</td>
<td></td>
<td>The use of physically-based dynamical simulation techniques in the production of digital special effects. Course emphasizes tools, techniques and pipeline. Laboratory assignments are done using both commercial software and student's custom code. Preq: CPSC 8170.</td>
</tr>
<tr>
<td>CPSC 8150</td>
<td>Special Effects Compositing 3 (3)</td>
<td></td>
<td>Advanced topics in software development 3 (3) Video special effects, compositing problems, effects animation, matchmoving and 3-D geometry, color and texture reconstruction from 2-D images; extensive use of scripting languages and high-end software platforms. Preq: CPSC 8150 or CPSC 8070.</td>
</tr>
<tr>
<td>CPSC 8170</td>
<td>Physically Based Animation 3 (3)</td>
<td></td>
<td>Study of parallel processing issues including vector and pipeline processors, arrays of processors elements, associative processors, data flow computers, networks of processors. Also includes study of parallel programming language design and implementation of parallel algorithms, and future trends. Students are expected to have completed coursework in computer organization.</td>
</tr>
<tr>
<td>CPSC 8220</td>
<td>Parallel Architecture 3 (3)</td>
<td></td>
<td>Study of parallel processing issues including vector and pipeline processors, arrays of processors elements, associative processors, data flow computers, networks of processors. Also includes study of parallel programming language design and implementation of parallel algorithms, and future trends. Students are expected to have completed coursework in computer organization.</td>
</tr>
<tr>
<td>CPSC 8221</td>
<td>Case Study in Operating Systems 3 (2)</td>
<td></td>
<td>Case study of the design of an operating system. Lab exercises require students to make major changes to the system to enhance its performance on particular workloads. Students are expected to have completed coursework in operating systems. Preq: CPSC 8220.</td>
</tr>
<tr>
<td>CPSC 8222</td>
<td>Advanced Operating Systems 3 (3)</td>
<td></td>
<td>Recent trends in system design and implementation; operating system structures to support reliable secure systems; verification techniques; fault tolerant systems; operating system considerations for closely coupled multiprocessor systems; network operating systems. Students are expected to have completed coursework in operating systems.</td>
</tr>
<tr>
<td>CPSC 8270</td>
<td>Translation of Programming Languages 3 (3)</td>
<td></td>
<td>Study of the design and implementation of modern computer operating systems. Students are expected to have completed coursework in Compiler Construction and Advanced Compiler Construction.</td>
</tr>
<tr>
<td>CPSC 8300</td>
<td>Systems Modeling 3 (3)</td>
<td></td>
<td>Study of parallel processing issues including vector and pipeline processors, arrays of processors elements, associative processors, data flow computers, networks of processors. Also includes study of parallel programming language design and implementation of parallel algorithms, and future trends. Students are expected to have completed coursework in computer organization.</td>
</tr>
<tr>
<td>CPSC 8350</td>
<td>Operating System Design and Implementation 3 (3)</td>
<td></td>
<td>Advanced study of the design and implementation of modern computer operating systems. Students are expected to have completed coursework in Operating System Design and Implementation.</td>
</tr>
<tr>
<td>CPSC 8400</td>
<td>Design and Analysis of Algorithms 3 (3)</td>
<td></td>
<td>Advanced topics in parallel processing issues including vector and pipeline processors, arrays of processors elements, associative processors, data flow computers, networks of processors. Also includes study of parallel programming language design and implementation of parallel algorithms, and future trends. Students are expected to have completed coursework in computer organization.</td>
</tr>
<tr>
<td>CPSC 8450</td>
<td>Bioinformatics Algorithms 3 (3)</td>
<td></td>
<td>Advanced topics in parallel processing issues including vector and pipeline processors, arrays of processors elements, associative processors, data flow computers, networks of processors. Also includes study of parallel programming language design and implementation of parallel algorithms, and future trends. Students are expected to have completed coursework in computer organization.</td>
</tr>
<tr>
<td>CPSC 8510</td>
<td>Software Systems for Data Communications 3 (3)</td>
<td></td>
<td>Advanced study of the design and implementation of modern computer operating systems. Students are expected to have completed coursework in Compiler Construction and Advanced Compiler Construction.</td>
</tr>
</tbody>
</table>
CPSC 8520 Internetworking 3 (3) Network architecture and communication protocols underlying the global interoperability of the Internet. Topics include addressing and routing, interconnection of autonomous networks, naming and name resolution, connection management, flow and congestion control and network management. Preq: CPSC 8510 and ECE 6380.

CPSC 8530 Implementation of TCP/IP Protocols 3 (3) Case study of the architecture of a widely-used implementation of the TCP/IP protocol stack. Source code reviews illustrate layered design and use of core kernel services. Student projects include implementation of a complete IP transport protocol. Preq: CPSC 8220 and CPSC 8520.

CPSC 8550 Embedded Network Systems 3 (3) Discusses hardware fundamentals, technology applications, operating systems, programming platforms, software design and implementation, energy conservation techniques, self-stabilization paradigm, routing algorithms, clustering algorithms, time synchronization algorithms and sensor-actuator integration.

CPSC 8620 Database Management System Design 3 (3) Concepts and structures for design and implementation of a DBMS; theoretical foundations for query systems; data modeling and information representation; user interface and internal system design considerations; system performance modeling and measurement; topics from the literature. Preq: CPSC 6620.

CPSC 8630 Multimedia Systems and Applications 3 (3) Principles of multimedia systems and applications; techniques in effectively representing, processing and retrieving multimedia data such as sound and music, graphics, image and video; operating system and network issues in supporting multimedia; advanced topics in current multimedia research. Term project requires implementing some selected components of a multimedia system.

CPSC 8650 Data Mining 3 (3) Study of principles of data mining: concepts and techniques of data analysis including regression, clustering, classification, association, prediction, etc.; efficient data mining algorithms; data mining applications in various areas including market analysis and management, WWW mining, bioinformatics, etc. Course projects for designing and using data mining algorithms in the applications are required. Students are expected to have knowledge of statistics and database systems.

CPSC 8700 Software Design 3 (3) Fundamental concepts of object modeling using object-oriented analysis and design; realistic application of software engineering principles within a variety of problem domains; mainstream language with facilities for object-training programming. Students who enroll in this course are expected to be proficient in programming in a procedural language.

CPSC 8710 Foundations of Software Engineering 3 (3) Techniques and issues in software design and development; tools, methodologies and environments for effective design, development and testing of software; organizing and managing the development of software projects. Preq: Enrollment in Computer Science program.

CPSC 8720 Software Specification and Design Techniques 3 (3) Techniques, tools, environments and formal methods for software specification and design; verification of design correctness. Students are expected to have completed coursework in software engineering.

CPSC 8730 Software Verification, Validation and Measurement 3 (3) Proofs of correctness; test planning; static and dynamic testing; symbolic execution; automated testing; verification and validation over the software life cycle; software metrics; software maintenance. Students are expected to have completed coursework in software engineering.

CPSC 8750 Software Architecture 3 (3) Creation, analysis and maintenance of architectures for software systems. Basic principles, patterns and techniques. Quality attributes of the architectures are used to make a quantitative analysis. Students create and analyze two architectures from different domains.

CPSC 8770 Fundamentals of Biometric Systems 3 (3) Methods and principles for the automatic identification/authentication of individuals. Technologies include fingerprint, face, iris and hand geometry. Additional topics include biometric system design, performance evaluation, multi-modal biometrics and ethics/privacy issues.

CPSC 8810 Selected Topics 1-3 (1-3) Advanced topics from current problems of interest in computer science. Topics vary from semester to semester. May be repeated for credit, but only if different topics are covered.

CPSC 8880 Directed Projects in Computer Science 1-6 (1-6) Directed individual project supervised by designated faculty. To be taken Pass/No Pass only.

CPSC 8910 Master's Thesis Research 1-12 (1-12) Master’s Thesis Research

CPSC 9400 Topics in Advanced Algorithms 3 (3) Study of selected topics in advanced algorithms drawn from graph algorithms (network flows, matchings, cuts, planarity testing), approximation algorithms (traveling salesman, linear relaxation techniques), distributed algorithms (mutual exclusion, synchronization, self-stabilization), parallel algorithms (parallel prefix, models, sorting), or randomized algorithms (sampling, probabilistic methods, random walks). May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: CPSC 8400.

CPSC 9500 Seminar in Programming Languages 1-3 (1-3) Advanced topics from current problems of interest in programming languages. May be repeated for credit.

CPSC 9570 Seminar in Software Engineering 1-3 (1-3) Advanced topics from current problems of interest in software engineering. May be repeated for credit.

CPSC 9810 Seminar in Computer Science 1-3 (1-3) Topics of current research interest. May be repeated for credit.

CPSC 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

COMMUNITY AND RURAL DEVELOPMENT

CRD 6100 Regional Impact Analysis 3 (3) Techniques for analysis of the growth and decline of regions, including economic-base theory, shift share, regional input-output, regional econometric models, and fixed impact models. Preq: APEC 2020; or both ECON 2110 and ECON 2120.

CRD 6920 Case Study Project 3 (3) Capstone course engaging students in in-depth case study projects in community and economic development. Designed to enhance professional development, career interests, and practical experience. Students may participate in an internship, field experience, service learning activity, or investigation of a community, leadership, or economic development topic. Preq: CRD 3360 and consent of instructor.

CITY AND REGIONAL PLANNING

CRP 6010 Introduction to City and Regional Planning 3 (3) Introduces students from other disciplines to city and regional planning. Spatial and nonspatial aspects of the discipline are explored through a wide ranging lecture/seminar program. Preq: Consent of instructor.

CRP 6030 Seminar on Planning Communication 3 (3) In-depth analysis of methods to communicate planning and policy decisions effectively. Familiarizes students with the various communication skills needed by planners, policy makers, and other professionals to become successful practitioners. Preq: Consent of instructor.

CRP 6120 Urban Transportation Planning 3 (3) Consideration of urban travel characteristics, characteristics of transportation systems, transportation and land-use studies, trip distribution and trip assignment models, city patterns and subdivision layout. Preq: CE 3110 or consent of instructor.
CRP 8000 Human Settlement 3 (3) Overview of forces and trends affecting community growth and change—historical, ecological, economic, demographic, design and development—pertaining to human settlement patterns and their interrelationship in the urbanization process, especially at the national, regional, townscape and neighborhood scale. Team-taught from various perspectives. Intended as a foundation core course for Master’s in Real Estate Development, City and Regional Planning, and Landscape Architecture. Prereq: Consent of instructor.

CRP 8010 Planning Process and Legal Foundations 3 (3) Introduction to the city and regional planning profession and related processes with the legal foundation for comprehensive planning and tools of implementation. Prereq: Consent of instructor.

CRP 8020 Site Planning and Infrastructure 3 (3) Covers the principles and practice of site planning, including site analysis, site design, infrastructure planning; exploration of site planning options for residential, commercial, office, industrial and mixed-use projects; street network, civic space, and open space planning; emphasis on walkable, mixed-use, transit-oriented, sustainable development. Prereq: Consent of instructor.

CRP 8030 Quantitative Analysis 4 (2) Basic tools of quantitative analysis and planning methods in the context of analytical, procedural and institutional needs of the planner. Students learn data collection, analysis and interpretation of different planning problems. Emphasis is placed on understanding the logic of statistical analysis, methods of planning analysis and policy formation. Prereq: Consent of instructor. Coreq: CRP 8070.

CRP 8031 Quantitative Analysis Laboratory 0 (6) Non-credit laboratory to accompany CRP 8030. Coreq: CRP 8030.

CRP 8040 Land Use Analysis and Assessment 4 (2) Introduction to basic methods of land use planning including land suitability analysis, land use forecasts and formulating alternative land use plans. Development impact assessment and project appraisal methods are introduced to evaluate land use plans. Prereq: CRP 8030. Coreq: CRP 8041.

CRP 8041 Land Use Analysis and Assessment Laboratory 0 (6) Non-credit laboratory to accompany CRP 8040. Coreq: CRP 8040.

CRP 8050 Planning Theory and History 3 (3) Development of the planning practice and theories of planning process: historical evolution of planning practice in the U.S., social issues in planning, theories of planning and critiques of those theories and ethical issues in planning practice. Prereq: Consent of instructor.

CRP 8060 Urban Systems and Growth Management 3 (3) Overview of basic principles of resource allocation including public finance and project appraisal techniques. Introduces infrastructure planning and capital improvement plans followed by basic concepts of growth management and an overview of growth management laws and tools. Course is team-taught to address diverse subject matter. Prereq: Consent of instructor.

CRP 8070 Professional Studio 4 (1) Serves as a vehicle for synthesis and application of skills developed in other courses and includes participation in one or more real-world planning projects in addition to seminars and readings devoted to development of professional practice skills. Prereq: Consent of instructor. Coreq: CRP 8070.

CRP 8071 Professional Studio Laboratory 0 (9) Non-credit laboratory to accompany CRP 8070. Coreq: CRP 8070.

CRP 8090 Current Issues in Planning 1 (1) Students are exposed to current practice issues in various fields of the planning profession through a series of guest speakers representing various areas of planning practice. The course is organized around the various concentration areas of the Clemson MCRP program. Prereq: Enrollment in MCRP program.

CRP 8130 Fundamentals of Transportation Planning 3 (3) Identifies issues and questions transportation planners face, characterizes policy shaping transportation, instructs on methods to solve transportation planning problems and portrays the political and organizational environment in which transportation planners operate. Students integrate concepts and considerations via a systems approach with sensitivity to the transportation planning environment. Prereq: Consent of instructor.

CRP 8140 Public Transit 3 (3) Familiarizes students with core concepts and practices in public transit. Course modules examine modes and design, planning issues and organizational environments inherent to public transit and technical operations. Course concludes with an examination of comprehensive transit systems. Prereq: Consent of instructor.

CRP 8150 Transportation-Related Innovation 3 (3) Transportation knowledge, research and ideas. Students are encouraged to collect information already obtained or via the visionary thinking and interaction skills needed to become transportation leaders. Prereq: CRP 8130.

CRP 8200 Negotiation and Development Dispute Resolution 3 (3) Skill-building course in conflict resolution and consensus building through bargaining and negotiation, primarily in the design professions. Students play active roles in discovering, applying, reflecting on and critiquing the theories, styles and techniques of conflict resolution and consensus building that work in different types of disputes. Students must be enrolled in a graduate-level design related field of study to enroll in this course.

CRP 8220 Urban Design 3 (3) Urban design theory and practice covering both project design and regulatory frameworks; analysis of historical precedents and current theories; review of the urban design process, including urban landscape analysis, problem identification, development of alternatives, and plan generation; special focus on form-based codes. Prereq: Consent of instructor.

CRP 8340 Spatial Modeling Using GIS 3 (2) Use of geographic information systems (GIS) in spatial analysis, information management and synthesis of spatial patterns and processes. Emphasizes developing an operational understanding of the modeling techniques and data used in different applications such as land use allocation, corridor location, site location and market analysis, environmental assessment and cost-benefit analysis. Prereq: CRP 6340 or CRP 8040; or consent of instructor. Coreq: CRP 8341.

CRP 8341 Spatial Modeling Using GIS Laboratory 0 (3) Non-credit laboratory to accompany CRP 8340. Coreq: CRP 8340.

CRP 8350 GIS and Remote Sensing Applications for Trend Analysis 3 (2) Principles of remote sensing and land information systems in trend analysis. Addresses aspects of change detection for monitoring natural resources and urban growth. Designed for those interested in planning, natural resources management and environmental analysis. Lectures and hands-on laboratory work emphasize the use of imagery for database generation and analysis. Prereq: CRP 6340 or CRP 8040 or 8340; or consent of instructor.

CRP 8351 GIS and Remote Sensing Applications for Trend Analysis Laboratory 0 (3) Non-credit laboratory to accompany CRP 8350. Coreq: CRP 8350.

CRP 8400 Seminar in Coastal Planning 3 (3) Issues relating to development and conservation of coastal environments, focusing on inherent tradeoffs between growth and environmental quality. Discusses ecology and carrying capacity of coastal areas and appropriate management approaches to balance coastal resource demand. Prereq: Consent of instructor.

CRP 8410 Seminar in Environmental Planning 3 (3) Current and emerging environmental issues and appropriate planning options, including population dynamics and limits to growth, entropy law, waste management and global climate change; students pursue individual research on an environmental issue of particular concern and report findings. Prereq: Consent of instructor.

CRP 8440 Outdoor Recreation Resource Management and Planning 3 (3) Issues relating to planning and development of natural areas for recreational purposes. Emphasis is on the policy-making process at the federal, state, regional and local levels. Prereq: Consent of instructor.

CRP 8450 Water Policy and Law 3 (3) Surveys the history, science, economics, politics, legal framework and current debates regarding the allocation of freshwater resources in the U.S., with emphasis on relevant Southeastern issues. Scientists, engineers, planners, landscape architects, policy makers and economists will benefit from understanding water allocation and associated conflicts.

CRP 8580 Research Design 3 (3) Provides opportunity for students in their final year of study in the planning program to develop a proposal for the terminal project or thesis. Students are responsible for completing the research, writing and editing necessary for an acceptable proposal. Prereq: Consent of faculty.

CSEN 8050 Soil Fertility 3 (3) Soil properties affecting nutrient availability and plant growth; inventory of major soil groups with reference to plant stress features; behavior of essential elements in soils in relation to plant availability; current soil fertility research. Offered spring semester of even-numbered years only. Preq: CSEN 4030 or CSEN 4520.

CSEN 8060 Special Problems 1-3 (1-3) Research not related to a thesis.

CSEN 8071 Soil Physics Laboratory 0 (3) Non-credit laboratory to accompany CSEN 8070. Coreq: CSEN 8070.

CSEN 8080 Soil Chemistry 3 (2) Principles and theories concerning the structure and chemical properties of soil colloids, ion exchange and surface phenomena, chemical equilibria, soil acidity and oxidation-reduction reactions. Offered fall semester of odd-numbered years only. Coreq: CSEN 8081.

CSEN 8081 Soil Chemistry Laboratory 0 (3) Non-credit laboratory to accompany CSEN 8080. Coreq: CSEN 8080.

CSEN 8100 Soil Microbiology 3 (3) Biological nitrogen fixation, mycorrhizal fungi and pesticide interactions in soils with emphasis on microbial-plants-soil relationships. Offered fall semester of even-numbered years only. Preq: CSEN 6900 or MICR 6100; and consent of instructor.

CSEN 8120 Crop Ecology and Land Use 3 (3) Concepts and factors affecting adaptation and distribution of crop plants; microclimate and crop response to environmental factors with modifications of microclimate by agricultural operations; interactions among crop plants and between weeds and crop plants under field conditions. Offered fall semester of even-numbered years only.

CSEN 8240 Mode of Action of Growth Substances 4 (3) Study of the physiology and biochemistry of both natural and synthetic growth regulators, hormones, growth retardants, herbicides and other inhibitors. Considers methodology and mechanism of action. Offered spring semester of odd-numbered years only. Preq: BIOL 6010 and BIOL 6020 and general biochemistry; or BIOL 8220; or consent of instructor. Coreq: CSEN 8241.

CSEN 8241 Mode of Action of Growth Substances Laboratory 0 (3) Non-credit laboratory to accompany CSEN 8240. Coreq: CSEN 8240.

CSEN 8500 Agricultural Biotechnology 2 (2) Fundamentals of biotechnology for students specializing in applied life sciences. Scientific principles, limitations, novel concepts and applications to biotechnology in agricultural industry.

CSEN 8900 Special Topics in Agronomy 1-3 (1-3) Group discussion of recent developments in agronomic research. May be repeated for a maximum of six credits. Preq: Consent of instructor.

CONSTRUCTION SCIENCE AND MANAGEMENT

CSM 6550 Reducing Adversarial Relations in Construction 3 (3) Focuses on the study of the delivery of projects and how adversarial relations can affect the successful completion of the venture. Topics include management of human resources, understanding the needs and processes of the participants, where problems lie, methods of avoiding and settling disputes. Preq: Construction Science and Management or Architecture major, and senior standing; or consent of department chair.

CSM 8520 Construction Management Research 3 (3) Research methodology applied to the construction industry. Preq: Consent of instructor.

CSM 8600 Construction Financial Planning and Analysis 3 (3) Theory of financial management as it relates to the financial challenges faced by the construction firm. Preq: Consent of instructor.

CSM 8610 Construction Control Systems 3 (3) Development and analysis of cost, resource and quality control programs for a company's construction projects. Preq: Consent of instructor.

CSM 8620 Personnel Management and Negotiations 3 (3) The role of management and unions in the construction industry. Topics include contract negotiation, collective bargaining, dispute resolution and management for productivity improvement. Preq: Consent of instructor.

CSM 8630 Advanced Planning and Scheduling 3 (3) Analysis and control of construction projects using advanced techniques for planning, scheduling and resources control. Preq: Consent of instructor.

CSM 8635 Construction Business Strategy and Marketing 3 (3) Techniques for business strategy development and management of various types of construction companies. Preq: Consent of instructor.

CSM 8650 Project Management 3 (3) Theory of project administration and control with special emphasis on the role and responsibilities of the project manager. Preq: Consent of instructor.

CSM 8660 Contractor Role in Development 3 (3) Addresses the various roles and responsibilities of the contractor in development including discussion of the owner/designer/constructor relationship. Does not count toward Master’s in Construction Science and Management degree requirements. Preq: Consent of instructor.

CSM 8810 Professional Seminar 3 (3) New and emerging methods for management of the construction or construction-related firm. Preq: Consent of instructor.

CSM 8820 Construction Science and Management I 3 (6) The technical, conceptual, and algorithmic foundations of computer graphics. Covers the Unix operating system, scripting, C programming, and an interactive graphics API. Not open to Computer Engineering, Computer Information Systems or Computer Science majors.

CSM 8830 Construction Science and Management II 3 (3) The mathematical and algorithmic foundations of computer graphics. Covers spatial data structures, object oriented programming in C++, mathematics for graphics, and 3D graphics API. Preq: CSM 6000 or consent of instructor. Not open to Computer Science, Computer Engineering, or Computer Information Systems majors.

CSM 8910 Master’s Thesis Research 1-9 (1-9) With approval of the advisory committee, students carry out independent research and analysis. Thesis is presented orally and in writing and in strict compliance with the guidelines of the Graduate School.

DIGITAL PRODUCTION ARTS

DPA 6000 Technical Foundations of Digital Production 1 3 (3) The technical, conceptual, and algorithmic foundations of computer graphics. Covers the Unix operating system, scripting, C programming, and an interactive graphics API. Not open to Computer Engineering, Computer Information Systems or Computer Science majors.

DPA 6020 Visual Foundations of Digital Production 1 3 (6) Presents the visual foundations underlying computer graphics production. Covers perspective, observational drawing, color and value, principles of composition and design, and storyboarding. Incorporates the studio method, requires students in hands-on work and the critique process, and stresses examples from the history of art, animation and film. Not open to Architecture or Visual Arts majors.

DPA 6030 Visual Foundations of Digital Production II 3 (6) Extends the foundational visual principles underlying computer graphics production begun in DPA 4020. Stresses representation of the figure in drawing and the use of cameras. Incorporates the studio method and the critique process, and stresses examples from the history of art, animation and film. Preq: DPA 4020 or consent of instructor. Not open to Architecture or Visual Arts majors.

DPA 6800 Digital Production Studio I 1-6 (1-6) Students develop as accomplished visual problem solvers in a digital production team setting. As part of the studio experience, students take a production project from concept, through story development, character design, modeling and rigging, animation, lighting, and post production. May be repeated for a maximum of 12 credits. Preq: Enrollment in the Digital Production Arts program.

DPA 8800 Graduate Research Studio I 1-6 (1-6) Students complete a project or projects, under the direction of a faculty adviser, in an area supporting personal goals and vision. Work may be individually or team oriented, and may be of a technical or an artistic nature. May be repeated for a maximum of six credits. Preq: Enrollment in the Digital Production Arts program.

DPA 8910 Master of Fine Arts Thesis Research 1-6 (1-6) Students complete a studio research project, under the guidance of the student’s advisor and thesis committee. The thesis project is developed to a refined degree, articulated in the form of a written document, and presented orally in a thesis defense. May be repeated for a maximum of six credits.
ECE 6040 Semiconductor Devices 3 (3) Consideration of the principles of operation, external characteristics, and applications of some of the more important semiconductor devices presently available. Prereq: ECE 3200. Coreq: MTHS 3110 or MTHS 4340.

ECE 6050 Introduction to Microelectronics Processing 3 (3) Microelectronic processing, MOS and bipolar monolithic circuit fabrication, thick and thin film hybrid fabrication, applications to linear and digital circuits, fundamentals of device design. Prereq: ECE 3200. Coreq: MTHS 3110 or MTHS 4340.

ECE 6170 Elements of Software Engineering 3 (3) Foundations of software design, reasoning about software, the calculus of programs, survey of formal specification techniques and design languages. Prereq: ECE 3220 and ECE 3520 and MTHS 4190.

ECE 6180 Power System Analysis 3 (3) Study of power systems operation and planning. Topics include load flow, economic dispatch, fault studies, transient stability, and control of problems. System modeling and computer solutions are emphasized through class projects. Prereq: ECE 3600 and ECE 3800.

ECE 6190 Electric Machines and Drives 3 (3) Performance, characteristics, and modeling of AC and DC machines during steady-state and transient conditions. Introduction to power electronics devices and their use in adjustable speed motor drives. Prereq: ECE 3210 and ECE 3600 and ECE 3800. Coreq: MTHS 3110 or MTHS 4340.

ECE 6200 Renewable Energy Penetration on the Power Grid 3 (3) Introduces the basic definition of electrical power, interfacing primary sources, generator/load characteristics, and renewable energy resources. Topics include solar energy grid interfacing, wind energy grid interfacing, battery charging/management, harmonic distortion, voltage sags, and national standards. Prereq: ECE 3070 or ECE 3200.

ECE 6220 Electronic System Design I 3 (2) Emphasizes the application of theory and skills to the design, building, and testing of an electronic system with both analog and digital components. Application varies each semester. Computer software tools are used extensively in the design process. Prereq: ECE 3210 and ECE 3300 and ECE 3600 and ECE 3710 and ECE 3810. Coreq: ECE 6221.

ECE 6221 Electronic System Design I Laboratory 0 (2) Non-credit laboratory to accompany ECE 6220. Coreq: ECE 6220.

ECE 6290 Organization of Computers 3 (3) Computer organization and architecture. Topics include a review of logic circuits, bus structures, memory organization, interrupt structures, arithmetic units, input-output structures, state generation, central processor organization, control function implementation, and data communication. Registered Transfer Language (RTL) for description and design of digital systems. Prereq: ECE 2720 or consent of instructor.

ECE 6300 Digital Communications 3 (3) Introduction to modern digital communication systems, emphasizing modulation and detection, taking into account the effects of noise. Prereq: ECE 3170 and ECE 3300.

ECE 6320 Instrumentation 3 (3) Theory and analysis of transducers and related circuits and instrumentation. Generalized configurations and performance characteristics of instruments are considered. Transducer devices for measuring physical parameters such as motion, force, torque, pressure, flow, and temperature are discussed. Prereq: ECE 3210. Coreq: MTHS 3110 or MTHS 4340.

ECE 6350 Grounding and Shielding 3 (3) Introduction to electromagnetic compatibility concepts and techniques for students who will be designing or working with electronic systems when they graduate. Topics include electromagnetic interference and noise control, crosstalk and signal integrity, grounding, filtering, shielding, circuit board layout, lighting and electrostatic discharge protection. Prereq: ECE 3810.

ECE 6360 Microwave Circuits 3 (3) Analysis of microwave networks comprising transmission lines, waveguides, passive elements, interconnects, and active solid state microwave circuits. Use of modern CAD tools to design RF/Microwave passive/active networks. Fabrication of typical circuits. Prereq: ECE 3810. Coreq: MTHS 3110 or MTHS 4340.

ECE 6380 Computer Communications 3 (3) Digital data transmission techniques, satellites and communications channels, communications software and protocols, multiprocessors and distributed processing, cryptography and cooperation of distributed processes. Prereq: ECE 3810. Coreq: MTHS 3110 or MTHS 4340.

ECE 6490 Computer Network Security Laboratory 0 (4) Non-credit laboratory to accompany ECE 6490. Coreq: ECE 6490.

ECE 6530 Robot Manipulators 3 (3) Analysis of robot manipulator systems with special focus on interaction of these technologies with society. Emphasis is on rigid-link robot manipulator systems. Topics include history of robot technology, kinematics, dynamics, control, and operator interfaces. Case studies reinforce impact of robot technology on society and vice versa. Prereq: MTHS 2060 and MTHS 3110 or consent of instructor.

ECE 6570 Fundamentals of Wind Power 3 (3) Introduces wind turbine systems, including wind energy potential and application to power generation. Topics include wind energy principles, wind site assessment, wind turbine components, power generation machinery control systems, connection to the electric grid, and maintenance. Prereq: ECE 3070 or ECE 3200 or consent of instructor.

ECE 6590 Integrated Circuit Design 3 (2) Design concepts and factors influencing the choice of technology; fundamental MOS device design; silicon foundries, custom and semicustom integrated circuits; computer-aided design software/hardware trends and future developments; hands-on use of CAD tools to design standard library cells; systems design considerations, testing, and packaging. Prereq: ECE 3210. Coreq: MTHS 3110 or MTHS 4340.

ECE 6591 Integrated Circuit Design Laboratory 0 (2) Non-credit laboratory to accompany ECE 6590. Coreq: ECE 6590.

ECE 6610 Fundamentals of Solar Energy 3 (3) Introduces solar energy conversion systems. Topics include environmental benefits of solar energy, solar thermal systems, concentration solar power, photovoltaic (PV) cell design and manufacturing, sizing of PV system, hybrid photovoltaic/thermal systems, energy storage, and urban/rural applications. Prereq: ECE 3200.

ECE 6670 Introduction to Digital Signal Processing 3 (3) Introduction to characteristics, design, and applications of discrete time systems; design of digital filters; introduction to the Fast Fourier Transform (FFT); LSI hardware for signal processing applications. Prereq: ECE 3300.

ECE 6680 Embedded Computing 3 (2) Principles of using computing in the larger context of a system. Topics include bus and processor design types (e.g., microprocessor, microcontroller, DSP), codes, digital circuit power management, real time scheduling, and embedded operating systems. Lab work consists of projects on embedded hardware (e.g., PC-104+). Prereq: ECE 2230 and ECE 3710 or consent of instructor. Coreq: ECE 6681.

ECE 6681 Embedded Computing Laboratory 0 (2) Non-credit laboratory to accompany ECE 6680. Coreq: ECE 6680.

**Coreq:** ECE 8111.

**Preq:**
- Use of CAD tools to design MOS standard cells.
- Understanding of computer-aided design software/hardware.
- Concepts and factors influencing the choice of foundries.
- Background in custom and semicustom integrated circuit design.

**Preq or Cons:**
- Operating problems in load flow, scheduling and state estimation.
- Development of models of transmission line components.
- Analysis of modulation and detection for communication systems.
- Design and implementation of error control coding and decoding.
- Scalability analysis.

**Course Structure:**
- Classroom study
- Non-credit laboratory to accompany ECE 8110.
- May be repeated for a maximum of six credits.
ECE 8400 Physics of Semiconductor Devices 3 (3) Semiconductor device physics emphasized rather than circuits; detailed analysis of the p-n junction, traps, surface states and conduction processes, and devices; analysis and models of Schottky diodes, MIS diodes, MOSFETs, charge coupled devices and solar cells; charge control concepts, transit time effects, surface-type devices and practical aspects of device processing. Preq: ECE 4040 and ECE 4060.

ECE 8420 Computer Architecture 3 (3) Fundamental issues that arise in the composition of logic elements into computer systems; design and analysis of processors, busses, memory hierarchies, communications controllers and associated software. Preq: ECE 4290.

ECE 8440 Digital Signal Processing 3 (3) Digital filter design; discrete Hilbert transforms; discrete random signals; effects of finite register length in digital signal processing; homomorphic signal processing; power spectrum estimation; speech processing, radar and other applications. Preq: ECE 4670.

ECE 8460 Digital Processing of Speech Signals 3 (3) Application of digital signal processing techniques to problems related to speech synthesis, recognition and communication; digital models and representations of speech wave forms; Fourier analysis; homomorphic processing; linear predictive coding; algorithms for recognizing isolated words and continuous speech; man-machine communications by voice. Preq: ECE 4670.

ECE 8470 Digital Image Processing 3 (3) Review of fundamental concepts, issues and algorithms in image processing. Includes image formation, file formats, filters, edge detection, stereo, motion and color. Preq: ECE 4670.

ECE 8480 Telecommunication Network Modeling and Analysis 3 (3) Protocols, modeling and analysis of telecommunication networks with emphasis on quantitative performance modeling of networks and systems using packet switching and circuit switching techniques. Preq: CPSE 8520 or ECE 4380.

ECE 8490 Advanced Topics in Computer Communications 3 (3) Performance analysis and design of computer communication networks with emphasis on recent developments: routing flow control, error control, and end-to-end performance analysis, local area, packet radio and long haul store-and-forward networks. Preq: ECE 4380 or ECE 4400; and consent of instructor.

ECE 8500 QoS in Wireless Networks 3 (3) Design principles and core techniques for quality assured communications in Internet and wireless networks. Introduces protocols and mathematical foundations of IntServ, DiffServ and traffic engineering. Covers mobility aware, channel adaptive and cross layer QoS assurance techniques. Preq: ECE 6380 and ECE 6400; or consent of instructor.

ECE 8510 Advanced Topics in Computer Architecture 3 (3) Analysis and design of multiprocessor and modular computer systems; recent developments in integration, fabrication and application of multiprocessor systems. Preq: ECE 8420.

ECE 8540 Analysis of Robotic Systems 3 (3) Methods of designing and operating robotics systems for advanced automation; on-line identification and description of 3-D objects by digitized images; off-line collision-free path planning and on-line collision avoidance traveling using artificial intelligence. Preq: ECE 4560 or ME 4560; or consent of instructor.

ECE 8550 Artificial Intelligence 3 (3) Emulating intelligent behavior by computer; models of cognitive processes; logical foundations; constraint satisfaction problems; natural language understanding; pattern-directed inference and chaining paradigms; goal-directed behavior, planning and search; learning; advanced database structure and inference strategies; examples of LISP, PROLOG, and OP5. Preq: ECE 4420.

ECE 8560 Pattern Recognition 3 (3) Several approaches to general pattern recognition problems with practical computer-oriented applications; feature extraction; classification algorithms; discriminant functions; learning schemes; statistical methods; information theoretic approaches; applications; current developments.

ECE 8570 Coding Theory 3 (3) Principles of algebraic coding and its application to transmission of information over noisy communications channels; introduction to abstract algebra; code performance bounds; code representations; linear codes of the Hamming and Bose-Chaudhuri-Hocquengem types and burst-error correcting codes; problems of implementation and decoding.

ECE 8590 Intelligent Robotic Systems 3 (3) Integration and fusion of data from multiple sensors on multiple robots; intelligent decision making on motion planning and execution based on sensed data involving both compliance; simultaneous localization and position controls using computers. Preq: ECE 8470 or ME 8540.

ECE 8600 Advanced Coding Theory 3 (3) Introduction to convolutional codes and trellis-coded modulation. Topics include code generation and representation, distance properties, decoding techniques, performance analysis, multidimensional codes and lattice theory and coding for fading channels; applications to wireless communications and mobile communications. Preq: ECE 6300 or ECE 8200; and ECE 8570.

ECE 8620 Real Time Computer Application in Power Systems 3 (3) Principles of monitoring, control and operation of power systems; load frequency control, on-line load flow, power system state estimation, unit commitment and load forecasting. Preq: ECE 4180.

ECE 8630 Power System Dynamics and Stability 3 (3) Modeling of synchronous machines and their control systems; power system stability for small and large disturbances; excitation systems, governor control, power system stabilizers and state variables formulation for power systems dynamic stability studies. Preq: ECE 4180 and ECE 4190.

ECE 8680 Architectural Robotics 3 (3) Focuses on understanding, developing and testing robotic systems for the built environment. Collaborative teams of students from Electrical and Computer Engineering and Architecture and their allied disciplines study and develop working robotic prototypes responsive to challenges and opportunities of living in today's built and natural environments. Preq: Consent of instructor.

ECE 8690 Advanced Kinematics in Robotics 3 (3) Complex robotic systems, such as multi-fingered robot hands, dual-armed robots and multi-fingered “snake-like” robots; kinematic redundancy, load distribution and dexterous manipulation; effective modeling and solution techniques for these types of underactuated systems. Preq: ECE 4090 and ECE 4550.

ECE 8720 Artificial Neural Networks 3 (3) Design, analysis and application of artificial neural networks; neuron models, network architectures, training (supervised and unsupervised) and hardware implementation; extended studies of selected applications and simulation exercises. Preq: MTHS 3110 or consent of instructor.

ECE 8730 Parallel and Distributed Systems 3 (3) Design, analysis and evaluation of algorithms for parallel and distributed computer systems; time complexity, speedup, efficiency and isoefficiency; communication costs; numerical algorithms including solving systems of equations (both sparse and dense) as well as symbolic algorithms; substantial parallel programming projects.

ECE 8740 Advanced Nonlinear Control 3 (3) Basics of nonlinear control based on Lyapunov techniques; adaptive control design, robust control design and observer design; understanding and development of Lyapunov control design tools. Preq: ECE 8010.

ECE 8770 Computer Vision 3 (3) Investigation into fundamental concepts, issues and algorithms in computer vision. Includes segmentation, texture, detection, 3-D reconstruction, camera calibration, shape and energy minimization. Preq: ECE 847.

ECE 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

ECE 8920 Special Problems in Electrical and Computer Engineering 1-3 (1-3) Term paper, special design, or other problems in electrical and computer engineering approved by the instructor. May not be used for investigation associated with the MS thesis or the engineering report. May be repeated for credit.

ECE 8930 Selected Topics in Electrical and Computer Engineering 1-3 (1-3) Topics not covered in other courses; current literature and results of current research. Topics vary from year to year in keeping with developments in the field. May be repeated for credit.

ECE 9030 Computer Architecture Seminar 1 (1) Recent research publications related to computer architecture including parallel systems, distributed computing, reconfigurable architectures and software development for high performance computing. Students read and discuss one research paper weekly and present one research paper each semester. May be repeated for a maximum of three credits. Preq: Consent of instructor.
ECE 9040 Computer Vision Seminar 1 (1) Review of recent research publications related to computer vision including tracking, correspondence, reconstruction and segmentation. Students read and discuss one research paper per week and present one research paper each semester. May be repeated for a maximum of three credits.

ECE 9050 Computer Security Seminar 1 (1) Review of current research publications related to computer and network security including software assurance, biometrics, applied cryptography and other security relevant topics. Students read and discuss one research paper weekly and present one or more research papers each semester. May be repeated for a maximum of three credits.

ECE 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

ECON 6110 Economics of Education 3 (3) Analysis of the essential aspects of international economic linkages. Discusses gains and redistributive effects of trade and the barriers to trade within the context of a variety of economic models. Also discusses the history of trade policy and the political economy of its determination. Preq: ECON 3140 or consent of instructor.

ECON 6120 International Microeconomics 3 (3) Examination of macroeconomic linkages between an individual country and the rest of the world and how these linkages are affected by the choice of exchange rate systems. Topics include examination between domestic and foreign interest rates and exchange rates and the ability to pursue independent monetary policies. Preq: ECON 3150.

ECON 6122 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

ECON 6140 or consent of instructor.

ECON 6150 Applied Microeconomic Research 3 (3) Students conduct research in applied microeconomics. Topics vary according to student and professor interests. Students read papers in the literature, formulate their own economic hypotheses, and collect and analyze data to test those hypotheses. May be repeated for a maximum of twelve credits, but only if different topics are covered. Preq: ECON 3140 and either of ECON 4050 or ECON 6050, or consent of instructor.

ECON 6170 Elements of Economic Theory 3 (3) Surveys the key microeconomic and macroeconomic content of the discipline. Preq: ECON 3140 or ECON 3150.

ECON 6200 Advanced Econometrics 3 (3) Review of statistical inference using multiple regression (OLS) analysis and model specification. Topics include multicollinearity, heteroscedasticity, and serial correlation; two-staged least squares and instrumental variable models; simultaneous equations models; limited dependent variable models using maximum likelihood estimation and time-series analysis; and presentation of results in technical writing. Preq: ECON 4050 or consent of instructor.

ECON 6210 International Microeconomics 3 (3) Analysis of the essential aspects of international economic linkages. Discusses gains and redistributive effects of trade and the barriers to trade within the context of a variety of economic models. Also discusses the history of trade policy and the political economy of its determination. Preq: ECON 3140 or consent of instructor.

ECON 6220 Monetary Economics 3 (3) Intensive study of the role of monetary factors in economic change. Modern monetary theories and their empirical relevance for policy are developed against a background of monetary history and institutions. Preq: ECON 3140 and ECON 3150 or consent of instructor.

ECON 6230 Economics of Health 3 (3) Applies microeconomic theory to examine the demand for health services and medical care, the market for medical insurance, the behavior of physicians and hospitals, and the role of government in healthcare provision and regulation. Preq: ECON 3140.

ECON 6240 Organizational Economics 3 (3) Empirical, historical, and theoretical analyses of market structure and concentration in American industry: the effects of oligopoly, monopoly and cartelization upon price, output, and other policies of the firm; antitrust and other public policies and problems are studied. Preq: ECON 3140 or consent of instructor.

ECON 6250 Advanced Econometrics 3 (3) Analysis of the economic and legal issues created by the exercise of market power. The motivation and execution of government policy towards mergers, predatory conduct, and various restraints of trade are intensively examined. Preq: ECON 3090 or ECON 3140 or consent of instructor.

ECON 6260 Seminar in Sports Economics 3 (3) Economic analysis of sports teams, leagues, and institutions. Topics include antitrust issues, public funding of sports venues, labor relations, wagering markets, athlete compensation, and application of economic principles to sports settings. Empirical research project is cornerstone of course. Preq: ECON 3140 and ECON 4050; or consent of instructor.

ECON 6270 Development of the American Economy 3 (3) Explores several topics relevant to understanding the American experience. Considers the institutions and developments critical to America's ascendancy from a small country to a dominant global economic power. Investigates immigration, innovation, education, finance, and the changing role of race and gender in the economy. Preq: ECON 3140 and ECON 3150.

ECON 6290 Cost-Benefit Analysis 3 (3) Develops techniques for the appraisal of public expenditure programs with particular emphasis on investment in infrastructure. Topics include choice of an appropriate discount rate and the calculation of social costs and benefits in the presence of market distortions. Preq: ECON 3140 or consent of instructor.

ECON 6300 Topics in Mathematical Economics 3 (3) This course develops the mathematical tools underlying economic analysis and prepares students for doing advanced theoretical work in economics. The topics covered in this course provide excellent preparation for advanced economics courses, and lay the foundation for doing quantitative analysis associated with both career work and graduate study in economics. Preq: ECON 3140; and either MTHS 1080 or MTHS 2070.

ECON 6400 Game Theory 3 (3) Introduction to the formal analysis of strategic interaction among rational, self-interested rivals. Basic theoretical aspects of games are discussed and applied to such topics as bargaining, voting, auctions, and oligopoly. Preq: ECON 3140 and MTHS 1060; or ECON 4300; or consent of instructor.

ECON 6550 Applied Microeconomic Research 3 (3) Students conduct research in applied microeconomics. Topics vary according to student and professor interests. Students read papers in the literature, formulate their own economic hypotheses, and collect and analyze data to test those hypotheses. May be repeated for a maximum of twelve credits, but only if different topics are covered. Preq: ECON 3140 and either of ECON 4050 or ECON 6050, or consent of instructor.

ECON 6570 Natural Resource Use, Technology, and Policy 3 (3) Focuses on economic analyses of actual, efficient, and sustainable uses of natural resources, impacts of technologies that affect these uses, and policies that affect development and use of such technologies. Resource-technology-policy combinations may vary, but an example is crude oil, hybrid automotive engines, and fuel economy standards. May also be offered as APEC 6570. Preq: MTHS 1020 or MTHS 1060; and APEC 3570 or CRD 3570 or ECON 3140.

ECON 7510 Selected Topics for Teachers 3 (3) Current economic policy issues such as inflation, regulation, protectionism and energy policy. Emphasis is on the presentation of these topics to secondary school students. Topics vary from year to year. May be repeated for credit. Preq: ECON 2000 and ECON 2110.

ECON 8000 History of Economic Thought 3 (3) Development of economic thought from early Greek to Keynesian economics; writings of major economists such as Smith, Ricardo, Marx, Marshall and Keynes; development of major economic theories.

ECON 8010 Microeconomic Theory 3 (3) Microeconomic theory and its use to analyze and predict the behavior of industries, firms and consumers under various market conditions. Offered fall semester only. Required of all first-year PhD students.

ECON 8020 Advanced Economic Concepts and Applications 3 (3) Rigorous development of price hypotheses. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: ECON 3140 or consent of instructor.

ECON 8020 Applied Mathematical Economics 3 (3) Discusses mathematical tools needed in economic analysis: matrix algebra, differentiation, unconstrained and constrained optimization, integration and linear programming. Offered fall semester only. Required of all first-year PhD students.
Courses of Instruction

ECON 8050 Macroeconomic Theory 3 (3) Macroeconomic theory involving static and dynamic models and their use in analysis of economic problems and policies. Offered spring semester only. Required of all first-year PhD students.

ECON 8060 Econometrics 1 3 (3) Application of econometric techniques and stochastic models to economic problems. Considers distribution theory, simple and multiple regression modeling, hypothesis testing and other issues in regression analysis. Required of all first-year PhD students.

ECON 8070 Econometrics II 3 (3) Economic models expressed as systems of equations; problems of identification, parameter estimation, measurement errors and statistical inference; techniques of simulation, forecasting, model validation and interpretation. Offered spring semester only. Required of all first-year PhD students.

ECON 8080 Econometrics III 3 (3) Continuation of ECON 8070. Covers current economic models and estimation procedures. Offered spring semester only. Prq: ECON 8070.

ECON 8090 Advanced Natural Resource Economics 3 (3) Applications of economic theory to problems of natural resource management, epistemological considerations, rent theory, public and private investment criteria, benefit-cost analysis and general equilibrium management models. May also be offered as APEC 8090. Offered spring semester only. Prq: ECON 3140.

ECON 8100 Natural Resources Management and Policy 3 (3) Economic, institutional and legal aspects of control and management of natural resources; concepts of economic science applied to public policy questions related to land and water resources. Specialized background in economics is not necessary. May also be offered as APEC 8100. Offered fall semester only. Prq: ECON 3140.

ECON 8110 Economics of Environmental Quality 3 (3) Pricing and distributional effects of economic growth and pollution on the environment. Prq: ECON 3140.

ECON 8150 Economic History of the United States 3 (3) Introduces approach of modern economic history, which emphasizes the use of modern economic theory and statistical methods to answer questions of long-standing interest to economists and historians. Covers all major periods of U.S. history from the colonial era through the emergence of the modern welfare state. Prq: ECON 8010 and ECON 8050.

ECON 8160 Labor Economics 3 (3) Wage and employment theory; labor markets; labor history; current problems in labor and manpower economics.

ECON 8170 Advanced Production Economics 3 (3) Discusses production economics theory in a quantitative framework; technical and economic factor-product, factor-factor, and product-product relationships in single- and multi-product firms under conditions of perfect and imperfect competition in both factor and product markets. May also be offered as APEC 8170. Offered spring semester only. Prq: APEC 4020; and APEC 3080 or ECON 4050.

ECON 8200 Public Finance 3 (3) Impact of government on resource allocation, income distribution and stability; role of regulation; principles of taxation.

ECON 8210 Public Choice 3 (3) Economic theory to analyze collective decisions. Topics include the pure theory of collective choice and applied analyses of democratic governments and their policy processes.

ECON 8220 Public Policy Economics 3 (3) Covers contemporary public policy, including price and resource policy, affecting rural areas. Discusses public participation, or the lack thereof, related to programs designed to implement public policy. May also be offered as APEC 8220. Offered spring semester only. Prq: ECON 3140.

ECON 8230 Microeconomics for Public Policy 3 (3) Economic aspects of public policy making: individual behavior as governed by the market and other incentive mechanisms. Equips students with methodological tools for evaluating public policies. Prq: Consent of instructor.

ECON 8240 Organization of Industry 3 (3) The structure of markets and firms; forces that determine the size of firms and the boundaries of markets; the behavior of firms, both singly and in concert, to exploit market positions. May also be offered as APEC 8240. Offered spring semester only. Prq: ECON 3140.

ECON 8250 Antitrust Economics 3 (3) Theoretical analysis of monopoly, monopolizing practices and the exercise of market power. Study of government policy towards mergers, predation and restraints of trade.

ECON 8260 Economic Theory of Government Regulation 3 (3) The scope of governmental regulation in the economy of the United States, its evolution and development, the application of the tools of economic analysis to the issues of regulated enterprise. Prq: ECON 3140.

ECON 8270 Economics of Property Rights 3 (3) Analyzes the evolution and impact of various property rights institutions on individual behavior and the subsequent use of resources. Particular attention will be paid to the importance of property right structures in the organization of business and in managerial decision making.

ECON 8280 Applied Demand Analysis 3 (3) Analysis of demand by individual households and consumers in aggregate. Modern approaches to estimation of demand systems and valuation methods. May also be offered as APEC 8280. Prq: ECON 3140; and APEC 3080 or ECON 4050.

ECON 8310 Economic Development 3 (3) Economic analysis of development of urban areas within the system of cities; central place theory and general equilibrium models of interregional economic activity; the economic activity of central places; spatial interaction and stochastic processes; internal development of the city focusing on housing and land use patterns, transportation and urban form.

ECON 8320 Community and Regional Economics 3 (3) Covers economic theory and research methods needed to understand happenings in the regional and community economy and how local and non-local decisions influence local economic change. May also be offered as APEC 8320. Offered fall semester only. Prq: APEC 4120 or APEC 6120 or CRD 4120 or CRD 6120.

ECON 8360 Research in Economics of Education 3 (3) Theoretical and econometric analysis of education including such topics as human capital theory, pricing and competition in higher education, public financing and provision of education, cost/benefit analyses of education reforms such as accountability, school finance equalization and school choice. Includes discussion and research on current topics in the economics of education. Prq: ECON 8060 or ECON 8060; or consent of instructor.

ECON 8400 International Trade Theory 3 (3) Theory of free trade from Ricardo to the present; theory and application of optimal and second-best tariffs; recent empirical testing of trade and tariff theory. Prq: ECON 3140; and either APEC 8020 or ECON 8020; or consent of instructor.

ECON 8410 International Finance 3 (3) Financial economics of decision making in a multinational environment featuring autonomous governments and multiple currencies. Typical topics include the macroeconomic problems of unemployment and inflation in an international economy, management of exchange rate risk, credit risk, political risk and taxation. Prq: ECON 3150.

ECON 8450 Advanced Game Theory 3 (3) Introduces central concepts in game theory, emphasizing economic problems involving strategic behavior by consumers, firms and governments. Covers static and dynamic games, with both complete and incomplete information. Specific topics may include oligopoly, bargaining, auction theory, mechanism design, repeated games and information transmission.

ECON 8880 Directed Reading in Economics 1-3 (1-3) Directed reading and research in the student’s field of interest. May be repeated for a maximum of three credit.

ECON 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

ECON 8990 Dynamic Macroeconomics 1 (1) Advanced macroeconomics beyond material covered in ECON 8050. This course covers advanced dynamic macroeconomics at a level required for conducting research in the field. Focus is on formulating and solving dynamic models of consumption, investment, economic growth, asset pricing, and unemployment. All first-year PhD students are required to take both ECON 8050 and ECON 8990.

ECON 8990 Selected Topics in Economics 1-3 (1-3) Selected topics under the guidance of a professor. May be repeated for a maximum of six credits.

ECON 9000 Selected Topics in Economics 3 (3) Current topics in economic theory and empirical research. May be repeated for credit, but only if different topics are covered.

ECON 9010 Price Theory 3 (3) Neoclassical paradigm of market price and quantity; rigorous consideration of consumer behavior, the theory of the firm and market equilibrium, production and resource demands and the supply of resources. Prq: APEC 8010 or ECON 8010.
ECON 9050 Advanced Macroeconomic Issues 3 (3)
Current unsettled issues in macroeconomic analysis. Topics include disequilibrium macro models, macro models of open economies, rational expectations and its critics, government stabilization policies and the controversy surrounding the concept of Ricardian equivalence. Preq: ECON 8050.

ECON 9060 Seminar in Area Economic Development 3 (3)
Consideration of recent research developments in economic development. Includes a review of research publications, journal articles and other literature. Objectives, analytical techniques and procedures are used in area or regional development efforts. May also be offered as APEC 9060. Offered spring semester only. Preq: APEC 8060 or ECON 8060.

ECON 9090 Time-Series Econometrics 3 (3)

ECON 9150 General Equilibrium and Economic Growth 3 (3)
Risk sharing and efficient allocations are presented. Basic aggregation theory is covered producing the representative agent model. The neoclassical growth model with and without technological progress is presented, followed by the endogenous growth model. The modifications to this model produce multiple development regimes, convergence, bi-convergence and switching phenomena. Preq: ECON 805.

ECON 9160 Advanced Economic Growth 3 (3)
Alternative models of endogenous growth are developed, including the public education models of growth, endogenous technology-R&D models, international trade and diffusion models, public policies and institutions, geography and growth and finance and growth. Particular focus is on the empirical applications of growth models.

ECON 9170 Advanced Seminar in Labor Economies 3 (3)
Continuation of ECON 8160, bridging the gap between theory and modern empirical research in labor economics. Emphasizes reading recent empirical research papers to understand the techniques of modern research in labor economics. Preq: APEC 8160 or ECON 8160.

ECON 9200 Empirical Public Economics 3 (3)
Studies the effects of taxation on household and firm behavior, public goods, income transfer and welfare policies. Considers fiscal federalism, public policy and economic growth. Includes selected topics on effects of legislation and institutions on economic outcome. Preq: APEC 8010 or ECON 8010; and ECON 8070; and APEC 8200 or ECON 8200.

ECON 9240 Advanced Industrial Organizations 3 (3)
Coverage of advanced concepts and methods involving strategic interaction among firms. Topics may include pricing, capacity choice, advertising, collusion and industry dynamics. Preq: APEC 8240 or ECON 8240; or consent of instructor.

ECON 9400 Empirical International Economics 3 (3)
Investigates empirical applications of international issues. Typical topics include the theoretical and empirical international issues, including the Hecksher-Ohlin model, the gravity model of trade, models of exchange rate determination and dynamic stochastic general equilibrium models. Preq: ECON 8400 or ECON 8410.

ECON 9500 Monetary Economics 3 (3)
Economic analysis of money in our economy and effects of monetary policy on prices, interest rates, output and employment.

ECON 9810 Applications of Economic Analysis 1 (1)
Presentations of economic research by guest lecturers, principally department faculty members. Presentations include description of one or more research projects typically taken from a common agenda. Discussion of methodology, data and data collection. Course is for first-year PhD students. To be taken Pass/No Pass only. May be repeated for a maximum of four credits.

ECON 9820 Workshop in Applied Economics 3 (3)
Forum for presentation and critical evaluation of ongoing research by candidates for the PhD degree in Applied Economics. May be repeated for a maximum of nine credits. Preq: Consent of instructor.

ECON 9910 Doctoral Dissertation Research 1-12 (1-12)

EDU 6410 Middle School Curriculum 3 (3)
Concepts and methods for teaching middle school students. Discusses nature of middle school students, teacher characteristics, curricular and co-curricular programs, organization, and teaching.

ED 7000 Supervising the Student Teacher in the Public School 2-12 (3-3)
Knowledge and skills desirable for supervision of student teachers; use of observation instruments for recording objective data and evaluating teaching performance. To be taken Pass/No Pass only. Preq: Professional teaching certificate at least one year of teaching experience, recommendation from employing school district, or consent of instructor.

ED 7350 Teacher Professional Development: Selected Topics 1-3 (1-3)
Selected topics determined by professional-development needs for teachers. Does not count toward a master's degree; for professional development credit only. May be repeated, but only if different topics are covered.

ED 8370 Independent Study in Education 1-3 (1-3)
Individually arranged study for a maximum of 1-3 credits under the direction of a faculty member chosen by the student. Student and faculty member develop a course of study different from any existing courses and designed for the individual student. May be repeated for a maximum of 24 credits, but only if different topics are covered.

ED 8380 Selected Topics in Education 1-3 (1-3)
Specific master's-level topics not found in other courses are selected for in-depth study. May be repeated for a maximum of 24 credits, but only if different topics are covered.

ED 8390 Introduction to Linguistics 3 (3)
Introduction to linguistics, including the subfields of syntax, morphology, phonology, semantics, pragmatics and sociolinguistics. Also includes the study of writing systems and applications to literacy, language acquisition, and language contact and change. Preq: Education field of study or consent of instructor.

ED 8450 Integrating Arts into the Curriculum 3 (3)
Series of workshops introducing the integration of drama, music, dance, visual arts and creative writing with academic subjects in the classroom. Includes review of research on the impact of arts education on student achievement, engagement and school culture.

ED 8510 International Education in Primary and Secondary School Settings 3 (3)
Investigates educational processes in international settings, including an examination of prevalent learning theories, curricula, assessment, classroom norms, and their connections to social, cultural and geopolitical contexts.

ED 8540 International Perspectives on Poverty and the Schools P-12 3 (3)
Explores the global impact of poverty on schools and students, reviews the international research on poverty and schools, identifies effective instructional and curricular strategies for P-12 students living in poverty, and analyzes international policies that address the needs of these students.

ED 8600 Classroom Action Research 3 (3)
Develops skills for doing research in a K-12 setting on instructional methodology and/or curriculum. Study of research literature, research methods and IRB procedures. Includes classroom action research project. Students enrolling in this course must hold current teaching certification. Preq: Admission to MEd degree program and EDF 8770 and EDF 8800; or consent of instructor.

ED 8670 Practicum in the Instruction of ESOL to Elementary and Secondary Learners 1-3 (1-3)
Supervised observation and teaching experiences in teaching English to Speakers of Other Languages (ESOL) in cooperation with selected elementary and/or secondary schools. May be repeated for a maximum of three credits.

ED 8890 Research in Education 3 (3)
Includes problem selection. Investigates types of educational research and techniques employed. Includes the use of ERIC system and computer program packages. Requires interpretation of research findings.

ED 9010 Selected Topics Doctoral Study 1-3 (1-3)
Doctoral-level education topics not covered in other courses are selected for in-depth study and research. May be repeated for a maximum of 24 credits, but only if different topics are covered.

ED 9020 Independent Doctoral Study 1-3 (1-3)
Study of selected topics in education under the direction of a faculty member chosen by the student. Student and faculty member develop a course of study different from any existing courses and designed for the individual student. May be repeated for a maximum of 24 credits, but only if different topics are covered.
ED 9030 Introductory Doctoral Seminar I 1 (1)
Familiarizes new doctoral students with the aca-
demic culture of doctoral studies and, specifically, the Curriculum and Instruction doctoral program at Clemson. This introductory seminar emphasizes the processes of scholarship, including academic research and writing.

ED 9040 Introductory Doctoral Seminar II 1 (1)
Familiarizes new doctoral students with the aca-
demic culture of doctoral studies and, specifically, the Curriculum and Instruction doctoral program at Clemson. This introductory seminar emphasizes the roles and responsibilities of teacher educators.

ED 9380 Grant Development in Education-Related Fields 3 (3) Addresses the process for writing and submitting grant proposals, including training grants, demonstration projects, research grants and curriculum development projects.

ED 9420 Studies of Curriculum and Instruction in Mathematics Education 3 (3) Addresses philo-
sophical, theoretical, and empirical issues related to curriculum, instruction and assessment in mathemat-
sics education. Curricular issues relevant to this class span pre-K through grade 12 and include the emergence of national, state and common core standards. Preq: Admission into the Curriculum and Instruction doctoral program; and consent of instructor.

ED 9470 Current Scholarship in Mathematics Education 3 (3) Enhances appreciation for and under-
standing of research methods and findings in mathematics education. Includes an analysis of research methodology and techniques in mathem-
atics education, the history of research in mathemat-
sics education, and various theories of mathematics learning. Preq: Admission into the Curriculum and Instruction doctoral program; and consent of instructor.

ED 9540 Curriculum Theory 3 (3) Main currents of curriculum theory in American education. Preq: EDEL 7600.

ED 9550 Theoretical Bases of Instruction 3 (3) Seminar in the application of learning theory to instruction in the classroom.

ED 9600 History and Philosophy of African Ameri-
can Education 3 (3) Examination of the historical and contemporary philosophies, practices and pedagogies for Black education from the early nine-
teenth century through the present. The course emphasizes the educational literature in the areas of culturally responsive pedagogy, African-centered pedagogy and curriculum, multicultural curriculum and critical race theory.

ED 9800 Internship in Curriculum and Instruction 16 (1-6) Practical experiences linking the student’s program of study to his/her field of professional service. To be taken Pass/No Pass only. Preq: Consent of advisor.

ED 9940 Directed Research 1-4 (1-4) Research in a line of inquiry in education under the direction of faculty. May be taken with different faculty members and may be repeated for a maximum of 18 hours. To be taken Pass/No Pass only. Preq: EDF 8770 or EDF 8086; or consent of instructor.

EDUCATIONAL COUNSELING

EDC 7640 Theoretical and Practical Application of Student Development and Leadership in a University Setting 3 (3) Development of leadership, programming, problem-solving, conflict-resolution, confrontation and referral skills; legal and ethical issues and the implications for practitioners; comparative studies of housing programs and utilization of resources and support services available on the campus.

EDC 8010 Foundations of School Counseling 3 (3) Theory and practice of school counseling; principles and policies underlying programs. Preq: Consent of instructor.

EDC 8030 Student Development Services in Higher Education 3 (3) Student personnel services offered by institutions of higher education. Preq: Consent of instructor.

EDC 8040 Theories of Student Development in Higher Education 3 (3) Developmental aspects of the young adult age group and the relationship to postsecondary schools and training programs.

EDC 8050 Clinical Mental Health Counseling 3 (3) History and description of various counseling services provided in agency settings and the type of client populations served and existing legislative acts mandating these services.

EDC 8060 Student Affairs Issues 3 (3) Introduction to the current issues in the student personnel profes-
sion and future challenges facing student affairs departments. Preq: EDC 8330 and EDC 8040; or consent of instructor.

EDC 8070 Counseling Children and Adolescents 3 (3) Theory and techniques in the area of coun-
seling youth in educational institutions and other settings; common challenges faced by children and adolescents, developmental considerations, and evidence-based interventions. Preq: EDF 8010 and EDC 8180; or consent of instructor.

EDC 8080 Legal and Ethical Issues in Student Affairs Practice and Counselor Education 3 (3) Study of current legal and ethical issues confronting counselor educators and administrators working in student affairs practice and student affairs counseling. Examines a representative sample of key concepts, federal and state court cases and explores the application of legal and ethical issues to student affairs practice and counseling.

EDC 8090 Higher Education Administration 3 (3) Knowledge, skills and processes essential to effectively administer a program or service in higher education. Examines relationships between envi-
ronmental factors and strategies for planning and managing student affairs programs and services. Preq: Consent of instructor.

EDC 8100 Theories and Techniques of Counseling 3 (3) Counseling theories and techniques. Preq: Consent of instructor.

EDC 8110 Theories of Counseling 3 (3) Counseling theories and techniques. Preq: Consent of instructor.

EDC 8120 Career Counseling 3 (3) Gathering, interpreting and utilizing educational, social and occupational information; techniques used in placement, survey and follow-up.

EDC 8130 Appraisal Procedures 3 (2) Experience in gathering, interpreting and utilizing data related to the individual; especially significant to counselors. Preq: Consent of instructor. Coreq: EDC 8131.

EDC 8131 Appraisal Procedures Laboratory 0 (1) Non-credit laboratory to accompany EDC 8130. Coreq: EDC 8130.

EDC 8140 Development of Counseling Skills 3 (3) On-campus experience to help counselors develop communication skills through role-playing activities, audio and videotaping, interviewing, lecture and discussion. Preq or concurrent enrollment: EDC 8100. 

EDC 8150 Group Counseling 3 (3) Experience as a member of a group to aid the student in under-
standing group dynamics and the role of a group member as a participant and facilitator; emphasis is on small group participation, communication skills and self-understanding. Preq: EDC 8100 and EDC 8140.

EDC 8160 Introduction to Couples and Family Counseling 3 (3) Major models and techniques of couple counseling; history, research, legal, ethical and other professional issues; concepts related to family life cycle, healthy family functioning, divorce, ethnicity, problem conceptualization and nontraditional structures. Preq: EDC 8100 or EDC 8140; or consent of instructor.

EDC 8170 Crisis Intervention Counseling 3 (3) Examines diverse crisis situations and the assess-
ment and treatment strategies used by counselors to assist individuals, groups and organizations to manage and resolve crises. Preq: EDC 8100 or consent of instructor.

EDC 8180 Psychopathology for Counselors 3 (3) Conceptual models employed in classifying and describing various mental disturbances as well as ap-
proaches used to alleviate these disturbances. Preq: EDC 8100 and enrollment in Educational Counsel-
ing master’s program and consent of instructor.

EDC 8190 The Contemporary College Student 3 (3) Analytical approach to the unique character of the contemporary college student, the effects of change on that character and the role of college in enhancing student development in that context. Preq: EDL 8550 or consent of instructor.

EDC 8210 Counseling Psychodiagnosis 3 (3) Compre-
prehensive overview of the DSM-IV-TR; multiaxial assessment and diagnosis of mental disorders in-
cluding coding and reporting procedures. Preq: EDC 8100 and EDC 8180 and enrollment in the Counselor Education master’s program; or consent of instructor.

EDC 8220 Addictions Counseling 3 (3) Compre-
hensive overview of the phenomenon of chemical dependence and addiction; current methods of identification and intervention; awareness of how addictions affect individuals, families, schools and communities. Preq: Consent of instructor.

EDC 8230 Advanced Counseling Techniques and Strategies 3 (3) Development of in-depth coun-
seling skills; techniques for working with a wide variety of populations and/or problems. Students are expected to have completed 30 hours in a master’s program in Counseling, or to be certified as a school counselor to enroll in this course. Preq: EDC 8140 and EDC 8150.
EDC 8240 Ethical Issues in Counseling 3 (3)
Explores the ethical standards and dilemmas facing today’s counseling professionals, including foundations of ethical principles and ethical decision-making. Students explore ethical issues that cover traditional topics, such as confidentiality, dual relationships, and record keeping; as well as contemporary issues, such as multicultural competence and online counseling, that are prevalent in most counseling settings. Preq: EDC 8120 or consent of instructor.

EDC 8300 School Counseling Practicum 3 (1) Supervised field experience in counseling and other services in a school setting. To be taken Pass/No Pass only. Preq: EDC 8100 and EDC 8100 and EDC 8140. Preq or concurrent enrollment: EDC 8070 and EDC 8150. Coreq: EDC 8301.

EDC 8301 School Counseling Practicum Laboratory 0 (6) Non-credit laboratory to accompany EDC 8300. Coreq: EDC 8300.

EDC 8340 Student Affairs Practicum 3 (1) Supervised field experience in counseling and other services in a postsecondary school setting. To be taken Pass/No Pass only. Preq: Consent of instructor. Preq or concurrent enrollment: EDC 8030 and EDC 8140; or consent of instructor (100 clock hours). Coreq: EDC 8341.

EDC 8341 Student Affairs Practicum Laboratory 0 (6) Non-credit laboratory to accompany EDC 8340. Coreq: EDC 8340.

EDC 8360 Clinical Mental Health Practicum 3 (1) Supervised field experiences in counseling and other services in a community-agency setting. To be taken Pass/No Pass only. Preq: Consent of instructor. Preq or concurrent enrollment: EDC 8050 and EDC 8140 and EDC 8150.

EDC 8361 Clinical Mental Health Practicum Laboratory 0 (6) Non-credit laboratory to accompany EDC 8360. Coreq: EDC 8360.

EDC 8400 Independent Study in Counseling 1-3 (1-3) Individualized, in-depth study of a particular topic not offered in other courses. Reading, research and independent study are supervised by a faculty member. May be repeated for a maximum of six credits. Preq: Consent of instructor.

EDC 8410 School Counseling Internship 3-6 (3-6) In a supervised field experience, students apply knowledge in individual and group counseling, classroom guidance and consultation to assist students in school settings. May be repeated for a maximum of 12 credits. To be taken Pass/No Pass only. Preq: EDC 8300. Preq or concurrent enrollment: EDC 8120 and EDC 8130. Coreq: EDC 8411.

EDC 8411 School Counseling Internship Laboratory 0 (99) Non-credit laboratory to accompany EDC 8410. Coreq: EDC 8410.

EDC 8440 Student Affairs Internship 3-6 (3-6) Application of previous knowledge to professional and postsecondary settings in a supervised field experience in counseling/student services. May be repeated for a maximum of six credits. To be taken Pass/No Pass only. Preq: EDC 8340 and consent of instructor. Coreq: EDC 8441.

EDC 8441 Student Affairs Internship Laboratory 0 (99) Non-credit laboratory to accompany EDC 8440. Coreq: EDC 8440.

EDC 8460 Clinical Mental Health Counseling Internship 6 Students apply previous knowledge of counseling theory and techniques in a supervised field experience in professional mental health counseling settings. May be repeated for a maximum of 12 credits. Preq: EDC 8500 and EDC 8100 and EDC 8110 and EDC 8140 and EDC 8150 and EDC 8160 and EDC 8180 and EDC 8190 and consent of instructor. Preq or concurrent enrollment: EDC 8230.

EDC 8510 Leadership in School Counseling 3 (3) Leadership, management and evaluation of school counseling programs. Preq or concurrent enrollment: EDC 8400.

EDC 8850 Selected Topics 1-3 (1-3) Developing trends in counseling not covered in other courses. May be repeated, but only if different topics are covered.

EDC 9150 Internship in Counseling Setting 3 (7) Postgraduate’s supervised internship in counseling. Provides experience in counseling as well as coordination of services for a diverse client population. Students participate in direct services with clients in an approved agency. May be repeated for a maximum of six credits. Students must have earned a Master’s degree in Counseling or related field approved by program coordinator to enroll in this course. Preq: Consent of instructor.

EDC 9200 Counselor Supervision 3 (3) Overview of conceptual and empirical literature on counselor supervision that includes models, approaches, techniques, relationships, process issues, legal concerns and ethical considerations. Students develop supervision skills through readings, seminar discussions and supervision of master’s level students. Students must have earned a Master’s degree in Counseling or related field approved by program coordinator to enroll in this course. Preq: Consent of instructor.

EDC 8800 Current Issues in Early Childhood Education 3 (3) Focuses on factors that impact early childhood policy, identification of current problems/issues and development of research-based advocacy strategies.

EDC 8850 Thesis Hours in Early Childhood Education 3 (3) Students work with thesis advisor to complete thesis requirements; thesis must address a STEM discipline. Required of students enrolled in thesis track in Early Childhood Education. May be repeated for a maximum of six credits. Preq: 18 credit hours including EDF 8770 and EDF 8790 and consent of thesis advisor.

EDC 8900 Assessment and Program Planning in Early Childhood 3 (3) Study of instructional planning and assessment for young children in all content areas including math, science and technology. Also explores multiple assessment and screening strategies for infants, toddlers and preschool children with typical and atypical development; includes quantitative and qualitative assessment methods for program planning.

EDC 8950 Math, Science and Technology Inquiry in Early Childhood 3 (3) Emphasizes theory to practice and exploration of the processes of inquiry in mathematics, science and technology for early childhood education.

EDC 8960 Early Childhood Math and Science Curricula 3 (3) Provides a vertical articulation of math and science curricula for the early childhood years through an in-depth analysis of national standards for content and pedagogy. Students experience the progression of math and science understanding in the early years.

EDC 8990 Advanced Early Childhood Education Foundations and Methods 3 (3) In-depth study of developmentally appropriate and effective instructional methods in early childhood classrooms and the history of early childhood education as a professional field.

EDC 8200 Advanced Early Childhood Education Curriculum 3 (3) In-depth study of curriculum development and current approaches in the field of early childhood education. Students explore the research literature on effective curriculum in early childhood education at both the national and international levels. Preq: Consent of instructor.

EDC 8400 Theories of Early Childhood Education 3 (3) Examines the theoretical, philosophical and research foundations of early childhood education with emphasis on how these foundations interact with science, math and technology concept development in young children. Students develop skills in critical inquiry as they explore specific topics related to early child care and education.

EDC 8500 Creative and Cognitive Development in Early Childhood: Creating Connections to Math and Science 3 (3) Examines the theoretical, philosophical and cognitive foundations of creative thought during the early childhood years. Students develop skills in critical inquiry as they explore the connections between creativity and math/science education during the early childhood years.

EDC 8800 Current Issues in Early Childhood Education 3 (3) Focuses on factors that impact early childhood policy, identification of current problems/issues and development of research-based advocacy strategies.
EDEL 8260 Elementary School Science Theory to Practice 3 (3) In-depth study of current research and trends in science theory, teaching strategies and curriculum development from birth to grade six. Preq: Admission to MEd program in Early Childhood or Elementary Education; or consent of instructor.

EDEL 8310 Elementary School Social Studies: Theory to Practice 3 (3) In-depth study of current research and trends in Social Studies theory, teaching strategies and curriculum development from kindergarten to grade six. Preq: Admission to Masters level study in Elementary Education; or consent of instructor.

EDEL 8900 Education Research Project 3 (2) Students select, with approval of professor, and conduct research on an education issue of suitable scope. Oral, written and visual presentation of the research project is required. Students must enroll during final semester. Preq: Consent of instructor. Coreq: EDEL 8901.

EDEL 8901 Education Research Project Laboratory 0 (3) Non-credit laboratory to accompany EDEL 8900. Coreq: EDEL 8900.

EDEL 8920 Elementary School Mathematics: Theory to Practice 3 (3) In-depth study of current research and trends in mathematics theory, teaching methods and curriculum development from birth to grade six. Preq: Admission to MEd program in Early Childhood or Elementary Education; or consent of instructor. Coreq: EDEL 8921.

EDEL 8921 Elementary School Mathematics: Theory to Practice Laboratory 0 (0) Non-credit laboratory to accompany EDEL 8920. Coreq: EDEL 8920.

EDEL 9370 Designing Elementary Curriculum 3 (3) Theoretical issues and guidelines for educators engaged in the curriculum development process at the elementary level. Preq: Admission to the PhD program in Curriculum and Instruction and ED 9540 and ED 9550.

EDEL 9380 Teacher as Researcher 3 (3) Various methodologies of field-based research. Students complete a literature review and design a field-based research project. Preq: Admission to the PhD program in Curriculum and Instruction and ED 8780 and ED 8790 and EXST 8010 and one of the following: EDSC 8460 or EDSC 8470 or EDSC 8480 or EDSC 8490 or READ 9440.

EDUCATIONAL FOUNDATIONS

EDF 6800 Foundations of Digital Media and Learning 3 (3) Critical use of digital media for leadership and learning within societal and educational contexts. Course focuses on learner impact while exploring, developing, and evaluating technology-enhanced applications. Further develops competencies with new media literacies and addresses societal, cultural, ethical, and participatory issues and uses of digital media. Coreq: EDF 6801.

EDF 6801 Foundations of Digital Media and Learning Laboratory 0 (2) Non-credit laboratory to accompany EDF 6800. Coreq: EDF 6800.

EDF 6820 Advanced Educational Applications of Microcomputers 3 (2) Provides students with the knowledge and skills needed to apply microcomputer technology to the utilization and generation of educational software in accordance with sound educational principles. Preq: AGED 4800 or EDF 4800. Coreq: EDF 6821.

EDF 6821 Advanced Educational Applications of Microcomputers Laboratory 0 (2) Non-credit laboratory to accompany EDF 6820. Coreq: EDF 6820.

EDF 6900 Classroom Management 3 (3) Aids students in developing strategies and plans to manage a classroom effectively. Topics include both time and behavioral management. Students learn how to prevent problems as well as address problems once they have occurred. Includes Honors sections. Preq: EDF 3020 or PSYC 2010; and EDF 3340 or EDF 3350; and a 2.0 minimum grade-point ratio; or consent of instructor.

EDF 6970 Instructional Media in the Classroom 3 (3) Integrated approach to the use of audiovisual media stressing systematic planning, selection, utilization, and evaluation as well as production of materials and equipment operation. Preq: 2.0 minimum grade-point ratio.

EDF 8000 Philosophy, Schooling and Educational Policy 3 (3) Development of contemporary educational theory and its impact on current schooling practices and educational policy development.

EDF 8010 Human Growth and Development 3 (3) Theory and research in human development and its impact on the teaching/learning process.

EDF 8020 Advanced Educational Psychology 3 (3) Educational applications of research and theory on objectives, motivation, class climate, class management and learning theory.

EDF 8030 Early Adolescent Growth and Development 3 (3) Theory and research in early adolescent growth and development and the teaching/learning process for middle-school youths. Undergraduate students may request consent of instructor.

EDF 8040 Educational Tests and Measurements 3 (3) Construction, use and interpretation of subjective and standard tests; measurement applications.

EDF 8660 Integrating Service Learning into Curriculum 3 (2) Opportunities for certified teachers to build competence in service learning through personal participation in service and in reflection. Students develop a plan to integrate service learning activities into the curriculum of their school and/or district. Designed for 12-25 elementary, middle school, high school and adult education teachers. Students must hold teaching certification in order to enroll in this course. Coreq: EDF 8661.

EDF 8661 Service Learning Lab 0 (3) Non-credit laboratory to accompany EDF 8660. Coreq: EDF 8660.

EDF 8710 Cultural Diversity in Education 3 (3) Sociological and anthropological examination of contemporary P-12 educational policy issues.

EDF 8770 Experimental and Nonexperimental Research Methods in Education I 3 (3) Types of educational research and uses; logical bases of quantitative and qualitative analysis techniques; basic research issues important in education; educational research design and procedures; introduction to measurement and evaluation; applications to special problems in classroom settings and program development; and evaluation in curriculum, administration and educational support services.

EDF 8800 Integration of Digital Media for Middle School Teachers 3 (3) Students learn how digital media can support learning and instruction within various content areas for middle school students. Through the exploration and evaluation of existing and emerging technologies, students develop competencies related to digital literacies, the design of digital learning environments, and professional growth. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor. Coreq: EDF 8801.

EDF 8801 Integration of Digital Media for Middle School Teachers Laboratory 0 (2) Non-credit laboratory to accompany EDF 8800. Coreq: EDF 8800.

EDF 9000 Critical Look at Social Media, Games and Emerging Technologies 3 (3) Designed for students to better understand or expand their knowledge of social media, games and emerging technologies, and their implications for learning.

EDF 9080 Advanced Educational Tests and Measurement 3 (3) Theoretical and quantitative aspects of modern and classical test theory from the practitioner’s perspective; solving contemporary problems involving intra-student and class level comparisons of student progress; the subsequent impact of assessment on classroom high-stakes accountability decisions. Preq: EDF 8080 and EDF 8770.

EDF 9700 Identity, Schooling and Democratic Education 3 (3) Examines current theories of education that address the relationships between race, ethnicity, gender, social class and democratic education in American public schools.

EDF 9710 Case Study and Ethnographic Research Methods and Design 3 (3) Examines case study and ethnographic research methods and design. Preq: EDF 9770 and EDF 9790.

EDF 9720 Phenomenology and Grounded Theory Research Methods and Design 3 (3) Examines phe- nomenology and grounded theory research methods and design. Preq: EDF 9770 and EDF 9790.

EDF 9730 Narrative and Historical Research Methods and Design 3 (3) Examines narrative and historical research methods and design. Preq: EDF 9770 and EDF 9790.

EDF 9740 Emerging Qualitative Research Methods and Design 3 (3) Examines emerging and lesser-known qualitative research methods and designs, such as self-study, portraiture, arts-based research, photovoice, rhizomatic analysis and critical policy analysis. Preq: EDF 9770 and EDF 9790.

EDF 9750 Mixed Methods Research 3 (3) Examines methods and designs for mixed methods methodology.

EDF 9760 History of American Education 3 (3) Historical development of educational purpose and the social and cultural forces which shaped that development.

**EDL 7000** Public School Administration

Theoretical bases of school administration, organizational principles, patterns and practices in public schools; decision making; administration of programs and services. Prq: Three graduate education courses or consent of instructor.

**EDL 7100** The Principalship

3 (3) Roles and responsibilities of the principalship including the organization and administration of schools.

**EDL 7150** School and Community Relationships

3 (3) Interdependence of school and community; identifying and defining societal expectations of schools and effect of these expectations on educational policy; impact of social, political, economic and demographic change on educational policy.

**EDL 7200** School Personnel Administration

3 (3) School personnel selection, practices and problems. Prq: EDL 7000 and EDL 7050.

**EDL 7250** Legal Phases of School Administration

3 (3) Legal principles involved in school administration and in court actions. Prq: EDL 7100.

**EDL 7300** Techniques of Supervision—Public Schools

3 (3) Improving, coordinating and evaluating instruction; modern trends of supervisory practices. Prq: EDL 7100.

**EDL 7350** Educational Evaluation

3 (3) Evaluation theory and design applied to classroom instruction and to evaluation procedures applicable to school center and district programs and projects. Prq: EDL 7100.

**EDL 7400** Curriculum Planning and Improvement for School Administrators

3 (3) Role of leader in curriculum planning and improvement: curriculum evaluation and development, change, programmatic requirements, cocurriculum, organization, scheduling, planning, management and technology. Prq: EDL 7100.

**EDL 7450** School Finance

3 (3) School finance relative to programs, revenues and experience. Prq: EDL 7350.

**EDL 7500** Elementary Principal and Supervisor

Field Experience I 3 (1) First practicum in a series of two with an experienced elementary/middle (pre-K-8) school principal or supervisor. EDL 7500 and 7510 must be taken in a sequence in a single academic year. Prq: EDL 7050. Coreq: EDL 7501.

**EDL 7501** Elementary Principal and Supervisor

Field Experience I Laboratory 0 (4) Noncredit laboratory to accompany EDL 7500. Coreq: EDL 7500.

**EDL 7510** Elementary Principal and Supervisor

Field Experience II 3 (1) Second practicum in a series of two with an experienced elementary/middle (pre-K-8) school principal or supervisor. EDL 7500 and 7510 must be taken in a sequence in a single academic year. Prq: EDL 7050. Coreq: EDL 7511.

**EDL 7511** Elementary Principal and Supervisor

Field Experience II Laboratory 0 (4) Noncredit laboratory to accompany EDL 7510. Coreq: EDL 7510.

**EDL 7520** Secondary Principal and Supervisor

Field Experience I 3 (1) First practicum in a series of two with an experienced secondary (grades 7-12) principal or supervisor. EDL 7550 and 7560 must be taken in a sequence in a single academic year. Prq: EDL 7050. Coreq: EDL 7551.

**EDL 7550** Secondary Principal and Supervisor

Field Experience I Laboratory 0 (4) Noncredit laboratory to accompany EDL 7550. Coreq: EDL 7550.

**EDL 7560** Secondary Principal and Supervisor

Field Experience II 3 (1) Second practicum in a series of two with an experienced middle/high school (grades 7-12) principal or supervisor. EDL 7550 and 7560 must be taken in a sequence in a single academic year. Prq: EDL 7050. Coreq: EDL 7561.

**EDL 7561** Secondary Principal and Supervisor

Field Experience II Laboratory 0 (4) Noncredit laboratory to accompany EDL 7560. Coreq: EDL 7560.

**EDL 7650** Assessment in Higher Education

3 (3) Outcomes assessment and institutional effectiveness movement including assessment techniques, instrument selection, analysis of assessment data and reporting of assessment findings. Prq: Consent of instructor.

**EDL 7950** School Leadership Information Systems

3 (2) Use of computers and related technologies for decision making by public school leaders; logistics of information management, sources of information, communication with technology and integration of technology into the leadership function. Coreq: EDL 7951.

**EDL 8000** Philanthropy, Schooling and Educational Policy

3 (3) Development of contemporary educational theory and its impact on current schooling practices and educational policy development.

**EDL 8050** Advanced Educational Leadership

Theory and Practice 3 (3) Principles and theories of leadership as practiced in the institutional setting. Prq: EDL 7150 and EDL 7300.

**EDL 8100** Introduction to School Building Planning

**EDL 8101** Introduction to School Building Planning Laboratory

0 (2) Noncredit laboratory to accompany EDL 8100. Coreq: EDL 8100.

**EDL 8150** The Superintendent

3 (3) Current, in-depth study of the superintendent including relationships with school boards, faculty, staff and community. For practicing and aspiring educational administrators. Prq: Admission to the Educational Specialist program or the Educational Leadership doctoral program.

**EDL 8200** Politics of Education

3 (3) Politics of education in the United States including complex interrelationships among administrators, special interest groups, politicians and knowledge brokers.

**EDL 8300** Business Management in Education

3 (2) Fiscal management of individual schools and districts including budgeting, purchasing and accounting for funds. Prq: EDL 7250 and EDL 7450. Coreq: EDL 8301.

**EDL 8301** Business Management in Education Laboratory

0 (3) Noncredit laboratory to accompany EDL 8300. Coreq: EDL 8300.

**EDL 8390** Research Methods in Educational Leadership

3 (3) Development of design, method and procedures for conducting the educational specialist project. Course culminates in the completion and presentation of the project prospectus for approval by the instructor and the student’s major advisor. Prq: EDL 8000 or EDL 8001; and EDL 8050 and EDL 8200 and consent of instructor.

**EDL 8400** Field Problems in School Administration and Supervision

3 (2) Application of research techniques and practices in solution of field problems in school administration and supervision. Prq: EDL 8390 and EDL 7000. Coreq: EDL 8401.

**EDL 8401** Field Problems in School Administration and Supervision Laboratory

0 (2) Noncredit laboratory to accompany EDL 8400. Coreq: EDL 8401.

**EDL 8500** Practicum in School System Leadership

3 (1) First in a two-semester practicum with an experienced school/system-level administrator or supervisor. Prq: EDL 8000 or EDL 8001; and EDL 8050 and EDL 8150; or consent of instructor. Coreq: EDL 8501.

EDLT 8640 Teaching Secondary School Reading 3 (3) Methods and materials for secondary reading programs in developmental, corrective, remedial, adapted, content and recreational areas.

EDLT 8650 Evaluation and Remediation of Reading Problems 3 (2) Remedial methods and materials for teaching reading; use of diagnostic instruments and interpretation of test results. Students participate in laboratory/field experience and prepare case studies with summary of diagnosis emphasizing remediation procedures. Prereq: EDLT 8600 or EDLT 8610 or EDLT 8640. Coreq: EDLT 8651.

EDLT 8651 Evaluation and Remediation of Reading Problems Laboratory 0 (3) Non-credit laboratory to accompany EDLT 8650. Coreq: EDLT 8650.

EDLT 8660 Practicum in Reading 3 (2) Supervised practicum emphasizing diagnostic and remedial work with readers in public schools. Prereq: EDLT 8650 and consent of instructor. Coreq: EDLT 8661.

EDLT 8661 Practicum in Reading Laboratory 0 (2) Non-credit laboratory to accompany EDLT 8660. Coreq: EDLT 8660.

EDLT 8670 Middle School Reading 3 (3) Techniques, materials, and theories for teaching reading to middle school students emphasizing correlating reading skills into the content area. Prereq: Education major or consent of instructor.

EDLT 8680 Using Literature and Technology for Reading Instruction 3 (3) Provides early childhood, elementary, and middle school teachers with the knowledge needed to utilize technological and library resources and make appropriate literature selections for the teaching of reading.

EDLT 8690 Integrated Approach to Reading and Writing Instruction 3 (3) Understanding of the reading/writing processes for early childhood and elementary teachers; investigation of the whole language approach in the classroom. Prereq: EDLT 8610.

EDLT 8700 Early Literacy: Strategic Reading and Writing Instruction 3 (3) Use of the theoretical base of the Reading Recovery program to modify instructional practices to include generalizable instructional procedures. Prereq: EDLT 8600.

EDLT 8710 Literacy Across the Curriculum 3 (3) Use of the theoretical base of the Reading Recovery program to modify instructional practices to include reading and writing activities in all aspects of K–5 curriculum. Prereq: EDLT 8600 and EDLT 8700.

EDLT 8720 Guided Reading & Guided Writing 3 (3) Use of the techniques of Guided Reading, Shared Writing, and Interactive Writing appropriately in classroom situations. Demonstration of how the difficulty level of teaching practice must change over time as students move from dependence on assistance to independence during the reading and writing processes. Prereq: EDLT 8600 and EDLT 8710.

EDLT 8730 Teaching Reading and Writing to Culturally and Linguistically Diverse Students 3 (3) Examines cross-cultural theoretical dimensions, principles and research related to second language acquisition and provides a knowledge base for teaching the reading and writing processes to English language learners (ELLs). Instructional models, strategies and tools supporting ELLs and their learning needs are presented.

EDLT 8740 Principles and Strategies for Teaching English Speakers of Other Languages 3 (3) Helps participants develop culturally and linguistically responsive classrooms with instructional strategies for teaching the language acquisition process within the context of academics supportive of English language learners (ELLs) and their learning needs. Prereq: Graduate standing in Education or consent of instructor.

EDLT 8800 Reading Recovery Teacher I 3 (3) First in a two-semester, two-course sequence designed to prepare teachers to implement and teach a Reading Recovery Program. Issues related to reading theory and process, instructional processes, program implementation and evaluation. Prereq: Consent of instructor. Coreq: EDLT 8820.

EDLT 8810 Reading Recovery Teacher II 3 (3) Second in a two-course sequence designed to prepare teachers to implement and teach in a Reading Recovery Program. Issues related to reading theory and process, instructional processes, program implementation and evaluation. Prereq: Admission into the Clemson Reading Recovery Program and EDLT 8800 and EDLT 8820. Coreq: EDLT 8830.

EDLT 8820 Reading Recovery Teacher Practicum I 3 (9) Teaching experience allowing teachers to develop and practice responsibilities of implementing and teaching first-grade children in a Reading Recovery program. Participants implement content studied in EDLT 8800. Prereq: Consent of instructor. Coreq: EDLT 8820.

EDLT 8830 Reading Recovery Teacher Practicum II 3 (9) Teaching experience and practice in implementing and teaching in a Reading Recovery Program. Participants implement content studied in EDLT 8820. Prereq: Admission into the Clemson University Reading Recovery Program and EDLT 8820 and EDLT 8830. Coreq: EDLT 8810.

EDLT 8840 Reading Recovery Clinical I 3 (3) First in a two-course sequence aimed at providing leadership experiences in implementing a Reading Recovery Program in an elementary school setting. Prereq: Admission into the Clemson University Reading Recovery Teacher Leader program. Coreq: EDLT 8850 and EDLT 9370.

EDLT 8850 Reading Recovery Clinical II 3 (9) Second in a two-course sequence to provide leadership experiences in implementing a Reading Recovery Program in an elementary school setting. Prereq: Admission into the Clemson University Reading Recovery Teacher Leader program. Coreq: EDLT 8870 and EDLT 9380.

EDLT 8860 Reading Recovery Teacher Leader Practicum 1 3 (9) First in a two-course sequence designed to prepare Reading Recovery Teacher Leaders to implement a school-based program, supervise teachers and carry out responsibilities related to maintaining a Reading Recovery site. Prereq: Admission into the Clemson University Reading Recovery Teacher Leader program. Coreq: EDLT 8840 and EDLT 9370.

EDLT 8870 Reading Recovery Teacher Leader Practicum II 3 (9) Second in a two-course sequence designed to prepare Reading Recovery Teacher Leaders to implement a school-based program, supervise teachers and carry out responsibilities related to maintaining a Reading Recovery site. Prereq: Admission into the Clemson University Reading Recovery Teacher Leader program. Coreq: EDLT 8850 and EDLT 9380.

EDLT 9350 Reading Recovery Theory I 3 (3) First of a two-course sequence designed to examine theoretical principles of the reading process as applied in the Reading Recovery Program. Issues related to program implementation and systematic program changes. Prereq: Consent of instructor. Coreq: EDLT 8840 and 8860.

EDLT 9380 Reading Recovery Theory II 3 (3) Second of a two-course sequence designed to examine theoretical principles of the reading process as applied in the Reading Recovery Program. Issues related to program implementation and systematic program changes. Prereq: Consent of instructor. Coreq: EDLT 8850 and 8870.

EDLT 9390 Theoretical Models of Reading 3 (3) Psychological basis of the reading process; principles applied in teaching reading. Prereq: EDLT 8600 or EDLT 8610 or consent of instructor.

EDLT 9400 Advanced Diagnosis and Remediation in Reading 3 (2) Advanced diagnosis and remediation in reading; review of diagnostic instruments and instructional materials. Prereq: EDLT 8600 or EDLT 8610; and EDLT 8650; or consent of instructor. Coreq: EDLT 9401.

EDLT 9401 Advanced Diagnosis and Remediation in Reading Laboratory 0 (3) Non-credit laboratory to accompany EDLT 9400. Coreq: EDLT 9400.

EDLT 9410 Advanced Practicum in Reading 3 (2) Diagnosis and remediation testing remediation. Extensive case studies with recommendation for the classroom teacher are required. Prereq: EDLT 9400 and consent of instructor. Coreq: EDLT 9411.

EDLT 9411 Advanced Practicum in Reading Laboratory 0 (3) Non-credit laboratory to accompany EDLT 9410. Coreq: EDLT 9410.

EDLT 9420 Teaching Reading Through a Literature Emphasis 3 (3) Strategies for integrating literature into the traditional reading program. Students are expected to have completed an introductory reading class.

EDLT 9430 The Reading-Writing Connection: An Integrated Approach 3 (3) Theoretical bases and practical techniques for teaching reading and writing in an integrated manner; reading and writing processes; basic skills instruction in a coordinated program; multiple subject areas; use of student interest and ability. Students are expected to have completed a basic reading methods course.

EDLT 9440 Reading Research: Review and Critique of the Literature 3 (3) Historical and contemporary research in reading and related literacy fields. Prereq: Admission to the PhD program in Curriculum and Instruction.

EDLT 9450 Special Problems in Reading Education 3 (1) Individual study of a specific topic in reading. Students may choose from a large diversity of topics. Prereq: EDLT 8600 or EDLT 8610; EDLT 8620 and EDLT 8650 and EDF 8080; or consent of instructor. Coreq: EDLT 9451.
EDLT 9451 Special Problems in Reading Education Laboratory 0 (4) Non-credit laboratory to accompany EDLT 9450. Coreq: EDLT 9450.

MIDDLE LEVEL EDUCATION

EDML 8020 Early Adolescent Psychology and Philosophy 3 (3) Educational applications of research and theory on objectives, motivation, class climate, learning theory, and philosophical issues as they affect early adolescents. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor.

EDML 8030 The Early Adolescent Learner 3 (3) Students study the theories and research in the study of early adolescence. Course also examines how these theories and research apply to teaching, learning and cultural influences on middle grades youth. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor.

EDML 8080 Middle School Assessment for Teachers 3 (3) Focuses on middle school student assessment by examining and discussing a variety of ways to assess student achievement. Includes formative and summative assessments, as well as study examining reliability and validity measures for assessments. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor.

EDML 8110 Middle Grades Language Arts Methods/Practicum 3 (2) Development of instructional practices appropriate for middle grades language arts teachers; familiarization with curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8111.

EDML 8111 Middle Grades Language Arts Methods/Practicum Laboratory 0 (4) Non-credit laboratory to accompany EDML 8110. Coreq: EDML 8110.

EDML 8120 Middle Grades Social Studies Methods/Practicum 3 (2) Development of instructional practices appropriate for middle grades social studies teachers; familiarization with curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8121.

EDML 8121 Middle Grades Social Studies Methods/Practicum Laboratory 0 (4) Non-credit laboratory to accompany EDML 8120. Coreq: EDML 8120.

EDML 8130 Middle Grades Math Methods/Practicum 3 (2) Development of instructional practices appropriate for middle grades mathematics teachers; familiarization with curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8131.

EDML 8131 Middle Grades Math Methods/Practicum Laboratory 0 (4) Non-credit laboratory to accompany EDML 8130. Coreq: EDML 8130.

EDML 8140 Middle Grades Science Methods/Practicum 3 (2) Development of instructional practices appropriate for middle grades science teachers; familiarization with curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8141.

EDML 8141 Middle Grades Science Methods/Practicum Laboratory 0 (4) Non-credit laboratory to accompany EDML 8140. Coreq: EDML 8140.

EDML 8210 Middle Grades Language Arts Methods/Student Teaching 3 (2) Continued development of instructional practices appropriate for middle grades language arts teachers; familiarization with additional curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8211.

EDML 8211 Middle Grades Language Arts Methods/Student Teaching Laboratory 0 (4) Non-credit laboratory to accompany EDML 8210. Coreq: EDML 8210.

EDML 8220 Middle Grades Social Studies Methods/Student Teaching 3 (2) Continued development of instructional practices appropriate for middle grades social studies teachers; familiarization with additional curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8221.

EDML 8221 Middle Grades Social Studies Methods/Student Teaching Laboratory 0 (4) Non-credit laboratory to accompany EDML 8220. Coreq: EDML 8220.

EDML 8230 Middle Grades Math Methods/Student Teaching 3 (2) Continued development of instructional practices appropriate for middle grades math teachers; familiarization with additional curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8231.

EDML 8231 Middle Grades Math Methods/Student Teaching Laboratory 0 (4) Non-credit laboratory to accompany EDML 8230. Coreq: EDML 8230.

EDML 8240 Middle Grades Science Methods/Student Teaching 3 (2) Continued development of instructional practices appropriate for middle grades science teachers; familiarization with additional curriculum materials. Includes field work in local schools. Preq: Admission to MAT Middle-Level Education program. Coreq: EDML 8241.

EDML 8241 Middle Grades Science Methods/Student Teaching Laboratory 0 (4) Non-credit laboratory to accompany EDML 8240. Coreq: EDML 8240.

EDML 8320 South Carolina History for Teachers 3 (3) Survey of key issues/themes in South Carolina history with an emphasis on South Carolina academic standards for 8th grade social studies. Special attention is given to the adaption of elements of historical inquiry to the classroom. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor.

EDML 8340 Environmental Sciences for Middle School Teachers 3 (2) Course addresses the science standards of middle school ecological science and scientific inquiry. Course content focuses on plant and animal organisms, including micro (cell components, structure and function) and macro (food chains, ecosystems, and environment) systems. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor. Coreq: EDML 8341.

EDML 8341 Environmental Sciences for Middle School Teachers Laboratory 0 (6) Non-credit laboratory to accompany EDML 8340. Coreq: EDML 8340.

EDML 8410 Advanced Middle School Curriculum and Instruction 3 (3) Concepts and methods for teaching middle school students. Discusses the nature of middle school students, teacher characteristics, curricular and co-curricular programs, organization and teaching. Preq: Acceptance to the MAT Middle-Level Program.

EDML 9000 Review of Research in Middle Grades Teaching 3 (3) Examination of literature in both the research and curriculum in middle level education. Includes a review of the theories that guide middle school education and the research conducted on this specific group. Preq: Admission to the MAT in Middle Level Education program; or consent of instructor.

SECONDARY EDUCATION

EDSC 6370 Technology in Secondary Mathematics 3 (3) Students learn how to integrate calculators, data collectors, and computers in the secondary mathematics curriculum. They solve problems from middle school, Algebra I, Geometry, and Algebra II courses. Preq: Second semester Junior standing, admission to the professional level.

EDSC 6550 Composition and Language Studies for Teachers 3 (3) Examines the principles and practices of composing and teaching composition. Includes a historical study of English language with attention to phonology, morphology, syntax, semantics, and practical aspects of language grammars. Serves as a practicum in composing and assessing processes, collaborative learning, writers purposes, audience expectations, and language conventions. Preq: ENGL 3100 or consent of instructor.

EDSC 7700 Science Laboratory and Field Instruction 3 (3) Methods of designing and conducting laboratory and field learning activities in secondary school sciences. Students are expected to have completed an undergraduate science teaching methods course or obtained consent of instructor before enrolling in this course.

EDSC 8030 Advanced Methods of Teaching in the Secondary School 3 (3) Principles and practices involved in promoting effective active learning in secondary schools.

EDSC 8410 Advanced Studies in the Teaching of Secondary School English 3 (3) Methods of teaching secondary school English based on research and review of current literature. Students must have earned a master’s degree to enroll in this course or obtain consent of the instructor. Preq: EDSC 4240 or consent of instructor.

EDSC 8420 Advanced Studies in the Teaching of Secondary School Mathematics 3 (3) Relationship between mathematics teaching theory and practice as shown in the research literature. Emphasis is on inquiry and other student-centered strategies. Issues and techniques in secondary mathematics. Students must have earned a master’s degree to enroll in this course or obtain consent of the instructor. Preq: EDSC 4260 or consent of instructor.
EDSC 8430 Advanced Studies in the Teaching of Secondary School Science 3 (3) Methods of science teaching theory and practice as shown by current research literature. Emphasis is on laboratory, inquiry and other student-centered teaching strategies. Techniques in science curriculum development. Issues in science teaching. Science teaching leadership skills. Students must have earned a master's degree to enroll in this course or obtain consent of the instructor. Prereq: EDSC 4270 or consent of instructor.

EDSC 8440 Advanced Studies in the Teaching of Secondary School Social Studies 3 (3) Social studies teaching strategies derived from major theories of learning and contemporary research; curricular issues in social studies education. Students must have earned a master's degree to enroll in this course or obtain consent of the instructor. Prereq: EDSC 4280 or consent of instructor.

EDSC 8460 Current Literature in English Education 3 (3) Research literature in English education; examination of literature in research methods and curriculum in English teaching. Students are expected to have completed a methods course in English education before enrolling in this course.

EDSC 8470 Current Literature in Mathematics Teaching 3 (3) Examination of literature in both the research and curriculum in mathematics education. Students are expected to have completed a graduate teaching methods course or obtained consent of instructor before enrolling in this course.

EDSC 8480 Current Literature in Science Teaching 3 (3) Recent literature of science education; examination of literature in both the research and curriculum in secondary science teaching. Students are expected to have completed a graduate teaching methods course or obtained consent of instructor before enrolling in this course.

EDSC 8490 Current Literature in Social Studies Teaching 3 (3) Examines recent literature in social studies education, in both curriculum and instruction. Students are expected to have completed a graduate teaching methods course or obtained consent of instructor before enrolling in this course.

EDSC 8610 Teaching Methods and Strategies for Secondary Science 3 (3) Students develop instructional practices and materials appropriate for secondary mathematics and become familiar with curriculum standards and materials. Includes field experiences in local schools. Emphasis is on inquiry and other student-centered teaching strategies, laboratory management, techniques in science curriculum development, and science teaching leadership skills. Prereq: Consent of instructor. Coreq: EDSC 8611.

EDSC 8611 Teaching Methods and Strategies for Secondary School Laboratory 0 (1) Non-credit laboratory to accompany EDSC 8610. Coreq: EDSC 8610.

EDSC 8620 Teaching Methods and Strategies for Secondary Mathematics Laboratory 0 (1) Non-credit laboratory to accompany EDSC 8620. Coreq: EDSC 8620.

EDSC 8910 Directed Internship 9 (27) Application of effective teaching techniques and organization of instructional settings for high school students.

EDSC 8920 Capstone Seminar 3 (3) Seminar designed to synthesize skills and instructional techniques developed during coursework and classroom experiences. Analyses of classroom instruction and assessment are facilitated through reflective teaching practices. Class discussions, small group activities, and action research are used to explore topics relevant to internship experiences.

SPECIAL EDUCATION

EDSP 7390 Independent Study in Special Education 1-3 (1-3) Master's level study of selected topics in special education under the direction of a faculty member. May be repeated for a maximum of 24 credits, but only if different topics are covered.

EDSP 8100 Characteristics of Individuals with Learning Disabilities 3 (3) Addresses definitions, identification procedures, cognitive abilities, social functioning, academic skills, and functional performance of individuals with learning disabilities across the lifespan. Prereq: Consent of instructor.

EDSP 8110 Educational Procedures for Individuals with Learning Disabilities 3 (3) Provides knowledge of educational evaluation and instructional procedures to improve outcomes for individuals with learning disabilities. Prereq: EDSP 8100 or consent of instructor.

EDSP 8120 Practicum in Learning Disabilities 3 (1) Practical experience in teaching students with learning disabilities under the supervision of college faculty and local mentor teachers. Prereq: EDSP 8100 or consent of instructor. Coreq: EDSP 8121.

EDSP 8121 Practicum in Learning Disabilities Laboratory 0 (6) Non-credit laboratory to accompany EDSP 8120. Coreq: EDSP 8120.

EDSP 8130 Characteristics of Individuals with Emotional and Behavioral Disorders 3 (3) Addresses the characteristics of individuals with emotional and behavioral disorders. Consideration is given to historical and legal aspects, definitions, comprehensive assessment and the impact of school, home, culture and society. Research findings in the field of emotional and behavioral disorders are emphasized. Prereq: Consent of instructor.

EDSP 8140 Procedures for Individuals with Emotional and Behavioral Disorders 3 (3) Procedures for teaching students with emotional and behavioral disorders, including curriculum and instructional modifications, program planning, facility adaptation, behavior controls, communication with mental health specialists, and transition to general education settings. Prereq: EDSP 8130 or consent of instructor.

EDSP 8150 Practicum in Emotional and Behavioral Disorders 3 (1) Practical experience in teaching students with emotional and behavioral disorders under the supervision of college faculty and local mentor teachers. Prereq: EDSP 8130 or consent of instructor. Coreq: EDSP 8151.

EDSP 8151 Practicum in Emotional and Behavioral Disorders Laboratory 0 (6) Non-credit laboratory to accompany EDSP 8150. Coreq: EDSP 8150.

EDSP 8160 Characteristics of Individuals with Intellectual Disabilities and Autism 3 (3) In-depth study of the etiology, assessment procedures, and learning and behavioral characteristics of individuals with intellectual disabilities and autism across the lifespan. Prereq: Consent of instructor.

EDSP 8170 Educational Procedures for Individuals with Intellectual Disabilities and Autism 3 (3) Identification, selection, and preparation of functional curriculum materials and pedagogy for teaching students with intellectual disabilities and autism. A multidisciplinary, student-centered approach to program planning provides the framework. Prereq: EDSP 8160 or consent of instructor.

EDSP 8180 Practicum in Intellectual Disabilities and Autism 3 (1) Addresses content knowledge, performance skills and professional values for successful teaching of students with intellectual disabilities and autism. Focuses on teacher-directed instruction and the use of critical instructional facilities; the use of recommended practices for students with disabilities, and the measurement and analysis of student performance data. Prereq: EDSP 8160 or consent of instructor. Coreq: EDSP 8181.

EDSP 8181 Practicum in Intellectual Disabilities and Autism Laboratory 0 (6) Non-credit laboratory to accompany EDSP 8180. Coreq: EDSP 8180.

EDSP 8200 Language Arts Instruction for Individuals with Disabilities 3 (3) Research-based methods for instructing individuals with disabilities. Includes principles of effective language arts instruction in reading, writing, speaking and listening skills. Prereq: Consent of instructor.

EDSP 8210 Educational Assessment of Individuals with Disabilities 3 (3) Introduction to the assessment process in special education by addressing procedural safeguards; data collection via informal and standardized procedures; issues in assessment; psychometric properties of standardized tests; and administration, scoring and interpretation of selected instruments. Prereq: Consent of instructor.

EDSP 8220 Teaching Mathematics to Individuals with Disabilities 3 (3) Procedures for teaching mathematics to individuals with disabilities using direct instruction as an approach to assessment, instructional planning and evaluation. Research in mathematics instruction for individuals with disabilities and mathematics program. Prereq: Consent of instructor.

EDSP 8230 Teaching Individuals with Disabilities in Integrated Settings 3 (3) Strategies for teaching individuals with disabilities in integrated settings; appropriate instruction, accommodations, natural supports, collaboration and consultation.

EDSP 8380 Selected Topics in Special Education 1-3 (1-3) Specific master's-level special education topics not found in other courses are selected for in-depth study. May be repeated for a maximum of 24 credits, but only if different topics are covered. Prereq: Consent of instructor.
EDSP 8390 Independent Study in Special Education 1-3 (1-3) Master's-level study of selected topics in special education under the direction of a faculty member. May be repeated for a maximum of 24 credits, but only if different topics are covered. Preq: Consent of instructor.

EDSP 8400 Transition Education and Services for Individuals with Disabilities 3 (3) Postsecondary options for individuals with disabilities; educational programs and services which support their transition from school to life. Preq: Consent of instructor.

EDSP 8410 Instructional Strategies for Individuals with Disabilities in Secondary School Settings 3 (3) Instructional procedures for teaching individuals with disabilities in middle and high schools. Research-validated practices in learning strategies, content-area instruction, functional skills, and community-based instruction. Preq: Consent of instructor.

EDSP 8530 Legal and Policy Issues in Special Education 3 (3) The impact of legislation-IDEA, Section 504 and litigation on special education; six major principles of special education law; interpretation of court cases; residential placements; discipline; extended school year services; compensatory education; inclusion; strategies to minimize litigation and trends in special education.

EDSP 8540 Applied Behavior Analysis 3 (3) Class members accurately recognize, observe, record and chart inappropriate behaviors; develop behavioral plans based on functional assessment data; determine behavioral objectives; apply behavior analysis principles; and foster student self-management skills.

EDSP 9300 Critical Issues and Trends in Special Education 3 (3) Helps students develop an understanding of the role of convergent research evidence in addressing critical issues in special education practices and policies. Focuses on foundational issues of special education, intervention issues, and personnel preparation issues. Preq: Doctoral level standing.

EDSP 9310 Advanced Research in Learning Disabilities 3 (3) Investigates history, theory, research and practice pertaining to selected issues in methods and curriculum within the field of learning disabilities. Employs research-based interventions in the preparation, selection and adaptation of instruction for students with learning disabilities. Preq: Doctoral level standing.

EDSP 9320 Advanced Research in Emotional/Behavioral Disorders 3 (3) History, theory, research and practice pertaining to selected topics in the fields of emotional/behavioral disorders. Influence of various theoretical approaches in the field. Research-based interventions and curriculum development. Preq: Doctoral level standing.

EDSP 9330 Advanced Research in Mental Retardation 3 (3) History, theory, research and practice pertaining to selected issues in the field of mental retardation; historical treatment; theoretical approaches; research-based interventions; community-based and lifespan curriculum development for individuals with mental retardation. Preq: Doctoral level standing.

EDSP 9340 Evidence-Based Research in Instructional Design and Delivery 3 (3) Emphasizes the research foundations of special education and the importance of evidence-based instructional design and delivery frameworks that impact important outcomes for students with disabilities. Preq: Doctoral level standing.

EDSP 9350 Preparing Highly Qualified Special Educators Research in Teacher Education 3 (3) Prepares doctoral students for the role of teacher educator. Topics include current issues in teacher education and special education including effective teaching practices in general and special education. Current findings in teacher education and special education research and development and conduct of research are emphasized. Preq: Doctoral level standing.

EDSP 9360 Single Subject Research Design 3 (3) Provides doctoral students with practical information regarding the conduct, theory, and analysis of single-subject research methods. Emphasizes skills in design, implementation and analysis of single-subject research, functional level standing.

EDSP 9370 Research in High Incidence Disabilities 3 (3) Emphasizes research related to characteristics and identification of individuals with high incidence disabilities, as well as evidence-based instructional and behavioral interventions. Preq: Doctoral level standing.

EDSP 9380 Legal Trends in Special Education 3 (3) Critical examination of legislative mandates in special education. Areas of study include the Individuals with Disabilities Education Act, Section 504, the Americans with Disabilities Act, and the Elementary and Secondary Education Act, Pertinent landmark and current litigation are also examined.

EDSP 9800 Internship in Curriculum and Instruction 1-6 (1-6) Practical experiences linking the student's program of study to his/her field of professional service. To be taken Pass/No Pass only. Preq: Consent of advisor.

EDSP 9910 Doctoral Dissertation Research 1-18 (1-18)

EDSP 9940 Directed Research 1-4 (1-4) Research in a line of inquiry in education under the direction of faculty. May be taken with different faculty members and may be repeated for a maximum of 18 hours. To be taken Pass/No Pass only. Preq: EDI 8770 or EDI 8080 or consent of instructor.

ENVIRONMENTAL ENGINEERING AND SCIENCE

EES 6010 Environmental Engineering 3 (3) Introduction to the field of environmental engineering. Topics include environmental phenomena, impact of pollutants in the aquatic environment, solid-waste management, air pollution control, radiological health, and simple water and wastewater treatment systems.

EES 6020 Water and Waste Treatment Systems 3 (3) Study of fundamental principles, rational design considerations, and operational procedures of the unit operations and processes employed in water and waste treatment. Both physicochemical and biological treatment techniques are discussed. Introduces the integration of unit operations and processes into water and waste treatment systems.

EES 6100 Environmental Radiation Protection 1 3 (3) Fundamental principles of radiological health and radiation safety. Topics include radiation fundamentals, basic concepts of environmental radiation protection, internal and external dosimetry, environmental dose calculations and radiation protection standards.

EES 6110 Ionizing Radiation Detection and Measurement 3 (3) Laboratory exercises in ionizing radiation detection and measurements. Topics include nuclear electronics; counting statistics; radiation interactions; basic gas, scintillation, and semiconductor detectors; gamma-ray spectroscopy; health physics survey instrumentation; and thermoluminescent dosimetry. Preq: EES 4100 or EES 4110 Coreq: EES 6111.

EES 6111 Ionizing Radiation Detection and Measurement Laboratory 0 (3) Non-credit laboratory to accompany EES 6110. Coreq: EES 6110.

EES 6300 Air Pollution Engineering 3 (3) Introductory course in air pollution and its control. Topics include air pollutants and effects, sources, dispersion models, engineering controls, and air-quality legislation.

EES 6510 Newman Seminar and Lecture Series in Natural Resources Engineering 1 (2) Topics dealing with development and protection of land, air, water, and related resources are covered by seminar with instructor and invited lecturers. Current environmental and/or resource conservation issues are addressed.

EES 6800 Environmental Risk Assessment 3 (3) Quantitative estimation of human health risk posed by the release of a contaminant to the environment. Topics include methods for analyzing emission rate, environmental transport, exposure, and health effects; methods of uncertainty analysis; and the role of risk assessment in environmental regulation and environmental decision making.

EES 6840 Municipal Solid Waste Management 3 (3) Introduction to the problems, regulations, collection, handling, recycling, and disposal of municipal solid wastes in the urban and rural sectors. Emphasizes an integrated waste-management system with resource recovery, composting, incineration, landfill disposals, and their costs.

EES 6850 Hazardous Waste Management 3 (3) Introduction to the problems, regulations, treatment, and ultimate disposal of hazardous and toxic materials. Spill cleanup, groundwater transport, land disposal, incineration, and treatment technologies are discussed.

EES 6860 Pollution Prevention and Industrial Ecology 3 (3) Topics include pollution prevention technology, the role of pollution prevention within a corporation, source reduction and recycling assessments, treatment to reduce disposal, life-cycle assessment, design for environment, and industrial ecology. Emphasizes case studies.
EES 6900 Special Projects 1-3 (1-3) Studies or laboratory investigations on special topics in the environmental engineering and science field. Arranged on a project basis with a maximum of individual student effort and a minimum of staff guidance. May be repeated for a maximum of three credits. Preq: Consent of instructor.

EES 7010 Special Problems 1-6 (1-6) Environmental engineering problems selected to meet the interests and experience of students and instructor. Formal report is required. Restricted to MEngr students. To be taken Pass/No Pass only.

EES 8020 Environmental Engineering Principles 3 (3) Fundamental principles required for simulation and modeling of environmental engineering phenomena; mass transfer, reactor kinetics, simulation techniques and applications to various natural and engineered systems. Offered fall semester only.

EES 8030 Physicochemical Operations in Water and Wastewater Treatment Systems 3 (3) Principles of physicochemical operations used in water and wastewater treatment including sedimentation, filtration, mixing, gas transfer, adsorption, ion exchange, coagulation, precipitation, disinfection and oxidation. Offered spring semester only. Preq: EES 8020 and EES 8430.

EES 8040 Biochemical Operations in Wastewater Treatment Systems 3 (3) Principles of biochemical operations used in wastewater treatment; modeling of ideal biochemical reactors and design criteria for aerated lagoons, activated sludge, trickling filters, rotating biological contacts, nitrification, denitrification and digestion. Offered spring semester only. Preq: EES 8020 and EES 8510.

EES 8050 Laboratory in Water and Wastewater Treatment Operations 3 (6) Laboratory exercises in selected water and wastewater treatment operations including sedimentation, filtration, adsorption, coagulation, softening, aeration, activated sludge, aerobic digestion and anaerobic digestion. Offered spring semester only. Preq or concurrent enrollment: EES 8030 or EES 8040.

EES 8060 Process and Facility Design for Environmental Control Systems 2-4 (2-4) Integration of unit operations into complex systems for treatment of industrial/domestic water and wastewater, contaminated groundwater or air, landfill leachate and toxic liquid wastes. Student teams design an integrated system for either water/wastewater or a hazardous/toxic waste. Offered fall semester only. Preq: EES 8030 or EES 8040.

EES 8080 Groundwater Modeling 3 (3) Mathematical and computer modeling of groundwater flow and nonreactive solute transport through geological formations; conceptual flow-models for geologic systems; formulation of governing mass and energy conservation equations; application of analytical, numerical and stochastic models to real-world problems.

EES 8090 Subsurface Remediation Modeling 3 (3) Lectures and computer exercises involving subsurface remediation methods including groundwater extraction, soil vapor extraction, stream flushing and a variety of other techniques; modeling flow of multiphase and multicomponent mixtures in porous medium.

EES 8100 Analytical Methods for Hydrogeology 3 (3) Analytical mathematical methods for modeling subsurface fluid flow and transport processes including saturated water flow, unsaturated zone gas flow, chemical transport and heat transfer, emphasizing the derivation and solution of governing equations for modeling subsurface flow and transport.

EES 8120 Environmental Nuclear Engineering 3 (3) Environmental aspects of nuclear technology emphasizing nuclear reactors and the nuclear fuel cycle; environmental transport of radioactive materials; radioactive effluents from nuclear power plants; nuclear power plant safety; environmental aspects of nuclear fuel cycle activities; waste management. Offered fall semester only. Preq: EES 6100.

EES 8130 Environmental Radiation Protection Laboratory 3 (1) Continuation of EES 6110; advanced experiments in radiation detection, radiation protection, health physics and environmental monitoring. Offered fall semester only. Preq: EES 4110 or EES 6110. Coreq: EES 8131.

EES 8131 Environmental Radiation Protection Laboratory 0 (6) Non-credit laboratory to accompany EES 8130. Coreq: EES 8130.

EES 8140 Applied Numerical Methods in Process Simulation 3 (3) Numerical solution techniques as applied to chemical process systems; finite difference techniques for partial differential equations; numerical methods. Offered spring semester only. Preq: EES 8160 and EES 8440.

EES 8160 Technical Nuclear Forensics 3 (3) Technical nuclear forensics is a discipline that involves the collection, analysis, and evaluation of samples from nuclear reactor or post-detonation of a nuclear weapon. These radiological and nuclear materials, as well as devices, debris and immediate effects created by nuclear detonation are of interest. Preq: EES 8100.

EES 8170 Applied Simulation Laboratory 0 (3) Non-credit laboratory to accompany EES 8170. Coreq: EES 8170.

EES 8171 Applied Process Simulation Laboratory 0 (1) Non-credit laboratory to accompany EES 8171. Coreq: EES 8170.

EES 8200 Environmental Systems Analysis 3 (3) Analysis of a systems view of environmental problems, with particular emphasis on conflicting objectives such as economic and environmental concerns. Example problems span traditional environmental engineering processes, natural resources, proactive environmental management and sustainability.

EES 8320 Air Pollution Meteorology 3 (3) Applications of meteorology to air pollution; micro-meteorology; plume rise modeling; atmospheric diffusion; deposition, washout of pollutants; air chemistry; applications of diffusion modeling to air quality planning. Preq: Consent of instructor.

EES 8330 Air Pollution Control Systems 3 (3) Principles and design of air pollution control equipment including mechanical collectors, electrostatic precipitators, baghouse filters, wet scrubbers, adsorbers and incinerators. Offered spring semester only. Preq: EES 4300 or EES 6300.

EES 8340 Particles in the Atmosphere 3 (3) Chemical and physical behavior of atmospheric particles and their interaction with other particles, gases and light; generation, measurement methods and control strategies of atmospheric particles. Students are expected to have completed coursework in differential equations prior to enrolling in this course. Preq: EES 4300 or EES 6300.

EES 8370 Biodegradation and Bioremediation 3 (3) Basic principles of biodegradation for major classes of organic contaminants including halogenated aliphatics and aromatics, fuel hydrocarbons, pesticides and nitrated energetic compounds; biotransformations of metals; biodegradation principles applied to the development of bioremediation technologies including intrinsic, in situ and on-site engineered approaches. Preq: EES 8510.

EES 8420 Actinide Chemistry 3 (3) Chemical and physical aspects of actinide metals and compounds (including properties, structure and bonding, reactions, kinetics, thermodynamics), coordination and solution chemistry, behavior and speciation in the environment, separation and purification, chemistry of the nuclear fuel cycle and waste treatment and related topics; fundamental concepts, history and recent developments. Preq: Consent of instructor.

EES 8430 Environmental Chemistry 3 (3) Principles of chemical kinetics and thermodynamics applied to fundamental understanding of aqueous environmental samples including natural waters, wastewaters and treated waters; factors controlling chemical concentrations, acid-base equilibria, solubility equilibria, complex formation, electrochemistry, adsorption phenomena. Offered fall semester only. Students are expected to have completed two semesters of general chemistry before enrolling in this course.

EES 8440 Environmental Chemistry Laboratory I 3 (2) Laboratory experience in basic analytical methods used in water quality studies; experimental design, sampling, wet-chemical analytical techniques, data collection and analysis, data interpretation and data quality techniques. Offered fall semester only. Students are expected to have completed two semesters of coursework in general chemistry before enrolling in this course. Coreq: EES 8441.

EES 8441 Environmental Chemistry Laboratory I 0 (3) Non-credit laboratory to accompany EES 8440. Coreq: EES 8440.

EES 8450 Environmental Organic Chemistry 3 (3) Application of parameters that describe the equilibrium distribution and exchange rates for environmentally significant organic compounds to the modeling of processes in engineered and natural systems, including environmental parameter estimation techniques, structure-activity relationships and integration of environmental processes to model contaminant distribution and residence time in environmental systems. Offered spring semester only. Students are expected to have completed two semesters of coursework in general chemistry before enrolling in this course.

<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 6190</td>
<td>Postcolonial and World Literatures 3 (3) Selected readings in postcolonial literature and theory, focusing on issues of nationalism, migration, resistance, race, language, and master narratives. Preq: ENGL 3100 or consent of instructor.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 6200</td>
<td>Amer Lit to 1799 3 (3) Focused study of authors, movements, themes, critical approaches and genres in literature of colonial and early national America from early European explorations of the continent to 1799. Preq: ENGL 3100 or consent of instructor.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 6210</td>
<td>American Literature from 1800 to 1899 3 (3) Focused study of authors, movements, themes, critical approaches and genres in the poetry and prose of major American authors and literary movements from the nineteenth century. Preq: ENGL 3100 or consent of instructor.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 6250</td>
<td>The American Novel 3 (3) Survey of the most significant forms and themes of the American novel from its beginnings to 1900. Preq: ENGL 3100 or consent of instructor.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL 6260</td>
<td>Southern Literature 3 (3) Intellectual and literary achievement of the South from 1607 to the present, with emphasis on the writers of the 19th century. Preq: ENGL 3100 or consent of instructor.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
ENGL 6280 Contemporary Literature 3 (3) Focuses on American, British, and other fiction, poetry, and drama from Post-World War II to the present. Preq: ENGL 3100 or consent of instructor.

ENGL 6290 Dramatic Literature I 3 (3) Selected reading in the dramatic literature from the classical era of Greece and Rome to the Renaissance. Preq: ENGL 3100 or consent of instructor.

ENGL 6300 Dramatic Literature II 3 (3) Principles and progress of drama from the Restoration to the present; analysis of representative plays; critical reports; discussion of trends in dramatic literature. Preq: ENGL 3100 or consent of instructor.

ENGL 6310 Modern Poetry 3 (3) The modern tradition in English and American poetry from Yeats to the present; relevant critical essays. Preq: ENGL 3100 or consent of instructor.

ENGL 6320 Modern Fiction 3 (3) American and British novels and short stories of the 20th century. Preq: ENGL 3100 or consent of instructor.

ENGL 6330 The Anglo-Irish Literary Tradition 3 (3) Exploration of the unique literary heritage and achievement of English-language Irish writers in the 19th and 20th centuries. Major figures of the Irish tradition: W. B. Yeats, James Joyce, Samuel Beckett, and other writers; consideration of the specifically Irish aspects of their works. Preq: ENGL 3100 or consent of instructor.

ENGL 6340 Environmental Literature 3 (3) Survey of literature that examines the relationship between human beings and the natural world, including analysis of environmental themes in myths and legends and in selected poetry and prose of 19th- and 20th-century England and America. Preq: ENGL 3100 or consent of instructor.

ENGL 6350 Literary Criticism 3 (3) Major critical approaches to literature. Preq: ENGL 3100 or consent of instructor.

ENGL 6360 Feminist Literary Criticism 3 (3) Introduces the germinal works of feminist literary theory and criticism. Outlines the development of modern literary criticism by studying feminist versions of the major critical methodologies. Preq: ENGL 3100 or consent of instructor.

ENGL 6370 Directed Studies 1-3 (1-3) Class and tutorial work for students with special interests or projects in American, British, or European literature outside the scope of existing courses. Applications must be approved during the registration period of the semester preceding the one in which directed studies will occur. May be repeated by arrangement with the department. Preq: ENGL 3100 or consent of instructor.

ENGL 6400 Literary Theory 3 (3) Examination of how approaches such as Marxism, Psychoanalysis, Feminism, Deconstruction, New Historicism, Post-Colonialism, Cultural Studies, and Queer Theory answer the question, “What is literature?” Preq: ENGL 3100 or consent of instructor.

ENGL 6410 Literary Editing 3 (3) Examination of how the theories and practices of editing construct texts, stressing the problems and objectives of editing and providing practical experience with literary editing. Preq: ENGL 2120 or ENGL 2140 or ENGL 2150.

ENGL 6420 Cultural Studies 3 (3) Investigation of the similarities and connections between a wide variety of cultural products, events, and practices—from fast food to opera to online shopping—using theories ranging from Marxism to hybridity. Preq: ENGL 3100 or consent of instructor.

ENGL 6440 Renaissance Literature 3 (3) Selected readings in non-Shakespearean British literature from 1500–1660. Includes drama, poetry, and prose. Preq: ENGL 3100 or consent of instructor.

ENGL 6450 Fiction Workshop 3 (3) Workshop in the creative writing of prose fiction. May be repeated once for credit. Preq: ENGL 3450 or consent of instructor.

ENGL 6460 Poetry Workshop 3 (3) Workshop in the creative writing of poetry. May be repeated once for credit. Preq: ENGL 3460 or consent of instructor.

ENGL 6470 Playwriting Workshop 3 (3) Workshop in the creative writing of plays. May be repeated once. Preq: ENGL 3470 or THEA 3470 or consent of instructor.

ENGL 6480 Screenwriting Workshop 3 (3) Workshop in the creative writing of screenplays. May be repeated once for credit. Preq: ENGL 3480 or consent of instructor.

ENGL 6490 Creative Non-Fiction 3 (3) Advanced workshop in writing non-fiction prose or magazine and free-lance markets. Preq: ENGL 3450 or 3490 or consent of instructor.

ENGL 6500 Film Course 3 (2) Advanced study of films that have similar subject, themes, and techniques, including such genres as the Western, horror, gangster, science fiction, musical, and/or screwball comedy. Also considers nontraditional genres, screen irony, genre theory, and historical evolution of genres. Topics vary. Preq: ENGL 3570 or consent of instructor. Coreq: ENGL 6501.

ENGL 6502 Film Genres Laboratory 0 (3) Non-credit laboratory to accompany ENGL 6500. Coreq: ENGL 6501.

ENGL 6510 Film Theory and Criticism 3 (2) Advanced study into the theory of film/video making emphasizing understanding a variety of critical methods to approach a film. Examines the history of film theory and defines the many schools of film criticism, including realism, formalism, feminism, semiotics, Marxism, and expressionism. Preq: ENGL 3570 or consent of instructor. Coreq: ENGL 6511.

ENGL 6511 Film Theory and Criticism Laboratory 0 (3) Non-credit laboratory to accompany ENGL 6510. Coreq: ENGL 6510.

ENGL 6520 Great Directors 3 (2) Intensive study of one to three film directors emphasizing understanding the entire canon of each director. Students study similarities in techniques, shifts in thematic emphasis, and critical methodologies for approaching the works of each director. Topics vary. Preq: ENGL 3570 or consent of instructor. Coreq: ENGL 6521.

ENGL 6521 Great Directors Laboratory 0 (3) Non-credit laboratory to accompany ENGL 6520. Coreq: ENGL 6520.

ENGL 6530 Sexuality and the Cinema 3 (2) Examination of male/female sexual roles and their evolution in American genre films, avant-garde cinema, and international films. Includes the study of movies in relation to cultural values and social stereotypes, introduction to feminist film theory, and consideration of film pornography. Preq: ENGL 3570 or consent of instructor. Coreq: ENGL 6531.

ENGL 6531 Sexuality and the Cinema Laboratory 0 (3) Non-credit laboratory to accompany ENGL 6530. Coreq: ENGL 6530.

ENGL 6550 American Humor 3 (3) Native American humor of the 19th and 20th centuries. Preq: ENGL 3100 or consent of instructor.

ENGL 6560 Literature and Arts of the Holocaust 3 (3) Addresses the Holocaust through literature, art, architecture, music, and film. Beginning with historical, political, and economic forces that contributed to the Holocaust, course then focuses on highly diverse creative responses to this event—responses that often reflect the difficulties and politics of these commemorative gestures. Preq: ENGL 3100 or consent of instructor.

ENGL 6590 Special Topics in Language, Criticism, Theory 3 (3) Advanced studies in topics not central to other English courses, such as certain authors, works, genres, themes, or areas of knowledge and culture. Specific topics are announced when offered. May be repeated once for credit with department chair’s consent. Preq: ENGL 3100 or consent of instructor.

ENGL 6600 Issues in Writing Technologies 3 (3) Examination of writing technologies from different historical periods. Investigates how writing is understood, circulated, legislated, and protected in terms of its production technology. Preq: ENGL 3100; and ENGL 2020 or ENGL 2120 or ENGL 2130 or ENGL 2140 or ENGL 2150, or consent of instructor.

ENGL 6630 Topics in Literature to 1699 3 (3) Selected readings in literature from antiquity through the 17th century for focused study of authors, movements, themes, critical approaches, and genres. Topics vary and are constructed by individual faculty. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: ENGL 3100 or consent of instructor.

ENGL 6640 Topics in Literature from 1700 to 1899 3 (3) Selected readings in literature from the 18th and 19th centuries for focused study of authors, movements, themes, critical approaches, and genres. Special topics vary and are constructed by individual faculty. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: ENGL 3100 or consent of instructor.

ENGL 6650 Topics in Literature from 1900 3 (3) Selected readings in 20th- and 21st-century literature for focused study of authors, movements, themes, critical approaches, and genres. Topics vary and are constructed by individual faculty. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: ENGL 3100 or consent of instructor.
ENGL 6750 Writing for Electronic Media 3 (3) Workshop in new forms of writing and hypertextual design for interactive electronic media, including social networks, online and video communities. May be repeated once for credit at the undergraduate level. Preq: ENGL 3100 or consent of instructor.

ENGL 6780 Digital Literacy 3 (3) Examines how technology has expanded ideas of literacies and texts. Includes reading, studying and analyzing print and digital texts to determine how digital techniques change patterns of reading and how readers make sense of electronic texts. Preq: ENGL 3100 or consent of instructor.

ENGL 6820 African American Literature to 1920 3 (3) Critical examination of the development of the African American literary tradition from the Colonial Period to the Harlem Renaissance. Considers the historical and cultural contexts of a variety of texts, themes and theories. Preq: ENGL 3100 or consent of instructor.

ENGL 6830 African American Literature from 1920 to the Present 3 (3) Critical examination of the development of the African American literary tradition from the Harlem Renaissance to the present. Considers historical and cultural contexts of a variety of texts, themes, theories and literary movements. Preq: ENGL 3100 or consent of instructor.

ENGL 6850 Composition and Language Studies for Teachers 3 (3) Examines the principles and practices of composing and teaching composition. Includes a historical study of English language with attention to phonology, morphology, syntax, semantics, and practical aspects of language grammars. Serves as a practicum in composing and assessing processes, collaborative learning, writers purposes, audience expectations, and language conventions. Preq: ENGL 3100 or consent of instructor.

ENGL 6970 Topics in Book History 3 (3) Examines the material and theoretical constructions of the book. Covers both historical and contemporary dimensions of dissemination, reception, theory and influence of books. Preq: ENGL 3100 or consent of instructor.

ENGL 6980 Writing Center Theory and Practice 3 (3) Preparation for students to work in the Clemson University Writing Center. Required of all undergraduate Writing Fellows. Preq: Sophomore standing and consent of instructor. Coreq: ENGL 6981.

ENGL 6981 Writing Center Theory and Practice Laboratory 0 (1) Non-credit laboratory to accompany ENGL 6980. Coreq: ENGL 6980.

ENGL 7000 Children’s Literature for Teachers 3 (3) Literature for preschool through junior high. ENGL 8000 Introduction to Research in Literature and research; use of library and bibliographical tools; exposition of scholarship. Required of all candidates for the Master of Arts degree and Master of Education degree with a concentration in Secondary Education/English.

ENGL 8010 Topics in Composition 3 (3) Principal theories and practices in modern grammar, stylistics and semantics related to teaching composition.

ENGL 8020 Topics in Literary Genres 3 (3) Principal literary genres.

ENGL 8030 Topics in Rhetorical Theory 3 (3) Major rhetorical theories, figures and historical movements.

ENGL 8040 Fundamentals of Health Communication 3 (3) Fundamentals of health communication and the Health Communication Certificate; two theoretical bases underlying this interdisciplinary program in health communication, one based on social science theory and one based on humanities, i.e. rhetorical theory; history of both theoretical bases. Preq: Undergraduate students may request consent of Health Communication Coordinator to enroll in this course.

ENGL 8050 Topics in Medieval Literature 3 (3) Principal works in verse and prose from c. 1100-1500.

ENGL 8060 Medical Rhetoric and Writing 3 (3) Issues in medical writing and health communication, including grant writing and writing for visual and electronic media; general and specific forms and documents for professional writers in health professions. Preq: Undergraduate students may request consent from Health Communication Coordinator.

ENGL 8070 Health Communication Campaign Planning and Evaluation 3 (3) Application of theories, practices and tools developed in ENGL 8040 and 8060 to planning, implementing and evaluating a public health campaign that targets a particular health practice. Preq: ENGL 8040 and ENGL 8060 or consent of Health Communication Certificate Coordinator.

ENGL 8080 Topics in Renaissance and Restoration Literature 3 (3) Principal works in verse and prose from c. 1500-1700.

ENGL 8090 Communication, Culture and the Social Net 3 (3) Seminar explores communication and cultural practices that are evolving around social media.

ENGL 8100 Literary Criticism and Theory 3 (3) Introduces significant methods, approaches and theorists in the current practice of literary and cultural criticism. Establishes a basic familiarity with the vocabulary and techniques of major critical movements and offers a foundation for specialized study.

ENGL 8110 Topics in Neoclassic and Romantic Literature 3 (3) Principal works in verse and prose from 1700-1832.

ENGL 8140 Topics in Victorian and Modern British Literature 3 (3) Principal works in verse and prose from 1832 to present. May be repeated for a maximum of nine credits.

ENGL 8200 Topics in American Literature to 1865 3 (3) Significant authors; works in poetry and prose; literary-intellectual movements such as Realism, the Enlightenment, Romanticism and Transcendentalism from c. 1607-1865.

ENGL 8230 Topics in American Literature Since 1865 3 (3) Significant authors; works in poetry and prose; literary-intellectual movements such as Naturalism, Modernism and Postmodernism from 1865 to the present. May be repeated for a maximum of nine credits.

ENGL 8310 Special Topics 3 (3) Topics not covered in other courses. May be repeated for a maximum of nine credits.

ENGL 8320 Topics in Scientific, Technical and Business Writing 3 (3) Covers topics not covered in other professional communication seminars.

ENGL 8330 Rhetoric of Science 3 (3) Historical and cultural approaches to understanding science and scientific rhetorics.

ENGL 8340 Usability Testing Methodologies in Professional Communication 3 (3) Research methodologies used in testing the usability of professional communication.

ENGL 8350 Topics in Literary Criticism 3 (3) Principal statements of literary critics from the classical era to the present.

ENGL 8360 Digital Publishing Technologies: Theories in Practice 3 (3) User-centered design theories applied to multimedia interfaces and online documents for professional communicators.

ENGL 8380 Global Professional Communication 3 (3) Implications of professional communication in an international context; theories, methods and practices of global professional communication.

ENGL 8390 Writing Proposals and Grant Applications 3 (3) Practice in reading requests for oral and digital proposals, analyzing rhetorical contexts and theories of proposals, and writing proposals and grant applications; and making oral and digital presentations of proposals.
ENGL 8400 Selected Topics 3 (3) Independent/directed study; tutorial work in linguistics, professional communication, or American, British or European literature not offered in other courses. Preq: Consent of director of MA in English or MA in Professional Communication program.

ENGL 8500 Research Methods in Professional Communication 3 (3) Covers various research methods with emphasis on humanistic and empirical inquiry. Readings and research examine how professional communication creates new knowledge and affects the daily lives of others.

ENGL 8510 Seminar in Professional Writing 3 (3) Advanced seminar in the principles and practice of writing and editing documents for government, industry and the sciences. Students produce projects suitable for publication or presentation; professional development for technical communicators.

ENGL 8520 Rhetoric and Professional Communication 3 (3) Theories of effective communication, classical to contemporary, that inform decision-making strategies in professional communication.

ENGL 8530 Visual Communication 3 (3) Understanding the language of images used in textual and extratextual communication; theories of perception, methods of visual persuasion, gender analysis, and cognitive and aesthetic philosophies of visual rhetoric; technologies of visual communication; and technologies of visual production.

ENGL 8540 Teaching Professional Writing 3 (3) Examines theories and practices of teaching written, graphic, and oral communication. Students prepare course descriptions, rationales and syllabi for teaching various forms of business, scientific and technical writing.

ENGL 8550 Theories and Practices of Workplace Communication 3 (3) Workplace cultures and their theoretical and practical applications for professional communication.

ENGL 8570 Digital Rhetorics Across Media and Information Technologies 3 (3) Application of emerging rhetorics of visuals, animations, audio, video, and interfaces to professional communication technologies through hands-on experiences with technologies widely used in academic and industry settings. Work with extant and emerging information technologies building digital audio projects, digital video movies, Web publications, and social media.

ENGL 8720 Print and Digital Portfolios 3 (3) Focuses on theories, development, construction and assessment of print and digital portfolios in educational contexts including the classroom, school reform and other large-scale efforts, programmatic assessments and personal/professional development. Special attention is given to ways the medium shapes reflection, presentation, connections and artifacts within the portfolio.

ENGL 8850 Composition Theory 3 (3) Teaching college-level courses, stressing contemporary composition theory, research and practice. Required of all MA in English and MACP Teaching Assistants.

ENGL 8860 Composition Practicum 1 (1) Students continue training for teaching ENGL 1030, Accelerated Composition. Specific attention is given to translating theoretical concepts into creating assignments, designing curriculum and grading. Course is to be taken only fall semester of student’s teaching assistantship year. No credit towards a degree will be awarded. Students must be enrolled in a graduate teaching assistantship to enroll in this course. Preq: ENGL 8850.

ENGL 8870 Writing Center Theory and Practice 1 (1) Prepares graduate students in English and Professional Communication Programs to work with students in the Writing Center. Undergraduate students may request consent of instructor to enroll in this course.

ENGL 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

ENGL 8920 Master’s Project 3 (3) Required for nonthesis option in the Professional Communication MA program. Students create a communication deliverable for the professional world keeping a journal as a record of the project, and write a scholarly deliverable for the professional world.

ENVIRONMENTAL AND NATURAL RESOURCES

ENR 6130 Restoration Ecology 3 (3) Applies ecological principles to the restoration of disturbed terrestrial, wetland, and aquatic ecosystems. Includes the restoration of soils and waterways, of flora and fauna, and of natural ecological processes such as plant succession and nutrient cycling. Preq: BIOL 3130 or BIOL 4410 or WFB 3130.

ENR 6150 Forest Policy and Administration 3 (3) Introduction to the development, principles, and legal provisions of forest policy in the United States, and an examination of administrative and executive management in forestry.

ENR 6290 Environmental Law and Policy 3 (3) Develops an understanding of the three branches of government that affect and dictate use and protection of natural resources. Attention is given to major federal environmental statutes. Includes examination of how policy is developed, implemented, and evaluated in the public and private sectors. Preq: Junior standing.

ENR 6340 Geographic Information Systems for Landscape Planning 3 (2) Develops competence in geographic information systems (GIS) technology and its application to various spatial analysis problems in landscape planning. Topics include data development and management, spatial analysis techniques, critical review of GIS applications, needs analysis and institutional context, GIS hardware and software, hands-on application. Credit may be received for only one of ENR 4340 or FOR 4340. Coreq: ENR 6341.

ENR 6341 Geographic Information Systems for Landscape Planning Laboratory 0 (3) Noncredit laboratory to accompany ENR 6340. Coreq: ENR 6340.

ENVIRONMENTAL SCIENCE AND POLICY

ENSP 6720 Environmental Planning and Control 2 (2) Application of planning and control to effective environmental quality improvement. Considers water supply and treatment, wastewater treatment and disposal, solid waste disposal, air pollution abatement, and land use and zoning from the standpoint of control. Not intended for graduate students in engineering. Preq: Consent of instructor.

ENTOMOLOGY

ENT 6020 Insect Morphology Laboratory 0 (3) Non-credit laboratory to accompany ENT 6000. Coreq: ENT 6000.

ENT 6040 Urban Entomology 3 (3) Study of pests common to the urban environment with emphasis on arthropod pest biology, pest importance, and management strategies. Students learn both theoretical and practical aspects of urban pest management. Preq: BIOL 1030 and BIOL 1040; or BIOL 1100 and BIOL 1110; or ENT 3010.

ENT 6060 Diseases and Insects of Turfgrasses 2 (2) Host-parasite relationships, symptomatology, diagnosis, economics, and control of infectious diseases of turfgrasses and life histories, diagnosis, and control of important insect pests of turfgrasses. Preq: ENT 3010 and PLPA 3100.

ENT 6070 Applied Agricultural Entomology 4 (3) Topics include recognition, biology, damage, and control of economically important insects and mites found on major Southeastern field, fruit, nut, and vegetable crops. Principles and practices of crop protection, including pesticide application, economic basis for decision making, and development of scouting programs are introduced. Preq: ENT 3010. Coreq: ENT 6071.

ENT 6071 Applied Agricultural Entomology Laboratory 0 (3) Non-credit laboratory to accompany ENT 6070. Coreq: ENT 6070.

ENT 6080 Diseases and Insects of Turfgrasses Laboratory 1 (3) Laboratory to complement PLPA 4060 or ENT 4060 to learn symptomatology, diagnosis, and control of infectious diseases of turfgrasses and diagnosis of damage caused by important insect pests of turfgrasses. Preq: PLPA 4060 or ENT 4060.

ENT 6090 Urban Entomology Laboratory 1 (3) Identification of household and structural pests common to the urban environment. Students also gain hands-on experience in termite and general pest control. Preq: BIOL 1030 and BIOL 1040; or BIOL 1100 and BIOL 1110; or ENT 3010. Preq or concurrent enrollment: ENT 4040.
ENT 6150 Insect Taxonomy 3 (1) Identification of the principal families of the major orders of adult insects. Laboratory work consists of intensive practice of such identification. Lecture material deals with theoretical discussion of taxonomic features observed in the laboratory. Prq: BIOL 4000 or ENT 4000. Coreq: ENT 6151.

ENT 6151 Insect Taxonomy Laboratory 0 (6) Non-credit laboratory to accompany ENT 6150. Coreq: ENT 6150.

ENT 6360 Insect Behavior 3 (2) Fundamentals of insect behavior in an evolutionary and ecological perspective. Laboratory emphasizes generation and testing of hypotheses and observation, description, and quantification of insect behavior. Prq: ENT 3010. Coreq: ENT 6361.

ENT 6361 Insect Behavior Laboratory 0 (3) Non-credit laboratory to accompany ENT 6360. Coreq: ENT 6360.

ENT 6690 Aquatic Insects 3 (1) Identification, life history, habitats, and interrelationships of aquatic insects; techniques of qualitative field collection; important literature and research workers. Prq: ENT 3010. Coreq: ENT 6691.

ENT 6691 Aquatic Insects Laboratory 0 (6) Non-credit laboratory to accompany ENT 6690. Coreq: ENT 6690.

ENT 6950 Insect Biotechnology 3 (3) Considers many unique genetic features exhibited by insects and describes the applications of biotechnology to enhance useful products from insects and to affect the control of destructive species. Prq: ENT 3010 and GEN 3020.

ENT 7000 Entomology for Teachers 3 (2) General entomology course for secondary school science teachers with emphasis on collecting and identifying the more common insects; insect morphology, physiology, metamorphosis and methods available for control of destructive species. Not open to Entomology majors pursuing the MS or PhD degrees. Offered spring semester only. Prq: Consent of instructor. Coreq: ENT 7001.

ENT 7001 Entomology for Teachers Laboratory 0 (2) Non-credit laboratory to accompany ENT 7000. Coreq: ENT 7000.

ENT 8080 Taxonomy of Immature Insects 3 (1) Identification of immature insects emphasizing the Holometabola. Identified collection is required. Offered fall semester of odd-numbered years only. Coreq: ENT 8081.

ENT 8081 Taxonomy of Immature Insects Laboratory 0 (6) Non-credit laboratory to accompany ENT 8080. Coreq: ENT 8080.

ENT 8090 Seminar in Entomology 1 (1) Current literature and research in entomology. Class attendance is mandatory. May be repeated for credit. To be taken Pass/No Pass only.

ENT 8100 Selected Topics 1-4 (1-4) Current areas of entomological research and pest management. May be repeated for credit. Prq: Consent of instructor.

ENT 8530 Applied Systematics 3 (2) Application of evolutionary principles to resolution of contemporary zoological problems; legal issues and technical skills for efficient operation of international zoological information storage and retrieval system. Offered spring semester of even-numbered years only. Coreq: ENT 8531.

ENT 8531 Applied Systematics Laboratory 0 (3) Non-credit laboratory to accompany ENT 8530. Coreq: ENT 8530.

ENT 8530 Special Problems in Entomology 1-3 (1-3) Entomological research not related to thesis. Prq: Consent of instructor.

ENT 8700 Insect Physiology and Molecular Biology 4 (3) Advanced instruction on the structure and function of insect physiological processes at the molecular, cellular and tissue levels; physiological and molecular mechanisms underlying the various internal systems of insects. Laboratory emphasizes hands-on experiment and the scientific writing technique to report experimental findings. Prq: BIOL 1110 or CH 2230 or ENT 3010 or ENT 4950. Coreq: ENT 8701.

ENT 8701 Insect Physiology and Molecular Biology Laboratory 0 (3) Non-credit laboratory to accompany ENT 8700. Coreq: ENT 8700.

ENT 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

ENT 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

ENGINEERING AND SCIENCE EDUCATION

ESED 8000 Seminar in Engineering and Science Education 1 (1) Brings contemporary issues in engineering and science education research into the classroom. Experts from academia, industry and the corporate world share presentations on various issues, including recruitment of minorities, retention issues, technology integration into engineering curricula, distance learning, engineering content into K-12 curriculum, learning theories and education policy issues.

ESED 8200 Teaching Undergraduate Engineering Education 3 (3) Designed for engineering graduate students seeking a career in academia. Includes both discussion and practice of effective teaching techniques, assessment and technologies, as well as an overview of current engineering education research.

ESED 8210 Teaching Undergraduate Science Education 3 (3) Graduate students in the sciences who are interested in an academic career learn to improve their teaching by incorporating results of modern science education research, including effective teaching techniques, assessment issues and the use of technology. Students are expected to be enrolled in a science, technology, engineering or mathematics graduate program when enrolling in this course.

ESED 8250 Engineering and Science Student Strategies 3 (3) Elucidates relationships between students’ prior knowledge, problem solving skills and cognitive processes in undergraduate engineering and science courses. Focuses on steps involved in problem solving; how misconceptions are manifested in students’ work and how instruction can be structured to address those misconceptions.

ESED 8500 Special Topics in Engineering and Science Education 1-4 (1-4) Advanced topics intended to develop in-depth areas of particular student interest. May be repeated for a maximum of 15 credits. Prq: Consent of instructor.

ESED 8610 Practicum in Engineering and Science Education 1-3 (1-3) Practicum that includes teaching or mentoring undergraduates in Engineering and Science (General Engineering or student’s home department). Counts towards a Certificate in Engineering and Science Education. May be repeated for a maximum of three credits.

ESED 8700 Theories of Engineering and Science Learning 3 (3) Provides graduate student in engineering and the sciences a foundation in theories of learning with a particular focus on their application to the teaching and learning of science, technology, engineering or mathematics. Prq: Enrollment in a science, technology, engineering or mathematics graduate program.

ESED 8710 Engineering and Science Education Research Methods 3 (3) Introduces methods and tools available for conducting pedagogically sound engineering and science education research. Quantitative, qualitative and mixed methods are discussed and practiced.

ESED 8750 Current Issues in STEM Education Research 3 (3) Designed for doctoral students interested in STEM education research. Covers research areas of current relevance to a breadth of STEM education fields. Students have the opportunity to investigate a current topic of their choosing. Prq: Enrollment in a PhD program.

ESED 8880 Preparing for the Professoriate 3 (3) Prepares students for obtaining a faculty position and achieving tenure in science and engineering disciplines. Students develop a professional portfolio, prepare for the application/ interview process and write a mini-proposal. Prq: Enrollment in a doctorate program in the College of Engineering and Science.

ESED 9910 Dissertation Research and Writing 1-12 (1-12) Designed for students who are conducting research and/or writing their dissertation under the supervision of a faculty member in the Engineering and Science Education program. Credit is to be arranged. Prq: Enrollment in a doctorate program in the College of Engineering and Science.

ENVIRONMENTAL TOXICOLOGY

ETOX 6000 Wildlife Toxicology 3 (3) Assessment of impacts of toxic substances on reproduction, health, and well-being of wildlife species; acute and chronic effects of agricultural chemicals, pesticides, hazardous waste, industrial waste, and oil releases are discussed. Students are expected to have completed coursework in basic biology and wildlife biology before enrolling in this course.

ETOX 6210 Chemical Sources and Fate in Environmental Systems 3 (3) Discusses chemical cycles in the environment on global and microcosm scales. Examines the dependence of fate processes on physical and chemical properties and environmental conditions. Addresses breakdown, movement, and transport of selected toxicants to illustrate the mechanisms that govern chemical fate. Students are expected to have completed coursework in organic chemistry before enrolling in this course.
ETOX 6300 Toxicology 3 (3) Basic principles of toxicology, including quantification of toxicity, toxicokinetics, biochemical action of poisons, and environmental toxicology, are studied. Acute and chronic effects of various classes of poisons (e.g., pesticides, drugs, metals, and industrial pollutants) are discussed in relation to typical routes of exposure and regulatory testing methods. Students are expected to have completed coursework in basic biology and organic chemistry before enrolling in this course.

ETOX 6370 Ecotoxicology 3 (3) Study of the effects of stressors on the ecosystem. Explores the integrative relationships that comprise the field of ecotoxicology in a hierarchical format that focuses on the various levels of ecological organization. Preq: ETOX 4300, or consent of instructor.

ETOX 6850 Environmental Soil Chemistry 3 (3) Study of soil chemical processes (adsorption, desorption, ion exchange, precipitation, dissolution, and redox reactions) of nutrients and inorganic and organic contaminants in soils and organic matter. Chemical complex equilibria and adsorption phenomena at the solid (soil, sediment, and mineral) water interface are emphasized. Students are expected to have completed coursework in basic chemistry or soil chemistry before enrolling in this course.

ETOX 8110 Immunotoxicology 3 (3) Study of how environmental contaminants, drugs and natural biotoxins affect the immune system of man and animals; cellular and molecular mechanisms of action by immunotoxic agents. Students are expected to have completed coursework in basic immunology before enrolling in this course. Preq: ETOX 4300 or 6300.

ETOX 8220 Analytical Toxicology Laboratory 3 (1) Laboratory instrumentation, procedures and experimental methods used for identification and quantitation of toxic substances and their transformation products in environmental and biological samples; application of these procedures in the isolation, detection and quantitation of contaminants in authentic samples. Students are expected to have completed coursework in basic analytical chemistry before enrolling in this course. It is recommended that students also complete coursework in instrumental analysis before enrolling in this course. Preq: ETOX 6221.

ETOX 8221 Analytical Toxicology Laboratory 0 (6) Non-credit laboratory to accompany ETOX 8220. Coreq: ETOX 8220.

ETOX 8300 Mechanistic Toxicology 3 (3) Detailed biochemical toxicology: control, regulation and activity of metabolic enzymes; molecular and cellular mechanisms of toxic action; proposed mechanisms for initiation and development of cancer; mode of action and kinetics of cholinesterase inhibitors; structure/activity relationships of ion channel blockers; biochemical and molecular biomarkers. Preq: ETOX 4300 or ETOX 6300.

ETOX 8310 Biomarkers in Toxicology 3 (1) Methodology used in biomarker identification and evaluation of the effects of toxic substances on living systems using biomarkers in sentinel organisms and surrogate biomarkers. Students are expected to have completed coursework in organic chemistry and coursework and laboratory work in biochemistry before enrolling in this course. Preq: ETOX 4300 or ETOX 6300. Coreq: ETOX 8311.

ETOX 8311 Biomarkers in Toxicology Laboratory 0 (6) Non-credit laboratory to accompany ETOX 8310. Coreq: ETOX 8310.

ETOX 8410 Procedures and Techniques in Ecological Risk Assessment 2 (1) Evaluation and application of the procedures and techniques used in ecological risk assessments, including laboratory and field methods, to determine, measure and evaluate the risks to aquatic, terrestrial and avian species; impacts to biota within, and resulting from, chemical waste disposal facilities and hazardous waste sites. Preq: ETOX 4300 or ETOX 6300 and EXST 8040 or 8050. Coreq: ETOX 8411.

ETOX 8411 Procedures and Techniques in Ecological Risk Assessment Laboratory 0 (3) Non-credit laboratory to accompany ETOX 8410. Coreq: ETOX 8410.

ETOX 8520 Ecological Models 3 (2) Systems analysis applied to ecology; construction of models with predicted ecological consequences of stresses to the environment; frequency response analysis, energy models, information flow, and transfer functions for population interactions. Students are expected to have completed coursework in basic ecology and computer programming before enrolling in this course. Coreq: ETOX 5521.

ETOX 8521 Ecological Models Laboratory 0 (2) Non-credit laboratory to accompany ETOX 8520. Coreq: ETOX 8520.

ETOX 8530 Aquatic Toxicology 3 (3) Combines concepts of solution chemistry with toxicology to develop insight into dose-response relationships for aquatic organisms at various trophic levels. Bioavailability is a unifying concept and concepts of contaminant exposure and organism response are set in an ecological risk assessment framework. Preq: ETOX 4300 or ETOX 6300 and ETOX 4370 or ETOX 6370.

ETOX 8550 Sediment Toxicology and Chemistry 3 (3) Focuses on the chemistry and toxicology of contaminants in freshwater sediments. Sediment geochemistry, ecology, toxicity bioassay methodology and sediment sampling are discussed in a course framework that deals directly with contaminant bioavailability questions. Preq: ETOX 4300 or ETOX 6300 and ETOX 4370 or ETOX 6370.

ETOX 8600 Graduate Seminar 1 (1) Recent research in environmental toxicology; presentation, review and discussion of current issues by graduate students in an area of specialization selected by the instructor. May be repeated four times for credit. To be taken Pass/No Pass only.

ETOX 8610 Departmental Seminar 1 (1) Presents current research by Department of Environmental Toxicology faculty, staff, finishing graduate students and invited speakers. Improves students’ skills in evaluation of research plans and oral presentations and increases their awareness of literature resources and employment opportunities in the field. May be repeated four times for credit.

ETOX 8630 Selected Topics 1-4 (0-4) Topics in environmental toxicology not covered in other courses. Topics vary with current developments in the discipline. May be repeated, but only if different topics are covered. Preq: Consent of instructor. Coreq: ETOX 8631.

ETOX 8631 Selected Topics Laboratory 0 (99) Non-credit laboratory to accompany ETOX 8630. Coreq: ETOX 8630.

ETOX 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

ETOX 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

EXPERIMENTAL STATISTICS

EXST 8010 Statistical Methods I 4 (3) Role and application of statistics in research; estimation, test of significance, analysis of variance, multiple comparison techniques, basic designs, mean square expectations, variance components analysis, simple and multiple linear regression, and correlation, and nonparametric procedures. Coreq: EXST 8011.

EXST 8011 Statistical Methods I Laboratory 0 (3) Non-credit laboratory to accompany EXST 8010. Coreq: EXST 8010.

EXST 8030 Regression and Least Squares Analysis 3 (3) Regression analysis: simple and multiple linear, curvilinear and multiple curvilinear; curve fitting; least squares and computer techniques for fitting of constants and analysis of planned experiments. Offered spring semester only. Preq: EXST 8010.

EXST 8040 Sampling 3 (3) Principles of scientific sampling: finite population sampling; simple random, stratified, multistage and systematic sampling; optimum allocation; methods of obtaining, processing and reporting survey information; sampling as related to the environment, natural resources and social and economic problems. Preq: EXST 8010.

EXST 8050 Design and Analysis of Experiments 3 (3) Basic designs and analysis; data transformations; single degree of freedom, orthogonality and responses in ANOVA; covariance; response surfaces; incomplete blocks; introduction to least squares analysis of experiments; uses of standard computer programs for selected analyses. Preq: EXST 8010.

EXST 8110 Special Problems in Experimental Statistics 1-3 (1-3) Statistical aspects of an individualized research problem; determining an appropriate experimental design; performing proper analyses and generating effective reports.

EXST 8120 Selected Topics 1-3 (1-3) Topics in applied statistics not covered in other courses. May be repeated, but only if different topics are covered.
EXST 8150 Environmental and Ecological Statistics 3 (3) Overview of statistical techniques in Environmental Science and Ecology. Probability distributions and sampling; population estimation using capture/recapture, line transect and line intercept methods; spatial point pattern analysis; modelling environmental and ecological data; environmental monitoring. Prereq: EXST 8010 and EXST 8030.

EXST 8160 Spatial Statistics 3 (3) Introduction to spatial data analysis emphasizing concepts and interpretation, spatial point processes, clustering, spatial autocorrelation, semivariograms, kriging, spatial regression and analysis of variance. Prereq: EXST 8010 and EXST 8030.

EXST 8170 Multivariate Statistics in Agriculture, Forestry and Natural Resources 3 (3) Application of multivariate techniques for linear models (MANOVA, Hotelling's T2), covariance structure (principal components, factor analysis), classification (discriminant and cluster analyses) and structural equation modeling drawing examples from life sciences, natural resources, tourism and related programs. Prereq: EXST 8010 and EXST 8030.

EXST 8190 Biostatistics 3 (3) Statistical analyses applicable to disease/mortality occurrence. Introduction to epidemiology study designs and appropriate statistical analyses. Statistical methodology applicable to life-tables and survival curves and clinical trials. Prereq: EXST 8010.

EXST 8420 Introduction to Statistical Methods 3 (3) Online course focused on the role and application of statistics in research: estimation, tests of significance, analysis of variance, multiple comparison techniques, basic experimental designs, simple and multiple linear regression, and correlation procedures. Prereq: Consent of instructor.

FAMILY AND COMMUNITY STUDIES

FCS 8100 Life in the Global Community 3 (3) Examines global perspectives and trends related to social, psychological and physical well being of children, youth, adults, families, primary institutions of society and civil society. Considers accommodation and resistance to globalization as well as analysis and comparative review of the effects of globalization on everyday life in selected countries.

FCS 8110 Human Development and Family Life in Cultural Context 3 (3) Examines cultural context in human development and family life; the impacts of culture on physical, cognitive and social development; the influences of different environmental experiences on individual and family functioning; practical applications of a cross-cultural human and family development perspective; and the state of human development around the world. Prereq: FCS 8100.

FCS 8120 Democracy and the Growth of Civil Society 3 (3) Study of democracy as a political system and a way of life. Examines the nature of civil society and its relation to the development and sustainability of democratic values and institutions and the cultural, economic and political correlates of civic participation at various points in the lifespan. Prereq: FCS 8100 or consent of instructor.

FCS 8200 International Human Rights Law 3 (3) Examines international human rights law, the origins of international human rights, the emergence of international human rights law, issues related to the implementation, the position of the U.S. regarding ratification of human rights treaties, processes for monitoring and implementing human rights and treatment of human rights in court.

FCS 8270 Public Personnel Administration 3 (3) Organization, techniques and theories of personnel management; interpersonal relations in organizations; personnel change and development; changing conditions in the public service; educational specialization, unions, collective bargaining, etc.; ethics for the public service.

FCS 8290 Public Financial Management 3 (3) Organization and techniques of governmental financial management; budgetary theories; intergovernmental financial relations.

FCS 8300 Community Development: Principles and Practices 3 (3) Comparative theory and practice of community development, community building and community transformations that support child, youth and family well-being. Includes U.S. community development examples with selected examples from other nations.

FCS 8310 Community Transformation 3 (3) Advanced course on community transformation theories, theologises and practice. Discusses and illustrates major paradigm shifts within the last three decades in the way communities develop is thought about and done. Case studies on community transformation from selected nations are utilized. Prereq: FCS 8300 or consent of instructor.

FCS 8320 Policies and Programs in Human Services 3 (3) Philosophy, theories and principles for organizing human services in and across selected nations, emphasizing strategies for and barriers to the development of collaborations among and between governmental and nongovernmental organizations. Discusses community-level child and family support, poverty alleviation, health care, early childhood education care and old-age assistance. Prereq: FCS 8300 or consent of instructor.

FCS 8330 Humanitarian Assistance 3 (3) Introduction to humanitarian assistance. Topics include historical background, current status, determinants, legal issues, and health and social service delivery to current and past refugee and internally-displaced people and ethnopolitical conflicts and terrorism as major sources of humanitarian crises. Prereq: FCS 8300 or consent of instructor.

FCS 8350 Institutions in Community Life 3 (3) Interdisciplinary review of core community institutions and their impact on families and communities. Focuses on four institutions: education, religion, health and government. Each institution is examined both individually and from a systems perspective for its relationship with other institutions and with families and communities.

FCS 8360 Area Studies 3 (3) Expands students' knowledge of the nature of family and community life in various regions of the world (e.g., Eastern Europe; Middle East; Latin America; the Caribbean). Topics include political, social and economic trends; social and political transformation; cross cultural issues; globalization; human rights; and civil society. May be repeated for a maximum of six credits.

FCS 8400 Topics in Societal and International Research 1-3 (1-3) Covers selected topics in research design and data analysis with attention to community-based and field research, and research in international settings. Prereq: Consent of instructor.

FCS 8510 International Law and Policy on Children's Issues 3 (3) Comparative analysis of law and policy on children's issues. Attention is given to relevant international instruments, particularly the Convention on the Rights of the Child and to related concepts in the law and policy of various nations, including the United States. Prereq: FCS 8200.

FCS 8520 Right to Health 3 (3) Examination of the relationship between health and human rights emphasizing the application of a rights-based approach to health-related interests of children, families and communities. Topics include discussion of the content and contours of a right to health and of emerging trends in health and human rights. Prereq: FCS 8200 or consent of instructor.

FCS 8620 Administrative Leadership 3 (3) Foundations of leadership in public organizations, personal and organizational values underlying decision processes in the public service.

FCS 8780 Selected Topics in Public Administration 3 (3) In-depth study of an applied problem in public administration as seen through the practitioner's eyes; investigates the methods used to address these problems. May be repeated for credit, but only if different topics are covered.

FCS 8900 Research Project 1-6 (1-6) Research in Family and Community Studies not related to a thesis.

FCS 8920 Special Topics 1-3 (1-3) Selected current and classic topics not covered in other courses. May be repeated for a maximum of 12 credits, but only if different topics are covered.

FCS 8930 Practicum 1-6 (1-6) Students synthesize, integrate and apply knowledge and skills learned through courses to family and community issues, working with faculty and community leaders to gain professional experience. To be taken Pass/No Pass only. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

FCS 8960 Independent Study 1-6 (1-6) Individual readings or research on a topics selected according to the student's interests or professional development needs. May be repeated for a maximum of six credits. To be taken Pass/No Pass only. Prereq: Consent of coordinator of graduate studies.

FCS 9910 Doctoral Research 1-18 (1-18) Doctoral Research
FOOD SCIENCE

FDSC 6010 Food Chemistry I 3 (3) Basic composition, structure, and properties of food and the chemistry of changes occurring during processing. Emphasizes standard methods and instruments to determine texture and the relationship of physical properties to sensory evaluation; inter-relationships of chemical structure and physical properties in food processing operations. Preq: BCHM 3050 or consent of instructor.

FDSC 6020 Food Chemistry II 3 (3) Application of theory and procedures for quantitative and qualitative analysis of food ingredients and food products. Methods for protein, moisture, lipid, carbohydrate, ash, fiber, rancidity, color, and vitamin analyses and tests for functional properties of ingredients are examined. Preq: BCHM 3050 or consent of instructor.

FDSC 6030 Food Chemistry and Analysis 2 (1) Principles of analytical procedures and techniques used to quantitatively and qualitatively determine chemical composition of foods, and elucidate the physio-chemical properties of food materials. Laboratories provide experience in critical thinking, performing food analysis, and analyzing data. Preq: BCHM 3050 and BIOL 4340 and FDSC 2140; or consent of instructor. Coreq: FDSC 6031.

FDSC 6040 Food Preservation and Processing 3 (3) Principles of food preservation applied to flow processes, ingredient functions, and importance of composition and physical characteristics of foods related to their processing; product recalls and product development concepts. Preq: BCHM 3050; and one of FDSC 2140 or FDSC 3030; and one of PHYS 1220 or PHYS 2000 or PHYS 2070 or consent of instructor.

FDSC 6060 Food Preservation and Processing Laboratory I 1 (3) Laboratory exercises on preservation methods, equipment utilization, and processes followed in food manufacture. Preq: FDSC 4040.

FDSC 6070 Quantity Food Production 2 (1) Principles of the production of food in quantity systems in food service systems. Emphasizes functions of components of foods and of ingredients in food, and focuses on the quality of the final product; on safe production of food, and on proper use of equipment. Coreq: FDSC 6071.

FDSC 6071 Quantity Food Production Laboratory 0 0 (3) Non-credit laboratory to accompany FDSC 6070. Coreq: FDSC 6070.

FDSC 6080 Food Process Engineering 4 (3) Study of basic engineering principles and their application in food processing operations. Emphasizes the relation between engineering principles and fundamentals of food processing. Preq: CH 1020 and FDSC 2140; and one of MTHS 1020 or MTHS 1060; and one of PHYS 1220 or PHYS 2000 or PHYS 2070. Coreq: FDSC 6081.

FDSC 6081 Food Process Engineering Laboratory 0 0 (3) Non-credit laboratory to accompany FDSC 6080. Coreq: FDSC 6080.

FDSC 6090 Total Quality Management for the Food and Packaging Industries 3 (3) Introduction to the principles of modern quality management emphasizing quality standards and issues and the practices necessary for food processing and packaging companies to survive in a customer-driven marketplace.

FDSC 6100 Food Product Development 4 (3) A strategic and systems approach to integrated product development practices for developing new food products within a team setting. Focuses on the Stage-Gate process for moving from product idea to launch and application of sensory analysis techniques. Coreq: FDSC 6101.

FDSC 6101 Food Product Development Laboratory 0 0 (3) Non-credit laboratory to accompany FDSC 6100. Coreq: FDSC 6100.

FDSC 6300 Dairy Processing and Sanitation 3 (2) Processing, manufacture and distribution of fluid, frozen, cultured and other dairy products. Emphasizes sanitation in a commercial food processing plant environment, chemical and microbiological aspects, processing procedures, equipment operation, ingredient applications, formulation and functional properties. Preq: BIOL 1040 and BIOL 1060 and CH 1020. Coreq: FDSC 6301.

FDSC 6301 Dairy Processing and Sanitation Laboratory 0 0 (3) Non-credit laboratory to accompany FDSC 6300. Coreq: FDSC 6300.

FDSC 8100 Chemical and Biochemical Aspects of Foods 4 (4)Chemical and biochemical properties of food components and their interactions in food emissions, foam, colloids, and gel and solution states; the influences of processing on isolating, utilization and production of the constituents using techniques based on constituent properties. Preq: BCHM 6230 and FDSC 4010; or consent of instructor.

FDSC 8110 Physical and Thermophysical Properties of Foods 3 (3) Principles involved in relating physical and thermophysical properties to food uses. Emphasizes standard methods and instruments to determine texture and the relationship of physical properties to sensory evaluation; inter-relationships of chemical structure and physical properties in food processing operations. Preq: FDSC 8100 or consent of instructor.

FDSC 8120 Microbiological Aspects of Food Systems 3 (3) Function and characteristics of microorganisms in the utilization and manufacture of food products; food fermentations, microbially induced chemical and physical changes, environmental aspects, and production of food ingredients and resources. Preqs: MICRO 4070 or consent of instructor.

FDSC 8150 Food Service Systems Management 4 (3) Management of the procurement, production, distribution and service of food that meets nutrition guidelines, cost parameters and consumer acceptance criteria; supervision of customer satisfaction systems, marketing functions and human resource systems. Coreq: FDSC 8151.

FDSC 8151 Food Service Systems Management Laboratory 0 0 (3) Non-credit laboratory to accompany FDSC 8150. Coreq: FDSC 8150.

FDSC 8200 Selected Topics in Food Science 1-3 (1-3) Special topics in food science not covered in other courses. May be repeated for a maximum of nine credits.

FDSC 8210 Selected Topics 1-4 (1-4) Independent research investigation in food science areas not conducted in other courses. May be repeated for a maximum of 12 credits. Preq: Consent of instructor.

FDSC 8510 Food Science Seminar 1 (1) Current research and related developments in food science reviewed by faculty, students and invited lecturers. May be repeated for a maximum of two credits, but only if different topics are covered.

FDSC 8550 Practicum Teaching Experience 1 (1) Students integrate and apply knowledge and skills in assisting a faculty member in the teaching of an undergraduate lecture or laboratory course in food, nutrition and/or packaging science. To be taken Pass/No Pass. May be repeated for a maximum of two credits.

FDSC 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

FOOD TECHNOLOGY

FDTH 8510 Food Technology Seminar 1 (1) Current and ongoing research and developments in food technology reviewed by faculty, students and invited lecturers. Preq: Enrollment in the Food Technology PhD program or consent of instructor.

FDTH 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

FINANCE

FIN 6020 Advanced Corporate Finance 3 (3) Study of the decision process and analytical techniques used in evaluating corporate investment and financing decisions. Topics include capital budgeting, capital structure and bankruptcy, valuation, corporate governance, executive compensation, mergers and acquisitions, and restructuring. Preq: FIN 3120 with a C or better.

FIN 6060 Analysis and Use of Derivatives 3 (3) Consideration of the option pricing theory and strategy techniques most commonly used in the market for options. Also considers standard methods and instruments to determine texture and the relationship of physical properties to sensory evaluation; inter-relationships of chemical structure and physical properties in food processing operations. Preq: FIN 3120 with a C or better.

FIN 6150 Real Estate Investment 3 (3) Focuses on the structure and analysis of real estate investment emphasizing financial theory and analysis techniques. Case study and project-oriented homework assignments facilitate the understanding of real estate investments. Preq: FIN 3070 with a C or better.

FIN 6160 Real Estate Valuation 3 (3) Advanced course in commercial real estate valuation. Topics include income capitalization, cash equivalency, highest and best use analysis, the cost approach, the direct sales comparison approach, and DCF analysis. Preq: FIN 3070 with a C or better.

FIN 6170 Real Estate Finance 3 (3) Advanced course applying financial analysis and theory to real estate. Emphasizes mortgage credit analysis and current financing techniques for residential and commercial properties. Topics include financial institutions, syndications, and construction financing. Preq: FIN 3070 with a C or better.
FIN 8320 International Financial Management 3 (3) Factors that influence the financial management of multinational corporations. Topics include international parity conditions, currency exposure management, capital budgeting of international projects and political risks. Preq: MBA 8070 or MBA 8570; or consent of instructor.

FIN 8360 Real Estate Principles 3 (3) Advanced survey course to acquaint students with the theories, practices and principles of real estate. Topics include urban economics, real estate law, brokerage, real estate valuation, financial institutions, tax issues, investment analysis, and development. Preq: MBA 8070 or MBA 8190; or consent of instructor.

FORESTRY AND NATURAL RESOURCES

FNR 6660 Stream Ecology 3 (2) Covers the ecology of flowing water systems. Topics include geomorphology, physical and chemical factors of streams, biology of stream-dwelling organisms, trophic relationships, competition, colonization, drift, community structure, disturbance, and human impacts. Preq: Junior standing.

FNR 6661 Stream Ecology Laboratory 0 (3) Non-credit laboratory to accompany FNR 6660. Coreq: FNR 6660.

FNR 7300 Master Naturalist for Teachers 3 (2) Teachers learn about the natural history and natural resources of South Carolina, including geology, biology, ecology and human impacts. Additionally, this online course with associated field trips may be used to help teachers as part of obtaining certification through the South Carolina Master Naturalist program. Coreq: FNR 7301.

FNR 7301 Master Naturalist for Teachers Laboratory 0 (0) Non-credit laboratory to accompany FNR 7300. Coreq: FNR 7300.

FNR 8090 Graduate Seminar 1 (1) Covers research methods, current literature, scientific communication and scientific presentations in forestry, forest resources and wildlife and fisheries science. To be taken Pass/No Pass only. May be repeated for a maximum of two credits.

FORESTRY

FOR 6000 Public Relations in Natural Resources 3 (3) Identifying relevant policies, their characteristics and acceptance to natural resource management, and techniques of maintaining appropriate public relations. Preq: Senior standing.

FOR 6080 Wood and Paper Products 3 (3) Study of wood structures and identification; physical and mechanical properties of wood products; standard testing procedures; manufacture of lumber, plywood, oriented strand board; drying, preservation, grading, and use of wood products. Also discusses common grades of paper and paperboard; fiber sources; pulping and paper-making equipment and processes; chemical recovery process; and environmental issues. Preq: Junior standing.

FOR 6100 Harvesting Processes Laboratory 0 (0) Non-credit laboratory to accompany FOR 6100. Coreq: FOR 6100.

FOR 6131 Integrated Forest Pest Management Laboratory 0 (0) Non-credit laboratory to accompany FOR 6130. Coreq: FOR 6130.

FOR 6150 Forest Wildlife Management 3 (2) Principles, practices, and problems of wildlife management emphasizing upland forest game species. Habitat manipulation through use of appropriate silvicultural practices in association with other techniques is evaluated. Preq: FOR 4600. Coreq: FOR 6151.

FOR 6151 Forest Wildlife Management Laboratory 0 (0) Non-credit laboratory to accompany FOR 6150. Coreq: FOR 6150.

FOR 6160 Forest Policy and Administration 3 (3) Introduction to the development, principles, and legal provisions of forest policy in the United States and an examination of administrative and executive management in forestry.

FOR 6170 Forest Resource Management and Regulation 3 (3) Fundamental principles and analytical techniques in planning, management, and optimization of forest operations. Preq: FOR 3020 and FOR 3080 and FOR 4140 and FOR 4650.

FOR 6180 Forest Resource Valuation 3 (3) Analysis of capital investment tools and their application to decision making among forest investment alternatives; valuation of land, timber, and other resources associated with forestry, including the impact of inflation and taxes. Preq: FOR 3040.

FOR 6230 Current Issues in Natural Resources 2 (2) Lectures on various fields of forestry delivered by selected representatives from forest industries, consulting agencies, associations, and other forestry operations. Will not be taught when enrollment is less than 15. To be taken Pass/No Pass only. Preq: Junior standing.

FOR 6270 Urban Tree Care 3 (3) Principles, practices, and problems of protecting and maintaining trees in urban and recreational areas. Examines environmental and biological factors affecting trees in high-use areas, their management and cultural requirements, and the practices necessary for their protection and care as valuable assets in the landscape. Preq: Consent of instructor.

FOR 6310 Recreation Resource Planning in Forest Management 2 (1) Analysis of forest recreation as a component of multiple-use forest management; techniques of planning: physical and biological effects on forest environments; and forest site, user, and facility management. Coreq: FOR 6311.

FOR 6311 Recreation Resource Planning in Forest Management Laboratory 0 (0) Non-credit laboratory to accompany FOR 6310. Coreq: FOR 6310.

FOR 6330 GPS Applications 3 (2) Develops competence in global positioning system (GPS) technology, including theory, methods, and application to natural resources mapping. Topics include basic concepts of GPS; projection systems; types of data; mission planning; and data capture, correction, and export to geographical information systems (GIS). Preq: Senior standing. Coreq: FOR 6331.

FOR 6331 GPS Applications Laboratory 0 (3) Non-credit laboratory to accompany FOR 6330. Coreq: FOR 6330.

FOR 6340 Geographic Information Systems for Landscape Planning 3 (2) Develops competence in geographic information systems (GIS) technology and its application to various spatial analysis problems in landscape planning. Topics include data development and management, spatial analysis techniques, critical review of GIS applications, needs analysis and institutional context. GIS hardware and software, hands-on application. Credit may be received for only one of ENR 4340 or FOR 4340. Coreq: FOR 6341.

FOR 6341 Geographic Information Systems for Landscape Planning Laboratory 0 (0) Non-credit laboratory to accompany FOR 6340. Coreq: FOR 6340.

FOR 6410 Properties of Wood Products 3 (3) Basic properties of wood, including the hygroscopic, thermal, electrical, mechanical, and chemical properties; standard testing procedures for wood. Preq: Junior standing.

FOR 6420 Manufacture of Wood Products 3 (3) Study of the manufacture of lumber, plywood, poles, piles; drying, preservation, grading, and uses of wood products. Considers the manufacture of particleboard, flakeboard, oriented-strand board, fiberboard, and paper products. Includes physical, mechanical, and chemical properties and their applications. Preq: Consent of instructor.

FOR 6440 Forest Products Marketing and International Trade 3 (3) Study of marketing and international trade practices currently employed by the forest products industry and the application of basic marketing principles and global trade concepts in the industry’s current and future environment. Preq: FOR 4420.

FOR 6500 Woody Plant Stress Physiology 3 (3) Structure, function, and physiology of tree shoot and crown growth, wood formation, diameter growth, root growth, and reproduction, especially as related to stress factors. Preq: BIOL 4010 or FOR 4600.

FOR 6510 Newman Seminar and Lecture Series in Natural Resources Engineering 1 (2) Topics dealing with development and protection of land, air, water, and related resources are covered by seminar with instructor and invited lecturers. Current environmental and/or resource conservation issues are addressed.

FOR 6650 Silviculture 4 (3) Discussion of the theory and practice of manipulating forests to meet the needs and values of landowners and society in accordance with biological, ecological, and economic principles. Preq: FOR 2560 and FOR 2510 and FOR 2520 and FOR 2530 and FOR 2540. Coreq: FOR 6651.
Courses of Instruction

FOR 6651 Silviculture Laboratory 0 (3) Non-credit laboratory to accompany FOR 6650. Coreq: FOR 6650.

FOR 7070 Special Problems in Forestry 1-3 (1-3) Directed individual study of a special problem in an applied field of forestry. Written report of study results is required.

FOR 8050 Forest Landscape Ecosystems 4 (3) Three basic landscape components of soils, landform and vegetation; their interrelationships in forest ecosystems; factors and processes of soils as interacting components with landform and vegetation. Offered fall semester of even-numbered years only. Coreq: FOR 8051.

FOR 8051 Forest Landscape Ecosystems Laboratory 0 (3) Non-credit laboratory to accompany FOR 8050. Coreq: FOR 8050.

FOR 8060 Advanced Silviculture—Forest Tree Growth and Development 3 (3) Growth and development of economically important forest tree species, structure, function, phenology and woodformation related under forest stand conditions emphasizing manipulation of forest tree growth by cultural practice; current research in growth and culture of forest trees and stands. Offered fall semester of odd-numbered years only. Coreq: BIOL 4010 and BIOL 4020.

FOR 8070 Special Problems in Forestry 1-12 (1-12) Special problems in forestry research methods that do not directly pertain to the candidate's thesis.

FOR 8110 Forest Wetland Ecology and Management 2 (2) Assessment of ecological processes and how they influence forest wetland productivity, management and regulation. Offered spring semester only. Coreq: Consent of instructor.

FOR 8120 Fire Ecology and Management 3 (2) Historical presence of fire in various regions of North America and its effects on forests; analysis of current fire management strategies with emphasis on usage of prescribed fire as an ecosystem management tool. Coreq: FOR 8121.

FOR 8121 Fire Ecology and Management Laboratory 0 (3) Non-credit laboratory to accompany FOR 8120. Coreq: FOR 8120.

FOR 8140 Advanced Forest Resource Management and Planning 3 (3) Current forest resource management and planning topics; operational emphasis on application of various quantitative tools to solve economic and management problems; advanced topics in forest regulation, forest valuation, mathematical programming and harvest scheduling, simulation, multiple-use alternatives and selected areas. Offered spring semester of odd-numbered years only. Coreq: FOR 4170.

FOR 8150 Systems Processes in Natural Resources 3 (2) Use of system thinking and system analysis to define the issues, model, simulate and evaluate alternatives for forest landscape problems and opportunities. Coreq: FOR 8151.

FOR 8151 Systems Processes in Natural Resources Laboratory 0 (3) Non-credit laboratory to accompany FOR 8150. Coreq: FOR 8150.

FOR 8160 Remote Sensing and GIS in Natural Resources 3 (2) Practical application of computer mapping, spatial analysis and natural resource inventory using remote sensing and geographical information systems. Offered fall semester of odd-numbered years only. Coreq: ENR 4340 or FOR 4340. Coreq: FOR 8161.

FOR 8161 Remote Sensing and GIS in Natural Resources Laboratory 0 (3) Non-credit laboratory to accompany FOR 8160. Coreq: FOR 8160.

FOR 8450 Biodiversity in Managed Forests 3 (2) Theory and practice of maintaining biodiversity are fundamental to successful management of forests. Conservation of biodiversity is viewed from the macro (landscape) and micro (stand) levels. Socioeconomic and policy as well as ecological perspectives are considered in design of appropriate management practices. Coreq: FOR 4150 or FOR 4600. Coreq: FOR 8451.

FOR 8451 Biodiversity in Managed Forests Laboratory 0 (3) Non-credit laboratory to accompany FOR 8450. Coreq: FOR 8450.

FOR 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

FOR 8930 Selected Topics in Forest Resources 1-4 (1-4) Specialized topics not covered in other courses which explore current areas of research and management in forest and natural resources. May be repeated for a maximum of eight credits, but only if different topics are covered.

FOR 8931 Selected Topics in Forest Resources Laboratory 0 (9) Non-credit laboratory to accompany FOR 8930.

FOR 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

FRENCH

FR 6990 Selected Topics in French Literature 3 (3) Selected topics that have characterized French literature, language, and culture. May be repeated for a maximum of six credits. Coreq: Consent of department chair.

GRAPHIC COMMUNICATIONS

GC 6060 Package and Specialty Printing 4 (2) In-depth study of the problems and processes for printing and converting in package label and specialty printing industries. Flexographic preparation, printing, die making, diecutting, screen printing, container printing, pad printing and barcode production are covered. New developments and trends are discussed. Laboratory in techniques includes printing and converting. Coreq: GC 3400; or consent of instructor. Coreq: GC 6061.

GC 6061 Package and Specialty Printing Laboratory 0 (6) Non-credit laboratory to accompany GC 6060. Coreq: GC 6060.

GC 6070 Advanced Flexographic Methods 4 (2) In-depth study of the methods used in flexographic printing and converting of porous and nonporous substrates. Theory and laboratory applications include setting standards for process color, preparation of plate systems, ink mixing and color matching, testing of films and foils, analysis of recent developments, and prediction of future markets. Coreq: GC 6070 or consent of instructor. Coreq: GC 6071.

GC 6071 Advanced Flexographic Methods Laboratory 0 (6) Non-credit laboratory to accompany GC 6070. Coreq: GC 6070.

GC 6400 Commercial Printing 4 (2) Advances skills learned in previous graphic communications courses and applies the knowledge to large format presses. Students work from the design conception stage through all aspects of preparation, production, and finishing. Emphasizes understanding and incorporating emerging technologies into the production workflow. Coreq: GC 3400 or consent of instructor. Coreq: GC 6401.

GC 6401 Commercial Printing Laboratory 0 (6) Non-credit laboratory to accompany GC 6400. Coreq: GC 6400.

GC 6440 Current Developments and Trends in Graphic Communications 4 (2) Advanced course for Graphic Communications majors. Emphasizes the theory and technical developments that affect process and equipment selection. Topics include color theory and application, electronic color scanning, electronic prepress and communications, gravure color quality control and analysis. Coreq: GC 4060 and GC 4400. Coreq: GC 6441.

GC 6441 Current Developments and Trends in Graphic Communications Laboratory 0 (6) Non-credit laboratory to accompany GC 6440. Coreq: GC 6440.

GC 6450 Advanced Screen Printing Methods 3 (2) In-depth study of the systems and materials used with the screen printing process. Emphasizes techniques of control and procedures for establishing screen printing methods and standards. Coreq: GC 2070 or consent of instructor. Coreq: GC 6451.

GC 6451 Advanced Screen Printing Methods Laboratory 0 (3) Non-credit laboratory to accompany GC 6450. Coreq: GC 6450.

GC 6460 Ink and Substrates 3 (2) Covers components, manufacturing, process use as well as end use of ink and substrates used in lithography, flexography, gravure, and screen printing. Examines the interrelationship between inks, substrates, and the printing process. Through controlled testing and examination, optimum conditions for improved printability are determined. Coreq: GC 6060 or GC 6400; or consent of instructor. Coreq: GC 6461.

GC 6461 Ink and Substrates Laboratory 0 (3) Non-credit laboratory to accompany GC 6460. Coreq: GC 6460.

GC 6480 Planning and Controlling Printing Functions 3 (2) Study of systems for setting printing production standards, estimating, scheduling, job planning, and the selection of new hardware and technologies. Coreq: GC 3500 and GC 4060 and GC 4400 and GC 4500; or consent of instructor. Coreq: GC 6481.
GC 6481 Planning and Controlling Printing Functions Laboratory 0 (3) Non-credit laboratory to accompany GC 6480. Coreq: GC 6480.

GC 6900 Graphic Communications Selected Topics I 1-3 (1-3) Subjects not covered in other graphic communications courses; organized according to industry trends and student needs. May be repeated for a maximum of 18 credits, but only if different topics are covered. Preq: Consent of instructor.

GC 8010 Process Control in Color Reproduction 3 (2) Techniques and rationale for procedures used in reproducing color originals for printed media. Topics include color systems, measurement, reproduction characteristics, proofing systems, process evaluation/analysis for offset, gravure, flexographic and screen printing processes. Preq: GC 6440. Coreq: GC 8011.

GC 8011 Process Control in Color Reproduction Laboratory 0 (3) Non-credit laboratory to accompany GC 8010. Coreq: GC 8010.

GC 8110 Printing Industry Operations 3 (3) Concepts and principles of operations and applications of technology and trends within the printing, publishing, packaging and allied industries. Topics include plant visits supplement study of the organization, management, marketing, economics, production, environmental issues and products of modern graphic communications firms.

GC 8111 Printing Industry Operations Laboratory 0 (3) Non-credit laboratory to accompany GC 8110. Coreq: GC 8110.

GC 8310 Color Science Applied to Graphic Communications 3 (2) Color reproduction applications found in both photomechanical and digital workflows for print production; foundation in color science principles, measurement and integration relative to the printing, publishing and packaging industry; color systems development, application and integration. Preq: Consent of instructor. Coreq: GC 8311.

GC 8311 Color Science Applied to Graphic Communications Laboratory 0 (3) Non-credit laboratory to accompany GC 8310. Coreq: GC 8310.

GC 8500 Graphic Communications Internship 1-2 (1-2) Full-time employment for hands-on experiences in manufacturing, marketing, or managing within the graphic communications industry. For Graphic Communications graduate students only. May be repeated for a maximum of two credits. Preq: Consent of instructor.

GC 8910 Master's Thesis Research 1-6 (1-6) Student participation in a research project. Basic skills in a selected research methodology are developed. Preq: GC 8940.

GC 8940 Graphic Communications Graduate Seminar 1 (1) Discussions on relevant topics and guidance to prepare research proposals in the graphic communications field. May be repeated for a maximum of two credits, but only if different topics are covered. Preq: Consent of instructor.

GC 8970 Graphic Communications Research Problems I 1-3 (1-3) In-depth investigation of phenomena relative to the printing, publishing, packaging, or allied industries. Preq: GC 8940 and acceptance of a written proposal and approval of advisor.

GC 8980 Graphic Communications Research Problems II 3 (3) Continuation of GC 8970. In-depth investigation of phenomena relative to the printing, publishing, packaging, or allied industries. Preq: GC 8940 and GC 8970 and acceptance of a written proposal and approval of advisor.

GENETICS

GEN 6100 Population and Quantitative Genetics 3 (3) Classical and computational genetics topics, including Mendelian vs. non-Mendelian inheritance, genetic variation, evolutionary, conservation, coalescent theory, molecular evolution, quantitative trait locus, and association mapping in the framework of population and quantitative genetics. Preq: Consent of instructor.

GEN 6110 Population and Quantitative Genetics Laboratory 2 (4) Crosses are performed using eukaryotic organisms with appropriate markers, and molecular markers are amplified, sequenced, and analyzed. Collected data are used to test hypotheses regarding possible modes of inheritance and for patterns of molecular evolution. Population and molecular evolutionary genetics concepts are also examined. Preq: Consent of instructor.

GEN 6200 Molecular Genetics and Gene Regulation 3 (3) Molecular genetics, including replication, transcription and translation, gene expression, recombinant DNA technology, developmental, human, cancer, and behavioral genetics. Preq: Consent of instructor.

GEN 6210 Bioinformatics 3 (3) Theory and application of computational technology to analysis of the genome, transcriptome, and proteome. Preq: Consent of instructor.

GEN 6220 Comparative Genomics 3 (3) Outlines the genome structure, function, and evolution based on available complete genome sequences. Topics include the evolution of multigene families, origin of eukaryotic organelles, molecular phylogeny, gene duplication, domain shuffling, transposition, and horizontal gene transfer. Preq: Consent of instructor.

GEN 6700 Human Genetics 3 (3) Basic principles of inheritance; population, molecular and biochemical genetics; cytogenetics; immunogenetics; complex traits; cancer genetics; treatment of genetic disorders; genetic screening and counseling; and the Human Genome Project. Preq: Consent of instructor.

GEN 6950 Insect Biotechnology 3 (3) Considers many unique genetic features exhibited by insects and describes the applications of biotechnology to enhance useful products from insects and to affect the control of destructive insects. Preq: ENT 3010 and GEN 3020.

GEN 7300 Genetics Topics for Teachers 3 (2) Lectures and laboratories focus on genetics and biotechnology. Restricted to elementary and secondary teachers. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor. Coreq: GEN 7301.

GEN 7301 Genetics Topics for Teachers Laboratory 0 (2) Non-credit laboratory to accompany GEN 7300. Coreq: GEN 7300.

GEN 8010 Cytogenetics 3 (2) Classical and contemporary problems of chromosome structure, behavior and transmission; recombination; interspecific hybridization; euchromatin and heterochromatin; polyploidy; mutable genetic systems; structural and numerical aberrations of chromosomes and their effects upon breeding systems of plants and animals. Offered spring semester of alternate years only. Preq: GEN 3020 or equivalent. Coreq: GEN 8011.

GEN 8011 Cytogenetics Laboratory 0 (3) Non-credit laboratory to accompany GEN 8010. Coreq: GEN 8010.

GEN 8030 Quantitative Genetics 3 (3) Quantitative genetics concepts, line crosses and inbreeding, detecting major genes, mapping quantitative trait loci, estimation of genetic variation and heritability. Offered spring semester only. Preq: GEN 8140 or consent of instructor. (EXST 8010 is recommended.)

GEN 8050 Issues in Research 3 (3) Scientific writing, oral presentations and critical evaluation of them; ethical and ethical issues associated with modern biochemical research. Science job hunting, time management and creativity for professional scientists are treated. Preq: Enrollment in Biochemistry and Molecular Biology program.

GEN 8060 Special Problems in Genetics 1-3 (1-3) 0 (3-9) Research not related to a thesis.

GEN 8100 Principles of Molecular Biology 3 (3) Introduction to the principles and techniques used to analyze prokaryotic and eukaryotic gene and genome structure, regulation of transcription initiation, regulation of protein synthesis and protein function. Preq: Enrollment in Biochemistry and Molecular Biology program.

GEN 8120 Physiological Genetics 3 (3) Advanced topics in the molecular aspects of physiological genetics including genes and metabolism, genes and signal transduction, oncogenes and growth, chromosomal aberrations, immunogenetics and others. Preq: A semester of biochemistry and introductory genetics.

GEN 8140 Advanced Genetics 3 (3) Topics include organization of DNA in prokaryotes and eukaryotes, mutation, extranuclear inheritance, recombination, control of gene activity, systems of mating, genes and development, genetics of behavior, population genetics, genetics and disease. Preq: Consent of instructor.

GEN 8150 Developmental Genetics 3 (3) Current research in developmental genetics including model systems, homeotic genes of Drosophila, primary induction, adhesion, molecules and cancer, axis formation, global pattern mutants in plants, homeobox genes in plants, and photo regulation. Preq: GEN 8140 or consent of instructor.

GEN 8200 Genomics and Proteomics 3 (3) Genomes, transcriptomes and proteomes of a variety of organisms are studied along with the technology used to obtain them. Bioinformatics tools and access to this information are developed, and the significance of this information for the life sciences is made clear. Preq: BCHM 8140 or GEN 8140.
GEN 8250 Seminar I 1 (1) Special topics and original research in genetics reviewed by students, faculty and invited lecturers. May be repeated for credit. Preq: Enrollment in Biochemistry and Molecular Biology program.

GEN 8300 Molecular Evolution and Population Genetics 3 (3) Topics include statistical methodology in the study of population genetics, probability as applied to genetic systems, gene and zygotic frequencies, derivation of genetics expectation, forces that change gene frequency, inbreeding, estimation, and testing of genetic parameters. Preq: GEN 8140 or consent of instructor. (EXT 8010 is recommended).

GEN 8510 Seminar II I (1) Investigation of current topics in biochemistry. May be repeated for a maximum of ten credits. To be taken Pass/No Pass only. Preq: Enrollment in Biochemistry and Molecular Biology program.

GEN 8900 Special Topics in Genetics I-3 (1-3) Group discussion of recent developments in genetics. May be repeated for a maximum of six credit hours. Preq: Consent of instructor.

GEN 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

GEN 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

GEOGRAPHY

GEOG 6010 Studies in Geography 3 (3) Intensive study of the geography of a selected world region, such as North America, Europe, or the Middle East, or the geography of a topic, such as the geography of oil or the geography of underdevelopment. May be repeated once for credit with departmental consent. Preq: GEOG 1010 or GEOG 1030 or consent of instructor.

GEOG 6020 Geography of the American South 3 (3) Study of the geography of the American South in its changing complexities across almost 400 years of development. Preq: GEOG 1010 or GEOG 1030 or consent of instructor.

GEOG 6200 Historical Geography of the United States 3 (3) Survey that places the spatial concepts of geography into a time sequence with special emphasis upon the United States. Preq: GEOG 1010 or GEOG 1030 or consent of instructor.

GEOG 6300 World Geography of Parks and Equivalent Reserves 3 (3) Major international patterns in the provision and use of urban and rural parks and recreation are examined. Preq: 2.0 cumulative grade-point ratio.

GEOG 6400 Geography of Historic Preservation 3 (3) Aspects of historic preservation emphasizing sites and structures in their geographical, historical, and socioeconomic contexts. Examples are drawn from American architectural styles and settlement forms. Preq: GEOG 1010 or GEOG 1030 or consent of instructor.

GEOG 7100 Teaching Geography 3 (3) Investigates world regions as a set of problems posed to teachers of geography; comparative analysis of basic geographic concepts. Oriented to public school teachers of geography.

GEOLOGY

GEOL 6030 Invertebrate Paleontology 3 (2) Study of life of past geologic ages as shown by fossilized remains of ancient animals, with emphasis on the invertebrates. Coreq: GEOL 6031.

GEOL 6031 Invertebrate Paleontology Laboratory 0 (0) Non-credit laboratory to accompany GEOL 6030. Coreq: GEOL 6030.

GEOL 6050 Surficial Geology 4 (3) Study of surface features of the earth and the processes that produce them. Analysis of landforms including their form, nature, origin, development, and rates and patterns of change. Laboratory studies emphasize terrain analysis and the mechanics of surficial geological processes. Preq: GEOL 1020 and GEOL 3000; or consent of instructor. Coreq: GEOL 6051.

GEOL 6051 Surficial Geology Laboratory 0 (3) Non-credit laboratory to accompany GEOL 6050. Coreq: GEOL 6050.

GEOL 6080 Geohydrology 3 (3) Study of the hydrologic cycle, aquifer characteristics, theory of groundwater movement, mechanics of well flow, experimental methods, and subsurface mapping.

GEOL 6090 Environmental and Exploration Geophysics 4 (3) Students develop an understanding of the principles and methods used to acquire, analyze, and interpret geophysical data. Emphasis is on seismic/radar, gravimetric, and electromagnetic methods. Applications to hydrogeology, environmental engineering, and science, soil science, contaminant transport and remediation, near surface geology, groundwater problems, oil and gas exploration, and carbon sequestration. Coreq: GEOL 6091.

GEOL 6091 Environmental and Exploration Geophysics Laboratory 0 (3) Non-credit laboratory to accompany GEOL 6090. Coreq: GEOL 6090.

GEOL 6130 Stratigraphy 3 (2) Analysis of stratified rocks as the repository of earth history and the conceptual framework used to synthesize the world geologic record as a coherent whole. Emphasis is not only traditional lithostratigraphy but also modern seismic stratigraphy, biostratigraphy, magnetostratigraphy, and current stratigraphic issues. Coreq: GEOL 6131.

GEOL 6131 Stratigraphy Laboratory 0 (2) Non-credit laboratory to accompany GEOL 6130. Coreq: GEOL 6130.

GEOL 6151 Analysis of Geological Processes Laboratory 0 (0) Non-credit laboratory to accompany GEOL 6150. Coreq: GEOL 6150.

GEOL 6210 GIS Applications in Geology 3 (1) Introduction to geographic information systems with applications to current geological and hydrological problems. Topics include the use of global positioning systems, spatial analysis, and image analysis. Hands-on training with geographic information systems software and techniques is covered in lab. Preq: At least Junior standing. Coreq: GEOL 6211.

GEOL 6211 GIS Applications in Geology Laboratory 0 (4) Non-credit laboratory to accompany GEOL 6210. Coreq: GEOL 6210.

GEOL 6510 Selected Topics in Hydrogeology 1-14 (1-14) Selected topics in hydrogeology emphasizing new developments in the field. May be repeated for a maximum of six credits, but only if different topics are covered. Coreq: GEOL 6511.

GEOL 6511 Selected Topics in Hydrogeology Laboratory 0 (99) Non-credit laboratory to accompany GEOL 6510. Coreq: GEOL 6510.

GEOL 6590 Biogeochemistry 3 (3) Examines how biologic directs mass and energy transfer between the lithosphere, biosphere, hydrosphere, and atmosphere. Scale of examination ranges from molecular to global. Topics include element cycling, the mineral/microbe/plant interface, biomineralization, and biogeochemical applications to bioremediation, ecology, environmental toxicology, and biotechnology.

GEOL 6820 Groundwater and Contaminant Transport 3 (3) Basic principles of groundwater hydrology and transport of contaminants in groundwater; includes groundwater system characteristics; steady and transient flow; well hydraulics, design, and testing; contaminant sources, movement and transformations. May also be offered as CE 6820. Preq: CE 3410. Preq or concurrent enrollment: EES 4010.

GEOL 6850 Environmental Soil Chemistry 3 (3) Study of soil chemical processes (sorption, desorption, ion exchange, precipitation, dissolution, and redox reactions) of nutrients and inorganic and organic contaminants in soils and organic matter. Chemical complex equilibria and adsorption phenomena at the solid, sediment, and mineral water interface are emphasized. Preq: CH 1020 or CSEN 2020.

GEOL 7900 Selected Topics in Earth Sciences I-6 (1-6) One or more earth science topics. Lecture and laboratory emphasize the incorporation of new or updated subject matter into classroom instruction. Restricted to elementary and secondary school teachers. May be repeated for credit, but only if different topics are covered.

GEOL 8030 Geostatistics 3 (3) Numerical and statistical treatment of geological data emphasizing the analysis of spatially and temporally distributed variables and unique aspects of geological variables; methods of sampling geological data, quantitative procedures for reducing the dimensionality of geological data sets, and techniques for presentation and interpretation of results. Students are expected to have completed an introductory statistics course and two semesters of calculus before enrolling in this course.

GEOL 8060 Aquifer Characterization 3 (3) Characterization of aquifers from the microscopic scale to the regional scale; geological origin of aquifers and modification by diagenetic and deformational processes; application of subsurface geological techniques to data acquisition and interpretation; prediction of fluid occurrence and flow by integrating results of subsurface analysis.
Courses of Instruction

GEOL 8080 Groundwater Modeling 3 (3) Mathematical and computer modeling of groundwater flow and nonreactive solute transport through geological formations; conceptual flow-models for geologic systems; formulation of governing mass and energy conservation equations; application of analytical, numerical and stochastic models to real-world problems.

GEOL 8090 Subsurface Remediation Modeling 3 (3) Lectures and computer exercises involving subsurface remediation methods including groundwater extraction, soil vapor extraction, stream flooding and a variety of other techniques; modeling flow of multiphase and multicomponent mixtures in porous medium.

GEOL 8100 Analytical Methods for Hydrogeology 3 (3) Analytical mathematical methods for modeling subsurface fluid flow and transport processes including saturated water flow, unsaturated zone gas flow, chemical transport and heat transfer, emphasizing the derivation and solution of governing equations for modeling subsurface flow and transport.

GEOL 8130 Environmental Geochemistry 3 (3) Inorganic geochemistry, specifically the distribution of trace elements in rocks, regolith and water. Topics include micronutrients and concepts of essentiality; health problems related to natural occurrence of toxic elements; environmental pollution arising from nonferrous metal mining, coal mining and coal use, and gasoline additives; urban and regional geochemistry. Preq: GEOL 3180 or consent of instructor.

GEOL 8140 Environmental Sedimentology 3 (3) Environmental-based applications of sedimentology to developing an understanding of heterogeneity and scale, fluid flow and saturation, sediment-fluid interactions, and modeling approaches; field and laboratory methods; case studies; implications to environmental sustainability.

GEOL 8160 Aquifer Systems 3 (3) Hydrologic and characteristics of selected major aquifer systems in the U.S. and elsewhere; conceptual models for the controls of recharge, discharge and flow through aquifers in different geologic settings; development of numeric models to simulate natural and stressed aquifers.

GEOL 8180 Hydrogeology of Fractured Aquifers 3 (3) Processes and characteristics of fluid flow through naturally and artificially fractured subsurface formations; principles of flow in dual porosity materials, characterizing fractures and fractured aquifers, mechanics of fracture formation, methods of inducing fractures from wells; case studies and applications.

GEOL 8500 Selected Topics in Environmental Geology 1-3 (1-3) Selected topics in environmental geology emphasizing the subsurface contamination. May be repeated for a maximum of six credits, but only if different topics are covered. Coreq: GEOL 8501.

GEOL 8501 Selected Topics in Environmental Geology Laboratory 0 (99) Non-credit laboratory to accompany GEOL 8500. Coreq: GEOL 8500.

GEOL 8510 Geology Seminar 1 (1) Students review current topics in geology and make oral presentations. To be taken Pass/No Pass only. May be taken twice for credit.

GEOL 8750 Hydrogeology Summer Field Camp 6 (4) Groundwater geology field techniques including examination of surface exposures, analysis of cores and geophysical well logs, subsurface mapping, aquifer performance test and groundwater remediation. Coreq: GEOL 8751.

GEOL 8751 Hydrogeology Summer Field Camp Laboratory 0 (6) Non-credit laboratory to accompany GEOL 8750. Coreq: GEOL 8750.

GEOL 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

GERMAN

GER 6980 Independent Study 1-3 (1-3) Supervised study of selected topics in German literature, language, or culture. May be repeated for a maximum of six credits. Preq: Consent of department chair.

GRADUATE STUDIES

GS 7990 Comprehensive Studies 1-15 (1-15) Independent studies in preparation for comprehensive examinations; credit hours to be determined by the department or program chair. To be taken Pass/No Pass only. Preq: Consent of department chair.

GS 8000 Research Proposal Development Seminar 1 (1) Principles and techniques for the preparation of research proposals. Does not count towards a graduate degree. To be taken Pass/No Pass only. Preq: Second year or graduate standing in current major.

HUMAN-CENTERED COMPUTING

HCC 8310 Fundamentals of Human-Centered Computing 3 (3) Fundamental concepts in human-centered computing including human subjects, interface design, usability evaluation methods, software programming, information technology tools, ethic policy, and current problems of interest to human-centered computing.

HCC 8810 Selected Topics 1-3 (1-3) Advanced topics from current problems of interest in human-centered computing. Topics vary from semester to semester. May be repeated for a maximum of 18 credits, but only if different topics are covered.

HCC 8880 Directed Projects in Human-Centered Computing 1-6 (1-6) Directed individual project supervised by department faculty. May be repeated for a maximum of 18 credits. To be taken Pass/No Pass only.

HCC 9500 Selected Topics in Human-Centered Computing 1-3 (1-3) Study of advanced topics from current problems of interest in human-centered computing. May be repeated for a maximum of 18 credits, but only if different topics are covered. To be taken Pass/No Pass only.

HCC 9910 Doctoral Dissertation Research 1-18 (1-18) Focuses on specific research topic identified and agreed upon by the designated dissertation committee. Preq: Doctoral standing.

HCC 9920 Selected Topics 1-9 (1-9) Group discussions of trends and recent developments in research related to healthcare genetics. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: HCC 9010 and consent of instructor.

HCC 9910 Doctoral Dissertation Research 1-18 (1-18) Focuses on specific research topic identified and agreed upon by the designated dissertation committee. Preq: Doctoral standing.

HEALTH CARE GENETICS

HGC 9010 Advances in Human Genetics 3 (3) Overview of the disciplines and content areas related to advances in human genetics/genomics. Topics include aspects of biochemical, molecular, population genetics and cytogenetics as they relate to genomic health care Bioinformatics is addressed, incorporating the use of genetic databases for research and clinical settings. Preq: Consent of instructor.

HGC 9030 Interdisciplinary Research 1 (1) Examination of interdisciplinary research in the life sciences as a means of integrating information, data, techniques, tools, perspectives, concepts and/or theories from two or more disciplines or bodies of specialized knowledge to advance knowledge development or solve problems. Preq: Consent of instructor.

HGC 9050 Genomics, Ethics and Health Policy 3 (3) Designed for health-care professionals. Analyzes relationships among political climate, policy design and government action as related to ethical, legal and social issues surrounding availability of genetic information. Examines an ethical perspective on outcomes on health policies relating to genomic issues as well as contemplated actions based on new medical techniques. Preq: Consent of instructor.

HGC 9070 Applied Hth Genetics 3 (3) The principles of genetics are being utilized to individualize healthcare with new resources available to professionals for research and education. The course focuses on applying principles and issues in the areas of translation research, intervention and policy to establish a working knowledge of healthcare genetics. Preq: Doctoral standing or consent of instructor.

HGC 9100 Research Seminar 1-9 (1-9) Discussion of current research developments in healthcare genetics. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: Doctoral standing.

HEALTH, EDUCATION AND HUMAN DEVELOPMENT

HEHD 6000 Introduction to Leadership Theories and Concepts 3 (2) Interdisciplinary course introduces students to the nature of leadership. Students gain a broad understanding of the history and origins of leadership, theoretical approaches to leadership and the essence of contemporary leadership. Students are encouraged to test their ability to apply these concepts to life experiences. Preq: Junior standing or consent of instructor. Coreq: HEHD 6001.
HEHD 6000 Introduction to Leadership Theories and Concepts Laboratory 0 (1) Non-credit laboratory to accompany HEHD 6000. Coreq: HEHD 6000.

HEHD 6100 Leadership Behavior and Civic Engagement 3 (2) Students couple concepts of social justice and civic engagement with theoretical foundations from HEHD 4000 to complete a comprehensive theory-to-practice project. Introduces students to a comprehensive leadership skill set to become active change agents for the common good. Prereq: HEHD 4000. Coreq: HEHD 6101.

HEHD 6101 Leadership Behavior and Civic Engagement Laboratory 0 (1) Non-credit laboratory to accompany HEHD 6100. Coreq: HEHD 6100.

HEHD 6200 Leadership Application and Experience 3 (2) Immerses students in a practical leadership experience utilizing knowledge and skills gained in HEHD 4000 and 4100. Students identify an issue or problem and practice leadership by developing and implementing a community project. Challenges students to commit themselves to long-term engagement as agents of change. Prereq: HEHD 4100. Coreq: HEHD 6201.

HEHD 6201 Leadership Application and Experience Laboratory 0 (3) Non-credit laboratory to accompany HEHD 6200. Coreq: HEHD 6200.

HEHD 8000 Theories of Youth Development: An Applied Perspective 3 (3) Examines theories of positive youth development with an emphasis on how to apply them to "real world" issues facing young people. Students explore existing models, read theoretical and applied literature and examine current social changes that impact positive youth development.

HEHD 8010 Child and Adolescent Development 3 (3) Focuses on child and adolescent development emphasizing a strength-based approach. Students develop an understanding of early childhood and adolescent growth and development from a social, cultural and psychological perspective.

HEHD 8020 Youth Development Programming in a Contemporary Society 3 (3) Focuses on programs and administrative policies and procedures that govern youth development programs at the local, state and national levels. Model programs emphasizing "best practices" are studied. A cross-sectional approach is used to examine assets and protective factors in the contexts of family, school and community.

HEHD 8030 Creative and Ethical Leadership in a Changing Society 3 (3) Focuses on the development of leadership skills and group dynamics in program development and supervision of staff and volunteers. Students engage in listening, empowerment and process skills utilizing the latest approaches in the field of communications. Professional ethics related to human service professionals are integrated.

HEHD 8040 Assessment and Evaluation of Youth Programs 3 (3) Focuses on developing knowledge of rationale, procedures and tools for conducting intake, needs and environmental assessments of youth, families and communities. Effective skills for mastering comprehensive program evaluation strategies are taught. Students explore statistical packages specifically appropriate for evaluation of youth programs.

HEHD 8050 Youth Development in the Context of Family 3 (3) Focuses on youth development in the context of family development and interpersonal relationships. Students gain knowledge and skills in development issues and family functioning. Students become aware of and respect diverse family structures, parental involvement and the influence of culture and ethnicity on family dynamics.

HEHD 8060 Youth Development in the Context of a Global and Diverse Society 3 (3) Focuses on specific circumstances and issues related to youth in at-risk environments. Students learn methods, strategies and techniques to address diversity issues (i.e., racial, ethnic, gender, disability, sexual preference). Issues of poverty, mass culture, physical environment, etc. are examined globally.

HEHD 8070 Internship in Youth Development 3 (9) Practical experience in youth-serving agencies/organizations. Students are required to complete a minimum of 1500 hours of experiential education in a supervised setting. Upon approval, exceptions are given to students with experience working in youth-related fields. To be taken Pass/No Pass only. Prereq: Consent of program coordinator.

HEHD 8080 Grantsmanship 3 (3) Students conduct searches to identify youth-related funding sources. They write proposals to include purpose, rationale, background information, literature review, identification of collaborators/partners, budget, budget justification and human subjects review. Prereq: Admission to MS in Youth Development Leadership Program.

HEHD 8090 Management of Staff and Volunteers 3 (3) Examines approaches and strategies for successful management and development of staff and volunteers in youth-serving organizations, including effective organizational systems and working with boards and advisory committees. Covers business and organizational principles and practices for success as well as challenges of recruiting, supervising and retaining staff and volunteers. Prereq: Admission to MS in Youth Development Leadership Program or consent of instructor.

HEHD 8890 Independent Study in Youth Development 1-6 (1-6) Provides opportunities for students in youth development leadership to explore areas of special interest and critical topics in the discipline of youth development. May be repeated for a maximum of six credit hours. Prereq: HEHD 8000.

HEHD 8910 Master's Project 1 3 (3) Students are assisted in the preparation and completion of a graduate-level evaluative research project. Students share research project ideas with classmates and work to complete specific assignments, such as hypothesis development, literature review and research methodology proposed to prepare for data collection, analysis and final project presentation. Prereq: EXST 8010 and HEHD 8000 and HEHD 8040.

HEHD 8920 Master's Project 3 (9) Students conduct evaluative research projects to include writing an article for submission to a professional journal. Students present articles to instructor for review. To be taken Pass/No Pass only. Prereq: Consent of program coordinator.

HISTORY

HIST 6000 Studies in United States History 3 (3) Topics and problems in the history of the United States from the Colonial era to the present. May be repeated once for credit with departmental consent.

HIST 6150 Introduction to Digital History 3 (3) Introduces students to the philosophy and practice of the emerging field of History and New Media with a particular focus on how public historians can use technology to enhance their archival/museum/center’s visibility with the general public. Prereq: Any 3000-level history course.

HIST 6170 History and Tourism 3 (3) Introduces students to important scholarship in the heritage tourism field. Examines the origins and objectives of heritage tourism, and case studies of how professionals employ heritage tourism. Prereq: Any 3000-level history course.

HIST 6180 Oral History and Local History 3 (3) Introduces students to the most recent work in oral history and methodology with a focus on the history of the Upstate and Appalachia from the colonial era to the present. Students engage in their own local oral history project and produce a research paper based on their findings. Prereq: Any 3000-level history course.

HIST 6200 History and Film 3 (2) Analyzes the role of the cinema in the construction and dissemination of history. May be repeated once for credit with departmental consent. Coreq: HIST 6201.

HIST 6201 History and Film Laboratory 0 (3) Non-credit laboratory to accompany HIST 6200. Coreq: HIST 6200.

HIST 6240 Topics in History of Medicine and Health 3 (3) Selected topics in the development of medicine and health care including public attitudes towards health and medicine.

HIST 6300 The Vietnam Wars 3 (3) Wars in Vietnam are seen in two phases. The First Indochina War, 1946–54, is covered briefly. Main body of the course covers the Second Indochina War, which began as a guerrilla conflict in 1959–60 and ended as a mostly conventional war in the Communist victory of 1975.

HIST 6380 Problems in African Historiography and Methodology 3 (3) Concentrates on major issues in the field of African history with an additional focus on methodological concerns. May be repeated once for credit with departmental consent.

HIST 6400 Studies in Latin American History 3 (3) Consideration of selected and varied topics in Latin American history through readings, discussions, and individual or group projects. Special attention is given to the use of an inquiry or problem-solving method of historical analysis and to the cultivation of a comparative perspective. May be repeated once for credit with departmental consent.

HIST 6500 Studies in Ancient History 3 (3) Selected topics in ancient history ranging from pre-Biblical times to the fall of the Roman Empire. May be repeated once for credit with departmental consent.

HIST 6510 Alexander the Great 3 (3) Focuses on the career of Alexander the Great and deals with the history and archaeology of ancient Macedonia.

HIST 6520 History of Early Christianity 3 (3) Study of the history, social and doctrinal, of early Christianity up to 600 A.D. Prereq: Consent of instructor.
HIST 6600 Studies in British History 3 (3) Examination of selected themes, topics, or periods in British history from Anglo-Saxon times to the present. May be repeated once for credit with departmental consent.

HIST 6700 Studies in Early European History 3 (3) Study of selected topics or themes in European history from the fall of the Roman Empire to the age of industrialization. May be repeated once for credit with departmental consent.

HIST 6710 Studies in Modern European History 3 (3) Study of selected topics or problems in European history from the end of the Old Regime to the present. May be repeated once for credit with departmental consent.

HIST 6720 Medieval Conquests and Crusades 3 (3) Focuses on medieval conquests with particular emphasis on the era of the crusades. Investigates the origins and historical significance of the crusades from both Christian and Muslim perspectives, and examines crusader societies at home and abroad. Explores other medieval colonization movements and religious justifications for warfare outside the Holy Land.

HIST 6870 World War II and the World 3 (3) World War II was a catalyst of the twentieth century that touched every part of the globe and ushered in the atomic age. This course examines the war from its origins in the aftermath of World War I to the war crimes trials and the dawn of the Cold War.

HIST 6910 Studies in the History of Science and Technology 3 (3) Selected topics in the development of science and technology emphasizing their social, political, and economic effects. May be repeated once for credit with departmental consent.

HIST 6920 Studies in Diplomatic History 3 (3) Selected topics and problems in international conflict and conflict resolution among nations. Concentration is usually in 20th century history. May be repeated once for credit with departmental consent.

HIST 6930 Studies in Social History 3 (3) Studies in the ways people have earned their livings and lived their lives, individually and as communities, in the confines of different societies. May be repeated once for credit with departmental consent.

HIST 6940 Studies in Comparative History 3 (3) Selected topics in comparative history, contrasting and comparing similar historic developments in different nations, geographic areas, or civilizations. May be repeated once for credit with departmental consent.

HIST 6950 Studies in the History of Ideas 3 (3) Selected topics and themes in the development of ideas that have had an impact on the behavior of individuals and civilizations. May be repeated once for credit with departmental consent.

HIST 6960 Studies in Legal History 3 (3) Study of selected problems in the development of law and the system of criminal and civil justice. May be repeated once for credit with departmental consent.

HIST 7100 United States Since 1865 3 (3) Problems in U.S. history since 1865 with attention given to bibliography and teaching methods. Primarily for Master of Education candidates, but open to all graduate students. May be repeated with consent of graduate program director.

HIST 8000 Seminar in United States History 3 (3) Training in historical research and writing. May be repeated for credit with consent of graduate program director.

HIST 8100 Culture and Society 3 (3) Training in historical research and writing with a focus on the social and cultural underpinnings of U.S. history. May be repeated for credit with the consent of graduate program director.

HIST 8200 American Historiography 3 (3) Graduate seminar designed to familiarize students with the major overarching themes, scholarly interpretations, and issues of American history that historians have presented over the last century.

HIST 8300 Seminar in Asian History 3 (3) Training in historical research and writing with focus on Asian history. May be repeated for credit with consent of graduate program director.

HIST 8400 Seminar in Latin American History 3 (3) Training in historical research and writing with focus on Latin American history. May be repeated for credit with consent of graduate program director.

HIST 8600 Seminar in British History 3 (3) Training in historical research and writing with focus on British history. May be repeated for credit with consent of graduate program director.

HIST 8700 Seminar in European History 3 (3) Training in historical research and writing with focus on European history. May be repeated for credit with consent of graduate program director.

HIST 8720 Issues and Methods in European and Non-Western History 3 (3) Seminar discussion of contemporary approaches to European and non-Western history; exploration of theoretical and empirical debates.

HIST 8800 Special Topics in History 3 (3) Training in historical research and writing. May be repeated for credit with consent of graduate program director.

HIST 8800 Seminar in Historical Editing 3 (3) Seminar discussion of contemporary approaches and methodologies used by historians; exploration of current debates over major issues confronting the discipline of history.

HIST 8850 Independent Study 3 (3) Critical study of a historical topic, selected according to needs of the student and with approval of graduate program director. May be repeated for credit with consent of graduate program director.

HIST 8870 Archival Management: An Introduction 3 (3) Introduction to basic concepts of archival theory and management.

HIST 8900 Research Workshop 3 (3) Workshop to help students develop research and writing skills as preparation for work on the master's thesis. Workshop participants will produce original, professional-level research paper as well as thesis prospectus.

HIST 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

HIST 8930 Practicum in Archival Management 3 (9) Hands-on experience in the operations of an archival program, including acquisitions, arrangements, descriptions, conservation and reference service. Prereq: HIST 8870 or consent of instructor.

HIST 8940 Practicum in Historical Editing 3 (3) Practicum for applying methodologies learned in introductory editing course to a specific body of original sources such as family correspondence, diaries, or journals in order to become a historical editor.

HEALTH

HLTH 6000 Selected Topics in Health 1-6 (3-18) Topics in health selected to meet special and individualized interests of students. May be repeated for a maximum of nine credits, but only if different topics are covered. Prereq: Junior standing and consent of instructor.

HLTH 6100 Maternal and Child Health 3 (3) Focuses on key issues concerning the health status and needs of mothers and children. Topics include maternal health care, measurement and indicators of health status, health of minorities, role of families, and major programmatic interventions towards the health needs of these two groups.

HLTH 6150 Public Health Issues in Obesity and Eating Disorders 3 (3) In-depth review of prevalence, risk factors, consequences, and treatments of obesity and other eating disorders. Focuses on the public health importance of cultural norms, prevention, and early intervention related to obesity and eating disorders. Prereq: Junior standing in Health Science or consent of instructor.

HLTH 6200 Health Science Internship 1-9 (1-9) Under supervision in an approved agency, students have an opportunity for on-the-job experiences. Students are placed in an agency and develop personal/ professional goals and objectives appropriate to the setting, population, and health issues. Students create a comprehensive exit portfolio in a digital format. May be repeated for a maximum of six credits. Prereq: HLTH 4190 and a minimum grade-point ratio of 2.0 and Junior standing in Health Science and consent of instructor.

HLTH 6300 Health Promotion of the Aged 3 (3) Focuses on analysis and evaluation of health issues and health problems of the aged. Emphasizes concepts of positive health behaviors. Health majors are given enrollment priority. Students are expected to have completed coursework in developmental psychology and a two-semester sequence in science, or may obtain consent of instructor.

HLTH 6500 Applied Health Strategies 3 (3) Students plan, implement, and evaluate strategies to promote health through individual behavior changes. Both healthful and unhealthful behaviors are included. Examples include smoking cessation, weight management, and stress management. Prereq: HLTH 4800 and Health Science major.

HLTH 6980 Improving Population Health 3 (3) Critical examination of current and emerging issues in improving public health practice and population health. Covers examples in empirical and applied research, revealing future trends in population health. Health Science majors and minors will be given enrollment priority. Prereq: HLTH 2400 and HLTH 2980 and HLTH 3800, or consent of instructor.
HLTH 8020 Health Economics 3 (3) Provides in-depth exposure to economic concepts and theory as applied to the health services sector. Topics include health-care demand and supply analysis, consumer behavior, production and costs, perfect competition versus healthcare competition, price discrimination and regulation. Students are expected to have completed an undergraduate course in principles of economics before enrolling in this course.

HLTH 8090 Epidemiological Research 3 (3) Basic concepts of epidemiology with emphasis on applied aspects rather than theoretical. Examples are drawn from clinical practice. Use of relevant PC-based computer packages is required. Preq: MTHS 4050 or EXST 8010; or consent of instructor.

HLTH 8100 Health Policy 3 (3) Provides experience in analysis of decisions in health-care management policy, problems, resources and alternative courses of action for health service organizations. Students participate in analysis of organization objectives and means for achieving health service goals. Preq: HLTH 8070 or FIN 8070, or MBA 8070; and MBA 8100 and MBA 8060 and MBA 8080; and MBA 8090 or MGT 8090.

HLTH 8300 Theories and Determinants of Health 3(3) An ecological perspective of biological, behavioral and social health determinants and how theory is used to explain relationships between determinants of health and to describe behavior change processes. Emphasizes theories of individual behavior, community and group models of behavior change, and the use of theory in practice, research and evaluation.

HLTH 8110 Health Care Delivery Systems 3(3) Examines health care delivery systems and their functions with a focus on the United States. Economic theory is used to examine a number of critically important issues, including the organizational structure of health care payment systems, access, and quality of care in the United States.

HLTH 8210 Health Research I: Design and Measurement 3(3) Addresses issues in research design, measurement, project planning, data collection and data management for health research. Topics include experimental and quasi-experimental design, measurement theory applied to key health concepts, survey methodology, observational research and research ethics.

HLTH 8220 Health Research II: Qualitative and Mixed Methods 3(3) Qualitative research methods and mixed methods in health research, including identification and creation of research problems, the development of designs, actual data collection in healthcare settings, and analysis procedures to address those problems. Includes qualitative-interpretive methods of accessing and analyzing healthcare data, including participant observation/ethnography, case studies and grounded theory. Course addresses the methodological grounding for these methods, some of the methods themselves (through field exercises), and research designs. Preq: HLTH 8210.

HLTH 8290 Epidemiology II: Applied Epidemiology 3(3) Instruction in basic and advanced epidemiological principles, concepts and methods in population health with an emphasis on the practical application of epidemiological methods in health and clinical settings using case studies and practice-related exercises in health research and evaluation. Preq: HLTH 8190.

HLTH 8310 Quantitative Analysis in Health Research 1(3) Course focuses on the application of statistical methods to health research questions using health survey data. Course material is built on knowledge gained from previous courses in research design methods and statistics. Students gain hands-on experience in investigating health research questions and analyzing complex health data sets. Preq: MATH 2060 and MATH 4030; or consent of instructor.

HLTH 8320 Quantitative Analysis in Health Research II 3(3) Covers common statistical and econometric methods used in population health research. Extended from the topics covered in Quantitative Analysis in Health Research I, students gain additional hands-on experience in applying advanced analytic techniques and tools to investigate health research questions using complex health data sets. Preq: HLTH 8310.

HLTH 8410 Foundations of Evaluation in Health 3(3) Foundational course on historical and theoretical aspects of evaluation as applied to population health, medicine and healthcare. Paradigms and philosophies associated with methods, use, values and social justice. Other topics include evaluation terminology and standards, theory-driven evaluation, planning models, planning and evaluation cycles, engaging stakeholders, and presenting findings.

HLTH 8420 Applied Evaluation Methods in Health 3(3) Continuation of HLTH 8410. Practical aspects of planning, designing and managing evaluations in population health, medicine and healthcare settings. Topics include scope, selecting an appropriate design, threats to validity, common and emerging methods of formative and summative evaluation, staffing and management, collecting and analyzing data, and writing evaluation reports. Preq: HLTH 8410.

HLTH 8890 Seminar in Applied Health Research and Evaluation 1(1) Students present, critically discuss and examine issues related to their research with other students, faculty and visitors in a formal setting, approximating professional meetings. Students develop communication skills, professional leadership skills and professional conduct expected of a graduate student in applied health research and evaluation. May be repeated for a maximum of six credits. Preq: HLTH 8820.

HLTH 9910 Doctoral Dissertation Research in Applied Health Research and Evaluation 1-12(1-12) Students identify dissertation research topic, develop a proposal, execute research and finalize their dissertation report. May be repeated for a maximum of credits.

HORT 6040 Plant Propagation 3(3) Practices of plant propagation from seeds, bulbs, divisions, layers, cuttings, grafting, and plant tissue culture are introduced. Physiological principles of pollination and seed biology, plant growth, regulators, source sink relations, life cycles and developmental phase transitions explain the practices. Environmental and economic contexts frame the preferred practices.

HORT 6050 Plant Propagation Techniques Laboratory 1(3) Techniques of plant propagation are covered. Sexual methods covered include germination, scarification, and stratification. Asexual methods covered include grafting, budding, cuttings, layering, tissue culture divisions, and separations. Local nurseries are visited. Preq or concurrent enrollment: HORT 6040.

HORT 6120 Advanced Turfgrass Management 3 (2) Advanced principles and practices associated with turfgrass management for golf courses, sports fields, sod production, and commercial lawn care. Topics include turfgrass physiology, plant growth and development, construction, turfgrass nutrition, irrigation, drainage, pesticide use and fate, and development of effective management systems. Preq: CSEN 2020 or HORT 2120. Coreq: HORT 6121.

HORT 6121 Advanced Turfgrass Management Laboratory 0 (3) Non-credit laboratory to accompany HORT 6120. Coreq: HORT 6120.

HORT 6200 Applied Turfgrass Physiology 3 (3) Advanced course in turfgrass science and management. Provides the current status and development of turfgrass stress physiology and research. Main topics include temperature, drought, traffic, edaphic stresses, new developments in the turf industry and environmental stewardship. Preq: HORT 2120 and HORT 2130.

HORT 6270 Urban Tree Care 3 (3) Principles, practices, and problems of protecting and maintaining trees in urban and recreational areas. Examines environmental and biological factors affecting trees in high-use areas, their management and cultural requirements, and the practices necessary for their protection and care as valuable assets in the landscape. Preq: Consent of instructor.

HORT 6330 Landscape and Turf Weed Management 3 (2) Weed management strategies that include cultural, biological, and chemical methods are studied for landscape and turfgrass areas. Problem-solving skills and weed species characteristics are emphasized. Coreq: HORT 6331.

HORT 6331 Landscape and Turf Weed Management Laboratory 0 (2) Non-credit laboratory to accompany HORT 6330. Coreq: HORT 6330.

HORT 6550 Just Fruits 3 (3) Students explore the origins, biology, culture, and production of major temperate zone fruit—apples, berries, and cherries to pawpaws, peaches, and pomegranates, the familiar to the forbidden. They discover principles, practices, and technologies employed to grow, protect, and harvest the fruits that feed us from commercial orchards, organic farms, and backyards. Preq: HORT 1010.
HORT 6560 Organic Vegetable Production 3 (1)
Principles and practices of organic vegetable production, including site and variety selection, field and greenhouse production methods, and cultural practices to manage pests and weeds. Harvesting and post-harvest handling is also addressed. Emphasis is placed on sustainable practices, alternative methods, and reducing reliance on chemical inputs. Coreq: HORT 6561.

HORT 6561 Organic Vegetable Production Laboratory 0 (6) Non-credit laboratory to accompany HORT 6560. Coreq: HORT 6560.

HORT 6610 Advanced Landscape Garden Design 4 (3) Garden design for urban or other highly visible locations. A specific specialty garden with environmental education potential will be designed. Finshed plans include detailed planting, installation and maintenance, and communication. Emphasis is on establishing healthy plant communities, habitat linkages, and healthy water and soil. Preq: HORT 3080 and HORT 3090. Coreq: HORT 6611.

HORT 6611 Advanced Landscape Garden Design Laboratory 0 (3) Non-credit laboratory to accompany HORT 6610. Coreq: HORT 6610.

HORT 6650 Plant Molecular Biology 3 (3) Study of fundamental plant processes at both the cellular and molecular levels. Topics include genome structure and organization (both nuclear and organelar); regulation of gene expression and its role in cellular and whole-plant processes; transposable genetic elements; applications for biotechnology. Preq: Junior standing and GEN 3020; and either BIOL 3040 or BIOL 3050.

HORT 6670 Advanced Internship 1-6 (1-6) Pre-planned work experience under competent supervision in approved agency dealing with horticultural endeavors. Gives advanced students on-the-job learning opportunities to apply acquired knowledge and skills. Monthly reports and final departmental seminar required. Undergraduates may accumulate a maximum of six credits for participation. Preq: 2710 and/or 4710. Preq: Junior standing.

HORT 6670 Advanced Internship + Health 3 (3) Explores the role of landscapes in human health and wellness. Historical healing places and contemporary urban environments are examined for evidence of psychological and physiological impacts. Readings include interdisciplinary research. Preq: Senior standing.

HORT 8100 Specialized Topics in Environmental Horticulture 1-4 (1-4) Specialized topics not covered in other courses which explore current areas of research and management in environmental horticulture. May be repeated for a maximum of eight credit hours, but only if different topics are covered.

HORT 8120 Special Problems in Horticulture 1-4 (1-4) Research not related to a thesis. May be repeated for a maximum of four credits. Preq: Consent of instructor.

HORT 8140 Environmental Plant Stress Physiology 3 (2) Environmental stresses associated with water (drought, waterlogging), temperature, light and air pollution with quantitative treatment of stress effects on plants; mechanisms by which plants may avoid, tolerate, or modify stress effects on plant growth and function at the molecular, cellular and whole-plant levels. Offered fall semester only. Preq: BIOL 4010 and BIOL 4020. Coreq: HORT 8141.

HORT 8141 Environmental Plant Stress Physiology Laboratory 0 (2) Non-credit laboratory to accompany HORT 8140. Coreq: HORT 8140.

HISTORIC PRESERVATION

HP 6100 History and Theory of Historic Preservation 3 (3) Survey history of preservation that explores a variety of theoretical issues that impact the discipline. Provides a basis for critical evaluation of historic preservation. Preq: Three semesters of Art and Architectural History or equivalent or consent of instructor.

HP 6110 Archival Research and Oral History in Historic Preservation 3 (3) Introduction to historic buildings and landscapes research. Emphasizes researching the physical and social history of buildings and places. Charleston and its environs provide case study projects for archival research.

HP 6120 Materials and Methods of Historic Construction 3 (3) Survey of traditional materials and methods of construction in America from the 18th through the early 20th century. Scientific examination of historic construction provides case studies. Students are expected to have completed three semesters of Art and Architectural History.

HP 8000 Historic Preservation Internship 1-6 (1-6) Six credits of approved internship in Historic Preservation are required during the course of the graduate program and can be completed in one summer of the program. May be repeated for a maximum of six credits. To be taken Pass/No Pass only. Preq: Consent of supervising faculty.

HP 8010 Legal and Economic Issues in Historic Preservation 3 (3) Examines historic preservation against the backdrop of contemporary legal and economic issues. Preq: ARCH 4050 and HP 4100 and HP 4110 and HP 4120; or consent of instructor.

HP 8020 Historic Preservation Research Seminar 3 (3) Advanced documentation and analysis of historic resources in preparation for thesis project. Preq: HP 8010 and HP 8050.

HP 8040 Management and Administration of Historic Preservation 3 (3) Praxis on the management of historic properties with emphasis on administering a preservation project in the field and establishing a maintenance program for a historic property. Preq: HP 8100.

HP 8050 Preservation Studio 6 (18) Examines Charleston and its environs through the development of a comprehensive preservation project for a specific site. Preq: ARCH 4050 and HP 4100 and HP 4110 and HP 4120. Preq or concurrent enrollment: HP 8100.

HP 8060 Society and Culture of Early Charleston 3 (3) Examines the society and culture of early Charleston (c. 1670-1861) through a localized analysis of important topics in American social/cultural history. Topical study is applied to an investigation of extant Charleston buildings and urban fabric. Preq: HP 6100 or consent of instructor.

HP 8110 Readings in Historic Preservation 3 (3) Critical overview of the history, development and current practice of historic preservation focusing on the United States. Topics include American and European perspectives; the development of preservation as a profession; current theory and practice; and the use, abuse and fetishization of history. Preq: Enrollment in MS or certificate program in Historic Preservation.

HP 8190 Investigation, Documentation and Conservation 3 (3) Through study and application of the Historic American Buildings Survey, the standard method for creating baseline documents, students gain experience in the best investigation and documentation techniques. The method is applied to various structures located in Charleston's historic district. Students also gain a base understanding of preservation practices and techniques.

HP 8230 Historic Interiors 3 (3) Students gain familiarity with American interiors and decorative arts from early European settlement through the late 19th century. They consider periodization and documentation of the structure, finishes, decorations and the material culture of those structures with emphasis on the interpretation of primary documents: inventories, pattern books, accounts, paintings and prints.

HP 8330 Cultural and Historic Landscape Preservation 3 (3) Overview of cultural historic landscape preservation principles and practices. Includes inventory and analysis of historic resources from a cultural landscape perspective. Qualities of integrity are studied in correspondence to location, design, setting, materials, workmanship, and feeling and association. Preq: Enrollment in MS in Historic Preservation program or consent of instructor.

HP 8590 Professional Project in Historic Preservation 3 (3) Professional project is a thesis alternative that provides students with a more flexible presentation of their research to reflect essential preservation knowledge and skills. Students work directly with their committees to complete projects requiring a flexible presentation such as documentation drawings and other methods germane to historic preservation. Preq: Consent of advisor.

HP 8900 Directed Studies 1-6 (1-6) Special topics and independent research in historic preservation with faculty guidance. May be repeated for a maximum of six credits. Preq: Consent of advisor.

HP 8910 Thesis Research 1-6 (1-6) Thesis proposals are defended in the third semester and completed as multimedia project in the fourth semester of the program. Projects using the historic resources of Charleston and its environs, or other suitable historic sites, are encouraged. To be taken Pass/No Pass only. Preq: HP 8020 and HP 8100.
HUMAN RESOURCE DEVELOPMENT

HRD 8200 Human Performance Improvement

HRD 8250 Organizational Performance Improvement
3 (3) Provides concepts and skills employed by managers and change agents to promote and sustain productive organizations. Students learn how to perform behavior analysis and management, how to determine criteria for performance appraisals and how to establish leadership in the workplace. Preq: HRD 8200 and HRD 8300.

HRD 8300 Concepts of Human Resource Development
3 (3) Theory and practice of contemporary applications of human resource development (HRD) programs; training and development functions; strategies for designing and developing programs; and application of methods, techniques and resources in the context of changing needs, technologies, demographics and economic circumstances that create the need for different skills and knowledge in the workplace. Preq: HRD 8200 and HRD 8300.

HRD 8350 Instructional Systems Design
3 (3) Theory and practice of needs assessment activities in human resource development (HRD) programs; importance of the process to the identification of content/curricula topics and the overall training environment; specific methodologies used in the needs assessment process; support components of various program planning systems. Preq: HRD 8300 or consent of instructor.

HRD 8470 Instructional Systems Design
3 (3) Theory and practice of instructional systems development activities in human resource development (HRD) programs; identification, selection and organization of subject matter appropriate for competency-based training (CBT) programs; occupational analysis techniques; rational statements, goals, and objectives; related instructional materials; participant evaluation; and instructional scheduling. Preq: HRD 8450 or consent of instructor.

HRD 8480 Evaluation of Training and Development/HRD Programs
3 (3) Theory and practice of evaluation processes related to training and development in human resource development programs; developing a results-oriented approach based on specific criteria or standards; designing instruments; determining program costs; and collecting, analyzing and interpreting data to ascertain return on investment. Preq: AGED 8890 or ED 8890; and HRD 8470 and HRD 8600; or consent of instructor.

HRD 8600 Instructional Materials Development
3 (3) Development and application of instructional materials and laboratory activities for training programs in education and industry; reinforcement of instructional training concepts and materials development procedures that are applied across human resource development (HRD) programs. Preq: HRD 8450.

HRD 8700 Consulting for Education and Industry
3 (3) Theory and practice of external and internal consulting practices in human resource development programs; dynamics of a professional helping relationship; methods and techniques for initiating and terminating consulting relationships; diagnosing client situations; identification, selection and implementation of alternative problem solutions; evaluation of professional consulting relationships. Preq: HRD 8300 or consent of instructor.

HRD 8800 Research Concepts and Skills
3 (3) Introductory course in research to familiarize human performance improvement professionals with the nature of research and reporting processes and to help develop the necessary criteria to become critical, analytical consumers of published research. Preq: HRD 8200 and HRD 8300.

HRD 8820 Knowledge Management for Improved Performance
3 (3) Introduction to knowledge management to familiarize students with organizational competencies required to adapt and prosper in a chaotic, global environment. Focuses on contemporary theory, research and application of knowledge management as a strategy for improving personal and organizational performance. Preq: HRD 8800.

HRD 8900 Instrumentation for Human Performance Improvement
3 (3) Introduction to commercially available instruments used to assess and evaluate human performance in the workplace. Students develop critical judgment skills to determine the adequacy of use of instruments in modern organizations. Preq: HRD 8300.

HRD 8970 Applied Research and Development
3 (3) Study of a specific topic under the direction of a faculty member. Students identify a specific problem related to the human resource development profession based on their personal interests, competencies, needs and goals. Preq: Submission of a written proposal and prior approval of advisor and satisfactory completion of 12 hours of graduate courses; and AGED 8890 or ED 8890.

HUMANITIES

HU 6560 Literature and Arts of the Holocaust
3 (3) Addresses the Holocaust through literature, art, architecture, music, and film. Beginning with historical, political, and economic forces that contributed to the Holocaust, course then focuses on highly diverse creative responses to this event-responses that often reflect the difficulties and politics of these commemorative gestures. Preq: ENGL 3101 or consent of instructor.

INDUSTRIAL ENGINEERING

IE 6000 Honors Thesis
1-6 (1-6) Individual or joint research project performed with a faculty mentor or committee of faculty. May be repeated for a maximum of six credits. Preq: IE 2680 and consent of mentor.

IE 6180 Human Factors Accident Analysis and Expert Testimony
3 (3) This highly interactive course is divided into two components. Students gain an understanding of how the principles of human factors engineering are used in accident investigation and forensic analysis, and then learn the skills necessary to defend their opinions as an expert witness. Preq: IE 6880 or IE 8000 or PSYC 8350.

IE 6300 Human Factors Engineering in Healthcare
3 (3) Focuses on how industrial engineers help improve the quality and safety of patient care. Students learn how healthcare is different from traditional industrial engineering sectors. A substantial part of the course is focused on learning how to apply industrial engineering tools, specifically those grounded in human factors, to healthcare problems. Preq: IE 6880 or IE 8000 or PSYC 8350.

IE 6400 Decision Support Systems in Industrial Engineering
3 (2) Study of design of decision support systems for production and service systems based on operations research models. Includes use of spreadsheets, databases, and integrated software development environments to implement decision support systems. Consr: IE 6401.

IE 6401 Decision Support Systems in Industrial Engineering Laboratory
0 (Non-credit laboratory to accompany IE 6400. Consr: IE 6400.

IE 6520 Reliability Engineering
3 (3) Probabilistic approach to assessing system reliability. Methods for analyzing serial, parallel, and complex systems. Reliability life testing and its acceleration are covered. Essential elements of maintainability are identified and related to system availability. Preq: IE 8090; or (MTHS 6000 or MTHS 8000) and (MTHS 6050 or MTHS 8050)

IE 6560 Supply Chain Design and Control
3 (3) Industry engineering aspects of supply chains, including design and control of material and information systems. Preq: IE 8040 or consent of instructor.

IE 6570 Transportation and Logistics Engineering
3 (3) Introduces transportation and logistics systems analysis from both analytical and practical perspectives. Covers methods for identifying level-of-service metrics and measuring system performance. Discusses key aspects of modeling, simulation, and other techniques for economic and quantitative analysis of transportation and logistics planning issues.

IE 6600 Quality Improvement Methods
3 (3) Study of modern quality improvement techniques presented in an integrated, comprehensive context.

IE 6610 Quality Engineering
3 (3) Design aspects of quality and the engineer’s role in problems of quality in production systems. Preq: IE 3610.

IE 6620 Six Sigma Quality
3 (3) Study of DMAIC (Define, Measure, Analyze, Improve, and Control) elements of Six Sigma, project management, process analysis, quality function deployment, hypothesis testing, gage R&R, data analysis, multivariate analysis, design of experiments, statistical process control, and process capability analysis. Preq: EXST 8010 or IE 8090 or MTHS 6030 or MTHS 8040 or MTHS 8050.

IE 6630 Quality in the Capital Projects Industry
3 (3) Covers topics in quality and lean principles relevant to the capital projects industry. Provides a broad overview on quality concepts and philosophies, quality management and inspection tools applicable to capital projects, Six Sigma Approach, lean concepts and value stream mapping.
IE 6650 Facilities Planning and Design 3 (3) Study of the principles and techniques of facility planning and design. Discusses economic selection of materials handling equipment and integration of this equipment into the layout plan to provide effective product flow in production, distribution, and service contexts. Includes quantitative techniques for evaluation of facility design. Prereq: IE 8000 and IE 8030 and IE 8090.

IE 6770 Systems Safety 3 (2) Introduces the issue of safety and response to significant events. Provides exposure to and experience in hazard and accident causes and mitigation. Emphasizes current theories applied to large, complex systems. Prereq: Senior standing.

IE 6820 Systems Modeling 4 (3) The purpose, theory, and techniques of modeling systems with dynamic events. Students learn a powerful analytical process to use in the analysis and improvement of systems in several industries, including transportation, logistics, manufacturing and service systems. Incorporates professional simulation software as a tool in evaluating the system performance. Prereq: IE 8030 or (MTHS 6400 and 6410) or (MTHS 8030 and 8100); AND IE 8090 or MTHS 6030 or MTHS 8040. Coreq: IE 6821.

IE 6821 Systems Modeling Laboratory 0 (2) Non-credit laboratory to accompany IE 6820. Coreq: IE 6820.

IE 6850 Survey of Optimization Methods and Applications 3 (3) Survey of deterministic and stochastic optimization methods, theory and algorithms. Modeling, analysis and applications of optimization to modern industrial engineering problems. Prereq: IE 8030; or MTHS 8030 and 8100; or MTHS 6400 and 6410.

IE 6870 Industrial Safety 3 (3) Recognition and prevention of hazards; recognition and control of hazardous materials; developing and managing a safety program; designing inherently safe equipment and workplaces.

IE 6880 Human Factors Engineering 3 (3) Introduction to human performance and limitations in the design of effective and efficient systems. Covers issues related to changes in technology, impact of design on society, ethical issues in design of systems, and the cost benefits from designing systems and environments that often challenge perceived notions of benefits. Prereq: Junior standing; and MTHS 1020 or 1060.

IE 6890 Industrial Ergonomics and Automation 3 (2) Physical ergonomics and ergonomics in industrial settings, including work physiology, the physical environment, automated systems, and hybrid work systems. Prereq: IE 8000. Coreq: IE 6891.

IE 6891 Industrial Ergonomics and Automation Laboratory 0 (3) Non-credit laboratory to accompany IE 6890. Coreq: IE 6890.

IE 6910 Selected Topics in Industrial Engineering 1-3 (1-3) Comprehensive study of any timely or special topic in industrial engineering not included in other courses. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

IE 8000 Human Factors Engineering 3 (3) Fundamentals of design for human use; human performance; applications of abilities and limitations to the design of tools, machines, facilities, tasks and environments for efficient, safe and comfortable human use. Prereq: Consent of instructor.

IE 8010 Design and Analysis of Human-Machine Systems 3 (3) Methodologies used in the design and evaluation of human-machine systems including function and task analysis; questionnaires and interviews; scenarios, mockups and prototypes; participative design, empirical testing and iterative design; models of human-system interaction; analysis and classification of human error; and design of job performance and training aids. Prereq: Consent of instructor.

IE 8020 Design of Human-Computer Systems 3 (3) Issues in designing, implementing, maintaining and refining the user interface of interactive computer systems including interface design theories, models, principles and guidelines; interaction styles; input and output devices; system messages; screen design, manuals, on-line help and tutorials; and iterative design, testing and evaluation. Prereq: IE 8010 or consent of instructor.

IE 8030 Engineering Optimization and Applications 3 (3) Introduction to optimization through the study of problems related to the planning, design and control of production/manufacturing systems; classical nonlinear optimization and algorithmic procedures; normal and linear problems with postoptimality analysis. Markov chains. Prereq: Consent of instructor.

IE 8040 Manufacturing Systems Planning and Design 3 (3) Concepts and principles associated with the design of manufacturing systems with a focus on modeling and integration methodologies; lean technology, process planning, manufacturing modeling and design for manufacturing. Prereq: Consent of instructor.

IE 8050 Foundations in Quality Engineering 3 (3) Fundamental tools of quality engineering and their application to real situations; advanced statistical process control, design of experiments, Taguchi techniques and Shainin methodologies. Prereq: Consent of instructor.

IE 8090 Model Systems Under Risk 3 (3) Application of probabilistic methods to engineering problem solving and decision making. Cases are presented illustrating use of Markov chains, queuing processes and other stochastic models in practice. Prereq: MTHS 3020 or consent of instructor.

IE 8110 Human Factors in Quality Control 3 (3) Aspects of use of the human as a detector of product quality, serving as the basis for a taxonomy of human tasks in inspection; incorporates models of visual search and human decision making within the quality control framework. Prereq: Consent of instructor.

IE 8120 Work Science and Design 3 (3) Design methods for work and work systems; scientific and engineering basis of work and its analysis. Prereq: Consent of instructor.

IE 8130 Occupational Ergonomics 3 (3) Theory and application of ergonomics at work; human performance, fatigue, stress, work patterns, work environment.

IE 8150 Research Methods in Ergonomics 3 (3) Contexts and processes for research in ergonomics with emphasis on engineering problems; scientific and engineering methods; measurement; visual and physical tasks; simulation, laboratory and archival studies. Prereq: MTHS 8040 or consent of instructor.

IE 8500 Introduction to Capital Projects Supply Chain 3 (3) Introduces the phases of capital projects; design and control of the capital projects supply chain; challenges associated with each of the primary supply chain entities—owners, contractors and suppliers.

IE 8510 Data Collection, Analysis and Interpretation 3 (3) Collection and presentation of data for decision making in industry focusing on design and control of industrial processes. Includes application of inferential statistics to data from industrial engineering situations. Prereq: IE 8500 or consent of instructor.

IE 8520 Modeling and Decision Making 3 (3) Students formulate and resolve models of industrial engineering systems focusing on decision making. Prereq: IE 8510 or consent of instructor.

IE 8530 Foundations of Quality 3 (3) Discusses quality control and quality assurance techniques including control charting and supplier surveillance. Special attention is devoted to nontraditional applications such as those used in nonmanufacturing supply chain. Prereq: IE 8510 or consent of instructor.

IE 8540 Fundamentals of Supply Chain and Logistics 3 (3) Students apply model building and analytical techniques to design, optimize and control the supply chain and other logistics systems. Prereq: IE 8510 or consent of instructor.

IE 8550 Capital Projects Supply Chain 3 (3) Application of quantitative and qualitative tools and techniques to the design, control, management and optimization of the capital projects supply chain. Prereq: MGT 8560 or consent of instructor.

IE 8570 Industrial Safety and Risk Management 3 (3) Discusses safety and risk management issues in industrial engineering systems including hazard information systems, process safety, export control and federal and international safety regulation requirements. Prereq: IE 8550 or consent of instructor.

IE 8580 Case Studies in Capital Projects Supply Chain 3 (3) Analysis of case studies in the capital projects supply chain. Prereq: IE 8520 or IE 8530 or IE 8540 or IE 8550 or IE 8570; or consent of instructor.

IE 8590 Capstone Design Project 3 (3) Capstone experience in the design, control, management and optimization of capital projects supply chains. Prereq: IE 8580 or consent of instructor.

IE 8600 Dynamic Programming 3 (3) Theory and methodology of dynamic programming; Bellman’s principle of optimality; Mitten’s sufficiency conditions; recursive optimization of serial and nonserial multistage systems; optimization of discrete and continuous systems through decomposition; special aspects of problem formulation. Prereq: IE 8030.

IE 8650 Facility Planning and Design 3 (3) Planning and design of industrial facilities emphasizing automated production facilities; quantitative approaches to equipment design and evaluation of performance. Prereq: IE 8030.

Courses of Instruction
Courses of Instruction

IE 8710 Industrial Testing and Quality 3 (3) Design and use of component and product tests; automated inspection; test and inspection in integrated systems; cost-based models. Preq: IE 6610.

IE 8800 Advanced Methods of Operations Research 3 (3) Methods and applications of advanced operations research techniques; discrete optimization, integer and mixed integer programming, Boolean minimization, network optimization, permutation methods on implicit enumeration. Preq: IE 8030 or consent of instructor.

IE 8810 Metaheuristics 3 (3) Survey of selected metaheuristic techniques. Topics may include genetic algorithms and other evolutionary algorithms, taboo search and simulated annealing. Students implement multiple metaheuristics from problems throughout the semester in a high-level language.

IE 8840 Advanced Engineering Economic Analysis 3 (3) Engineering economic analysis for engineering research, development and construction projects emphasizing detailed treatment of tax effects, methods for determining discount rates, proper use of economic criteria in various decision environments (certainty vs. uncertainty, single vs. multiple project selections, etc.). Preq: Consent of instructor.

IE 8860 Operations Research in Production Control 3 (3) Latest techniques in scientific inventory management, scheduling and forecasting; operations research; statistics; computer methods; case studies. Preq: IE 8030.

IE 8870 Modeling Logistics and Behavior Using Simulation 3 (3) Covers design and development of discrete event, system dynamics and agent-based models to explain behavior or improve performance. Environments addressed include process flow, social and behavioral systems. Advanced topics of study may include input and output analysis. Modeling concepts are motivated with real-world examples from representative fields. Preq: Consent of instructor.

IE 8880 Advanced Probabilistic Methods 3 (3) Advanced treatment of stochastic optimization, potentially including single and multiple channel queues, Markov programming and stochastic optimal control. Preq: Consent of instructor.

IE 8900 Special Problems in Industrial Engineering 1-3 (1-3) Principles and methods of industrial engineering applied to analysis of a current interest problem. May be repeated for a maximum of six credits. To be taken Pass/No Pass only. Preq: Consent of instructor.

IE 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

IE 8920 Master’s Design Project 3 (1) Design project in industrial systems; integration of industrial engineering principles and methodologies; resolution of contemporary systems design problems. Project requires research, development, implementation planning, reporting and project assessment. Preq: Consent of instructor.

IE 8930 Selected Topics in Industrial Engineering 1-3 (1-3) Selected topics in industrial engineering emphasizing new developments in systems science, systems analysis and operations research. May be repeated for credit. Preq: Consent of instructor.

IE 8950 Industrial Engineering Research Techniques 1 (1) Series of weekly one-hour lectures given by students, faculty and guests on methods and issues involved in industrial engineering research. To be taken Pass/No Pass only.

IE 9710 Advanced Quality Engineering Seminar 3 (3) Current topics in the research and development of quality engineering methodologies. Preq: IE 8710 or consent of instructor.

IE 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

INTEGRATED PEST MANAGEMENT

IPM 6010 Principles of Integrated Pest Management 3 (3) Origins, theory, and practice of integrated pest management. Relationships among crop production and protection practices are explored. Economics of various control strategies are considered. Integrated pest management field projects are studied. Conventional and integrated pest management approaches are compared. Multidisciplinary plant problem analysis is introduced. Preq: CSEN 4070 or ENT 3100 or PLPA 3100.

IPM 8000 Special Problems in Plant Health 1-3 (1-3) Directed individual study of a special problem in plant health. Emphasis is on organizing, conducting and reporting on independent investigations. Preq: Consent of instructor.

LANGUAGE

LANG 6000 Phonetics 3 (3) Study of basic phonetic concepts used in the study of sounds in language.

LANDSCAPE ARCHITECTURE

LARC 6550 Urban Genesis and Form 3 (3) Exploration of urban forms and developments within their historical context through off-campus, on-site lectures and exposure to historic cities and sites. Students visit historic and contemporary cities and analyze those places through readings and direct observations. Offered in the summer only. Preq: LARC 2520 or consent of instructor.

LARC 6230 Environmental Issues in Landscape Architecture 3 (3) Overview of environmental and ecological issues and their relationship to landscape architecture practice and design. Preq: LARC 4520 or consent of instructor.

LARC 6330 Historic Preservation in Landscape Architecture 3 (3) Study of historic landscape preservation in a number of contexts, including gardens, vernacular landscapes, parks, cemeteries, and battlefields. Preq: LARC 4520 or consent of instructor.

LARC 6430 Community Issues in Landscape Architecture 3 (3) Indepth study of issues relevant to community design. Overview of physical design and related social issues. Preq: LARC 4520 or consent of instructor.

LARC 6530 Key Issues in Landscape Architecture 3 (3) Overview of research in landscape architecture and study of relevant research methods. Students write proposals for their own projects positioned within the larger context of research in the profession. Preq: Fifth-year Landscape Architecture student or consent of instructor.

LARC 8010 Landscape Architecture Orientation I Laboratory 0 (9) Non-credit laboratory to accompany LARC 8010. Coreq: LARC 8020.

LARC 8021 Landscape Architecture Orientation I Laboratory 0 (9) Non-credit laboratory to accompany LARC 8020. Coreq: LARC 8020.

LARC 8130 Advanced Regional Design 6 (3) Advanced study and analysis of natural and cultural landscapes at the regional scale with an emphasis on South Carolina. Includes an exploration of landscape ecology as an informant to design and application geographic information systems. Each student also engages in independent research. Preq: Students in Second Professional MLA or MArch program or consent of instructor. Coreq: LARC 8131.

LARC 8131 Advanced Regional Design Laboratory 0 (9) Non-credit laboratory to accompany LARC 8130. Coreq: LARC 8130.

LARC 8210 Research Methods 3 (3) Foundations and procedures of landscape architectural research design and methods. Explores alternate research methodologies and the theory of knowledge regarding foundations, scope and validity. Preq: LARC 6530.

LARC 8230 Advanced Community Design Studio 6 (3) Studio focused on the study of communities. Students engage in a series of design explorations culminating in a mixed-use parcel on a large tract. Includes intensive study of growth and change in the contemporary landscape. New development in southeastern U.S. serves as a laboratory. Preq: LARC 6530 or consent of instructor. Coreq: 8231.

LARC 8231 Advanced Community Design Studio Laboratory 0 (9) Non-credit laboratory to accompany LARC 8230. Coreq: LARC 8230.

LARC 8300 Graduate Seminar I 3 (3) Seminar including reading, writing and discussion on environmental and social/cultural issues in landscape architecture. Course is grounded in an exploration of the history of landscape architectural theory. Preq: LARC 8020 or consent of instructor.

LARC 8400 Graduate Seminar II 3 (3) Graduate seminar in one of the areas of departmental focus: growth and change, health and design, or restoration. Preq: LARC 8300 or consent of instructor.
LARC 8430 Interdisciplinary Design and Research 6 (3) Students participate in an interdisciplinary project linked to one of the focus areas in the department: health and design, restoration (environmental or cultural/historical), growth and change. Each student identifies a personal research project related to the larger team project. Prereq: LARC 8530 or consent of instructor. Concor: LARC 8431.

LARC 8431 Interdisciplinary Design and Research Laboratory 0 (9) Non-credit laboratory to accompany LARC 8430. Concor: LARC 8430.

LARC 8500 Graduate Colloquium 3 (3) Series of lectures and presentations by graduating students, faculty members and guest designers and scholars. Students offer reviews and critiques of the various presentations. Prereq: LARC 8450 or consent of instructor.

LARC 8520 Advanced Urban Design 6 (1) Advanced landscape architectural design in the urban context. Students study urban issues and offer design and sustainable management solutions for urban areas. Includes readings and theory component as well as an opportunity to collaborate with architecture students. Prereq: Second Professional Degree Graduate status in Landscape Architecture. Concor: LARC 8521.

LARC 8521 Advanced Urban Design Laboratory 0 (10) Non-credit laboratory to accompany LARC 8520. Concor: LARC 8520.

LARC 8530 Advanced Interdisciplinary Design and Research 6 (3) Continuation of LARC 8430 with an advanced interdisciplinary project linked to one of the focus areas in the department: health and design, restoration (environmental or cultural/historical), and growth and change. Each student identifies a personal research project related to the larger team project. Prereq: LARC 8430 or consent of instructor. Concor: LARC 8531.

LARC 8531 Advanced Interdisciplinary Design and Research Laboratory 0 (9) Non-credit laboratory to accompany LARC 8530. Concor: LARC 8530.

LARC 8900 Directed Studies 146 (1-6) Special topics and independent research in landscape architecture with faculty guidance. May be repeated for a maximum of six credits. Prereq: Consent of advisor. LARC 8910 Thesis Project 6 (16) Complex and sophisticated independent project in landscape architectural research and/or advanced design. Prereq: LARC 8430 or consent of instructor.

LAW 6200 International Business Law 3 (3) Intensive examination of the historical background of modern public and private international law; selected issues of public international law—human rights, law of war, United Nations’ system, and international litigation; selected issues of private international law—international sales, international trade, and formation and operation of multinational businesses. Prereq: LAW 3220 or consent of instructor.

LAW 8480 Law for Real Estate Professionals 3 (3) Provides the real estate professional with the fundamentals of law as it applies in the real estate arena. Explores the various legal forms of ownership, the form and process of real estate transactions, and governmental regulation of land use. Undergraduate students may obtain consent of instructor to enroll in this course.

LAW 8500 Law for Professional Accountants 3 (3) Preparation for professional exams and responsibilities in managerial positions. Topics include professional and legal responsibilities of accountants, business organizations, commercial law, government regulation of business and property. Case studies, problems and student papers are utilized. Prereq: LAW 3220.

BUSINESS ADMINISTRATION

MBA 8030 Statistical Analysis of Business Operations 3 (3) Application of modern statistical inference in business operations. Topics include testing statistical hypotheses, consequences of making decisions with incomplete information, univariate and multivariate regression with emphasis on business applications and design of experiments and analysis of variance. Special attention is given to efficient and relevant data collection and interpretation.

MBA 8050 Enterprise, Government and the Public 3 (3) Regulatory environment of business and how it evolves. Through use of economic logic and business case studies, students are equipped to understand the application, nature and importance of government regulation in the economy.

MBA 8060 Operations Management 3 (3) How firms create value and how decisions in the areas of capacity, facilities, technology, vertical integration, workforce, quality, production planning/materials control, and organization influence a firm’s ability to add value to its firm; and decision and analysis tools used for these decisions.

MBA 8070 Financial Management 3 (3) Theory of financial management as it relates to the financial problems faced by business concerns. Concepts developed are used to assess the validity of emerging formalized techniques for improving decision making in the financial area. Topics include financial planning, short- and long-term fund raising, capital budgeting, the administration of working capital, recapitalization, listing of securities and reorganization. Case material and problems are used. Prereq: MBA 8190 or consent of instructor.

MBA 8090 Organizational Behavior and Human Resources Management 3 (3) Theories and models of behavior; human resources management concepts and processes as they apply to managing individual and group behavior in organizations. Organizational behavior topics include leadership, motivation and teamwork. Human resource management topics include human resources strategy, selection, performance evaluation, reward systems and employee development.

MBA 8110 International Business Management 3 (3) Survey and analysis of managerial theory and the practice of international business, including the influence of cultural, economic, political and financial factors affecting the management of the firm. Case studies of companies engaged in international business are discussed.

MBA 8120 Financial Markets and Institutions 3 (3) Topics critical to the proper management of financial institutions including financial regulations, financial security types and their yields, interest rate theories, interest rate risk management, foreign currency risk management, stock index futures and numerous operating functions in banking. Prereq: MBA 8070 or consent of instructor.

MBA 8140 Directed Research in Quantitative Analysis 3 (3) Directed Research in Quantitative Analysis

MBA 8150 Directed Research in Qualitative Analysis 3 (3) Directed Research in Qualitative Analysis

MBA 8170 Business Forecasting Techniques and Applications 3 (3) Study of forecasting techniques and their application for developing and assessing forecasts. Topics include economic data sources, multiple regression and time series analysis, and interpretation of forecasts for management and other clients. Prereq: MBA 8020 and MBA 8030.

MBA 8190 Introduction to Accounting and Finance 3 (3) Basic concepts of accounting and finance with emphasis on using financial data for decision making; measuring, processing, reporting and analysis of financial information; use of discounted cash flow analysis in valuation and the measurement of risk and return. Designed for MBA students lacking background in accounting and finance. Prereq: Consent of MBA director.

MBA 8200 Globalization and Macro Markets 3 (3) Operation of international markets, factors that determine exchange rates and influence trade, role of government and non-government organizations on economic outcomes, structural financial products to reduce international business risk. Prereq: Consent of instructor.

MBA 8260 Business Marketing 3 (3) Strategic marketing as it applies to industrial, organizational and institutional markets; consumer marketing versus business-to-business marketing; current business marketing literature and practices. Prereq: Coursework in principles of marketing or equivalent or consent of instructor.

MBA 8280 Services Marketing 3 (3) Nature of services marketing and the special requisites that distinguish successful services marketing from goods marketing. Topics include promoting and making the service tangible, designing optimal service operations, the ideal service worker, pricing of services and critical points of services delivery. Prereq: Coursework in principles of marketing or equivalent or consent of instructor.
MBA 8290 Marketing Foundations 2 (2) Principles and concepts involved in planning, pricing, promoting and distributing goods and services. Prereq: Consent of MBA director.

MBA 8310 Communications and Sales 2 (2) Students learn the principles of effective business communication, with a focus on delivering presentations and persuasive business pitches. Entrepreneurs will also learn how to adapt a message to a variety of audiences, including investors, employees and customers.

MBA 8320 International Financial Management 3 (3) Factors that influence the financial management of multinational corporations. Topics include international parity conditions, currency exposure management, capital budgeting of international projects and political risks. Prereq: MBA 8070 or MBA 8570; or consent of instructor.

MBA 8330 Real Estate Investments 3 (3) Study of real estate investment analysis and decision making featuring the use of the discounted cash flow model and other tools to evaluate investment alternatives from the perspective of an equity real estate investor. Emphasizes market analysis, ownership alternatives and financing considerations. Prereq: FIN 8360 or MBA 8360.

MBA 8340 Business Plan Capstone 3 (3) Students finalize business plans and deliver presentations to a group of business leaders.

MBA 8350 Investment Management 3 (3) Discusses current techniques and strategies in the analysis of various investment alternatives. Includes portfolio management with an introduction to options and futures markets. Students are expected to have completed coursework in principles of accounting and to have demonstrated proficiency in basic finance before enrolling in this course.

MBA 8360 Real Estate Principles 3 (3) Advanced survey course to acquaint students with the theories, practices and principles of real estate. Topics include urban economics, real estate law, brokerage, real estate finance, real estate valuation, financial institutions, tax issues, investment analysis, and development. Prereq: MBA 8070 or MBA 8190; or consent of instructor.

MBA 8370 Legal Environment of Business 2 (2) Legal and case analysis of court systems and dispute resolution, contracts, business torts, EEOC, Age Discrimination in Employment Act, Americans with Disabilities Act, Employment-at-Will compared to union participation; international legal considerations as these topics relate to business concerns. May not be used for credit toward a graduate degree. Prereq: Consent of MBA director.

MBA 8390 Business Negotiations and Legal Dispute Resolution 3 (3) Negotiation and dispute resolution in the business environment. Negotiation techniques and practices, negotiation team building, international negotiation issues, as well as alternative dispute resolutions as applied to legal issues within the business environment. Prereq: MBA 8370 and MBA 8380; or consent of instructor.

MBA 8400 Entrepreneurship and Venture Management 2 (2) Students are prepared for the challenges of managing human resources and organizational behavior at a new business venture. Students learn about the psychological drivers of employee behavior and understand how to manage employees in a startup business environment.

MBA 8410 Real Estate Finance 3 (3) The application of financial analysis and theory to real estate, mortgage credit analysis and current financing techniques for residential and commercial properties is emphasized. Topics include financial institutions, mortgage financing techniques, financial decisions and construction financing. Prereq: FIN 8360 or MBA 8360.

MBA 8420 Real Estate Valuation 3 (3) Study of real estate appraisal with primary emphasis on two student projects: a house appraisal and a commercial property appraisal. Topics include highest and best use analysis, the three approaches to value, advanced capitalization techniques, discounted cash flow analysis and the standards of professional practice. Prereq: FIN 8360 or MBA 8360.

MBA 8430 Entrepreneurial Accounting 2 (2) Introduction to basic accounting principles. Students learn to analyze financial statements, understand GAAP, and comprehend double-entry bookkeeping from the perspective of a manager of a new business venture.

MBA 8440 Entrepreneurial Law 1 (1) Exposes students to issues ranging from registering a business to protecting intellectual property. Students learn about the fundamental concepts of business law relating to tort law, contract law, liability law and business taxation.

MBA 8450 Technology and Innovation Management 3 (3) Interdisciplinary examination of problems and issues in integrating technology and innovation into processes and products; evaluating tangible and intangible aspects of new technology adoption; management research and development; and functional integration of marketing and operations.

MBA 8460 Use of Derivatives in Financial Engineering 3 (3) The valuation and use of basic derivative securities such as futures and options; the financial engineering of securities combinations such as swaps, spreads and straddles; applications of derivatives and financial engineering in managing financial risks. Prereq: MBA 8070 or MBA 8670; or consent of instructor.

MBA 8470 New Venture Creation 2 (2) Students set up a new venture, build networks and create a business plan while learning how to identify and exploit opportunities.

MBA 8480 Entrepreneurial Marketing and Digital Strategies 3 (3) Students learn basic marketing principles and digital strategies, including Web optimization and social media strategies. Entrepreneurs also learn about electronic commerce and the economics of digital business.

MBA 8490 Entrepreneurial Strategy 3 (3) Emphasis on decision making, strategic analysis and planning in business organizations with emphasis on the strategies employed by companies in a variety of industries. By extension, entrepreneurs utilize strategic frameworks to understand the external and internal forces that will impact their own venture.

MBA 8500 Business Communications 1 (1) Techniques, skills, problems and approaches for effective business communications. Strengths and weaknesses of various communications forms and their concentration on informative and persuasive models. Includes practical experience in written work and presentations, video and verbal feedback, teamwork, problem solving and situational presentations. To be taken Pass/No Pass only. Prereq: Consent of MBA director.

MBA 8510 Business Operations and Logistics 1 (1) Students learn the fundamentals of operations strategy to achieve efficient organizational performance and effective use of resources in their new business ventures.

MBA 8520 Social Entrepreneurship 1 (1) Study of sustainability, hybrid entrepreneurship principles and the role of start-up companies as social ventures.

MBA 8540 Managerial Accounting 3 (3) Study of accounting information for planning and control in business and non-business organizations. Includes profit planning, budgeting and standards; product and segment costing and evaluation; and case studies and computer-based assignments. Prereq: MBA 8190 or consent of instructor.

MBA 8590 Managerial Decision Modeling 3 (3) Survey of decision modeling techniques useful in managerial decision making, including linear programming, project management, queuing models, transportation problems and Monte Carlo simulation. Prereq: Consent of MBA director.

MBA 8600 Advanced Marketing Strategy 3 (3) Advanced marketing theory and critical thinking skills applied to support strategic decision making. Data analysis and advanced marketing models are employed with emphasis on building analytic and assessment skills. Prereq: MBA 8290; or consent of instructor.

MBA 8610 Information Systems 3 (3) The critical role of information systems in contemporary business organizations; key information systems and technologies; their impacts both within and across organizational settings.

MBA 8620 Managerial Economics 3 (3) Use of economic analysis in managerial decision making. Topics include the theory of cost, production, industrial organization, coordination and control of the firm, from theoretical concepts to actual decision making. Prereq: Consent of MBA director.

MBA 8630 Advanced Managerial Economics 3 (3) Advanced economic analysis for managerial decision making. Topics include advanced price theory, theory of firm, internal organization of the firm, the economics of strategic behavior in the market and the empirical estimation of demand and cost functions. Prereq: MBA 8620 or consent of instructor.

MBA 8700 Strategic Management 3 (3) Investigation of the ongoing process of positioning a firm for competitive advantage in its changing business environment focusing on the role of general managers in formulating and implementing strategies for single and multibusiness firms. Business cases, class discussions and group projects are used to integrate content from previous business courses. Offered spring semester and summer session only. Prereq: MBA 8070; MBA 8600.
MBA 8710 Programming and System Development 3 (3) Programming concepts and structures in developing information systems applications. Specific techniques and tools covered are updated to incorporate the newest technologies. Preq: Consent of instructor.

MBA 8720 Entrepreneurial Finance 3 (3) Topics include business valuation, financial forecasting, financing strategies and business harvesting. Includes case studies and computer modeling. Preq: ECON 8550 or MBA 8720.

MBA 8740 Managing Continuous Improvement 3 (3) How to initiate and lead change toward a total quality environment; basic tools of quality management; use of teams to achieve change; quality function deployment; ISO 9000; supplier development; and use of survey methods to track progress of change. Preq: MGT 8030 or consent of instructor.

MBA 8750 Enterprise Development 3 (3) Studies the entrepreneurial process from conception to birth of new venture emphasizing discovery, searching for opportunities and gathering resources to convert opportunities to businesses. Students learn how to evaluate entrepreneurs and their plans by working in teams to write a business plan for a new venture.

MBA 8760 Sustainable Business Practices 3 (3) Examination of emerging field of sustainable business practices and its role in strategy development and implementation. Specific emphasis is on history, science and politics of sustainability, including its effects on production, consumption and environmental impact. Preq: Consent of instructor.

MBA 8800 MBA Seminar I-3 (1-3) Presents various topics, such as professional development for MBA students, project research methods for graduate research assistants, and other special topics. To be taken Pass/No Pass only. May be repeated for a maximum of four credits. Preq: Consent of instructor.

MBA 8810 Seminar on Ethics and Leadership 1 (1) Exposes MBA students to various ethical, leadership and management issues from a single functional area or may integrate disciplines in transient conduction, flow of fluids, energy exchange by radiation, and mass transfer. Applications in heat-exchanger design with emphasis on economics and variation of operating conditions from the design point. Preq: ME 3040 or consent of instructor.

ME 6170 Mechatronics System Design 3 (2) Mechatronics integrates control, sensors, actuators, and computers to create a variety of electromechanical products. Includes concepts of design, appropriate dynamic system modeling, analysis, sensors, actuating devices, and real time microprocessor interfacing and control. Laboratory experiments, simulation, and design projects are used to exemplify the course concepts. Preq: ME 3050 or consent of instructor. Coreq: ME 6171.

ME 6171 Mechatronics System Design Laboratory 0 (3) Non-credit laboratory to accompany ME 6170. Coreq: ME 6170.

ME 6200 Energy Sources and Their Utilization 3 (3) Covers availability and use of energy sources such as fossil fuels, solar (direct and indirect), and nuclear; addresses energy density and constraints to use (technical and economic) for each source. Preq: ME 3030 and ME 3040, or consent of instructor.

ME 6210 Introduction to Compressible Flow 3 (3) Introduction to concepts to compressible flow; methods of treating one-dimensional gas dynamics including flow in nozzles and diffusers, normal shocks, moving and oblique shocks, Prandtl-Meyer Flow, Fanin Flow, Rayleigh Flow, and reaction propulsion systems. Preq: ME 3060 and ME 3080, or consent of instructor.

ME 6220 Design of Gas Turbines 3 (3) Guiding principles in gas turbine cycles are reviewed. Turbine and compressor design procedures and performance prediction for both axial and radial flow machines are presented. Methods of design of rotating heat exchangers and retrofitting gas turbine for regenerative operation are presented. Design projects are used to illustrate the procedures. Preq: ME 3080 or consent of instructor.

ME 6230 Introduction to Aerodynamics 3 (3) Basic theories of aerodynamics are presented for the purpose of accurately predicting the aerodynamic forces and moments which act on a vehicle in flight. Preq: ME 3080 or consent of instructor.

ME 6260 Nuclear Energy 3 (3) Engineering methods and science principles are considered for the design of components to nuclear power stations. A systems level understanding is emphasized. Includes nuclear fuel cycle and regulatory considerations. Preq: ME 3030 and ME 3040, or consent of instructor.

ME 6290 Thermal Environmental Control 3 (3) Mechanical vapor compression refrigeration cycles, refrigerants, thermo-electrical cooling systems, cryogenics, thermodynamic properties of air, psychometric charts, heating and cooling coils, solar radiation, heating and cooling loads, insulation systems. Preq: ME 3030 and ME 3080, or consent of instructor.

ME 6300 Mechanics of Composite Materials 3 (3) Develops fundamental relationships for predicting the mechanical and thermal response of multi-layered materials and structures. Develops micro-mechanical and macromechanical relationships for laminated materials emphasizing continuous filament composites. Discusses the unique nature of composites and the advantages of designing with composites. Preq: ME 3020 or consent of instructor.

ME 6320 Advanced Strength of Materials 3 (3) Topics in strength of materials not covered in ME 3020. Three-dimensional stress and strain transformations, theories of failure, shear center, unsymmetrical bending, curved beams, and energy methods. Other topics such as stress concentrations and fatigue concepts are treated as time permits. Preq: ME 3020 or consent of instructor.

ME 6530 Dynamic Performance of Vehicles 3 (3) Introduces techniques for analyzing the dynamic behavior of vehicles. Types of vehicles to be considered are chosen from aircraft, surface ships, automobiles and trucks, railway vehicles, and magnetically levitated vehicles. Preq: ME 3050 or consent of instructor.

ME 6540 Design of Machine Elements 3 (3) Design of common machine elements including clutches, brakes, bearings, springs, and gears. Optimization techniques and numerical methods are employed as appropriate. Preq: ME 3060 or consent of instructor.

ME 6550 Design for Manufacturing 3 (3) Concepts of product and process design for automated manufacturing are considered. Topics include product design for automated manufacturing, inspection and assembly, using automation, industrial robots, knowledge-based systems and concepts of flexible product manufacture. Preq: ME 3060 or consent of instructor. Preq or concurrent enrollment: ME 3120 or consent of instructor.

ME 6710 Computer-Aided Engineering Analysis and Design 3 (2) Students are exposed to geometric and solid modeling, finite elements, optimization, and rapid-prototyping. Students design an artifact, represent it on the computer, analyze it using FEA, then optimize before prototyping it. Emphasizes the use of computer-based tools for engineering design. Preq: ENGR 3410 and ME 2020, or consent of instructor. Coreq: ME 6711.

ME 6711 Computer-Aided Engineering Analysis and Design Laboratory 0 (3) Non-credit laboratory to accompany ME 6710. Coreq: ME 6710.

ME 6930 Selected Topics in Mechanical Engineering 1-6 (1-6) Study of topics not found in other courses. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

ME 8010 Foundations of Fluid Mechanics 3 (3) Derivations of basic equations for multidimensional flow fields; analytical techniques for solving problems in laminar viscous flow and laminar incompressible flow; theories of similarity. Preq: Consent of instructor.

ME 8100 Macroscopic Thermodynamics 3 (3) First, second and third laws of thermodynamics with engineering applications; thermodynamic property relations; chemical equilibrium. Preq: ME 3120.
ME 8110 Gas Dynamics 3 (3) Concepts from thermodynamics, one-dimensional gas dynamics, one-dimensional wave motion, normal and oblique shocks; flow in ducts and wind tunnels; two-dimensional equation of motion; small perturbation theory. Preq: Students are expected to have completed an undergraduate course in fluid mechanics before enrolling in this course.

ME 8120 Experimental Methods in Thermal Science 3 (2) Theories of measurements, instrumentation and techniques for measuring temperature, pressure and velocity on a practical graduate engineering level; mathematical presentation of data, uncertainty analysis, data acquisition techniques, and theory and state-of-the-art measuring systems. Conreq: ME 8121.

ME 8121 Experimental Methods in Thermal Science Laboratory 0 (2) Non-credit laboratory to accompany ME 8120. Conreq: ME 8120.

ME 8140 Concepts of Turbulent Flow 3 (3) Concepts of fluid turbulence; turbulent transport mechanisms, dynamics of turbulence and experimental techniques pertinent to existing theories; classification of shear flows and their prediction methods. Preq: ME 8010; or consent of instructor.

ME 8150 Statistical Thermodynamics I 3 (3) Fundamental principles of kinetic theory and quantum statistical mechanics; Boltzmann statistics, Fermi-Dirac statistics and Bose-Einstein statistics. Students are expected to have completed a course in thermodynamics or obtained consent of instructor before enrolling in this course. May also be offered as PHYS 8150.

ME 8180 Introduction to Finite Element Analysis 3 (3) Introduction to the finite element method; applications to heat transfer, fluid flow and solids; introduction to transient analysis; analysis strategies using finite elements; introduction to solid modeling, finite element modeling and analysis using commercial codes. Preq: Students are expected to have completed a numerical methods course or obtained consent of instructor before enrolling in this course.

ME 8190 Computational Methods in Thermal Sciences 3 (3) Numerical techniques as applied to the solution of fluid flow and heat transfer problems; use of finite difference methods.

ME 8200 Modern Control Engineering 3 (3) State-space approach to analysis of linear dynamic systems and control design; state-space representation, key topics in linear algebra and vector spaces, principles of controllability, observability, stability and performance specification; trade-offs between state variable and transfer function techniques. Observer designs, pole placement and optimal control theory; LQR and Kalman filtering. Preq: ME 8230 or consent of instructor. Students who have not completed ME 8230 but have completed an undergraduate controls course should request a registration override from the instructor.

ME 8210 Advanced Control Engineering 3 (3) Reviews topics from modern control engineering, characteristics of nonlinear systems. Phase Plane and Describing-Function techniques. Lyapunov theory and stability analysis; nonlinear feedback control systems using Lyapunov method. Advanced topics, variable structure system control, adaptive control and system analysis and design, robust adaptive control, optimal control and digital control. Preq: ME 8200 or consent of instructor. Students who have not completed ME 8200 but have completed a graduate-level course in modern control should request a registration override from the instructor.

ME 8230 Control Systems Engineering 3 (3) Physical modeling, mathematical analysis and feedback principles for control of multidisciplinary dynamic systems, including mechanical, electrical, electro-mechanical, hydraulic and pneumatic systems. Transient response, root locus and frequency response principles applied to control of complex dynamic systems. Sensors, actuators and dynamic plant integration to develop, model, control and analyze dynamics systems. Students are expected to have completed an undergraduate course on systems dynamics or obtained consent of instructor before enrolling in this course.

ME 8290 Energy Methods and Variational Principles 3 (3) Application of variational principles in solid mechanics problems; virtual work; Cauchy’s theorems on deflection and rotation; stationary potential energy and energy stability criterion; Hamilton’s principle. Preq: ME 8170 or consent of instructor.

ME 8300 Conduction and Radiation Heat Transfer 3 (3) Fundamental concepts related to conduction and radiation heat transfer; analytical methods for steady and transient conduction heat transfer in one and two physical dimensions; radiation exchange between surfaces with and without radiatively participating media; combined conduction and radiation heat transfer. Preq: ME 3040; or consent of instructor.

ME 8370 Convective Heat Transfer 3 (3) Derivation of continuity, momentum, and energy equations for boundary layer flow; solutions for confined and external flow regimes in laminar and turbulent flow. Preq: ME 3040 and MTHS 2080.

ME 8320 Radiative Heat Transfer 3 (3) Radiation properties; enclosure theory; radiation exchange between solid bodies; radiation exchange in the presence of absorbing, transmitting and emitting media; combined radiation, conduction and convection exchange. Preq: ME 3040 or consent of instructor.

ME 8330 Heat Transfer with Change of Phase 3 (3) Nucleate boiling in a pool; film boiling in a pool; forced nucleate boiling; forced film boiling; effect of impurities on boiling phenomena; dropwise condensation; filmwise condensation; effect of noncondensable gases on condensation; boiling and condensing processes in systems. Preq: ME 3040 or consent of instructor.

ME 8340 Principles of Structural Stability 3 (3) Practical criteria for analysis of conservative and nonconservative systems’ stability; methods of adjacent equilibrium, initial imperfections, total potential energy and vibration as applied to practical problems. Preq: ME 8370.

ME 8360 Fracture Mechanics 3 (3) Fundamental elasticity-based course in the development of the basic concepts of engineering fracture mechanics; the Griffith criterion, Barrenblatt and Dugdale models, linear elastic fracture mechanics (L.E.F.M.), plane strain fracture toughness, the crack-tip stress and strain field, and plasticity and the J-integral. Preq: ME 8370.

ME 8370 Theory of Elasticity I 3 (3) Theory of stress and deformation for continuous media; linear stress-strain relations for elastic material; two-dimensional problems including Airy stress function, polynomial solutions, plane stress and plane strain in rectangular and polar coordinates, torsion and bending of prismatic bars and thermal stresses. Preq: ME 3020; or consent of instructor.

ME 8380 Theory of Elasticity II 3 (3) Continuation of ME 8370, including topics from either three-dimensional problems associated with an infinite elastic medium, elastic half-space, contact stresses, symmetrically loaded sphere and circular cylinder, or complex variable methods in plane elasticity, stress concentrations problems, singular stresses in fracture, and composite materials. Preq: ME 8370 and PHYS 8120.

ME 8430 Advanced Dynamics 3 (3) Concepts in nonlinear dynamic systems with emphasis to mechanical systems. Classification, stability and bifurcations of equilibrium solutions. Analytical construction, stability and bifurcations of periodic solutions. Floquet theory, Poincare maps. Quasi-periodic solutions, Lyapunov exponents and routes to chaos. Perturbation and asymptotic methods for approximate analytical solutions of weakly nonlinear systems. Preq: ME 8460 or consent of instructor. Students who have not completed ME 8460 but have completed undergraduate courses in dynamics and differential equations should request a registration override from the instructor.

ME 8450 Structural Vibrations 3 (3) Vibrations of lumped-parameter systems; free and forced vibrations of SDOF and MDOF systems, general eigenvalue problem and modal analysis. Variational approach and energy methods. Vibrations of distributed-parameter systems; strings, bars, shafts, beams, membranes and plates. Approximate methods; Rayleigh’s Quotient, Rayleigh-Ritz methods, method of functions expansion, Galerkin’s and assumed mode methods. Preq: ME 8460 or consent of instructor. Students who have not completed ME 8460 but have completed an undergraduate course in vibration or in dynamics and differential equations, should request a registration override from the instructor.

ME 8460 Intermediate Dynamics 3 (3) Kinematics and dynamics of particles, rigid and elastic bodies using vectorial and analytical approaches. Fundamentals of analytical dynamics; holonomic versus nonholonomic constraints, virtual displacements and work, Hamilton’s Principle and Euler-Lagrange’s equations. Rigid-body dynamics; principal axes and Euler angles. Kinematics and dynamics of elastic bodies. Students who have not completed ME 3050 but have completed undergraduate courses in dynamics and differential equations should request a registration override from the instructor.
ME 8520 Advanced Finite Element Analysis 3 (3) Application of variational and weighted residuals methods; nonlinear analysis, steady-state and time-dependent problems; application of commercial finite element codes; advanced computational procedures. Prereq: CE 8080 or consent of instructor.

ME 8590 Intelligent Robotic Systems 3 (3) Integration and fusion of data from multiple sensors on multiple robots; intelligent decision making on motion planning and execution based on sensed data involving mutual compliance; simultaneous force and position controls using computers. Prereq: ECE 8550.

ME 8610 Materials Selection in Engineering Design 3 (3) Advanced study of various physical, chemical and mechanical materials properties which govern the selection of materials in engineering design. Case studies of materials selection in design with metals, ceramics, polymers and composites are presented.

ME 8700 Advanced Design Methodologies 3 (3) Nurturing of creativity; decision-making processes for design; in-depth study of the mechanical design process and tools; quality function deployment, concurrent design, systemic design, robust design, design for assembly and axiomatic design.

ME 8710 Engineering Optimization 3 (3) Optimization in the context of engineering design; nonlinear and linear, static and dynamic, constrained and unconstrained formulation and solution of practical problems; structural optimization; multiobjective optimization; genetic algorithms; simulated annealing.

ME 8720 Design Automation for Mechanical Engineers 3 (3) Students are exposed to data structures, search algorithms, geometric algorithms, geometric modelling, and software engineering for mechanical engineers. Students design and implement mechanical CAD software packages. Emphasizes the use of software development tools, algorithm design, and their interfaces in mechanical engineering. Students are expected to have programming experience before enrolling in this course. Those with no programming experience may request consent of instructor.

ME 8730 Research Methods in Collaborative Design 3 (3) Topics include research methods for studying collaborative design, influencing factor of collaboration, computer issues in collaboration, and mechanical engineering as facilitated by collaboration. Technical writing and experimentation are emphasized.

ME 8740 Integration Through Optimization 3 (3) Theory, methodology and applications of decomposition, integration and coordination for large-scale or complex optimization problems encountered in engineering design. Topics include conventional and non-conventional engineering optimization algorithms, analysis models and methods, multidisciplinary optimization, analytic target cascading, multisite optimization, and multicriteria optimization. Case studies are included. May also be offered as MTHS 8740. Prereq: MTHS 8100 or MTHS 8600 or ME 8710.

ME 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

ME 8930 Selected Topics in Mechanical Engineering 1-6 (1-6) Topics not covered in other courses. May be repeated for credit.

ME 9300 Advanced Topics in Heat Transfer 1-6 (1-6) Topics not covered in other courses. May be repeated for a maximum of six credits.

ME 9310 Advanced Topics in Fluid Mechanics 3 (3) Topics not covered in other courses. May be repeated for a maximum of six credits.

ME 9320 Advanced Topics in Thermodynamics 3 (3) Topics not covered in other courses. May be repeated for a maximum of six credits.

ME 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

MANAGEMENT

MGT 8030 Operations Management 3 (3) Introduction to a broad range of operations management topics. Serves as a foundation for understanding the importance, relevance and significance of analytical models and tools to be introduced in subsequent courses in the MS in Management program. Topics include operations strategy, process and facility design, planning and control, quality management, and continuous improvement. Offered fall semester only.

MGT 8040 Operations Strategy 3 (3) In-depth study; through case studies and readings, of the role operations systems capabilities play in providing sources of competitive advantage. Topics include industry analysis, technological forecasting, formulation of organization and operations strategies, and development of operations systems capabilities. Offered fall semester only. Prereq: MGT 8030 or consent of instructor.

MGT 8060 Industrial Management Internship 0-12 Faculty-approved internship to give MS in Management students on-the-job learning in support of classroom education. Internships must be at least six, full-time, consecutive weeks with the same internship provider. May be repeated. Prereq: Consent of graduate coordinator.

MGT 8070 Comparative Management Theory 3 (3) Evolution of management theory, up to and including contemporary theories; comprehensive review of the major schools of management thought, with emphasis on the area of organization theory and design.

MGT 8080 Manufacturing Planning and Control Systems 3 (3) Important components of a manufacturing planning and control system emphasizing the integration of planning and control functions in a dynamic manufacturing environment; extensive hands-on work with integrated manufacturing software. Offered spring semester only. Prereq: MGT 8030 or consent of instructor.

MGT 8090 Organizational Behavior and Human Resources Management 3 (3) Theories and models of behavior; human resources management concepts and processes as they apply to managing individual and workgroup behavior in organizations. Organizational behavior topics include leadership, motivation and teamwork. Human resource management topics include human resources strategy, selection, performance evaluation, reward systems and employee development.

MGT 8120 Supply Chain Management 3 (3) In-depth study, through case studies and readings, of methodologies for designing and managing integrated, international supply chain networks. Topics include supply network design, distribution strategy, strategic alliances, inventory management, coordinated product and network design, and information systems for supply chain. Offered fall semester only. Prereq: Consent of instructor.

MGT 8150 Personnel Management 3 (3) Personnel management activities including recruitment, selection, training and development, performance appraisal, discipline, grievance handling, wage and salary administration, and employee benefit programs.

MGT 8190 Web-Based Information Systems for Supply Chain Management 3 (2) Examines system architectures, technologies, approaches and infrastructure requirements for supply-chain information systems. Students learn to design, develop and implement systems that facilitate collaboration of an enterprise with its buyers and suppliers. Prereq: MGT 8120 and MGT 8180; or consent of instructor. Coreq: MGT 8191.

MGT 8191 Web-Based Information Systems for Supply Chain Management Laboratory 0 (1) Non-credit laboratory to accompany MGT 8190. Coreq: MGT 8190.

MGT 8200 Service Operations Management 3 (3) Concepts and techniques of service operating system design and management. Topics include characteristics of services, service system performance measurement, queuing and automation, planning and control in different service environments, and international service operations. Prereq: MGT 8030 or consent of instructor.

MGT 8210 Lean Operations 3 (3) Examines uses of the scientific method, the Toyota Production System and the application of the appropriate tools and methods to design both service and production operations. Development of systems that promote lean operations is emphasized. Prereq: MBA 8060 or MBA 8560 or MGT 8030 or consent of instructor.

MGT 8220 International Operations Management 3 (3) Operations management within an international business environment. Topics include the regulatory and cultural environment of international business, international business and operations strategies, global location, global sourcing and logistics decisions, international workforce management, technology transfer and configuration, and coordination of global operations activities. Prereq: MGT 8030 or consent of instructor.

MGT 8230 Management Systems Analysis 3 (3) Design, construction and analysis of stochastic simulation models for typical management decisions; design; input-output; variance reduction; applications; validation; implementation; optimum seeking techniques; designed experiments; effect of model results on managerial policy decisions.
MGT 8240 Service Strategy: Design for Customer Experience 3 (3) Multi-disciplinary approach to service design, considering the roles of customers and employees in creating experiences. Includes principles, frameworks and paradigms describing services design and management necessary to achieving a distinctive competitive advantage. Emphasizes development and execution of strategies that link operations and marketing. Preq: MBA 8560 consent of instructor.

MGT 8290 Management of E-Commerce Project 3 (3) Concepts of electronic commerce as facilitated by the Internet and related technologies. Topics include the catalysts for e-commerce (both B2B and B2C), technological challenges, legal and regulatory framework, behavior and educational challenges, and strategies for e-commerce. Preq: Consent of instructor.

MGT 8330 E-Commerce Project 3 (9) Application of e-commerce knowledge to a significant problem or opportunity. Preq: Submission of a written proposal and consent of instructor.

MGT 8450 Technology and Innovation Management 3 (3) Interdisciplinary examination of problems and issues in integrating technology and innovation into processes and products; evaluating tangible and intangible aspects of new technology adoption; management research and development; and functional integration of marketing and operations.

MGT 8500 Business Decision Models 3 (3) Fundamentals of management science modeling techniques emphasizing problem formulation, computer solution and economic analysis in an operations context; queuing analysis, computer simulation and mathematical programming approaches including linear, goal and integer programming. Application areas encompass production, capacity, and project planning, scheduling, location, layout and logistics. Preq: Consent of instructor.

MGT 8520 Management Science II 3 (3) Computation of MGT 8500; dynamic, integer and nonlinear programming emphasizing applications of different types of mathematical programming to business and industrial problems. Preq: MGT 8500 or consent of instructor.

MGT 8540 Design of Experiments in Business and Management 3 (3) Design and analysis of experiments with a focus on business and industrial applications. Topics range from the analysis of single-factor experimental designs through factorial experiments, multiple comparisons and confounding. Problems arising in the actual industrial environments are used to illustrate the application of the techniques and to introduce the student to major statistical software packages for the analysis of experimental data. Offered fall semester only.

MGT 8560 Business Fundamentals for Supply Chain Management 3 (3) Principles and techniques of leadership, human resources management, financial management, marketing and economic analysis, particularly as they relate to the capital projects supply chain management. Preq: Enrollment in Master of Engineering Program in Industrial Engineering.

MGT 8610 Information Systems 3 (3) The critical role of information systems in contemporary business organizations; key information systems and technologies; their impacts both within and across organizational settings.

MGT 8660 System Analysis and Design 3 (2) Software engineering methods and techniques specific to analysis and design of information systems. Topics include concepts and methods for valuation of IT applications, data gathering, and process, data and object-oriented modeling analysis and design. Coreq: MGT 8661.

MGT 8661 System Analysis and Design Laboratory 0 (1) Non-credit laboratory to accompany MGT 8660. Coreq: MGT 8660.

MGT 8690 Project Management 3 (3) In-depth study, through case studies, readings and hands-on experience, of processes and techniques to initiate, plan, execute, control and close-out information technology projects. Topics include project integration, scope, time, cost, quality, human resource communications, risk and procurement management. Preq: Consent of instructor.

MGT 8740 Managing Continuous Improvement 3 (3) How to initiate and lead change toward a total quality environment; basic tools of quality management; use of teams to achieve change; quality function deployment; ISO 9000; supplier development; and use of survey methods to track progress of change. Preq: MGT 8030 or consent of instructor.

MGT 8850 Industrial Scheduling 3 (3) Theoretical results for single and parallel machine, flow shop, job shop and network scheduling; treatment of mathematical programming applications, scheduling algorithm design and search procedures. Preq: One of the following: CE 8350 or CPSC 8400 or ECON 8120 or MBA 8500 or MTHS 8120 or MTHS 8140, and consent of instructor.

MGT 8880 International Perspectives in Industrial Management 4-16 (4) International perspective to industrial management via organized plant visitations to businesses in a foreign country and lectures beyond discussions, with senior operations managers. Cultural visits and lectures are also organized to provide a holistic perspective to cover cultural and economic development of the host country. May be repeated for a maximum of six credits. Preq: Consent of instructor.

MGT 8910 Master's Thesis Research 1-12 (1-12) Master’s Thesis Research

MGT 8920 Master’s Project Course 3 (9) Field project, the capstone activity in the program, requiring application of the program body of knowledge to a real-world operations management problem. Formal presentation and written report are required. May be repeated for a maximum of 12 credits. To be taken Pass/NO Pass only. Preq: Consent of instructor.

MGT 8990 Selected Topics in Industrial Management 3 (3) Current topics in industrial management theory and/or practice. Topics vary in keeping with developments in the management profession and interests of faculty. May be repeated for a maximum of nine credits.

MGT 9030 Seminar in Manufacturing Planning and Control Systems 3 (3) Current research issues and developments in manufacturing planning and control systems emphasizing research (philosophical, analytical and empirical) dealing with alternative approaches for planning and control of manufacturing operations. Preq: MGT 8080 and consent of instructor.

MGT 9040 Seminar in Current Management Topics 3 (3) Topics from current management literature emphasizing research from scholarly journals. Topics vary in keeping with developments in the literature. May be repeated with different faculty for a maximum of six credits. Preq: MGT 8030 or consent of instructor.

MGT 9050 Research Methods 3 (3) Research methods supporting scholarly research and publication in management. Topics include theory building, hypothesis specification and testing, experimental design, measurement, sampling, research ethics and related issues. Restricted to doctoral students. Preq: MGT 8540.

MGT 9070 Seminar in the Design of Operations Systems 3 (3) Current issues and developments in the evaluation, selection, design and installation of systems for manufacturing and service operations; empirical research dealing with the building blocks of operations such as process technology scanning, selection and installation; operations systems location and layout; and management systems selection and installation. Preq: MGT 8210 and consent of instructor.

MGT 9100 Seminar in Operations Management 1-3 (1-3) New methodological developments, both analytical and philosophical, in operations management; development of theory of management science; converting management theory into practice while considering behavioral and economic aspects of the problem. Preq: Consent of instructor.

MGT 9160 Directed Readings in Management 1-3 (1-3) Directed reading and research in the student’s area of interest. May be repeated for a maximum of three credits. Preq: Consent of instructor.

MGT 9180 Seminar in Management Support Systems 3 (3) Contemporary topics in decision-oriented information systems research; structure of the field, research methodologies and research opportunities. Preq: MGT 8180 or consent of instructor.

MGT 9250 Seminar in Information Systems Foundations 3 (3) Foundations of information systems research including classical framework literature. Research philosophies, key methodologies and relevant theoretical underpinnings are discussed and debated.

MGT 9270 Seminar in Organizational Impacts of Information Systems 3 (3) Current theoretical and empirical research related to the organizational impacts of information systems. Research focuses on strategic and structural impacts of information technologies within and across organizations.

MGT 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research
HEALTH ADMINISTRATION

MHA 7170 Selected Topics in Health Administration 1-3 (1-3) Variable topics are taught to reflect current state-of-the-art issues. May be repeated for a maximum of six credits, but only if different topics are covered.

MHA 7210 Health Care Delivery Systems 3 (3) Overview of the development of the health services delivery system in the United States.

MHA 7240 Health Care Ethics 3 (3) Examination and analysis of the professional standards, laws and political and economic forces that establish a context for health care ethics.

MHA 7320 Outcomes Assessment and Evaluation in Health Services 3 (3) Introduces the general application of evaluative research in a variety of health care settings, administrative purposes of evaluation of organizational components and/or programs and the design and implementation of evaluative efforts.

MHA 7430 Managing with Health Professionals 3 (3) Devoted to learning about clinical professional and exploring ways to facilitate effective and efficient team relationships in the management and delivery of health services.

MHA 8530 Seminar in Health Administration and Leadership 2 (2) Integrates knowledge and skills acquired across all courses in the context of strategic management.

MICROBIOLOGY

MICR 6000 Public Health Microbiology 3 (3) Epidemiology of transmissible diseases including pathogenic characteristics of the infectious organism, modes of transmission, mechanism of infection, diagnostic aids, effective treatments, immunizing procedures, and methods of preventing infection. Students are expected to have completed introductory microbiology before enrolling in this course.

MICR 6010 Microbial Diversity and Ecology 3 (3) In-depth survey of microbial morphology, ecology, and diversity. Study of the interaction and adaptation of microbes in a wide range of environmental conditions, including consideration of their metabolism, nutrition, growth and the use of microbiological assays. Students are expected to have completed coursework in organic chemistry and introductory microbiology before enrolling in this course.

MICR 6020 Environmental Microbiology 3 (3) Discussion of microorganisms in air, terrestrial, and aquatic environments and how they are used for environmental restoration activities. Topics include the nature of biofilms, interactions of microbes with inorganic and organic constituents, processes to implement bioremediation in surface/subsurface environments, and treatment of solid, liquid, and gaseous waste streams. Students are expected to have completed coursework in organic chemistry and introductory microbiology before enrolling in this course.

MICR 6030 Marine Microbiology 3 (2) Discussion of the microbes that inhabit the marine environment, their peculiar physiological traits, and contributions to the ecology of oceans. Students are expected to have completed coursework in organic chemistry and introductory microbiology before enrolling in this course. Coreq: MICR 6031.

MICR 6031 Marine Microbiology Laboratory 0 (3) Non-credit laboratory to accompany MICR 6030. Coreq: MICR 6030.

MICR 6050 Advanced Microbial Ecology of Humans 3 (3) Investigation of the complex ecological relationships between microbes and their human hosts, including investigation of the normal microbial community in various body systems, factors that change the microbiota, and the role of the microbiota in normal development, health and disease of the host. Students are expected to have completed coursework in introductory microbiology before enrolling in this course.

MICR 6070 Food and Dairy Microbiology 4 (3) Physical-chemical factors limiting survival and growth of microorganisms during processing and manufacturing of food and dairy products. Standard methods for enumerating and identifying indicator bacteria, yeasts, molds, and microbes producing food and food-borne illness. Starter cultures, fungal toxins, microbial cell injury and standards for food and dairy products. Students are expected to have completed coursework in microbiology and organic chemistry before enrolling in this course. Coreq: MICR 6071.

MICR 6071 Food and Dairy Microbiology Laboratory 0 (3) Non-credit laboratory to accompany MICR 6070. Coreq: MICR 6070.

MICR 6100 Soil Microbiology 3 (3) Role of microorganisms in the decomposition of organic substances, transformation of nitrogen and mineral substances in the soil; interrelationships between higher plants and microorganisms; importance of microorganisms in soil fertility. Students are expected to have completed coursework in introductory microbiology before enrolling in this course.

MICR 6110 Pathogenic Bacteriology 3 (3) Study of pathogenic bacteria and their virulence mechanisms. Emphasizes host-microbe interactions, responses to infection and treatment, and research strategies for various topics of bacterial pathogenesis. Students are expected to have completed coursework in microbiology and immunology before enrolling in this course.

MICR 6120 Bacterial Physiology 3 (3) Consideration of the cytology, physiology, metabolism, and genetics of bacteria. Includes studies of growth and death, reproduction and mutation, nutrition and metabolic pathways, regulatory mechanisms, and effects of environment. Includes Honors sections. Students are expected to have completed coursework in microbiology and immunology before enrolling in this course.

MICR 6130 Industrial Microbiology 3 (2) Microbial aspects of large-scale processes for the production of foods, antibiotics, enzymes, fine chemicals, and beverages. Topics include strain selection, culture maintenance, biosynthetic pathways, continuous cultivation and production of single cell protein. Coreq: MICR 6131.

MICR 6131 Industrial Microbiology Laboratory 0 (3) Non-credit laboratory to accompany MICR 6130. Coreq: MICR 6130.

MICR 6140 Basic Immunology 3 (3) Introduction to the immune system of vertebrate animals, with an emphasis on structure, function, regulation, and cellular and molecular mechanisms of immune responses. Students are expected to have completed coursework in introductory microbiology and cell biology before enrolling in this course.

MICR 6150 Microbial Genetics 3 (3) Investigates the molecular basis of microbial lives. Topics include essential genes involved in DNA, RNA and protein metabolism; mutations and genome evolution; global gene regulation; and genetic analysis, using both forward and reverse genetics. Students are expected to have completed coursework in introductory microbiology, genetics, and biochemistry before enrolling in this course.

MICR 6160 Introductory Virology 3 (3) Introduces to the field of virology, including animal, bacterial, and plant viruses. Topics include nomenclature and classification, biochemical and biophysical characteristics, mechanisms of replication, chemotherapeutics, and techniques for isolation, assay, and purification. Students are expected to have completed coursework in introductory microbiology and biochemistry before enrolling in this course.

MICR 6170 Cancer and Aging 3 (3) Discusses alterations that occur at molecular, cellular and tissue levels during cell transformation and aging. Topics include cell division cycle, signal transduction pathways, oncogenes and tumor suppressors, cell death and cell aging. Students are expected to have completed coursework in introductory microbiology and cell biology before enrolling in this course.

MICR 6190 Selected Topics in Molecular Medicine 3 (3) Introduction to various areas of molecular medicine. Examines the latest research and developments in molecular medicine. Designed for students interested in medicine and biomedical research. Graduate students may repeat for a maximum of six credits. Students are expected to have completed coursework in introductory microbiology and biochemistry before enrolling in this course.

MICR 6240 Immunology Laboratory 1 (3) See MICR 6140. Preq or concurrent enrollment: MICR 6141.

MICR 6250 Microbial Genetics Laboratory 3 (3) Complements the genetics topics covered in the Microbial Genetics lecture. These topics are important at practical levels for molecular and genetics studies. The laboratory is used to teach basic cloning techniques, the basis of blue/white screening, isolation of mutants, calculation of mutation rate, as well as gene regulation. Preq or concurrent enrollment: MICR 6150.

MICR 6270 Molecular Mechanisms of Carcinogenesis and Aging Laboratory 3 (3) The laboratory is used to teach the basic molecular protocols for cancer and aging research, and will help students to understand the mechanisms of cancer and aging discussed in lecture. Preq or concurrent enrollment: MICRO 6170.
MICR 6300 Soil Microbiology Laboratory 1 (3)
Examines microbes residing in the soil and their effects on the soil substrate and resident plant communities. Topics include biogeochemistry, microbial isolation, microcosm development, and characterization of soil microbial communities. Prereq or concurrent enrollment: MICR 6100.

MICR 6560 Medical and Veterinary Parasitology 3 (3) Introduction to parasitism in the animal kingdom. Emphasizes basic and applied principles related to economically and medically important diseases. Classical and experimental approaches to the study of parasitism are examined in reference to protozoa, helminths, and arthropods.

MICR 6570 Medical and Veterinary Parasitology Laboratory 2 (1) Laboratory to reinforce material presented in MICR 6560. Introduces students to both live and preserved human/animal parasites. Also introduces techniques used in collection, preservation, and examination of animal parasites. Coreq: MICR 6560 and MICR 6571.

MICR 6571 Medical and Veterinary Parasitology Laboratory 0 (2) Non-credit laboratory to accompany MICR 6570. Coreq: MICR 6570.

MICR 8020 Bacteriological Techniques 4 (2) Analytical and experimental procedures used in bacteriology including techniques for studying bacterial cytology, physiology and metabolism; experience in more advanced methods of investigation. Offered fall semester only. Coreq: MICR 8021.

MICR 8021 Bacteriological Techniques Laboratory 0 (6) Non-credit laboratory to accompany MICR 8020. Coreq: MICR 8020.

MICR 8030 Special Problems in Microbiology 1-12 (1-12) Research not related to a thesis.

MICR 8040 Selected Topics in Microbiology 1-3 (1-3) Evaluation of current research literature in various areas of microbiology. Critical evaluation of specific publications in terms of their scientific merit. Required of all Microbiology graduate students. May be repeated for credit.

MICR 8050 Techniques of Clinical Microbiology and Immunobiology 3 (2) Methods for isolating, identifying and culturing different mammalian cell types; techniques used to analyze cell function and viability and for protein and DNA analysis emphasizing application to the diagnosis of disease; determination of prognosis, optimization of treatment and determination of etiology. Prereq: AVS 6140 or BIOL 6140 or MICR 6140; or MICR 6150 and BCHM 6230; or consent of instructor. Coreq: MICR 8051.

MICR 8051 Techniques of Clinical Microbiology and Immunobiology Laboratory 0 (3) Non-credit laboratory to accompany MICR 8050. Coreq: MICR 8050.

MICR 8060 Pathogenesis and Infectious Disease 3 (3) Medically important host-parasite relationships at the cellular and subcellular levels with emphasis on bacterial and viral infections in man. Students are expected to have completed coursework in pathogenic microbiology before enrolling in this course.

MICR 8070 Current Topics in Microbiology 1 (1) Students learn and practice skills of literature interpretation, presentation and discussion of articles in relevant and current scientific journals. To be taken Pass/No Pass only. May be repeated for a maximum of eight credits.

MICR 8090 Epidemiological Research 3 (3) Basic concepts of epidemiology with emphasis on applied aspects rather than theoretical. Examples are drawn from clinical practice. Use of relevant PC-based computer packages is required. Prereq: MTHS 4050 or EXST 8010; or consent of instructor.

MICR 8110 Bacterial Cytology and Physiology 4 (4) Structure, chemistry and physiology of the various bacterial cell components. Physiology of bacterial growth and reproduction in batch, continuous and synchronous cultures. Economy of the bacterial cell including endogenous metabolism and maintenance requirements; physiology of bacterial death; regulation of enzyme and nucleic acids syntheses. Students are expected to have completed coursework in biochemistry before enrolling in this course.

MICR 8120 Bacterial Metabolism 3 (3) Various biochemical pathways occurring in bacterial cells. Fermentations of carbohydrates and related compounds and of nitrogenous organic compounds; anaerobic and aerobic respiration including electron transport systems and oxidative phosphorylation; bacterial photosynthesis; nitrogen fixation; biosynthesis of amino acids, vitamins, purines, pyrimidines, lipids, proteins, nucleic acids and polysaccharides. Students are expected to have completed coursework in biochemistry before enrolling in this course.

MICR 8150 Advanced Microbial Genetics 3 (3) Current developments in microbial genetics: integration of genetics and biochemistry; analysis of genetic fine structure in microorganisms; nature of bacterial variation and expression of mutations; population dynamics; physicochemical mechanisms of heredity; regulation of gene action in microorganisms; physiology and genetics of virulence and lyogenic bacteriophages. Students are expected to have completed coursework in genetics before enrolling in this course.

MICR 8250 Global Gene Regulation of Bacterial Stress Response 3 (3) Focuses on global gene regulation in microbial systems and discusses how microorganisms adapt to various environments. Topics include general stress response, heat shock, envelope stress, oxidative and nitrosative stress, metal homeostasis, sporulation and competence regulation, and bacterial cannibalism. Students are expected to have completed coursework in genetics before enrolling in this course.

MICR 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

MICR 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

MARKETING

MKT 6230 Promotional Strategy 3 (3) Emphasizes promotion as the communication function of marketing. Attention is given to communication theory and promotion’s relation to mass and interpersonal communication. Factors affecting promotional decision-making process are explored, and promotion as a competitive tool is examined. Prereq: MKT 3010 or consent of instructor.

MKT 6270 International Marketing 3 (3) Study of marketing from the international point of view. Emphasis is on the necessary modification of marketing thinking and practice for foreign markets due to individual environmental differences. Prereq: MKT 3010.

MKT 6280 Services Marketing 3 (3) Exploration and study of the nature of service organizations and the principles that guide the marketing of their products. Emphasis is on a marketing mix that is fundamentally different than that found in traditional goods marketing. Prereq: MKT 3010 or consent of instructor.

MKT 6290 Public and Nonprofit Marketing 3 (3) Examines the role and application of marketing in public and nonprofit settings. Focuses on a conceptual understanding of the marketing discipline and marketing processes and shows how basic concepts and principles of marketing are applicable to public and nonprofit organizations. Prereq: MKT 3010 or consent of instructor.

MKT 6300 Marketing Product Management 3 (3) Management of the firm’s product or service offerings. Topics include new product screening, evaluation, and development; product line and mix analysis, abandonment decisions, brand manager’s role, new product development department, and others. Emphasis is on decision making. Prereq: MGT 3100 and MKT 3010; or consent of instructor.

MKT 6950 Selected Topics 3 (3) In-depth examination of timely topics in marketing. May be repeated for credit, but only if different topics are covered. Prereq: MKT 3010 or consent of instructor.

MKT 8260 Business Marketing 3 (3) Strategic marketing as it applies to industrial, organizational and institutional markets; consumer marketing versus business-to-business marketing; current business marketing literature and practices. Students are expected to have completed a principles of marketing course or to obtain consent of instructor before enrolling in this course.

MKT 8280 Services Marketing 3 (3) Nature of services marketing and the special requisites that distinguish successful services marketing from goods marketing. Topics include promoting and making the service tangible, designing optimal service operations, the ideal service worker, pricing of services and critical points of services delivery. Students are expected to have completed a principles of marketing course or to obtain consent of instructor before enrolling in this course.

MKT 8600 Advanced Marketing Strategy 3 (3) Advanced marketing theory and critical thinking skills applied to support strategic decision making. Data analysis and advanced marketing models are employed with emphasis on building analytic and assessment skills. Offered spring semester only. Prereq: MBA 8580 or MKT 8650 or consent of instructor.
MKT 8610 Marketing Research 3 (3) Marketing theory and critical thinking to support decision making; data analysis and advanced marketing models are employed with emphasis on building assessment skills. Primary topics are gathering primary and secondary data, questionnaire design, sampling, experimental design, data collection and data analysis. Students who are enrolled in the MS in Marketing program, but who have not completed MKT 8600 must request a registration override from the instructor to enroll in this course. Preq: MKT 8610 or consent of instructor.

MKT 8620 Quantitative Methods in Marketing 3 (3) Advanced quantitative analytic methods and their use in translating facts into meaningful information. Provides practical understanding of several advance quantitative data analytic procedures including both predictive and interdependence techniques. Application to case analysis format to broaden analysis skills. Preq: MKT 8610 or consent of instructor.

MKT 8630 Buyer Behavior 3 (3) Buyer decision processes in the purchase and consumption of goods and services by both businesses and consumers. Topics include economic, sociocultural and psychological aspects of buying behavior; decision-making processes and buyer choice; individual and group level influences on consumer behavior; and implications of consumer behavior for marketers. Students who are enrolled in the MS in Marketing program, but who have not completed MKT 8600, must request a registration override from the instructor to enroll in this course. Preq: MKT 8600 or consent of instructor.

MKT 8640 Seminar in Marketing Management 3 (3) Current research and practice in components of marketing management. In-depth discussion of marketing mix variables, segmentation, targeting and positioning, and budget-related issues. Preq: Enrollment in MS in Marketing.

MKT 8660 Selected Topics in Marketing 3 (3) Current topics in marketing theory and research. Topics vary with developments in the marketing profession. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: MKT 8600 or MKT 8650; or consent of instructor.

MKT 8700 Master's Research Project 1-9 (1-9) Study of the fundamentals of the noncrystalline state. Includes cooling kinetics and effects on formation, as well as physical properties of noncrystalline substances in metallic, polymeric, and ceramic systems. Preq: MSE 3260; Coreq: MSE 6020; or consent of instructor.

MSE 6130 Noncrystalline Materials 3 (3) Study of the fundamentals of the noncrystalline state. Includes cooling kinetics and effects on formation, as well as physical properties of noncrystalline substances in metallic, polymeric, and ceramic systems. Preq: MSE 3260; Coreq: MSE 6020; or consent of instructor.

MSE 6150 Introduction to Polymer Science and Engineering 3 (3) Chemistry of monomers and polymers and the chemical and physical properties of polymers are discussed emphasizing fiber forming, synthetic polymers. Includes molecular characterization, structure, morphology, and mechanical properties as they relate to the design of polymer systems for end uses in textiles, geotextiles, plastics and fiber-reinforced composite materials. Preq: CH 2010; and CH 3300 or CH 2240; or consent of instructor.

MSE 6160 Electrical Properties of Materials 3 (3) Covers a range of topics dealing with electrical and magnetic materials, including metal and polymer conductors, insulators, ceramic and polymeric materials for dielectric applications, and ferroelectric, piezoelectric, pyroelectric, and electrooptical materials. Metal and ceramic magnetic materials are also discussed.

MSE 6220 Mechanical Behavior of Materials 3 (3) Covers the microstructural basis of deformation and fracture in ceramic, metallic, and polymeric materials. Preq: CE 2010 and MTHS 2080.

MSE 6240 Optical Materials and Their Applications 3 (3) Introduces the interaction of materials with light. Specific topics include fundamental optical properties, materials synthesis, glass and planar waveguides, and the composition and systems level aspects of optical communication systems. Preq: MSE 4100 and MSE 4130.

MSE 6340 Polymer and Fiber Materials II 3 (2) Chemicals used in the preparation of fabric for dyeing and finishing. Oxidizing and reducing agents and their control and effect on various fibers. Coarse and surface active properties of various compounds and the fundamental factors influencing these properties. Preq: MSE 4150 or consent of instructor. Coreq: MSE 6561.

MSE 6551 Polymer and Fiber Science II Laboratory 0 (2) Non-credit laboratory to accompany MSE 6560. Coreq: MSE 6560.

MSE 6570 Color Science 3 (3) Understanding of physical, chemical, and mechanical principles behind the application of colors and finishes to textiles. Requires an appreciation of fiber chemistry and morphology, dye and finish structures and reactivity and mechanical principles behind equipment used to effect transfer of these chemicals onto the textile substrate.

MSE 6580 Surface Phenomena in Materials Science and Engineering 3 (3) Introduction to surface phenomena focusing on fiber science. Fundamentals of interfacial phenomena embrace thermodynamics of surfaces, physics of adhesion, wetting, and finishing emphasizing specific features associated with interactions of liquids and chemicals with fibers and fibrous materials. Preq: Junior standing in engineering or science.

MSE 6620 Properties of Textile Structures 3 (2) Yarn and fabric properties, their scientific significance and analysis. Dimensional, structural, and mechanical interrelationships are established and evaluated. Coreq: MSE 6621.

MSE 6621 Properties of Textile Structures Laboratory 0 (2) Non-credit laboratory to accompany MSE 6620. Coreq: MSE 6620.

MSE 6640 Nonwoven Structures 3 (2) Nonwoven fabric structures, their manufacture, properties, and applications. Methods of nonwoven fabric formation, resultent material characteristics and end-use applications are examined. Preq: MSE 2010. Coreq: MSE 6641.

MSE 6641 Nonwoven Structures Laboratory 0 (2) Non-credit laboratory to accompany MSE 6640. Coreq: MSE 6640.

MSE 6900 Selected Topics in Materials Science and Engineering 1-3 (1-3) Study of topics not ordinarily covered in other courses. Taught as the need arises. Typical topics could include current research in a specific area or technological advances. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

MSE 8000 Seminar in Materials Research 1 (1) Special topics and original research in materials science, materials engineering, and polymer and fiber chemistry. To be taken Pass/No Pass only.

MSE 8100 Graduate Student Seminar in Materials Research 1 (1) Presentation of individual graduate student research topics in materials science and engineering. Preq: MSE 8000.

MSE 8090 High-Temperature Materials 3 (3) Properties of oxides, carbides, nitrides, borides and silicides; obtainment and measurement of high temperatures; measurement of properties at high temperatures.

MSE 8150 Colloidal and Surface Science 3 (3) Theory and application of colloidal and surface chemistry to ceramic materials and processes.

MSE 8160 Constitution and Structure of Glasses 3 (3) Modern concepts of glass structure and properties.

MSE 8190 X-Ray Diffractometry 3 (2) Theory and application of powder X-ray diffractometry to ceramic and materials problems.

MSE 8200 Deformation Mechanisms in Solids 3 (3) Dislocation theory of solids; mechanisms of plastic deformation in single crystals and polycrystalline aggregates of metals and nonmetals; ductile and brittle fractures; fatigue, creep and stress corrosion cracking of metals. Preq: Consent of instructor.

MSE 8210 Fracture and Fatigue 3 (3) Investigation into stress-strain-time relations in elasticity, plasticity and rupture showing effects of high- and low-temperature structures. Preq: MSE 8200 or consent of instructor.

MSE 8221 Scanning Electron Microscopy Laboratory 0 (3) Non-credit laboratory to accompany MSE 8220. Coreq: MSE 8220.
MSE 8230 Transmission Electron Microscopy 3 (2) Advanced course in electron microscopy for materials science incorporating all aspects of trans-
mission techniques: basics, defraction, imaging and spectroscopy. Prereq: MSE 8210 and MSE 8220; or consent of instructor. Coreq: MSE 8231.

MSE 8231 Transmission Electron Microscopy Laboratory 0 (3) Non-credit laboratory to accompany MSE 8230. Coreq: MSE 8230.

MSE 8240 Magnetic and Electrical Ceramic Materials 3 (3) Application of magnetic and electrical theory to ceramic insulators, semiconductors, and ferroelectrics and ferromagnetic products.

MSE 8250 Solid State Materials Science 3 (3) Bonding and structure of crystalline materials as related to mechanical, thermal and chemical properties of solids.

MSE 8260 Phase Equilibria in Materials Systems 3 (3) Advanced treatment of phase equilibria in materials systems, phase diagrams, thermodynam-
ics of defects, surfaces, interfaces and solutions. Prereq: MSE 2100 and consent of instructor. Prereq or concurrent enrollment: ME 8100.

MSE 8270 Kinetics of Phase Transformation 3 (3) Advanced treatment of the kinetics of phase transformation in materials systems including nucleation, growth and spinodal decomposition. Prereq: MSE 8260 and consent of instructor.

MSE 8280 Phase Transformations in Materials Science 3 (3) Advanced treatment of gas-solid, gas-
liquid, liquid-solid and solid-solid transformations in materials systems. Prereq: MSE 8270.

MSE 8400 Analytical Methods in Textile and Poly-
mer Science 4 (3) Use of chemical and physical instrumental methods to characterize polymeric materials in textile and polymer science; basic principles and unique problems encountered when techniques such as IR, NMR, GC, LC, MS, GC/ MS and thermal analysis, microscopy and tensile testing are applied to polymeric materials. Offered spring semester only. Prereq: Consent of instructor. Coreq: MSE 8401.

MSE 8401 Analytical Methods in Textile and Poly-
mer Science Laboratory 0 (3) Non-credit laboratory to accompany MSE 8400. Coreq: MSE 8400.

MSE 8510 Polymer Science I 3 (3) Fundamentals of polymer chemistry. Chemistry and synthesis of monomers and polymers in relation to thermody-
namics, kinetics and mechanisms of polymerization reactions emphasizing fiber-forming polymers, plastics and composite matrix materials. Offered fall semester only.

MSE 8520 Polymer Science II 3 (3) Chemical struc-
ture and properties of polymers. Polymer solution properties, the viscoelastic state and the crystal-
line morphology of polymeric materials. Current theories for describing polymer thermal transitions, molecular weight, molecular weight distributions and transport phenomena in polymeric systems, as well as interfacial phenomena. Offered spring semester only.

MSE 8540 Multicomponent Polymeric Materials 3 (3) Principles of advanced multicomponent polymeric materials and systems based on the following topics: different polymer-polymer and polymer-nonpolymer combinations; multicomponent materials synthesis, fabrication, properties and applications; modification and instrumental characterization of polymer surfaces and interfaces; functional coatings, nanocomposites, adhesives, nanodevices, polymer blends and composites, interpenetrating polymeric networks and block-
copolymers. Students are expected to have completed coursework in introductory polymer course or to obtain consent of instructor before enrolling in this course.

MSE 8610 Fiber Physics I 3 (3) Fiber physical properties and their relationship to fiber struc-
ture; methods of investigating fiber structure and physical properties; theories of viscoelastic behavior and thermal properties; models of fiber structure. Offered fall semester only.

MSE 8620 Fiber Physics II 3 (3) Extension of MSE 8610, providing a more in-depth study of the math-
ematics of fiber viscoelasticity and the solid state thermodynamics of polymeric systems; proper-
ties of copolymers; polymer optical and electrical properties; radiation physics of polymers. Offered spring semester only. Prereq: MTHS 2080 and MSE 8610; or consent of instructor.

MSE 8660 Fiber Formation 3 (3) Formation of fibers by wet, dry and melt spinning are studied in depth with emphasis on the understanding of solutions and melts, fiber structure, and spinning and drawing processes and the interrelationships of polymer properties and processes that determine fiber properties. Offered spring semester only.

MTHS 7090 Geometry for the Middle Grades 3 (3) Hands-on approach to constructions with straight-
edge and compass; polygons including tessellations and polyhedra; symmetry and transformational geometry; coordinate geometry measurement with dimensional analysis; perspective drawing and related topics; history of geometry; reasoning and informal proof with congruence; and computer software, calculator use and Internet. Prereq: Enrollment in Middle-Level Education graduate program.

MTHS 7130 Algebra for Middle Grades Teachers 3 (3) Study of elementary algebra, solution of equa-
tions, and inequalities; properties and applications of linear, quadratic, polynomial and exponential functions and models; graphical analysis and curve-fitting of real-world data; systems of equations and basic matrix operations. A graphing calculator is used. Prereq: Enrollment in Middle-Level Education graduate program.

MTHS 7140 Foundations of Mathematics for Mid-
dle Grades Teachers 3 (3) Concepts include logic, set theory, numeration systems; arithmetic operations and their properties on the integer, rational and real number systems; decimals, ratio, proportion, percent, exponents and roots. Includes an introduc-
tion to algebra and counting, permutations and combinations. Prereq: Enrollment in Middle-Level Education graduate program.

MTHS 7380 Modern Geometry for Secondary Teachers 3 (3) Concepts of Euclidean geometry reviewed and extended by means of coordinates, vectors, matrices, conic sections. Prereq: Enrollment in Secondary Education graduate program.

MTHS 7400 Linear Programming for Secondary Teachers 3 (3) Development of mathematical theory of simplex algorithm; survey of mathemati-
cal background; matrix algebra, systems of linear equations and vector spaces; problem formulation is emphasized. Prereq: Enrollment in Secondary Education graduate program.

MTHS 7490 Discrete Mathematics for Secondary Teachers 3 (3) Discrete mathematics emphasizing applications to computer science; propositions and logic; Boolean Algebra and switching circuits; recursion and induction; relations and partially ordered sets, graphs and trees.

MTHS 7500 Modern Algebra for Secondary Teachers 3 (3) Introduction to the fundamental concepts and historical development of abstract algebra. Topics include integers, binary operations, functions, equivalence, relations, permutations, groups, polynomials, commutative rings, integral domains, and fields. Students are expected to have completed a Linear Algebra course or a Graduate Matrix Algebra for Secondary Teachers course before enrolling in this course. Prereq: Enrollment in Secondary Education graduate program.

MTHS 7530 Matrix Algebra for Secondary Teachers 3 (3) Matrices and systems of equations; determi-
nants; vector spaces and linear transformations; eigenvalues. Prereq: Enrollment in Secondary Educa-
tion graduate program.
MTHS 7550 Combinatorial Analysis for Secondary Teachers 3 (3) Permutations; combinations; generating functions; recurrence relations; principle of inclusion-exclusion; partitions; Latin squares; block designs; finite geometries; graphs; codes; Polya’s theorem; recreational mathematics. Prq: Enrollment in Secondary Education graduate program.

MTHS 7560 Applied Modern and Linear Algebra for Secondary Teachers 3 (3) Various applied problems whose solution rely on techniques and results of linear and modern algebra. Problems are selected from such areas as economics, forest management, genetics, population growth, transportation networks, cryptography, satellite communications, electronic switching circuits, circuitry, physics, sociology and others. Students are expected to have completed a Graduate Matrix Algebra for Secondary Teachers course before enrolling in this course.

MTHS 7580 Number Theory for Secondary Teachers 3 (3) Topics include properties of integers, divisors and prime numbers; fundamental properties of congruence; polynomials and primitive roots; quadratic residues. Prq: Enrollment in Secondary Education graduate program.

MTHS 7750 AP Calculus Institute 3 (3) Topics of calculus, differential calculus and integral calculus; enrichment material and a theoretical perspective of calculus. Restricted to teachers who hold a current teaching certificate in secondary mathematics. Completion of this course satisfies the special certification requirements for AP-calculus teachers in South Carolina.

MTHS 7770 AP Calculus Institute 3 (3) Elementary functions, differential calculus and integral calculus; enrichment material and a theoretical perspective of calculus. Prq: Enrollment in Secondary Education graduate program.

MTHS 7800 Probability Theory for Secondary Teachers 3 (3) Calculus-based introduction to basic ideas in probability theory. Topics include basic counting techniques, fundamental axioms of probability, conditional probability, discrete and continuous distributions, and sampling distributions. Emphasizes real-world applications and the use of simulations to illustrate concepts. Students are expected to have completed a Science and Engineering Single Variable Calculus II course before enrolling in this course. Prq: Enrollment in Secondary Education program.

MTHS 7850 Data Analysis for Secondary Teachers 3 (3) Topics include data types, basic sampling and experimental designs, one- and two-sample confidence intervals and hypothesis tests, analysis of variance, model building with simple and multiple linear regression, and contingency tables. Includes a brief review of probability. Student groups propose and implement a real-world research project. Students are expected to have completed an Introductory Statistics, Introductory Probability, or a Graduate Probability Theory for Secondary Teachers course before enrolling in this course. Prq: Enrollment in Secondary Education program.

MTHS 7910 Selected Topics in Mathematics Education 1-3 (1-3) Mathematical problems in elementary or secondary school curricula. May be repeated for credit, but only if different topics are covered. Prq: Enrollment in Secondary Education graduate program.

MTHS 8000 Probability 3 (3) Study of basic probability theory with emphasis on results and techniques useful in operations research and statistics. Topics include axiomatic probability, advanced combinatorial probability, conditional informative expectation, functions of random variables, moment generating functions, distribution theory and limit theorems. Offered fall semester only. Students are expected to have completed a Multivariable Calculus course before enrolling in this course.

MTHS 8010 General Linear Hypothesis I 3 (3) Topics include least-square estimates; Gauss-Markov theorem; confidence ellipsoids, and confidence intervals for estimable functions; tests of hypotheses; one-, two- and higher-way layouts; analysis of variance for other models. Offered fall semester only. Students are expected to have completed a Linear Algebra and a Mathematical Statistics course before enrolling in this course.

MTHS 8020 General Linear Hypothesis II 3 (3) Continuation of MTHS 8010. Offered spring semester only. Students are expected to have completed a Graduate-level course in linear models before enrolling in this course.

MTHS 8030 Stochastic Processes 3 (3) Theory and analysis of time series, recurrent events, Markov chains, random walks, renewal theory, application to communication theory and operations research. Students are expected to have completed a Multivariable Calculus and Introductory Probability Theory course before enrolling in this course.

MTHS 8040 Statistical Inference 3 (3) Sampling distributions; maximum likelihood estimation and likelihood ratio tests; asymptotic confidence intervals for binomial, Poisson and exponential parameters; two-sample methods; nonparametric tests; ANOVA; regression; model building. Offered fall semester only. Students are expected to have completed a Multivariable Calculus and Introductory Probability course before enrolling in this course.

MTHS 8050 Data Analysis 3 (3) Methodology in analysis of statistical data emphasizing applications to real problems using computer-oriented techniques: computer plots, transformations, criteria for selecting variables, error analysis, multiple and stepwise regression, analysis of residuals, model building in time series and ANOVA problems, jackknife and random subsampling, multidimensional scaling, clustering. Students are expected to have completed an Introductory Statistics and Introductory Probability course before enrolling in this course.

MTHS 8060 Nonparametric Statistics 3 (3) Order statistics; tolerance limits; rank-order statistics; Kolmorogov-Smirnov one-sample statistics; Chi-square goodness-of-fit test; two-sample problem; linear rank statistics; asymptotic relative efficiency. Offered spring semester only. Students are expected to have completed a Statistical Inference course before enrolling in this course.

MTHS 8070 Applied Multivariate Analysis 3 (3) Applied multivariate analysis: computer plots of multivariate observations; multidimensional scaling; multivariate tests of means, covariances and equality of distributions; univariate and multivariate regressions and their comparisons; MANOVA; principal components analysis; factor analysis; analytic rotations; canonical correlations. Offered fall semester only. Students are expected to have completed a Linear Algebra and a Statistical Inference course before enrolling in this course.

MTHS 8080 Reliability and Life Testing 3 (3) Probability models and statistical methods relevant to parametric and nonparametric analysis of reliability and life testing data. Offered spring semester only. Students are expected to have completed a Statistical Inference course before enrolling in this course.

MTHS 8090 Time Series Analysis, Forecasting and Control 3 (3) Modeling and forecasting random processes; autocorrelation functions and spectral densities; model identification, estimation and diagnostic checking; transfer function models; feedforward and feedback control schemes. Offered spring semester only. Students are expected to have completed a Multivariable Calculus and Introductory Probability course before enrolling in this course.

MTHS 8100 Mathematical Programming 3 (3) Formulation and solution of linear programming models; mathematical development of the simplex method; revised simplex method; duality; sensitivity analysis; parametric programming, implementation and software packages. Students are expected to have completed a Linear Algebra course before enrolling in this course.

MTHS 8110 Nonlinear Programming 3 (3) Theoretical development of nonlinear optimization with applications, classical optimization, convex and concave functions, separable programming, quadratic programming and gradient methods. Offered spring semester only. Students are expected to have completed a Linear Algebra and a Advanced Calculus course before enrolling in this course.

MTHS 8120 Discrete Optimization 3 (3) Principal methods used in integer programming and discrete optimization; branch and bound, implicit enumeration, cutting planes, group knapsack, Lagrangian relaxation, surrogate constraints, heuristics (performance analysis), separation/branching strategies, and polynomial time algorithms for specific problems on special structures. Offered fall semester only. Students are expected to have completed a graduate-level course in Linear Programming before enrolling in this course.

MTHS 8130 Advanced Linear Programming 3 (3) Development of linear programming theory using inequality systems, convex cones, polyhedra and duality; solution algorithms, and computational considerations for large scale and special structured problems using techniques of upper bounded variables, decomposition, partitioning and column generation; game theory; nonlinear representations and other methods such as ellipsoid and Karmarkar. Offered spring semester only. Students are expected to have completed a graduate-level course in Linear Programming before enrolling in this course.
Courses of Instruction

MTHS 8140 Network Flow Programming 3 (3) Max-flow/min-cut theorem, combinatorial applications, minimum cost flow problems (transportation, shortest path, transshipment), solution algorithms (including the out-of-kilter), and implementation and computational considerations. Offered fall semester only. Students are expected to have completed a graduate-level course in Linear Programming before enrolling in this course.

MTHS 8160 Network Algorithms and Data Structures 3 (3) Design, analysis and implementation of algorithms and data structures associated with the solution of problems formulated as networks and graphs; applications to graph theory, combinatorial optimization and network programming. Offered spring semester only. Students are expected to have completed a Linear Programming, Graduate Mathematical Programming, Graph Theory, Undergraduate Algorithms and a Data Structures course before enrolling in this course.

MTHS 8170 Stochastic Models in Operations Research I 3 (3) Stochastic control; structure of sequential decision processes; stochastic inventory models; recursive computation of optimal policies; discrete parameter finite Markov decision processes; various optimality criteria; computation by policy improvement and other methods; existence of optimal stationary policies; stopping-rule problems; examples from financial management, maintenance and reliability, search, queuing and shortest path. Offered spring semester only. Students are expected to have completed a Graduate Stochastic Processes course before enrolling in this course.

MTHS 8180 Stochastic Models in Operations Research II 3 (3) Introduction to queuing theory: Markovian queues, repairman problems, queues with an embedded Markov structure, the queue GI/G/1, queues with a large number of servers, decision making in queues; introduction to reliability theory; failure distributions; stochastic models for complex systems; maintenance and replacement policies; reliability properties of multicomponent structures. Offered fall semester only. Students are expected to have completed a Graduate Stochastic Processes course before enrolling in this course.

MTHS 8190 Multicriteria Optimization 3 (3) Theory and methodology of optimization problems with vector-valued objective functions; preference orders and domination structures; generating efficient solutions; solving multicriteria decision-making problems; noninteractive and interactive methods with applications. Offered fall semester only. Students are expected to have completed a Graduate Mathematical Programming course before enrolling in this course.

MTHS 8200 Complementarity Models 3 (3) Theory, algorithms and applications of linear and nonlinear complementarity; classes of matrices and functions and corresponding algorithms; applications to economics, mechanics and networks; generalizations to fixed-point problems and nonlinear systems of equations. Offered spring semester only. Students are expected to have completed a Graduate Mathematical Programming course before enrolling in this course.

MTHS 8210 Linear Analysis 3 (3) Normed spaces; Hilbert spaces, Banach spaces, linear functionals, linear operators, orthogonal systems. Offered spring semester and summer session only. Students are expected to have completed a Undergraduate Advanced Calculus II course or a Undergraduate Advanced Calculus I and Graduate Matrix Analysis course before enrolling in this course.

MTHS 8220 Measure and Integration 3 (3) Ranges and algebras of sets, inner and outer measures; measurability and additivity, examples on the line and in space, Lebesgue integration, types of convergence, Lebesgue spaces; integration and differentiation, product measure, Fubini theorem. Offered fall semester only. Students are expected to have completed a Undergraduate Advanced Calculus II course before enrolling in this course.

MTHS 8230 Complex Analysis 3 (3) Topological concepts; complex integration; local and global properties of analytic functions; power series; representation theorems; calculus of residues. Designed for nonengineering majors.

MTHS 8250 Introduction to Dynamical Systems Theory 3 (3) Techniques of analysis of dynamical systems; sensitivity analysis, linear systems, stability and control; theory of differential and difference equations. Offered fall semester only. Students are expected to have completed a Undergraduate Advanced Calculus II and a Linear Algebra course or a Undergraduate Advanced Calculus I and Graduate Matrix Analysis course before enrolling in this course.

MTHS 8260 Partial Differential Equations 3 (3) First-order equations: elliptic, hyperbolic and parabolic; second-order equations: existence and uniqueness results, maximum principles, finite difference and Hilbert Space methods. Offered fall semester only. Students are expected to have completed a Graduate Linear Algebra course before enrolling in this course.

MTHS 8270 Dynamical System Neural Networks 3 (3) Modeling problems in the context of dynamical systems theory; useful methods from Lyapunov stability, local linearization, qualitative analysis using graph theory and numerical approximations; several dynamical systems neural networks including binary code recognizers and binary matrix choosers. Students are expected to have completed a Multivariable Calculus and a Linear Algebra course before enrolling in this course.

MTHS 8300 Computational Algebraic Geometry 3 (3) Covers algebraic geometry and commutative algebra via Grobner bases. Includes ideals and varieties (affine and projective), Grobner bases, elimination theory, dimensions, solving polynomial systems via eigenvalues ad eigenvectors. Selected applications may include coding theory, computer vision, geometric theorem proving, integer programming, or statistics. Students are expected to have completed a Undergraduate Linear Algebra and Modern Algebra course before enrolling in this course.

MTHS 8510 Abstract Algebra I 3 (3) Basic algebraic structures: groups, rings and fields; permutation groups, Sylow theorems, finite abelian groups, polynomial domains, factorization theory and elementary field theory. Offered spring semester only.

MTHS 8520 Abstract Algebra II 3 (3) Continuation of MTHS 8510 including selected topics from ring theory and field theory. Offered fall semester only.

MTHS 8530 Matrix Analysis 3 (3) Topics in matrix analysis that support an applied curriculum: similarity and eigenvalues; Hermitian and normal matrices; canonical forms; norms; eigenvalue localizations; singular value decompositions; definite matrices. Students are expected to have completed a Undergraduate Linear Algebra and Advanced Calculus course, or a Mathematical Analysis course before enrolling in this course.

MTHS 8540 Theory of Graphs 3 (3) Connectedness, path problems, trees, matching theorems, directed graphs, fundamental numbers of the theory of graphs; graphs and graphs. Offered spring semester only.

MTHS 8550 Combinatorial Analysis 3 (3) Combinations; permutations; permutations with restricted position; Polya’s theorem; principle of inclusion and exclusion; partitions; recurrence relations; generating functions; Mobius inversion; enumeration techniques; Ramsey numbers; finite projective and affine geometries; Latin rectangles; orthogonal arrays; block designs; error detecting and error correcting codes. Offered fall semester only. Students are expected to have completed a Undergraduate Linear Algebra course before enrolling in this course.

MTHS 8560 Theory of Error-Correcting Codes 3 (3) Topics include code constructions such as Hamming, cyclic, BCH, Reed-Solomon, Goppa, algebraic geometry, finite geometry, low-density parity check, convolutional and polynomial codes; code parameters and bounds; and decoding algorithms. Students are expected to have completed a Graduate Matrix Analysis course before enrolling in this course.
Courses of Instruction

MTHS 8570 Cryptography 3 (3) Classical and modern cryptography and their uses in modern communication systems are covered. Topics include entropy, Shannon's perfect secrecy theorem, Advanced Encryption Standard (AES), integer factorization, RSA cryptosystem, discrete logarithm problem, Diffie-Hellman key exchange, digital signatures, elliptic curve cryptosystems, hash functions and identification schemes. Students are expected to have completed a Graduate Linear Algebra, Theory of Probability, and Modern Algebra course, or a Graduate Abstract Algebra course before enrolling in this course.

MTHS 8580 Number Theory 3 (3) Covers topics and techniques from modern number theory including unique factorization, elementary estimates on the distribution of prime numbers, congruences, Chinese remainder theorem, primitive roots, n-th powers modulo an integer, quadratic residues, quadratic reciprocity, quadratic characters, Gauss sums and finite fields. Students are expected to have completed a Graduate Matrix Analysis course before enrolling in this course.

MTHS 8600 Introduction to Scientific Computing 3 (3) Floating point models, conditioning and numerical stability, numerical linear algebra, integration, systems of ordinary differential equations and zero finding; emphasis is on the use of existing software. Students are expected to have completed a Undergraduate Computer Programming Language, Ordinary Differential Equations, and Linear Algebra course before enrolling in this course.

MTHS 8610 Advanced Numerical Analysis 1 3 (3) Consideration of topics in numerical linear algebra: eigenvalue problems, the singular value decomposition, iterative algorithms for solving linear systems, sensitivity of linear systems, and optimization algorithms. Students are expected to have completed a Undergraduate Linear Algebra and Numerical Analysis, or Graduate Specific Computing course before enrolling in this course.

MTHS 8630 Digital Models 1 3 (3) Experimental mathematics; pseudostochastic processes; analytical and algebraic formulations of time-independent simulation; continuous-time simulation and discrete-time simulation; digital optimization; Fibonacci search; ravine search; gradient methods; current research in digital analysis. Offered fall semester only. Students are expected to have completed a Undergraduate Linear Algebra, Advanced Calculus and Computer Programming Language course before enrolling in this course.

MTHS 8650 Data Structures 3 (3) Representation and transformation of information; formal description of processes and data structures; tree and list structures; pushdown stacks; string and formula manipulation; hashing techniques; interrelation between data structure and program structure; storage allocation methods. Offered fall semester only. Prq: Students should have computational maturity before enrolling in this course.

MTHS 8660 Finite Element Method 3 (3) Discusses the basic theory of the finite element method (FEM) for the numerical approximation of partial differential equations. Topics include Sobolev spaces, interpolation theory, finite element spaces, error estimation, and implementation of FEM in one and higher dimensions. Students are expected to have completed a Senior Level or Graduate Scientific Computing, and Undergraduate Advanced Calculus II, or Undergraduate Advanced Calculus I and Graduate Matrix Analysis course before enrolling in this course.

MTHS 8740 Integration Through Optimization 3 (3) Theory, methodology and applications of decomposition, integration and coordination for large-scale or complex optimization problems encountered in engineering design. Topics include conventional and non-conventional engineering optimization algorithms, analysis models and methods, multidisciplinary optimization, analytic target cascading, multi-scenario optimization, and multi-criteria optimization. Case studies are included. May also be offered as ME 8740. Students are expected to have completed a Graduate Mathematical Programming, Scientific Computing, or Engineering Optimization course before enrolling in this course.

MTHS 8810 Mathematical Statistics I 3 (3) Fundamental concepts of sufficiency, hypothesis testing and estimation; robust estimation; resampling (jackknife, bootstrap, etc.) methods; asymptotic theory; two-stage and sequential sampling problems; ranking and selection procedures. Offered spring semester only. Students are expected to have completed a Statistical Inference course before enrolling in this course.

MTHS 8820 Statistics for Experimenters 3 (3) Statistical methods for students who are conducting experiments; introduction to descriptive statistics, estimation and hypothesis testing as they relate to design of experiments; higher-order layouts, factorial and fractional factorial designs, and response surface models. Offered fall semester only. Students are expected to have completed a Multivariable Calculus course before enrolling in this course.

MTHS 8850 Advanced Data Analysis 3 (3) Continuation of MTHS 8050 covering alternatives to ordinary least squares, influence and diagnostic considerations, robustness, special statistical computation methods. Offered spring semester only. Students are expected to have completed a Graduate-level Regression Analysis course before enrolling in this course.

MTHS 8910 Master’s Thesis Research 1-2 (1-2) Master’s Thesis Research

MTHS 8920 Master’s Project Course 1 (1) For students in the non-thesis option of the MS degree program in Mathematical Sciences. Successful completion includes a presentation of the master’s project to the student’s advisory committee and acceptance of the paper by the committee.

MTHS 9000 Seminar in Preparing for College Teaching in the Mathematical Sciences 3 (3) Elements involved in being a college professor with emphasis on broadening the student’s mathematical experiences within a framework of improving classroom performance. Students are expected to have completed the departmental PhD qualifying examinations before enrolling in this course.

MTHS 9010 Probability Theory I 3 (3) Axiomatic theory of probability; distribution functions; expectation; Cartesian product of infinitely many probability spaces, and the Kolmogorov consistency theorem; models of convergence; weak and strong laws of large numbers. Students are expected to have completed a Graduate Measure and Integration course, and a Introductory Probability course before enrolling in this course.

MTHS 9020 Probability Theory II 3 (3) Continuation of MTHS 9010; characteristic functions, infinitely divisible distributions, central limit theorems, laws of large numbers, conditioning, and limit properties of sums of dependent random variables, conditioning, martingales. Students are expected to have completed a Measure-theoretic Probability course before enrolling in this course.

MTHS 9270 Functional Analysis 3 (3) Linear operators on specific spaces, spectral theory, semigroups of operators and the Hille-Yosida theorem, applications of linear spaces and operators, convexity. Students are expected to have completed a Graduate Linear Algebra course before enrolling in this course.

MTHS 9350 Algebraic Number Theory 3 (3) Covers arithmetic of number fields and number rings. Covers prime decomposition, ideal class groups, unit groups of number fields and distribution of prime ideals in number fields. Provides an overview of completions absolute values and valuation theory. Students are expected to have completed a Graduate Abstract Algebra course before enrolling in this course.

MTHS 9520 Analytic Number Theory 3 (3) The theory of Fourier analysis and complex analysis are essential to modern number theory. Course focuses on applications of this theory to number theory, such as the proof of the prime number theorem and the connection of complex L-series to the distribution of primes and to arithmetic geometry. Students are expected to have completed a Graduate Linear Analysis course before enrolling in this course.

MTHS 9540 Advanced Graph Theory 3 (3) Continuation of MTHS 8540 including the four-color theorem, domination numbers, Ramsey theory, graph isomorphism, embeddings, algebraic graph theory and tournaments. Research papers are also examined. Offered fall semester only. Students are expected to have completed a Graduate Graph Theory course before enrolling in this course.

MTHS 9700 Directed Studies in Mathematical Sciences I-3 (1-3) Directed individual studies on topics in the mathematical sciences supervised by faculty. May be repeated for a maximum of 18 credits.

MTHS 9740 Selected Topics in Mathematical Sciences 3 (3) Advanced topics in the mathematical sciences from current areas of interest presented in lecture format. May be repeated for a maximum of 24 credits, but only if different topics are covered.

MTHS 9810 Selected Topics in Mathematical Statistics and Probability 1-3 (1-3) Advanced topics in mathematical statistics and probability of current interest. May be repeated for credit, but only if different topics are covered.

MTHS 9820 Selected Topics in Analysis I-3 (1-3) Advanced analysis topics from current problems of interest. May be repeated for credit, but only if different topics are covered.
NURS 8040 Knowledge Development in Advanced Nursing 3 (3) Developmental, psychodynamic, social-political and cultural theories and concepts are synthesized and applied to the analysis of health and illness in communities and in families across the life cycle. Roles and functions of advanced practice nurses in promoting community health and family health are examined.

NURS 8040 Knowledge Development in Advanced Nursing 2 (2) Nursing theories and theories relevant to nursing practice and research; processes of theoretical thinking and critical thinking applied to health problems and needs of individuals and their families in the community; theoretical and conceptual models of contemporary practice and research.

NURS 8050 Pharmacotherapeutics for Advanced Practice Nursing 3 (3) Prescription administration and patient/family education in use of pharmacological agents emphasizing drugs prescribed for common or chronic illnesses; drug selection; adverse drug reactions; age-related differences in utilization; regulations affecting nurses' prescriptive authority. Prereq or concurrent enrollment: NURS 8050 or NURS 8090.

NURS 8060 Advanced Assessment for Nursing 3 (2) Comprehensive assessment and diagnosis of health problems and status for individuals of all ages including assessment of familial assessment, physical and laboratory/radiologic diagnostic assessments; directed laboratory experiences in advanced assessment of clients of several ages. Coreq: NURS 8061.

NURS 8061 Advanced Assessment for Nursing Laboratory 0 (3) Non-credit laboratory to accompany NURS 8060. Coreq: NURS 8060.

NURS 8070 Nursing Research Design and Methods 3 (3) Quantitative and qualitative research methodologies useful and appropriate to clinical nursing practice and for the development of nursing knowledge; ethics with human subjects; does not include thesis advisement. Student must select chairperson prior to enrollment. Prereq: NURS 8040 and NURS 8080.

NURS 8080 Nursing Research Statistical Analysis 2 (2) Encompasses the use of quantitative research methods in nursing science. Topics include descriptive and inferential methodologies, epidemiology and appropriate statistic selection. Computer use is integrated to emphasize applications to nursing. Students are expected to have completed an undergraduate statistics course before enrolling in this course.

NURS 8090 Pathophysiology for Advanced Practice Nursing 3 (3) Human response to health alterations as they impact nursing knowledge and practice; recognition of the manifestations of health alterations and developing nursing interventions accordingly.

NURS 8100 Instructional Technologies for Nursing Educators 3 (3) Provides novice and experienced nurse educators an opportunity to integrate emerging instructional technologies. Covers theories and trends that support the use of technologies for the enhancement of teaching and learning. Emphasizes the integration of education technologies and the evaluation of current technologies to enhance instruction.

NURS 8110 Developing Family in Primary Care 2 (2) Theories related to nursing management in the care of women's health and developing families. Students apply critical thinking to health problems and needs of women and developing families, related nursing issues, and current research. Prereq: NURS 8060.

NURS 8120 Developing Family Nursing 4 (2) Theories and concepts related to nursing management in the care of developing families; critical thinking applied to health problems and needs of developing families before, during and immediately following pregnancy; application of related nursing issues and current research; clinical practice with developing families in a variety of settings. Prereq: NURS 8010 and NURS 8040 and NURS 8050 and NURS 8060 and NURS 8090. Coreq: NURS 8191.

NURS 8191 Developing Family Nursing Laboratory 0 (6) Non-credit laboratory to accompany NURS 8190. Coreq: NURS 8190.

NURS 8200 Child and Adolescent Nursing 4 (2) Advanced nursing roles and functions applied to health promotion, health maintenance, health restoration, habilitation and rehabilitation of infants, children and adolescents with existing or potential health problems. Critical thinking is used to assess, diagnose, intervene and promote continuity of care with clients of these ages irrespective of setting. Prereq: NURS 8010 and NURS 8040 and NURS 8050 and NURS 8060 and NURS 8090; and either NURS 8190 (Maternal/Child CNS students only) or NURS 8210 (Family Practitioner students only). Coreq: NURS 8021.

NURS 8201 Child and Adolescent Nursing Laboratory 0 (6) Non-credit laboratory to accompany NURS 8201. Coreq: NURS 8201.

NURS 8210 Adult Nursing 4 (2) Roles and functions embodied in advanced practice applied to the health promotion and clinical management of common or chronic health problems of adults within the context of family; clinical practice with adult clients in a variety of settings. Prereq: NURS 8010 and NURS 8040 and NURS 8050 and NURS 8060 and NURS 8090. Coreq: NURS 8211.

NURS 8211 Adult Nursing Laboratory 0 (6) Non-credit laboratory to accompany NURS 8210. Coreq: NURS 8210.

NURS 8220 Gerontology Nursing 4 (2) Roles and functions of advanced practice applied to the preventive, restorative and rehabilitative care of the older adult with existing or potential health problems; clinical practice in a variety of settings. Prereq: NURS 8010 and NURS 8040 and NURS 8050 and NURS 8060 and NURS 8090. Coreq: NURS 8221.

NURS 8221 Gerontology Nursing Laboratory 0 (6) Non-credit laboratory to accompany NURS 8220. Coreq: NURS 8220.

NURS 8230 Nurse Practitioner Clinical Practicum 6 (18) Guided practice applying advanced nursing knowledge in family nursing and advanced practice roles (clinical nurse specialist, case manager and/or practitioner); joint preceptor and faculty guidance and supervision in the care of selected populations in a variety of health care settings. Prereq: FNP track: NURS 8190 and NURS 8200 and NURS 8210 and NURS 8220; GNP track: NURS 8220 and NURS 8820 and NURS 8840; A/GNP track: NURS 8210 and NURS 8220 and NURS 8820 and NURS 8840.

NURS 8250 Leadership in Health-Care Systems 3 (3) Examines health-care systems and delivery across the continuum. Emphasizes complexity, influence of internal and external environments, assessment of strengths and opportunities, strategic planning, leadership theories and leading change. Explores implications for middle and executive level health-care leaders.
NURS 8260 Quality and Outcomes Management in Health Care 4 (3) Examines the science of systems improvement including the models, methods and tools of process analysis and improvement applied to health care. Emphasis is on designing outcome and evidence-based safe and efficient processes and workflows to achieve customer satisfaction and targeted outcomes. Practicum with quality experts permits guided application of classroom content. Preq: NURS 8250 or consent of instructor. Coreq: NURS 8261.

NURS 8261 Quality and Outcomes Management in Health Care Laboratory 0 (3) Non-credit laboratory to accompany NURS 8260. Coreq: NURS 8260.

NURS 8270 Foundations of Nursing Education 3 (3) Exploration of the foundations of nursing education. Emphasizes curriculum development in nursing for the collegiate or continuing education areas. Current issues and research that influence nursing education. Preq: Enrolling in Nursing program.

NURS 8280 The Nurse Educator 4 (1) Roles and functions of nurse educators applied to education of nurses and nursing students in collegiate and continuing education nursing education programs; current issues and research in classroom, laboratory; and continuing education programs. A teaching practicum is required. Preq: NURS 8270. Coreq: NURS 8281.

NURS 8281 The Nurse Educator Laboratory 0 (9) Non-credit laboratory to accompany NURS 8280. Coreq: NURS 8280.

NURS 8290 Theories and Models of Clinical Specialization 3 (3) Caregiver, researcher, manager, teacher and consultant roles of the clinical nurse specialist in a variety of settings; theories, models and health care issues underlying the role of clinical nurse specialist. Preq: NURS 8040 and CNS graduate option; or consent of instructor.

NURS 8300 Clinical Specialty Practicum in Nursing 6 (18) Advanced practice in a selected area of specialization in nursing that emphasizes application of the clinical specialist role. Preq: NURS 8290 and another of the following: NURS 8190 or NURS 8200 or NURS 8210 or NURS 8220 or NURS 8820 or NURS 8840; or consent of instructor.

NURS 8310 Clinical Research 1-3 (1-3) Critical thinking and methodologies of scientific inquiry applied to clinical issues/problems encountered in advanced nursing. May be repeated for a maximum of three credits. To be taken Pass/No Pass only. Preq: NURS 8040.

NURS 8460 Healthcare Financial Management 3 (3) Analysis of financial theory and practice for healthcare executives. Includes methods of financial reporting and defines accounting practices for decision making and operating activities. Includes processes for measuring and reporting financial information, analysis, interpretation and use of financial information for planning and controlling the healthcare business. Students must have completed an undergraduate accounting course before enrolling in this course.

NURS 8470 Internship 4 (1) Guided practice to apply advanced nursing knowledge in nursing administration in the advanced practice role; joint preceptor and faculty guidance and supervision in the administrative management and care with selected populations in a variety of health care settings. Preq: NURS 8250 and NURS 8260 and NURS 8460; or consent of instructor. Coreq: NURS 8471.

NURS 8471 Internship Laboratory 0 (9) Non-credit laboratory to accompany NURS 8460. Coreq: NURS 8470.

NURS 8480 Health Care Policy and Economics 3 (3) Reciprocal relationship between client, community, health care system, sociocultural and economic variables and policy making; analysis and synthesis of these relationships and their impact on the role and responsibility of the advanced practice nurse and nurse administrator.

NURS 8500 Information and Control Systems for Nursing Leadership 3 (3) Computer-based systems of information management and control for nursing environments. Explores data needed for cost-efficient use of nursing resources and effective systems of monitoring, quality assurance, and control; information systems as tools useful to humanistic nursing practice, human resource management and solution of professional and scientific problems.

NURS 8790 Special Topics in Nursing 1-12 (1-12) In-depth seminar on selected topics such as therapeutic communication, legal and ethical issues in nursing, and health care and political process in health. Preq: Consent of instructor.

NURS 8820 Primary Care for Elders 4 (2) Application of theories and functions of advanced practice in the management of frailty in old age; prevention of early disability and dependence; maintenance of function, independence and self care; cultural, social and ethical issues. Preq: NURS 8010 and NURS 8040 and NURS 8050 and NURS 8060 and NURS 8090. Coreq: NURS 8821.

NURS 8821 Primary Care for Elders Laboratory 0 (6) Non-credit laboratory to accompany NURS 8820. Coreq: NURS 8820.

NURS 8830 Frail Elders in Primary Care 2 (2) Explores the roles and functions of advanced practice nurses in the management of frailty in old age. Focus is on preventing early disability and dependence, maintaining function, independence, and self care. Cultural, social and ethical issues are also addressed. Preq: NURS 8060.

NURS 8840 Mental Health and Illness of Adults 4 (2) Psychosocial, developmental, spiritual and cultural theories are synthesized and applied to the analysis of mental health and illness in adulthood. Considers roles and functions of advanced practice nurses in promoting the mental health of adults and their families. Clinical practice in the community is incorporated. Preq: NURS 8010 and NURS 8040 and NURS 8050 and NURS 8060 and NURS 8090. Coreq: NURS 8841.

NURS 8841 Mental Health and Illness of Adults Laboratory 0 (6) Non-credit laboratory to accompany NURS 8840. Coreq: NURS 8840.

NURS 8850 Mental Health in Primary Care 2 (2) Psychological, developmental, spiritual and cultural theories are synthesized in the analysis of mental health and illness in adulthood. Roles and functions of advanced practice nurses in promoting the mental health of individuals and their families are examined. Preq: NURS 8060.

NURS 8890 Special Problems in Nursing 1-6 (1-6) Problems selected to meet special and individualized interests of students. Up to six hours of NURS 8890 may be taken as elective credit. Preq: Consent of instructor.

NURS 8910 Master's Thesis Research 1-12 (1-12) Research activities related to thesis; minimum of six hours required.

NUTR 6010 Fundamentals of Nutrition 3 (3) Biochemical and physiological fundamentals of nutrition applicable to man and domestic animals. Considers digestive processes and absorption and metabolism of carbohydrates, lipids, proteins, fibers, minerals, and vitamins. Discusses energy metabolism and comparative anatomy and physiology of digestive systems. Offered fall semester only. Preq: BCHM 3050, CH 2230, or consent of instructor.

NUTR 6240 Medical Nutrition Therapy I 4 (3) Principles of nutritional assessment, education, and counseling skills; development of medical nutrition therapy for individuals with obesity and eating disorders, gastrointestinal disorders, metabolic and renal disorders. Preq: BIOL 2220 and BIOL 2230 and NUTR 4510 or consent of instructor. Coreq: NUTR 6241.

NUTR 6241 Medical Nutrition Therapy I Laboratory 0 (3) Non-credit laboratory to accompany NUTR 6240. Coreq: NUTR 6240.

NUTR 6250 Medical Nutrition Therapy II 4 (3) Development of medical nutrition therapy for individuals with various disease states, including cardiovascular, hepatic, musculoskeletal, and neuroplastic disorders. Also considers sociocultural and ethnic aspects of food consumption and alternative nutrition therapies. Preq: BIOL 2220 and BIOL 2230 and NUTR 4240. Coreq: NUTR 6251.

NUTR 6251 Medical Nutrition Therapy II Laboratory 0 (3) Non-credit laboratory to accompany NUTR 6250. Coreq: NUTR 6250.

NUTR 6260 Community Nutrition 3 (3) Study of fundamentals of nutrition care delivery in community programs beginning with assessment and problem identification and continuing through the development, implementation, and evaluation of nutrition intervention programs. Preq: NUTR 2030 and NUTR 4510.

NUTR 6510 Human Nutrition 3 (3) Advanced concepts of nutrition, including physiological handling of nutrients, nutrient-nutrient interactions, and principles of nutritional deficiency and over-nutrition. Factors affecting methods of determining nutritional status, development of nutrition standards, and recent advances in human nutrition. Preq or concurrent enrollment: BCHM 3050; or consent of instructor.
NUTR 6550 Nutrition and Metabolism 3 (3) Concepts of metabolism fundamental to understanding normal and therapeutic nutrition are examined. Bioenergetics as well as metabolism of carbohydrates, lipids, amino acids, vitamins, and minerals as they relate to nutrition are discussed. Preq: BCHM 3050 and BIOL 2220. Preq or concurrent enrollment: BIOL 2230.

NUTR 7060 Nutrition for Teachers 3 (3) Principles of nutrition applied to nutrition education. Preq: Consent of instructor.

NUTR 8010 Topical Problems in Nutrition 1-3 (1-3) Topics not covered in other courses or by thesis research. Credit varies with problems selected.

NUTR 8020 Special Topics in Nutrition 1-3 (1-3) Topics of special interest or contemporary subjects not examined in other courses.

NUTR 8030 Advanced Human Nutrition 4 (4) Biochemistry and physiology related to human nutrition and their application to formation and adoption of healthy eating patterns. Emphasis is on individual nutrients in the context of healthy eating patterns throughout the life cycle and on recent advances in human nutrition. Preq: BCHM 3050 and NUTR 4510; or consent of instructor.

NUTR 8040 Nutrition Education of the Public 3 (3) Analysis of community-based food and nutrition programs to include management, program provision, outcome-based evaluation and integration of services. Emphasis is on outcome-based nutrition education across the lifespan, management and integration of multiple services for targeted population, and public policy development. Preq: NUTR 4260 or consent of instructor.

NUTR 8050 Metabolic Basis of Medical Nutrition Therapy 3 (3) Integration of metabolism and pathophysiology into medical nutrition therapy recommendations. Preq: BIOL 2220 and BIOL 2230 and NUTR 4240 and NUTR 4250; or consent of instructor.

NUTR 8060 Dietetic Internship 1-6 (1-6) Internship consisting of preceptor-supervised and faculty-led dietetic experiences in community, clinical and food service settings. Must be taken for six credits during the internship rotations. Preq: Acceptance into the Dietetic Internship Program.

NUTR 8070 Current Issues in Culinary Nutrition Science 3 (3) Applies the science and practice of healthy cooking to the foods of today and explores the development of future food products. Students participate in research on current issues relevant to the interconnections between food, its preparation, and the consumer.

NUTR 8510 Nutrition Seminar I 1 (1) Current research and developments in nutrition. Topics, selected by the instructor and students, come from student research and nutrition literature. May be repeated for a maximum of two credits, but only if different topics are covered.

NUTR 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

NUTR 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

PUBLIC ADMINISTRATION

PADM 7020 Research Methods for Public Administration 3 (3) Use of social science research methods for addressing issues in public management and policy; research design; measurement; sampling and polling; various aspects of locating, collecting and processing data, including survey design and archive searches.

PADM 8210 Perspectives on Public Administration 3 (3) Study and practice of public administration in the United States in the 20th century; historical development of the field of public administration; current approaches to the study and practice of public administration.

PADM 8220 Public Policy Process 3 (3) Major models of policy making including incrementalism, rationalism, pluralism and elitism; selected areas of public policy including transportation, poverty, energy and the environment.

PADM 8270 Public Personnel Administration 3 (3) Organization, techniques and theories of personnel management; interpersonal relations in organizations; personnel change and development; changing conditions in the public service; educational specializations, unions, collective bargaining, etc.; ethics for the public service.

PADM 8290 Public Financial Management 3 (3) Organization and techniques of government financial management; budgetary theories; intergovernmental financial relations.

PADM 8300 Constitutional Law for Public Administration 3 (3) Overview of American constitutional law legal issues related to public administration including the delegation of power, separation of powers, due process and civil rights and liberties. May not be taken for credit by students who have taken POSC 6320 or POSC 6330.

PADM 8400 Administrative Law 3 (3) Legislative, adjudicative and general policy-making powers of administrative agencies and regulatory commissions; the scope of judicial review of administrative action; directed primarily toward the analysis of the political nature of bureaucracy.

PADM 8410 Public Data Analysis 3 (3) Considers various aspects of database management, storage and retrieval; data description; univariate, bivariate and multivariate analysis in public studies and decision-making theory. Preq: EXST 3010 and MTHS 3010.

PADM 8600 American Government 3 (3) Examines literature of the American political system, its institutions and processes.

PADM 8620 Administrative Leadership 3 (3) Foundations of leadership in public organizations; personal and organizational values underlying decision processes in the public service.

PADM 8630 Contemporary Administrative Organizations 3 (3) Problems, processes and theories of communication, decision-making, agency planning and control in administrative agencies.

PADM 8670 State Government Administration 3 (3) State government problems and policy issues emphasizing the modernization of government institutions and comparative state politics.

PADM 8680 Local Government Administration 3 (3) Administration of local government from the perspective of the professional administrator; the growth of the manager form of local government; the role of local government administrators with regard to policy making, management and the delivery of services.

PADM 8770 Public Policy Evaluation Seminar 3 (3) Investigates conceptual and analytic issues in policy and program evaluation including problem definition, goal setting and criteria formulation; design of evaluation research; indicator design; treatment of uncertainty; and special problems raised by constraints of the political context.

PADM 8780 Selected Topics in Public Administration 3 (3) In-depth study of an applied problem in public administration as seen through the practitioner’s eyes; investigates the methods used to address these problems. May be repeated for credit, but only if different topics are covered.

PADM 8790 Internship in Public Administration 1-3 (1-3) Internship with a government agency requiring a written report detailing the experience.

PADM 8800 Capstone Seminar in Public Administration 3 (3) Term project integrating the material from other courses in the analysis of a contemporary public administration problem. Field work and applied project required. Students must have completed thirty credit hours toward the MPA degree before enrolling in this course. Preq: Consent of instructor.

PADM 8910 Master’s Thesis Research 1-6 (1-6) Master’s Thesis Research

PAN AFRICAN STUDIES

PAS 6980 Seminar on Pan African Studies 3 (3) Research/writing seminar on the African American experience. Selected topics and themes from 1900 to present. Preq: HIST 3110, 3120, or 3390, PAS 3010.

PLANNING, DESIGN, AND THE BUILT ENVIRONMENT

PDBE 8010 Advanced Theory in Environmental Design and Planning 3 (3) Critical assessment of history and theory in the fields of design, planning and construction. Topics include scientific knowledge, interpretive and critical inquiry, theories of urban form and human settlement. Students are expected to have completed a Master's-level course in theory related to design, planning and construction before enrolling in this course.

PDBE 8040 Readings in Real Estate 3 (3) Historical and contemporary readings in real estate designed to provide exposure and depth of coverage for important works in the field. May be repeated for a maximum of six credits. Preq: Student in Planning, Design and the Built Environment.

PDBE 8050 Readings in Architecture 3 (3) Historical and contemporary readings in architecture designed to provide exposure and depth of coverage for important works in the field. May be repeated for a maximum of six credits. Preq: EDP 8010 and consent of instructor.
PDIE 8060 Readings in Landscape Architecture 3 (3) Historical and contemporary readings in landscape architecture designed to provide exposure and depth of coverage for important works in the field. May be repeated for a maximum of six credits. Prq: EDP 8010 and consent of instructor.

PDIE 8070 Readings in City and Regional Planning 3 (3) Historical and contemporary readings in city and regional planning designed to provide exposure and depth of coverage for important works in the field. May be repeated for a maximum of six credits. Prq: EDP 8010 and consent of instructor.

PDIE 8080 Readings in Construction Science and Management 3 (3) Historical and contemporary readings in construction science and management provide exposure and depth of coverage for important works in the field. May be repeated for a maximum of six credits. Prq: EDP 8010 and consent of instructor.

PDIE 8100 Contemporary Issues in Environmental Design and Planning 3 (3) Interdisciplinary seminar providing an overview of theory and methods related to environmental design and planning. With that background, focus is on important contemporary and emerging issues affecting the built environment. Prq: CRP 8700 or POST 8700; or consent of instructor.

PDIE 8120 Seminar in Environmental Design and Planning 1 (1) Weekly colloquium to provide a forum for students and invited speakers to address important issues of the day. May be repeated for a maximum of four credits.

PDIE 8150 Research Design in Environmental Design and Planning 3 (3) Philosophy and method of scientific research. Within that context, students prepare a preliminary proposal for their dissertation research. Prq: EDP 8010 and EXST 8010.

PDIE 8160 Research Design Practicum 3 (3) Provides an opportunity to improve and test the ability to employ the craft of research by carrying through a semester-length research project that will fulfill the preliminary research for the student's dissertation project. Prq: Consent of instructor.

PDIE 8200 Instructional Design Delivery 3 (3) Presents information on teaching technique including discussions of cognitive learning, motivation, course organization, interactive lecturing and experiential learning.

PDIE 9000 Directed Studies 3 (3) Special topics not covered in other courses. Emphasizes field studies, research activities and current developments in architecture, construction science and management, landscape architecture and planning. May be repeated for a maximum of six credits. Prq: Consent of advisor.

PLANT AND ENVIRONMENTAL SCIENCES

PES 8250 Seminar 1 (1) Special topics and original research in plant and environmental sciences. To be taken Pass/No Pass only.

PES 8260 Scientific Writing 1 (1) Written communication in the plant sciences. To be taken Pass/No Pass only.

PES 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

PES 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

PHYS 8410 Electromagnetics I 3 (3) Study of the foundations of electromagnetic theory. Topics include electric fields, electric potential, dielectrics, electric circuits, solution of electrostatic boundary-value problems, magnetic fields, and magnetostatics. Prq: PHYS 2210 and MTHS 2080, or consent of instructor.

PHYS 8420 Electromagnetics II 3 (3) Continuation of PHYS 4410. Study of foundations of electromagnetic theory. Topics include magnetic properties of matter, microscopic theory of magnetization, electromagnetic induction, magnetic energy, AC circuits, Maxwell's equations, and propagation of electromagnetic waves. Other topics may include waves in bounded media, antennas, electrodynamics, special theory of relativity, and plasma physics. Prq: PHYS 4410 or consent of instructor.

PHYS 8450 Solid State Physics I 3 (3) Topics include an overview of crystal structures, chemical and atomic bonding, and periodicity in relation to solid materials. Covers electronic, thermal, and magnetic properties of materials, electrical conduction in metals and semiconductors. Overview of the role of electrons and phonons and their interactions are presented.

PHYS 8460 Solid State Physics II 3 (3) Continuation of PHYS 4450, including selected topics in solid-state physics such as optical properties, superconductivity, non-crystalline solids, dielectrics, ferroelectrics, and nanomaterials. Plasmons, polarons, and excitons are discussed. Brief introduction into methods of solid-state synthesis and characterization tools is presented. Prq: PHYS 4450 or consent of instructor.

PHYS 8520 Nuclear and Particle Physics 3 (3) Study of our present knowledge concerning subatomic matter. Experimental results are stressed. Topics include particle spectra, detection techniques, Regge pole analysis, quark models, proton structure, nuclear structure, scattering and reactions.

PHYS 8550 Quantum Physics I 3 (3) Discussion of solution of the Schroedinger equation for free particles, the hydrogen atom, and the harmonic oscillator. Prq: PHYS 3220 and PHYS 4410, or consent of instructor.

PHYS 8560 Quantum Physics II 3 (3) Continuation of PHYS 4550. Application of principles of quantum mechanics as developed in PHYS 4550 to atomic, molecular, solid state, and nuclear systems. Prq: PHYS 4550.

PHYS 8650 Thermodynamics and Statistical Mechanics 3 (3) Study of temperature development of the laws of thermodynamics and their application to thermodynamic systems. Introduction to low temperature physics is given. Prq: Six hours of physics beyond PHYS 2220 or consent of instructor.

PHYS 8750 Selected Topics 1-3 (1-3) Comprehensive study of a topic of current interest in the field of physics. May be repeated for a maximum of six credits, but only if different topics are covered. Prq: Consent of instructor.

PHYS 8810 Methods of Theoretical Physics I 3 (3) Analytical methods and techniques used in theoretical physics; vector and tensor analysis as applied to physical problems, use of matrices and groups in classical and quantum mechanics, complex variables and partial differential equations of physics.
PHYS 8160 Application of Polymers in Packaging Laboratory 0 (3) Non-credit laboratory to accompany PKSC 6160. Coreq: PKSC 6160.

PKSC 6200 Package Design and Development 3 (2) Study of the principles and methods practiced in designing and developing packages and packaging systems and of methods used to coordinate and analyze package development activities including interfacing with product development, manufacturing, marketing, purchasing, and accounting. Preq: Second semester Senior standing and PKSC 3200 and PKSC 3680 and PKSC 4010 and PKSC 4040 and PKSC 4160 PKSC 4300 PKSC 4400 and PKSC 4640 or consent of instructor. Coreq: PKSC 6201.

PKSC 6201 Package Design and Development Laboratory 0 (3) Non-credit laboratory to accompany PKSC 6200. Coreq: PKSC 6200.

PKSC 6300 Converting for Flexible Packaging 3 (1) Study of materials, methods, processes, and equipment used in converting web materials for flexible packaging. Laboratory provides hands-on experience preparing and operating pilot-scale converting equipment. Preq: PKSC 2040 or consent of instructor. Coreq: PKSC 6301.

PKSC 6301 Converting for Flexible Packaging Laboratory 0 (6) Non-credit laboratory to accompany PKSC 6300. Coreq: PKSC 6300.

PKSC 6400 Packaging for Distribution 3 (3) Packages are exposed to various shipping methods and numerous hazards during distribution. To ensure adequate product protection, packaging professionals need to understand the fundamental principles of distribution packaging design. Topics include ASTM and ISTA packaging test methods, packaging design guidelines for distribution, transportation, and protective packaging materials. Preq: PKSC 4040 or consent of instructor.

PKSC 6540 Product and Package Evaluation Laboratory 1 (3) Laboratory experiments to determine properties of packaging materials and to evaluate the response of packages and products to shock, vibration, and compression. Students operate standard testing equipment and become familiar with industry recognized test methods and standards. Preq or concurrent enrollment: PKSC 6640.

PKSC 6640 Food and Health Care Packaging Systems 4 (3) Characteristics, engineering properties, and applications of various materials and systems used in the packaging of foods, pharmaceuticals, and medical devices. Packaging systems for specific food and medical applications are considered. Laboratory and field exercises on food and medical packaging operations and packaging materials are included. Emphasis is on evaluation methods. Preq: One of PKSC 2010 or DSC 2140; and PKSC 2040; or consent of instructor. Coreq: PKSC 6641.
PKSC 6641 Food and Health Care Packaging Systems Laboratory 0 (3) Non-credit laboratory to accompany PKSC 6640. Coreq: PKSC 6640.

PKSC 8080 Biopolymers in Packaging 3 (3) In-depth study of the chemical characteristics of biological-based polymers and how these materials can be used in packaging. Students review literature, organize and present material. Prq: Consent of instructor.

PKSC 8170 Packaging Materials: Science and Technology 3 (3) In-depth study of the structure, properties, manufacturing processes and applications of packaging materials. A classical materials science approach is utilized to contrast metals, ceramics, polymers and composites in packaging applications. Course sections include structure, properties and manufacturing of packaging materials. Prq: Consent of instructor.

PKSC 8210 Selected Topics 1-4 (1-4) Independent research investigations in packaging science related to packaging materials, machinery, design and applications in areas not covered in other courses. May be repeated for credit. Prq: Consent of instructor.

PKSC 8220 Selected Topics 1-4 (1-4) Selected topics in packaging science not covered in detail or contained in other courses. May be repeated for credit. Prq: Consent of instructor.

PKSC 8510 Packaging Science Seminar 1 (1) Current research and related developments in packaging science reviewed by faculty, students and invited lecturers. May be repeated for a maximum of four credits. Prq: Consent of instructor.

PLANT PATHOLOGY
PLPA 6060 Diseases and Insects of Turfgrasses 2 (2) Host-parasite relationships, symptomatology, diagnosis, economics, and control of infectious diseases of turfgrasses and life histories, diagnoses and control of important insect pests of turfgrasses. Prq: ENT 3010 and PLPA 3100.

PLPA 6080 Diseases and Insects of Turfgrasses Laboratory 1 (3) Laboratory to complement PLPA 4060 or ENT 4060 to learn symptomatology, diagnosis, and control of infectious diseases of turfgrasses and diagnosis of damage caused by important insect pests of turfgrasses. Prq: PLPA 4060 or ENT 4060.

PLPA 6110 Plant Disease Diagnosis 1 (3) Methods and procedures used in the diagnosis of plant diseases, especially late spring and early summer diseases. Basic techniques of pure culture and identification of plant pathogens and Koch’s postulates are taught. Diagnosis of a wide variety of diseases of cultivated and wild plants is carried out. Offered summer session only. Prq: PLPA 3100. Coreq: PLPA 6111.

PLPA 6111 Plant Disease Diagnosis 1 Laboratory 0 (3) Non-credit laboratory to accompany PLPA 6110. Coreq: PLPA 6110.

PLPA 6250 Introductory Mycology 3 (3) Introduction to the biology of all the groups of fungi and some related organisms, with considerations of the taxonomy, morphology, development, physiology, and ecology of representative forms. Prq: BIOL 1040 and BIOL 1060; or BIOL 1110. Prq or concurrent enrollment: BIOL 4260 or PLPA 4260.

PLPA 6260 Mycology Practicum 2 (1) Application of the principles of mycological techniques, microscopic study of fungi. Examples from all major groups of fungi are included. Prq or concurrent enrollment: BIOL 4250 or PLPA 4250. Coreq: PLPA 6261.

PLPA 6261 Mycology Practicum Laboratory 0 (2) Non-credit laboratory to accompany PLPA 6260. Coreq: PLPA 6260.

PLPA 6540 Plant Virology 4 (3) Study of plant viruses: their morphology, biochemistry, purification, and transmission; symptoms resulting from virus infection; virus-vector relationships. Serological and nucleic acid hybridization procedures. Diagnosis of viral diseases and the identification of causal agents. Replication of plant viruses, the interaction between viral and plant genome. Control of plant viral diseases. Prq: BCHM 3010 or BCHM 3050 or MIRC 3050. Coreq: PLPA 6540.

PLPA 6541 Plant Virology Laboratory 0 (1) Non-credit laboratory to accompany PLPA 6540. Coreq: PLPA 6541.

PLPA 6590 Plant Nurmitology 3 (2) Introduction to nematodes emphasizing plant parasitic nematodes. Introduces morphology of nematodes as it relates to their taxonomic position and ability to cause disease. Includes diagnosis and control of nematode diseases, along with use of nematodes in studies of molecular interaction and genetics involvement in development resistance. Prq: PLPA 3100.

PLPA 6591 Plant Nematology Laboratory 0 (3) Non-credit laboratory to accompany PLPA 6590. Coreq: PLPA 6591.

PLPA 6700 Molecular Plant Pathogen Interactions 3 (3) Study of the interactions of plants and pathogens at the molecular level. Investigates the molecular and genetic components of plant diseases and how these can be used for improvement and understanding of how diseases occur and how these can be used for possible disease management. Prq: PLPA 3100.

PLPA 8020 Selected Topics 1-3 (1-3) Current advances in phytopathology and physiology, diseases of specific crops and specialized laboratory protocols. May be repeated for credit. Prq: Consent of instructor. Coreq: PLPA 8021.

PLPA 8021 Selected Topics Laboratory 0 (3) Non-credit laboratory to accompany PLPA 8020. Coreq: PLPA 8021.

PLPA 8050 Special Problems in Plant Pathology 1-12 (1-12) Research not related to a thesis. Prq: PLPA 4110.

PLPA 8070 Seminar 1 (1) Areas of plant pathology and plant physiology not covered by formal courses. Relevant literature is reviewed. Material is organized and presented by students. To be taken Pass/No Pass only.

PLPA 8090 Analytical Techniques in Plant Science 3 (2) Theory of and practice in current techniques of separation science; hands-on experience with extraction, isolation and characterization of chemical compounds associated with plants and microorganisms using techniques such as thin layer chromatography, gas chromatography, mass spectrophotometry, high pressure liquid chromatography and electrophoresis. Prq: BCHM 4230 and CH 2230 and CH 2240. Coreq: PLPA 8091.

PLPA 8091 Analytical Techniques in Plant Science Laboratory 0 (1) Non-credit laboratory to accompany PLPA 8090. Coreq: PLPA 8090.

PLPA 8130 Fungal Ecology and Pathology 3 (3) Study of the biology and activities of fungi with emphasis on their interactions with other organisms and roles in natural and managed ecosystems. Includes survey of different types of symbiotic relationships with particular attention to plant pathogens and mycorrhizae and their management. Prq: BIOL 4250 and BIOL 4260. Coreq: PLPA 8131.

PLPA 8131 Fungal Ecology and Pathology Laboratory 0 (3) Non-credit laboratory to accompany PLPA 8130. Coreq: PLPA 8130.

POLITICAL SCIENCE
POSC 6090 Directed Study in American Politics 3-1 (3-1) Supervised reading/research in selected areas of American politics. May be repeated for a maximum of six credits. No more than three hours from POSC 3050, 3100, 3110, 3120, 3130, 4090, 4100 may be applied toward a Political Science minor, or a Global Politics minor. Prq: Consent of instructor.

POSC 6160 Interest Groups and Social Movements 3 (3) Empirical and normative examination of the origins, role, and influence of interest groups and social movements in the United States and of the relationships among interest groups, social movements, and democratic theory. Prq: Consent of instructor.

POSC 6210 Public Policy 3 (3) Introduction to the major approaches to public policy making in American government. Topics include theories and models of policy making, the identification of policy problems, agenda setting, the formulation and adoption of policy, implementation, and program evaluation. Prq: Consent of instructor.

POSC 6230 Urban Politics 3 (3) Examines the nature and scope of politics in urban communities and offers an analysis of urban governance, especially in the interaction of public authority and private institutions in metropolitan areas. Emphasis is on the structure, processes, and problems challenging governments in urban America. Prq: Consent of instructor.

POSC 6240 Federalism and Intergovernmental Relations 3 (3) Introduction to the historical, theoretical, legal, and fiscal aspects of constitutionally divided government. Federal, state, and local division of responsibility for public services is emphasized, along with the emerging devolution of those responsibilities from the federal government to states and localities. Prq: Consent of instructor.
POSC 6270 Public Management 3 (3) Examination of emerging management problems and issues facing federal, state, and local government and the application of management principles, practices, and techniques of public administration. Preq: Consent of instructor.

POSC 6280 National Security Policy 3 (3) National security threats and policy decision making. Issues covered include weapons of mass destruction, terrorism, organized crime, narcotics, arms control, intelligence, and homeland security. Students deliberate and assess threat priorities and crisis management. Preq: Consent of instructor.

POSC 6290 Global Issues 3 (3) Analysis, assessment, and management of the principal threats facing global security today. Topics include rogue nations, regional superpowers, alliances, organized crime, illegal weapons proliferation, and corruption. Emphasis is on the strategies available to the international community for dealing with these threats. Preq: Consent of instructor.

POSC 6370 American Constitutional Law: Rights and Liberties 3 (3) Examination and analysis of Supreme Court decisions and other legal materials in the areas of civil rights and civil liberties, with an emphasis on freedom of speech, freedom of religion, equal protection of the laws, and privacy rights. Preq: Consent of instructor.

POSC 6380 American Constitutional Law: Structures of Government 3 (3) Examination and analysis of Supreme Court decisions and other legal materials in the areas of national power, federalism, the separation of powers, and the role of the judiciary. Preq: Consent of instructor.

POSC 6420 Political Parties and Elections 3 (3) Study of the distinctive features of the American two-party system with emphasis on presidential elections. Parties are examined as formal organizations, coalitions of voters and interest groups, coordinators of nomination and election processes, and managers of policy-making institutions. Preq: Consent of instructor.

POSC 6480 Studies in Political Economy 3 (3) Political economy describes the relationship between social and political order and the production, consumption and trading of goods. Course introduces special topics on political economy and familiarizes students with the work of Smith, Ricardo, Marx, Weber and Hayek. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

POSC 6540 Southern Politics 3 (3) Examination of the unique political environment of the American South, with emphasis on the events and social forces that have shaped politics in the region since World War II. Course material is approached from a variety of perspectives, including history, literature, social themes, and political culture. Preq: Consent of instructor.

POSC 6570 Political Terrorism 3 (3) Examination and analysis of the international phenomenon of terrorism in terms of origins, operations, philosophy, and objectives. Preq: Consent of instructor.

POSC 6580 Political Leadership 3 (3) Comparative examination of political leaders, focusing particularly on types, methods, and consequences of leadership and on the relationship between leaders and followers. Preq: Consent of instructor.

POSC 6610 American Diplomacy and Politics 3 (3) Analyzes the process of making and implementing strategies to protect and promote American national interests. Focuses on the role of government agencies and executive-legislative relations, as well as the participation and influence of interest groups and the media. Includes a five-day seminar in Washington, DC. Preq: Consent of instructor.

POSC 6800 Gender and Politics 3 (3) Examination of the role of gender in politics in the United States and in other countries. Particular emphasis on the role of women in electoral politics, issues of gender, women’s rights as human rights, and feminism. Preq: Consent of instructor.

POSC 6850 Global Affairs and Governments 3 (3) Designed for teachers and education students who wish to learn how to incorporate global affairs more fully into high school curricula. Overview of major topics involving foreign policies and world politics is provided.

POSC 6890 Selected Topics 1-3 (1-3) Intensive examination of a selected area of political science. May be repeated for a maximum of six credits, but only if different topics are covered. Preq: Consent of instructor.

POSC 8140 Public Data Analysis 3 (3) Various aspects of database management, storage and retrieval; data description, univariate, bivariate and multivariate analysis in policy studies and decision-making theory. Preq: EXST 3300 and MATH 3310.

POSC 8200 American Government 3 (3) Literature of the American political system, its institutions and processes.

POSC 8410 Policy Analysis and Political Choice 3 (3) Opportunities and constraints in political systems; political feasibility and policy strategy assessment. Topics include role of power, ideas, organizational interaction, cognitive processes, interest groups, policy analysis, media and random opportunity in determining policy outcomes. Preq: Admission to Policy Studies program or consent of instructor.
POST 8980 Policy Analysis Workshop 3 (6) Provides experience with contemporary policy issues. Students work in small groups with clients compiling information, developing policy options and conducting analysis to address a policy issue. White paper is prepared analyzing policy options and making recommendations to policy makers. Typically taken in fourth semester. Students are expected to have completed three semesters of coursework in Policy Studies program before enrolling in this course.

POST 8990 Selected Topics in Policy Studies 3 (3) Intensive investigation of selected current and emerging public policy issues emphasizing current literature and results of current research. May be repeated for a maximum of six credits, but only if different topics are covered. Prereq: Consent of instructor.

POST 9040 Policy Analysis Seminar I 2 (2) Seminar module focusing on research methodology with readings and discussion. Students are expected to have completed three semesters of coursework in Policy Studies program before enrolling in this course.

POST 9050 Policy Analysis Seminar II 1 (1) Seminar involving student research with articles prepared for a professional audience and presented as part of the seminar. Students are expected to have completed three semesters of coursework in Policy Studies program before enrolling in this course. Prereq: POST 9040.

PRTM 8470 Event Marketing 3 (3) Examine a wide range of activities involved with the marketing of special events. Familiarizes students with event production and promotion and the development of marketing plans for public and private events, meetings, fairs, festivals and expositions.

PRTM 8480 Risk Management for Events and Meetings 3 (3) Focuses on the legal, ethical and financial responsibilities of event managers. Topics include risk identification; risk analysis and the planning of events and festivals; health, safety and fire codes; loss prevention; and security controls. Utilizes practices and procedures used by events and festivals.

PRTM 8490 Sustainable Event Management 3 (3) Examines the impacts events have on the environment. Practices related to reduction of social and environmental impacts have are discussed. Topics include green positioning, carbon reductions, water use and conservation, ethics, and waste management.

PRTM 8500 Sustainable Tourism: Myth or Reality? 3 (3) Provides students with exposure to issues related to developing sustainable tourism, both in developing and developed countries. Emphasis is on understanding global and local politics, policies, environments and social and cultural impacts stemming from developing sustainable tourism.

PRTM 8560 Heritage Tourism 3 (3) Many tourist itineraries invariably contain a heritage component, whether visiting a local museum or witnessing a traditional ceremony. Heritage can be one of the focal points of a vacation. Course offers critical readings and discussion about heritage and its role in tourism.

PRTM 8610 Recreational Sport Administration 3 (3) Administration of recreational sport programs, including management, personnel, finance, liability and risk management, and planning with application to leadership in various recreational sport settings, including community recreation, non-profits and campus recreation.

PRTM 8620 Sports Development Through the Lifespan 3 (3) Explores the role that sports and physical recreation programs play in promoting positive development processes throughout the lifespan. Course focuses on the major domains of human development for children through older adults, with a focus on how activity contexts can best be designed to promote healthy outcomes.

PRTM 8630 Recreational Sport Facility and Venue Management 3 (3) Overview of the management of recreational sport facilities and venues. Topics include in-depth discussions and application of planning models, project management principles, financing capital projects, risk management and legal liability, and current issues and trends in facility and venue management.

PRTM 8810 Therapeutic Recreation Theories and Concepts 3 (3) Provides students with the opportunity to analyze critically the philosophical positions influencing service delivery and the theories underlying therapeutic recreation practice models and service delivery. Prereq: PRTM 8800. Students who have not completed PRTM 8800 but hold an undergraduate degree in Parks, Recreation and Tourism Management should request a registration override from the course instructor.

PRTM 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

PRTM 9000 Selected Topics 1-3 (1-3) In-depth, timely study of trends or problems in parks, recreation and tourism not covered in other courses. May be repeated for a maximum of six credits.

PRTM 9080 Advanced Topics 1-3 (1-3) Topics not covered in other PRTM courses and not directly related to a thesis or dissertation topic. Formal paper is required. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

PRTM 9100 Research Seminar 1 (1) Current research developments in PRTM and presentation of research projects. May be taken for credit for two semesters. To be taken Pass/No Pass only.

PRTM 9110 Professional Issues in Parks, Recreation and Tourism Management 1 (1) Multi-disciplinary perspectives to examine concepts and methods related to professional development of parks, recreation and tourism management graduate students. Prereq: Admission to PRTM graduate program or consent of instructor.

PRTM 9110 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

PSYCHOLOGY

PSYC 6800 Health Psychology 3 (3) Study of the role of health-related behaviors in the prevention, development and/or exacerbation of health problems. Emphasis on behavioral health model and its application in the assessment, treatment, and prevention of health problems.

PSYC 6890 Advanced Topics 3 (3) Seminar in current topics in psychology. Topics change from semester to semester and are announced prior to each semester's registration. May be repeated once for credit, not more than if different topics are covered.

PSYC 8000 Research Design and Quantitative Methods I 3 (3) Overview of applied data analysis in industrial and other work-related settings. Analysis techniques focus on the General Linear Model approach to ANOVA and regression. Students are expected to have completed six credits of statistics and research methods before enrolling in this course.

PSYC 8110 Research Design and Quantitative Methods II 3 (3) Research methodologies; experimental, quasi-experimental and nonexperimental designs emphasizing applied psychological research; scientific method; basic versus applied research; technical writing; grant writing and ethics. Prereq: PSYC 8100.

PSYC 8130 Research Design and Quantitative Methods III 3 (3) Advanced course in applications of multivariate data analysis in industrial and other work-related settings. Topics include the major advanced and multivariate data analytic tools needed for research in applied psychology. Prereq: PSYC 8100.

PSYC 8140 Laboratory in Quantitative Methods 1 (2) Laboratory in data analysis. Emphasis is on determining and conducting appropriate analyses, along with interpreting and presenting results. Analytic procedures covered include regression diagnostics, mediation, moderation, generalized linear models, hierarchical linear models, and factor analysis. Prereq: PSYC 8100. Prereq or concurrent enrollment: PSYC 8130.

PSYC 8150 Advanced Studies in Systems and Theories 3 (3) Foundations of contemporary psychology, origins of major theories, conceptions of scientific knowledge implicit in them and reasons for accepting or rejecting them.

PSYC 8220 Human Perception and Performance 3 (3) Basic research on human perception as applied to task performance; vision and audition in adults; basic knowledge of human sensory and perceptual characteristics as applied to such tasks as machine operation, task performance, etc.

PSYC 8330 Advanced Cognitive Psychology 3 (3) Research and theory concerning perception, memory, reasoning; problem solving, knowledge representation, psychology of language, semantics, attention, concept formation and other high-level mental processes. Applications of these areas are considered.

PSYC 8350 Advanced Human Factors Psychology 3 (0) Foundation from which to study interactions between human beings and systems in order to maximize safety, performance and user satisfaction. Integration and application of basic research and theory in sensation, perception, cognition and performance control.

PSYC 8370 Ergonomics for Applied Psychology 3 (3) Perception and action capabilities of humans as they relate to the design of machines and environments; biomechanics, anthropometry, human movement and work, and the perceptual support of action.

PSYC 8400 Usability Analysis and Crew Assessment 3 (3) Hands-on exposure to human factors methods for evaluating the usability of computer interfaces and assessing team performance in fast-paced tasks. May include cognitive task analysis, heuristic evaluation, usability testing, sequential data analysis, cognitive modeling, workload and situation-awareness measurement, measurement of team knowledge, operating simulators.

PSYC 8520 Advanced Studies in Social Psychology 3 (3) Human social behavior from the perspective of the individual as a participant in social relationships; contemporary theories of human social behavior and human behavior in social settings.

PSYC 8600 Psychology of Training and Evaluation 3 (3) Evaluation issues such as criteria development, organizational assessment, process, and outcome criteria along with instructional methodologies such as fairness in training, special populations, second careers, hard-core unemployment and ethics of organizational and industrial change.

PSYC 8610 Personnel Psychology 3 (3) Theory, techniques and legal issues involved in the effective matching of individuals' needs, preferences, skills and abilities with the needs and preferences of organizations. Topics include research methods, prediction issues, tests and other predictors, decision making and job evaluation. Prereq: PSYC 8100.

PSYC 8620 Organizational Psychology 3 (3) Investigation of forms of organizational structure and basic theories of organizations. Includes research and theories on human behavior in organizations including motivation, leadership and job satisfaction. Discusses relationships between theories and research on human behavior and organization development and change.
PSYC 8630 Work Motivation and Satisfaction 3 (3) Explanations for absenteeism, productivity, job satisfaction and withdrawal, as well as their interrelations. Methods of measuring attitudes and opinions and general theories of human motivation. Preq: PSYC 8620.

PSYC 8670 Legal Issues in Personnel 3 (3) Discrimination law and its relevance to the practice of industrial/organizational psychology. Compliance with Title 7, the Age Discrimination in Employment Act and the Americans with Disabilities Act.

PSYC 8680 Leadership in Organizations 3 (3) Theories of leadership and current leadership research. Theoretical approaches include trait, behavioral, contingency, transactional and transformational approaches. Current leadership issues may include leadership perceptions, gender and leadership, and executive succession.

PSYC 8690 Advanced Personnel Selection 3 (3) Advanced seminar covering details of personnel selection techniques used in organizations. Techniques covered may include biodata, cognitive and physical ability tests, personality tests, interviews and assessment centers. Preq: PSYC 8610.

PSYC 8710 Psychological Tests and Measurement 3 (3) Advanced survey of psychological test development, evaluation and utilization in organizational research settings; professional guidelines for the practice of testing in industrial/organizational psychology and legal guidelines for using tests in industry.

PSYC 8730 Structural Equation Modeling in Applied Psychology 3 (3) Fundamentals of the statistical techniques involved in structural equation modeling (SEM) in applied psychology. This is an intensive, computer-based technique that incorporates elements of path analysis, confirmatory factor analysis and structural models. Preq: PSYC 8100 or consent of instructor.

PSYC 8820 Survey of Occupational Health Psychology 3 (3) Issues in the newly developing field of occupational health psychology; integration of knowledge bases from human factors, industrial organizational, health psychology and related disciplines; biopsychosocial perspective where students develop problem-solving skills and interdisciplinary knowledge. Preq: PSYC 8620.

PSYC 8850 Organizational Stress 3 (3) Considers stressors in the workplace that have the capacity to undermine an individual's well-being and performance. Addresses comprehensive models of organizational stress, methodological challenges in studying workplace stress, factors that reduce the negative impact of stress, and organizational interventions to reduce the negative consequences.

PSYC 8910 Master's Thesis Research 1-3 (1-3) Master's Thesis Research

PSYC 8950 Applied Psychology Internship 3 (3) Supervised field experience in industry, business, or government. Site location, on-site supervision and credit hours must be approved in advance by graduate coordinator.

PSYC 8970 Special Problems in Applied Psychology 1-9 (1-9) Study of a particular topic under the direction of a faculty member. Specific program organized by student and faculty member and submitted to graduate coordinator for approval. Project is not used to support MS thesis or dissertation. May be repeated for a maximum of 21 credits.

PSYC 8990 Selected Topics 3 (3) Selected current and classic topics not covered in other courses. May be repeated for credit.

PSYC 9910 Doctoral Dissertation Research 1-9 (1-9) Doctoral Dissertation Research

Rhetorics, Communication and Information Design

RCID 8010 Histories of Rhetorics 3 (3) Details historical beginnings from preplatonics, Sophists, Aristotle, Plato to early work of K. Burke (c. 1940). Attention is given to primary-secondary works, including historiographical principles of rhetorics, "the sister arts" (ut pictura poesis, ekphrasis, and technē (as human faculty and mechanical technology). Preq: RCID major or consent of instructor.

RCID 8020 Cultural Research Methods 3 (3) Continuation of RCID 8010, from 1940 to the present. Focuses on rhetorical inventions as traditional memory and innovative counter-memory. Includes such theorists as K. Burke, G. Ulmer and P. Miller. Includes algorithmic, artistic, aleatory procedures, critical, modern, postmodern topoi and ethnographic grammatologies; gestural, oral, digital, literate and orate logics; graphic/filmic collage-montage; "rhythm science," and sampling-remixing field. RCID 8010.

RCID 8030 Empirical Research Methods 3 (3) Study of the principles and applications of empirical method in research. Includes sampling techniques, measurement, reliability, validity in collecting-analyzing data, using parametric/nonparametric statistical procedures. Considers approaches to content studies as well as survey and quasi-experimental research. Discusses philosophic writings of scholars such as Popper and Kuhn and content-specific work of Lazarsfeld, Laswell, Hovland, among others. Preq: RCID major or consent of instructor.

RCID 8040 Visual Rhetorics 3 (3) Examines post-1945 modes of visual rhetoric and differing critical perspectives on their functions. Attention is given to key texts and visual creations to gain awareness of how visual codes operate in interior worlds and public life. Topics include the Challenge of Abstraction, Culture of Display, Body as Marketing Tool. Preq: RCID major or consent of instructor.

RCID 8050 Rhetorics, Communication, Information Technologies 3 (3) Hands-on examination of communication technologies used widely in academic and industry settings. Focuses on such intermedia as audio, video, Web, MOOs, Blogs, serious computer games and all emerging technologies. Preq: RCID major or consent of instructor.

RCID 8100 Pedagogy, Administration and Assessment 3 (3) Theory and praxis of professional communication in academic instruction and selected methods of pedagogical and programmatic assessment. Emphasizes communication-intermedia across the curriculum, academic program administration and scholarship of teaching and learning. May be repeated for a maximum of six credits. Preq: RCID major or consent of instructor.

RCID 8110 Perspectives in Information Designs 3 (3) Offers multiple historical and theoretical perspectives for designing and presenting information in a digital medium, focusing on the relationship between the physical symbolic and virtual. Considers the use of humanistic-rhetorical models in video and design multimedia projects that demonstrate transactions among theoretical perspectives. May include such models as homeostasis, autoapoiesis and virtuality. Preq: RCID major and RCID 8100; or consent of instructor.

RCID 8130 Special Topics 3 (3) Study of varying topics determined by such rubrics as history, method, criticism, place, time, subjectivity, models, memory, styles; or determined by such permutations and combinations of rubrics as ethos-gender-sex, theory-practice, rhetoric-poetics, politics-poetics, techné-technology, cultural-digital studies, analog-digital. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: RCID 8020 and RCID 8030; or consent of program director.

RCID 8310 Independent Research and Study 3 (3) Supervised reading in areas and concentrations where there is no comparable seminar or coursework. May be repeated for a maximum of nine credits. Students must have completed five RCID cognate seminars before enrolling in this course. Preq: RCID 8020 and RCID 8303 and RCID 8400 and RCID 8500 and consent of program director and chair of advisory committee.

RCID 8330 Graduate Readings 3 (3) Independent research/study focusing on preparation of dissertation project, with two support areas. May be repeated for a maximum of nine credits. Students must have completed five RCID cognate seminars before enrolling in this course. Preq: RCID 8020 and RCID 8303 and RCID 8400 and RCID 8500 and consent of program director and chair of advisory committee.
Courses of Instruction

REAL ESTATE DEVELOPMENT

RED 8000 Real Estate Development Process 3 (3) Real estate and land development process from the developer’s perspective. Cases and lectures are presented by leading experts in the development industry. Emphasizes participants of the development team and how to become a developer/“master builder” to create a superior built environment. Preq: Consent of instructor.

RED 8010 Real Estate Market Analysis 3 (3) Processes and data sources used to analyze the supply and demand for various building types. Explores demographic, technological and economic trends affecting markets. General market analysis supply and demand approaches, including the use of GIS, are developed and applied primarily to residential, retail and office markets at specific sites. Preq: Consent of instructor.

RED 8020 Real Estate Development Field Tour Seminar 3 (9) Examines the processes of creating quality development within the risk-reward framework focusing on design feasibility from the perspectives of the development team. Approximate two-week tour of the South Carolina Coast or other environs visits approximately 15 developments and key actors involved. To be taken Pass/No Pass only. Preq: MRED 7000 or consent of instructor.

RED 8030 Public-Private Partnership Development 3 (3) Focuses on public-private partnerships in the structuring, negotiating and implementing the design, development, construction and management of buildings and areas. Emphasis is on redevelop/renovate and infill development, incentive tools and techniques, and market and feasibility issues for development within the risk-reward framework. Preq: RED 8000 and consent of instructor.

RED 8040 Practicum in Residential Development 3 (3) Exploration of the residential development process. Guest speakers, case studies and field visits are used. Feasibility, market studies and financial analysis for a real world proposed development are completed by diverse student teams. Preq: Consent of instructor.

RED 8050 Practicum in Commercial Development 3 (3) Exploration of the commercial development process, especially for office and retail properties. Guest speakers, case studies and field visits are used. Capstone preliminary feasibility analysis is completed by diverse student teams for a real world proposed development. Preq: Consent of instructor.

RED 8100 Real Estate Seminar Roundtable 1 (1) Weekly course that brings students and premier real estate professionals together through on-site or video conference sessions. Presentations and discussions occur regarding cutting-edge projects and industry issues from around the country and internationally. Preq: Enrollment in MRED program or consent of instructor.

RED 8110 Summer Internship in Real Estate Development 3 (9) Pre-planned, pre-approved, faculty-supervised internship designed to give students on-the-job learning in support of classroom education. Internships must be no less than ten full-time, consecutive weeks with same internship provider. Ancillary study abroad experience or two, three-credit classes in place of internship requirements are possible with approval of MRED Director. To be taken Pass/No Pass only.

RED 8120 Real Estate Technology 2 (2) Demonstrates the technology used by the real estate industry pertaining to site analysis and land planning, vertical design, location analysis and market research and feasibility analysis. Preq: Consent of instructor.

RED 8130 Real Estate Development Strategic Planning 3 (3) Seminar examines the importance of strategy in the success of real estate companies and projects. Leadership, current economic conditions and the real estate cycle are also explored in a way of identifying successful strategies and the role leadership plays in their execution. Preq: Second year MRED student.

RED 8140 Resort and Second Home Communities Seminar 3 (3) Advanced seminar on resort and second home communities focusing on the full range of development issues pertaining to this important and expanding real estate market. Special emphasis on market and feasibility issues, including analysis of value-creation amenities such as golf/tennis, eco-environment, marina, equestrian, skiing and wellness. Preq: Second year MRED student.

RED 8160 Preservation Feasibility for Real Estate Professionals 3 (3) Students gain familiarity with historic tax incentives, the adaptive reuse of historic structures and the feasibility of historic rehabilitation projects within the context of contemporary real estate development processes. Preq: Enrollment in the Master of Real Estate Development program.

RED 8890 Selected Topics 3 (3) Topics emphasizing current literature and results of current research. May be repeated for a maximum of nine credits, but only if different topics are covered. Preq: Consent of instructor.

REL 6010 Studies in Biblical Literature and Religion 3 (3) Critical examination of a selected topic in biblical studies. Topics vary from year to year. May be repeated once for credit.

REL 6020 Studies in Religion 3 (3) Thorough examination of a selected topic in one or more of the religious traditions of the world or of religious life in a particular region. Topics vary from year to year. May be repeated once for credit.

REL 6040 History of Early Christianity 3 (3) Study of the history, social and doctrinal, of early Christianity up to 600 A.D.

REL 6520 History of Early Christianity 3 (3) Study of the history, social and doctrinal, of early Christianity up to 600 A.D. Preq: Consent of instructor.

REL 6990 Independent Study 1-3 (1-3) Study of selected problems, issues, or movements in religion under the direction of a faculty member chosen by the student. Student and faculty member develop an individualized course of study approved by the department chair prior to registration. May be repeated for a maximum of six credits. Preq: Consent of instructor.

RURAL SOCIOLOGY

RS 6010 Human Ecology 3 (3) Analysis of the inter-relationships between the physical world, modifications in natural environments, human settlement patterns, and institutions that both encourage and regulate environmental modification. Emphasizes conditions whereby natural resources become public policy concerns. Offered spring semester only. Preq: Junior standing.

RS 6590 The Community 3 (3) Close analysis of the development of contemporary communities and their place in society. Continuing effects of industrialization, migration, and technological change on community location and structure are examined. Structural relations of social class, status, and the associations among institutions are explored. Preq: Junior standing.

SOCIology

SOC 6010 Human Ecology 3 (3) Analysis of the interrelationships between the physical world, modifications in natural environments, human settlement patterns, and institutions that both encourage and regulate environmental modification. Emphasizes conditions whereby natural resources become public policy concerns. Offered spring semester only. Preq: Junior standing.

SOC 6040 Sociological Theory 3 (3) Survey of the development of sociological theory. Required of all Sociology majors. Preq: SOC 2010 or SOC 2020; and Junior standing.

SOC 6140 Policy and Social Change 3 (3) Uses the sociological perspective to examine policy development, implementation, and evaluation in the public and private sectors. Specifically, focuses on values and ethics and effects of social change efforts on the outcomes of policy formation, social planning, and implementation. Preq: SOC 2010 or SOC 2020 and Junior standing.

SOC 6330 Globalization and Social Change 3 (3) Examination of the social and historical causes of development and underdevelopment. Various sociological theories of development are reviewed. Selected countries are examined in an international context. Preq: SOC 2010 or SOC 2020 and Junior standing.
SOC 6590 The Community 3 (3) Close analysis of the development of contemporary communities and their place in society. Continuing effects of industrialization, migration, and technological change on community location and structure are examined. Structural relations of social class, status, and the associations among institutions are explored. Prq: Junior standing.

SOC 6600 Race and Ethnicity 3 (3) Investigation of sociological perspectives on race, ethnic relations, and social stratification. Includes analysis of the impact of social class on minority movements. Prq: SOC 2010 or SOC 2020 and Junior standing.

SOC 6800 Medical Sociology 3 (3) Study of sociocultural factors in the etiology and treatment of physical illness, medical occupations and professions, and the organization of health care delivery systems. Prq: SOC 2010 or SOC 2020 and Junior standing.

SOC 6810 Aging and Death 3 (3) Sociological orientation to aging populations focusing on the impact of health care, welfare, and retirement systems. Includes dying as a social phenomenon, suicide, euthanasia, and funerals. Prq: SOC 2010 or SOC 2020 and Junior standing.

SOC 6840 Child Abuse and Treatment 3 (3) Comprehensive examination of child abuse, neglect, and exploitation as major social problems; causes, effects, and prevalence of physical, sexual, and emotional maltreatment; definition controversies; policy and legal considerations; therapeutic approaches for children and their caretakers; child maltreatment and the judicial system. Prq: Junior standing.

SOC 6910 The Sociology of Policing 3 (3) Introduction to the major issues of contemporary policing in the U.S. from a sociological perspective. Topics include the changing functions and structure of policing, the police subculture, and the role of the police in a liberal democracy. Prq: SOC 3880.

SOC 6930 Sociology of Corrections 3 (3) Analysis of correctional alternatives. Topics include governing strategies and their impact, prison populations (male, female, and juvenile), innate social structures, treatment and custody issues, community-based alternatives (probation, parole, electronic monitoring, and work release), and correctional management issues.

SOC 6940 Sociology of Organized Crimes 3 (3) Examines the multifarious aspects of criminal organizations, namely their structure, methods, and networks. Specific topics may include white-collar crime and traditional, nontraditional, and transnational organized crime. Prq: SOC 3880.

SOC 8030 Survey Designs for Applied Social Research 4 (3) Survey research design principles, procedures and techniques used in applied sociology; instrumentation; data collection, management and interpretation. Offered fall semester only. Prq: RS 3030 or SOC 3030. Coreq: SOC 8031.

SOC 8031 Survey Designs for Applied Social Research Laboratory 0 (2) Non-credit laboratory to accompany SOC 8030. Coreq: SOC 8030.

SOC 8050 Evaluation Research 3 (3) Research methods and techniques of computer-assisted data management and analyses used in evaluating policies, operation, organization and effectiveness of social programs in the private and public sectors; microcomputer software packages available for these purposes. Offered spring semester only. Prq: SOC 8030.

SOC 8070 Advanced Research Methods 3 (3) Advanced methods in social research; measuring techniques and data analysis strategies; practical experience in various phases of social research. Offered spring semester only. Prq: SOC 8030.

SOC 8100 Theoretical Models in Applied Social Research 3 (3) Comparative analysis of theoretical models in sociology and their use in applied research; uses of these models in research concerned with the processes of industrial and economic growth and development. Prq: SOC 4040.

SOC 8120 Social Stratification 3 (3) Stratification is the comprehensive study of social inequalities, as manifest in multiple dimensions of economic class, political power, and occupational status, their intercorrelations, and the uneven distributions of these across gender, racial, and ethnic demographics. Stratification crosses the major sociological subfields and is relevant for academic, public, and policy-centered sociology.

SOC 8300 Human Systems Development: Organizations and Society 3 (3) Complex organizations such as human systems with primary focus on development and change, interorganizational relations and the influence of these structures on the community life. Offered fall semester.

SOC 8360 Environmental Sociology 3 (2) Introduction to environmental sociology, relationship among human behavior, society and the environment; focus on the natural rather than the built environment in U.S. and global issues. Coreq: SOC 8361.

SOC 8361 Environmental Sociology Laboratory 0 (1) Non-credit laboratory to accompany SOC 8360. Coreq: SOC 8360.

SOC 8910 Master's Thesis Research 1-12 (1-12) Master's Thesis Research

SOC 8920 Selected Topics in Sociology 3 (3) Current topics in applied sociology not covered in other graduate courses. May be repeated once for credit.

SOC 8950 Field Experience 1-6 (1-6) Supervised work experience in a public agency or private enterprise to gain planning, research and policy experience. May be repeated once for a maximum of six credits. Students are expected to have completed 12 hours of 8000-level coursework in Sociology before enrolling in this course.

SOC 8960 Independent Study 1-3 (1-3) Individual readings or research in a topic area selected according to a student's interests or program needs. May be repeated for a maximum of six credits. Prq: Approval of director of graduate studies.

SOC 8970 Departmental Research and Professional Development Seminar 1 (1) Presentation of current research by Department of Sociology faculty, staff, graduate students and visiting researchers. Professional development seminars related to the research process, internships and employment opportunities. May be repeated for a maximum of four credits. To be taken Pass/No Pass only.

SPANISH

SPAN 6990 Special Topics 3 (3) Study of timely or special topics in Spanish. May be repeated for a maximum of six credits, but only if different topics are covered. Prq: Consent of department chair.

SOILS AND SUSTAINABLE CROP SYSTEMS

SSCS 6450 Regulatory Issues and Policies 1 (1) Introduction to regulations of agricultural practices and implementation of novel technologies and products. Emphasizes patenting biotechnology inventions and ethical issues. Includes survey of state and governmental agencies with responsibilities to avoid risk to humans, non-target organisms, and preservation of food safety, agricultural resources, and natural ecosystems.

SSCS 6500 Agricultural Biosystems and Risk Assessment 1 (1) In-depth discussion of recent articles on agricultural biotechnology and related issues. Independent and comprehensive literature survey and critical discussions on introduction of modified organisms into biological systems, agricultural application, and bio-risk assessment. Discussions relate to scientific discovery, application, and regulatory issues of agricultural biotechnology.

SSCS 6510 Agricultural Biotechnology and Global Society 1 (1) In-depth discussion of recent articles on agricultural biotechnology and related global issues. Includes independent and comprehensive literature survey and critical discussions on implementation of biotechnology products in the context of world agricultural production systems and economics. Discusses the role of international agencies and social and ethical issues.

SYSTEMS ENGINEERING

SYSE 8010 Systems Engineering I 3 (3) Educates students on the complete system design process using a project-oriented format. Course consists of topical areas in needs analysis, concept generation and development, prototyping, evaluation, cost analysis, implementation and delivery. Prq: Consent of instructor.

SYSE 8020 Systems Engineering II 3 (3) Addresses analysis and design of complex systems by considering human, hardware and software components of the system. Techniques for unambiguously defining a problem and designing a solution are applied to a model problem. Architectural techniques are used to assemble a solution that satisfies functional and non-functional requirements. A range of qualitative and quantitative verification and validation techniques for evaluating the fitness of a solution are examined and used. Prq: SYSE 8010.

SYSE 8530 Improving Systems Using Quality and Lean Principles 3 (3) Course focuses on educating students in the theory of quality control, its principles, and the application of Quality and Lean techniques to manufacturing and service systems.

SYSE 8590 Capstone Project 3 (3) Capstone experience in the analysis and design of systems by carrying out a substantial project. May be repeated for a maximum of six credits. Prq: Admission to the Systems Engineering program.
THEA 6300 Dramatic Literature II 3 (3) See ENGL 4300.

THEA 6470 Playwriting Workshop 3 (3) Workshop in the creative writing of plays. May be repeated once. Preq: ENGL 3470 or THEA 3470 or consent of instructor.

THEA 6720 Improvisations: Interpreting and Developing Texts 3 (3) Practical applications using drama as a learning tool to strengthen writing skills, motivate collaboration, heighten analytical skills. Students use improvisation to analyze texts and to revise original work, consider theory and research of contemporary scholars, and develop approaches to literature and composition based on readings and drama experiences. Preq: Senior standing or consent of instructor.

THEA 6870 Stage Lighting I 3 (2) Theory and practice of stage lighting through an understanding of various lighting instruments, lighting control systems, and execution of lighting designs. Coreq: THEA 6871.

THEA 6871 Stage Lighting I Laboratory 0 (1) Non-credit laboratory to accompany THEA 6870. Coreq: THEA 6870.

THEA 6970 Scene Painting 3 (2) Practical study of basic painting techniques for the theatre including layout, proper use of materials, painting styles, and texturing techniques. Coreq: THEA 6971.

THEA 6971 Scene Painting Laboratory 0 (1) Non-credit laboratory to accompany THEA 6970. Coreq: THEA 6970.

THEA 6990 Independent Studies 1-3 (1-3) Tutorial work for students with special interests outside the scope of existing courses. May be repeated for a maximum of six credits. Preq: Consent of department chair.

VOCATIONAL-TECHNICAL EDUCATION

VTED 8100 Foundations of Vocational and Technical Education 3 (3) Evolution of vocational and technical education during the 20th century and current trends; sociological, psychological and philosophical theories underlying current objectives; definition of broad parameters of the field.

VTED 8330 Curriculum Construction in Vocational and Technical Education 3 (3) Students develop a specific course in a selected vocational and technical education area by specifying performance goals and building around these objectives. Preq: AGED 6400.

VTED 8500 Programs, Concepts and Issues in Vocational and Technical Education 3 (3) Current activities and debates in vocational and technical education; traditional and innovative programs, career education, school finance, disadvantaged students, handicapped youth, sex equality and other specialized programs.

VTED 8820 Seminar I (1) Current issues and problems and proposed research projects.

VTED 8930 Advanced Research Design and Analysis 3 (3) Emphasis on the dissertation from the proposal to the fully developed outline of all chapters. Required of all doctoral candidates in the vocational/technical education program. Preq: AGED 8890 or ED 8890.

VTED 9550 The Two-Year College 3 (3) Historical developments, functions, organization and administration of the two-year college. Preq: Admission to PhD program in Educational Leadership or consent of instructor.

VTED 9800 Internship in Vocational/Technical Education 1-6 (1-6) (0, 3-18) Internship in which students gain experience working in a chosen area of specialization in vocational/technical education; field experience activities must be planned to build competence in the student’s field of specialization. To be taken Pass/No Pass only. Preq: Consent of major advisor.

VTED 9910 Doctoral Dissertation Research 1-12 (1-12) Doctoral Dissertation Research

WILDLIFE, FISHERIES AND BIOLOGY

WFB 6100 Wildlife Management Techniques 3 (1) Covers field and laboratory methods commonly used in wildlife management and research. Students interact with wildlife professionals. Topics include research methodology, estimating wildlife population characteristics, condition measures, and food habits; species determination, sex, and age; capture; population estimating methods; GIS and mapping techniques, habitat evaluation and improvement. Preq: WFB 3000 and WFB 3500.

WFB 6101 Wildlife Management Techniques Laboratory 0 (6) Non-credit laboratory to accompany WFB 6100. Coreq: WFB 6100.

WFB 6120 Wildlife Management 3 (2) Basic principles and general practices of wildlife management and conservation are covered. Major problems concerning the management of wildlife resources, with emphasis on upland game species. Laboratory work includes practical work on the Clemson University woodlands and field trips to several areas where wildlife management is being practiced. Preq: WFB 3000 and WFB 3500. Coreq: WFB 6121.

WFB 6121 Wildlife Management Laboratory 0 (3) Non-credit laboratory to accompany WFB 6120. Coreq: WFB 6120.

WFB 6140 Wildlife Nutritional Ecology 3 (3) Concepts of how terrestrial wildlife obtains and utilizes energy and nutrients in wild ecosystems are taught. Energy and nutrient availability are discussed in the ecological context of distribution, flow, and cycling in natural and modified foraging areas. Physiology of digestion is discussed for major homeotherms. Preq: WFB 3000 and WFB 3500.

WFB 6150 Quality Deer Management 3 (3) Quality Deer Management (QDM) is a stewardship philosophy that provides desirable hunting experiences by producing whitetailed deer herds with a natural age and sex structure and population size appropriate for habitat conditions. The course will emphasize herd management, habitat management, hunter management and herd monitoring. Online course. Preq: Junior standing.

WFB 6160 Fishery Biology 3 (2) Principles underlying freshwater fish production. Introduction to major groups of freshwater fishes and their habitats. Topics include identification, age and growth, fecundity, food habits, populations estimation, environmental evaluation, management practices, and fish culture. Preq: WFB 3000 and WFB 3500. Coreq: WFB

WFB 6161 Fishery Biology Laboratory 0 (3) Non-credit laboratory to accompany WFB 6160. Coreq: WFB 6160.

WFB 6300 Wildlife Conservation Policy 3 (3) Deals with the ecological rationale and management implications of public policy designed for the conservation of American wildlife resources. Emphasis is on managed-land issues. Preq: WFB 3000 and WFB 3500.

WFB 6440 Wildlife Damage Management 3 (2) Covers the philosophical, sociological, ecological, and economical basis for controlling damage caused by animals problem wildlife populations. Emphasis is placed on fundamentals of prevention and control of damage caused by vertebrate species, especially mammals and birds. Includes interaction with federal and state agencies and private consultants. Preq: WFB 3000 and WFB 3500. Coreq: WFB 6441.

WFB 6441 Wildlife Damage Management Laboratory 0 (3) Non-credit laboratory to accompany WFB 6440. Coreq: WFB 6440.

WFB 6520 Aquaculture 3 (3) Basic aquacultural techniques applied to freshwater and marine organisms; past and present culture of finfishes and shellfishes around the world; principles underlying fish production; water quality, feeding, and nutrition as they influence production of cultured aquatic organisms. Preq: WFB 3000 and WFB 3500.

WFB 6600 Warmwater Fish Diseases 2 (2) Study of diseases in warmwater fish including infectious and noninfectious processes. Preq: WFB 3000 and WFB 3500.

WFB 6620 Wetland Wildlife Biology 3 (3) Study of wetland wildlife habitats, emphasizing classification by physical, chemical, and biological characteristics, importance of wetland habitat for management and production of wetland wildlife species. Offered fall semester only. Preq: WFB 3000 and WFB 3500.

WFB 6680 Herpetology 4 (3) Physiology, functional morphology, ecology, evolution, biomechanics and current literature of amphibians and reptiles. Laboratory study examines morphology and identification of world families and United States genera, as well as southeastern species. Field trips are required. Preq: BIOL 1040 and BIOL 1060 or BIOL 1110. Coreq: WFB 6681.

WFB 6681 Herpetology Laboratory 0 (3) Non-credit laboratory to accompany WFB 6680. Coreq: WFB 6680.

WFB 6690 Aquatic Insects 3 (1) Identification, life history, habitats, and interrelationships of aquatic insects; techniques of qualitative field collecting; important literature and research workers. Preq: ENT 3010. Coreq: WFB 6691.

WFB 6691 Aquatic Insects Laboratory 0 (6) Non-credit laboratory to accompany WFB 6690. Coreq: WFB 6690.
WFB 6750 Economics of Wildlife Management and Policy 3 (3) Integrated approach to the study of the economics of wildlife. Topics include determination of market and nonmarket value, single and multiple species management, enterprise cost and returns, marketing wildlife, leasing methods, complementarity and competitiveness with agricultural and forestry enterprises, and timber and crop damage cost estimates and control. Prereq: APEC 2020 or ECON 2000 or ECON 2110 or FOR 3040 or WFB.

WFB 6760 Field Methods in Avian Monitoring and Conservation 3 (1) Field-intensive introduction to the identification, ecology, and conservation of North American birds and their habitats with an emphasis on southeastern species. Includes avian survey and census techniques. Two or three weekend (Friday-Sunday) field trips are required. Prereq: BIOL 1040 and BIOL 1060; or BIOL 1110. Coreq: WFB 6761.

WFB 6761 Field Methods in Avian Monitoring and Conservation Laboratory 0 (4) Non-credit laboratory to accompany WFB 6760. Coreq: WFB 6761.

WFB 7120 Wildlife Conservation for Teachers 2-3 (2-3) Principles and practices of wildlife conservation providing an overview of wildlife diversity, ecology and management in the state; population census, wildlife identification, capture and habitat management of game and nongame species. For in-service teachers only. Prereq: Consent of instructor.

WFB 8150 Principles of Wildlife Biology 3 (2) Theories and principles applicable to wildlife biology emphasizing upland game species. Offered fall semester of even-numbered years only. Coreq: WFB 8151.

WFB 8151 Principles of Wildlife Biology Laboratory 0 (3) Non-credit laboratory to accompany WFB 8150. Coreq: WFB 8150.

WFB 8180 Waterfowl Ecology and Management 3 (2) Identification, ecology and management of waterfowl. Laboratory work includes demonstration and application of relevant waterfowl management techniques, current literature topics and field trips. Offered fall semester of odd-numbered years only. Prereq: BIOL 4410 or WFB 4120. Coreq: WFB 8181.

WFB 8181 Waterfowl Ecology and Management Laboratory 0 (3) Non-credit laboratory to accompany WFB 8180. Coreq: WFB 8180.

WFB 8400 Fish Management 3 (2) Principles and techniques of managing aquatic systems for recreational and/or commercial fishing, emphasizing streams, rivers, estuaries and impoundments. Laboratory work includes demonstration and application of management techniques and field trips to observe management practices. Offered fall semester of odd-numbered years only. Prereq: WFB 4160. Coreq: WFB 8401.

WFB 8401 Fish Management Laboratory 0 (3) Non-credit laboratory to accompany WFB 8400. Coreq: WFB 8400.

WFB 8600 Diagnostic Procedures of Warmwater Fish Diseases 2 (1) Warmwater fish disease diagnostic procedures employing proper protocol to be followed by a fish disease diagnostician. Offered summer session of odd-numbered years only. Prereq: WFB 4600. Coreq: WFB 8601.

WFB 8601 Diagnostic Procedures of Warmwater Fish Diseases Laboratory 0 (2) Non-credit laboratory to accompany WFB 8600. Coreq: WFB 8600.

WFB 8610 Selected Topics 1-4 (1-4) Current areas of aquaculture, fisheries and wildlife management and research. May be repeated for credit. Prereq: Consent of instructor. Coreq: WFB 8611.

WFB 8611 Selected Topics Laboratory 0 (99) Non-credit laboratory to accompany WFB 8610. Coreq: WFB 8610.

WFB 8630 Special Problems in Wildlife and Fisheries Biology 1-4 (1-4) Research not related to a thesis. Credit varies with problems selected. Prereq: Consent of instructor.

WFB 8910 Master’s Thesis Research 1-12 (1-12) Master’s Thesis Research

WOMEN’S STUDIES

WS 6230 Women in the Developing World 3 (3) Comparative anthropological study of women and their status in developing countries around the world. A survey of women’s daily lives in a global context, emphasizing education, economics, and the environment. Case studies include microfinance, literacy, reproductive rights and practices, and the impact of religious fundamentalism on women. Prereq: Sophomore standing.

WS 6360 Feminist Literary Criticism 3 (3) Introduces the germinal works of feminist literary theory and criticism. Outlines the development of modern literary criticism by studying feminist versions of the major critical methodologies. Prereq: ENGL 3100.
